The House considered the energy and water development bill on the floor in 1 day. The Senate had a total of 46 numbered amendments to the bill. But, within those 46 amendments, there were nearly 400 individual items in disagreement. The conference agreement represents the best efforts of the House and Senate conferees to achieve consensus on those 400 items. Many items had to be reduced or changed to accomplish agreement with the Senate. In addition, we had to keep in mind the need to have a bill that was acceptable to the administration.

We think we have achieved an agreement that does all of this while maintaining most of the House position.

Your House conferees did their best to maintain the House position. However, to bring back a conference report that is within the budget target for the energy and water development programs, a great many items had to be compromised.

We would like more money for energy, for the weapons program, and for the water projects. But, if we have to stay close to the budget level and keep outlays down, we could not provide all of the funds for all of the programs and projects to the extent we would have liked.

Mr. Speaker, I am pleased to advise the House that the conference agreement is under the assumed allocation under the resolution.

Mr. Speaker, the conference agreement contains $2,822,050,000 in title I for the Army Corps of Engineers. This is $49,547,000 less than the bill as passed by the House and $159,237,000 more than the Senate-passed bill. These funds will finance 163 water resources projects in the planning or construction phase.

For title II, the Bureau of Reclamation, the conferees recommend a total of $777,915,000 which is $22,624,000 less than the House-passed bill and $10,855,000 more than the Senate-passed bill. This will fund 105 water resources projects in the planning or construction phase.

In my view, the conference agreement provides for a financially prudent and evirnonmentally sound water resources development program.

The conference agreement contains $11,008,838,000 for the Department of Energy programs in title III. This includes $1,772,271,000 for energy supply, research activities; $229,391,000 for power marketing administrations; $521,460,000 for the nuclear waste disposal fund; and $29,491,000 for the Federal Energy Regulatory Commission. The energy accounts include $216,032,000 for solar, geothermal, and renewable energy development; $653,050,000 for nuclear energy development; and $382,000,000 for fusion energy development. The conference agreement provides a total of $7,604,615,000 for atomic energy defense activities. This is an increase of $282,294,000 over the fiscal year 1985 level and $428,285,000 below the President's budget request.

Mr. Speaker, the conference agreement includes $642,915,000 for six independent agencies and commissions in title IV, including $130 million for the Appalachian Regional Development Program and an additional $2,200,000 for administrative expenses of the ARC. Of the funds provided for the ARC, $3 million is provided for each of the following port development projects: Riverport Harbor, Chattanooga, TN; Fulton-Tupelo and Amory, MS; and Columbus, MS. In addition, $418 million is provided for the Nuclear Regulatory Commission and $113 million is provided for the Tennessee Valley Authority.

I will insert a table in the RECORD at this point which summarizes the financial aspects of the conference agreement.

Mr. Speaker, I yield such time as he may consume to my good friend, the gentleman from Iowa [Mr. SMITH], the very outstanding chairman of the Appropriations Subcommittee on Commerce, Justice, State, and Judiciary.

Mr. SMITH of Iowa. Mr. Speaker, I thank the gentleman for yielding, and I want to compliment the gentleman from Alabama and also the gentleman from Indiana [Mr. MYERS] for bringing this bill through conference and back to the floor at this time.

We are still having a big trade deficit. No small part of that is to pay for energy. Energy is still important to develop in this country so we do not have to spend so many dollars overseas for energy.

Another thing is, there has been an accident in the St. Lawrence Seaway in the last few days. Thousands of tons of grain were held up and could not be exported. We use exports of grain to help offset part of this trade deficit, a major part of it, as a matter of fact.

That brings home the fact that we really are facing in this country a bad situation with regard to the infrastructure. It is going to be a crisis soon. We are not putting enough money into supporting the infrastructure. Water resources projects are an important part of that infrastructure as well as other things that are in this bill. So this is a very important bill, and I would certainly hope that there are no votes against the conference report.

Mr. BEVILL. I thank the distinguished chairman and agree with him so much. Our 25,000 miles of inland waterways handle 80 percent of our exports. We cannot afford to let that most outstanding inland waterway system in the world become deteriorated or stagnant. We must maintain it, we must keep it modernized, and we must dredge our ports deeper so that we can handle all of the big vessels in the world.

We do not have a port in this country right now, we will have, but we do not have one in this country right now, that can handle many of the vessels fully loaded.

You know, that means the cost per unit goes up; that means we are less competitive; that means if we do not keep these waterways modernized, the ports deepened, so we can keep that cost per unit down, we will never be competitive, and that is still the bottom line in international trade, as the gentleman knows. We have to be competitive.

Mr. Speaker, I yield such time as he may consume to the gentleman from Tennessee [Mr. BONER], a distinguished member of the subcommittee.

Mr. BONER of Tennessee. Mr. Speaker, I rise in support of the conference report.

Mr. Speaker, as a member of the Energy and Water Appropriations Subcommittee, I rise in strong support of the conference report to accompany H.R. 2959. In particular, I would like to commend Chairman BEVILL, our ranking member JOHN MYERS, my House colleagues and our colleagues on the Senate Energy and Water Appropriations Subcommittee for reporting back to the House a strong and sensible measure.

Mr. Speaker, this measure funds two areas essential to our Nation's continued vitality and future growth. The bill funds construction along our Nation's waterways, which are an essential link to transporting goods, providing cities and towns with adequate water supplies, and protecting property otherwise subject to damage from floods and tides.

The bill also funds extremely important energy research that promises to provide the electricity needed to continue our growth into the 21st century. This summer, I had the privilege of seeing first-hand some of these energy research programs. I am convinced that this Nation is on the threshold of commercially developing nuclear energy reactors that will be capable of supplying the United States with relatively inexpensive and nearly inexhaustible power. But our Nation must make the investment necessary to develop these technologies. And, I believe, that this bill does just that.

I urge my colleagues to support this conference report.

Mr. BEVILL. Mr. Speaker, I reserve the balance of my time.

The SPEAKER pro tempore. The gentleman from Alabama [Mr. BEVILL] has consumed 7 minutes.

Mr. MYERS of Indiana. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, once again this subcommittee is the first to bring an appropriation conference report to send to the President. This subcommittee has had this record for several years, and usually we try to get it done before the beginning of the fiscal year. But we are pleased this year that we have our chairman back and thank him for his efforts and his hard work as well as that of all the other members of the conference and the staff.

As Chairman BEVILL has presented here in detail, it is a good conference report. It is under every estimate, with one exception, and that is the other body's. We did come in slightly over the other body's recommendation.

But if there is any criticism of this bill, and I have heard some from my side this morning, it is that we cut too deeply into the defense activities. We did not fund the request for nuclear weapons and other defense activities as high as the request made by the administration. But it was not because your committee is antidefense or antinuclear weapons or anything associated with that. It is the fact that the request by the administration was not adequately substantiated that these were high priority needs this year, that just had to be done this year. Some will be stretched out into other years. We will not defer or deter our defense efforts by this appropriation.

But we did increase, and again I heard some criticism this morning about the fact that we did increase, the Corps of Engineers projects. We did this by $462 million.

As Mr. SMITH of Iowa has just told you, we consider higher priorities to be some of our activities in the inland wa-

terways, the 25,000 miles that we presently have, much of which has suffered in recent years because of inadequate and insufficient maintenance; and others because we have to deepen our ports. We have a number of ports that must be deepened, to be able to be competitive with the rest of the world so that we can accommodate deeper-draft ships. We have to improve our inland waterways. We have some locks and dams that are more than 50 years old. Some are inoperable to the present time.

As Mr. SMITH just presented, the accident in the St. Lawrence Seaway has caused many days of delay, and demurrage paid by the ship companies is going to be very great. That comes right out of the pocket of the exporters in this country, particularly in the Midwest, when going through the St. Lawrence Seaway trying to rush out before the winter freeze, to get the grain out. It has been halted, trying to find alternate ways. The alternate ways, again, are the waterways, and down the Mississippi River, but we have some bottlenecks there. In the Ohio we have bottlenecks, which this committee is addressing in this bill. We did increase expenditures for these waterways, the inland waterways. It is a very high priority not only for the commerce of our country, but you might also consider it for the defense of our country, to be able to be competitive with the rest of the world.

We have in this bill conference report, $21 million less than the House passed. We have $44 million more than the Senate. But, most importantly, we have $92 million below the President's request and $351 million below last year's appropriation.

So we are under all these estimates. As the chairman has said, it passed on a voice vote when it passed originally in the House of Representatives; it also passed the other body on voice vote.

It is one that I think everyone here can support. But, most importantly, since this is the first bill to go to the President, I have just been notified by the White House that the President will sign this bill. That is most important for everyone to recognize, he will sign it.

Mr. Speaker, I reserve the balance of my time.

Mr. BEVILL. Mr. Speaker, I yield such time as he may consume to my good friend, the distinguished gentleman from Hawaii [Mr. AKAKA].

Mr. AKAKA. I thank the subcommittee chairman for yielding time to me.

Mr. Speaker, I would like to engage the chairman in a colloquy regarding funding for programs under the energy supply, research, and development account.

I would like to clarify the following three points: First, is it the intention of the conference agreement that funds are provided to conduct two simultaneous 50-kilowatt open-cycle apparatus tests that are compatible with the Hawaii open-cycle experiment; second, under the conference agreement, is $500,000 provided to PICHTR to prepare a detailed project plan; and finally, whether the conference agreement provides funds for the Hawaii Biofuels Program at the amount specified in the House report?

Mr. BEVILL. Mr. Speaker, will the gentleman yield?

Mr. AKAKA. I yield to the gentleman from Alabama.

Mr. BEVILL. On all three points, the answer to the gentleman's questions is "Yes."

Mr. AKAKA. I want to thank the chairman for his assistance and for the assistance of the staff of the Subcommittee on Energy and Water Development. The chairman and all the members of the subcommittee have labored hard to bring this conference report before the House today. The bill that they have brought to you contains funding for public works projects that are vital to the Nation, and deserves the support of every Member of the House.

The purpose of this colloquy is to establish clear legislative history for the ocean energy systems account and the biofuels account so that there will be no doubt as to how these funds are to be administered.

Because of an error in the printing of the conference report, the report language governing the administration of funds for two projects under the ocean energy systems account may be unclear. The projects I am speaking of are the two simultaneous 50-kilowatt tests and the PICHTR open-cycle project. My colloquy with the chairman will clear up any uncertainty so that the department will know how to administer these funds.

From the answer that the chairman of the Subcommittee on Energy and Water Resources has given me it is clear that the conference agreement provides funds under the ocean energy systems account for the department to conduct two simultaneous 50-kilowatt apparatus tests that are compatible with the full-scale Hawaii open-cycle experiment. Funding for the first of these two tests is contained in the budget request which was submitted by the administration and approved in the bill considered by both the House and Senate. An additional $1 million was added to the administration's request by the House and Senate so that a second 50-kilowatt test could be conducted simultaneous with the first. The budget request for the first test and the additional $1 million for the second test has been earmarked solely for the purpose of carrying out these two tests.

In addition to these parallel tests, the conference agreement provides $500,000 to the Pacific International Center for High Technology Research also known as PICHTR, to prepare a detailed project plan for the PICHTR advanced open-cycle project. Both the House and Senate reports earmark $500,000 for the PICHTR Program. Under the conference agreement, the full amount made available for this program is to be used by the Center to prepare a detailed project plan for the PICHTR open-cycle project.

Finally, the conference agreement adopts the language contained in the House report providing $500,000 for the Hawaii Biofuels Program.

I thank the gentleman for taking the time to engage in this colloquy and I yield back the balance of my time.

Mr. BEVILL. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Louisiana [Mrs. BOGGS], who is a very important member of this Appropriations subcommittee and has certainly made a great contribution to this legislation today and the legislation that we have had each year.

Mrs. BOGGS. I thank the gentleman for yielding.

Mr. Speaker, I know the gentleman from Massachusetts [Mr. CONTE] will not mind the chairman's yielding to this Member because I rise not only in support of the conference report but in great admiration for the chairman of the subcommittee [Mr. BEVILL], the gentleman from Alabama, and the ranking member, the gentleman from Indiana [Mr. MYERS], and the chairman of the full committee, the gentleman from Mississippi [Mr. WHITTEN], and the ranking member of the full committee, the gentleman from Massachusetts [Mr. CONTE], and all the staff members and the members of the subcommittee who have brought us to this splendid conference report that we present to the House today.

I thank all of them for recognizing that the infrastructure of our waterways and of our energy components throughout the United States are very much in need of revitalization and construction and to know that the trade and commerce of this country depends upon the happy solution to these problems. I should also remind everyone that the protection from flood and from devastation and from the loss of life and property is also funded within this bill.

The alternative energy resources of this country are also a very important component of this legislation. All of us have to remember that we do have a national goal of being energy sufficient and that we have to continue on the road of investigations and development of alternative sources of energy to the fossil fuels.

So it is with great gratitude that I rise today to all of the people who have been involved in bringing this legislation to its conclusion, and I hope that the Members of the House will support it overwhelmingly, and I again thank the gentleman for yielding.

Mr. MYERS of Indiana. Mr. Speaker, I yield such time as he may consume to the ranking Republican member of the Committee on Appropriations, the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. Mr. Speaker, I rise in support of this conference report on the bill, H.R. 2959, energy and water development appropriations for fiscal year 1986. Let me say that I am pleased that this is the first appropriation going through, but it is really a sad commentary on our system that we are 17 days into the new fiscal year and not one appropriation bill has been signed, though the House has sent all but two, I believe, over to the Senate, and yet not one has been passed.

Mr. Speaker, let me begin by paying special tribute to our chairman, the gentleman from Alabama [Mr. BEVILL], for his leadership of this conference. It is a tremendous tribute to his strength and dedication to duty that he undertook to chair this conference so soon after undergoing major surgery. Needless to say, we were pleased to welcome him back and I want to congratulate him on his diligence in protecting the positions of the House in conference.

I would also like to single out the subcommittee's ranking minority member, the gentleman from Indiana [Mr. MYERS]. He has devoted countless hours to the review and preparation of the items in this conference report, and is deserving of our thanks and appreciation for bringing forth a conference agreement that is fiscally responsible while meeting our critical energy and water development needs.

Mr. Speaker, although there are certain items within the bill that have not met with the complete approval of the administration, the bill as a whole is approximately $92 million below the President's budget for budget authority, and about $12 million below the President's budget for outlays. We have received word from the White House, that the President will sign this bill. Certainly there is every reason for him to do so.

I do not want to duplicate the comments of the gentlemen from Alabama and Indiana, but I would like to briefly mention one provision of this bill, the so-called Buy American provision.

As this bill passed the House of Representatives, it contained a total prohibition on the purchase of extra high voltage equipment manufactured outside of the United States. In conference, in response to some specific concerns that had been raised by the administration and by some of the power marketing authorities, we agreed to several changes in that language. We provided an exemption for procurements that are already underway upon the effective date of this measure.

We provided an exemption for the procurement of spare parts, so that spare parts for existing foreign-built equipment can continue to be obtained. In addition, we limited the cost of any American-produced equipment purchased under this provision to not more than 25 percent above the cost of the most competitive foreign bid. This had the effect of increasing the current "Buy American" differential of 6 percent.

At a time when we have a serious balance of trade deficit, we should not be contributing to it with overseas government procurement. This provision will help American electrical manufacturers compete against foreign suppliers who often engage in unfair trade practices, and will also help offset the current disparity in currency valuations. Because it is a 1-year provision, it will also create an incentive for foreign governments to open their markets to U.S. electrical equipment, so that a similar provision will not be necessary next year.

Mr. Speaker, I urge the adoption of this conference report.

□ 1215

Mr. BEVILL. Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. FAZIO], a very distinguished member of this subcommittee, who has made a great contribution to the work of the subcommittee.

Mr. FAZIO. I appreciate my chairman yielding me this time.

Mr. Speaker, this bill achieves a difficult balance in tough times. We are under the administration's outlay figures, and we're glad that we have strong signals from the administration that this bill is fiscally acceptable.

The energy issues are adequately treated in light of the administration's reduction in interest and funding of this important national priority. In the area of water development there are two particularly important compromises in this bill for California.

We have reached a consensus on the Santa Ana flood control project, which has enabled us to restore to the bill a $4 million request from the administration.

In return, all of California, particularly the delta region, has benefited from language directing that the corps maximize its efforts at water conservation from this multibillion dollar flood control project.

With water as scarce as it is in California, and with dollars as scarce as they are everywhere, it would be negligent for the Congress not to demand that the corps use this project to save water as well as protect Orange County from floods. Several hundred thousand acre-feet of water may be involved.

We did not have confidence that those who were primarily interested in this project for flood control purposes were paying enough attention to this water conservation potential.

We are also glad that the Santa Ana project will be designed and constructed as a unit, with its upstream elements in proper synchronization with its previously more developed downstream components. Because this balance has been restored we feel in a sound position to support the project. I know Congressmen BROWN and LEWIS have been instrumental in bringing this about.

Second, Mr. Speaker, we have proposed in this bill a pilot initiative against the selenium problem in the San Joaquin Valley of California that may present a valuable alternative to losing hundreds of thousands of acres of farmland in California and throughout the West.

Being careful to leave in place a general selenium program at its $12.6 million requested level, pending approval of a California-wide selenium program by the Interior Committee's Water and Power Subcommittee chaired by my able colleague GEORGE MILLER, we have given the Secretary of the Interior authority to loan up to $3.7 million to the Westlands Water District to resolve an immediate problem this district faces.

Westlands drains into the now infamous Kesterson Reservoir, which the State of California has just ordered closed. Therefore, Westlands needs an immediate solution to its particular drainage crisis.

Working in almost unprecedented fashion with the environmental defense fund, Westlands and the EDF have come up with an innovative scheme involving cleanup of selenium-laden drainage water, resale of that water, and use of the saline brine for solar electricity generation.

Studies into the feasibility of this plan are permitted by this bill, under such terms and conditions as the Secretary of the Interior finds appropriate.

We look forward eagerly to these results.

I would like to commend Representative TONY COELHO for his initiative in bringing this problem to the attention of the Congress, and for proposing such an innovative solution. Chairman MILLER, as always, deserves thanks for his creative leadership, and in this as well as all matters I thank my chairman TOM BEVILL and my ranking minority member JOHN MYERS for their willingness to deal with important issues to California. They and all members of the Energy and Water Subcommittee have been nothing but constructive on our behalf. I appreciate greatly the opportunity to work with them on so many items.

I yield to my friend, the gentleman from California [Mr. MILLER], the

chairman of the Subcommittee on Water and Power Resources of the Committee on Interior and Insular Affairs.

Mr. MILLER of California. I thank the gentleman for yielding and thank him for all of this hard work in getting these provisions put into this legislation, and I want to thank the members of the subcommittee for all of their effort on our behalf in this very important problem in the State of California.

Mr. Speaker, the conference report on H.R. 2959 includes two important provisions which will help us solve the critical problems of toxic agricultural wastewater drainage in California and elsewhere in the West.

First, the conferees have included funds for the continuation of the San Joaquin Valley Drainage Program study effort at the fiscal year 1985 level of effort pending enactment of needed authorizing legislation. Following enactment of authorizing legislation, the expanded program totaling $12.6 million will proceed.

This will mean that approximately $2,400,000 will be obligated by the U.S. Geological Survey, $1,500,000 by the U.S. Fish and Wildlife Service, and $800,000 by the Bureau. These funds, according to information submitted to the Subcommittee on Water and Power Resources, will enable present data collection and other activities to proceed uninterrupted.

Second, the conferees have included language authorizing the Secretary to loan up to $3.7 million from existing funds for the preparation of feasibility studies for alternative solutions to improve the quality of agricultural wastewater in the Central Valley of California.

"Kesterson" and "selenium" are now household words throughout California's farming community. Kesterson Reservoir, located in the fertile San Joaquin Valley, receives subsurface agricultural drainage water from farms in the Westlands Water District. The water is laced with toxic selenium and other contaminants, and the shallow ponds at Kesterson have become a deathtrap for migratory waterfowl which has been using the reservoir as a refuge.

In March, the contamination problems at Kesterson reached crisis proportions, and the facility was ordered shutdown by the State of California and the Secretary of the Interior. Farmers in Westlands worked out an arrangement with the Interior Department to reduce gradually the amount of drainage water coming off their farms and flowing into Kesterson. Under the terms of the agreement, all drainage flows are to be stopped by July 1986.

The conferees have taken an important first step toward resolving this problem. The $3.7-million loan is in response to a unique and innovative proposal which has been submitted to Congress by the Westlands Water District and the Environmental Defense Fund [EDF]. These two organizations, usually at odds with one another and often at opposite ends of a lawsuit, have set aside their differences and joined forces to solve a very important problem. With Federal assistance instead of interference, and with critical and legally enforceable deadlines to meet, I am convinced a solution will be found and that the funds will be put to good use.

Westlands and EDF have submitted a detailed proposal to the Congress which outlines their goals and objectives, and sets forth realistic time schedules. I will include a summary of the proposal, as well as the September 10 letter from Westlands and EDF, in the RECORD following my remarks.

I believe these organizations are uniquely qualified to undertake the investigations which are needed to find solutions to these problems, and I compliment them for their efforts.

Mr. Speaker, the Department of the Interior has not shown a keen interest in accommodating the district's urgent need to eliminate the flow of drainage water into Kesterson Reservoir by next summer. That is why the conferees' action to approve this loan is so important. I would urge the Department to take immediate steps to make the $3.7 million available to fund the Westlands-EDF proposal. To delay these funds is in nobody's best interest.

I also want to emphasize that the intention here is not to provide further subsidies to the Westlands Water District. The conference report language specifically refers to a loan. I believe this loan should be made at a realistic rate of interest, and repaid in a realistic length of time. While the conference report language leaves the specific repayment terms to the discretion of the Secretary, I believe that a 20-year repayment period at an interest rate equal to the discount rate used for evaluating the economic feasibility of water resource projects (approximately 8⅝ percent) would be appropriate.

Mr. Speaker, the House recently passed a landmark bill to allow the coordinated operation of California's water projects. That bill required hard work and dedication by a unique coalition of water development interests, environmentalists and farmers. Now, just a few weeks later, agricultural and environmental interests have joined forces again. The conferees' action represents what can happen when we work together in a spirit of cooperation on issues of mutual concern.

WESTLANDS WATER DISTRICT,
Fresno, CA, September 10, 1985.

Hon. GEORGE MILLER,
House of Representatives, House Office Building, Washington, DC.

Hon. FRANK H. MURKOWSKI,
U.S. Senator, The United States Senate, Washington, DC.

DEAR MESSRS. MILLER AND MURKOWSKI: Each of your subcommittees has held a hearing on an administration bill to authorize the Secretary of the Interior to perform studies relating to drainage on the west side of the San Joaquin Valley, California.

We have reviewed the Interior Department's approach toward solving the subsurface agricultural drainage problems plaguing the San Joaquin Valley. It involves a comprehensive study of nearly every aspect of nearly every problem that has arisen regarding this drainage water over the past several years.

The cost is in excess of $50 million. While there may be public value in much of the Department's program, it is weak in one major respect: it does not envision recommendations as to the solution of the problem until after 1990. In the meantime, Westlands Water District and other water entities on the west side of the Valley are faced with the need to find immediate answers insofar as disposing of subsurface drainage water is concerned.

This need has been underscored by the difficulties encountered by Westlands in finding ways to reduce drainage flows to Kesterson Reservoir, and by other districts who have similar problems with respect to drainage flows into Grassland Water District, surrounding wetlands areas and the San Joaquin River.

Several technologies hold immediate promise for making substantial contributions to the solution of the drainage problem. Of these, the most promising and the one which both of our organizations agree deserve the highest priority both in funding and in institutional and political support is desalting.

Reverse osmosis desalting is technically feasible and is being done in various forms throughout the world. Operational experience in San Joaquin Valley, however, is limited to one very small plant over only a very brief period of time. Accordingly, it is apparent that in order to bring a sufficiently large plant on line in the time required to keep significant amounts of west side land from going out of production a "fast track" coordinated and cooperative approach to the plant's construction is needed. A feasibility study, with special focus not only on technical issues but on economic and institutional issues, should be undertaken beginning as soon as possible with as wide public support as can be mustered.

We are also in agreement that (viable) selenium removal and brine management technologies should be investigated on as intensive a basis as circumstances and finances permit. The presence of selenium in the drainwater causes major environmental concerns. These concerns would be alleviated if the selenium could be removed from the water and handled separately. Several techniques to do this are currently being tested.

Brine management is a more complex problem, whose parameters are only incompletely understood. One option for disposing of brine is deep well injection. Another option for handling the brine would be the construction of solar ponds. The technology for deep well injection is better established

than that for solar ponds and may be cheaper, unless the energy output of the solar ponds can be sold at a sufficiently high price. Deep well injection, however, raises environmental concerns about potential groundwater pollution, particularly if the brine were to contain hazardous or toxic materials. We believe both technologies should therefore be investigated.

We further believe that all the investigations we have described can most efficiently be carried out by nonfederal local districts, such as Westlands, alone or in consortia as appropriate. We believe that Congress should make the funds available to such local districts under appropriate repayment arrangements. Our principal purpose in seeking Congressional support is to seek validation of the widespread benefits which would derive from the program we are pursuing.

We therefore recommended specifically that Congress authorize appropriations of loan funds to a local district (or districts) pursuant to an appropriate contract in the following amounts:

1. Up to $1,300,000 for economic feasibility studies, including investigation of water trading opportunities and obstacles, and technical feasibility studies including investigation of pretreatment problems, relating to the desalting of agricultural drainwater.

2. Up to $1,200,000 for economic feasibility studies and pilot testing of selenium removal processes relating to subsurface agricultural drainwater.

3. Up to $1,200,000 for economic feasibility studies and pilot testing of the deep well injection and solar pond brine management options.

We believe that with your support of this study program, an expeditious and environmentally sound solution to the subsurface agricultural drainwater problem in California's San Joaquin Valley will be much enhanced.

Sincerely,

THOMAS GRAFF,
Senior Attorney, Environmental Defense Fund.
JERALD R. BUTCHERT,
Manager.

A RESEARCH PROJECT FOR MANAGING SUBSURFACE AGRICULTURAL DRAINAGE WATER IN THE SAN JOAQUIN VALLEY IN AN ENVIRONMENTALLY AND ECONOMICALLY SOUND MANNER—SUMMARY

This is a proposal to fund three feasibility studies/prototype plant installations to be undertaken by a nonfederal public district.

The first is to conduct studies as to the economic feasibility of reverse osmosis desalting of subsurface agicultural drainage waters. These studies would also investigate the technical and economic feasibility of solar ponds which would be used to generate electricity. These studies would be divided into two parts: First, to affirm the technical feasibility of the reverse osmosis desalting process in the San Joaquin Valley including pretreatment of subsurface agricultural drainage water prior to its introduction into the desalting plant. Second, an examination will be made into the legal, institutional and financial aspects of the desalting alternative concerning the potential for marketing the desalted water to either the Central Valley Project, the State Water Project, or to other interested parties, as well as an analysis as to the availability and the price of electrical energy which is needed to operate the plant. The solar pond study would analyze the work being done currently in Israel as well as the pilot plant work being done by the California Department of Water Resources in connection with their pilot desalting plant located at Los Banos, California.

The second part of the proposal involves the planning, and environmental evaluation and potential construction and operation of a prototype deep well injection system. The technology of deep well injection is well known and has been carried out in Kern County, California for several decades. It is proposed that assuming that preliminary enviromental evaluation justifies proceeding with the project, a well be constructed to a depth of approximately 7,400 feet and operated for a period for one year; during which time data would be gathered as to the environmental effects of deep well injection and as to the technical problems encountered. At the end of the one year test period an economic feasibility report coupled with a technical report would be prepared to evaluate the viability of this technology.

The third part of the proposal involves the construction of a prototype plant aimed at removal of selenium and possibly other heavy metals from the subsurface agricultural drainage water. It is proposed that this plant be built to have a capacity of up to one million gallons per day. The prototype plant would be constructed using as a model a successfully operated pilot plant on Murrieta Farms in Westlands Water District wherein selenium removal has been achieved with a result in product water containing less than two parts per billion of selenium.

Mr. FAZIO. Mr. Speaker, I appreciate the gentleman's comments.

Mr. Speaker, I yield to my friend the gentleman from Merced County, CA, Mr. TONY COELHO.

Mr. COELHO. Mr. Speaker, I appreciate the gentleman yielding. I want to again compliment him and to thank him for the job he has done.

I appreciate the support of the gentleman from California [Mr. MILLER] from the authorizing side in this unique concept, that two groups have gotten together. I appreciate the action of the chairman of the subcommittee, the gentleman from Alabama [Mr. BEVILL], and the members of the subcommittee for going along with it, and the support of the gentleman from Indiana [Mr. MYERS] in putting this together.

Here is a situation where a group of people in the central San Joaquin Valley found themselves in a cricumstance that they had no control over, the environmentalists and they got together, provided for a resolution of the problem. Generally, as the gentleman from California [Mr. MILLER] pointed out, people who are antagonists put down their differences, tried to find solutions to a problem, found them, presented them for us, we have now taken them and we are authorizing them and appropriating them, and, hopefully, we can solve this problem of selenium not only in the San Joaquin Valley but use that as an example for a solution to that problem and others throughout the United States.

So we again appreciate the effort of so many people to make this possible, and I just want to compliment the chairman again for his work and his foresight.

Mr. FAZIO. Mr. Speaker, I thank the gentleman for his comments.

Mr. MYERS of Indiana. Mr. Speaker, I yield such time as he may consume to the gentleman from Arizona [Mr. RUDD], a very valuable and hard-working member of the subcommittee, who has informed us this is his last term.

Mr. RUDD. I thank the gentleman for yielding.

Mr. Speaker, I simply want to say that this is a very good bill and a very good conference report. No one got everything they wanted or maybe none of what they wanted, but it was a very fairly constructed bill because there was great respect shown for the taxpayers of the United States in an effort to keep the bill within bounds and even under bounds. That is due to the excellence of the staff, Mr. Speaker, and I wish to commend the chairman for his outstanding leadership and the ranking minority member, the gentleman for Indiana [Mr. MYERS], for the wisdom displayed in crafting this piece of legislation, assuring that it was followed through subcommittee, the committee, the floor of the House of Representatives, through conference and back here again for the wisdom and the leadership that they have displayed, and urge the bill's passage.

Mr. BEVILL. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Oklahoma [Mr. WATKINS], an outstanding member of this subcommittee.

Mr. WATKINS. Mr. Speaker, I would like to commend the chairman of the subcommittee and the ranking minority member and all the members of the committee for their hard work, and I also commend the staff. This bill is under the President's budget, as the gentleman from Indiana [Mr. MYERS] indicated earlier. I think that is saying something. Again, this has occurred year after year, and we tried to put together a balanced program, a program that we could move forward during this fiscal year.

I would like to mention to the chairman and the ranking minority member and ask them for their help. As they know, last year, working with the chairman of the Senate Energy and Water Subcommittee, Mr. HATFIELD, we had worked on trying to get a valuable road, a needed road, into Sardis Lake. We had set aside some money, and the Senate chairman said that if we got the authorization that he would be more than happy to support the effort. We got that authorization. We have some money in it for this year. But last year, I find now the

Secretary of the Army has said they lost that $5 million due to slippage and savings. And now it seems that we come up short. I would like to ask the help of the chairman and the help of the ranking minority member to restore that $5 million and encourage him to utilize that $5 million so that we can complete this particular road into this lake area that is very much needed in order to get some help in a very low economic, low per capita income area that has somewhere close to 20 percent unemployment.

I would need the help of the gentlemen to do this, and I would like to ask them for their help.

Mr. BEVILL. If the gentleman will yield, I will say to the distinguished gentleman from Oklahoma he will certainly have my help. I have been to Sardis Lake, in the distinguished gentleman's district, and I have seen the need for this road. The gentleman will have my support.

Mr. WATKINS. I thank the chairman very much. I know that the gentleman from Indiana [Mr. MYERS] has always been willing to help also.

Mr. MYERS of Indiana. If the gentleman will yield, I have not seen the lake, but the gentleman from Oklahoma [Mr. WATKINS] has always been very diligent and informative in helping us along with other projects, and he knows what the requirements of our subcommittee are. I would be pleased to support what the gentleman believes is right.

Mr. WATKINS. If the gentleman would like, I will plan to take him there. If we can get that road in there, we can go in by car instead of having to drop in by helicopter.

Mr. MYERS of Indiana. I thank the gentleman for his offer.

Mr. Speaker, I yield such time as she may consume to the gentlewoman from Nebraska [Mrs. SMITH], another very valuable member of the subcommittee.

Mrs. SMITH of Nebraska. I thank the gentleman for yielding.

Mr. Speaker, I rise in strong support of this conference report.

This committee is an outstanding committee. We work on a completely bipartisan basis. We work in the interest of fairness. We work hard. We have brought out an excellent bill and one that is fiscally highly responsible. A great deal of the credit goes to our most outstanding chairman, who does such a great job in every way, and to our outstanding ranking minority member. All of them deserve the highest praise.

Mr. BEVILL. Mr. Speaker, I yield such time as she may consume to the distinguished gentlewoman from Tennessee [Mrs. LLOYD].

Mrs. LLOYD. Mr. Speaker, I rise in strong support of this conference report. I want to commend the leadership of this committee for their diligent efforts in not only recognizing the responsibility of constraining spending but also for providing the leadership to bring this bill, which does provide critical funding for the Department of Energy, civilian and nuclear programs, as well as programs that are so vital to the economy of our country. I congratulate the entire committee. I do not think there is a better committee in the Congress than this Appropriations Committee, and I certainly do commend them.

Mr. Speaker, I rise in support of this bill because it recognizes deficit pressures while providing critical support for Department of Energy civilian and defense programs and important activities of the Appalachian Regional Commission and the Tennessee Valley Authority.

My good friends, Mr. BEVILL, Mr. WHITTEN, Mr. MYERS, Mrs. BOGGS, Mrs. SMITH, Mr. BONER, and the other conferees are to be congratulated for crafting a most responsible appropriations bill under these difficult circumstances.

The Department of Energy's atomic energy defense activities appropriated in this bill included a final one-time payment for community assistance at Oak Ridge, TN, as well as important environmental improvements and upgrading of safeguards and security at the Y-12 plant. The environmental and safeguards and security issues have presented us and the DOE with challenges over the past several years and this bill responds to that by providing very close to the requested funding for every element of these activities at Oak Ridge.

On the civilian research and development side, this bill addresses a number of nuclear fission priorities which were strongly supported by the Energy Research and Production Subcommittee which I chair on the Science and Technology Committee. The conference report indicates an additional $6 million for the High Temperature Gas Reactor Program where the Energy Research and Production Subcommittee had recommended a significant increase and the bill restores critical fuel cycle R&D to very close to the DOE request in advanced breeder reactor technology. The Oak Ridge National Laboratory has the DOE lead in both of these program areas and is also involved in advanced RTG research under advanced nuclear systems where the conference has recommended $3.1 million. I am gratified that the conference report recommends the DOE request for the SP-100 Program since I believe space nuclear power is the most exciting research area in nuclear fission development.

This bill also provides funding for the DOE uranium enrichment enterprise including the placing in standby of the gaseous diffusion plant at Oak Ridge [ORGDP] and related R&D activities on centrifuge development which are to be terminated during fiscal year 1986. I am pleased to note, however, that the conference report includes strong encouragement for "early deployment" of the AVLIS uranium enrichment technology because, in my view, this is the only way in which the United States can maintain a competitive position in the international market place for enrichment services.

Another section of this conference report which I believe to be important to the economic development of the Appalachian region is the funding level for the ARC. I would have liked a higher funding level, however given our Nation's deficit crisis, I fully support the conferees level.

I wish that half of the programs that this body authorizes and appropriates could have the track record of the ARC. The ARC programs really strike at the heart of a great American philosophy of helping Americans help themselves.

To fully appreciate what ARC has meant to Appalachia, one only needs to remember what the region was like just 20 years ago. Appalachia is rich in natural resources but for generations it was a region isolated by the very mountains that provided so much of its rich heritage. During the 1950's steel and coal production were down, agriculture had become marginal, and the textile industry had been weakened by imports. The region was plunged into a prolonged economic decline and the lack of transportation discouraged new development. State and local governments were in no position to undertake the massive road construction which was needed.

Since 1965 when the ARC was created, the objective of the program and the States and communities receiving support through the ARC have been to become self-sustaining, expand private sector employment, and to expand their tax base.

The ARC is one of America's better programs and I urge you to support this appropriations bill before us today.

Mr. Speaker, I strongly recommend my colleagues support this bill and conference report which achieve the difficult balance between budget responsibility and the necessity to sustain a good faith role for the Federal Government in both civilian and defense programs.

Mr. MYERS of Indiana. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. CARNEY], who has been working very closely with this subcommittee on projects within his district. He has a number of projects.

Mr. CARNEY. I appreciate the gentleman yielding this time, and I would like to stand in strong support of the conference report. I would also like to echo my sentiments about how it is to work with this committee, with the chairman, the gentleman from Alabama [Mr. BEVILL], and the ranking minority member, the gentleman from Indiana [Mr. MYERS]. It is just a delight. If you have something worthwhile, they will certainly give you all the time that you need.

We do have a very unique facility in my district, the Brookhaven National Laboratory, and there is a project there that is very unusual from the standpoint that this project will gain revenue for the taxpayer. After the

project is completed, it will make $4 million annually selling electricity to our neighbors.

□ 1230

I would like if I could at this moment engage in a colloquy with the chairman of the committee, Mr. BEVILL.

Mr. BEVILL, is it the intention of the conferees that the co-generation facility at Brookhaven National Laboratory proceed on a construction schedule the administration proposed?

I yield to the gentleman for his response.

Mr. BEVILL. The gentleman is correct. I am familiar with this project, and as a matter of fact, I have been there and visited with the gentleman there in his district in New York. We hope to work with the gentleman and accomplish what you have set out to accomplish.

Mr. CARNEY. I thank the gentleman. May I ask the gentleman is it also the intention of the conferees that none of the general reduction provided for in the energy supply research and development account be applied against the Brookhaven National Laboratory cogeneration facility and the BNL fuel storage facility?

Mr. BEVILL. The gentleman is correct.

Mr. CARNEY. I thank the gentleman, and I am sure the people at Brookhaven National Laboratory thank you as well. I thank my friend from Indiana, Mr. MYERS.

Mr. BEVILL. Mr. Speaker, I yield such time as he may consume to the chairman of the Committee on Appropriations, the gentleman from Mississippi [Mr. WHITTEN].

Mr. WHITTEN. I thank the gentleman for yielding.

Mr. Speaker, I wish to join my colleagues here in paying tribute to the fine job that the gentleman from Alabama [Mr. BEVILL] has done on this bill, along with Mr. MYERS and all members of the subcommittee.

I have been on this subcommittee for many years and I do not believe I have ever seen a subcommittee which was better in working out all the problems over the whole country. You know, we have a big country. What is needed in one area may not have anything to do with what is needed in another area.

I have seen many chairmen of this subcommittee who would lead a fight and lead it well. Here, we have a subcommittee which works these matters out. When you are under the budget, when the President has agreed to sign the bill, it is a compliment too for our friends in the other body, Senator HATFIELD and other members of the conference. As I have said so many times, however bad our financial situation is, if we do not have gold and silver, but if we take care of our own country we can, if necessary, set up a new medium of exchange. We could leave our children all the money in the world and with worn out and eroded land, undeveloped, they would never make it.

If we take care of our own country we have got something on which to build. I say again we could not have a finer chairman or finer members of a subcommittee including the senior Republican, Mr. CONTE, than we have on this committee. I add, that the subcommittee has the benefit of a fine and capable a staff as could be found on Capitol Hill.

I wish to join again in complimenting them and say it is a pleasure to serve with them on this subcommittee and in the Congress.

Mr. MYERS of Indiana. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania [Mr. CLINGER].

Mr. CLINGER. I thank the gentleman for yielding me this time.

Mr. Speaker, while I rise in support of the conference report, I do so with a certain sense of reluctance and dismay. Hidden among the very important energy and water resources programs in this bill is the appropriation for the Appalachian Regional Commission.

The ARC has a minuscule budget of $120 million. It serves a limited but very depressed region of our country, and although many here have—at one time or another—debated about the need for a regionally targeted Federal assistance program, it is my firm conviction that we need the ARC, and that it has an excellent record of accomplishments.

Sadly, though, the ARC's job is far from complete. If you survey Appalachia today, you'll find it still suffers from persistent high unemployment, low educational attainment, and an economy that is heavily dependent on but a limited number of depressed industries.

Therefore I continue to support the ARC in every way possible.

Thus it is with dismay that I read in the conference report of the high degree of earmarking that occurred during negotiations between the House and Senate.

The Appalachian Regional Commission has within its scope two major programs. They are highway development and area development.

In the highway account, the ARC has been allotted $85 million for fiscal year 1986. With today's highway construction costs, $85 million will barely have an impact. Nevertheless, the conferees earmarked roughly one-quarter of this amount, $20 million, for specific projects within various districts and States. By doing so, the conferees have seriously undermined the discretion of State and local planners to best allocate their very scarce funds. And considering that $65 million is all that remains to service the entire 13 State Appalachian region, they have only acted to further reduce the effectiveness of this program.

The second ARC account, area development, was harder hit by the black magic of earmarking. Conferees designated $15 million for specific projects out of a total account of $32 million—roughly one-half.

What effect will their actions have? It will reduce State's allocations for planning and jobs development by almost one-half. States will have no choice but to reduce or eliminate planning staffs and reduce or eliminate ongoing development programs.

Overall, the ARC's effectiveness—today and in the future—has been seriously undermined by this practice.

I am saddened that such a small but important program has been blemished by such mischief.

For those of us who strongly support the ARC, we have no means of correcting this abuse. It's too late in the game. Our only option is to lump it; to support the conference report, knowing that we can only satisfy ourselves with the thought that at least the ARC is still with us for another year, if only serving the few projects specified in the report before us.

Mr. MYERS of Indiana. Mr. Speaker, I yield 3 minutes to the gentleman from Washington [Mr. MORRISON].

Mr. MORRISON of Washington. I thank the gentleman for yielding me this time.

Mr. Speaker, I rise to commend the chairman, the gentleman from Alabama [Mr. BEVILL], and the gentleman from Indiana [Mr. MYERS] for this responsible and balanced fiscal year 1986 energy and water development appropriations conference report.

This Appropriations Subcommittee has consistently done two things which I believe are the hallmarks of good budgeting: They have been prompt and under budget. Again, this year the energy and water bill will be one of the first if not the first appropriations measure fully enacted by Congress and signed by the President. And again this year, Mr. Speaker, the energy and water bill is below the administration budget request. If the other Appropriations Subcommittees were as responsible as this one, our country would not be faced with a budget and deficit crisis.

I want to call the attention of the Members two specific programs in this appropriations bill.

The first is the Advanced Breeder Reactor Technology Program. The conference increased the test facilities operating expense by $12 million to allow for $6 million additions each at the Idaho National Engineering Laboratory and the Hanford Engineering Development Laboratory. While these sums are still below the fiscal year

1985 levels, they will substantially mitigate job loss and allow us to continue essential developmental work for the breeder reactor technology. These remaining programs represent our longstanding commitment to develop the essentially inexhaustible energy of the breeder reactor.

The second specific program is a new account entitled "Civilian Byproducts and Beneficial Uses." This $5 million program will fund civilian food irradiation research and development activities. This new account was authorized by the Science and Technology Committee, and I applaud the House Appropriations Committee for carrying through on this proposed authorization. It's clear that food irradiation is a technology whose time has come. I'm glad that there will be a modest research program to ensure that we can properly transfer this technology to the private sector for widespread applications in our agricultural and food processing industries.

Mr. Speaker, I again commend the exemplary work of the Energy and Water Development Appropriations Subcommittee.

Mr. MYERS of Indiana. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. PASHAYAN].

Mr. PASHAYAN. I thank the gentleman for yielding me this time.

Mr. Speaker, I am pleased to see such diverse groups as farmers, irrigation district officials, and environmentalists, including the Environmental Defense Fund, come together in agreeing upon alternative efforts to solve the serious drainage problems of the Central Valley of California. The fact that interests which have often opposed each other in the past have now begun to cooperate in finding solutions is yet one more indication of how serious both the reality and the public perception of drainage problems in the central valley have become.

The conference report will authorize the Secretary of the Interior to execute a contract to loan up to $3.7 million to prepare feasibility studies for alternative solutions to improve the quality of agricultural waste water. Such studies would include the economic feasibility and pilot testing of water trading and marketing, of selenium removal, of deep well injection, and of solar pond brine management. Moreover, the conference report makes funds available for the Bureau of Reclamation to continue existing studies at fiscal year 1985 levels under the San Joaquin Valley Drainage Program. Further study initiatives are deferred pending authorizing legislation.

Mr. Speaker, it is a positive development indeed when officials of the Community Alliance for Responsible Water Policy, the Westlands Water District, and the Environmental Defense Fund can meet, put aside their mutual suspicion, discuss the drainage problem, compromise, and ultimately agree on feasibility studies and pilot testing for alternative solutions. I commend each of the parties and all others involved in the process, and urge adoption of the conference report.

Mr. MYERS of Indiana. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. LAGOMARSINO].

Mr. LAGOMARSINO. I thank the gentleman for yielding me this time.

Mr. Speaker, I rise in strong support of this conference report, and I want to commend the chairman, Mr. BEVILL, and the ranking member, Mr. MYERS of Indiana, and the members of the subcommittee for bringing this practical, responsible bill to us.

Once again, they have provided good solutions to a lot of problems that are of great importance to the people in our districts.

I urge my colleagues to support the conference report, and I welcome the chairman back to active duty with us.

□ 1240

Mr. MYERS of Indiana. Mr. Speaker, it is often said you save the best till last. In this case the best is first.

Mr. LUNDINE. Mr. Speaker, I rise in support of the conference report on H.R. 2959, energy and water development appropriations for fiscal year 1986.

I am particularly pleased that the conferees have recognized the importance of the Appalachian Regional Commission [ARC] and have chosen a funding level for fiscal year 1986 which is closer to the more generous level which the House approved earlier this year. The funding level which the Senate approved was far below the level needed to complete many of the ARC projects, especially highway projects, which are so important to the Appalachian region of this country, my congressional district included.

The Appalachian Highway Program, in particular, has been critically important to the upstate New York area and has been instrumental in the construction of the Southern Tier Expressway, the only four-lane, limited-access highway linking our economically depressed rural region with the Interstate System. Travel time from certain points in upstate New York to New York City has already been reduced from 10 hours to 7 hours, and the Southern Tier Expressway has not yet been completed. I am sure that my colleagues can appreciate the importance of this development and the need to complete this highway project.

In addition to contributing to highway development, much progress has been made in the areas of vocational training, health care delivery, child development, community development, energy and enterprise development and housing in my district, and in the rest of the Appalachian region. For example, the James Prendergast Library in Jamestown and the Steele Memorial Library in Elmira, two of the most important information centers in my district, were built with ARC library funds. In Steuben County, the regional business development center sponsored by the Corning Community College whose graduates have made significant contributions to the economy of the region was started with ARC vocational education funds. In the field of health, the burn and rehabilitation unit at St. Joseph's Hospital in Elmira was started with $200,000 in ARC funds, and the development of rural ambulatory care at the Salamanca Hospital in Cattaraugus County was assisted with over $300,000 in these funds. I could go on and on with examples of how my congressional district has benefited from ARC funding, but I think that my point is clear. The ARC's contribution to the 14 New York counties has been invaluable and the future of the ARC is of great concern to me.

In addition to the funds for the ARC, I am also pleased that the conference report does not include funding to start new water projects. The House's fiscal year 1986 energy and water measure provided $100 million to continue work on 41 Army Corps of Engineers' projects and to begin construction of an additional 21 new corps projects. I do not feel that any new projects should be started before the local cost-sharing issue is settled by an omnibus bill.

To sum up, Mr. Speaker, I feel that the conferees did an excellent job, and I urge my colleagues to join me in supporting this conference report.

Mr. BRUCE. Mr. Speaker, I rise today in support of the conference report on the energy and water appropriation. I am pleased to support this measure that is $273 million less than last year's appropriation. I would especially like to thank Chairman BEVILL and the ranking minority member Mr. MYERS of the Energy and Water Development Subcommittee for including $150,000 for Grayville, IL.

Due to several decades of persistent soil erosion, an oxbow channel has been formed out of the Wabash River, endangering the public welfare and safety of Grayville's citizens. If this is not reversed, the channel will completely bypass the town of Grayville, effectively cutting off the town's water supply and sewer treatment facility.

The money appropriated for Grayville will allow the Army Corps of Engineers to complete a detailed impact study so that money can be appropriated for construction to remedy this grave situation.

Mr. MYERS of Indiana. Mr. Speaker, I have no further requests for time, and I ask for a unanimous voice vote to agree to this conference report.

Mr. Speaker, I yield back the balance of my time.

Mr. BEVILL. Mr. Speaker, I have no further requests for time. It is a good bill. I understand the White House says the President will sign it, and I urge the Members' support.

Mr. Speaker, I yield back the balance of my time.

Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

The text of Senate amendment No. 8 is as follows:

Senate amendment No. 8: Page 3, after line 21, insert:

The Corps of Engineers is directed to construct recreation and management facilities at the Ouachita and Black Rivers, Arkansas and Louisiana, in the vicinity of the Felsenthal National Wildlife Refuge at full Federal expense using funds heretofore provided, using the $3,500,000 provided for such purpose in this Act.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Alabama [Mr. BEVILL].

Mr. BEVILL. Mr. Speaker, I know of no controversy of Senate amendments Nos. 8, 13, 15, 20, 23, and 24, and, therefore, I ask unanimous consent that they may be considered en bloc.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The texts of Senate amendments Nos. 13, 15, 20, 23, and 24 are as follows:

Senate amendment No. 13: Page 5, after line 9, insert:

Within available funds under this account, advance maintenance of the Charleston Harbor navigation channel may be accomplished to allow for safe movement of vessels.

Senate amendment No. 15: Page 7, after line 14, insert:

SEC. 102. Within available funds appropriated under "Operation and Maintenance, General", the Secretary of the Army may remove obstructions and ease bends at the Jacksonville Harbor navigation channel in the vicinity of Blount Island to allow for the free and safe movement of vessels.

Senate amendment No. 20: Page 11, line 15 after "1985" insert: "*Provided further*, That of the amount herein appropriated not to exceed $20,000 shall be available to continue a rehabilitation and betterment program with the Twin Falls Canal Company, Twin Falls County, Idaho, to rehabilitate facilities under the Act of October 7, 1949 (63 Stat. 724), as amended, to be repaid in full by the lands served and under conditions satisfactory to the Secretary of the Interior.".

Senate amendment No. 23: Page 14, line 24, after "only;" insert "payment of such amounts not to exceed $6,000,000 as may be necessary for alterations to existing building No. 53 to accommodate the new center computer facilities at the Denver Federal Center, Lakewood, Colorado;".

Senate amendment No. 24: Page 18, after line 11, insert:

SEC. 205. (a) Within 30 days after enactment of this Act, there shall be established in the Treasury of the United States a working capital fund to assist in the management of certain support activities of the Bureau of Reclamation (hereafter referred to as the "Bureau"), Department of the Interior. The fund shall be available without fiscal year limitation for expenses necessary for furnishing materials, supplies, equipment, work, and services in support of Bureau programs, and, as authorized by law, to agencies of the Federal Government and others. Such expenses may include the acquisition, replacement, and operation of a central computer and related automatic data processing equipment; engineering services; payroll and other management services; acquisition and replacement of equipment and facilities, including the purchase, lease, or rent of motor vehicles and aircraft within any limitations set forth in appropriations made to carry out the functions of the Bureau and such other activities as may be approved by the Director, Office of Management and Budget.

(b) The fund shall be credited with appropriations made for the purpose of providing or increasing capital. There are authorized to be transferred to the fund (at fair and reasonable values at the time of transfer) the inventories, equipment, receivables, and other assets, less the liabilities, related to the functions to be financed by the fund as determined by the Secretary of the Interior.

(c) The fund shall be credited with appropriations and other funds of the Bureau, and other agencies of the Department of the Interior, other Federal agencies, and other sources, for providing materials, supplies, equipment, work, and services as authorized by law. Such payments may be made in advance or upon performance.

(d) Charges to users will be at rates approximately equal to the costs of furnishing the materials, supplies, equipment, facilities, and services (including such items as depreciation of equipment and accrued annual leave).

(e) There are hereby authorized to be appropriated such sums as are necessary to carry out the purposes of this section.

(f) Funds that are not necessary to carry out the activities to be financed by the fund, as determined by the Secretary, shall be covered into miscellaneous receipts of the Treasury.

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendments of the Senate numbered 8, 13, 15, 20, 23, and 24, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The text of Senate amendment No. 22 is as follows:

Senate amendment No. 22: Page 13, line 6, strike out "$41,100,000" and insert "$37,900,000".

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 22 and concur therein with an amendment, as follows: In lieu of the sum stricken and inserted by said amendment, insert the following: "$48,315,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The text of Senate amendment No. 32 is as follows:

Senate amendment No. 32: Page 21, line 25, "expended" insert of which $101,075,000 shall be available for verification and control technology".

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 32 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: ", of which $97,325,000 shall be available for verification and control technology".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Alabama [Mr. BEVILL].

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The text of Senate amendment No. 34 is as follows:

Senate amendment No. 34: Page 25, strike out lines 6 to 10 inclusive.

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion, and I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The text of the motion is as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 34 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows:

Notwithstanding provisions of title 5, United States Code, except for section 5308, no funds approved for Western Area Power Administration shall be used to pay the rates of basic pay and premium pay for power system dispatchers unless such rates are based on those prevailing for similar occupations in the electric power industry.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Alabama [Mr. BEVILL].

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the final amendment in disagreement.

The text of Senate amendment No. 46 is as follows:

Senate amendment No. 46: Page 34, strike out lines 6 to 10, inclusive.

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion, and I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The text of the motion is as follows:

Mr. BEVILL Moves that the House recede from its disagreement to the amendment of the Senate numbered 46 and concur therein with an amendment, as follows: In lieu of the matter stricken by said amendment, insert the following:

SEC. 506. No funds appropriated in this Act may be used to pay the salary of the Administrator of a Power Marketing Administration or the Board of Directors of the Tennessee Valley Authority unless they award contracts for the procurement of extra high voltage power equipment manufactured in the United States when such agency determines that there are one or more domestic manufacturers offering a product which meets the technical requirements of such agency at a price not exceeding 125 per centum of the bid or offering price of the most competitive foreign bidder. Such agency shall determine the incremental costs associated with implementing this section and defer or offset such incremental costs against otherwise existing repayment obligations. This section shall not apply to any procurement initiated before its effective date or to the acquisition of spare parts.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Alabama [Mr. BEVILL].

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and the several motions was laid on the table.

WAIVING CERTAIN POINTS OF ORDER AGAINST CONSIDERATION OF H.R. 3327, MILITARY CONSTRUCTION APPROPRIATIONS ACT, 1986

Mr. WHEAT. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 282 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 282

Resolved, That during the consideration of the bill (H.R. 3327) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1986, and for other purposes, all points of order against the following provisions in the bill for failure to comply with the provisions of clause 2 of rule XXI are hereby waived: beginning on page, 2, line 1 through page 7, line 18; and beginning on page 12, line 22 through page 13, line 11.

The SPEAKER pro tempore. The gentleman from Missouri [Mr. WHEAT] is recognized for 1 hour.

Mr. WHEAT. Mr. Speaker, for the purposes of debate only, I yield the customary 30 minutes to the gentleman from Ohio [Mr. LATTA], pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 282 provides for the consideration of H.R. 3327, military construction appropriations for fiscal year 1986 and waives points of order against a number of its provisions. The rule does not provide for the bill's consideration since general appropriation bills are privileged under the rules of the House. Provisions relating to time for general debate are also excluded from the rule. Customarily, general debate is limited by a unanimous-consent request by the chairman of the Appropriations Subcommittee prior to consideration of the bill.

This rule waives points of order against specified provisions of the bill for failure to comply with the provisions of clause 2 of rule XXI. Clause 2 prohibits unauthorized appropriations or legislative provisions in general appropriation bills and applies to the text of H.R. 3327 beginning on page 2, line 1 through page 7, line 18; and beginning on page 12, line 22 through page 13, line 11. This waiver is necessary because H.R. 1409, the Military Construction Authorization Act for fiscal year 1986 has not yet been considered. As a result, H.R. 3327, which includes appropriations for military construction and family housing, contains unauthorized appropriations in violation of clause 2 of rule XXI. However, the appropriations contained in the bill do not exceed any amounts in H.R. 1409, the authorizing legislation.

Additionally, points of order are waived against section 122 relating to services provided by the Army Corps of Engineers in the Little Rock District of Arkansas. The Public Works and Transportation Committee, which has jurisdiction over this matter has no objection to this legislative provision or the waiver.

Briefly, H.R. 3327 appropriates $8.37 billion for fiscal year 1986 military construction projects to be administered by the Department of Defense, including appropriations for Army, Navy, Air Force, and various other defense agency projects. This amount is lower than the administration's request and yet $106 million over what was provided for these projects in fiscal year 1985. Appropriations are also made available for military family housing for these branches of service and all levels of funding for this purpose are well below current budget estimates. There are also general provisions contained in H.R. 3327 addressing certain military construction projects and procedures for the defense agencies.

The waivers contained in this rule are important to provide for necessary appropriations and for the timely consideration of this measure. I am not aware of any objection to this rule and I urge my colleagues to adopt House Resolution 282 so that we may proceed to debate.

□ 1250

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the provisions in this rule fulfill the requests of those Members who appeared before the Rules Committee.

The rule waives points of order against specified provisions of the bill for failure to comply with the House rule which prohibits unauthorized appropriations and legislation in general appropriation bills.

While the rule did not generate controversy in the Rules Committee, there are a couple of features about this bill which should be a concern to many of us.

At the time of the Rules Committee meeting the administration sent a statement of policy noting that this bill is almost $2 billion below the $10.34 billion level requested by the President, and even $109 million below the congressional budget resolution level. However, the administration expressed particular concern about the elimination of funds for the ground-launched cruise missile facilities in The Netherlands.

This is an important problem, and I want to provide a little background information to the Members on this situation.

Since 1977, the Soviet Union has been deploying SS-20 missile launchers and has continued to construct additional bases in both the eastern and western Soviet Union. In 1979, in response, NATO made a dual-track decision calling for both the deployment of 572 Pershing II and ground-launched cruise missiles to redress the increasing imbalance and also to negotiate the imbalance at the Geneva arms talks. Since 1979 the number of SS-20 warheads has almost trebled and the arms talks have not been productive.

In the absence of an Intermediate Nuclear Force arms control agreement and as a response to that unprecedented growth of Soviet nuclear capabilities, the United States has been deploying Pershing II and ground-launched cruise missiles since late 1983. The deployments have continued on schedule and will continue over the next 3 years.

All of these deployments are subject to cancellation or reversal if an agreement with the Soviet Union is achieved. Talks at Geneva are in their third round following resumption of negotiations on the full range of defense and space issues in March 1985.

The arms talks only started in earnest after Moscow recognized that NATO was determined to proceed with deployments. That determination is in response to the massive buildup of Soviet SS-20 missiles that changed the nuclear balance in Europe. The United States and NATO would greatly prefer

a negotiated agreement to the Intermediate Nuclear Force problem, but until the Soviets bargain seriously there can be no progress. Our negotiators are examining the latest Soviet proposals in order to determine if there is common ground for progress. We must continue to show our resolve in our response to the Soviet buildup by continuing to modernize our Intermediate-Range Nuclear Forces while at the same time continuing to negotiate a solution in Geneva.

As of today the ground-launched cruise missile has been deployed to three countries in Europe. These are the United Kingdom, Italy, and Belgium, and preparations continue for deployment in the Federal Republic of Germany and The Netherlands. We have supported those deployments with the facilities that are needed to make the system operational and this activity has been an excellent demonstration of allied resolve to support the 1979 NATO decision. Without the required facilities, however, there can be no deployment.

The last of the six bases for the ground-launched cruise missile system is in The Netherlands. The Dutch Government has stated its intention to make a final decision on the deployment of the ground-launched cruise missile system on November 1 of this year. Funding to start the needed base support work for the deployment has been requested by the administration. But the funding has not been included in this appropriation bill. To make a showing of apparent nonsupport immediately before the time for the Dutch decision will be very detrimental to the United States and NATO policy objectives. It could be misinterpreted by opponents of the decision to mean that the United States does not expect a deployment in The Netherlands and that such a deployment is not that important.

In order to meet our obligations to deploy the ground-launched cruise missiles in The Netherlands in accordance with the 1979 NATO decision. The construction work must be started as soon as possible in fiscal year 1986. The requested funds will allow utility and site activation work to begin soon after a Dutch decision is made. Without this work we could not adequately support a ground-launched cruise missile deployment.

I urge that $16 million, which is so critical to the timely deployment of the ground-launched cruise missile system in The Netherlands, be provided so that we can move forward in a responsive manner with this ground-launched cruise missile base. Not to do so would send exactly the wrong signal to the people of The Netherlands and to the Soviets at the Geneva arms talks.

Mr. Speaker, for all these reasons it is important that funding for the ground-launched cruise missile facilities in The Netherlands be included in the final version of this bill that goes to the President's desk.

I will support this rule so that the House may proceed to consider and improve this military construction appropriation.

However, I thought it was very timely and most important to point out something that will be debated, hopefully, when this matter comes up for consideration on the House floor.

Mr. HEFNER. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I yield to my friend, the gentleman from North Carolina.

Mr. HEFNER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I have just a brief point. It seems to me this should have been addressed yesterday in the authorizing committee.

We did not include the $22.7 million requested for initial facilities for the ground-launched cruise missile base in The Netherlands due to the lack of authorization.

The Dutch Government is scheduled to make its final decision on deployment of these missiles on November 1 of this year, and I believe the authorizing committee felt it unwise to provide construction funds in the absence of a final commitment on the part of the Dutch Government.

As the gentleman well knows, we are constrained to appropriate without authorization. I can assure the gentleman that when we go to conference, if it is a conference item, we will certainly take it into consideration at that time. But I do not think it is the fault of our subcommittee, because we have a very good subcommittee, that it warrants this much of an attack because we did act as only we could. We cannot, as the gentleman knows, appropriate without authorization.

Mr. LATTA. May I, in response to the gentleman, say that I was not saying that your committee was at fault for not including this money. I merely point out the importance of including this money at some stage. Whether it is in the House or whether it is in the other body, it must be included so that we can go forward with this very important project.

I appreciate the assurance that the gentleman has already given that they will take a look at it, and I realize that the authorization has not been fully completed yet. But I also realize that many, many times the Appropriations Committee has come up to the Rules Committee and gotten a waiver of the requirement for authorization and they could have proceeded in that fashion on this particular item had they seen fit.

Mr. Speaker, I have no requests for time, and I yield back the balance of my time.

Mr. WHEAT. Mr. Speaker, I have no requests for time and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. QUILLEN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 369, nays 33, answered "present" 1, not voting 31, as follows:

□ 1305

Mr. McCANDLESS changed his vote from "yea" to "nay."

Mr. DELAY and Mr. COLEMAN of Missouri changed their votes from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1315

GENERAL LEAVE

Mr. HEFNER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 3327, Military Construction Appropriations Act, 1986, and that I may include extraneous matter along with tables and charts.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

MILITARY CONSTRUCTION APPROPRIATIONS ACT, 1986

Mr. HEFNER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3327) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1986, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from Oklahoma [Mr. EDWARDS] and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina [Mr. HEFNER].

The motion was agreed to.

□ 1323

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3327, with Mr. LELAND in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the unanimous-consent agreement, the gentleman from North Carolina [Mr. HEFNER] will be recognized for 30 minutes and the gentleman from Oklahoma [Mr. EDWARDS] will be recognized for 30 minutes.

The Chair recognizes the gentleman from North Carolina [Mr. HEFNER].

Mr. HEFNER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, it is my pleasure to present to you today the fiscal year 1986 military construction appropriations bill. The committee has worked very hard in reviewing the Department's request of $10.3 billion and as a result we are bringing forward, a bill containing $8.39 billion. This level is a $1.9 billion reduction from the requested amount, but provides a level of funding equivalent to the amount provided last year, and funds the highest priority military requirements.

OVERALL GUIDELINES

In order to meet this level of reduction, the committee developed a number of guidelines that were applied very strictly to all items requested in the bill. Our goal was to recommend funding for the highest priority military requirements and yet respond to the need for fiscal restraint. We are all aware that we are at a very critical stage in the public opinion of defense spending. If we are to maintain grassroots support for adequate levels of defense spending, we in the Congress must carefully review the proposed programs and recommend only what we feel is fully justified. In that spirit, the committee adopted a set of guidelines and applied them across the board. The cuts affect many Members, including myself, but as I said we have been very careful to ensure that these guidelines have been applied across the board. These guidelines are as follows:

First, all level of effort accounts such as planning and design, minor construction, and family housing operations and maintenance have been limited to last year's level or reduced.

Second, all projects with low operational utility such as recreation centers, indoor swimming pools, religious eduction buildings, community centers, libraries and museums have been deferred.

Third, administrative training, medical and laboratory facilities have been trimmed down or eliminated.

Fourth, reductions at several overseas bases, which meet the criteria used by the Department in proposing a notional list of domestic base closures, have been proposed.

Fifth, large unobligated balances in the NATO Infrastructure account have enabled the deferral of new funding.

We have heard a great deal about balancing the budget this week. I believe that the approach we have taken in this bill is a start toward achieving that goal. The funding level of $8.39 billion is a mere $14 million under our section 302 allocation. For this reason I will have to oppose all amendments which add money to the bill. Any Members wishing to include funds for

specific items will have to come up with offsets for those items.

I would further stress that this is the largest reduction we ever had to make to a military construction bill because of our mandate to stay within the budget targets. Many Members may not be completely satisfied with some of the reductions but let me say we have tried to be fair and consistent in making reductions to those projects that were of a low priority or operational utility.

POLICY THRUST

At this point I would like to highlight our action on some specific items in the bill.

A total of nearly $500 million has been included at new locations in the United States to fund construction in support of the Army's new light division, homeporting of Navy ships on both coasts, and the beddown of the B-1 bomber.

About $50 million has been included for roads and silo modifications for 30 MX missile silos. With these funds all elements of construction for 40 MX missiles will have been approved.

The committee deferred without prejudice the $10.8 million requested for binary munitions facility at Pine Bluff, AR, until the authorization and appropriation for production of chemical binary components has been approved by Congress.

The bill contains $25 million for follow-on construction at existing GLCM bases in Europe. No funds are included to initiate construction of the GLCM base in the Netherlands due to lack of authorization.

Reductions have been made at a number of bases overseas, which fit the Defense Department's criteria for base closure. The committee has asked for a comprehensive review of our overseas base structure in conjunction with these reductions.

A number of changes to the financial management procedures in the Military Construction Program have been recommended. These changes will tighten up some of the Department's flexibility to move money between projects and programs, and will provide a clearer picture to Congress on the actual use of appropriated funds together with a better understanding of the financial status of the various accounts.

The committee has taken a number of steps to help stimulate U.S. business involvement in overseas military construction projects. We have continued the existing American preference policy in the Persian Gulf, and made the existing preference policy in the Pacific apply to more construction projects. New initiatives this year include mandating the packaging of contracts into larger contracts at several bases overseas and requiring involvement of U.S. architect and engineer firms on large design contracts.

The committee has continued this year to approve essentially all of the facility requests which support improving the quality of life in the military. Despite the reduced level of the bill we have provided for over 42,000 new and improved barracks spaces, 5,000 new family housing units and numerous child care centers and physical fitness centers. In addition, funds for numerous maintenance and industrial facilities have been provided. Improving basic living and working conditions has always been the committee's top priority and this year is no exception.

SUMMARY

In conclusion, Mr. Chairman, I believe we have brought out a very fair bill under a difficult set of circumstances. I would reiterate that we funded the highest priority military requirements. The cuts we have recommended are the result of the very rigid guidelines I outlined earlier and have been applied across the board. I urge adoption of the fiscal year 1986 military construction appropriations bill.

Mr. Chairman, the committee is recommending new appropriations totaling $8,390,717,000 for fiscal year 1986 military construction and family housing. This is $1,949,483,000 below the President's request but is an increase of $106,496,000 above the amount reported last year.

The committee conducted a thorough and comprehensive review of this year's request, holding 20 different hearings on separate functional areas. The level recommended is similar to the amount provided last year, yet it provides for the highest priority military requirements and will substantially improve both readiness and the quality of life in the military. Functional areas where special emphasis occurred during our review of the program are overseas base closures, European and NATO Infrastructure Program, Caribbean Basin, Persian Gulf, and Pacific programs, the quality of life, medical programs, stimulating U.S. business overseas, financial management, alternate construction methods, and planning and design.

OVERSEAS BASE CLOSURES

Starting in the mid-1950's, the United States began to consolidate and thereby reduce the number of our overseas installations. In the past 5 years however, this trend has been reversed as the United States has initiated more than 20 new unilaterally funded installations overseas.

At the request of the Senate, the Secretary of Defense submitted a "notional" list of bases in the United States that fit certain criteria for closure, which were developed by the Department. The Senate version of the Defense Authorization Act denied all military construction projects requested at the bases on this list. There is no doubt that significant savings can eventually be achieved through base closures, however, the committee takes issue with both the basis and methodology used in developing this "notional" list. Overseas bases were not even considered in this exercise.

Congress has imposed manpower ceilings on troop levels in NATO countries for the past few years to foster more meaningful burdensharing among our allies and to consolidate our forces abroad. The Department's response to this policy, however, has been to seek and develop methods of circumventing its intent. The committee has found numerous examples which point to a departmental thrust to develop and implement new missions at new and existing overseas installations without regard to obtaining meaningful burdensharing, or the additional costs. Therefore, the committee has denied all construction projects requested at a number of bases overseas which fit the Department's criteria for base closure, and has requested a report on the future feasibility of these bases.

EUROPEAN CONSTRUCTION PROGRAM

The committee has recommended $1.2 billion for military construction and family housing in Europe. This is the third straight year of the provision of substantial funds to address the large backlog of modernization requirements at viable U.S. installations. This year's program funds projects such as tank hard stands, tactical equipment shops, maintenance facilities, barracks, and family housing. This level has been recommended so as not to deprive service members from decent living and working conditions.

NATO INFRASTRUCTURE PROGRAM

The committee is extremely pleased and encouraged by the expanded commitment by our allies to this jointly funded construction program. It is hoped that the new 5-year program, which nearly doubles the size of the present program, will result in a reduction in U.S. unilaterally funded construction requirements. The committee has not provided any funds for this program in fiscal year 1986 due to the existence of a large unobligated balance. Funds on hand will be sufficient to meet U.S. commitments for the next year. With the expanded program, the committee expects that all outstanding recoupments owed to the United States will be repaid in the next 5 years.

PERSIAN GULF/INDIAN OCEAN

Consistent with the overall policy of limiting U.S. unilateral expansion overseas, the committee has recommended funding for facilities in the Persian Gulf only at sites where construction is already underway. The committee views the $1.1 billion construction program in the Persian Gulf as essentially complete, as we now have access to seven separate airfields and three ports in the immediate area.

CARIBBEAN BASIN

In fiscal year 1983 and fiscal year 1984, Congress approved a total of $21 million for airfield improvements at two separate locations in Honduras. In addition, temporary construction as a result of military exercises has resulted in the creation of three additional airstrips, numerous maintenance and support facilities at five separate locations, two operational radar sites, tank

traps, and roads and port improvements. Although this construction was justified to Congress on the premise that it was temporary, and part of joint military exercises, the Department has used these facilities to support several ongoing operational activities and to maintain a continuous U.S. military presence in Honduras. All indications at this point are that the United States plans to continue to conduct virtually continuous military exercises in Honduras, and to maintain a continuous United States presence with sustainment forces.

In the committee's view, the administration needs to clarify the scope and purpose of our presence in Honduras. Funds necessary for resultant construction requirements should be requested in the normal fashion. To that end the Department has been tasked to update the long-term construction plan for the region.

MX MISSILE PROGRAM

A total of $55,800,000 was requested in fiscal year 1986 to provide roads and silo modifications for 30 MX missile silos. The Congress provided the funds necessary for roads and silos for 10 MX missiles last year and fully expects the December 1986 initial operating capability to be met. The committee has provided the authorized amount of $53,040,000 for fiscal year 1986. This amount will be sufficient to fund the conversion of 30 Minuteman II silos to MX missiles silos.

STIMULATING U.S. BUSINESS OVERSEAS

The committee took a number of steps to stimulate opportunities for U.S. businesses overseas, as it relates to military construction. The existing American preference program in the Persian Gulf was retained, and the preference program in the American territories of the Pacific was expanded to include all projects over $1 million. In addition, a new requirement has been added in this bill, which restricts all architect and engineer contracts over $1 million in NATO countries and Japan to United States firms or United States firms in joint venture with host nation firms. The committee has also required the packaging of construction projects at four bases overseas into one large contract in order to encourage U.S. firms to bid.

QUALITY OF LIFE

The committee has funded only those quality of life-type projects which are fully justified. Improving living and working conditions has always been our highest priority, and this year is no exception as over 90 percent of the requests for barracks, maintenance, and operational facilities have been funded. This bill contains funds for 42,000 new or upgraded barracks spaces, numerous child care centers, chapels, and gymnasiums.

PLANNING AND DESIGN

The committee funded 95 percent of the $521 million requested for planning and design. However, the committee was critical of the amount of lost design, the lack of vigorous pursuit of architect and engineer liability, the reliance on contractor personnel for inspection, and inadequate user agency involvement in the design process. A report on the reform efforts to address these concerns has been directed.

MEDICAL PROGRAM

The committee has recommended funding for over $300 million in new or expanded medical facilities. However, the committee has concurred in the findings of the President's Blue Ribbon Panel on Sizing of DOD Medical Facilities. The Panel's report was critical of the current direction in planning of medical facilities, recommended more centralization of management authority, and that more attention be paid at medical mobilization and readiness requirements. The committee denied funding for mobilization hospitals to overseas locations in the belief that no coordinated triservice plan exists and because additional host nation agreements should be sought.

ALTERNATE CONSTRUCTION METHODS

The committee has urged the expanded use of alternate construction methods to include: First, new construction techniques; second, turnkey contracting; third, packaging; fourth, standard design; fifth, performance specifications; and sixth use of new materials. The committee has directed packaging of contracts at six separate bases in the United States.

FINANCIAL MANAGEMENT

The committee has recommended a number of changes in current financial management practices on military construction because of the currently chaotic situation. These changes involve: First, limitations on cross year funding authority, second, clarifying the use of expired funds; third, tightening of current reprogramming criteria, fourth, limiting end of year obligation rates, and fifth, the need to submit formal budget requests for all new requirements.

MINOR CONSTRUCTION

The committee has reduced the requested amounts for minor military construction by one-third in the belief that the services can better anticipate their needs in this area. New notification procedures have been required and all modular structures are to be included as one line item in the military construction bill.

MILITARY CONSTRUCTION, ARMY

The committee approved a total of $1,646,152,000 for this account, which is a $374,748,000 reduction below the President's request. Major reductions were made as follows: $206 million for projects failing authorization; $62 million for projects with low operational utility; $28 million for projects in connection with the overseas base closure initiative; $25 million for ranges, and a net $40 million general reduction. Several authorized projects have been added which fund new barracks, and dining facilities.

MILITARY CONSTRUCTION, NAVY

The committee has approved a total of $1,704,005,000 for this account, which is $381,195,000 below the President's request. Major reductions are as follows: $220 million for projects failing authorization, $72 million for projects with a low operational utility, and general reductions and scope changes totaling $80 million. Several authorized projects have been added which fund new barracks, piers and industrial facilities.

MILITARY CONSTRUCTION, AIR FORCE

The committee has approved a total of $1,600,040,000 for this account, which is $481,960,000 below the President's request. Major reductions include; $145 million in projects failing authorization, $98 million in projects with the overseas base closure initiative, and $30 million as a general reduction. Several authorized projects have been added to fund barracks spaces, ammunition storage, and computer facilities.

MILITARY CONSTRUCTION, DEFENSE AGENCIES

The committee has approved $127,690,000 for this account, which is a $181,910,000 reduction from the President's request. Major reductions include $112 million for unauthorized projects, $30 million for projects of low operation utility, and $40 million from overseas schools projects.

NATO INFRASTRUCTURE

The committee has approved no funds for this account, which is a reduction of $98 million from the President's request. While the committee supports this jointly funded construction program, sufficient unobligated balances exist to meet our obligations without providing new appropriations.

MILITARY CONSTRUCTION, RESERVE COMPONENTS

The committee has approved $383,383,000 for these accounts, which is a $45,217,000 reduction below the President's request. The committee has not provided funds for several projects, which were funded in fiscal year 1985 via reprogramming, and has made a general reduction of $45 million.

DEFENSE FACILITIES REPLACEMENT FUND

The committee has not provided the $33 million requested for this fund in the belief that proceeds from the sale of other excess property should be used to initiate this program.

FAMILY HOUSING, ARMY

The committee has provided $1,435,652,000 for this account, which is $190,112,000 below the President's request. Major reductions include $100 million from the new construction account, $13 million from operations and $46 million from maintenance and $20 million from leasing.

FAMILY HOUSING, NAVY

The committee recommends $673,280,000 for this account, which is a reduction of $65,459,000 from the President's request. Major reductions include $25 million from the construction account, $5 million from operations, $9 million from utilities, $23 million from maintenance and $6 million from leasing.

FAMILY HOUSING, AIR FORCE

The committee has provided $851,816,000 for this account, which is a $91,882,000 reduction from the President's request. Major reductions include $42 million from the construction account, $7 million from utilities, $32 million from maintenance, and $8 million from leasing.

FAMILY HOUSING, DEFENSE AGENCIES

The committee has provided $14,300,000 for this account, a reduction of $6 million from the President's request.

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

	Fiscal year—		House	House bill compared with—	
	1985 enacted	1986 estimates		Enacted	Estimates
Military construction, Army	1,593,137,000	2,020,900,000	1,646,152,000	+53,015,000	−374,748,000
Military construction, Navy	1,534,592,000	2,085,200,000	1,704,005,000	+169,413,000	−381,195,000

□ 1330

Mr. EDWARDS of Oklahoma. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the gentleman from North Carolina [Mr. HEFNER] has outlined the basic provisions of the bill we have before us. Let me try to emphasize, however, a few points:

First of all, this committee, more than any other I've served on in the Congress, has worked in a thoroughly bipartisan manner and has worked very conscientiously to find the right mix between this country's defense needs and the need to be as economical as possible.

We held more than 20 hearings, and after those hearings we reduced the Defense Department's request from $10.3 billion to a bill totaling just $8,390 million—a reduction of 19 percent, the largest reduction we have ever made in a Pentagon request—and we believe we have done so without in any way harming the ability of the military services to do their job efficiently and well.

This bill is below the administration request and it's below the 302(b) allocation.

Second, let me emphasize that we have agreed on a number of guidelines to get the greatest result with the fewest dollars, and we have followed them consistently, without exception.

Accounts such as planning and design, minor construction, and operation and maintenance of family housing have been held at or below last year's levels.

Projects with low priority—important, but not urgent—such as recreational centers, indoor swimming pools, community centers, museums—have all been deferred. No exceptions.

We have insisted that projects must be at a 35-percent design level or certain to reach that level before the first of the year. If not, the project was not funded. No exceptions.

And if a project was not authorized, it was not funded.

We made a lot of cuts and they affected Members on both sides of the aisle, including the chairman, myself and other members of the committee.

I hope all our colleagues understand the need for fiscal restraint and hope they will understand that the chairman and I are in agreement that there should be no add-ons to this bill unless they include offsets so the total costs of the bill is not increased.

Let me mention some other specific items you may have some interest in:

The committee has approved funds for the Navy's homeporting plan; support for the Army's new light infantry division; beddown of the B–1 bomber; roads and silo modifications for 30 additional MX missile silos; follow-on construction at existing GLCM bases in Europe; security for the Pershing II missile in Germany; and continuation of our high priority on quality of life projects such as housing, child care centers, and medical facilities.

In addition, the committee has taken a special initiative in the area of financial management reform. In 1981 the Defense Department, at its request, was given flexibility to transfer funds to and from construction projects among any of the actively funded programs. However, the services have used this authority to excess in moving funds from 1 year's projects to other. This has permitted the services to move projects between fiscal years without every having to report these changes to the Congress or even to the Office of the Secretary of Defense. This has made it virtually impossible for the Defense Department or the Congress to determine the financial status of the military construction accounts. For these reasons, we propose eliminating this flexibility.

Second, the subcommittee found that often change orders, resulting in cost overruns, arise because the user agency, the actual user of the facility, has not been consulted during the design of a building. The subcommittee feels that if the user agency is more actively involved during the design stage, changes which create price increases after construction has started will be reduced. Because of this we have asked the Department to take steps in the future for the user to approve design prior to the start of construction to ensure it meets the user agency needs and to help avoid unnecessary cost overruns.

Third, and most important, are changes concerning reprogramming

flexibility. We held hearings this year on individual reprogramming requests for the first time and we denied a great many of them. We are now trying to get a better handle on reprogramming procedures, presently a service can exceed the congressionally approved amount for a project by 25 percent or $2 million, which is less, by transferring money from one project to another, without informing Congress. The subcommittee believes strongly that when we appropriate an amount for an individual project we do not want the Department to exceed that amount without the approval of the Congress. Simply put, when we appropriate $1 million for a project, we expect them to spend $1 million, or less on the project, or else let us know about it. The present flexibility has been used excessively and the subcommittee believes that being able to add an additional 25 percent to a project without informing Congress is unreasonable. Therefore, we are recommending the flexibility be reduced to 15 percent or $1 million, whichever is less.

In addition to this reprogramming flexibility, if the Department takes away money from one source to add it to another project, it now may add back 10 percent of the original project without congressional oversight. While this was intended for use on an exception basis, we've found during the past year more than 162 cases in which funds have been added back to a project after money was taken away from it for a reprogramming. We propose eliminating this flexibility, requiring the services to inform the appropriate committees of Congress of their intent to add back funds to a project from which reprogramming moneys were taken.

We have found that the Defense Department will often use the reprogramming process as a backdoor approach to avoid the will of Congress. We sometimes receive reprogramming requests for new projects which the Congress has denied in the past—projects which do not appear to be vital to national security. We have received reprogramming requests for new projects which could have, and should have, been included in the budget—a way to make it appear the Milcon budget request is not actually as large as it is. This year we have considered such projects only if they were of an urgent nature. The committee does not support the notion of funding new projects through savings. By refusing to include them in the budget, or submitting a supplemental request, the Pentagon is circumventing the prerogatives of Congress. Because of this we have requested that all new projects, unless of an emergency or national security interest, be included in the budget process. Otherwise, we will be forced to disapprove them.

Mr. Chairman, these initiatives are good government initiatives. They have been carefully thought out and reviewed by our entire subcommittee. We are unanimously in agreement with them.

I agree with Chairman HEFNER that we have brought a very fair bill to the floor—one that meets the requirements militarily and one that meets the budget constraints we are all under. I urge all of my colleagues to support this bill.

Mr. Chairman, I reserve the balance of my time.

□ 1340

Mr. HEFNER. Mr. Chairman, I yield 3 minutes to the gentleman from Texas [Mr. COLEMAN], one of our more conscientious members, who has attended, I believe, all the hearings and the markup and has done a great job with us on coming up with a very responsible bill.

Mr. COLEMAN of Texas. Mr. Chairman, I rise in strong support of H.R. 3327, the military construction appropriations for fiscal year 1986.

I want to commend the chairman of the subcommittee, the gentleman from North Carolina and the ranking minority member, the gentleman from Oklahoma for their leadership in developing this bill.

As the chairman has stated this bill is virtually a freeze. It is $14.5 million under the fiscal year 1985 appropriation and $14.3 million under the 302(b) allocation under the budget resolution. The subcommittee realized the budget constraints posed by the rising Federal budget deficits and made the appropriate cuts, without compromising strategic and conventional needs, as well as preserving the necessary commitment to quality of life for military personnel. In any event, the subcommittee was forced to cut some $1.95 billion from the administration request for fiscal year 1986. Through the leadership of the chairman and ranking minority member, the committee was able to achieve these cuts by prioritizing proposed construction items according to their needs and contributions to the overall security and readiness of our Armed Forces. This includes providing adequate levels of funding for Fort Bliss, the Army Air Defense Command for the free world, which provides air defense training not only to Army personnel, but also NATO and other allies. As a member of the Armed Services Committee in the 98th Congress and the Appropriations Committee in 99th Congress, I have been pleased to work with the leadership of both the authorizing and appropriating committees to ensure that our commitment to air defense is second to none, this bill provides for that goal to be met.

The cuts made in this bill were necessary to provide the fiscal constraint necessary to meet budget requirements and show the resolve of the Congress that deficit reduction is a top priority. However, those cuts were made across the board and fairly.

I would like to point out a couple of items the subcommittee took leadership on. First, the committee addressed the growing need for improvement of the quality of life in the military. After numerous hearings on the subject, a connection between quality of life and retention of personnel was clearly established. The members of the subcommittee unanimously agreed, I believe, that the quality of life of our military personnel is paramount to our strength and readiness capability.

The Department of Defense requested a budget of $3.3 billion for family housing in fiscal year 1986. The subcommittee has recommended almost $3 billion for this function. Although that amount is below the request by some $350 million, it is above the fiscal year 1985 amount by $41 million. While the subcommittee reduced the level of funding for family housing, it approved all new family housing projects. Basically, the subcommittee reduced the amounts requested for new housing construction by 10 percent, instructing the services to lower the costs of construction. The subcommittee has provided $1.14 billion for maintenance of existing housing, equal to the fiscal year 1985 amount, and an increase of 50 percent since fiscal year 1982. The subcommittee has a strong commitment to the maintenance and upgrading of existing quarters for personnel, particularly lower grade personnel. And the committee has directed DOD to report any use of these funds for maintenance on general or flag officers housing be reported to the subcommittee, and that all maintenance projects over $15,000 on an individual project be justified to the subcommittee.

Mr. Chairman, this subcommittee is committed to providing adequate housing to our personnel both domestically and abroad. Although that is a costly proposition, the committee has worked diligently to bring down costs without sacrificing quality.

The subcommittee is also committed to the quality of medical care in the services. In recent months, many news articles have addressed the issue of poor medical care in the military. Only 2 weeks ago, the House adopted a military malpractice measure. Since joining the subcommittee I have had a special interest in the quality of health care in the services. And why not? If our soldiers are not afforded quality health care how can we expect them to best defend the Nation?

The Blue Ribbon Panel on Sizing DOD Medical Treatment Facilities has recently released their report on the

military health services systems. The report, which was endorsed by the Secretary of Defense, found that medical readiness requirement should be the primary criterion for determining the size and composition of the peacetime active duty medical force and of the facilities in the direct care system. It also found that current estimates of wartime requirements for medical forces and facilities should be refined and the management information systems under development should be completed and included in the fiscal year 1987 request; and, that the Assistant Secretary of Defense for Health Affairs should review medical treatment facilities and funding requests for military medical construction and the most urgently needed be determined. The subcommittee has endorsed these findings and expects their implementation in the timetable established by the Panel. The subcommittee has instructed the DOD that all such requests will be carefully scrutinized and therefore should be incorporated in the fiscal year 1987 request.

The subcommittee has made clear to the Department of Defense that it is committed to establishing the best and most cost-efficient health care system for the personnel in the services.

Finally, the subcommittee has addressed an issue of great concern with respect to rising costs of military construction. We have all heard the stories of the $700 ashtrays and $400 hammers purchased by the Pentagon, but little is ever said about cost overruns on military construction projects, perhaps because they are less glamorous. The subcommittee consistently receives reprogramming requests for cost overruns in construction projects and for the transfer of funds from congressionally approved projects to nonapproved projects. The subcommittee, under the leadership of the chairman and the ranking minority leader has taken steps in this bill to address this issue by instituting some basic accounting and financial management mechanisms to correct this problem. In short, the subcommittee is implementing steps making clear to the Congress and the Department of Defense how funds appropriated are actually used. These steps include limitations on cross-year funding authority, clarifying the use of expired funds, tightening of current reprogramming criteria, limiting end-of-year obligation rates and, need to submit formal budget requests of all new requirements.

It is the prerogative of the subcommittee that some basic financial tenets must be implemented by the Pentagon to ensure that funds appropriated are properly used and cost overruns are curtailed. I am hopeful that the Pentagon will work with the subcommittee in establishing such principles.

Mr. Chairman, this is a good bill. It is fiscally responsible while still meeting the needs of the military and its personnel. It addresses such important issues as quality of life, health care, and fiscal management. I am proud to have had the opportunity to work on this bill with the leadership of the subcommittee and I strongly recommend its passage by the House.

H.R. 3327, the military construction appropriations for fiscal year 1986 is a balanced bill which realizes the need for fiscal constraint, strategic and conventional security concerns, and the quality of life in the military. As a member of the subcommittee I am proud to have worked with the committee in developing such a balanced bill. It has also given me the opportunity as well to ensure the Nation's commitment to an air defense system second to none.

The military construction budget for Fort Bliss contained in the bill is $31,760 for fiscal year 1986. This budget includes items necessary to the daily operations of the Air Defense Center. This includes a hardstand for heavy vehicles and a new fire station for the William Beaumont Army Medical Center. I am particularly pleased that the authorizing and appropriating committees accepted my request for the new fire station, because although low in cost, its benefits are extremely important. The present fire station is over a mile away from William Beaumont as well as at the bottom of a hill. In the case of an emergency a fire truck would need to turn around coming out of the fire station and travel up hill for 1 mile while fully loaded. Because the fire station's primary mission is to protect a medical center which serves both enlisted and retired personnel, I believe it is extremely important that a medical center have adequate emergency facilities and I am grateful that a majority of the members of the appropriate committee agreed with me.

The Fort Bliss budget also addresses the quality of life issue. Included in the budget is funding for a child care center, barracks modernization, and a physical fitness center. All of these items are necessary to improve the standard of living of military families and personnel. Of the more than 20 hearings our subcommittee held on the military construction budget, the most important issue raised was that of quality of life. The subcommittee found and stated in the committee report that quality of life is directly related to retention of qualified personnel.

Mr. Chairman, if we are to provide a strong defense, and in the case of Fort Bliss, a strong air defense, we must ensure that our personnel have acceptable living conditions for their families and themselves. If we do not, we will lose our qualified personnel and our security will be lessened. I am glad that in working with the Department of the Army, the leadership at Fort Bliss, and the Committees on Appropriations and Armed Services, we are able to accomplish the goal of a better standard of living for the personnel at Fort Bliss.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I yield 5 minutes to the gentleman from Texas [Mr. LOEFFLER].

Mr. LOEFFLER. Mr. Chairman, I salute my chairman and my ranking member of the Military Construction Subcommittee for their hard work and dedication on behalf of the military forces of the United States.

This bill is truly a bipartisan effort, hammered out in a reasonable, responsible way, and I, for one, would like to thank both of these gentlemen—as well as my colleagues on the subcommittee and the committee—for a job well done.

Recommendations by the committee total $8,383,717,000 for fiscal year 1986 military construction and family housing. While the bill falls nearly $2 billion below the DOD request, I believe the projects and priorities set forth in this bill meet the basic needs of our Nation's defense facilities while staying within budgetary constraints.

I would like to commend the committee's foresight in providing $1 million to set in motion the Navy's homeport program. Funds in this bill for homeport community impact planning will be used to assess the impact on jobs, economic and construction growth, schools and municipal services in Texas and other Gulf Coast communities which will serve as homeports for the Navy's ships under this program. It's an important first step, one which signals to the homeport communities that this long-awaited program is finally underway.

I also commend the committee for including report language urging the Department of Defense and the Army to proceed rapidly with construction of a new hospital at Brooke Army Medical Center in San Antonio. A design contract for the new hospital was let this past summer, and it is essential that we experience no further delays in building this critically needed facility. Brooke Army Medical Center is a well-respected medical institution, with a regional burn center and a medical teaching facility known far and wide. However, the existing facility is no longer adequate to meet the needs of the military personnel and dependents who are served there. Structures are dilapidated, and patients have to be shuttled between buildings by ambulance. Our military personnel and their dependents deserve better than that, and the committee has recognized that the time is long overdue for a replacement hospital at Brooke. The language in this bill

simply tells the Department of Defense that the eyes of Congress are upon them—to make sure that DOD lives up to its commitment with regard to Brooke Army Medical Center.

The committee also reprogrammed military construction funds in order to move forward with design and construction of a C-5 maintenance hanger at Kelly Air Force Base in San Antonio. Currently, C-5, transport aircraft based at Kelly must be ferried to Travis Air Force Base in California for maintenance, which is not only costly but also damages our Nation's airlift readiness should a national emergency arise. The new hanger will remedy this situation.

Mr. Chairman, I urge approval of the fiscal year 1986 military construction appropriation. It provides the bricks and mortar which support our Nation's men and women in uniform. It is our military personnel—not weapons—which form the heart and soul of our Armed Forces. If we expect to keep our national defense second to none, we must constantly upgrade and modernize not only our weapons, but the military facilities used by the people who defend our Nation.

The funds in this bill will pay for the airstrips, the control towers, storage facilities, computer centers, testing facilities and other necessary components of a strong and solid national defense, but they will also pay for upgrading living facilities, for day care centers, and for other facilities that are also necessary to the welfare of those whom we ask to defend America. I believe the committee has met these needs in a responsible bill which stays within budgetary confines, and I again urge its passage by the House.

Mr. HEFNER. Mr. Chairman, I yield 5 minutes to the gentleman from Arkansas [Mr. ALEXANDER].

Mr. ALEXANDER. Mr. Chairman, I rise in support of the military construction appropriations bill for fiscal year 1986. This is a quality bill, it is a bill that is good for our military. It is a bill that is good for our effort to control the Federal budget deficit.

The quality of this bill, Mr. Chairman, is in large measure directly due to the excellent leadership of our subcommittee chairman, the gentleman from North Carolina [Mr. HEFNER]. Our chairman works very hard to insure that the issues coming before us in the subcommittee are thoroughly and objectively considered. He deals fairly with each member of our subcommittee, to insure that we have an opportunity to examine the issues and debate the questions before us.

Mr. Chairman, we have a new ranking minority member of our subcommittee this year, the gentleman from Oklahoma [Mr. EDWARDS]. He rose to this position with a challenging example of excellence provided by his immediate predecessor, the gentleman from Ohio [Mr. REGULA] who has gone on to another strenuous responsibility within our committee. Our ranking minority member has been a strong and cooperative partner with our chairman and has made an important contribution to the work of our subcommittee.

And, Mr. Chairman, there are some other people who work on this bill who deserve recognition. They are our staff. Without the long hours of knowledgeable and dedicated effort we would not be able to bring to you today the quality product we have brought.

The bill which our committee brings for your consideration today totals $8.3 billion. That is $1.9 billion below the budget request. In evaluating the funding totals we are recommending to you, it would be well to remember that:

During the past 5 years, the budget requests for military construction and family housing projects have increased more than 250 percent.

The request our committee considered this year was 24 percent higher than the amount provided for 1985.

The funding in this bill reflects a similar level of funding that was provided by the Congress in fiscal year 1985.

The funding in this bill is $14.3 million below the budget resolution target.

There is no question that military construction and military family housing projects are necessary and that more are needed. But, in this era of enormous budget deficits and severe constraints on spending, tough decisions have to be made. Our committee has made tough decisions in this bill.

We have made recommendations aimed at keeping the costs of projects within a reasonable range. We have made decisions against recommending nice-to-have projects because the budget constraints under which we worked demanded them.

We have made recommendations for reductions in proposed military construction investments at overseas bases. They come also from budget constraints. But, even more, they come from our long-standing belief that our allies in the North Atlantic Treaty Organization [NATO] and Japan, particularly, have failed and continue to fail to bear their fair share of the cost of defending their own interests and those of the free world.

The economies of the NATO nations and Europe are flourishing and are more than healthy enough to make increased investments in defense—to share the burden of defending the free world from the aggression and threat of aggression by totalitarian governments. For the Congress to continue the generosity of the past would be wrong.

It would encourage our allies to depend on an unwise degree on defense resources other than their own. It would continue to reduce our ability to make the needed, and, in many cases, long overdue investments in our own military infrastructure here at home. It would be unfair to our American citizens—to our people who bear the double burden of defending the national interests of our allies while losing their jobs to the imports from those foreign nations who have made their economies strong with the money they saved because the U.S. carried an inequitable share of the defense burden.

Mr. Chairman, there are no funds in this bill for military construction projects in Central America. But, our subcommittee continues to be deeply concerned about the construction investments the Department of Defense is making in that region, particularly in Honduras. And, we continue to be concerned about the method DOD is using to make these investments.

Our committee does not, and has told DOD repeatedly that it does not, oppose necessary and useful training exercises in Central America. I believe that such exercises are essential to the readiness level of our troops. And, I have said that I believe the training experience our forces have gained in working with our Honduran allies has been useful.

Time and again, our subcommittee, as a subcommittee, and as individual members, have asked DOD to come to the Congress and give us the facts about what it is doing in Honduras. We have asked for all the factual information we may need to make decisions on construction projects that have been, or may need to be, carried out in Honduras.

The committee report on this bill details substantial information on what has occurred in Honduras since we last were on this floor with a military construction appropriations bill. So, I won't go into detail. That is available for all interested members to study.

What the information says, is that DOD has not been frank with our committee.

The construction cost figures which DOD has provided for projects in Honduras have been incomplete. The Department has spent at least $1.4 million on construction projects there in the past year. These investments have provided substantial expansion at the Honduran Palmerola Air Force Base, provided for regrading and improving airstrips built during the Big Pine II military training exercises, financed well drilling operations, and road construction.

And, DOD's own internal documents indicate that master plans are being prepared for several bases in Honduras which anticipate a United States presence in that nation until at least 1990.

It is our committee's belief that the Department needs to clarify for the Congress and the Nation its plans for Honduras. And, the Department should request the funds it needs for construction related to those plans through the normal military construction budget process.

In this connection, our committee has included in this bill language requiring the Department to notify the appropriate committees at least 30 days before undertaking any military training exercises involving construction. Additionally, we have included a provision amending current law to require that the appropriate committees be provided notice of any projects the Department intends to fund through its minor construction account.

As I said in the beginning, Mr. Chairman, this is a good bill. I urge my colleagues to vote for its passage.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I yield 5 minutes to the gentleman from Arizona [Mr. RUDD].

Mr. RUDD. Mr. Chairman, I rise in support of H.R. 3327, the military construction appropriations bill for fiscal year 1986.

The appropriations levels contained in the bill are below both the fiscal year 1985 total and the fiscal year 1986 budget request amount sought by the administration. In addition, the bill is in total compliance with the authorization committee's recommendations.

This bill reflects the committee's growing concern over the need for the Department of Defense, and each of the individual services, to prioritize military construction requests so that only those items which have a direct impact on defense readiness and our national security will be built. Prioritization of construction is the first step in impressing upon DOD that they will have to rely less and less on the reprogramming process and follow the normal appropriations cycle.

The committee shared its concern over the need for our allies and host countries to meet their obligations to share a larger part of the cost for military construction overseas. Terms of such cost sharing are contained in a number of treaties and agreements. We need to be more aggressive during negotiations and deliberations on lease arrangements, basing modes and construction with host countries. Given the Federal deficit, the United States can no longer be so generous with host countries.

I have long been an advocate of base consolidation and the use of alternative methods of construction, particularly prefab construction, as ways, in which we could realize military construction cost savings. The committee discussed in detail ways in which base consolidation could be achieved without jeopardizing defense readiness, and ways in which prefab construction could be used where the need for permanancy is not as great. It never made much sense to me that, given the ever changing sociopolitical climate we see overseas, we should continue to spend billions of dollars for military construction of permanent facilities which we may not have access to several years down the road. As Governments change, we may find ourselves in a situation where the U.S. military presence is no longer wanted, nor needed, and we would have to vacate the premises, leaving permanently constructed facilities behind. The examination of these cost savings measures must be continued in the future.

This bill shows our resolve to continue modernization of our nuclear triad, in order to maintain a viable deterrent in the face of an ever-increasing first-strike offensive arsenal now possessed by the Soviets: $53 million is provided for construction of the MX-peacekeeper missile support facilities to enable deployment of 30 additional missiles; $71.5 million is provided for construction of B-1 bomber facilities; and additional funding is made available for the necessary command and control items needed to enhance our strategic response capabilities. Soviet heavy missiles possessing greater throw-weight and accuracy now put our land-based missiles in jeopardy. Soviet deployment of several layers of air defense systems, including new advanced radar, place our air-based nuclear deterent at risk. Only the sea-based portion of the U.S. nuclear triad appears to be safe; however, we should not expect this to be the case for very long. It is crucial that we support the nuclear force modernization, and build the needed facilities as quickly as possible.

The committee deferred funding for second-phase construction of the binary munitions facility at the Pine Bluff, AR arsenal until Congress approves authorization for production of this chemical component, I ask that Congress move quickly to approve such production. The Soviets have far surpassed us in production of chemical munitions, and are currently employing such weapons in both Afghanistan and Cambodia against freedom fighters in those countries.

Force projection around the world is critical in responding to the aggression and expansionism that historically has been exhibited by practitioners of the Marxist-Leninist doctrine. Facility improvements for enhancing force projection readiness are funded for bases in the Persian Gulf, Central America, and the Caribbean. These areas are of critical importance from oil-supply and sea lane access standpoints, upgrading of the facilities in these areas of the world is a must.

The bill also addresses the need for improving the quality of life for those men and women in our Armed Forces; $3 billion is provided for military family housing. Improvements to medical, dining, educational, and day care facilities are provided for also.

This military construction bill is fiscally sound. I feel that H.R. 3327 provides for strategic and tactical readiness, it enhances our force projections capabilities, it eliminates projects having "low operational utility," and it provides funding for improvement or construction of items that embellish the quality of life for our service members.

I urge my colleagues to support H.R. 3327.

□ 1355

Mr. HEFNER. Mr. Chairman, I yield 2 minutes to the gentleman from North Carolina [Mr. ROSE].

Mr. ROSE. Mr. Chairman, I rise in support of this very important piece of legislation and I want to thank the chairman of this committee especially for his hard work in helping us meet the needs of a very important military base in my district of Fort Bragg and the adjoining air base at Pope Air Force Base.

At Fort Bragg we have the 18th Airborne Corps. And in that is the 82d Airborne Division. Fort Bragg is the home of the 82d. The 82d Airborne Division throughout the history of its existence has played a major role in protecting freedom around the world. The 82d Airborne Division was the fighting force that went in and so successfully made us all proud of our armed services in Grenada. Fort Bragg is taking on new and more important responsibilities every year as the role of our air mobile forces becomes more important all across the globe.

There is about $68 million in this legislation for Fort Bragg. There is not that amount, but an equally large amount, for Pope Air Force Base. These moneys will ensure that Fort Bragg and Pope Air Force Base can continue with their readiness role in an area that is absolutely vital to the maintenance of peace and freedom throughout the world.

BILL HEFNER, as the chairman of that committee, being a North Carolinian, understands that need and, Mr. Chairman, I want to thank you for what you have done. You have helped North Carolina a great deal. You may have done more directly for some other districts than your own, but you certainly kept a large part of the fighting force of America adequate to do its job, and I thank you very much.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. LOWERY].

Mr. LOWERY of California. Mr. Chairman, I rise in strong support of H.R. 3327, making appropriations for

military construction in fiscal year 1986.

This is my first year on the Appropriations Committee and it has been a distinct pleasure to serve on the Military Construction Subcommittee under the able leadership of our chairman the gentleman from North Carolina and our ranking Republican member the gentleman from Oklahoma. In addition, I would like to commend the subcommittee staff for its professional and bipartisan conduct throughout the many hearings, reprogramming requests and markup sessions held over the past 10 months.

This bill is not only fiscally responsible, but provides important incentives for military reforms regarding reprogramming, multiyear budgeting and base consolidation. As previously stated by the distinguished gentleman from North Carolina, the committee has brought to the House a bill nearly $2 billion below the administration request level. Bringing H.R. 3327 down to approximately last year's level required a great deal of effort, compromise, and responsibility.

While I understand some Members may offer amendments adding various projects, I urge all my colleagues to refrain from overriding committee-set priorities. The gentleman from Oklahoma, indeed the entire subcommittee membership, have displayed restraint in deliberations over this bill. The end product is sound and worthy of your unequivocal support.

Mr. HEFNER. Mr. Chairman, I yield 1 minute to the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. I thank the gentleman for yielding time to me.

I would like to engage the distinguished chairman in a colloquy concerning the proposed beddown of the B-1 bomber at McConnell AFB, KS. It is my understanding that $71.5 million has been included in this bill to fund the initial facilities for the B-1 beddown at McConnell AFB on the condition that the Secretary of the Air Force certify that McConnell AFB is a viable location for this beddown.

Mr. HEFNER. That is correct. Mr. Chairman, if the gentleman will yield, the gentleman is well aware that during deliberations on the military construction authorization bill in the other body, the issue of McConnell AFB being on a national list of base closures caused some concern over the Department's intentions in locating this mission at McConnell AFB. The committee endorses the beddown of the B-1 at McConnell and has provided all the funds requested.

Mr. GLICKMAN. It is my understanding that McConnell AFB was included on this so-called national list, because of its present mission. The Air Force has clearly justified the need for four B-1 bases in the central region of the United States and McConnell AFB was chosen as one of the four locations after a rigorous review of all existing Air Force bases.

The Senate version of the military construction bill includes the $71.5 million requested for the B-1 base on the condition that the Air Force reverify the location for this beddown. The Air Force has already made clear publicly their intention to use McConnell as a B-1B base. The Air Force fully intends to endorse McConnell AFB for this mission and I would ask the chairman to make note of this.

Mr. HEFNER. As I stated, the committee endorses the beddown at the B-1 at McConnell AFB and would expect the Secretary of the Air Force to notify us of its viability soon after the enactment of this bill.

Mr. GLICKMAN. I thank the chairman of the subcommittee.

Mr. HEFNER. Mr. Chairman, I yield 3 minutes to the gentleman from California [Mr. PANETTA].

Mr. PANETTA. Mr. Chairman, I rise to ask the chairman a couple of questions and engage him in a colloquy. First, I want to commend him and the subcommittee for the work they have done here. One of the areas I have focused on is the issue of quality of life for those who have families in the military and particularly focusing on the need for adequate housing. This has been a particular problem in my area where, at Fort Ord, we have some 2,500 military personnel who are still waiting in line for adequate military housing.

The authorization bill that was adopted yesterday recognized the need and approved a number of requests to provide additional housing. The appropriations bill has also done a very good job in this area within the constraints, obviously, of the budget. But I did want to ask questions regarding two elements. One was the 600 units that are provided for at Ford Ord. There is a reduced amount contained in the appropriations bill, and I understand that there was a formula that was applied to all housing units across the board on a national basis. My question to the chairman would be: What was the basis for that formula? And is this in any way intended to reduce the number of units that should be built?

Mr. HEFNER. As the gentleman knows, we have made cuts across the board, and we did not reduce the number of units because we recognize the need. What we did was to reduce the cost per unit, and we did not do this lightly. We made checks all over the country to make sure we were in the ball park. We reduced the cost to $66,500 per unit, which is what we consider as adequate for these houses.

Mr. PANETTA. So there is no reduction in terms of the number of units?

Mr. HEFNER. There is no reduction in the number of units.

Mr. PANETTA. I thank the chairman.

Let me ask one additional question: I also understand that with regard to academic buildings, these received a lower priority. That is understandable, considering the other priorities that you were dealing with in terms of the overall budget. One of the areas involved an academic building at the Navy Postgraduate School, which is required and needed because of space needs, as well as to focus additional attention on both oceanography and meteorological studies.

My question to the chairman would be: If the Senate did include that in their appropriations bill, would you give consideration to retaining that? And should it not be included in the Senate bill, would you give serious consideration to funding that building next year?

Mr. HEFNER. Well, this is one of the areas we had to look at to prioritize, as the gentleman well knows, having served on the Budget Committee for all these years, and we deferred it without prejudice. We would certainly be happy to take it into consideration when we go to conference, and if it does not materialize there, we would certainly take it under consideration at a later date.

Mr. PANETTA. I thank the chairman.

Mr. Chairman, I am pleased to rise today in support of the military construction for housing for our military families that is contained in the Military Construction Appropriations Act for Fiscal Year 1986. As my colleagues well know, I have spent a good deal of time trying to draw attention to the inadequate and, sometimes, substandard housing for our military personnel and their dependents.

Yesterday, this body passed the military construction authorization for fiscal year 1986. This act contained $3.3 billion for family housing projects. At a time when we are all rightly concerned with bringing all areas of our budget under control, the House recognized the importance of these projects and provided almost $20 billion more for this account than had been requested by the President. These projects are important. And they are important because they are investments in our military personnel, and, therefore, in our Nation's security.

The funds requested for construction of housing will provide for 600 units of housing at Fort Ord, CA, and the upgrading of almost 600 more units that have been found by the Army to be "substandard." Think of that, ladies and gentlemen, some of our military personnel live in "substandard" housing—but not for long. This money will also provide for 70 mobile home spaces at Ford Ord—a post where 2,500 families are currently on waiting list for on-post housing.

Plans also call for the construction of barracks for enlisted personnel that will

house nearly 1,000 individuals, at a cost of $23 million. The average wait for on-post housing at Fort Ord is 5 to 7 months. Fort Ord has recently awarded a contract to a local construction firm that will provide more than 200 mobile home spaces for military personnel. At a post where the housing situation has been critical, there is now hope.

These construction plans will mean a great deal to an estimated 2,500 military families at Fort Ord alone. And yet the total price tag is $75 million—only three-tenths of 1 percent of the total Department of Defense appropriation for fiscal year 1986. And that is at Fort Ord alone.

Military housing construction plans span the country, reaching from Fort Bragg, NC, to El Toro, CA. The military housing plans reach across the seas to The Netherlands and West Germany, as well. And we can do all this, and virtually change the lives of an estimated 5,570 persons with only 3 percent of the total defense appropriation.

While family housing is certainly the most visible component of the military construction appropriation, it is not the only issue that I would like to address today, because military construction can take many forms, other than military housing. I am talking about the construction plans for military facilities such as Fort Hunter Liggett, the Presidio of Monterey, and the Naval Postgraduate School, as well as Fort Ord—facilities which have been able to contribute so much to our national security and defensive capabilities. But facilities which are also in desperate need of expansion, or upgrading, in order to continue to perform these valuable functions to their full potential.

Fort Hunter Liggett, for example, has asked for $11.1 million for the construction of a multipurpose range complex and a technical documentation facility. The House approved these funding requests yesterday as part of the military construction authorization. In addition, the House Appropriations Committee, recognizing the value of these projects, has recommended full funding of the administration's request. For the Presidio of Monterey, the Department of Defense has set aside $2.65 million for the construction of a military personnel administration center. This center is required to provide a consolidated Army/USAF center together with administration headquarters for Army/Navy/Air Force/Marine Corps contingents at the Defense Language Institute. The Department of Defense concluded in a recent study that the failure to provide this center would result in a growing inefficiency in operation at the Presidio. Again, the House approved this request yesterday and the Appropriations Committee has recommended full funding.

The Army has asked for $3 million to be spent on an energy monitoring and control system, a medical supply warehouse, and an operations building at Fort Ord. The operations building is needed to provide an operational facility for the Criminal Investigation District Headquarters at Fort Ord. Current investigations are conducted out of a substandard and deteriorating temporary facility that was constructed in 1941. The Department of Defense has determined that the building is not suitable for modification, and the House approved this request yesterday in full. The Appropriations Committee, again, has recommended full funding for construction of this new facility.

I support these construction projects because I believe that we must address these housing and facility inadequacies if we are to continue to attract the best and the brightest of our Nation's young people to military service. It is incomprehensible, after all, that in the strongest and richest Nation on Earth some of our military personnel are forced to live in a substandard housing unit that was built as a temporary facility prior to World War II. Why are families of military personnel forced to separate, or squeeze a family of 5 into a camping trailer in a campground along with 30 other families that has only one hot shower? There is no reason for this situation. But there is a solution. And that solution will cost less than the price of 2 F-14A Tomcat aircraft—and the Navy has requested 18 of these aircraft for the next fiscal year alone.

In examining the important issue of our national defense, I believe it essential that we not overlook that element of our military that is most vulnerable and most in need of our assistance—the human element. We can, after all, talk until we are blue in the face about weapons systems and strategic superiority or inferiority, but it does not mean a thing unless we address needs of our military personnel in housing and facilities.

I am pleased that the House has begun to recognize these needs. The military contruction authorization passed overwhelmingly by this body yesterday, is an indication that there is hope for our military personnel. The Appropriations Committee has forwarded a balanced proposal that responds to both our fiscal concerns and the needs of housing and providing adequate facilities for our military personnel. I urge this body to accept that proposal.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I reserve the balance of my time.

Mr. HEFNER. Mr. Chairman, I yield 5 minutes to the gentleman from Mississippi [Mr. MONTGOMERY].

Mr. MONTGOMERY. Mr. Chairman, I do rise in support of this legislation. I want to commend the gentleman from North Carolina [Mr. HEFNER] and also the gentleman from Oklahoma [Mr. EDWARDS] and the other subcommittee members for the work they have done on this bill. I will support it. However, there are certain areas of the bill that I am worried about.

Mr. Chairman, in most cases, the Defense Department does not ask for enough funds for military construction for the National Guard and Reserve in proportion to the amount of money that they request, and I use this example: On the military construction authorization bill, less than 5 percent of the money requested on military construction authorization would go to the Reserve and National Guard. If my figures are right, under the appropriations military construction bill, there is only 2.2 percent military construction for the National Guard and Reserve out of well over $8 billion on military construction for appropriations and about $9 billion for military construction under the authorization bill.

So my point is in the Army, the National Guard has 50 percent of all the combat missions, yet they are getting less than 5 percent of the military construction funds. That is just not right. Air Force, about 30 percent of their combat missions are in the Air Guard and in the Air Reserve and in the Naval Reserve, they get less than 5 percent of the military construction.

□ 1410

I had two items in here that were requested by the Enlisted Naval Reserve, and I would like to ask the chairman what happened to the appropriations that we had requested for two enlisted quarters for naval reservists, one at Glenview, IL, and one at Dallas, TX. The only thing that enlisted naval personnel asked for: two little, old barracks. These barracks were left out of this bill.

I see the chairman standing up and I would like to have a little help. I am not going to offer an amendment in deference to the chairman. But what happened?

I yield to the gentleman for his response [Mr. HEFNER].

Mr. HEFNER. As the gentleman well knows, we do have a strict rule in the Appropriations Committee, and I detect a little sarcasm; the gentleman is exactly right considering the need. We have an absolute rule that we adopted that we do not appropriate any money for any building unless it is 35 percent designed.

We did not know that this could be site adapted because we were not told that. So the only thing we can go by are the rules that we adopt in the committee. That is the reason that we did not fund the $10 million for the barracks. It was certainly nothing that we did intentionally. It was just the fact that it did not fit within our criteria.

Mr. MONTGOMERY. I want to say to the gentleman that I was not trying to be sarcastic I know better than taking on the gentleman from North Carolina.

Mr. HEFNER. I was just kidding, Mr. Chairman.

Mr. MONTGOMERY. I hope if these enlisted barracks are included in the Senate appropriation bill that the House would consider this request.

The other area was that in our military construction authorization that we added $40 million to the budget requests of $18 million, which made a total of $58 million which passed yesterday in the military construction authorization. That would help to bring down a backlog of $175 million for military construction on small projects. I notice that the gentleman has only appropriated I believe $20 million instead of the $58 million that is in the authorization, the military construction bill. Could the gentleman comment on this?

Mr. HEFNER. If the gentleman will yield, I would say that again, we appropriated $20 million for the Guard in the minor construction account which is actually an increase of about a little over $1 million above the amount requested, due to the overall budget constraints, and the need to reduce the Department's request by $1.9 billion. We reduced all other minor construction accounts in the bill by one-third; this, for the National Guard is an exception. We did this because we realized the need of the Guard.

We funded 99 percent of the Army National Guard's request which is more than any other account in the bill. I would say to the gentleman that we would certainly take these items under consideration.

The CHAIRMAN. The time of the gentleman from Mississippi [Mr. MONTGOMERY] has expired.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I yield 2 additional minutes to the gentleman from Mississippi [Mr. MONTGOMERY].

Mr. MONTGOMERY. I thank the gentleman for the additional time.

Mr. Chairman, I did not understand the gentleman. Did he say 99 percent of what account?

I yield to the gentleman for his response.

Mr. HEFNER. The administration requested $18.9 million for this account, for the Army National Guard, minor construction. We provided an increase to that amount. We added $1,083,000 to the account. What I was saying is that we approved 99 percent of the Army National Guard's total request, and that is more than we did for any other account.

Mr. MONTGOMERY. I appreciate that and I am going to support the bill. I am concerned, Mr. Chairman, that the figures and what I quoted is correct. We are turning over missions to the Reserve and National Guard. They do need more construction funds for simulators, for better ways to train. I am just trying to make a point here today. I hope in the near future when we get this massive amount of funds coming over from the Defense Department that more of them could be turned over to the Reserve and National Guard for construction in proportion to the military combat missions they have.

I thank the gentleman.

Mr. HEFNER. Mr. Chairman, I yield 2 minutes to the gentleman from New York [Mr. WEISS].

Mr. WEISS. I thank the gentleman for yielding me this time.

Mr. Chairman, yesterday I had occasion, when we were discussing the authorization legislation to address the issue of the proposed Navy homeport in Staten Island. I am not going to go into the merits of the issue today other than to say that I do think that placing that homeport in the most densely populated area with nuclear weapons on those ships is really playing Russian roulette with the lives of the people in the New York area.

I am going to confine myself to budgetary comments and consideration. I have listened with great interest to the distinguished chairman of the subcommittee and the distinguished ranking member, and I was impressed with their statement that in fact they had brought this bill in $1.9 billion below the administration's request and I applaud them for it. I know the tremendous budget deficit that we are running and how the Defense Department seems to be getting a share which most people think has been too much.

I do think that they overlooked this item, this one item from the rigorous, no-exceptions rule that they applied. The Defense Department, the Navy had requested an amount on page 94 of the report of $6,860,000 for land acquisition and site improvements. The subcommittee had thrust upon the Navy an additional $65,400,000 for barracks and mess halls and berthing piers and bulkheads. It is money that could not possibly be spent in this coming fiscal year. There is still a supplemental environmental impact statement that has to be done.

The Defense Department is doing studies as to the impact of this legislation. I hope somebody will move to strike that. I will not, but I hope that somebody does.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I yield 1 minute to the gentleman from New York [Mr. MOLINARI].

Mr. MOLINARI. I thank the gentleman for yielding.

Mr. Chairman, I would just like to respond to one statement made by my colleague from New York [Mr. WEISS]. That was the issue of homeporting in populated areas.

When we talk about New York City as being an area of heavy population, that is true. But we should not lose sight of the fact that many other sister cities throughout this country are being asked to do the very same thing; cities such as Galveston, San Francisco, Pensacola, New Orleans, not to mention those that already have large numbers of ships like Norfolk, San Diego, and Charleston, SC.

It is an issue where we are asked to share in the national risk, and I think it is something that every good American would want us to do. I rise in support.

Mr. HEFNER. Mr. Chairman, may I inquire how much time I have remaining?

The CHAIRMAN. The Chair advises the gentleman that he has 2 minutes remaining.

Mr. HEFNER. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. FAZIO].

Mr. FAZIO. I thank the gentleman for yielding me this time.

Mr. Chairman, having served on this committee, I can attest to the thoroughness with which the chairman, the members of the committee, its ranking member, and the staff review the increasing costs providing military construction for our troops, and for their dependents, and for all the people around the world who depend on the United States for their defense.

I would simply like to highlight the fact that has been mentioned once or twice already and that is that this bill reduces the initial request to the administration by almost 20 percent. Almost $2 billion. The gentleman from North Carolina can be proud, as can be the gentleman from Oklahoma [Mr. EDWARDS] of the tightfisted approach that this subcommittee has taken to its responsibilities.

□ 1420

If you look at the basis for the reductions that have been made, you can find them both in this country and overseas, all across the spectrum, tightening down on the kinds of construction that are provided, eliminating projects of low operational utility, such as academic facilities, recreation centers, indoor swimming pools, museums, libraries, things of that sort, which are not essential and which, while they can in some cases be very positive for the improvement of the quality of life for people, can also be deferred as we attempt to deal with our ongoing budget dilemma, our deficit, and our $2 trillion debt.

I would simply like to commend the subcommittee chairman for the outstanding work he has done, not only for this Member but, more importantly, for the taxpayers of this country. He has certainly provided an example to the entire Appropriations Committee as to how we can go about reducing the cost of what is becoming an increasingly expensive military construction appropriation.

The CHAIRMAN. The Chair wishes to advise that the gentleman from North Carolina [Mr. HEFNER] has no time remaining and the gentleman

from Oklahoma [Mr. EDWARDS] has 8 minutes remaining.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I have no further requests for time, but if the gentleman from North Carolina has some Member to whom he wants me to yield time, I would be glad to yield that time.

Mr. HEFNER. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. There being no further requests for time, all time has expired.

The Clerk will read.

The Clerk read as follows:

H.R. 3327

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending September 30, 1986, for military construction functions administered by the Department of Defense, and for other purposes, namely:

MILITARY CONSTRUCTION, ARMY

For acquisition, construction, installation, and equipment of temporary or permanent public works, military installations, facilities, and real property for the Army as currently authorized by law, and for construction and operation of facilities in support of the functions of the Commander-in-Chief, $1,646,152,000, to remain available until September 30, 1990: *Provided,* That of this amount, not to exceed $129,000,000 shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of his determination and the reasons therefor.

MILITARY CONSTRUCTION, NAVY

For acquisition, construction, installation, and equipment of temporary or permanent public works, naval installations, facilities, and real property for the Navy as currently authorized by law, including personnel in the Naval Facilities Engineering Command and other personal services necessary for the purposes of this appropriation, $1,704,005,000, to remain available until September 30, 1990: *Provided,* That of this amount, not to exceed $129,000,000 shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committee on Appropriations of both Houses of Congress of his determination and the reasons therefor.

MILITARY CONSTRUCTION, AIR FORCE

For acquisition, construction, installation, and equipment of temporary or permanent public works, military installations, facilities, and real property for the Air Force as currently authorized by law, $1,600,040,000, to remain available until September 30, 1990: *Provided,* That of this amount, not to exceed $130,000,000 shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of his determination and the reasons therefor.

MILITARY CONSTRUCTION, DEFENSE AGENCIES

For acquisition, construction, installation, and equipment of temporary or permanent public works, installations, facilities, and real property for activities and agencies of the Department of Defense (other than the military departments), as currently authorized by law, $127,690,000, to remain available until September 30, 1990: *Provided,* That such amounts of this appropriation as may be determined by the Secretary of Defense may be transferred to such appropriations of the Department of Defense available for military construction as he may designate, to be merged with and to be available for the same purposes, and for the same time period, as the appropriation or fund to which transferred: *Provided further,* That of the amount appropriated, not to exceed $25,000,000, shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committee on Appropriations of both Houses of Congress of his determination and the reasons therefor.

MILITARY CONSTRUCTION, ARMY NATIONAL GUARD

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Army National Guard, and contributions therefor, as authorized by chapter 133 of title 10, United States Code, and military construction authorization Acts, $100,364,000, to remain available until September 30, 1990.

MILITARY CONSTRUCTION, AIR NATIONAL GUARD

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Air National Guard, and contributions therefor, as authorized by chapter 133 of title 10, United States Code, and military construction authorization Acts, $116,400,000, to remain available until September 30, 1990.

MILITARY CONSTRUCTION, ARMY RESERVE

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Army Reserve as authorized by chapter 133 of title 10, United States Code, and military construction authorization Acts, $61,746,000, to remain available until September 30, 1990.

MILITARY CONSTRUCTION, NAVAL RESERVE

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the reserve components of the Navy and Marine Corps as authorized by chapter 133 of title 10, United States Code, and military construction authorization Acts, $41,800,000, to remain available until September 30, 1990.

MILITARY CONSTRUCTION, AIR FORCE RESERVE

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Air Force Reserve as authorized by chapter 133 of title 10, United States Code, and military construction authorization Acts, $63,073,000, to remain available until September 30, 1990.

FAMILY HOUSING, ARMY

For expenses of family housing for the Army for construction, including acquisition, replacement, addition, expansion, extension and alteration and for operation and maintenance, including debt payment, leasing, minor construction, principal and interest charges, and insurance premiums, as authorized by law, as follows: for Construction $252,506,000; for Operation and maintenance, $1,167,069,000; for debt payment, $16,077,000; in all $1,435,652,000: *Provided,* That the amount provided for construction shall remain available until September 30, 1990.

FAMILY HOUSING, NAVY AND MARINE CORPS

For expenses of family housing for the Navy and Marine Corps for construction, including acquisition, replacement, addition, expansion, extension and alteration and for operation and maintenance, including debt payment, leasing, minor construction, principal and interest charges, and insurance premiums, as authorized by law, as follows: for Construction, $131,708,000; for Operation and maintenance, $524,270,000; debt payment, $17,302,000; inall $673,280,000: *Provided,* That the amount provided for construction shall remain available until September 30, 1990.

FAMILY HOUSING, AIR FORCE

For expenses of family housing for the Air Force for construction, including acquisition, replacement, addition, expansion, extension and alteration and for operation and maintenance, including debt payment, leasing, minor construction, principal and interest charges, and insurance premiums, as authorized by law as follows: for Construction, $172,150,000; for Operation and maintenance, $664,361,000; for debt payment, $15,305,000; in all $851,816,000 *Provided,* That the amount provided for construction shall remain available until September 30, 1990.

FAMILY HOUSING, DEFENSE AGENCIES

For expenses of family housing for the activities and agencies of the Department of Defense (other than the military departments) for construction, including acquisition, replacement, addition, expansion, extension and alteration and for operation and maintenance, leasing, and minor construction, as authorized by law, as follows: for Construction, $1,410,000; for Operation and maintenance, $12,890,000; in all $14,300,000: *Provided,* That the amount provided for construction shall remain available until September 30, 1990.

GENERAL PROVISIONS

SEC. 101. None of the funds appropriated in this Act shall be expended for payments under a cost-plus-a-fixed-fee contract for work, where cost estimates exceed $25,000, to be performed within the United States, except Alaska, without the specific approval in writing of the Secretary of Defense setting forth the reasons therefor.

SEC. 102. Funds herein appropriated to the Department of Defense for construction shall be available for hire of passenger motor vehicles.

SEC. 103. Funds appropriated to the Department of Defense for construction may be used for advances to the Federal Highway Administration, Department of Transportation, for the construction of access roads as authorized by section 210 of title 23, United States Code, when projects authorized therein are certified as important to the national defense by the Secretary of Defense.

SEC. 104. None of the funds appropriated in this Act may be used to begin construction of new bases inside the continental

United States for which specific appropriations have not been made.

SEC. 105. No part of the funds provided in this Act shall be used for purchase of land or land easements in excess of 100 per centum of the value as determined by the Corps of Engineers or the Naval Facilities Engineering Command, except; (a) where there is a determination of value by a Federal court, or (b) purchases negotiated by the Attorney General or his designee, or (c) where the estimated value is less than $25,000, or (d) as otherwise determined by the Secretary of Defense to be in the public interest.

SEC. 106. None of the funds appropriated in this Act shall be used to (1) acquire land, (2) provide for site preparation, or (3) install utilities for any family housing, except housing for which funds have been made available in annual military construction appropriations Acts.

SEC. 107. None of the funds appropriated in this Act for minor construction may be used to transfer or relocate any activity from one base or installation to another, without prior notification to the Committees on Appropriations.

SEC. 108. No part of the funds appropriated in this Act may be used for the procurement of steel for any construction project or activity for which American steel producers, fabricators, and manufacturers have been denied the opportunity to compete for such steel procurement.

SEC. 109. No part of the funds appropriated in this Act for dredging in the Indian Ocean may be used for the performance of the work by foreign contractors: *Provided*, That the low responsive and responsible bid of a United States contractor does not exceed the lowest responsive and responsible bid of a foreign contractor by greater than 20 per centum.

SEC. 110. None of the funds available to the Department of Defense for military construction or family housing during the current fiscal year may be used to pay real property taxes in any foreign nation.

SEC. 111. No part of the funds appropriated in this Act may be used to pay the compensation of an officer of the Government of the United States or to reimburse a contractor for the employment of a person for work in the continental United States by any such person if such person is an alien who has not been lawfully admitted to the United States.

SEC. 112. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 113. None of the funds appropriated in this Act may be obligated or expended in any way for the express purpose of the sale, lease, or rental of any portion of land currently identified as Fort DeRussy, Honolulu, Hawaii.

SEC. 114. None of the funds in this Act may be used to initiate a new installation overseas without prior notification to the Committees on Appropriations.

SEC. 115. None of the funds appropriated in this Act for F-16 beddown projects at Misawa, Japan, may be obligated or expended unless there has been notification to the Committees on Appropriations that the approved Government of Japan budget for fiscal year 1986 includes projects associated with the F-16 beddown as an additive over the level of funding provided in Japanese fiscal year 1985 for the facilities improvement program.

SEC. 116. None of the funds appropriated in this Act may be obligated for architect and engineer contracts estimated by the Government to exceed $1,000,000 for projects to be accomplished in Japan or in any NATO member country, unless such contracts are awarded to United States firms or United States firms in joint venture with host nation firms.

SEC. 117. None of the funds appropriated in this Act for military construction in the United States territories and possessions in the Pacific and on Kwajalein Island may be used to award any contract estimated by the Government to exceed $1,000,000 to a foreign contractor: *Provided*, That this section shall not be applicable to contract awards for which the lowest responsive and responsible bid of a United States contractor exceeds the lowest responsive and responsible bid of a foreign contractor by greater than 20 per centum.

SEC. 118. The Secretary of Defense is to inform the Committees on Appropriations and Committees on Armed Services of the plans and scope of any proposed military exercise involving United States personnel 30 days prior to its occurring, if amounts expended for construction, either temporary, or permanent, are anticipated to exceed $100,000.

(TRANSFER OF FUNDS)

SEC. 119. Unexpended balances in the Military Family Housing Management Account established pursuant to section 2831 of title 10, United States Code, as well as any additional amounts which would otherwise be transferred to the Military Family Housing Management Account during fiscal year 1986, shall be transferred to the appropriations for Family Housing provided in this Act, as determined by the Secretary of Defense, based on the sources from which the funds were derived, and shall be available for the same purposes, and for the same period, as the appropriation to which they have been transferred.

SEC. 120. Not more than 20 per centum of the appropriations in this Act which are limited for obligation during the current fiscal year shall be obligated during the last two months of the fiscal year.

(TRANSFER OF FUNDS)

SEC. 121. (a) Funds appropriated to the Department of Defense for construction in prior years are hereby made available for construction authorized for each such department by the authorizations enacted into law during the first session of the Ninety-ninth Congress.

(b) The provisions of 10 U.S.C. 2860 (a) and (b), are hereby repealed.

SEC. 122. The Secretary of the Army acting through the Chief of Engineers of the United States Army Corps of Engineers is hereby directed to assign a military design, construction and support mission of said Corps of Engineers to the Little Rock district of the Corps of Engineers, to enlarge the civil works boundaries of said district to include all of the State of Arkansas exclusive of the lands and waters within the St. Francis River basin and east of said basin which shall remain in the Memphis district, to designate the Little Rock district as a full service district which includes responsibilities for finance and accounting, planning, design, construction, operation and maintenance and appropriate support services, and to reassign said district to the Lower Mississippi Valley Division. The provisions of this paragraph shall not in any way affect or change the boundaries or responsibilities of the Vicksburg district.

SEC. 123. Notwithstanding any other provision of law, the Secretary of the Army shall convey, without reimbursement, to the United States Modern Pentathalon Association, a nonprofit association organized under the laws of the State of Texas, all equipment owned by the United States and currently used by the United States Modern Pentathalon Team for training and competition.

This Act may be cited as the "Military Construction Appropriations Act, 1986".

Mr. HEFNER (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The CHAIRMAN. Are there any points of order against the bill?

If not, are there any amendments?

AMENDMENT OFFERED BY MR. HEFNER

Mr. HEFNER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HEFNER: Page 3, line 23, after law, strike out: "$127,690,000" and insert "$124,955,000".

Mr. HEFNER. Mr. Chairman, I offer this amendment to bring the military construction appropriation bill, H.R. 3327, into conformance with the military construction authorization bill, H.R. 1409.

This amendment reduces this account by a total of $2,735,000. These funds were intended for the construction of two schools, one in Bermuda for $2,290,000, and one in Okinawa, Japan, for $445,000, which for various reasons are not ready for funding this year.

Mr. Chairman, I urge the adoption of this amendment.

Mr. EDWARDS of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. HEFNER. I yield to the gentleman from Oklahoma.

Mr. Edwards of Oklahoma. Mr. Chairman, we are in support of the amendment on this side.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina [Mr. HEFNER].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. EDWARDS OF OKLAHOMA

Mr. EDWARDS of Oklahoma. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. EDWARDS of Oklahoma: On page 12, section 121, strike lines 20 and 21, insert the following subsections (b) and (c):

(b) IN GENERAL.—10 U.S.C. 2860 is amended to read as follows:

"SEC. 2860. AVAILABILITY OF APPROPRIATIONS.

"Funds appropriated to a military department or defense agency for a fiscal year for military construction or military family housing purposes may remain available beyond such fiscal year to the extent provided in the appropriation acts."

(c) EFFECTIVE DATE.—The amendment made by subsection (b) shall apply to funds appropriated after the date of the enactment of Public Law 99-103.

Mr. EDWARDS of Oklahoma (during the reading). Mr. chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. EDWARDS of Oklahoma. Mr. Chairman, this amendment is essentially a technical amendment which strikes a provision in our bill repealing section 2860 (a) and (b) of title 10 of the United States Code and inserts the same provision that was passed yesterday in the military construction authorization bill as an amendment I offered at that time. I am introducing this amendment to insure that we are in total conformity with the Authorization Committee.

This is a necessary amendment as part of an initiative to reform and oversee the actual use of appropriated funds for military construction.

Mr. Chairman, it is my understanding that the subcommittee chairman has no objection to the amendment.

Mr. HEFNER. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I yield to the gentleman from North Carolina.

Mr. HEFNER. Mr. Chairman, I thank the gentleman for yielding.

I have absolutely no problem with the amendment. I strongly support the concept and urge the adoption of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma [Mr. EDWARDS].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. THOMAS OF CALIFORNIA

Mr. THOMAS of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. THOMAS of California: On page 3 of line 4, after "therefor" insert ": *Provided further*, That of this amount, $8,250,000 shall be available for land acquisition at China Lake, California".

Mr. THOMAS of California. Mr. Chairman, this amendment is offered to H.R. 3327, to provide for land acquisition in China Lake, CA.

In 1980, Congress authorized funds to purchase land for two existing, low-level, aircraft approach corridors at China Lake Naval Weapons Center. These corridors are utilized by armed, high-speed aircraft during run-in prior to firing weapons at range targets. There remains unacquired, after all possible land trades have been accomplished, 554 acres owned by 51 private landowners which must be purchased in order to insure both the safety of these citizens and of the operations of the Weapons Center.

It is most important to bring this project to a conclusion because these landowners have, for the past 5 years, been unable to sell, subdivide, or improve their property. Any further delays will be unfair to these people and result in increased costs to the Government.

Finally, Mr. Chairman, it is important to point out that this proposal requires no increase in appropriations. Rather, it is being offered as an offsetting amendment. The Navy would be directed to complete the acquisition of this property with an offsetting general reduction being made to the budget totals using available funds from prior-year savings.

For these reasons, this amendment should be adopted and I urge my colleagues to support it.

Mr. HEFNER. Mr. Chairman, will the gentleman yield?

Mr. THOMAS of California. I yield to the gentleman from North Carolina.

Mr. HEFNER. Mr. Chairman, we have no objection to the amendment. We share the concern for the landowners, and especially want to note that we have an offsetting arrangement and this amendment adds no more money to the bill. We accomplish this by increasing the general reduction by $8,250,000. We support the amendment. We have no objection to it.

Mr. THOMAS of California. Mr. Chairman, the gentleman is correct, there is no additional money as an offsetting arrangement.

Mr. EDWARDS of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. THOMAS of California. I yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I also share the gentleman's concern for the affected landowners, and because this amendment has offsetting provisions to it, I have no objection to it.

Mr. THOMAS of California. Mr. Chairman, I would like to thank both the chairman and the ranking member of the subcommittee for their cooperation in this matter. This is a needed purchase. It is something that is long overdue, and the arrangement that has been provided here is, I think, the most equitable settlement of the matter.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. THOMAS].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. SKELTON

Mr. SKELTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SKELTON: On page 4, line 18, strike "$100,364,000" and insert in lieu thereof "$100,363,000".

Mr. SKELTON. Mr. Chairman, recently, approximately a year ago, the National Guard's 35th Division was reactivated with its headquarters at Fort Leavenworth, KS, and each of the several States involved will have what the military calls Discom headquarters. The State of Missouri is involved with the 35th Division, and its Discom headquarters will be at Lexington and Jefferson City, MO.

We were not in position at the early stages of the authorization and appropriations to make a request. However, at this time such request is in the offing because yesterday this was authorized by the military construction bill, and today I seek appropriation for that.

This amendment that I have offered, Mr. Chairman, follows the guidelines that this chairman has established to offset any amendments within reductions in the same amount. My amendment, while it reduces the budget authority for the Army National Guard by $1,000, does appropriate $2,186,000 for the two armories, one at Lexington, MO and one at Jefferson City, MO. The effect of my amendment is to offset the increase by increasing the general reduction in the Army National Guard account by $2,187,000.

AMENDMENT OFFERED BY MR. RICHARDSON TO THE AMENDMENT OFFERED BY MR. SKELTON

Mr. RICHARDSON. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. RICHARDSON to the amendment offered by Mr. SKELTON: On page 4, line 18, strike out "$100,363,000" and insert in lieu thereof "$100,362,000".

Mr. RICHARDSON (during the reading). Mr. Chairman, I ask unanimous consent that my amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

Mr. RICHARDSON. Mr. Chairman, this is an amendment I am offering on behalf of myself and the gentleman from New Mexico [Mr. SKEEN]. It is an amendment that reflects a successful amendment that was adopted yesterday in the military construction authorization bill.

Mr. Chairman, this amendment follows the guidelines established by the chairman of the Military Construction Subcommittee, to offset any amendments with reductions within the same account. My amendment, while it reduces budget authority for the Army National Guard account by $1,000, appropriates $755,000 for an Army

armory to be constructed in Hobbs, NM. The effect of my amendment is to offset the increase by increasing the general reduction in the Army National Guard account $756,000.

Mr. Chairman, this is an amendment that has been worked out, and I urge its adoption.

Mr. SKELTON. Mr. Chairman, will the gentleman yield?

Mr. RICHARDSON. I yield to the gentleman from Missouri.

Mr. SKELTON. Mr. Chairman, I have absolutely no objection to the amendment to my amendment. I would state that it is done this way because of the rules of the House.

□ 1430

Mr. HEFNER. Mr. Chairman, will the gentleman yield?

Mr. RICHARDSON. I yield to the gentleman.

Mr. HEFNER. Mr. Chairman, I have no objection to the gentleman's amendment to the amendment with the understanding that the additional funds for the armories must be absorbed by the Army National Guard within the available funds. So I have no objection to the amendment.

Mr. EDWARDS of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. RICHARDSON. Yes; I yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. Mr. Chairman, we have no objection on this side of the aisle, either.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Mexico [Mr. RICHARDSON] to the amendment offered by the gentleman from Missouri [Mr. SKELTON].

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri [Mr. SKELTON], as amended.

The amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MR. BROWN OF CALIFORNIA

Mr. BROWN of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROWN of California: Page 3, line 9, strike out "$1,600,040,000" and insert in lieu thereof "$1,585,140,000".

Mr. BROWN of California. Mr. Chairman, I am introducing this amendment to the Military Construction Appropriations bill to delete $14.9 million for construction of an operational antisatellite [Asat] facility. The construction of an operational Asat facility at Langley AFB in Virginia represents the first operational construction for the Asat system.

It's a clear signal that the administration intends to deploy the Asat system despite Congress explicit intention that the adminstration should negotiate an Asat agreement with the Soviets. The appropriations for such a facility is clearly contrary to the desires of the House as indicated by this body which endorsed a mutual and verifiable moratorium on Asat tests not once, but twice.

While the test moratorium did not prevail in conference, the certification requirement language which did prevail clearly states that the administration should endeavor "in good faith, to negotiate with the Soviet Union a mutual and verifiable agreement with the strictest possible limitations on antisatellite weapons consistent with the national security interests of the United States."

Before appropriating funds for this facility, the administration should first abide by the law. In his Asat certification report to Congress on August 20, 1985, the President admitted that no negotiations on Asat's had been pursued, though he did concede that: "We will continue to study possible Asat limitations in good faith * * *." This, however, does not respond to Congress mandate.

I realize that with the November summit between Ronald Reagan and Mikhail Gorbachev on the horizon, many of my colleagues hesitate to tie the President's hands. Nor would I. But neither let us delude ourselves. Every administration from the beginning of the Republic has waved the banner of national security right up until the time that they have either obtained their objective or reversed themselves. It's a time-honored tradition which requires from Congress a healthy skepticism, and a need to review all the facts.

This amendment in no way affects the Asat research and development program. A strong and vital research and development program maintains America's technological edge. Should the administration proceed with Asat negotiations, it would still be in a strong bargaining position.

Even if such negotiations should fail, the need for construction moneys at this time is premature. Traditionally, military construction projects need approximately a 2-year lead time. But the House yet again appears to be prepared to support a bilateral, verifiable moratorium on the testing of Asat weapons. Such a moratorium would continue Asat research and development, but permit time to negotiate limitations on this destablizing military system. The Defense Appropriations Subcommittee has already approved such a proposal, and it is likely that the full Appropriations Committee and House will follow suit.

At a time of high deficit spending, we should not be so wasteful as to appropriate construction moneys for a controversial system, the deployment of which is questionable. It is inconsistent to place a moratorium on testing, yet proceed with the construction of an operational facility. Simply, the $14.9 million for the construction of an Asat operational facility at Langley AFB in Virginia is not needed at this time. I encourage you to support this amendment, and not be so foolhardy as to place the cart before the horse.

Mr. HEFNER. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I am happy to yield.

Mr. HEFNER. Mr. Chairman, we have looked at the amendment on this side of the aisle. We concur with the amendment and we accept the amendment.

Mr. EDWARDS of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I am happy to yield.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I strongly support the Asat program, as does I think a majority of our subcommittee. But, it has always been the practice of our subcommittee not to appropriate funds until they are truly needed. The gentleman makes the point that they are not at this point; so based on that information, we have no objection to the gentleman's amendment, either.

Mr. BROWN of California. Mr. Chairman, I very much appreciate the gentleman's comment.

Let me just add that I will not oppose the expenditure of these funds at the appropriate time, but I think it is a little premature at the present time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. BROWN].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. DAVIS

Mr. DAVIS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DAVIS: Page 5, line 1, strike out "$116,400,000" and insert in lieu thereof "$116,350,000".

Mr. DAVIS. Mr. Chairman, my amendment provides for winterization for one of our country's four permanent air training facilities. For a relatively small amount of money, we can convert Phelps Collins Air National Guard Base from a seasonal base into a viable, year-around facility.

Let me make it clear from the outset that this project adds no cost to the military construction appropriations bill. The $1.8 million cost will be offset by moneys from the account based on anticipated savings from good bids from the Air National Guard military construction projects. In total, this amendment actually reduces the total appropriation level by $50,000.

This amendment has two major points in its favor. First and foremost, it will have a positive effect on our defense readiness. There are only two northern tier locations for air guard

training, and it is a waste of our precious defense resources to turn units away from a base in winter simply because there are not enough winterized dormitories. This money provides accommodations for 200 individuals.

Second, even in the short run, I believe this $1.8 million military construction project will pay for itself quickly. If the availability of Phelps Collins eliminates the need to send units overseas as is presently the practice the winterization will pay for itself when the first unit stays home. Over a period of several years, this project offers a multiple payback .

Members of this body have seen fit to approve this project during the authorization process, and I hope they will do the same today. I ask for the adoption of this important amendment.

Mr. HEFNER. Mr. Chairman, will the gentleman yield?

Mr. DAVIS. Yes, I am pleased to yield.

Mr. HEFNER. Mr. Chairman, we accept the gentleman's amendment, with the understanding that the additional funds for the project are offset by a commensurate general reduction in the Air National Guard account. We accept the amendment on this side.

Mr. EDWARDS of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. DAVIS. I yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. Mr. Chairman, this amendment does have an offsetting provision and it does not increase the cost of the bill, so we have no objection to it on this side, either.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan [Mr. DAVIS].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ATKINS

Mr. ATKINS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ATKINS: Page 7, line 5, strike out "$172,150,000" and insert in lieu thereof "$186,350,000".

Page 7, line 6, strike out "$664,361,000" and insert in lieu thereof "$650,161,000".

Mr. ATKINS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. ATKINS. Mr. Chairman, this amendment falls within the guidelines of the committee. There is an offsetting feature of it. It simply allows the construction at Hanscom Field in Bedford to proceed as had been planned previously.

Mr. HEFNER. Mr. Chairman, will the gentleman yield?

Mr. ATKINS. I yield to the gentleman.

Mr. HEFNER. Mr. Chairman, we worked very closely with the gentleman from Massachusetts [Mr. ATKINS] on this amendment. It is necessary because the committee turned down a request for leased housing at this location due to the high cost of the proposal. It was a section 801 leasing request.

We do, however, acknowledge the need for the housing and we are prepared to accept this amendment, based on the offsets that are contained in the amendment.

Mr. Chairman, we are happy to accept this amendment.

Mr. EDWARDS of Oklahoma. Mr. Chairman, will the gentleman yield to me?

Mr. ATKINS. Yes, I am pleased to yield.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I would like to echo what the Chairman said. We had kind of a nasty run-in with the Air Force at Hanscom over the way they were proceeding, but there is a need for housing at that base.

Mr. Chairman, we have no objection to the way the amendment is offered.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. ATKINS].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BATEMAN

Mr. BATEMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BATEMAN: On page 2, line 21, strike "$1,704,005,000" and insert in lieu thereof "$1,703,705,000".

Mr. BATEMAN. Mr. Chairman, the purpose of my amendment is to allow the Chief of Naval Operations to construct a Command and Control Center for the Naval Space Command at Dahlgren, VA.

In requesting that the resources for this facility be reinstated, the House should consider that the decision to defer funding on this important project was based on assumptions set forth in the committee's report that are both inaccurate and incomplete. First, let me emphasize that it is a matter of record that it was the intent of the House Appropriations Committee to merely "defer" this funding.

This deferment was based on the apparent belief of the committee that the Naval Space Command is staffed by only 46 people. This was true in August of last year, but as this program has matured the number of staff has increased accordingly. Today, there are 76 Navy personnel alone on staff. By February 1986, there will be 92. The proposed Command and Control Center at Dahlgren, as approved by the House of Representatives in the passage yesterday of the Military Construction Authorization bill, is designed for the 125 people expected to be needed based on the approved and assigned mission requirements for the Naval Space Command. Those 76 personnel on staff today are occupying quarters adequate for 46 people. Again, by early next year, 92 people will occupy these obviously cramped quarters which include temporary office trailers.

Additionally, the committee questioned the need for a separate building for the Naval Space Command when a unified Space Command is undergoing construction in Colorado Springs, CO. What the committee apparently failed to consider were the key reasons for the selection of the Dahlgren site. These include its nearness to major NATO and Atlantic Fleet Headquarters at Norfolk, VA, the centers for naval space interface actions in Washington, DC, the proximity of a major subordinate command in the Naval Space Surveillance System, and the benefit of dispersing the Naval Space Command from the other key national space asset control centers.

The ongoing Air Force military construction at Colorado Springs was not designed to accommodate the Naval Command staff. Relocation of the Naval Space Command to Colorado would negate the factors upon which Dahlgren was selected, cause significant relocation costs, disrupt mission operations, cause the dispersal of the civilian staff, and delay and increase the costs of the inevitable construction to house the Command regardless of where it is based.

The assignment of the Naval Space Command as the naval component of the unified Space Command effective September 23, 1985, intensifies the need for adequate and secure facilities. The naval component of the unified Space Command is separate from the unified Space Command staff, on which all of the Services are represented, and thus collocation is unnecessary. As a component command, the Naval Space Command has been based at Dahlgren to best support their operations in maintaining open sea lines of communication with our forces and allies in Europe.

Few of the necessary operations of the Naval Space Command staff can be effectively executed in their present temporary quarters due to the highly classified nature of space operations and the inability to secure the present temporary facility. Even if the present facilities could be secured, however, these facilities are inadequate for the Naval Space Command's mission requirements.

These factors, no doubt, were among the many reasons the House Armed Services Committee and the House of Representatives approved this facility in the fiscal year 1986 military construction authorization bill yesterday.

Additionally, for those of us concerned that the appropriations for military construction in fiscal year 1986 not exceed outlays for fiscal year 1985, the military construction appropriation bill for fiscal year 1986 as reported by the committee is $30 mllion under the 1985 level, and thus the restoration of the funds for this necessary facility would not even come close to exceeding a freeze level in military construction outlays.

Mr. Chairman, this amendment follows the guidelines established by the chairman of the Military Construction Subcommittee to offset any amendments with reductions within the same account. My amendment, while it reduces budget authority for the Navy's account by $300,000, appropriates $4,700,000 for a Command and Control Center for the Naval Space Command. The effect of my amendment is to offset the increase by increasing the general reduction in the Navy account by $5 million.

My amendment will in fact reduce the total appropriation by the offset of $5 million in the Navy's General Reduction account. By adoption of my amendment the House would provide the needed headquarters of this essential command and at the same time reduce the amount appropriated by an amount of $300,000.

I therefore strongly urge the House to approve this amendment and restore the funds for the construction of a secure Command and Control Center for the Naval Space Command.

Mr. HEFNER. Mr. Chairman, will the gentleman yield?

Mr. BATEMAN. I will indeed yield.

Mr. HEFNER. Mr. Chairman, we have looked at the amendment. We understand the gentleman's concern in offering this amendment. I do not have any objection to the amendment, since it requires the Navy to absorb the cost within the available funds.

Just this year, the Secretary of Defense established that Colorado Springs would be the site of the Unified Space Command. The committee appropriated over $20 million for the joint use facility at Colorado Springs to be shared by all services. The Navy has never justified why a separate command and control center at Dahlgren is needed. The Navy's own justification also indicates that the equipment associated with this facility would not be requested until fiscal year 1987. The committee's position was to defer this project until the Navy comes forward with an adequate justification. At that time, we would be able to deal with it in conference.

However, Mr. Chairman, we are happy to accept the amendment.

Mr. EDWARDS of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. BATEMAN. I am happy to yield.

Mr. EDWARDS of Oklahoma. Mr. Chairman, we are glad that we were able to work this out with the gentleman. He has done a good job on this. It is a needed amendment.

Mr. Chairman, we have no objection to the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia [Mr. BATEMAN].

The amendment was agreed to.

Mr. WEISS. Mr. Chairman, I move to strike the last word. I thank the distinguished chairman.

Mr. Chairman, I had not intended to rise at this point in consideration of the bill. The distinguished chairman of the subcommittee was gracious enough to give me time during general debate; however, in response to the statement of my good friend from New York, who said something to the effect that no good American should oppose or could oppose placing a nuclear home port in New York City, now, I cannot really let that go by.

Mr. MOLINARI. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I am pleased to my friend.

Mr. MOLINARI. Mr. Chairman, I certainly did not intend to direct that to the gentleman from New York [Mr. WEISS]. I have too much respect for the gentleman. If the gentleman interprets it that way, I apologize.

What I simply meant to convey was that I did not want this body to think, nor the country or the world, to think that the residents of the city of New York would expect the rest of the country to share the burden of protecting New York City, as well as the rest of the country. I certainly did not intend to impugn the gentleman's integrity.

Mr. WEISS. Well, I very much appreciate the gentleman's statement, but let me address the substance of the issue that was raised.

Mr. Chairman, 100,000 New Yorkers have signed a referendum petition to place the issue of a nuclear home port on Staten Island on the ballot for the 5th of November this year. Those are New Yorkers who pay their taxes. Those taxes go toward supporting the national security defense interests of the United States of America. What they object to, and I would assume that they will be joined by a great many other of their fellow New Yorkers, is placing a floating nuclear silo in the midst of New York City, which is one of the most densely populated areas serving the country and perhaps in the world.

There are proper places for different kinds of things. No one, I think, would suggest that we place a nuclear silo in Central Park in New York for a land-based missile, because it would be just too dangerous to do that.

It is at least as dangerous, perhaps more so, to place a nuclear home port in the middle of New York, with the battleship *Iowa* and six of its sister ships, most of which will be nuclear capable and most of which will be carrying nuclear weapons, with the tremendous traffic that takes place in the port of New York.

While I agree that the likelihood of an explosion, nuclear explosion, is so remote, it has got to be considered a real possibility. Fires and accidents of various kinds can take place. Collisions can take place. Loading of the weapons poses all kinds of problems.

Last year we had a Pershing missile in Germany that exploded when it was being loaded. Twenty-five years ago we had an explosion of a Bomarc missile at LaGuardia Air Force Base in New Jersey; so that accidents can happen.

The question of sabotage cannot be ruled out.

The release of radioactive nuclear material in the midst of New York City can pose very serious life-threatening danger to millions of people and thousands of them can be fatally affected by it.

That is why I suggest that this is not the right place for a home port for ships carrying nuclear weapons to be placed.

It should also be pointed out, as I started to in my statement, that I do not understand why, given the commendable job that this subcommittee has done in paring the administration's request, why it thrust $65,400,000 above the $6,860,000 which the Navy requested in order to get dockside acquisition and site improvement.

There is just no way that all that additional $65 million can be spent.

Mr. MOLINARI. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I am pleased to yield to my friend.

Mr. MOLINARI. Mr. Chairman, I have had that very discussion with representatives of the Navy time and time again. They have assured me in no uncertain terms that they will be able to expend the full $86 million that was authorized, including the $15 million that was put forth by the port of New York and New Jersey.

But I would ask the gentleman, if he would continue to yield, if he feels so strongly about the issue, as the gentleman has stated on the floor today, why did the gentleman not consider putting in an amendment to strike those provisions?

The CHAIRMAN. The time of the gentleman from New York [Mr. WEISS] has expired.

(By unanimous consent, Mr. WEISS was allowed to proceed for 3 additional minutes.)

Mr. MOLINARI. Mr. Chairman, if the gentleman will continue to yield, why did the gentleman not consider putting in an amendment today, as other Members did, to strike those provisions?

Mr. WEISS. Mr. Chairman, let me just by way of response to the gentleman say that he has not said that that money would be spent this year and that is what I understood the distinguished chairman of the subcommittee and the ranking member to say.

I have not heard any representation that 35 percent of the design for the barracks and mess hall of this home port was ready.

Compare that with what happened at the naval station in Everett in the State of Washington. There the request was for $17,640,000 for land acquisition and that is what the committee gave them beyond the $1 million community impact, with which I have no argument at all.

Now, I did not offer, and I said I would not offer, an amendment, because as far as I am concerned, I am opposed to the whole project. I do not want an amendment which I would offer to strike the $65,400,000 above this thing to be construed as my supporting the basic concept of the nuclear home port.

It is I think within the guidelines that the committee itself set. I think it is for them to recognize that they really would not pass them and they ought to remove this $65,400,000, which cannot be spent, but which adds to the deficit we are carrying for the balance of this year.

Mr. HEFNER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, just in response to the questions of the gentleman from New York [Mr. WEISS], the Navy, as we all know, designated Staten Island to be the home port site of the battleship *Iowa*. The budget contained only $7 million for the initial phase of construction. This was not the recommendation of the Navy, but it was a last-minute decision of the Secretary of Defense, and the Navy was quick to admit that funding of only $7 million in fiscal year 1986 would not be sufficient to meet an IOC date of 1988.

It was necessary for the committee, and through the hard and diligent work of the gentleman from New York [Mr. ADDABBO], to add the $65 million to the request in order to meet the established IOC date.

Now, the committee considers dispersal of the fleet to be strategically necessary because the Navy has thoroughly examined all the options for the Northeast, and it seems that there is no reason to hold up the funds for this project; so that was the rationale that we used.

Mr. WEISS. Mr. Chairman, would my friend yield to me?

Mr. HEFNER. Certainly.

Mr. WEISS. Is the distinguished Chairman aware of the fact that there is, in fact, a very serious debate going on within defense circles as to whether strategic dispersal is or is not the appropriate policy for the Defense Establishment of the United States to adopt?

Mr. HEFNER. Well, we are certainly aware of the debate. There are arguments going on in all areas, such as the MX and all of these; but we have an obligation that we felt that we had to do for the gentleman from New York [Mr. ADDABBO] and in order to meet the IOC date of 1988. That was our primary purpose.

Mr. WEISS. Mr. Chairman, I thank the gentleman.

□ 1445

Mr. EDWARDS of Oklahoma. Mr. Chairman, I move to strike the last word.

Mr. Chairman, this is a very good bill and, as I mentioned before, I have been tremendously impressed by the way in which the members of the majority and the minority on this committee have worked together.

If the members look carefully at the bill and at the report language, they will see that this is a military reform bill. We make a number of changes in dealing with the Pentagon that I think are very, very helpful in enabling the Congress to keep a close watch on the spending. The way we have been able to do this and the way we have been able to move this bill rather smoothly and expeditiously through the House is because of a lot of people working together on this bill. This includes both members of the committee and members of the staff, and I would like to mention some of them.

George Allen, who is on the minority staff of the Committee on Appropriations, has done a very, very good job working with us on this.

Vicki Martyak, my chief of staff, who oversaw our military reform operations from my office, did an excellent job.

Bill Marinelli, Mark Murray, and Mary Fiedeli, from the majority staff, did a super job, and we are doing a very good job, I might say, of working fairly with the minority as well as the majority.

And while I am on the staff, I should single out especially my own assistant on the committee, who barely took time out from her work on this bill to get married and take a honeymoon, Liz Dawson, who I think all the members of the committee would agree has really done outstanding work.

Mr. Chairman, I want to thank the minority members of the committee, who all worked very well with us, as well as the majority members. While all the members of the majority did a very good job, I would single out the gentleman from Massachusetts [Mr. EARLY] and the gentleman from Texas [Mr. COLEMAN], who were very active and energetic in working on this bill. And especially, to repeat what I said earlier, I have said it in the Committee on Appropriations and I have said it on the floor, I have never worked with a better chairman than the gentleman from North Carolina [BILL HEFNER], I have never worked with a better Member than BILL HEFNER, and I appreciate what he has done to bring us this kind of a bill.

The CHAIRMAN. Are there any other amendments to the bill?

Mr. HEFNER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would be remiss if I did not say that I cannot add to what the gentleman from Oklahoma [Mr. EDWARDS] has already said about the staff and all the members working so hard. We have a good bill, and I would urge support of this bill.

Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. LELAND, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3327) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1986, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them en gross.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 373, nays 36, not voting 25, as follows:

[Roll No. 362]

□ 1455

The Clerk announced the following pair:

On this vote:

Mr. JONES of Tennessee for, with Mr. DIXON against.

Mr. STOKES and Mr. SAVAGE changed their votes from "yea" to "nay."

Mr. LOWRY of Washington changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Ms. KAPTUR. Mr. Speaker, I regret that I was unavoidably detained on official business in my district yesterday, Wednesday, October 16, 1985. Had I been present, I would have voted in the affirmative on rollcall Nos. 359 and 360.

LEGISLATIVE PROGRAM

(Mr. LOTT asked and was given permission to address the House for 1 minute.)

Mr. LOTT. Mr. Speaker, I ask to address the House for the purpose of finding out what the schedule is going to be for the balance of today at least, if not for the rest of the week.

Mr. Speaker, Members are not certain at this point what the schedule is for the balance of the day and whether or not they can anticipate additional votes.

□ 1510

Mr. FOLEY. Will the gentleman yield?

Mr. LOTT. I yield to the gentleman.

Mr. FOLEY. Mr. Speaker, we intend to take up this afternoon the rule on the Daylight Savings Extension Act; that would be the rule only, and one unanimous-consent matter from the Committee on Foreign Affairs. No other legislative business would be scheduled for today.

Mr. LOTT. So that the membership would know, I might say that while this will be the usual 1-hour time on the rule, I understand it probably will not take the full hour, and while there may be a vote on the rule, it is not a controversial rule; but within the hour the substantive business of the day should be concluded. Is that correct?

Mr. FOLEY. The gentleman is correct.

Mr. LOTT. I yield further for any other announcement of schedule for the balance of the week.

Mr. FOLEY. The House will not be in session tomorrow, and when we adjourn tonight we would intend to adjourn to meet on Monday next.

There will be no votes on Monday. One suspension, H.R. 463, the National Topsoil Preservation Act of 1985.

On Tuesday, October 22, the House will meet at noon and take any vote ordered on the suspension considered on Monday. Also, the conference report on H.R. 2409, the Health Research Extension Act. The House will also consider on Tuesday, H.R. 2095, the Daylight Savings Extension Act, to complete consideration.

On Wednesday and the balance of the week, the House will meet at 10 a.m., and consider H.R. 3500, the Omnibus Budget Reconciliation Act of 1985; modified rule, 4 hours of debate.

This is subject to the usual admonition that conference reports may be brought up at any time and further program, may be announced later.

Mr. LOTT. If I could just ask a couple questions of the distinguished whip, earlier there had been an indication that there would be another suspension on the list dealing with the east plaza of the Capitol. That has been withdrawn, and so it is not antici-

pated that will be brought up next week. Is that correct?

Mr. FOLEY. I understand there is some need to reconcile that suspension with the Budget Act.

Mr. LOTT. So it will not be considered next week.

Mr. FOLEY. It will not be considered.

Mr. LOTT. And for Wednesday and the balance of the week, the gentleman does not anticipate any debate on the Daylight Savings Act on Monday? That will all be done on Tuesday; is that correct?

Mr. FOLEY. That is correct.

Mr. LOTT. And then finally, the reconciliation package is scheduled for Wednesday and the balance of the week. Other than conference reports, that would be the only legislation that we would have?

Mr. FOLEY. No, it may be that we will add some additional legislation for Thursday.

Mr. LOTT. If I could expand on that a bit, since it is 4 hours of general debate, assuming the rule passes and that reconciliation is finished on Wednesday, it would be anticipated that the leadership would try to bring up some additional legislation that might be pending on Thursday; is that correct?

Mr. FOLEY. That is correct.

Mr. LOTT. I know it would depend on how the votes go and whether or not we complete reconciliation and other issues, but at this point it would appear that we may not have a session on Friday.

Mr. FOLEY. The gentleman is also correct. If we complete the business of the Reconciliation Act and such other legislation as may be announced for Thursday, we will not anticipate a Friday session.

Mr. LOTT. I thank the distinguished Speaker, who looks really great in the chair.

ADJOURNMENT TO MONDAY, OCTOBER 21, 1985

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY, OCTOBER 23, 1985

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that business in order under the calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 2095, DAYLIGHT SAVING EXTENSION ACT OF 1985

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 288 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 288

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2095) to provide for daylight saving time on an expanded basis, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce, the bill shall be considered for amendment under the five-minute rule, and each section shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Ohio [Mr. HALL] is recognized for 1 hour.

Mr. HALL of Ohio. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Tennessee [Mr. QUILLEN] for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 288 is an open rule providing for the consideration of H.R. 2095, the Daylight Saving Extension Act of 1985.

The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce. The bill shall be considered for amendment under the 5-minute rule, and each section shall be considered as having been read. There is one motion to recommit.

There are no waivers or other special provisions under this open rule.

Mr. Speaker, legislation to extend daylight saving time has been considered in the past two Congresses. The bill made in order by this rule represents a compromise on the question of extending daylight saving time. Daylight saving time currently runs from the last Sunday in April to the last Sunday in October. This bill, H.R. 2095, would change daylight saving time to the first Sunday in April to the first Sunday in November.

There is bipartisan support for this legislation, which would save energy, reduce traffic accidents, and stimulate economic growth. The Daylight Saving Time Coalition, which includes a large group of business, has concluded that extended daylight saving time would provide a significant boost in sales. In addition, the RP (Retinitis Pigmentosa) Foundation Fighting Blindness supports the legislation because people affected with night blindness would receive an extra period of sight and mobility with extra evening sunlight available.

The bill has broad support, and I am not aware of any opposition to this open rule. I urge my colleagues to adopt it.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Tennessee [Mr. QUILLEN].

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, daylight saving time has always been a controversial matter when brought to the floor of the House, but in this instance I understand that the controversy has been worked out and everybody is in agreement.

Mr. Speaker, I have three speakers, I would advise the gentleman, and at this time I yield 1 minute to the gentlewoman from Nebraska [Mrs. SMITH].

Mrs. SMITH of Nebraska. Mr. Speaker, I rise in opposition to this rule because I oppose H.R. 2095, the Daylight Saving Extension Act of 1985.

Daylight saving time now begins on the last Sunday of April and ends on the last Sunday of October. H.R. 2095 would extend the period of daylight saving time from the first Sunday of April to the first Sunday of November, thus lengthening daylight saving time by 4 weeks.

The sponsors of this legislation state that this extension is a compromise designed to appease the rural people who have opposed daylight saving time extensions in the past.

Well, I represent one of the most rural districts in the Nation. My constituents have let me know loud and clear that they not only oppose any extension of daylight saving time, they would prefer that the current period be shortened.

Mr. Speaker, it seems to me that urban Members of Congress should have better things to do than to make life miserable for rural Americans.

This is an ill-advised, unnecessary, and unwanted piece of legislation. I urge my colleagues to join me in opposition to this rule and in opposition to the Daylight Saving Time Extension Act.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, when the proponents brought the matter before the Committee on Rules, I understood that all the problems had been worked out, and I find out that I am incorrect.

□ 1520

I do not know of any objection to the rule, but I am sure when the matter is discussed on the floor of the House there will be some opposition to the measure.

Mr. Speaker, I urge adoption of the rule. I would like to advise that I have three remaining speakers.

Mr. HALL of Ohio. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts.

Mr. MARKEY. Mr. Speaker, I am pleased to support House Resolution 288, which provides for the consideration of H.R. 2095, the Daylight Saving Extension Act of 1985. I am proud to be the sponsor of the bill, and its floor manager.

I think that our committee has succeeded in fashioning a bill that is a true compromise for all concerned. The proponents of this measure met with the bill's former opponents to listen to their objections. As a result, we adopted an amendment in committee to extend daylight saving time to the first Sunday in April, rather than to the beginning of March, which had been proposed in past Congresses. We also add 1 week at the end, to the first Sunday in November, as a safety measure for children trick-or-treating on Halloween.

The extension of daylight saving time to the start of April will achieve the benefits which have been cited many times—energy conservation, crime reduction, and traffic safety—but will have no adverse effects. Sunrises in April are the same as sunrises in August. There will be none of the dark mornings that were cited in the past as an argument against daylight saving time.

I would like to thank my cosponsor, the gentleman from California [CARLOS MOORHEAD] who is our subcommittee's ranking minority member, for his help on this bill. I would also like to thank the gentleman from Utah [Mr. NIELSON] a former opponent of this bill, the gentleman from Indiana [Mr. COATS] and other Members for their willingness to work with us on this matter and achieve this compromise.

I am pleased that we finally have a bill that is a true compromise. Therefore, I urge my colleagues to vote in favor of the rule and the bill.

Mr. QUILLEN. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania [Mr. GOODLING].

Mr. GOODLING. Mr. Speaker, I am sorry that I will not be able to join with this love fest that seems to be going on. I thought this issue had been put to bed year after year and it would never raise its miserable head again.

I would ask all of my colleagues, when you go home over this weekend, do not think about the adults in relationship to changing the daylight saving time. I want you to know that the 4 weeks in April there is a considerable change. Now, I do not know what someone may have told you, but as someone who had the responsibility of putting 4,000 to 5,000 students on buses every morning and having those youngsters walk where there are no sidewalks, trying to get to bus stops, I will guarantee you there is a big difference between April 1 and the end of April.

I have no problem with the 1 week in November, but I want you to think about children and students when you go home this weekend because you are going to be putting them out at a time, the most dangerous time in the morning possible for these children to be walking along highways.

Mr. LELAND. Mr. Speaker, will the gentleman yield?

Mr. GOODLING. I will be happy to yield to the gentleman from Texas.

Mr. LELAND. I thank the gentleman for yielding.

Mr. Speaker, I would like to say that I have some of the same concerns. From the time I was in the State legislature in Texas until now, I have had a lot of reservations about this issue, and I just want to say that I appreciate the position of the gentleman.

Mr. GOODLING. I thank the gentleman.

When you put those youngsters out along those highways and you do not have sidewalks, particularly, you are sending them out at a time when the traffic is the most intense because, of course, everybody is rushing to work, and that is an unfortunate situation. I would hope you would think seriously about these 3 weeks in the beginning of April.

I want to tell you, for someone who had to watch this time schedule day after day and the weather schedule day after day as an administrator, there is a big difference between the first 2 weeks in April and the end of April. I will offer an amendment which will say go ahead with what you are doing in November but, for goodness sakes, do not make the mistake of putting children along the highways earlier when you are doing that.

Mr. SOLOMON. Mr. Speaker, will the gentleman yield?

Mr. GOODLING. I would be happy to yield to the gentleman from New York.

Mr. SOLOMON. I thank the gentleman for yielding.

Mr. Speaker, I want to concur in the remarks of the gentleman. You know, in the Northeast, particularly in areas like mine, one end of my district I have the Catskill Mountains and in the other end the Adirondack Mountains. The entire district is full of hills and dales and mountains. When you move this date by just 4 weeks, you jeopardize the lives of hundreds and hundreds of schoolchildren every time you bring this bill on this floor. The gentleman is right, it should be defeated, and it should be defeated overwhelmingly and never brought up by this body again.

Mr. QUILLEN. Mr. Speaker, I yield 3 minutes to the gentleman from Utah [Mr. NEILSON].

Mr. NEILSON of Utah. I thank the Speaker.

Mr. Speaker, I rise in support of the rule and in support of the bill. If you will recall, 2 years ago I voted against the bill. I voted for the Tauke amendment because I did not want to go to the 1st of March for daylight saving time. If I had my personal preference, I would go from Memorial Day to Labor Day. I think that is the appropriate time to have daylight saving time.

But to avoid the month of March I was willing to compromise the first week in April. I think it is a good compromise. It is much better than the mid-March proposed in committee or the 1st of March defeated on the floor last year.

I have talked with many of my friends from the rural areas who were formerly opposed to this, and they have said that they can live with this compromise.

I neglected to talk with my friends from northern New York and Pennsylvania because I assumed that would not be a problem in those areas to that great an extent.

Utah is in the western part of the district; this is not terribly favorable to my particular district, but I still support the rule, and I commend the chairman of the Subcommittee on Energy Conservation and Power of the Committee on Energy and Commerce, Mr. MARKEY, for being very cooperative, for coming up with what I think is a fair compromise.

Mr. Speaker, I do support the rule, and I hope others will do the same.

Mr. QUILLEN. Mr. Speaker, I yield 5 minutes to the gentleman from Indiana [Mr. COATS].

Mr. COATS. Mr. Speaker, I thank the gentleman for yielding.

I rise today in support of the request for an open rule allowing consideration of H.R. 2095, Daylight Saving Extension Act of 1985.

While I have opposed this legislation in the past and, in fact, offered an amendment on States opting out, I still have some reservations; an acceptable compromise has been worked out, in my estimation, at the committee level, and I supported that compromise. H.R. 2095 would extend daylight saving time from the present 6 months

to a little over 7 months, moving the starting date from the first Sunday in April through the first Sunday in November. Importantly, the bill also allows States to exempt themselves entirely or partially, geographically, from any extension at all, and that is important for Members to remember.

Since I was a strong opponent to the extension of daylight saving time in the past and helped to defeat the measure in the 98th Congress, I want to take this opportunity to address my reservations with the extension and why I actively opposed the bill during the last Congress.

I think it is important to understand, for all of us to understand, the disparity existing within time zones. In other words, there is as much as a 92-minute difference between the time the Sun rises in the easternmost part of the time zone and the time that it rises in the westernmost part of the largest time zone in this country. This is a relevant point since 65 percent of the people in the United States live in the western part of a time zone.

Variations in temperature can also have an effect. It might be warm in Miami by the first week in April, but it is certainly not warm in Detroit, Cleveland, or Buffalo. Having said that, and vocalized these reasons why I opposed this legislation in the past, let me state that the compromise we agreed to at the committee level addresses the concern. While some would have preferred the extension of time to begin in mid-March, I have, emphatically, opposed that. We have agreed instead to the first Sunday in April. The extension on the other end which moves the time for change to the first Sunday in November serves a most worthy purpose in that it would allow small children additional daylight hours during Halloween.

Therefore, I rise today in support of the rule, and it is my intention to support H.R. 2095 when it is considered by the full House.

Mr. QUILLEN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

M:. Speaker, I urge adoption of the rule.

Mr. HALL of Ohio. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. QUILLEN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 352, nays 43, answered "present" 1, not voting 38, as follows:

□ 1535

Mr. RAY and Mr. KRAMER changed their votes from "yea" to "nay."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3500, OMNIBUS BUDGET RECONCILIATION ACT OF 1985

Mr. HALL of Ohio, from the Committee on Rules, submitted a privileged report (Rept. No. 99-310) on the resolution (H. Res. 296) providing for

the consideration of the bill (H.R. 3500) to provide for reconciliation pursuant to section 2 of the first concurrent resolution on the budget for the fiscal year 1986, which was referred to the House Calendar and ordered to be printed.

□ 1550

INTERNATIONAL SECURITY AND DEVELOPMENT ACT OF 1985

Mr. FASCELL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1726), to amend section 51(b) of the Arms Export Control Act, relating to the funding of the Special Defense Acquisition Fund, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1726

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FUNDING FOR THE SPECIAL DEFENSE ACQUISITION FUND.

(a) AMENDMENT TO SECTION 51(b) OF THE ARMS EXPORT CONTROL ACT.—Subsection (b) of section 51 of the Arms Export Control Act (22 U.S.C. 2795(b)) is amended to read as follows:

"(b) The Fund shall consist of—

"(1) collections from sales made under letters of offer issued pursuant to section 21(a)(1)(A) of this Act representing the actual value of defense articles not intended to be replaced in stock,

"(2) collections from sales representing the value of asset use charges (including contractor rental payments for United States Government-owned plant and production equipment) and charges for the proportionate recoupment of nonrecurring research, development, and production costs, and

"(3) collections from sales made under letters of offer (or transfers made under the Foreign Assistance Act of 1961) of defense articles and defense services acquired under this chapter, representing the value of such items calculated in accordance with subparagraph (B) or (C) of section 21(a)(1) or section 22 of this Act or section 644(m) of the Foreign Assistance Act of 1961, as appropriate,

together with such funds as may be authorized and appropriated or otherwise made available for the purposes of the Fund.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect as of October 1, 1985.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on this matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

UNIVERSITY OF TEXAS PROFESSORS AWARDED NOBEL PRIZE IN MEDICINE

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PICKLE. Mr. Speaker, this week two University of Texas professors were awarded the Nobel Prize in medicine for their research on the role of cholesterol in heart disease. Joseph L. Goldstein and Michael S. Brown have worked for more than a decade at the University of Texas Health Science Center at Dallas. This award is not only a tribute to Professors Goldstein and Brown, but it is also a tribute to the University of Texas system which has made the transition to one of the country's premier research universities. It also gives us great satisfaction to realize that both Professor Goldstein and Professor Brown are products of the University of Texas system, which means we cannot only lure great researchers to the University of Texas, but we can also grow our own.

Mr. Speaker, I would like to insert into the RECORD an article from this week's Washington Post on the award to Professors Goldstein and Brown.

The article follows:

TEXAS TEAM WINS NOBEL IN MEDICINE—RESEARCH ILLUMINATED ROLE OF CHOLESTEROL IN HEART DISEASE

(By Cristine Russell)

Two American scientists won the 1985 Nobel Prize in medicine yesterday for research that revolutionized scientific understanding of the role of cholesterol in heart disease and pointed the way toward practical means of prevention and treatment.

The $225,000 award will be shared jointly by molecular geneticists Michael S. Brown, 44, and Joseph L. Goldstein, 45, who first met in 1966 during medical training in Boston and have worked closely together for more than a decade at the University of Texas Health Science Center at Dallas.

The Nobel Assembly at Stockholm's Karolinska Institute said the Texas team had "revolutionized our knowledge" about how the body processes cholesterol, including the genetic and dietary contributions to the abnormal buildup of cholesterol in the blood.

The institute said that the researchers' discoveries had "far-reaching implications" for the prevention and treatment of coronary artery disease and heart attacks, "a major cause of death in most industralized countries." Diseases of the heart and blood vessels are the number one killer in the United States, accounting for nearly 1 million American deaths each year. More than 42 million Americans suffer from heart disease.

Most coronary disease is the result of hardening of the arteries, or atherosclerosis, in which excessive fats and cholesterol in the blood slowly clog the inner walls of these vessels. When a blood clot blocks a narrowed artery, a heart attack can result. Researchers have long known that high blood cholesterol is a major risk factor for heart disease, but the complex pathways were difficult to unravel.

Cholesterol, which is crucial in low levels to cell functioning, is produced in the body, predominantly in the liver, as well as consumed in foods. It is carried in the blood predominantly in particles known as low-density lipoproteins (LDL).

The Nobel citation noted that a "milestone" occurred in 1973 when Brown and Goldstein discovered special receptors that regulate the intake of LDL to the body's cells from the blood. These receptors operate as a sort of border patrol on the surface of cells that control the entrance of the LDL and thus the amount of cholesterol entering the cells.

Some individuals are genetically predisposed toward high blood cholesterol, an illness known as severe hereditary familial hypercholesterolemia. Brown and Goldstein found that an underlying cause for this genetic disease is a complete, or partial, lack of working LDL receptors. The most severe form occurs in about one-in-a-million people, but a milder form is much more common, afflicting about one in 200 to 500 people.

But they also suggested that in normal individuals the high dietary consumption of cholesterol, particularly through red meats and dairy products, may interrupt the natural cholesterol cycle and reduce the number of LDL-receptors on the cell surface. Fewer receptors in turn lead to increased cholesterol in the blood and the buildup of deposits on the artery walls, they said.

While the dietary role of cholesterol has been debated for years, a prominent National Institutes of Health panel concluded late last year that the risk of heart attacks could be significantly reduced by lowering blood cholesterol levels, preferably through dietary changes as well as the use of cholestrol-reducing drugs in high-risk cases.

Brown and Goldstein, in a recent article in Scientific American cited by the Nobel panel, endorsed a diet "moderately low in animal fats" as prudent for most people. But, they speculated, testing of new drugs that increase the number of LDL receptors may one day make it possible "for many people to have their steak and live to enjoy it too."

Brown and Goldstein learned of the award while attending a symposium at Massachusetts Institute of Technology at which they were featured speakers. They held a news conference there and then rushed to the airport to return to Texas for a celebration at their laboratory and another news conference.

Although the researchers expressed surprise at the honor, their colleagues said it was only a matter of time. The duo has already won a string of major scientific prizes for their work in recent years.

"It's no surprise to the community of biologists and biomedical researchers," said MIT Professor Monty Krieger, who formerly worked in their laboratory. In addition to the heart disease application, Krieger said that the Brown-Goldstein collaboration on the cholesterol receptors had been a model for understanding other basic molecular pathways.

Dr. David Bilheimer, who works with them at the University of Texas medical

center, said that the basic research had also had dramatic payoffs for an 8-year-old Texas girl named Stormie Jones who was dying of the severe, cholesterol-raising genetic disease. She underwent an unprecedented heart-liver transplant last year that triggered an 80 percent reduction in blood cholesterol levels, apparently by providing new LDL receptors.

Bilheimer said that the award is "a wonderful honor for them and for the institution. . . . This is the first Nobel Prize for work done in Texas. This was home-grown work. That's what's so thrilling about it."

RESOLUTION ON INTERNATIONAL CONFERENCE ON TERRORISM

(Mr. GEJDENSON asked and was given permission to address the House for 1 minute.)

Mr. GEJDENSON. Mr. Speaker, today I have introduced a resolution calling on the President to hold an international conference on terrorism. Recent events in the Middle East with the capture of the Italian cruise liner, the recent incident with the American hostages on TWA, today, hostages not only from America and the Middle East, but Soviet hostages are being held. It is time to pull the international community together, as we have done with a request from the Foreign Affairs Committee, the good chairman, his leadership on this issue in the foreign aid bill calling for our friends to get together—we now need a much broader conference.

There are times that we must act. This is one of those times. Unless we act together, we will continue to be picked off one at a time, as first the Americans kicked out the Libyans and then the British had them until one of their citizens was shot, a policewoman. It is time to act in a unified manner. I have introduced this bill calling for an international conference on terrorism. I have sent a letter to the President and I hope my colleagues will join me.

Mr. FASCELL. Mr. Speaker, will the gentleman yield?

Mr. GEJDENSON. I yield to the gentleman.

Mr. FASCELL. I thank the gentleman for yielding.

Mr. Speaker, let me commend the gentleman for his leadership on this matter. In my opinion, he is ultimately correct. The only way that we can have a chance in dealing with terrorists which is now a worldwide phenomenon, it affects every country, is for not only the civilized West but other countries to get involved in cooperating in order to try to put an end to this.

Mr. GEJDENSON. I thank the chairman. The President and Secretary Shultz are right; let us get our allies together first and then let us have a world conference as we have done with airplane hijacking in the past.

REMARKS OF JUDGE JAMES LAWRENCE KING MADE AT INVESTITURE CEREMONY IN FLORIDA

(Mr. PEPPER asked and was given permission to address the House for 1 minute.)

Mr. PEPPER. Mr. Speaker, on the 16th of August, I had the privilege of attending a service in the U.S. District Court for the Southern District of Florida in Miami when two new judges of that court, Judges Marcus and Scott were being added to the court.

During the course of the ceremony the distinguished presiding judge, Judge James Lawrence King, made a most interesting discourse about the history of the U.S. District Court for the Southern District of Florida going back to 1821. That is a vivid history of a dynamic part of America's growth. It also tells the story of the need of that area for additional judges to grapple with the drug interdiction problem that is so serious for us in that area.

INVESTITURE CEREMONY—JUDGE MARCUS, JUDGE SCOTT, CENTRAL COURTROOM, MIAMI, FL, JAMES LAWRENCE KING

On behalf of the Judges of this Court, both present and past, we extend a very warm and cordial welcome to you, Stanley Marcus, the 38th United States District Judge to be seated on this Bench in the decades of its existence; to you, Thomas E. Scott, the 39th United States District Judge to serve in the Southern District of Florida.

History has an interesting habit of repeating itself. If we do not learn from the past, we are, indeed, foolish, for the past is prologue. You join a truly great United States District Court. Your predecessors stood where you stood a moment ago. They sit where you now sit and are seated, and they judged the matters and lives and fortunes of the people of this community, as you will judge those matters—lives and fortunes—as God gives you, as it has given us, the wisdom to perceive your duty.

As all of you are no doubt aware, this Court was created by Congress the year after Florida was acquired from Spain. The first judge was appointed by President James Monroe on May 19, 1821. That was the Honorable William P. Duval. One hundred and seventeen years ago next week one of your predecessors, Judge T. Jefferson Boynton, gazed out of the windows of his beautiful old office in that massive red brick courthouse in Key West, Florida, looked across the Gulf of Mexico, and pondered the fate of three individuals. Their names: Samuel A. Mudd, Samuel Arnold, Edward Spangler. These men had been convicted by military tribunal in the City of Washington and had been sentenced to confinement at Fort Jefferson in the Dry Tortugas for the assassination or the conspiracy to assassinate President Abraham Lincoln.

I hold in my hand the opinion rendered by Judge Boynton, one of your predecessors who served on this court from October of 1863 until 1870. It is worth reading. It is an interesting document.

A few years ago, over one hundred years later, in this very courtroom, was tried a case involving an assault upon another President, President Ronald Reagan. Is the past prologue? Does history repeat itself? Going back even further in time to 1847, Congress added to the usual duties of United States District Judges across the infant country, in those days, the added duty of supervising, licensing, and administering matters involving salvage in the Southern District of Florida. This was written into the law in 1847. Judge William Marvin, one of your predecessors, wrote a book, still a valid treatise today from the law of admirality, and he did, in fact, license salvagers, concern himself with the distribution of their finds and their salvage and the admirality problems of the Court in those days.

Who has not, in America today, heard of the magnificent find of the treasure salvagers off Key West, in Marquezas, when they discovered the mother lode, so-called, of the Spanish vessel "Atocha," sunk in 1622 in that terrible hurricane that took the entire Spanish fleet to the bottom. What you may not know—some of you, of course, know—what you may not know is that all of those cases are in the jurisdiction of this Court. There are thirteen of them now presently pending of wrecks and wreck sites. Judge Aronovitz just last week presided over an important segment of the case involving the find of the treasure of the "Atocha." All of those vessels, the "Santa Margarita," the "Atocha," all of the treasure fleets, all of the massive legal arguments involving the rights of the State of Florida, the problems of the Eleventh Amendment to the Constitution, all of those great legal arguments occurred in this courtroom and/or the courtroom in Key West or other courtrooms in the Southern District of Florida. Is the past prologue? Does history repeat itself? Did the problems Judge Marvin had over a hundred years ago, are they just as valid and prevalent and accurate and true today?

Again, going back in time, this community witnessed an interesting phenomenon after the Stockmarket Crash of 1929. In the throes of a great depression, the local pasttime was rum-running. Two blocks south of here, in the first United States Courthouse in Miami, constructed in 1905, in this district, Judge Lake Jones sentenced the last person sentenced to death in the Southern District of Florida, in the United States District Court, to be hanged for the murder of two coastguardsmen and a prohibition agent. The defendant's name was James Horace Alderman, and Judge Jones had that awesome responsibility.

From the liquor smugglers of the twenties and thirties to the drug smugglers of the seventies and eighties—Is the past prologue? Does history repeat itself?

The overwhelming caseload of this district, now bringing us into this century, is greater than any Court has been asked to bear in the history of the American Judiciary. Under the most recent statistical data available, this Court was required and charged with the responsibility for presiding over trials and discharging our responsibilities to individuals charged with crime in 2,462 individual cases. That is over double, over double the caseload of the next heaviest impacted court, which is the Southern District of Texas with 1,236, or New York Southern with 1,659 cases and thirty-seven judges—Senator, to our fifteen, as you well know—The Senator well knows this. We have discussed this—or California Southern with only 1,000. History repeats itself. Nothing changes except, perhaps, the numbers, the gravity, and the years.

The judges seated before you, and I am attempting to speak for all of them this morning, are on the cutting edge of American

law. It's an exciting challenge for these two new judges. They will be involved with the outer edges, the outer limits, the cutting edge, if you please, of the law. They will be dealing, in the first instance, with matters that have never been raised before because we have one of the finest Bars in America, and they think of incredibly acute theories of law to present to us that are brand-new, but they are on the cutting edge of the law in criminal law and the immigration field and these other fields of law that involve a real challenge for our new judges.

Is there a citizen in this community that is not aware of the overwhelming and massive legal, economic, moral problems presented by the migrations to this shore of Cuban refugees, Haitian refugees, Nicaraguan refugees? The judges seated before you have dealt with these problems. I know we have dealt fairly, honestly, decently, and we hope with wisdom, with these problems. In this very courtroom several years ago, these judges sat in an en banc consideration of over ninety criminal cases arising out of the Mariel boatlift. It was historic. It was unprecedented. It was innovative. No one had ever done anything like this before. Great doubt about whether a Court could sit en banc and consider, in one fell swoop, ninety criminal cases, but we did so. Maybe because Judge Fay was then new on the Court and still associated with us, we were affirmed. But he has changed, Joe.

There have been historic decisions flowing from the judges seated here before you. This capsule review of the rich tradition and history of the magnificent institution that is the United States District Court for the Southern District of Florida has done little more than touch briefly upon a few of the important figures who have occupied the position of judges on this Court and a few of the legal decisions that have been made in this magnificent old courtroom in the past fifty-five years and going back through the decades, but the purpose of all of this is to say on behalf of the thirty-seven judges who have preceded you, Judge Boynton, Judge Lock, Judge Marvin, Judge Holland, Dyer, Cabot, Fulton, Choate, Mehrtens, whose portraits adorn the walls of this magnificent old room, and who now join with us in admonishing you to conduct yourselves uprightly, with dignity and respect for the Constitution, with fairness—with fairness for all of the people you serve, as God gives you the wisdom to perceive your duty.

Welcome.

MY ADVICE TO THE PRIVILEGED ORDER

The SPEAKER pro tempore (Mr. HAYES). Under a previous order of the House, the gentleman from Texas [Mr. GONZALEZ] is recognized for 5 minutes.

Mr. GONZALEZ. Mr. Speaker, I rise today because no mention is being made nor does there seem to be any conscious awareness of the fact that we have close to 2,000 servicemen of our armed services in the Sinai as a result of direct congressional action, which, at the time it was approved by the Congress, was the first time in the history of the Congress that the Congress mandated a deployment of American troops anywhere.

As you know, under the Constitution the Commander in Chief is the one that usually has and has exercised this prerogative. I speak of the so-called resolution that was passed by this House jointly with the Senate around December of 1982. Since my voice was one of only two that questioned that type of an approach, and was the one that brought forth and elicited for the record that the Congress was venturing into new, unprecedented areas of activity.

The reason for the deployment, as the resolution read, of American troops not to exceed 2,500, was based on a letter that President Carter had sent after the Camp David agreements to both the Israeli leaders, at that time, Prime Minister Begin, and the head of the Egyptian state at that time, Mr. Sadat.

□ 1600

Because of the doubts expressed following the agreement at Camp David as to the respecting of the Sinai agreement, President Reagan, after his assumption of power, recommended to the Congress that the request in the letter, the promise in the letter by Jimmy Carter to these leaders, that he would if it would take that to ensure the agreement offer the formation of a multinational group, to have a so-called watch group, to observe the Camp David agreement.

At the time that the House considered the question, there was no other nation that had yet responded to the request. So we committed, the Congress committed, American troops. They are still there. There are about 1,800 of our soldiers in the Sinai.

The question I raised then was, if something happens and Israel accuses Egypt of violating the Camp David agreement, or vice-versa, Egypt accuses Israel, what are our troops supposed to do?

Also, in the meanwhile, we obtained by twisting then the arm of the President of Colombia 1,500 Colombian troops.

At that time General Haig was Secretary of State, and he just picked up the phone and called the President of Colombia and just simply told him, "If you want any more of our aid, you give us some troops."

We have also got about 12 or 14 British. We got a sizable number from one of the Pacific islands, of all places. They are there now. Nobody is worrying about them. But given the deterioration in the international situation, particularly between Egypt, the United States, and Israel, I say this Congress has a responsibility to look into this agreement, because we have, as we did once before, our warriors in a Beirut situation. Those men in the Sinai are exposed I maintain.

All I am doing at this time is calling attention to the fact that they are there. Everybody has forgotten about them. No mention has been made about it. I warn my colleagues the potential for greater catastrophe is here as it was in Beirut where we had 241 marines needlessly murdered.

SINAI: ANOTHER BEIRUT

In all the uproar over the hijacking of the Italian liner *Achille Lauro*, we are in danger of forgetting a most pertinent fact: The United States has citizens and soldiers in the Middle East, and those who are enraged by our actions against the terrorists will be tempted to make those Americans a target for revenge. In Lebanon, we learned to our sorrow that marines sent there as peacekeepers soon became the target of terrorists, when those terrorists got the idea that the United States was not being even-handed.

Have we forgotten that there are American peacekeeping soldiers in the Sinai? Yes, there are Americans there, and they have been there since April 25, 1982. They can be attacked, as surely as the marines in Beirut were attacked.

We cannot afford to forget that Egyptian political forces that are inimical to the close ties between the United States and Egypt have been gaining strength in that country of late. Just how much strength can be seen on the news stories every day, in which we see vast crowds of protesters violently denouncing the United States and all our works, in the wake of our capture of the *Achille Lauro* terrorists. This was an act that not only enraged anti-Americans in Egypt; it embarrassed our friends in Cairo as well. Regardless of our justification, we have to remember that there are also consequences for our act; there are those who find in our action justification not just to vilify the United States, but to act against our citizens as well.

In such a climate as this, it is easy to imagine that Americans on the Sinai peacekeeping force would be the special target of any would-be attackers. These Americans though armed, are probably less well defended than even the marines were in Beirut. Yet I hear no one suggesting that the viability of that mission may now be compromised; I hear no one saying that we should reassess the safety of the operation; and I hear no one saying what our response should be in case of an attack against these troops—or for that matter, how we might respond to a violent attack against the very substantial United States economic and diplomatic missions in Egypt. Yet all these are very real possibilities.

Congress has entered into the precarious business of standing between armed camps in the Middle East without much thought or foresight. Eleven years ago, almost to the day, we approved a United States civilian peacekeeping group in the Sinai passes that had been used as invasion routes. These civilian observers were followed a decade later by a commitment of U.S. troops to the lower peninsula, part of a multinational group. But when those commitments were made, Americans were not

the special and favored targets of terrorists throughout the Middle East; today our citizens are. Today, many a zealot yearns to find a favored place in heaven by killing an American—be that a marine or an old man in a wheelchair. Today, the climate is not the same hopeful one of 1982 or 1974; it is the climate of a soured peace process, a stalled war between Iran and Iraq, and it is the climate of strife between religious factions, many of which strive to be the most virulently anti-American.

Does the peacekeeping force have a future? What could it do in event of an attack? How would we respond? What if our troops are subject to an attack on their headquarters or their barracks? Nothing is beyond the realm of possibility in the Middle East of today, and the proof of that is in the piracy and murder on an innocent cruise liner, the bombing of our Marine headquarters in Beirut, bombings of our Embassy facilities in Lebanon, and any number of other heinous acts. In such a climate as this, why discount the possibility of a tragedy? In today's climate, we should think: Did we have any business in the Sinai in the first place? What would we do in the case of an attack? Do we really want another Beirut? Have we forgotten the danger?

BUDAPEST CULTURAL FORUM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland [Mr. HOYER] is recognized for 60 minutes.

Mr. HOYER. Mr. Speaker, I rise to call the attention of the House to the Budapest Cultural Forum, mandated by the Helsinki accords which were signed 10 years ago by 35 states. The forum, which began 2 days ago and is scheduled to run 6 weeks, is part of the process of increasing security and cooperation in Europe. Since the signing of the final act, there has been a series of specialized meetings on topics ranging from scientific cooperation to human rights.

Since the inception of the Helsinki process, the United States and its allies have consistently asserted the view that promoting respect for fundamental human rights is an essential part of the process of building peace, cooperation and security in Europe. Thus we have insisted that progress toward implementing the human rights provisions of the final act is as important to attaining progress as the security or trade-related provisions of the final act. The Ottawa human rights experts meeting, held in May-June of this year, was the first CSCE meeting devoted solely to discussion of those aspects of the final act. The April 1986 Bern human contacts meetings will continue the discussion of human rights, focusing on issues such as family reunification, binational marriages and family

its. Human rights will also be an inral aspect of the Budapest Cultural um.

The mandate of the cultural forum, as established at the Madrid Review Conference in 1983, is to discuss interrelated problems concerning creation, dissemination and cooperation, including the promotion and expansion of contacts and exchanges, in the various fields of culture. As I stated earlier, human rights concerns are included in this mandate, ensuring that issues of cultural and religious freedom, cultural heritage and the free dissemination of culture will be raised.

The U.S. delegation, under the leadership of Ambassador Walter Stoessel, former Deputy Secretary of State, includes staff from the Helsinki Commission, State Department and USIA, as well as leading personalities in the field of culture:

Edward Albee (playwright); Peter Blake (architect); Daniel Boorstin (librarian); Trisha Brown (dancer); Frank Conroy (professor); Eugene Istomin (pianist); Nancy Coolidge (preservationist); Paul Caponigro (photographer); William Ferris (historian); Bess Hawes (folklorist); Sam Gilliam (painter); Leo Gruliow (author); Nathan Glazer (arts education); Hugh Gloster (educator).

David O. Ives (TV executive); Allen Kassof (professor); Jack Masey (designer); William Least Heat Moon (author); Jaroslav Pelikan (historian); Rudy Pozzatti (printmaker); Ellendea Proffer (publisher); Arthur Pulos (industrial designer); Lawrence Reger (museum director); Larry Rivers (artist); William Jay Smith (poet); Billy Taylor (pianist); Cliff Robertson (actor).

All 35 participating states have included leading cultural figures in their delegations to Budapest. Meeting in working groups, the cultural personalities will share their views on conditions that foster or hinder artistic creativity. Specific issues to be discussed include creative freedom, censorship, jamming, suppression of the cultural identity of national minority groups and ways in which states can cooperate to expand mutual cultural understanding and respect.

One of the major impediments to free cultural expression in the Soviet Union and Eastern Europe is censorship. All "officially" published written materials, radio, television, stage and film productions are subjected to some form of official control and censorship. The degree of censorship and the limits on free expression in cultural fields varies within the Soviet bloc. Poland, Hungary and the GDR allow a broader range of cultural expression than do the Soviet Union, Romania, Czechoslovakia and Bulgaria. Censorship remains, however, a cloud that threatens to engulf cultural freedom. With the cloud of censorship hovering over individuals, the creator personally has little if any scope to operate independently. Private publishing is illegal as are unsanctioned art exhibitions or other cultural displays. Criminal penalties may be imposed as the price for exercising creative freedom.

The Helsinki final act and the Madrid concluding document contain explicit language about the participating states' obligations to safeguard the rights of individuals belonging to national minorities. In the final act, the states pledge themselves to afford persons belonging to national minorities "full opportunity for the actual enjoyment of human rights and fundamental freedoms and will, in this manner, protect their legitimate interests in this sphere." They also recognize "the contribution that national minorities or regional cultures can make to cooperation among the States in various fields of culture."

The agenda for Budapest includes discussions relating to national minorities, including the preservation of cultural and historical monuments; publishing and translation, including reference to less widely spoken languages; and preservation of cultural heritage.

In Bulgaria the Turkish minority has been subjected recently to a brutal campaign to strip them of their cultural heritage and identity. Turkish villages have been surrounded by Bulgarian militia and their inhabitants forced to accept documents changing their names to Slavic-sounding ones. In the ensuing clashes with the militia, many Turks resisting the name changes reportedly were killed. Bulgarian authorities have pressured the Turks to give up their ethnic dress, cease using the Turkish language, and forswear Muslim religious practices.

In Romania, Hungarian schools, churches, and language are being eliminated from Romanian society. The government has arbitrarily transfered Hungarians to work in purely Romanian regions, removed Hungarians from their position in the news media and placed restrictions on Hungarian language publications. Jews, Christians, and others in the Soviet Union are persecuted for passing on to their children religious faith.

Everything created in Ukraine in the last 60 years has been infected by bacilli. How can the national tree grow when half its crown has been cut down? What is Ukrainian history where there are no historians . . . How can there be literature when more than half its writers are missing.

Those words were written by one of Ukraine's leading contemporary poets while in a Soviet prison, Vasyl Stus. Stus, a member of the Ukrainian Helsinki Monitoring Group, was in his 13th year of a 23-year prison and exile term when he died September 4 of this year at the age of 47.

At this time, Mr. Speaker, I would like to yield to my good friend from the State of New York, a gentleman who has been very involved in oversight responsibility with respect to the Helsinki accords, a gentleman who has been committed as no other Member of this body has been to human rights

and to freedom and justice for all of the peoples of the world, a real leader in this area in the House, my good friend, BEN GILMAN.

Mr. GILMAN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I would like to thank the gentleman from Maryland [Mr. HOYER] for reserving this time today for us to briefly discuss the hopes and realities of the Budapest Cultural Forum, which convened on Tuesday and which will continue until November 25. The ongoing need to discuss human rights, cultural repression, the dissemination of information and censorship among the 35 signatory nations is significant indeed, and our U.S. delegation, led by Walter Stoessel, had hopes that this meeting, the first of its kind to be held in a Warsaw pact nation, would be fruitful in its attempt to tackle the above-mentioned important issues.

Unfortunately, however, the Hungarian Government prohibited an independent public symposium of Western and East European intellectuals from being held at the Duna Intercontinental Hotel in Budapest, on the very day that the cultural forum was scheduled to begin. Our hopes that this forum's activities and related events would bode well for the Geneva summit next month have been soured by the repressive actions of Hungarian officials. These writers, intellectuals and human rights activists, invited to attend the seminar by the International Helsinki Federation for Human Rights in Vienna, were instead limited to some seventy in number and forced to discuss their views in a private apartment in Budapest. Among the Western participants are American writer Susan Sontag, Israeli novelist Amos Oz, and German poet Hans Magnus Enzensberger, who insisted on meeting with their dissident colleagues regardless of the limited circumstances.

We have witnessed cultural repression time and again in the Soviet Union. There, members of the "Phantom Orchestra" have been harassed and threatened. The negative cast which the Hungarian Government's actions in this instance lend to the Budapest Cultural Forum make it clear to the Western delegates that their task is of a far more serious nature than they had originally assumed. As a signatory nation to the Helsinki Final Act of 1975, these past 10 years have demonstrated the sincere desire of the American people to ensure the free flow of information around the world. This has been evident in the formulation and dissemination of our foreign policy, and has been reiterated at every international exchange to which we are a party. Yet this forum, and the upcoming Geneva summit between President Reagan and Soviet leader Mikhail Gorbachev, will test our resolve more sincerely than in the past.

The many faces of injustice have been exposed in Budapest, and we must make certain that the 800 delegates to this conference become convinced that we are dedicated to the concepts of freedom of information, speech, religion, and heritage, and that we will not falter in the least in the global pursuit of these most basic human rights.

Mr. HOYER. Mr. Speaker, I thank the gentleman from New York [Mr. GILMAN] for his remarks at this time and for his continuing leadership in this important area.

Mr. Speaker, at this time I would like to yield to my colleague and member of the Helsinki Commission, DON RITTER from the State of Pennsylvania, who I understand has just returned from the Soviet Union where he had the opportunity to bring to the attention of Mr. Gromyko the concerns of the Commission, the Congress, and the people of the United States with respect to our commitment to human rights and the undertakings of 35 signatory nations of the Helsinki accords. I am pleased to yield to my friend and colleague, Mr. RITTER.

Mr. RITTER. Mr. Speaker, I thank the chairman for yielding and I thank him for his leadership on this matter.

It is a timely moment for me having just returned from Moscow in the Soviet Union to hear about the unfortunate circumstances in Budapest where a major conference of writers and intellectuals and human rights activists was denied access to a formal and official program and had to squeeze into a small apartment.

It reminds me of another squeeze in a small apartment that seven Members of Congress, including myself, had the other night.

We gathered in the apartment of one Yakov Al'pert. The apartment was tiny to begin with. I expect the living room was on the order of 8 feet by 11 feet. It was quite an experience. There were seven Members of Congress.

□ 1610

There were 13 refuseniks, and the rest of the room was composed of walls where one saw only books. The irony of this meeting is that these individuals, who are well known in their fields over the world, cannot practice their intellectual pursuits, their chosen professions, cannot engage in the free flow of information in their own fields, and this relates to the ideal of the cultural forum in Budapest.

I would simply like to mention their names. It was Prof. Yakov Al'pert, a physicist, nearly 50 years working in an institute—or not in the last 10, actually—but some 40 years working with an institute of the Soviet Academy of Sciences in his field; Prof. Alex Ioffe, a mathematician; Prof. Mark Friedlin, a mathematician; Dr. Victor Brailovsky, a mathematician, and his wife, Dr. Irina Brailovsky, also a mathematician; Prof. Alexandr Lerner, a mathematician; Prof. Leonid Dickey, a mathematician; Prof. Solomon Al'ber, a mathematician; Dr. Mark Tarshis, a biologist; Dr. Igor Uspensky, a biologist; Prof. Leonid Ozernoy, a physicist; and Dr. Yuri Chernyak, a physicist.

Many of these individuals have been refused emigration for years; some greater than 5, some greater than 10. And it is that long since they have been able to practice actively their professions, although the amazing thing is that they have been able to hold seminars in small apartments in Washington. Some have even, like Professor Al'pert, published books abroad during this condition of being cut off from their work in their chosen field.

We had another very stimulating meeting while we were there. We met with another group that is vitally concerned with the free flow of information, and that is the so-called Trustbuilders to build trust between the U.S. and the U.S.S.R. in the field of peace and in the field of peace activism. And our meeting took place in the home of Dr. Aleksandr Lusnikov and his wife, Olga. Dr. Lusnikov could not be with us that evening because ever since he became a peace activist—an unofficial, nongovernment peace activist—he has had to give up his work as a physicist. He has a doctorate in the field of physics, and he was busy on his job as a nightwatchman.

Also present was the trustbuilders group leader Yuri Medvekov, Nikolai Khramoy, Alexander Ruchenko, Larissa Chukayeva, and Elena Brendiss.

But the message we got from these independent peace activists in Moscow was that it is extraordinarily important to have a free flow of information with peace activists in the West, and indeed, they mentioned how the small numbers of meetings that they have been able to have with Western peace activists, including American Friends Service peace activists from my own State of Pennsylvania, including Pax Christi peace activists, including peace activists from Scandinavia, from Holland, Denmark, that this was their lifeblood, and without that flow of contact, they would probably cease to exist.

Talking about the free flow of information, they asked us to convey to our colleagues in this Congress and to the American people that there are several levels of peace activism in the Soviet Union. One is the official level, and that while they do not deny or deride the official peace activists that go out to our country and to Western Europe, they wanted the American people to know that those individuals,

as nice as they may be as individuals, really do not represent anything but the official view of the Communist Party of the Soviet Union and the Soviet Government, and that it was only independent peace activists in the United States and Western Europe which would contribute to a more peaceful relationship between the United States and the Soviet Union.

They advocated a series of exchanges of information from independent and between independent groups. They would like indepth educational visits, travel between our two countries, and educational visits between organizations and individuals who are not connected with official government policy.

They support the idea of an American university in Moscow with independent funding, voluntary funding, perhaps funding that came from military expenditures; an American university in Moscow, a Soviet university in the United States. They talked about independent cultural centers in both our countries so that the ideas of peace could work people to people.

They talked about kitchen-table peace negotiations between independent citizens and independent citizen groups from the two superpowers.

They talked about a mass exchange of Soviet and United States students between our two countries.

Well, this is part and parcel of the spirit of the cultural forum which is part and parcel of the Helsinki accords.

It is with some regret that the Hungarian Government has pressured this particular group gathering there today to diminish the size, and the scope, and the output of its meeting.

I would, however, like to say that things have changed somewhat for the better in Hungary, and that it is sad that the Hungarian Government at the last moment came up with this policy, because I am convinced that given a chance to operate more independently on their own, they probably would have welcomed such an open and publicized forum with open arms.

Again I thank the chairman for yielding to me, and thank him once again for his leadership.

Mr. HOYER. Mr. Speaker, I thank the gentleman from Pennsylvania very much for his comments and the information that he has brought to our attention here. For those who may not know, the gentleman is fluent in Russian, has lived in the Soviet Union for some period of time, and is one who can relate well to those Soviet citizens with whom he met in the Soviet Union this past week. The gentleman is an extremely valuable member of the Commission. I think his observation with respect to the Hungarian response to the responsibilities that they undertook in sponsoring the cultural forum is an apt one. It would appear that the Hungarians in fact are not free to honor the commitments they made in Madrid. I am going to speak to that briefly, but I want to thank the gentleman for making that point and for his other comments.

□ 1625

Mr. RITTER. If the gentleman will yield further, I assume that the gentleman is leading up to what happened to Vasyl Stus recently.

I think about 1 month ago Vasyl Stus died in a Soviet camp and that was just the latest in a series of deaths, premature, in Soviet camps.

Valeriy Marchenko, writer, a linguist, a journalist, died at the age of 37 on October 7, 1984, in a hospital for prisoners in Leningrad. The doctors at the hospital had repeatedly asked for urgent transfer permission to an ordinary hospital where, unlike the hospital, HAAS, there was an artificial kidney machine. The KGB would not sanction the transfer, and Marchenko died.

Marchenko is joined in death by another great Ukrainian, a founding member of the Ukrainian Helsinki Group, a teacher by profession, who died on May 6, 1984, at the age of 57. His name, Oleksiy Tykhy, in the Perm special regime camp, from ulcers and other ailments exacerbated by harsh conditions in the camp. The official cause of his death was given as cancer, but this has been called in question. It is known that Oleksiy Tykhy was suffering from cirrhosis of the liver, hepatitis, and a stomach ulcer. He twice underwent an operation for the stomach ulcer, the last time at the beginning of 1984. He weighed only 90 pounds shortly before his death at the age of 57.

Yuriy Lytvyn, another Ukrainian. He died on September 15, 1984, in the special regime camp in Perm. The cause of his death is not known. There have been reports that Yuriy Lytvyn committed suicide; however, it is thought that these reports are untrustworthy.

Yuriy Lytvyn was a poet. Yuriy Lytvyn was a journalist. He was a political prisoner for many years.

Another Ukrainian who has died in the last 2 years is Oleksiy Nikitin, a mining engineer, and a leader of the independent labor union movement. He died as a result of abusive psychiatric treatment in the spring of 1984 at the age of 47.

This gives us cause for great concern in that this is not a minimal repression of a human rights organization known as Helsinki Group Monitors. This is a kind of murder by the withholding of proper and appropriate health and medical conditions, and it is a sorry state when poets, and when journalists, and when writers, and when teachers die simply to promote their own beliefs, their own national heritage, and the cultural identity that has been with their people for a thousand years.

So the Budapest Cultural Forum takes on an added importance in the light of what has been happening to our Helsinki Monitors such as the ones that I have just referred to.

Mr. HOYER. I thank the gentleman for providing the names of those who have been denied freedom, even life, for the sole reasons, as the gentleman has pointed out, of attempting to express their thoughts, practice their religion, and maintain their culture.

As the gentleman from Pennsylvania [Mr. RITTER] and I both know as Members of the Commission, tragically, we could spend the balance of today, until midnight, enumerating cases similar to the ones that he has just outlined. It is for that reason that it is so important for all of us in the Congress and in this Nation to keep faith with those who have shown the courage of their convictions and have relied upon the promises outlined in the Helsinki accords and undertaken by all 35 nations to recognize, honor, and protect the rights of expression, the rights of dissemination of information, the right to practice one's religion, and teach one's religion to one's children.

Mr. RITTER. If the gentleman will yield further, I think his words are awfully important. They are awfully important because we are at the point of a summit meeting and I think it is well known that unless the United States and the people of the United States take leadership in this particular area, leadership of our West European allies who are also involved in these same questions, the Soviets and their Communist allies in Eastern Europe and elsewhere will continue these policies as if nothing happened.

So it is absolutely essential that these messages coming from the Free World, coming from those nations that are involved in the summit discussions, bring these subjects up and bring them up on a timely basis and as often as possible.

A number of our group, eight Congressmen, met with Soviet President Andrei Gromyko in Moscow last night, and the Soviet President kept coming back to the idea that there could not be cooperation in space with the United States unless the Americans did away with the strategic defense initiative, SDI. It was, to some extent, a broken record.

But we were liberal Democrats, and moderate Republicans, and moderate Democrats, and conservative Republicans, all talking, all acting, as one. The response came back to Mr. Gromyko, first from a liberal Democrat from the State of New Jersey [Mr. ROBERT TORRICELLI] and he very eloquently stated that the decision of this administra-

tion, the decision of the American people, to rearm and to rebuild their defense and to go ahead with the strategic defense initiative was far more made in Moscow by their actions in building up their military to unprecedented heights than made in the United States. I added, in addition to those defense considerations, were human rights considerations; that we felt here in the United States that the Soviet Union was undergoing a kind of re-Stalinization as it so brutally repressed human rights, as it so brutally dealt with anyone connected officially with the Helsinki accord monitoring group.

We also discussed the impact of the Soviet invasion of Afghanistan and the brutalization of an entire nation, the destruction of an entire people, and that this, too, added to the development of a certain fear on the part of the American people of the Soviet Union, its massive offensive weapons capability, and that this, too, led to a groundswell toward some kind of greater defensive capability against Soviet offensive weapons.

□ 1635

We mentioned the Soviet actions in Central America. The comment which was, I think, extremely instructive came back from President Gromyko, the comment was that he pitied us, he pitied us for being subject to what he called disinformacia or disinformation of the American media, that somehow the American media had concocted Afghanistan and the brutalities there, had concocted the death of five Helsinki monitors in labor camps and prisons prematurely in the last 2 years, had concocted the Sovietization of a particular Central American country. And I might add he said we have received the same disinformation about Soviet activities in Cuba and Soviet activities in Angola as we have seen about Soviet activities in Nicaragua, which was, I think, kind of giving greater credibility than he had imagined to the Soviet activities in Nicaragua.

But it was this response, that somehow we are victims, pitiful victims of disinformation, that is frightening. It is frightening because it is inconceivable that a Soviet leader who for 50 and more years has been active on the international scene so misunderstands the American people, and the American way of life, American democracy, and the American press. It is so important that people like the gentleman from Maryland, the cochairman of the Helsinki Commission, take to the floor to bring these issues in detail to the forefront of the debate in this country, because on the other side, there is a claim, as Gorbachev said to the French journalist who asked about political prisoners, he said what is the matter with you, someone with your education, with your background, with your experience, with your ability, how can you make such a absurd statement; or to eight Congressmen that we were the victims of a disinformation campaign. This must give us cause for concern, but it must not diminish our efforts to bring these conditions and these situations out before the American people, and I thank very much the gentleman from Maryland for doing exactly that.

Mr. HOYER. Again I thank the gentleman for what I believe to be very pertinent comments and for pointing out the unanimity that there is between the Members of both parties and of varying ideologies on the question of human rights. That the gentleman from the President's party and the gentleman from New Jersey [Mr TORRICELLI] from the Democratic party, formed a bipartisan delegation and went to the Soviet Union, as have many in the past, and hopefully many will in the future is an example of the bipartisanship on the subject of human rights. Such a delegation mirrors the deep concern that we have for the failure of the Soviet Union and its satellites to honor their commitments undertaken in Helsinki. On that point I believe I can say that there is no disagreement between the Congress, and the President, or among the Members of the Congress on either party.

The Helsinki Monitoring Group has been savaged and brutally treated by the Soviets and their satellites.

Through fear, intimidation, force, and incarceration in labor camps, prisons, and psychiatric hospitals, the Soviet regime seeks to control the flow of information, to stifle creativity. To deny the cultural identities of its citizens by suppressing history, culture, language, tradition, and religious beliefs with the final objective to break the human spirit of these brave people.

In the works of cultural dissidents like Stus, one finds an amazing inner strength. A refusal to compromise and ultimately a willingness to suffer for the right to create. The letters from prison are testimony to the invincibility of the creative spirit, to the strength and dignity of individuals seeking truth, and to the immortality of their causes.

So at Budapest we will discuss human rights. The right to create and disseminate ideas is a human right. Central to the U.S. interest in human rights in the CSCE process is the conviction that the CSCE process exists primarily to benefit the peoples of the participating states. There are those who see the Helsinki process as a lifeline. Keeping faith with those peoples is an important part of what meetings such as Budapest are about.

When the Hungarian Government requested that this meeting be held in their capital, they assured the 34 other signatory states to the Helsinki Final Act that they would abide by the practice observed at all other CSCE meetings, and provide an open atmosphere for free and unfettered dialog on cultural cooperation. The Hungarians also agreed unconditionally to follow the precedent established at the Madrid Review Conference with respect to nongovernmental organizations and their participation in the conferences. So far, they have respected neither commitment. We note with deep concern that the Hungarians on Tuesday banned activities planned by private Helsinki monitoring groups like U.S. Helsinki Watch that have representatives at the forum in Budapest.

The U.S. delegation, through Ambassador Walter Stoessel, has protested to the Hungarian Government. The protest said, in part, that the ban was "a violation of Hungary's commitment to allow the full range of activities for nongovernmental organizations, and that it has harmed the spirit of the Budapest cultural forum." The Hungarians replied that such private groups will be permitted no activities during the conference, despite repeated assurances during the past 2 years that the conference would be open.

That is a further violation of undertakings that the Soviet bloc nations willingly agreed to. Such activities by NGO's were not forced upon the Hungarians or put forward by the West but were voluntarily and willingly undertaken and agreed to by Hungary. Notwithstanding those actions, Hungary has not followed through.

My esteemed colleague and chairman of the Helsinki Commission, Senator AL D'AMATO and I coauthored a letter to the Hungarian Ambassador last week after reports of visa difficulties for private groups surfaced. We expressed the concern of the Helsinki Commission and remined Ambassador Hazi that the Government of Hungary had agreed to permit the full range of private activities at this forum. In his reply, dated October 14, Ambassador Hazi stated that the Government of Hungary has been driven "by the desire to meet her full commitment to the Helsinki process and to make the Budapest Cultural Forum successful both as a contribution to the Helsinki Process and to the easing of international tensions. The futhering of peace and understanding." That assurance is not being honored in Budapest.

Again, I am pleased to yield to my friend from Pennsylvania [Mr. RITTER].

Mr. RITTER. I thank the gentleman from Maryland for yielding.

It is sad, in a way, that this flow of information and this ability to provide for cultural interchange is not allowed in these countries, because as we have seen, we live in an information age.

We depend for our very lifeblood, our economic vitality, our standard of living on the free flow of information.

I lived in the Soviet Union 18 years ago. I went back this week after 18 years, and the changes that are taking place across the length and breadth of the Western nations, the decentralizing of our economy to some extent, the making available of information universally, the quick and rapid interchange of information, this is not taking place inside the Soviet Union. It seems to me that the need for this kind of free flow of information is even greater in the Soviet Union than it is in the United States or other Western countries because there is such a crying need to bring decisions back down to individuals, to make people responsible so that they are efficient, and effective, and productive, and so that the overall society produces more for its people.

Today inside the Soviet Union, forward-thinking people talk about decentralization. But I submit that simply reforming existing structures without permitting the freedom of flow of information, all different kinds of information coming from all different quarters, there will not be success, and it could end up as layer upon layer of new bureaucracy. As one who holds a great deal of affection for the Russian people and the other peoples under the aegis of the Soviet Government, I feel sad that they do not have it within their power to allow the freedom to flow throughout that country which inevitably would provide for a far greater strength, a far greater living standard, and a far greater level of happiness, and a far more peaceful world as a result.

Again, I thank the gentleman for yielding and yield back to the gentleman at this time.

Mr. HOYER. Again I think the remarks of the gentleman from Pennsylvania are right on point and very useful.

Mr. Speaker, in concluding my remarks on the cultural forum in Budapest, I regret to report that clearly the actions of the Hungarian Government indicate an unwillingness to foster the atmosphere conducive to open discussions on promotion of East-West cooperation in the field of culture. Such actions, unfortunately, undermine the potential successes that may be achieved at this cultural conference.

Mr. Speaker, there is no doubt that those of us who look to the cultural forum with great expectation, still have great hopes for some success in the areas of the exchange of information, the preservation and strengthening of minority cultures and religion in the Eastern bloc nations. We must not, in my opinion, lose heart. We must continue to involve ourselves in the Helsinki process. We must continue to bring to the attention of the Congress, to the people of the United States, and indeed the peoples of the world the commitments undertaken by 35 signatory nations at Helsinki in August of 1975, for those undertakings speak to the highest and best values that we in the West rely upon as the very basis of our societies.

□ 1650

Therefore, Mr. Speaker, I hope that we will recommit ourselves, despite the difficulties we have encountered and the frustration and disappointments we have experienced over the past 10 years. The commitments in the final act are to basic human rights that we take for granted sometimes in this Nation but which have been so well stated in our Declaration of Independence and which are the very basis of this Nation and of Western society.

Mr. KEMP. Mr. Speaker, first of all, I would like to thank the distinguished cochairman of the Helsinki Commission, Representative STENY HOYER, and our colleague in the Senate, Chairman D'AMATO, for their leadership and guidance. It is especially timely that we participate in this special order to commemorate the CSCE cultural forum taking place now, and for the next 6 weeks, in Budapest.

This is an excellent opportunity to raise the case of Vladimir Feltsman. Feltsman should be a top priority on our human rights agenda at all times and particularly now, at the Budapest cultural forum. Countries who participate in the Helsinki process are supposed to send leading figures from different fields of culture to discuss breaking down the barriers to artistic freedom. Specifically, the items on the agenda will deal with censorship, impediments to travel and communication, repression of cultural minorities, and the creation, dissemination and cooperation of art and artists. The focus of the forum will be to find a way to remove these obstacles.

Vladimir Feltsman is the living embodiment of an individual who must face these obstacles. An artist and a Jew, an international award-winning pianist and a Soviet citizen, Vladimir has been a victim of the repressive Soviet system. He was a highly acclaimed artist with the world at his feet until he applied for an exist visa to emigrate to Israel in 1979. Then it was as though Vladimir had never existed. His recordings are censored completely, he is not permitted to travel, and he is supposed to be ostracized by the performing arts community.

Ironically, Vladimir's courage has made him the secret hero of the same artistic community which is supposed to depise him. The support and interest his plight has engendered in the West is a ray of hope for all of his fellow artists who would like to see the goals of Helsinki realized—to have complete freedom to communicate and exchange ideas with other artists everywhere.

I met Vladimir when my wife, Joanne, and I attended a concert he gave at his apartment in Moscow 3 years ago. At that time, we discussed his harrassment by Soviet authorities, which I understand continues without abatement. I have worked with concert promoter Norman Gladney to try to obtain permission for Vladimir to perform in the United States from Gosconcert, the Soviet performing arts booking agency. Our communications have remained unacknowledged.

Nearly 4 years ago, Gladney presented a "concert" for Vladimir at Lincoln Center. I use the term concert advisedly, because Vladimir wasn't there. Many other distinguished performers provided the entertainment for the evening, including such notables as Helen Hayes, Dudley Moore, Misha Dichter, and dancers from American Ballet Theater, but the high point was the dramatic moment when a piano stood spotlighted on an empty stage while a recording of Feltsman's works was played.

Two years ago I introduced a resolution in Congress in support of obtaining from the Soviet Government permission for Feltsman to perform at the Kennedy Center in our Nation's Capital. This resolution received unprecedented support from the leadership of both parties. We did not obtain his release, but a clear signal was sent to the Soviets that this is one cause, one man the United States will not forget.

CBS Masterworks has courageously undertaken to produce and promote a recording of a Feltsman concert given at the American Embassy in Moscow. Not only will CBS be presenting for the first time an artist new to our country, but they will be making a strong statement in support of our Nation's belief in individual and artistic freedom. I applaud the patriotism CBS Masterworks has shown in taking this risk with an artist as yet unknown. On the eve of the 200th anniversary of our Constitution, and during the CSCE meetings on cultural freedom in Budapest, this is a commitment to freedom.

It is sad to think that an individual of such great talent should be reduced to playing in his apartment to an audience limited to his young wife and infant son. Who knows to what great heights this man could have climbed—and, with our help, still could—if he were permitted to freely exchange ideas and theories and hopes and dreams with other artists of his caliber? And how much richer these other artists would be? The end result would be a better world, the richer for the exchange. There is still hope for Vladimir Felstman, for all artists. Achieving the Helsinki goal of cultural freedom at Budapest in the coming weeks would be a first step toward the achievement of total freedom for oppressed people everywhere.

Mr. FRANK. Mr. Speaker, this week marks the beginning of the Cultural Forum of the Conference on Security and Cooperation in Europe. This meeting in Budapest continues the process begun at Helsinki in 1975. I want to thank my colleague Mr. Hoyer for taking out this special order so that we can discuss the Helsinki process; I also want to commend the fine work he has been doing as cochair of the U.S. Com-

mission on Security and Cooperation in Europe.

I think most of us in this body would agree that there have been disappointments resulting from the Helsinki process. Certainly there has been no appreciable improvement in the human rights situation in the Soviet Union. Nor, on the whole, has there been any such improvement in the rest of the Eastern bloc, though there have been fluctuations. On the issue of Soviet Jewish immigration—one litmus test for the agreement—the situation has gone from bad to worse. But I think the process has been very useful to the cause of human rights, if only because it helped focus attention on the cause. The Helsinki agreement set forward a list of universal principles which all citizens of the signatory countries can appeal to as recognized and inalienable rights. Equally importantly, the agreement proclaimed the principle that individuals can and should monitor compliance with the agreement. The Helsinki process may not have led to concrete concessions on the part of Eastern bloc governments, but in each of these countries human rights movements have crystallized around the powerful idea that citizens may monitor their own government's compliance with the accord.

It is precisely this idea which is being challenged this week in Budapest. Up until now it has been accepted at all of the Helsinki followup meetings that private human rights groups may stage their own meetings to coincide with the official meetings. The Government of Hungary had been understood to accede to this when it came host of the Cultural Forum. However, the authorities have prevented a group of Western and dissident East European intellectuals from holding a public symposium to parallel the Conference proceedings. The United States delegate to the Conference, Ambassador Walter Stoessel, has correctly characterized this as having "harmed the spirit of the Budapest Cultural Forum and is not conducive to the aims" of the Helsinki process.

The Helsinki process depends on the rights of individuals to monitor the compliance of their own governments, and I commend Ambassador Stoessel for recognizing this. It must be a keystone of American policy to come to the defense of these monitoring groups whenever they are under attack. Having said that, Mr. Speaker, I feel compelled to comment on my own Government's compliance. It is exemplary but it is not perfect. There are a few areas in which I believe our compliance can be improved; let me mention one of them. Since 1952 our immigration laws have contained an explicit ideological test for visitors to this country. At hearings before the House Judiciary Committee's Subcommittee on Immigration, Refugees, and International Law—June 28, 1984—Ms. Jeri Laber of Helsinki Watch testified that these provisons were violations of the principle that people and ideas should be able to freely cross between countries. Helsinki Watch can speak with experience on this issue; it is one of the groups which has been prevented from participating in a public forum in Budapest. I have introduced legislation to bring our immigration laws into conformity with Helsinki principles.

This is a minor infraction, to be sure; it cannot compare with the complete departure which has unfortunately characterized the record of the Eastern bloc nations. But it is important that we in the West make every effort to keep our own house in order. We do this for foreign policy reasons; it increases our credibility in the global ideological contest we wage on behalf of freedom. More importantly, we do it because it is right and healthy for us; the principles laid down at Helsinki are restatements of the fundamental principles upon which our national life is based. That is reason enough to fight for these principles abroad, it should be reason enough to fight for them at home.

Mr. PORTER. Mr. Speaker, I am pleased to join my colleagues of the Helsinki Commission to participate in this special order calling attention to the Budapest Cultural Forum.

This meeting as mandated by the Madrid Review Conference of the Conference on Security and Cooperation in Europe is the first to occur in a Warsaw Pact country and the first to deal exclusively with the cultural provisions of the Helsinki Final Act. Therefore, the need to address such as the right to assemble to discuss and practice religious faith and the right to teach languages and teach one's children religion must be given a high-priority status.

The United States and other Western democracies are committed to promoting respect for these individual human rights. However, these fundamental human rights must be promoted and accepted by all 35 signatories of the Helsinki Final Act.

The distinguished delegation that will represent the United States will share its views and concerns about the conditions that foster or hinder artistic creativity and the sharing of that creativity within and between States. This is the key that must be recognized—we must share with all nations the concept that approved cultural bodies can cooperate with each other to expand mutual cultural understanding and respect.

Individuals, whether acting alone or in freely formed groups, should be entitled to create, to discuss, and to promote the various forms of cultural expression without governmental control or supervision. International human rights doctrines guarantee these rights.

Eastern bloc countries proclaim impressive guarantees of the individual, cultural and national rights of all their citizens. Then why does censorship remain a sword hanging over the heads of all artists and writers in these countries? Why is the repression of religion still taking place? Why is the principle that the good of the collective always takes precedence over the rights or interests of any individual still being adhered to? And finally, why must the individual artist conform his or her personal development and expression to the themes, structures, and control of the State?

The answers to these questions are the principles guiding relations between nations that recognize a respect for human rights and fundamental freedoms. These principles must be maintained in the forefront of all negotiations between all countries.

The Budapest Cultural Forum, as part of the CSCE process, emphasizes that these important goals are not forgotten. The review process, as a whole, reminds those who signed the Helsinki Final Act what their commitments are, while it also reminds those who have ignored these principles what their commitments should be. We must continue to maximize pressure on all countries to live up to their international agreements.

The Cultural Forum is the stage where artists and authors from all over the world are gathering to freely exchange their cultural views and ideals. I join my colleagues in the hope that the Hungarian Government allows all participants the right to freely express themselves.

GENERAL LEAVE

Mr. HOYER. Mr. Speaker, I ask that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

ORDER OF BUSINESS

Mr. DREIER of California, Mr. Speaker, I ask unanimous consent that my special order precede the special order of the gentleman from California [Mr. PASHAYAN].

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

COMMENDING THE PRESIDENT FOR MAKING THE POW-MIA ISSUE A HIGH PRIORITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. DREIER] is recognized for 5 minutes.

Mr. DREIER of California. Mr Speaker, recent news reports have publicized the National Security Adviser's unofficial comments on the likelihood that Americans are still being held captive in Indochina as a result of the Vietnam War. Mr. McFarlane's comments represent the differing views and uncertainty about the fate of our MIA's in the administration and the general public. This uncertainty has led the administration to make such a final determination a top priority. I welcome this recent publicity as a means to renew Ameri-

51-059 O - 86 - 25 (Pt. 20)

ca's awareness of the, as yet, unresolved issue of nearly 2,500 unaccounted American servicemen.

This past year the media has justly focused much of our public attention on the plight of Americans held hostage—most recently those on the *Achille Lauro*, TWA flight 847 and in Beirut. A great deal of effort as been made to examine the effects of such captivity not only on the captives but on their families. These studies have explored the impact of anxiety and uncertainly generated among the relatives of hostages.

Well, Mr. Speaker, there are almost 2,500 American families who have endured an interminable period of stress and pain in not knowing the fate of their loved ones listed as missing in action. The initials MIA might as well stand for limbo. Some of these families have been left hanging for the last 20 years. Even the knowledge that a missing soldier or airman had met death would help bring peace to the family which has been unable, and understandably unwilling, to close the book on their missing family member, dead or alive, we owe it to the families of the MIA's to find out for certain what happened to our MIA's once and for all. Mr. Speaker, I rise in support of the administration's stated goal to make the POW-MIA issue a high priority. I commend the President for his efforts to negotiate with Hanoi for the discovery of our missing in spite of reports this foreign government and former enemy has been less than candid.

Mr. Speaker, Let's pursue the necessary avenues to bring these men home at last.

Mr. Speaker, I yield to the gentleman from Maryland [Mr. HOYER].

Mr. HOYER. I thank the gentleman for yielding. I want to congratulate him for his remarks and commend him for continuing to bring this matter to the attention of the body, because so many people, as he has pointed out, have this burning on their hearts and minds on a daily basis, so it is well that we keep the pressure on. We can do so through this means and other means, and I congratulate the gentleman for his remarks.

THE ARMENIAN GENOCIDE AND THE OUTCRY OF U.S. PRESIDENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. PASHAYAN] is recognized for 60 minutes.

Mr. PASHAYAN. Mr. Speaker, I ask unanimous consent that throughout the text, evidentiary and supporting materials be included.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PASHAYAN. Mr. Speaker, a month ago, Mrs. JOHNSON of Connecticut stood before this body and announced the rediscovery of congressional resolutions from 1896 and 1920 that document the recognition of the destruction of the Armenian people in Ottoman, Turkey. Mrs. JOHNSON entitled her special order "The Armenian Genocide and America's Outcry."

Today I rise to speak that among the loudest outcries heard in America on behalf of the Armenian people were the outcries of eight Presidents of the United States, beginning with Benjamin Harrison, that reflect awareness and profound concern regarding the atrocities against the Armenians. I was truly astonished to learn of the personal anguish and heartfelt commitment of the Presidents of this nation toward the Armenian people. What emerges from these pages is a moral portrait of American leadership: a spontaneous sympathy for the downtrodden, coupled with a desire to alleviate their suffering.

The Armenian genocide is one of the greatest tragedies of the 20th century. No episode of human suffering up until that time troubled the conscience of America more. For more than 30 years, President after President cried out for the massacres to cease and for relief to be sent to the stricken. Yet, Members of this body are now being told by current Turkish representatives and advocates that this chapter in history is unimportant and that it is inappropriate for congressional discussion.

Members of this body have a right to know what they are being asked to do by our NATO ally. They are being asked to contradict their own Presidents—Benjamin Harrison, Grover Cleveland, William McKinley, Theodore Roosevelt, William Howard Taft, Woodrow Wilson, Warren G. Harding, and Herbert Hoover—and to believe what no American President and no American Congress has ever believed—that the Armenian genocide did not occur.

A resolution is pending before us that would designate a day of remembrance for victims of the Armenian genocide. House Joint Resolution 192 was introduced by my colleagues, Mr. COELHO, Mr. CONTE, Mr. DORNAN of California, Mr. ASPIN, and myself. A few of my colleagues have legitimately raised the question: Why do we need this resolution at this time?

This resolution is necessary to demonstrate American willingness to remember its history and its unwillingness to be told when and when not to do so. There is no rational reason in the world not to remember the Armenian genocide, just as there is no rational reason why we should refuse to remember the Holocaust or other like tragedies. The voices of denial cannot be permitted to be heard more loudly in this Chamber than the voices of our Presidents. That is why I am taking this time on the floor to recreate for House Members a sense of the three decades of concern and commitment by eight Presidents toward the Armenian people.

President Benjamin Harrison, after his return to Indianapolis in 1894, became alarmed by accounts of the massacres of Armenians in Ottoman Turkey. In a letter dated December 14, 1894, to Richard Thompson, a Chicago attorney heading an organization to provide relief to Armenians, President Harrison wrote:

> My indignation and sympathy have been greatly aroused by the press reports of the fearful outrages practiced on the Armenians.

Mr. Speaker, less than a year later, this anguish had come to occupy a proper place in American foreign policy. President Grover Cleveland, in his annual message to Congress on December 2, 1895, conveyed a deepening sense of frustration in America over the killing of Armenians and the danger facing American missionaries:

> Occurrences in Turkey have continued to excite concern. The reported massacres of Christians in Armenia and the development there and in other districts of a spirit of fanatic hostility to Christian influences naturally excited apprehension for the safety of the devoted men and women who, as dependents of the foreign missionary societies in the United States, reside in Turkey under the guaranty of law and usage and in the legitimate performance of their educational and religious mission.

Mr. Speaker, in the same message, President Cleveland called upon the signatory powers to the Treaty of Berlin of 1878 to fulfill their promise to guarantee the security of the Armenian population of Ottoman Turkey:

> By treaty several of the most powerful European powers have secured a right and have assumed a duty not only in behalf of their own citizens and in furtherance of their own interests, but as agents of the Christian world. Their right is to enforce such conduct of Turkish government as will restrain fanatical brutality, and if this fails their duty is to so interfere as to insure against such dreadful occurrences in Turkey as have lately shocked civilization. The powers declare this right and this duty to be theirs alone, and it is earnestly hoped that prompt and effective action on their part will not be delayed.

□ 1700

Within several weeks after President Cleveland's message, anxiety over the desperate situation in Ottoman Turkey had swept across both Houses of Congress. As Congresswoman JOHNSON told us a month ago, the House and Senate adopted a resolution in January 1896 entitled "Armenian Outrages," mirroring President Cleveland's outcry for the European powers to intervene to save the Armenians. The atrocities by the Ottoman Turkish Government against its Armenian

population had now been elevated in America's foreign policy agenda.

Throughout 1896, however, the massacres continued. The European powers did not intervene. Thousands upon thousands of Armenians were savagely murdered or left exposed to every variety of plunder and disease. President Cleveland was deeply frustrated by the unending bloodshed. By his next annual message to Congress on December 7, 1896, he had reached the point of exasperation:

At the outset of a reference to the more important matters affecting our relations with foreign powers it would afford me satisfaction if I could assure the Congress that the disturbed condition in Asiatic Turkey had during the past year assumed a less hideous and bloody aspect and that, either as a consequence of the awakening of the Turkish Government to the demands of humane civilization or as the result of decisive action on the part of the great nations . . . the shocking features of the situation had been mitigated. Instead, however, of welcoming a softened disposition or protective intervention we have been afflicted by continued and not unfrequent reports of the wanton destruction of homes and the bloody butchery of men, women, and children, made martyrs to their profession of Christian faith.

Presidential concern over the Armenian massacres of 1894-96 did not end with President Cleveland. His successor, President William McKinley, continued to be occupied with the ramifications of these events 2 years later. In his annual message to Congress of December 5, 1898, President McKinley again touched upon the Armenians in a statement regarding indemnification by the Ottoman government for lost American property:

The newly accredited envoy of the United States to the Ottoman Porte * * * is especially charged to press for a just settlement of our claims for indemnity by reason of the destruction of the property of American missionaries resident in that country during the Armenian troubles of 1895, as well as for the recognition of older claims of equal justness.

Even before the beginning of the 1900's, their plight of the Armenian people in Ottoman Turkey had captured the attention of three U.S. Presidents. America's outcry was heard in Washington and throughout the Nation. By the beginning of the twentieth century, these humanitarian pleas grew louder as the commitment of the American people grew stronger.

The genocide of the Armenian people, like all other instances of genocide, is an issue worthy of remembrance today. Many of our citizens in this country are survivors of these atrocities, including Mr. Mesrop Baronian of Fresno, CA., who at the age of 96 is able to remember the massacres of 1895. As a tribute to those left behind, we should approve House Joint Resolution 192 and set aside a day in their memory.

Mr. Speaker, I thank the Armenian Assembly of America for its outstanding research effort in locating this documentation regarding the commitment of our presidents to the Armenian people.

Mr. Speaker, I bring forward critical new information about the involvement of the Presidents of the United States in the plight of the Armenians of Ottoman Turkey. Most of this documentation has been buried in remote drawers inside the National Archives and the Library of Congress for over half a century. We who value the integrity of history are grateful that the truth about the American commitment to the Armenian people is finally coming to light.

This commitment is exemplified by the words of one of our most legendary Presidents, Theodore Roosevelt. Long concerned about the atrocities against the Armenians, President Roosevelt made the following plea in his annual message to Congress on December 6, 1904:

[Our] nation should desire eagerly to give expression to its horror . . . when it witnesses such systematic and long-extended cruelty and oppression as the cruelty and oppression of which the Armenians have been the victims, and which have won for them the indignant pity of the civilized world.

Theodore Roosevelt discussed the Armenian outrages in his correspondence as well. On December 14, 1905, he wrote to Jewish community leader Jacob Henry Schiff:

. . . the case was much simpler as regards the Armenians a few years ago. There the Turkish Government was responsible and was able to enforce whatever was desired. The outrages on the Armenians were exactly the same as those perpetrated upon the Jews of Russia both in character and in extent.

On August 6, 1906, President Roosevelt wrote to American industrialist Andrew Carnegie:

It would be an advantage to justice * * * if we were able effectively to interfere for the Armenians in Turkey.

In a letter to Armenian rights advocate Dr. Lyman Abbott on January 3, 1907, he stated:

* * * I put righteousness above peace, and should be entirely satisfied to head a crusade for the Armenians.

President Roosevelt felt deeply that America should have intervened to stop the atrocities against the Armenians. By 1918, after the worst phase of the genocide was well under way, he wrote to Cleveland Dodge, founder of Near East Relief:

I feel that we are guilty of a peculiarly odious form of hypocrisy when we profess friendship for Armenia and the downtrodden races of Turkey, but don't go to war with Turkey. To allow the Turks to massacre the Armenians and solicit permission to help the survivors, and then to allege the fact that we are helping the survivors as a reason why we should not follow the only policy that will permanently put a stop to such massacres is both foolish and odious.

He went on to say:

* * * the Armenian massacre was the greatest crime of the war, and failure to act against Turkey is to condone it; because the failure to deal radically with the Turkish horror means that all talk of guaranteeing the future peace of the world is mischievous nonsense; and because when we now refuse to war with Turkey we show that our announcement that we meant "to make the world safe for democracy" was insincere claptrap.

President Roosevelt, perhaps more than any American leader, felt that only swift and decisive action against the perpetrators of genocide would convince them to halt the destruction of innocent people. His sense of outrage over the massacres of the Armenians stayed with him through the war, and he later referred to them in his autobiography as an example of "the worst infamies of modern times."

The worst infamies of modern times—such affairs as the massacres of the Armenians by the Turks, for instance—have been perpetrated in a time of nominally profound international peace, when there has been a concert of big Powers to prevent the breaking of this peace, although only by breaking it could the outrages be stopped. Be it remembered that the peoples who suffered by these hideous massacres, who saw their women violated and their children tortured, were actually enjoying all the benefits of "disarmament." Otherwise they would not have been massacred; for if the Jews in Russia and the Armenians in Turkey had been armed, and had been efficient in the use of their arms, no mob would have meddled with them.

Fortunately, the situation with regard to Turkey is quite different from that of President Roosevelt's time. The United States and the Republic of Turkey are now allies and share common goals. One goal that the United States does not share with Turkey, however, is the denial of history. The suffering of the Armenian people under the Ottoman regime is an important epoch in American history. It is a history of humanitarian concern and charitable assistance, a record of international condemnation and diplomatic entreaty. The American people and their Government simply cannot cast aside over thirty years of commitment in order to help an ally to avoid dealing with a difficult issue.

A minority of members of this body have echoed the assertion by the present Turkish Government that the United States ought not involve itself in the Armenian genocide question. This special order is the appropriate response to that assertion. The United States was involved in this tragedy almost from the beginning and continued its involvement through the late 1920's. The American people cannot countenance an aboutface on their own history. Our alliance with Turkey is strong, and will grow stronger by

facing up to the challenge of rightly reckoning with the past.

Mr. Speaker, I yield to the gentlewoman from New Jersey [Mrs. ROUKEMA].

Mrs. ROUKEMA. I thank the gentleman for yielding.

Mr. Speaker, I am pleased to take part in this special order sponsored by the gentleman from California. Through the efforts of Mr. PASHAYAN, Mrs. JOHNSON, Mr. COELHO, and others, we are now becoming aware of the degree of involvement by the United States in the tragic events in Armenia, beginning over 80 years ago. This period was known as the "American Genocide," and named by Dr. Raphael Lemkin, who later conceived the Genocide Convention.

Our Presidents were painfully aware of the excesses committed against the Armenians in Ottoman Turkey. For nearly three decades they acted to alleviate the suffering and to prevent further killings. Despite their pleas, however, the massacres continued until some 1.5 million Armenians had perished and the remaining survivors scattered across the Middle East and eventually across six continents.

President Herbert Hoover vividly recalled the Armenian atrocities in his memoirs, published in 1952. He served in President Wilson's war Cabinet and was acutely aware of the tragedy that had befallen the Armenian people. In his memoirs he wrote:

> Probably Armenia was known to the American School child in 1919 only a little less than England. The association of Mount Ararat and Noah, the staunch Christians who were massacred periodically by the Mohammedan Turks, and the Sunday School collections over fifty years for alleviating their miseries—all cumulate to impress the name Armenia on the front of the American mind.

He described the work performed by the American Near East Relief Committee on behalf of the Armenians:

> Their sailings began early in January (1919). Five or six weeks later, Mr. Heinz at Constantinople informed me of rumors that "things had gone to pieces" in Armenia and that the Near East Committee's work had broken down * * * their report to me pictured an incredible state of affairs both as to the near east committee staff and the condition of the Armenians.

Herbert Hoover's memories of the Armenian atrocities stayed with him nearly 35 years after he had first dealt with the enormous tragedy. One can only imagine how much more vividly the memories of the events remain for those Armenians who escaped the massacres and found refuge on these shores. Many thousands of these brave people are with us in 1985 and are waiting as the Congress considers a measure to commemorate their perished parents and siblings.

House Joint Resolution 192 will simply commemorate an event that has been recognized by the United States for nine decades. Those opposed to the discussion of this event have attempted to convince Members of Congress that the United States should abandon this recognition. No reason for the denial of history can ever suffice.

We should pass House Joint Resolution 192 when it is brought to the floor of the House.

I pledge to work with the gentleman from California to that end.

Mr. PASHAYAN. I thank the gentlewoman for her appropriate words.

Mr. Speaker, I know the gentlewoman has been a longtime advocate in trying to get this resolution and similar resolutions passed, and I appreciate her work. A lot of people in America do also.

Mrs. ROUKEMA. Mr. Speaker, we owe a debt of gratitude to the gentleman from California.

Mr. PASHAYAN. Mr. Speaker, I yield at this time to the gentleman from California.

Mr. DORNAN of California. I thank my fellow Californian for yielding to me.

Mr. Speaker, I, too, both want to congratulate and thank the gentleman from California [Mr. PASHAYAN] for calling this special order, particularly the focus he has put on reminding all Americans what each one of a series of American Presidents has had to say about the brutality inflicted upon the Armenian people.

There was perhaps no greater President, as the gentleman in the well knows, than Woodrow Wilson, our President who was in office during the worst of the series of massacres which took place.

Mr. Wilson received innumerable eyewitness accounts and reports of the devastation of the Armenian population that he was convinced that we had to act as Americans in order to save the Armenian people from extinction.

I want to repeat that: President Woodrow Wilson believed in his heart that he was acting to prevent an absolute extinction of one of the world's oldest and most distinguished people, the first people to adopt Christianity as a whole nation.

I might say again, as has been said on this House floor many times, but it bears repeating over and over, that if Adolf Hitler, one of the prime tyrants of this century, had not observed that the Armenians were suffering unbelievable hardship, including this century's first genocide, if he had seen the world rise up and, in an outcry as Woodrow Wilson had wanted, he probably would not have dared to perpetrate his unspeakable crimes against the Jews of Europe.

On December 10, 1915, President Wilson received a communication from William Nesbitt Chambers, an American missionary in Turkey, who wrote that the Armenian situation in Turkey was "appalling in its awful cruelty and relentless extermination." The President responded 3 days later:

> The situation with regard to the Armenians is indeed nothing less than appalling. You may be sure that we have been doing everything that is diplomatically possible to check the terrible business.

On December 21 of the following year, President Wilson wrote to Rt. Rev. Arsene Vehouni of the Armenian Church:

> I am sure that I am expressing the feeling of the people of the United States when I say that the little we have been able to do has been done with hearts full of sympathy, and that the suffering people of Armenia may rest assured that they will continue to receive at our hands an unqualified sympathy and, whenever it is possible, generous assistance.

President Wilson backed these words with concrete efforts to aid the suffering. In both 1916 and 1917, he made appeals to the American people to contribute toward "the relief of the Armenians." But the massacres continued unabated. The President eventually concluded that the United States had to intervene militarily if the Armenian people were to be saved from total annihilation. On September 18, 1919, he wrote to Acting Secretary of State William Phillips:

> I would be pleased if you would get into communication with Senator Williams and through him with the appropriate committees of Congress with regard to our being authorized to send troops to Armenia. I am heartily in favor of such a course if the Congress will authorize it * * *.

The telegram follows:

> DUNSMUIR, CA,
> *September 18, 1919.*
>
> Hon. WILLIAM PHILLIPS,
> *Acting Secretary of State,*
> *Washington, DC.*
>
> I would be pleased if you would get into communication with Senator Williams and through him with the appropriate committees of Congress with regard to our being authorized to send troops to Armenia. I am heartily in favor of such a course if the Congress will authorize it, but of course am still willing to defer to the French if they are sending a sufficient number or to join them if they are willing to accept joint military action and we get the authority of Congress.
>
> WOODROW WILSON.

□ 1715

Now, you cannot ask for more commitment from an American President than starting to set the wheels in motion to send American troops to far-off corners of the world. Before there was any jet travel or high-speed ships, he was willing to try and save Armenian people with American military soldiers shedding their blood.

He again wrote to Acting Secretary of State Phillips on the 23d:

> I believe that it is of immediate humane necessity to take energetic action and that the very existence of the Armenian people depends upon it.

In his historic special message to Congress on May 24, 1920, President Wilson requested congressional consent for the United States to assume a mandate for Armenia under the League of Nations. In a very emotional appeal, the President described America's commitment to the Armenian people thusly:

The sympathy with Armenia has proceeded from no single portion of our people, but has come with extraordinary spontaneity and sincerity from the whole of the great body of Christian men and women in this country, by whose free-will offerings Armenia has practically been saved at the most critical juncture of its existence. At their hearts this great and generous people have made the cause of Armenia their own.

Just 3 days later, on May 27, 1920, President Wilson vetoed a congressional resolution that would have repealed the declaration of war with Germany and Austria-Hungary, and cited the following as one of his central reasons:

* * * nothing is said in this resolution about * * * the relief of the Christian populations of the Ottoman Empire from the intolerable subjugation which they have had for so many generations to endure.

Finally, on November 30, 1920, President Wilson wrote to M. Paul Hymans, president of the Council of the League of Nations:

* * * this country has repeatedly declared its solicitude for the fate and welfare of the Armenian people in a manner and to an extent that justified you in saying that the fate of Armenia has always been of special interest to the American people.

Our President went on to demonstrate his own personal commitment:

I am willing * * * to use my good offices and to proffer my personal mediation through a representative whom I may designate to end the hostilities that are now being waged against the Armenian people * * *.

Woodrow Wilson's long record of devotion to the Armenian people is in itself a chapter in our Nation's history that deserves remembrance. It was a devotion that reflected the deep sentiment felt by all of us Americans. It is perfectly understandable that Americans today still desire to pay tribute to this period of history.

House Joint Resolution 192 seeks to do just that. It seeks, very simply, to designate a day of remembrance for the victims of the Armenian genocide. Woodrow Wilson in his day would most certainly have endorsed such a commemorative resolution, as would Benjamin Harrison, Grover Cleveland, William McKinley, Theodore Roosevelt, William Howard Taft, Warren G. Harding, Herbert Hoover, and all the Presidents that various Members through your leadership, Mr. PASHAYAN, have really spoken to us again today with their very own words.

Why is there a controversy over something that has clearly been U.S. policy for over 90 years?

Well, our NATO ally, the Republic of Turkey, has been unwilling to acknowledge that a genocide has occurred under a predecessor regime, a regime that the current Republic of Turkey fought with their blood to overthrow, the centuries-old Ottoman regime that at various peaks and valleys exercised various levels of brutality and subjugation, and to precisely the 400 years that the Ottomans were in control of Turkey, and at one point threatened all of Europe, great Jewish and Christian leaders all over the world spoke out and were relieved in the early 1920's, when Ataturk—changing his name to what meant "Father of the Turks"—took this yoke of Ottoman oppression off the people of Turkey and brought them full force into the 20th century. Why should this continuing government since the early 1920's have this psychological hangup over acknowledging a genocide of the Armenian people escapes me. I cannot understand the thread of logic that runs through their reasoning. But that does not mean that the United States should abandon a 90-year recognition of one of the greatest tragedies in world history.

While there is no doubt that Americans value the friendship of the Republic of Turkey—and I say I do, as an individual Member—the anchor, the southeastern flank of NATO, we need them, it is a mutual friendship that we have, and we should continue to strengthen our relationship, it does not mean we should not do the right thing here.

While there is no doubt that this remembrance means a lot to the Armenian people, it is America's humanitarian intervention on behalf of Armenia and the remembrance of this that should be recalled that does not have any bearing whatsoever on modern Turkey today.

House Joint Resolution 192 has become for many Americans a symbol of the resolve of the Congress to remember America's past and also to keep alive the history of a beautiful and wonderful people, the Armenians. We must demonstrate that resolve and approve House Joint Resolution 192 when it returns to the House floor.

I would just like to say, in closing, tc my dear friend, Mr. PASHAYAN, that I had the honor yesterday morning of being at the ground-breaking ceremony for the Holocaust Memorial on 14th Street, right near Independence. This was yet another European tragedy or, in the case of the Armenian holocaust, a Near East, a Middle Eastern tragedy. Why do we have a museum for a European tragedy? Simply because of the enormity of the extermination of 6 million Jews and 6 million other people in Hitler's horrible concentration camps, 12 million people, innocent people died in a cataclysm that killed and murdered over 50 million people, the enormity of the attempted extinction of the Jews of Europe by Adolf Hitler and his Nazi regime is something that is important to the memory of every single living person. Well, if it had not been for the enormity of Hitler's crime or a genocide of 2 million or more Cambodians just in this last decade, if those two accursed crimes had not taken place, the genocide of the Armenian people, peaking in 1950, with much flutter in the few years after that, it would remain as the most enormous crime of man's inhumanity to man in all of history. It is just loathsome that in this century this holocaust and genocide of Armenians should be relegated to No. 3, behind the genocide of Jews and the genocide of Cambodians by the Communist Khmer Rouge. Nevertheless, the enormity of the crime is no different. No less a killer and a tyrant than Stalin himself said that the killing of millions is just an historical footnote, the killing of one person may be important. Well, that kind of twisted Communist logic is not accepted by American people. The loss of one American senior citizen in his wheelchair on the high seas of the Mediterranean just last week has made the name Leon Klinghoffer ring through our history of the last few days. Well, can we be so callous that 1½ million more Armenians dying should not be as important to us in the history of this country as one human being? This country finds great importance in the individual dignity of each human being, and it certainly wants to never forget the history of the attempted extermination of a whole people, whether those people are the great Khmer people of Southeast Asia, the Jews of Europe, or the Armenian people, and the contributions of Armenians to this country, including the Governor of the largest State of our great 50 States, our good friend, George Deukmejian, make this resolution no less and no more in importance. We would be doing it anyway. But it is a statement to all of the great Armenian Americans who have contributed so much to our culture, our arts, our music, our political system, our medicine, every field of American life. I do not see how we can fail to pass this with an overwhelming vote.

I thank my colleague for letting me share these comments.

Mr. PASHAYAN. I thank my colleague for his moving words and for his heartfelt sympathy and all the help he has rendered to the Armenian people. My colleague is well known in the House, as a matter of fact, I think it is fair for me to say that there is no stronger advocate, perhaps, in the House than my colleague of national defense and the policy the United States should maintain the strongest of defense. Yet the argument is being

advanced by this Government of Turkey that the Congress' continuing remembrance of what the predecessor Government of Turkey did somehow would constitute a damage to the NATO Alliance.

I should like to ask my colleague, briefly, to comment on whether he thinks a recognition of what took place in a predecessor Government in any way would damage the NATO Alliance, and, more than that, whether he thinks any of the Presidents whose words we are today recreating for this body, by mentioning and by speaking against the Armenian genocide, whether any of those Presidents were derelict in their duty as Commander in Chief in taking the position they took.

I would like to ask my colleague to please comment on the historical position.

Mr. DORNAN of California. I will give the gentleman a forthright evaluation, that this is going to amount to absolutely nothing, after this act of historical remembrance and deep-felt sympathy for the Armenian people is behind us for this year, with the day of remembrance commemorated, it will matter nothing to the average people of the modern-day State of Turkey.

I hope someone has included in the body of this particular record this evening the very words of Turkey's George Washington, the father of their country, the gentleman I mentioned before who changed his name to Ataturk. Everywhere I went in Turkey in the several visits I have made there is the picture of this handsome, by any cultural standard, imposing-looking man in what was in the early part of this century diplomatic uniform, in tux with tails and the red sash and the decorations on it, everywhere you see the face of Ataturk looking down. He acknowledged the genocide, he talked about the horror that had been inflicted by the cruelty of the Ottoman Empire on the Armenians of his country, and he considered them fellow citizens of Turkey. If the father of their country, the one name that stands out and shines in Armenian history had no psychological hangup, what is the problem with the Turkish Government today? Maybe it is just—we should be charitable—for domestic consumption. We have never had a tougher leader of the nation of Egypt. I said to President Mubarak yesterday, "Look, you are a fighter pilot. Act like one. Stand tall against terrorism. All the people who killed your friend Sadat, they have all been executed by your Government. What are you doing with the bizarre remarks suggesting that our President should apologize for apprehending in the air, as if he sent out a duly authorized posse to reel in the stagecoach, with the murderers on board? What are you doing putting us up against the wall, Mr. Mubarak?"

And I think the dust will settle over that. It is probably for domestic consumption. It seems like most of the nations of the world have to always take into consideration rioting in the streets, or something. Well, I think the Turkish leaders that I have spoken to—and I have talked to some ambassadors in various countries who are very tough, astute, cultured gentlemen—they said, "Don't quote me. Proceed with this. We will be able to buffet any domestic pressures."

There is nothing wrong with ever acknowledging horrors of the past. So I am not worried about the Government. They are a good ally and, let us face it, we both need one another.

Mr. PASHAYAN. Absolutely.

Mr. DORNAN of California. I am stating this charitably: They have umteem Soviet divisions on their border. They share a border with the Soviet Union. When you get up on Mount Ararat, you look into the Soviet Union, still called Armenian S.S.R., and they still suffer persecution there, and then you look down into what were the great and beautiful lands of the heartland of Armenia.

By the way, I just noticed that tonight, if people want to get a look at how beautiful the countryside is of ancient Armenia, "20/20" tonight is doing a piece on Noah's Ark, another one of these stories: Is it possible that Noah's Ark could exist on Mount Ararat? Maybe it is a big leap of faith, but I believe that it is up there somewhere, so if people want to look at the Armenian heartland they can give it a good look at some beautiful photography on ABC's "20/20" tonight.

Mr. PASHAYAN. I should like to thank my distinguished colleague for his very kind words and very meaningful words and to echo what he said, that this resolution or the recognition by this Turkish Government of what the prior Turkish Government did in no way constitutes any detriment or disadvantage or damage to the NATO Alliance.

Mr. DORNAN of California. Absolutely not.

Mr. PASHAYAN. I thank the gentleman.

Mr. Speaker, I commend the gentleman from California for reserving this time on the floor to bring to our collective attention the degree of unanimity among U.S. Presidents regarding the deplorable treatment of the Armenians in Ottoman Turkey. The level of awareness and concern in this country during the time of the Armenian atrocities is remarkable.

Mr. Speaker, further remarks by two more Presidents, as a historical matter. We shall continue with President William Howard Taft, who commented about the tragedy of the Armenians numerous times in his "Papers on the League of Nations," published in 1920. He correctly identified the Armenians as undeserving victims:

> On the whole, it is not too much to say that the people of the Jewish race have suffered more in this war, as noncombatants, than any other people, unless it be the Serbians and the Armenians.

□ 1730

As Members begin to absorb the evidence we are seeing about American involvement in the tragedy of the Armenian people, we will view House Joint Resolution 192 from a new perspective. This resolution will serve merely to remind Americans that our Nation demonstrated a historic commitment to the Armenian people who were victims of genocide over several decades. The designation of a day of remembrance for these victims is perfectly in keeping with our history.

We should pass House Joint Resolution 192 when it is brought to the floor.

Mr. Speaker, the gentleman from California is to be commended for his efforts to bring to light the statements and actions of our former Presidents regarding the atrocities against the Armenians of Ottoman Turkey. In our consideration of House Joint Resolution 192, a commemorative resolution to recall the victims of this tragic period, we should take into account the prior record of our Government on this issue.

Warren G. Harding was among the most sympathetic of American Presidents with regard to the Armenian people. In 1920, then-Senator Harding introduced Senate Resolution 359 which recognized the massacres:

> • • • the testimony adduced at the hearings conducted by the subcommittee of the Senate Committee on Foreign relations have clearly established the truth of the reported massacres and other atrocities from which the Armenian people have suffered • • • the people of the United States are deeply impressed by the deplorable conditions of insecurity, starvation, and misery now prevalent in Armenia • • •.

The resolution follows:

S. RES. 359

> Whereas the testimony adduced at the hearings conducted by the subcommittee of the Senate Committee on Foreign Relations have clearly established the truth of the reported massacres and other atrocities from which the Armenian people have suffered; and
>
> Whereas the people of the United States are deeply impressed by the deplorable conditions of insecurity, starvation, and misery now prevalent in Armenia; and
>
> Whereas the independence of the Republic of Armenia has been duly recognized by the Supreme Council of the Peace Conference and by the Government of the United States of America: Therefore be it
>
> *Resolved*, That the sincere congratulations of the Senate of the United States are hereby extended to the people of Armenia on the recognition of the indepedence of the

Republic of Armenia, without prejudice respecting the territorial boundaries involved; and be it further

Resolved, That the Senate of the United States hereby expresses the hope that stable government, proper protection of individual liberties and rights, and the full realization of nationalistic aspirations may soon be attained by the Armenian people; and be it further

Resolved, That in order to afford necessary protection for the lives and property of citizens of the United States at the port of Batum and along the line of the railroad leading to Baku, the President is hereby requested, if not incompatable with the public interest, to cause a United States warship and a force of Marines to be dispatched to such port with instructions to such Marines to disembark and to protect American lives and property.

Harding's concern for the Armenians continued after he assumed the Presidency in 1921. He wrote to Judge Alton Parker on May 30, 1921:

I know that American sympathies and American generosity combine to impel us to afford every possible relief to the Armenians . . . I am writing mainly to have you understand that I have a sympathetic concern over the Armenian situation and I would like you to know of my willingness to be helpful . . .

The text of the letter follows:

MAY 30, 1922.

Hon. ALTON B. PARKER,
New York City.

MY DEAR JUDGE PARKER: I have yours of May twenty-fourth together with a copy of a letter which you addressed to the Secretary of State, relating to the plight of America.

I think perhaps you know my feelings in this matter. I know that American sympathies and American generosity combine to impel us to afford every possible relief to the Armenians, and to give our influence in bringing about the establishment and the tranquilization and stabilization of an Independent Armenian Republic.

I would gladly have our people do everything which may be done consistent with our foreign policy.

I am writing mainly to have you understand that I have a sympathetic concern over the Armenian situation and I would like you to know of my willingness to be helpful so far as it can be done in a consistent way.

Sincerely yours,

WARREN G. HARDING.

By 1921, the massacre of Armenians had spread to the south central region of Asia Minor along the Mediterranean, known as Cilicia. After the war had ended, the Ottoman government had began a new wave of killings in Cilicia where many survivors of the 1915 deportations had taken refuge. As he had advocated while in the Senate, President Harding urged that the United States act to prevent further destruction. He wrote to Secretary of State Hughes on November 21, 1921:

• • • I am disposed to think there is a good deal of ground for the gloomy view of the situation in Cilicia which is presented in this appeal • • •. When I was in the Senate I had the honor to recommend to the Executive the dispatch of a Navy vessel to the port of Batun on the Black Sea. The purpose at that time was to enable a sufficient force of marines to be employed to keep open the railway from Batun to Erivan in order to guarantee the transmission of relief supplies and otherwise tranquilize the situation. If it is believed that a warship can be sent to an Armenian port on the Mediterranean I should have very little hesitancy in making such a suggestion on behalf of these stricken people. Surely there must be some way in which to utter the admonition of the five great powers to restrain the hands of assassins in that unfortunate land.

The letter follows:

THE WHITE HOUSE,
Washington, November 21, 1921.

Hon. CHARLES E. HUGHES,
Secretary of State,
Washington, DC.

MY DEAR SECRETARY HUGHES: I am enclosing herewith a copy of an appeal presented to me today by a Committee of Americans who called on behalf of the Armenians in Cilicia. [I had something to do with the inquiry into the Armenian situation during the latter part of my term in the Senate, and I am disposed to think there is a good deal of ground for the gloomy view of the situation in Cilicia which is presented in this appeal.] I am wondering if it would not be possible for you to speak informally concerning the matter with Mr. Balfour and Mr. Briand.

When I was in the Senate I had the honor to recommend to the Executive the dispatch of a Navy vessel to the port of Batun on the Black Sea. The purpose at that time was to enable a sufficient force of marines to be employed to keep open the railway from Batun to Erivan in order to guarantee the transmission of relief supplies and otherwise tranquilise the situation. If it is believed that a warship can be sent to an Armenian port on the Mediterranean I should have very little hesitancy in making such a suggestion on behalf of these stricken people. Surely there must be some way in which to utter the admonition of the five great powers to restrain the hands of assassins in that unfortunate land.

Very truly yours,

WARREN G. HARDING.

Like his predecessors, President Harding was responding to a deep-rooted concern among all Americans about the continuing atrocities. He wrote to Secretary of State Hughes on May 20, 1922:

I am wholly conscious of a highly sentimental and very earnest sympathy among our people for the unfortunate Armenians.

President Harding had advocated that the American mission at Lausanne work toward the self-determination of the Armenians. By January 1923, the President had grown frustrated that they had encountered opposition. On January 15, he again wrote to Secretary Hughes:

I was deeply interested in yours of January 12th, in which you report the efforts of our Mission at Lausanne to do something in behalf of an Armenian national home, and the utterly discouraging reports that there are no prospects of the Turkish delegation agreeing to any such arrangement. It is going to be a very keen disappointment to religious America that the Armenian Christians are to be dealt with in this manner • • •.

Mr. Speaker, this remarkable record of dedication to the plight of the Armenian people is a proud period in this country's history. President Harding's involvement was a continuation of American policy that had begun over 25 years earlier. Through those decades there was never a thought given to waivering from our commitment to the suffering Armenians.

This extended period of human tragedy is worthy of remembrance today. Members of Congress are hearing from various corners that it is not our business to speak about this period in history. We must reject that notion. The Congress and our Presidents have created a crystal clear record on the subject of the Armenian genocide. We cannot dismiss this commitment and dishonor the memories of those leaders who came before us.

We must approve House Joint Resolution 192 when it is brought for a vote.

This then is a summary that I have presented to the House in the hope that when the House comes to consider House Joint Resolution 192 that the House will recall, that this body will recall, that the foreign policy of the United States, as declared by Presidents beginning in 1894, has been one of recognition of the Armenian genocide that began in Ottoman Turkey in the latter part of the 19th century and continued until the decline and fall, the collapse of the Ottoman government in the early 1920's.

Under the Constitution, it is the American President that is to speak out for foreign policy. I find it, as my colleague from California, Mr. DORNAN, finds it, remarkable that this Government today insists to this Congress that this Congress act in a manner to deny what is clearly by every bit of evidence of the records of the American Government itself a policy of recognition of what happened to the Armenians at the hands of the Ottoman Turkish Government.

I should like to take a minute to thank the Armenian Assembly who worked diligently to bring to light this historical evidence, clearly demonstrating that it was the policy of the United States to recognize what took place in that part of the world then, the genocide against a Christian people. I ask this Congress when the time comes, please, to recall the American policy, the American history, the American involvement with the issue and to pass House Joint Resolution 192.

ATLANTIC ALLIANCE: ALIVE AND WELL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. FASCELL] is recognized for 5 minutes.

Mr. FASCELL. Mr. Speaker, the Atlantic Alliance, I am happy to report, is alive and well and if not living in San Francisco at least functioning quite effectively there during the 31st annual plenary session of the North Atlantic Assembly.

The strategic defense initiative [SDI] was the main item of business and the interparliamentary body on Tuesday overwhelmingly upheld our position of support for SDI research consistent with the provisions of the Anti-Ballistic Missile Treaty. Readily defeated were efforts that might have undermined the United States position prior to next month's United States-Soviet summit in Geneva.

Much credit is due to the vigorous, bipartisan efforts of the U.S. delegation and top-level administration speakers who went to great lengths in helping allay fears that the United States would somehow "go it alone" with SDI and disregard restrictions in the ABM treaty.

Both Secretary of State George P. Shultz and veteran U.S. arms control negotiator Paul H. Nitze stressed that SDI research would be conducted under the precise, generally accepted strictures of the ABM treaty rather than the looser interpretation recently disclosed by some in the administration.

This assurance greatly helped ease genuine concerns among many delegates from the 16 NATO nations that SDI would result in a further escalation of the arms race and inevitably result in the introduction of nuclear weapons in outer space.

The delegates asked tough questions and forcefully expressed their concerns. However, they proved willing to listen, to weigh new evidence as it became available, to be persuaded—to compromise in the interest of maintaining harmony in the Alliance and in developing a consensus on an issue as emotionally charged as SDI.

In short, the delegates proved that the system works, that efforts to divide the alliance ultimately are futile—as Mr. Gorbachev learned when he tried to split France and Great Britain away from the United States by calling for separate negotiations on arms reductions.

The U.S. delegation worked long hours to achieve a successful compromise resolution on SDI, and our esteemed colleague, Chairman JACK BROOKS of Texas, a past president of the Assembly, was extremely effective in a dynamic presentation before the delegates laying out the U.S. position.

The cochairman of the U.S. delegation, Senator CHARLES MCC. MATHIAS, JR., of Maryland, also provided strong leadership and was chosen as the new president of the Assembly. He co-authored the SDI resolution—along with John Cartwright of the United Kingdom—which passed without substantive changes.

Another colleague, Representative GEORGE M. O'BRIEN of Illinois, successfully campaigned to establish a working group within the Assembly's Political Committee to deal with the issue of international terrorism.

Kudos go, as well, to Congresswoman SALA BURTON of California, our hostess, and to the mayor and citizens of San Francisco who made the delegates' stay so pleasurable.

My deepest thanks, as well, to the other members of our delegation, all of whom worked so hard to make the Assembly a success. They included: Representative CHARLES ROSE of North Carolina, Representative JACK BROOKS of Texas, Representative ROBERT GARCIA of New York, Representative SALA BURTON of California, Representative SAMUEL S. STRATTON of New York, Representative TOM LANTOS of California, Representative JOHN M. SPRATT, JR. of South Carolina, Representative STENY H. HOYER of Maryland, Representative BILL RICHARDSON of New Mexico, Representative, NORMAN DICKS of Washington, Representative WILLIAM S. BROOMFIELD of Michigan, Representative G. WILLIAM WHITEHURST of Virginia, Representative GEORGE M. O'BRIEN of Illinois, Representative FRANK HORTON of New York, Representative THOMAS J. BLILEY, JR. of Virginia, Representative SHERWOOD L. BOEHLERT of New York, and Representative ROBERT E. BADHAM of California.

The final SDI resolution, as adopted, is one I believe all Members can support. The complete text, as amended, follows:

RESOLUTION ON STRATEGIC DEFENCE AND THE ALLIANCE

(Presented by Mr. John Cartwright (United Kingdom), and Senator Charles Mathias (United States))

The Assembly,

Recalling resolution 132 on arms control in outer space (1982) and resolution 145 on ballistic missile defence (1983);

Reaffirming deterrence based on retaliatory offensive systems as an essential component of Alliance security;

Concerned by the increase in numbers and capability of offensive strategic weapons, and the consequent implications for crisis stability;

Underlining that the existing strategy of flexible response must remain in force as long as there is no more efficient alternative;

Convinced that the 1972 Anti-Ballistic Missile (ABM) Treaty continues to make a fundamental contribution to strategic stability;

Aware that differing interpretations are placed on the forms of research permissible under the terms of the ABM Treaty;

Concerned by evidence of Soviet violations of the ABM Treaty and continued Soviet research in, and modernization of, strategic defence technologies;

Concerned that advanced Soviet surface-to-air missile (SAM) systems may impinge on the ABM Treaty regime;

Recognizing some similarities between anti-satellite (ASAT) and strategic defence technologies; and, therefore,

Concerned that some aspects of advanced future development may undermine the ABM Treaty regime;

Acknowledging the need for the United States to pursue research in defensive technologies as a hedge against a potential Soviet breakout from the ABM Treaty;

Supporting, therefore, the United States' commitment to continue research into strategic defence technology within the provisions of the ABM Treaty;

Welcoming the statement of the United States that their research efforts are not directed towards gaining superiority;

Noting that disagreement exists within the Alliance over the technical and financial feasibility, military utility and political desirability of deployment of large-scale ballistic missile defences;

Convinced that negotiated constraints on offensive and defensive arms represent the preferred means of achieving greater stability;

Welcoming the United States' commitment to consult fully on the Strategic Defense Initiative with its Alliance partners;

Convinced that decisions about the potential development and deployment of defensive systems can only be made after the Alliance partners have been consulted and negotiations with the Soviet Union co-operative solutions have taken place, i.e., that there must be no automatic sequence of research, development and deployment;

Urges member governments of the North Atlantic Alliance:

1. to recognize the close relationship between strict adherence by all parties to existing arms control agreements and the construction of a framework for mutual restraint between East and West;

2. to support every effort to enhance Western security through negotiated limitations and mutually verifiable reductions of offensive nuclear forces;

3. to encourage agreement between the Soviet Union and the United States on the technical definitions of the forms of research permissible under the terms of the ABM Treaty;

4. to ensure that any future arms control regimes covering strategic defence contain provisions which preclude circumvention by advanced ASAT development;

5. to support United States research into strategic defence consistent with the provisions of the ABM Treaty;

6. to assess what forms, if any, of ballistic missile defence would allay fears about "decoupling"and would contribute to the security of the Alliance as a whole;

7. to ensure that any Alliance participation in the Strategic Defense Initiative complies fully with the terms of the ABM Treaty; and

8. to ensure that the aim of extending the transatlantic two-way street must also be pursued with regard to the research efforts by the United States.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. LEVIN of Michigan (at the request of Mr. WRIGHT), for today, on account of a death in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. DREIER of California, for 5 minutes, today.

(The following Members (at the request of Mr. MCKERNAN) to revise and extend their remarks and include extraneous material:)

Mr. GINGRICH, for 60 minutes, today.

Mr. DANNEMEYER, for 60 minutes, October 21.
Mr. DANNEMEYER, for 60 minutes, October 22.
Mrs. BENTLEY, for 10 minutes, October 22.
Mr. DANNEMEYER, for 60 minutes, October 23.
Mr. CRAIG, for 60 minutes, October 23.
Mrs. BENTLEY, for 10 minutes, October 23.
Mr. DANNEMEYER, for 60 minutes, October 24.
Mr. DANNEMEYER, for 60 minutes, October 25.
(The following Members (at the request of Mr. HAYES) to revise and extend their remarks and include extraneous material:)
Mr. GONZALEZ, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. GAYDOS, for 60 minutes, October 23.
(The following Member (at the request of Mr. HOYER) to revise and extend his remarks and include extraneous material:)
Mr. FASCELL, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:
(The following Members (at the request of Mr. MCKERNAN) and to include extraneous matter:)
Mr. SHUSTER in two instances.
Mr. BADHAM.
Mr. GREEN.
Mr. CHENEY.
Mr. LAGOMARSINO in three instances.
Mr. COURTER.
Mr. CLINGER.
Mr. SCHUETTE.
Mr. FISH.
Mr. GALLO.
Mr. FIELDS.
Mrs. JOHNSON in two instances.
Mr. BROOMFIELD.
(The following Members (at the request of Mr. HAYES) and to include extraneous matter:)
Mr. BARNES in two instances.
Mr. YATRON in three instances.
Mr. ROE.
Mr. DYMALLY.
Mr. FASCELL.
Mr. WIRTH.
Mr. TORRICELLI.
Mr. STARK.
Mrs. SCHROEDER in two instances.
Mr. FLORIO.
Mr. HUBBARD.
Mr. RODINO in two instances.
Mr. SMITH of Florida.
Mr. GEPHARDT.
Mr. MATSUI.
Mr. LIPINSKI.
Mr. ECKART of Ohio.
Mr. OBERSTAR.
Ms. MIKULSKI.
Mr. HAYES.
Mr. GARCIA.
Mr. LAFALCE.
Mr. MARKEY.
Mr. FORD of Michigan.

ENROLLED BILL AND JOINT RESOLUTION SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill and joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2174. An act to provide for the transfer to the Colville Business Council of any undistributed portion of amounts appropriated in satisfaction of certain judgments awarded the Confederated Tribes of the Colville Reservation before the Indian Claims Commission.

H.J. Res. 386. Joint resolution to designate November 24, 1985, as "National Day of Fasting to Raise Funds to Combat Hunger."

ADJOURNMENT

Mr. PASHAYAN. Mr. Speaker, I move that the House do now adjourn.
The motion was agreed to; accordingly (at 5 o'clock and 37 minutes p.m.) under its previous order, the House adjourned until Monday, October 21, 1985, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2144. A letter from the Principle Deputy Assistant Secretary of Defense, transmitting a listing of supplemental contract award dates for the period November 1, 1985 to December 31, 1985, pursuant to 10 U.S.C. 139(b); to the Committee on Armed Services.

2145. A letter from the Secretary of Energy, transmitting the annual determination of the viability of the domestic uranium mining and milling industries, pursuant to AEA, section 170B(a) (96 Stat. 2081); jointly, to the Committees on Energy and Commerce and Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DERRICK. Committee on Rules. House Resolution 296. Resolution providing for the consideration of H.R. 3500, a bill to provide for reconciliation pursuant to section 2 of the first concurrent resolution on the budget for the fiscal year 1986. (Rept. 99-310). Referred to the House Calendar.

Mr. HAWKINS. Committee on Education and Labor. H.R. 281. A bill to amend the National Labor Relations Act to increase the stability of collective bargaining in the building and construction industry; with an amendment (Rept. 99-311). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL. Committee on Interior and Insular Affairs. H.R. 1391. A bill to amend the Act of October 15, 1982, entitled "An Act to designate the Mary McLeod Bethune Council House in Washington, District of Columbia, as a national historic site, and for other purposes"; with an amendment (Rept. 99-312). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL. Committee on Interior and Insular Affairs. H.R. 3003. A bill to authorize the Secretary of the Interior to convey certain land located in the State of Maryland to the Maryland-National Capital Park and Planning Commission; with an amendment (Rept. 99-313). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DYMALLY:
H.R. 3578. A bill to provide permanent authority for hearing commissioners in the District of Columbia courts, to modify certain procedures of the District of Columbia Judicial Nomination Commission and the District of Columbia Commission on Judicial Disabilities and Tenure, and for other purposes; to the Committee on the District of Columbia.

By Mr. LENT:
H.R. 3579. A bill to require pipes, solder, and flux in drinking water supply systems to be lead free, and for other purposes; jointly, to the Committees on Energy and Commerce, Banking, Finance and Urban Affairs, and Veterans' Affairs.

By Mr. McCAIN:
H.R. 3580. A bill entitled, the "Indian Economic Development Act of 1985"; jointly, to the Committees on Ways and Means, and Judiciary.

By Mr. McKINNEY:
H.R. 3581. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act to facilitate the issuance of bonds by the District of Columbia; to the Committee on the District of Columbia.

By Mr. SAXTON:
H.R. 3582. A bill to amend title 39 of the United States Code to grant local governments the discretion to assign mailing addresses to sites within their jurisdictions; to the Committee on Post Office and Civil Service.

By Mr. SENSENBRENNER:
H.R. 3583. A bill to amend chapter 209 of title 18, United States Code, to provide for sanctions against foreign countries that do not extradite terrorists to the United States as required by treaty; jointly, to the Committees on Judiciary, Foreign Affairs, and Ways and Means.

By Mr. VANDER JAGT:
H.R. 3584. A bill to modify the boundary of the Sleeping Bear Dunes National Lakeshore, to remove the authority of the Secretary of the Interior to construct and administer scenic roads as part of such National Lakeshore, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. WHITEHURST:

H.R. 3585. A bill to amend the Internal Revenue Code of 1954 with respect to deductions for the payment of certain expenses by members of the uniformed services who receive housing allowances; to the Committee on Ways and Means.

By Mr. WISE:

H.R. 3586. A bill to increase the number of administrative law judges of the Department of Labor who are available to adjudicate cases under the Black Lung Benefits Act, and for other purposes; to the Committee on Education and Labor.

H.R. 3587. A bill to prohibit the recovery of overpayments under the Black Lung Benefits Act from claimants who received such payments through no fault of their own; to the Committee on Education and Labor.

H.R. 3588. A bill to amend the Black Lung Benefits Act to provide for the resumption of benefits to a remarried surviving wife upon the termination of a subsequent marriage; to the Committee on Education and Labor.

H.R. 3589. A bill to amend title XVIII of the Social Security Act to limit Medicare reimbursement to hospitals and other providers of services for legal fees; jointly, to the Committees on Ways and Means, and Energy and Commerce.

By Ms. OAKAR:

H. Con. Res. 218. Concurrent resolution expressing the sense of the Congress that Smithsonian Institution loans and investments in the Republic of South Africa should be terminated; to the Committee on House Administration.

By Mr. GEJDENSON:

H. Res. 297. Resolution expressing the sense of the House of Representatives that the President should invite world leaders to an international conference on terrorism; to the Committee on Foreign Affairs.

By Mr. WATKINS:

H. Res. 298. Resolution establishing an ad hoc Committee on Trade Policy; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII.

273. The SPEAKER presented a memorial of the legislature of the State of California, relative to a Federal Council on Women; to the Committee on Education and Labor.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BURTON of Indiana:

H.R. 3590. A bill for the relief of Joseph W. Newman; to the Committee on the Judiciary.

By Mr. FRANK:

H.R. 3591. A bill for the relief of Alfred Wilson and Sondra Shipley; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 21: Mrs. SCHROEDER.
H.R. 26: Mr. BEDELL.
H.R. 237: Mr. BOULTER.
H.R. 392: Mr. BOUCHER.
H.R. 585: Mr. EVANS of Iowa.
H.R. 1036: Mr. BROOKS.
H.R. 1123: Mr. STRATTON and Mr. MACKAY.
H.R. 1195: Mr. VISCLOSKY.
H.R. 1207: Mr. TORRES, Mr. WISE, Mr. BREAUX, Mr. EDWARDS of Oklahoma, Mr. GEPHARDT, Mr. GORDON, Mr. GROTBERG, Mr. JONES of Oklahoma, Mr. LEVIN of Michigan, Mr. MAVROULES, Mr. MONTGOMERY, Mr. ROSE, Mr. SKELTON, and Mr. SPRATT.
H.R. 1348: Mr. BONIOR of Michigan and Mr. HOYER.
H.R. 1356: Mr. MURPHY, Mr. HOWARD, Ms. MIKULSKI, Mr. PENNY, Mr. JEFFORDS, Mr. WEAVER, Mr. LAGOMARSINO, Mr. ATKINS, Mr. WOLF, Mr. DOWDY of Mississippi, Mr. BRYANT, Mr. DAVIS, Mr. CHANDLER, Mr. SAVAGE, Mr. BOEHLERT, and Mr. EVANS of Illinois.
H.R. 1375: Mr. KLECZKA.
H.R. 1398: Mr. MURPHY.
H.R. 1436: Mr. TALLON, Mr. GREGG, and Mr. MCKERNAN.
H.R. 1538: Mr. SUNIA and Mr. RICHARDSON.
H.R. 1704: Mr. BEREUTER.
H.R. 2440: Mr. QUILLEN and Mr. SUNIA.
H.R. 2570: Mr. WEISS.
H.R. 2578: Mr. BUSTAMANTE, Mr. FLIPPO, Mr. MADIGAN, Mr. NEAL, Mr. SCHEUER, and Mr. SUNIA.
H.R. 2684: Mr. BLILEY, Mrs. LONG, Mr. TRAFICANT, Mr. HUCKABY, Mr. GARCIA, and Mr. MORRISON of Washington.
H.R. 2854: Mr. GORDON.
H.R. 2879: Mr. ST GERMAIN.
H.R. 2961: Mr. BURTON of Indiana.
H.R. 2971: Mr. DYSON.
H.R. 3048: Mr. HUGHES, Mr. DYMALLY, Mr. WRIGHT, Mr. LANTOS, Mr. LEVIN of Michigan, Mr. TORRES, Mr. WEISS, Mr. OWENS, and Mr. FRANK.
H.R. 3172: Mr. FLORIO.
H.R. 3197: Mr. MCCANDLESS.
H.R. 3198: Mr. MCCANDLESS.
H.R. 3232: Mr. DEWINE.
H.R. 3280: Mr. BILIRAKIS and Mr. FIELDS.
H.R. 3404: Mr. RODINO, Mr. LEVINE of California, Mr. CHAPPIE, Mr. STRANG, Mr. MITCHELL, Ms. KAPTUR, Mr. KOSTMAYER, Mr. BRYANT, Mr. ECKART of Ohio, Mr. MORRISON of Connecticut, Mr. TRAFICANT, and Mr. MCGRATH.
H.R. 3415: Mr. ADDABBO, Mr. BOLAND, Mr. BONER of Tennessee, Mrs. BOXER, Mr. CROCKETT, Mr. DANIEL, Mr. DE LA GARZA, Mr. DORNAN of California, Mr. DYSON, Mr. FAZIO, Mr. FORD of Michigan, Mr. FROST, Mr. FRENZEL, Mr. GUARINI, Mr. HENRY, Mr. KANJORSKI, Mr. KOLBE, Mr. LEVIN of Michigan, Mrs. LONG, Mr. LOWERY of California, Mr. MADIGAN, Mr. MATSUI, Mr. MITCHELL, Mr. MONSON, Mr. MORRISON of Connecticut, Mr. MURPHY, Mr. NEAL, Mr. PARRIS, Mr. PRICE, Mr. RODINO, Mr. ROE, Mr. STUMP, Mr. SUNIA, Mr. WHITEHURST, and Mr. WORTLEY.
H.R. 3438: Mr. JEFFORDS, Mr. GUNDERSON, Mr. ECKART of Ohio, and Mr. BRUCE.
H.R. 3448: Mr. LUNDINE.
H.R. 3456: Mr. SIKORSKI.
H.R. 3510: Mr. SUNIA, Mr. MARKEY, Mr. BEILENSON, Mr. MILLER of California, Mr. SCHEUER, Mr. ANDREWS, Mr. DIXON, Mr. KASTENMEIER, Mr. TRAFICANT, Mr. HAYES, Mr. STARK, Mr. MURPHY, and Mr. LIGHTFOOT.
H.R. 3515: Mr. STALLINGS.
H.R. 3562: Mr. CLINGER, Mr. HANSEN, and Mr. LAGOMARSINO.
H.R. 3565: Mr. DORNAN of California, Mr. LAGOMARSINO, Mr. DENNY SMITH, Mr. DANIEL, Mr. LOWERY of California, Mr. LIVINGSTON, Mr. WORTLEY, Mr. ARMEY, and Mr. DYSON.
H.J. Res. 7: Mr. HUGHES, Mr. BLILEY, Mr. SILJANDER, Mr. SAXTON, and Mr. MCCOLLUM.
H.J. Res. 122: Mr. GINGRICH, Mr. LANTOS, Mr. LEVINE of California, Mrs. LONG, Mr. LUKEN, Mr. MORRISON of Washington, Mr. NATCHER, Mr. PORTER, Mr. RAHALL, Mr. SNYDER, and Mr. TRAFICANT.
H.J. Res. 126: Mr. GAYDOS, Mr. MACK, Mr. HOWARD, Mr. DONNELLY, Mr. DYMALLY, Mr. EMERSON, Mr. BOULTER, Mr. RALPH M. HALL, Mr. BROWN of California, Mr. DOWDY of Mississippi, Mr. BOSCO, Mr. ALEXANDER, Mr. ACKERMAN, Mr. CARPER, Mr. FAZIO, Mr. FRENZEL, Mr. FOLEY, Mr. BOLAND, Mr. LENT, Mr. CALLAHAN, Mr. LEACH of Iowa, Mr. HEFNER, Mr. HANSEN, Mr. MARTIN of New York, Mr. DYSON, Mrs. LLOYD, Mr. DINGELL, Mrs. BYRON, Mr. DANIEL, Mr. CAMPBELL, Mr. WILSON, Mr. BARTLETT, Mr. LEHMAN of Florida, and Mr. MOAKLEY.
H.J. Res. 133: Mr. LEHMAN of California.
H.J. Res. 234: Mr. CONTE, Mr. LOWRY of Washington, Mr. GORDON, and Mr. KOSTMAYER.
H.J. Res. 316: Mr. BURTON of Indiana, Mr. BENNETT, Mr. HAMMERSCHMIDT, Mr. MURPHY, Mr. REID, Mr. HAMILTON, Mr. IRELAND, Mr. KEMP, Mr. GONZALEZ, Mr. ROE, Mr. WILSON, Mr. THOMAS of Georgia, Mr. DAUB, Mr. MILLER of California, Mr. LIPINSKI, Mr. PERKINS, Mr. STUMP, Mr. BROWN of Colorado, Mr. WYDEN, Mr. STARK, Mr. BEILENSON, Mr. HATCHER, Mr. HOWARD, Mr. BEDELL, Mr. LEWIS of California, Mr. ANTHONY, Mr. CONTE, Mr. STALLINGS, Mr. MORRISON of Washington, Mr. SIKORSKI, Mr. FRENZEL, Mr. DELLUMS, Mr. RINALDO, Mr. BOSCO, Mr. CHENEY, Mr. BONIOR of Michigan, Mr. KASICH, Mr. ANDERSON, Mr. TORRES, Ms. KAPTUR, Mr. WEISS, and Mrs. KENNELLY.
H.J. Res. 319: Mr. MOORHEAD, Mr. HENRY, Mr. OWENS, Mr. LOWRY of Washington, Mr. HORTON, Mr. ROWLAND of Georgia, Mr. GALLO, Mr. MARTIN of New York, Mr. DIXON, Mr. DANIEL, Mr. DWYER of New Jersey, Mr. ROE, Mr. KOSTMAYER, Mr. LEWIS of California, Mr. CHAPPELL, Mr. JONES of North Carolina, Mr. GUARINI, Mr. DAUB, Mr. HEFTEL of Hawaii, Mr. BARNES, Mr. ROSE, Mr. FASCELL, Mr. BONER of Tennessee, Mr. FUSTER, Mr. DE LA GARZA, Mr. WOLF, Mr. WORTLEY, Mr. ECKERT of New York, Mr. FRANK, Mr. RAHALL, Mr. TORRICELLI, Mr. LAGOMARSINO, Mr. CARPER, Ms. OAKAR, Mr. YOUNG of Missouri, Mr. SMITH of Florida, Mr. WIRTH, Mr. FAZIO, Mr. BRYANT, Mr. COOPER, Mrs. JOHNSON, Mr. CROCKETT, Mr. BOUCHER, Ms. KAPTUR, Mr. WEISS, Mr. BERMAN, Mr. SCHUMER, Mr. STRATTON, Mrs. HOLT, Mr. LAFALCE, Mrs. BOXER, Mr. MOLLOHAN, Mr. DEWINE, Mr. WAXMAN, Mr. CONYERS, Mr. MORRISON of Connecticut, Mrs. BURTON of California, Mr. SHUMWAY, Mr. BROOKS, Mr. EVANS of Illinois, Mr. HUGHES, Mrs. ROUKEMA, Mr. RALPH M. HALL, Mr. LEVIN of Michigan, Mr. BEVILL, Mr. FISH, and Mr. OLIN.
H.J. H. Res. 268: Mr. HENRY, Mr. SHUMWAY, Mr. VALENTINE, Mr. CHAPPELL, Mrs. ROUKEMA, Mr. SMITH of New Jersey, Mr. LUJAN, and Mr. MARTIN of New York.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3500

By Mr. FLORIO:

—Page 412, after line 16, insert the following new subtitle:

Subtitle H—Amtrak

SEC. 4801. AUTHORIZATION OF APPROPRIATIONS.

(a) AUTHORIZATION.—Section 601(b)(2) of the Rail Passenger Service Act (45 U.S.C. 601(b)(2)) is amended—

(1) in subparagraph (A) by striking out "and" after "403(b) of this Act;";

(2) in subparagraph (B) by striking out the period and inserting in lieu thereof "; and"; and

(3) by adding at the end the following new subparagraphs:

"(C) not to exceed $603,500,000 for the fiscal year ending September 30, 1986.".

(b) LIMITATION.—Such section 601(b) is further amended by adding at the end a new paragraph as follows:

"(5) Unless sufficient funds are otherwise available to operate the Corporation's rail system at substantially the same level of service, maintenance, and equipment overhauls in effect on the date of the enactment of this paragraph, funds appropriated to or for the benefit of the Corporation under this section before the date of the enactment of this paragraph which the Corporation has designated for nonoperational capital projects shall be used as necessary to maintain the operations of the system at such level.".

SEC. 4802. STUDY COMMISSION.

(a) ESTABLISHMENT.—There is established a commission to be known as the National Railroad Passenger Corporation Financial Status Commission (hereafter in this subtitle referred to as the "Commission").

(b) PURPOSE OF COMMISSION.—The purpose of Commission is to study—

(1) the ability of the National Railroad Passenger Corporation (hereafter in this subtitle referred to as "Amtrak") to continue to improve, or to accelerate the improvement of, its financial performance;

(2) the short-term and long-term capital needs of Amtrak; and

(3) alternative funding mechanisms for Amtrak.

(c) MEMBERSHIP.—

(1) NUMBER AND APPOINTMENT.—The Commission shall be composed of seventeen members as follows:

(A) Two State legislators appointed by the National Conference of State Legislators, one from the area comprised of Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, and the District of Columbia, and one from outside such area.

(B) Two members of the National Association of Railroad Passengers appointed by the President of such Association; one who lives in the area comprised of Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, and the District of Columbia, and one who lives outside such area.

(C) A Member of the United States Senate appointed by the President pro tempore of the Senate.

(D) A Member of the United States House of Representatives appointed by the Speaker of the House.

(E) A State transportation official from a State financially participating in the program established under section 403(b) of the Rail Passenger Service Act, appointed by the Executive Director of the National Conference of State Railway Officials (NCSRO).

(F) A State transportation official from a State not participating in the program established under section 403(b) of the Rail Passenger Service Act, appointed by the Executive Director of the National Conference of State Railway Officials (NCSRO).

(G) A representative of the Department of Transportation designated by the Secretary of Transportation.

(H) A person appointed by the Railroad Labor Executives Association.

(I) A representative of freight railroads appointed by the Association of American Railroads or its successor.

(J) Two commuter authorities, as such term is defined for purposes of the Rail Passenger Service Act, appointed by the American Public Transit Association; one that operates exclusively within the area comprised of Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, and the District of Columbia and one that operates exclusively outside such area.

(K) A person from the private sector, appointed by the President, with no financial interest in Amtrak or any competing mode of transportation.

(L) A representative of the passenger bus industry appointed by the President.

(M) A representative of Amtrak appointed by the President of Amtrak.

(N) A representative of the Office of Management and Budget appointed by the Director of such Office.

(2) SELECTION.—The members of the Commission shall be selected in accordance with paragraph (1) within sixty days after the date of enactment of this Act.

(3) EXPENSES.—Members of the Commission shall each be reimbursed actual expenses incurred in the actual performance of duties vested in the Commission.

(4) QUORUM.—Nine members of the Commission shall constitute a quorum, but a lesser number may hold hearings.

(5) CHAIRMAN.—The Chairman of the Commission shall be elected by the members of the Commission from among such members.

(6) ORGANIZATION MEETING.—The members of the Commission shall hold their first meeting for the purpose of organizing the Commission and electing a Chairman under paragraph (4) within ninety days after the date of enactment of this Act.

(7) All meetings of the Commission shall be open to the public.

(d) STAFF OF COMMISSION.—

(1) STAFF.—Subject to such rules as may be prescribed by the Commission, the Chairman may appoint such personnel as the Chairman considers appropriate.

(2) APPLICABILITY OF CERTAIN CIVIL SERVICE LAWS.—The staff of the Commission shall be appointed subject to the provisions of title 5, United States Code, governing appointments in the competitive service, and shall be paid in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates.

(3) EXPERTS AND CONSULTANTS.—Subject to such rules as may be prescribed by the Commission, the Chairman may procure temporary and intermittent service under section 3109(b) of title 5, United States Code.

(4) STAFF OF FEDERAL AGENCIES.—Upon request of the Commission, the head of any Federal agency is authorized to detail, or a reimbursable basis, any of the personnel of such agency to the Commission to assist the Commission in carrying out its duties under this subtitle.

(e) POWERS OF COMMISSION.—

(1) HEARINGS AND SESSIONS.—The Commission, or, if so authorized by the Commission, any three members of the Commission,

may, for the purpose of carrying out this subtitle, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Commission considers appropriate. The Commission may administer oaths or affirmations to witnesses appearing before it.

(2) OBTAINING OFFICIAL DATA.—The Commission may secure directly from any department or agency of the United States information necessary to enable it to carry out this subtitle. Upon request of the Chairman of the Commission, the head of such department or agency shall furnish such information to the Commission.

(3) MAILS.—The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(4) ADMINISTRATIVE SUPPORT SERVICES.—The Administrator of General Services shall provide to the Commission on a reimbursable basis such administrative support services as the Commission may request.

(f) REPORT.—The Commission shall transmit to the Congress a report not later than March 30, 1986. The report shall contain a detailed statement of the findings and conclusions of the Commission, together with its recommendations for such legislation as it considers appropriate.

(g) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated for the purpose of carrying out this section not to exceed $1,000,000 for the fiscal year ending September 30, 1986, to remain available until expended.

SEC. 4803. CAPITAL ASSETS.

Section 304(c) of the Rail Passenger Service Act (45 U.S.C. 544(c)) is amended by adding at the end thereof the following new paragraph:

"(3) The preferred stock issued pursuant to paragraphs (1) and (2) of this subsection shall be deemed to have been issued as of the date of receipt by the Corporation of the funds for which such stock is issued.".

SEC. 4804. GOVERNMENT TRAVEL.

Section 306(f) of the Rail Passenger Service Act (45 U.S.C. 546(f)) is amended by inserting ", which shall include allowing the Corporation to participate in the contract air program administered by the General Services Administration in markets where service provided by the Corporation is competitive as to rates and total trip times" before the period.

SEC. 4805. REPORT CONSOLIDATION.

Section 308(a) of the Rail Passenger Service Act (45 U.S.C. 548(a)) is amended to read as follows:

"(a) The Corporation shall submit to the Congress a report not later than February 15 of each year. The report shall include, for each route on which the Corporation operated intercity rail passenger service during the preceding fiscal year, data on ridership, passenger miles, short-term avoidable profit or loss per passenger mile, revenue-to-cost ratio, revenues, the Federal subsidy, the non-Federal subsidy, and on-time performance.".

SEC. 4806. CHARTER TRAINS.

Section 402 of the Rail Passenger Service Act (45 U.S.C. 562) is amended:

(1) by repealing subsection (g); and

(2) by redesignating subsection (h) as subsection (g).

SEC. 4807. MISCELLANEOUS AMENDMENTS.

(a) AUDITS.—Section 805 of the Rail Passenger Service Act (45 U.S.C. 644) is amended:

(1) in subsection (2)(A) by striking out "shall conduct annually a" in the first sentence and inserting in lieu thereof "may conduct"; and

(2) in subsection (2)(A) and (2)(B) by striking "audit" wherever it appears and inserting in lieu thereof "audits".

(b) REPEAL OF STUDIES AND REPORTS.—Sections 306(k), 806, 810, and 811 of the Rail Passenger Service Act (45 U.S.C. 546(k), 645, 649, and 650) are repealed.

(c) EMERGENCY ASSISTANCE.—Title VII of the Rail Passenger Service Act (45 U.S.C. 621 and 622) is repealed.

(d) NORTHEAST CORRIDOR REPORTS.—Section 703(1)(D) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 853(1)(D)) is repealed, effective October 1, 1986.

(e) PERFORMANCE EVALUATION CENTER.—Section 305(1) of the Rail Passenger Service Act (45 U.S.C. 545(1)) is repealed.

SEC. 4808. REVENUE-COST RATIO.

Section 404(c)(4)(A) of the Rail Passenger Service Act (45 U.S.C. 564(c)(4)(a)) is amended by adding at the end the following new sentence: "Commencing in fiscal year 1986, the Corporation shall set a goal of recovering an amount sufficient that the ratio of its revenues, including contributions from States, agencies, and other persons, to costs, excluding capital costs, shall be at least 61 percent.

SEC. 4809. LABOR-RELATED COST SAVINGS.

Amtrak and the representatives of employees of Amtrak shall negotiate changes in existing agreements between such parties that will result in substantial cost savings to Amtrak, and shall report the results of such negotiations to the Congress within six months after the date of enactment of this Act.

SEC. 4810. ROUTE DISCONTINUANCE.

(a) PROHIBITION.—Amtrak shall not, by reason of any provision of this subtitle, including section 4801, reduce the frequency of service on any line on which, as of May 1, 1985, three or fewer trains operate per week.

SEC. 4811. UNSAFE FACILITIES.

Title VIII of the Rail Passenger Service Act (45 U.S.C. 641 et seq.) is amended by adding at the end the following new section:

"SEC. 812. UNSAFE FACILITIES.

"(a) The Corporation, or the owner of any facility which presents a danger to the employees, passengers, or property of the Corporation, may petition the Secretarty for assistance to the owner of such facility for relocation or other remedial measures to minimize or eliminate such danger under this section.

"(b) If the Secretary determines that—

"(1) a facility which is the subject of a petition under subsection (a) presents a danger of death or serious injury to any employee or passenger of the Corporation or serious damage to any property of the Corporation; and

"(2) the owner of such facility should not be expected to bear the cost of relocating or other remedial measures necessary to minimize or eliminate such danger, the Secretary shall recommend to the Congress that the Congress, as a part of its periodic reauthorizations of this subtitle, authorize funding, by reimbursement or otherwise, for such relocation or other remedial measures.

"(c) Petitions may be submitted under subsection (a) of this section with respect to any relocation or remedial measures undertaken on or after January 1, 1978.".

SEC. 4812. EMPLOYMENT VACANCY FILING.

(a) LIABILITY.—Section 704(c) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 797c(c)) is amended—

(1) by inserting "(1)" after "VACANCY NOTICES.—"; and

(2) by adding at the end a new paragraph as follows:

"(2)(A) As soon as the Board becomes aware of any failure on the part of a railroad to comply with paragraph (1), the Board shall issue a warning to such railroad of its potential liability under subparagraph (B).

"(B) Any railroad failing to comply with paragraph (1) of this subsection after being warned by the Board under subparagraph (A) shall be liable for a civil penalty in the amount of $1,000 for each vacancy with respect to which such railroad has so failed to comply.".

(b) EXTENSION.—Section 704(f) of such Act (45 U.S.C. 797c(f)) is amended by striking out "4-year" and inserting in lieu thereof "6-year".

(c) EFFECTIVE DATES.—The amendments made by subsection (a) shall take effect on the date of enactment of this Act, and the amendment made by subsection (b) shall be effective as of August 1, 1985.

SEC. 4813. TRANSPORTATION OF UNOCCUPIED VEHICLES.

Section 103(3) of the Rail Passenger Service Act (45 U.S.C. 502(3)) is amended by inserting ", and, when space is available, of unoccupied vehicles" after "and their occupants".

SEC. 4814. RAIL EMPLOYEE TAXES.

Section 11504(a) of title 49, United States Code, is amended by adding at the end of the following new paragraph:

"(3) No part of the compensation paid by a rail carrier providing transportation subject to the jurisdiction of the Interstate Commerce Commission under subchapter I of chapter 105 of this title to an employee who performs his regular assigned duties as such an employee on a railroad in more than one State, shall be subject to the income tax laws of any State or subdivision thereof other than a State or subdivision thereof described in paragraph (2) of this subsection."

By Mr. LATTA:

—Strike out title II (page 5, line 7, through page 231, line 22) and insert in lieu thereof the following:

TITLE II—COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS

SEC. 2001. SHORT TITLE.

This title may be cited as the "Housing and Community Development Reconciliation Act of 1985".

SEC. 2002. COMMUNITY DEVELOPMENT BLOCK GRANT LOAN GUARANTEE PROGRAM MORATORIUM

Section 108(a) of the Housing and Community Development Act of 1974 is amended by striking out the last sentence and inserting in lieu thereof the following: "The Secretary may not enter into any commitment to guarantee a note or obligation under this section during fiscal year 1986.".

SEC. 2003. CANCELLATION OF OUTSTANDING PUBLIC HOUSING DEVELOPMENT LOANS AND OBLIGATIONS.

Section 4 of the United States Housing Act of 1937 is amended by adding at the end thereof the following new subsection:

"(c)(1) At such times as the Secretary may determine, and in accordance with such accounting and other procedures as the Secretary may prescribe, each loan made by the

Secretary under subsection (a) that has any principal amount outstanding or any interest amount outstanding or accrued shall be forgiven; and the terms and conditions of any contract, or any amendment to a contract, for such loan with respect to any promise to repay such principal and interest shall be canceled. Such cancellation shall not affect any other terms and conditions of such contract, which shall remain in effect as if the cancellation had not occurred. This paragraph shall not apply to any loan the repayment of which was not to be made using annual contributions, or to any loan all or part of the proceeds of which are due a public housing agency from contractors or others.

"(2)(A) On the date of the enactment of the Housing and Community Development Reconciliation Act of 1985, each note or other obligation issued by the Secretary to the Secretary of the Treasury pursuant to subsection (b), together with any promise to repay the principal and unpaid interest that has accrued on each obligation, shall be forgiven; and any other term or condition specified by each such obligation shall be canceled.

"(B) On September 30, 1986, and on any subsequent September 30, each such note or other obligation issued by the Secretary pursuant to subsection (b) during the fiscal year ending on such date, together with any such promise to repay, shall be forgiven; and any other term or condition specified by each such obligation shall be canceled.".

SEC. 2004. PUBLIC HOUSING OPERATING SUBSIDIES.

Section 9(c) of the United States Housing Act of 1937 is amended to read as follows:

"(c) There is authorized to be appropriated to carry out the provisions of this section $1,279,000,000 for fiscal year 1986.".

SEC. 2005. RURAL HOUSING PROGRAM AUTHORIZATIONS.

(a) INSURANCE AND GUARANTEE AUTHORITY.—Section 513(a)(1) of the Housing Act of 1949 is amended to read follows:

"(a)(1) The Secretary may, to the extent approved in appropriation Acts, insure and guarantee loans under this title during fiscal year 1986 in an aggregate amount not to exceed $2,266,000,000 as follows:

"(A) for insured or guaranteed loans under section 502 on behalf of borrowers receiving assistance under section 521(a)(1), $1,328,000,000;

"(B) for loans under section 504, $17,000,000;

"(C) for insured loans under section 514, $20,000,000;

"(D) for insured loans under section 515, $900,000,000; and

"(E) for site loans under section 524, $1,000,000.".

(b) RENTAL ASSISTANCE PAYMENT CONTRACTS.—Section 513(c) of the Housing Act of 1949 is amended to read as follows:

"(c) The Secretary, to the extent approved in appropriation Acts for fiscal year 1986, may enter into rental assistance payment contracts under section 521(a)(2)(A) aggregating $198,000,000. Such authority as is approved in appropriation Acts shall be used by the Secretary to renew rental assistance payment contracts that expire during such fiscal year and to make additional rental assistance payment contracts for existing or newly constructed dewelling units.".

SEC. 2006. MANAGEMENT OF INSURED AND GUARANTEED RURAL HOUSING LOANS.

(a) SALE OF INSURED AND GUARANTEED LOANS TO PUBLIC.—Section 517(c) of the Housing Act of 1949 is amended by adding at the end thereof the following new sentence: "Any loan made and sold by the Secretary under this section after the date of the enactment of the Housing and Community Development Reconciliation Act of 1985 (and any loan made by other lenders under this title that is insured or guaranteed in accordance with this section, is purchased by the Secretary, and is sold by the Secretary under this section after such date) shall be sold to the public and may not be sold to the Federal Financing Bank, unless such sale to the Federal Financing Bank is required to service transactions under this title between the Secretary and the Federal Financing Bank occurring on or before such date.".

(b) INTEREST SUBSIDY ON INSURED AND GUARANTEED LOANS OFFERED FOR SALE TO PUBLIC.—Section 517(d) of the Housing Act of 1949 is amended—

(1) by inserting "(1)" after the subsection designation; and

(2) by adding at the end thereof the following new paragraph:

"(2) Each loan made by the Secretary or other lenders under this title that is insured or guaranteed in accordance with this subsection shall, when offered for sale to the public, be accompanied by an agreement by the Secretary to pay to the holder of such loan (through an agreement to purchase such loan or through such other means as the Secretary determines to be appropriate) the difference between the rate of interest paid by the borrower of such loan and the market rate of interest (as determined by the Secretary) on obligations having comparable periods to maturity on the date of such sale.".

(c) PROTECTION OF BORROWERS UNDER LOANS SOLD TO PUBLIC.—Section 517(d) of the Housing Act of 1949, as amended by subsection (b) of this section, is amended by adding at the end thereof the folowing new paragraph:

"(3) Each loan made by the Secretary or other lenders under this title that is insured or guaranteed in accordance with this subsection shall, when offered for sale to the public, be accompanied by agreements for the benefit of the borrower under the loan that provide that—

"(A) the purchaser or any assignee of the loan shall not diminish any substantive or procedural right of the borrower arising under this title;

"(B) upon any default of the borrower, the loan shall be assigned to the Secretary for the purpose of avoiding foreclosure; and

"(C) following any assignment under subparagraph (B) and before commencing any action to foreclose or otherwise dispossess the borrower, the Secretary shall afford the borrower all substantive and procedural rights arising under this title, including consideration for interest subsidy, moratorium, reamortization, refinancing, and appeal of any adverse decision to an impartial officer.".

Page 437, line 8, through page 451, line 10, strike out subtitle E.

Page 460, line 17, through page 462, line 4, strike out section 6606.

Page 465, strike line 3, and all that follows thereafter through page 468, line 25, and insert in lieu thereof the following:

SEC. 7101. PAY ADJUSTMENTS.

(a) FISCAL YEAR 1986.—(1) The rates of pay under the General Schedule and the rates of pay under the other statutory pay systems referred to in section 5301(c) of title 5, United States Code, shall not be adjusted under section 5305 of such title during fiscal year 1986.

(2) Notwithstanding any other provision of law, the wage schedules and rates of pay for prevailing rate employees described in section 5342(a)(2) of title 5, United States Code (including employees covered under section 9(b) of Public Law 92-392 (86 Stat. 574; 5 U.S.C. 5342 note) and section 704(b) of Public Law 95-454 (92 Stat. 1218; 5 U.S.C. 5343 note)), and for officers and members of crews of vessels shall not be increased under the provisions of subchapter IV of chapter 53 of title 5, United States Code, or any other applicable provision of law as a result of a wage survey or negotiation during fiscal year 1986, except to the extent permitted by section 616(a)(2) of the conference report on H.R. 5798, agreed to by the House of Representatives on September 12, 1984, as contained in House Report 98-993 (referred to in Public Law 98-473, 98 Stat. 1963).

(b) REDUCTIONS FOR FISCAL YEARS 1987 AND 1988.—(1) For fiscal years 1987 and 1988, the President shall provide for the adjustment of rates of pay under section 5305 of title 5, United States Code, as appropriate to reduce outlays, relating to pay of officers and employees of the Federal Government, by at least $746,000,000 in fiscal year 1987 and $1,264,000,000 in fiscal year 1988 (without regard to reductions in outlays which result by reason of subsections (a), (c), and (d) of this section and the application of section 1009 of title 37, United States Code), computed using the baseline used for the First Concurrent Resolution on the Budget for Fiscal Year 1986 (S. Con. Res. 32, 99th Congress, 1st Session), agreed to on August 1, 1985.

(2) Paragraph (1) shall not be construed to suspend the requirements of section 5305 of title 5, United States Code, with respect to fiscal years 1987 and 1988.

(c) 90-DAY DELAY IN PAY INCREASES FOR PREVAILING RATE EMPLOYEES.—Notwithstanding any other provision of law, any adjustment in a wage schedule or rate of pay that—

(1) applies to—

(A) a prevailing rate employee described in section 5342(a)(2) of title 5, United States Code, including employees covered under section 9(b) of Public Law 92-392 (86 Stat. 574; 5 U.S.C. 5342 note) and section 704(b) of Public Law 95-454 (92 Stat. 1218; 5 U.S.C. 5343 note), or

(B) to an employee covered by section 5348 of such title,

(2) results from a wage survey or negotiation, and

(3) would take effect, but for this subsection, on or after October 1, 1986,

shall not take effect until the first day of the first applicable pay period beginning not less than 90 days after the day on which such adjustment would, but for this subsection, otherwise have taken effect. The Office of Personnel Management shall take such actions as may be necessary to carry out this subsection.

(d) NEW EFFECTIVE DATE FOR PAY ADJUSTMENTS UNDER STATUTORY PAY SYSTEMS.—(1) Section 5305 of title 5, United States Code, is amended—

(A) in subsection (a)(2), by striking out "October 1 of the applicable year" and inserting in lieu thereof "January 1 of the next year after the date the report is submitted to the President";

(B) in subsection (c)(2), by striking out "October 1 of the applicable year" and inseting in lieu thereof "January 1 of the next

year after the year in which the alternative plan is transmitted to the Congress"; and

(C) in subsection (m), by striking out "October 1" and inserting in lieu thereof "the applicable January 1".

SENATE—*Thursday, October 17, 1985*

(Legislative day of Tuesday, October 15, 1985)

The Senate met at 8 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Eternal God of truth and justice, we thank Thee for the rare privilege of being a part of the U.S. Senate. Very few Americans have this uncommon opportunity. Very few Americans enjoy the confidence and trust of the multitudes who, by their vote, send men and women here to represent them. Help this tiny minority never to forget that they are part of a very select elite. But save them, Lord, from the spirit of elitism and arrogance which seems so easily to infect some who become part of such an exclusive group. Protect them from the insidious corrupting influence of power.

All of us who work here realize that we are part of a small minority who have the privilege of being here in any capacity. We thank Thee, Lord, for this place of trust. Help us never to be guilty of motives or actions which betray that trust. Give us grace that we may privately and publicly conduct ourselves in ways worthy of this stewardship. Help us all to make this a place where truth and justice are served, to the glory and honor of God. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished acting majority leader is recognized.

SCHEDULE

Mr. SIMPSON. Mr. President, at this hour of convening, we have 10 minutes each for the two leaders under the standing order. There will be routine morning business, not to extend beyond 8:30 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

At 8:30 a.m., it will be the intention of the majority leader to proceed to the consideration of H.R. 3038, the HUD appropriations bill.

At 12:30, there will be special orders in favor of the following Senators for not to exceed 15 minutes each: Senators WALLOP, QUAYLE, HATCH, and HELMS.

At 1:30 p.m., the Senate will resume consideration of H.R. 3038, the HUD appropriations bill.

At some point during the day, the Senate will proceed to the consideration of S. 1730, the reconciliation bill. Votes will not occur prior to 11 a.m. today, and votes will be expected during the remainder of today's session.

I might indicate to our colleagues that very likely we will continue into the evening today with our activities because we have much to do, and all Members should consider that this will be a late evening of activity.

There will be a session tomorrow and voting tomorrow.

THE CHAPLAIN'S PRAYER

Mr. SIMPSON. Mr. President, I should like to make a comment about the prayer of our fine Chaplain.

Again, he does probe to the very essence of this fascinating place in which we are all very honored to serve—a rather fortunate minority within the country, the 100 of us who do our work here.

He talked about ego and those things that sometimes guide us. I think of the remarks made to me by the dean of this body, our senior Member, Senator STENNIS, who reflected to me in my first months here, in good counsel. He said: "Always remember this in the Senate—and I have watched for years—some grow and some swell."

I have never forgotten that, and I have met both categories here. I see that the Senator from Wisconsin knows both categories here. Indeed, Senator STENNIS is right. It is more fun to work with those who grow.

Mr. President, I reserve the remainder of the time for the majority leader, and I yield to the acting Democratic leader, Senator PROXMIRE.

RECOGNITION OF THE ACTING DEMOCRATIC LEADER

The PRESIDENT pro tempore. The distinguished acting Democratic leader is recognized.

Mr. PROXMIRE. I thank the Chair.

A SWELL PERFORMANCE

Mr. PROXMIRE. Mr. President, I could say that my good friend ALAN SIMPSON is a swell guy, but I do not mean to play on the words he told us about. He certainly has grown and not swollen.

Yesterday, he showed that he is the Leonardo da Vinci of the Senate. He was a one-man band. I have seen a one-man band before, but not a one-man parliamentary performer. He presided, he was the acting majority leader, and he handled everything very well. He did not argue with himself, but except for that he was perfect.

NOBEL PRIZE TO MODIGLIANI HIGHLIGHTS NEED FOR SAVINGS POLICY

Mr. PROXMIRE. Mr. President, the most recent Nobel Prize in Economics was announced Wednesday, October 16. It has gone to a professor at MIT, in Massachusetts, who developed the theory that savings is directly related to the instant income of the saver, to the expected income of that saver over his lifetime, and to the duration of his life expectancy. The winner was MIT Prof. Franco Modigliani.

The Modigliani theory has a very big implication for economic policy, especially now. The latest statistical release on savings in America discloses that they have dropped to only 2.5 percent of after-tax income, the lowest savings rate since statistics have been kept.

This drop in savings coincides with a massive increase in borrowing by the Federal Government, by corporations, and by individuals, totaling—get this figure—a shocking $7 trillion. The drop is savings and the increase in borrowing has forced this country to become a debtor, and an increasingly big debtor, to foreigners who have far better savings rates. It has also persuaded the Federal Reserve to increase the money supply many times faster than the increase in the real gross national product. That is another way of saying that this country is meeting its borrowing needs by printing money.

What has the Modigliani theory of savings—so spectacularly validated by the Nobel Prize—to do with all this? Plenty. Modigliani's theory helps us to see what Congress should consider doing to bring this dangerous disequilibrium between the mountain of debt and the little anthill of savings into some kind of balance.

Most congressional action has properly focused on one part of this complicated situation. We have considered how to bring debt down and only how to bring the Federal debt down. We

have taken only a hesitant, limited step to reduce Federal borrowing by adopting procedures that will force Congress a little more effectively than in the past to reduce spending or increase taxes or do both. We have done nothing to encourage a reduction in corporate or individual borrowing. Is that a significant oversight? Yes, indeed. Corporate and individual borrowing exceed Federal borrowing by a rate of two to one. Furthermore, both individual and corporate borrowing are growing very fast, indeed.

We have taken some steps through tax incentives to encourage savings, but obviously the savings statistics speak loud and clear that these steps have not achieved their purpose. Think of it. American savings are at an all-time low as a percentage of income. So, if we follow Modigliani's now-celebrated theory, since he just received the Nobel Prize, what do we do about it? Let us consider where the Modigliani theory leads us. First, he reaffirms a simple truism. The higher a person's income, the more likely he is to save. We know that, but we also know that people are saving less now than ever. Personal income has risen to an all-time high; yet they are saving less.

Second, Modigliani finds that the longer that life expectancy is extended, the more people save for their later age. Certainly life expectancy in America has increased spectacularly in recent years. But the savings rate has dropped. Is Modigliani wrong? No. Modigliani found that saving for the future depends on the expectation of income in later years.

Fifty years ago, the savings rate in America was higher, for a conspicuous reason. It was because people expected that as they advanced in age their income would fall very sharply. In most cases, when they retired from their lifetime work, their income would all but disappear. Is that true today? No. Today, the overwhelming majority of retired elderly people receive Social Security benefits when they retire. Those benefits have been consistently increased in past years. Social Security now provides for a retirement with dignity which a majority of Americans of all ages have repeatedly approved in competent professional polls. This Senator enthusiastically approves these benefits and I oppose their reduction. But there seems little question that the assurance of these retirement benefits has sharply reduced savings. Experience in Sweden corroborates this. In Sweden, as pensions have increased, savings have diminished. Today, Swedish pensions are substantial. The savings rate in Sweden is roughly zero.

So, what policy can Congress adopt to increase savings without gutting Social Security? In recent years, Congress has tried to encourage savings by offering tax incentives to save with a vengeance.

Never before in the history of the country has Congress so persistently adopted so many provisions designed to encourage savings. Congress in recent years has passed legislation postponing the taxation of income that is saved until retirement. Congress has done this in Investment Retirement Accounts, in IRA's, in Keogh's, in 401(K) provisions and in tax-favored treatment of corporate pensions. It tried to promote savings by diminishing taxation that would encourage the use of trust funds to shift income either to children or to some later time period. It has encouraged savings through life insurance by preferential treatment of income earned through life insurance, income saved through exercise of stock options. It has encouraged savings through providing a special after-tax advantage for investment by investment tax credits, accelerated depreciation and capital gain.

That is a massive amount of incentive that we have put into the Tax Code.

But what has been the effect of this raging flood of tax preference, all justified as encouraging savings? Well, the answer, Mr. President, lies in that most recent and most dismal figure. Today savings as a percentage of after-tax income is at an all-time low of only 2½ percent, after all that effort. The Modigliani theory represents a brilliant insight into why we save. We need some new genius to come along with an equally brilliant insight to suggest what Congress can do in our free system to encourage savings. At this moment, nothing seems to be working. We desperately need to do something about this dismal savings record.

The falling savings rate in America adds more emphasis than ever to the critical importance of cruel, old-fashioned policies: First, we cut spending, even with popular programs. Second, we raise taxes to cover what spending we fail to reduce. Third, the Federal Reserve adopts monetary policies that will discourage borrowing in the private sector and encourage savings. What policies will do that?

I hate even to mention them. But here they are. The Fed can encourage savings by making saving more attractive. How does the Fed do that? It slows the rate of increase in the money supply. That slowdown raises interest rate. So saving brings a higher return. Savings increase. The higher interest rates have an even more powerful effect on the saving-borrowing relationship. The higher rates discourage borrowing. Sure, that is the painful solution to our penchant for massive borrowing and paltry saving. Unfortunately, there are no easy solutions.

(Mr. HATFIELD assumed the chair.)

PROGNOSIS FOR ARMS CONTROL: GRIM TO TERMINAL

Mr. PROXMIRE. Mr. President, arms control faces far worse prospects than most Americans realize. Every informed and responsible person on Earth must wish the President of the United States and the Soviet leader well when they meet at Geneva next month to seek the beginning of an agreement on controlling nuclear arms. Can we reasonably expect that the two superpowers can continue the halting, hesitant progress that the two countries have achieved over the past 25 years? Of course, in human relations—as in economic—nothing is finally and firmly predictable. Anything can happen. Gorbachev and Reagan could begin to lay the foundations for ending the suicidal and immensely costly arms race.

Certainly, the conditions are there to make such a happy outcome possible. Both leaders have everything to gain in their national and international reputation, if they can advance nuclear weapons arms control. Obviously, each nation will benefit greatly by removing the immensely heavy burden of the arms race from its economy. Only an arms control agreements can do this. Both super power leaders know this. On the other hand, each leader has put his side in a posture which will make significant progress toward an agreement impossible unless either or both back down. President Reagan has earned a justified reputation as a strong and successful negotiator. General Secretary Gorbachev is relatively new and untried, but he is expected to be a hard-nosed and competent negotiator, too. As part of their negotiating strategy, both sides have developed a kind of snarling truculence. Each of these two wants to enter the Geneva ring on November 19 as a hard-hitting tough guy. Neither wants to build great expectations that the meeting the whole world is waiting for is bound to be an arms control success. So they have both gone to pains to make it clear that they do not expect much.

But there is a more fundamental reason why this arms control summit conference is likely to be even worse than a failure. Here is an arms control meeting that could not only fail to advance past achievements. This Reagan-Gorbachev summit meeting could and probably will mark the beginning of the end of arms control agreements which have at least provided a modest restraining influence on the superpowers in the past 20 years.

Why is the outlook for arms control so grim? First, consider the anti-arms-control position taken by President

Reagan and his success in beginning to put billions of dollars behind that position. The President has made an absolute commitment to the strategic defense initiative or SDI, also known as star wars. What is the purpose of star wars? It is to build a defensive shield that would try to prevent the penetration of American airspace by intercontinental nuclear missiles. If star wars works, what effect would its success have on the Soviet nuclear deterrent? It would nullify that deterrent. The Soviets could not retaliate in response to an American nuclear attack. If they tried to do so, SDI would shoot down their missiles. So, as the Soviets see it, the United States could attack and destroy the Soviet Union, at will, any time, for whatever reason without any fear of retaliation. So, it follows that in an ultimate showdown between the Soviet Union and the United States, the Soviets would have no choice except to surrender. They would have to say uncle.

Now, all of this happy scenario depends on whether the SDI or star wars would work. Will it work? There is widespread agreement in the scientific community that it will not work, unless, and this is the crucial necessity, unless the Soviets sharply reduce their offensive missiles. So, the President has adopted a transparent strategy. He will build SDI or star wars, and he will call on the Soviets to reduce, sharply reduce, their offensive missiles. Will the Soviets accept this?

Well, Mr. President, it is hard for any American to do this. But put yourself in the position of Secretary Gorbachev, if you were Gorbachev, is there any possible way you would agree to helping make the American star wars work by reducing your offensive missiles to a level that would assure the elimination of your deterrent? The answer is obvious. There is no possible way Gorbachev would make such an agreement. Oh, sure, there may be a cosmetic and strategically meaningless reduction of offensive missiles on both sides. Both superpowers have far more offensive nuclear power than they need. Even if the SDI worked perfectly, 10 or 20 percent of the present Russian nuclear arsenal could probably overwhelm it. And without question, in the next 10 or 15 years before this country could start meaningful deployment of SDI, the Soviets could develop the penetration aids that would pierce the SDI defense and the cruise missile capacity to underfly it. So, it is possible some limitation or even reduction in nuclear missiles might eventually emerge from the Reagan-Gorbachev summit, but such an agreement will have no military significance whatsoever.

Meanwhile, SDI would certainly torpedo the antiballistic missile or ABM Treaty, probably the best arms control agreement made by the superpowers. After all, what was the purpose of the ABM Treaty? Simple—it was to stop either superpower from building an antiballistic missile system that would, if successful, nullify each superpower's nuclear deterrent. The deployment of star wars would clearly and totally repudiate that arms control agreement. The SALT II Treaty is hanging by a thread. The President nearly repudiated it earlier this year. It expires soon. With the threat of star wars facing it, the Soviet Union will very likely be unwilling to agree to the restraints SALT II imposes on ICBM's.

Mr. President, Spurgeon Keeny is the executive director of the Arms Control Association. He has written an excellent article in the summer issue of Arms Control Today. I have relied extensively on that article in preparing this speech. Keeny writes that the collapse of the Soviet-United States arms control relationship which I have described—

Would have a profoundly negative effect on efforts to prevent the future proliferation of nuclear weapons to other countries.

He also contends that—

The loss of the arms control regime developed over the past 25 years would not return the arms control process to square one, but would drive it completely off the board. Burdened then by a legacy of failure and confronted with vastly larger and more complex offensive and defensive strategic systems, it would be a long and difficult process to discover an acceptable new approach to arms control. The risk of nuclear war would certainly be greatly increased.

Mr. President, I ask unanimous consent that the article to which I have referred by Spurgeon Keeny be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE UNCERTAIN FUTURE OF ARMS CONTROL

(Spurgeon M. Keeny, Jr.)

The resumption of U.S.-Soviet arms control talks in Geneva and the announcement of a summit meeting between President Reagan and General Secretary Gorbachev have generated widespread expectations of renewed progress in arms control. In reality the prospects for arms control have never been bleaker. President Reagan's vision of a defensive shield that will make nuclear weapons "impotent and obsolete" has become not only a barrier to progress but a threat to the entire structure of arms control developed over the past two decades.

The President's vision, conceived without benefit of serious scientific, military, or diplomatic advice, can no longer be dismissed by critics as misguided political rhetoric or cynically embraced as a potentially valuable bargaining chip. The vision has spawned the Strategic Defense Initiative (SDI), which is rapidly evolving into by far the most ambitious research and development program ever undertaken by man. Instead of clarifying the technical feasibility of strategic defense, the SDI threatens to take on a life of its own, leading to eventual deployment as justification for the unprecedented investment in dollars and technological resources. Although the SDI has been widely criticized domestically on technical, strategic, and economic grounds, the fundamental nature of its adverse impact on arms control and the arms race has not been adequately appreciated by a public bemused by hints of breakthroughs in U.S.-Soviet negotiations.

In truth, this new U.S. policy virtually precludes serious progress in the Geneva negotiations. The Soviet Union has taken a firm position that it will not agree to substantial, or even modest, reductions in its strategic offensive forces as long as the United States is engaged in a massive program with the stated goal of developing a highly effective nationwide defense against ballistic missiles. The Soviet refusal to deal separately with offensive and defensive issues was totally predictable and consistent with elementary military logic. When faced with improved defenses, the military has always sought quantitative or qualitative improvements in its offensive forces to insure its ability to penetrate those defenses. The ability to retaliate after a preemptive strike has been equated with the ability to deter nuclear war. The surprise at Geneva was not the Soviet reaction but the willingness of the United States to advance such a strategically unsound position.

In the past, when faced with major Soviet strategic defense programs, the United States has consistently acted to insure its retaliatory capability. In the late 1960s when U.S. officials were concerned that the Soviet Union might be undertaking a nationwide ballistic missile defense, the United States did not abandon or reduce reliance on ballistic missiles but introduced MIRVs to increase firepower and assure the ability to penetrate the projected Soviet defense. Similarly, although the Soviet Union for the past thirty years has invested vast sums in its air defense system, the United States has not abandoned long range strategic bombers. On the contrary, the United States has improved the ability of bombers to penetrate defenses in a series of qualitative improvements involving electronic countermeasures, short-range nuclear missiles designed to suppress defenses, air-launched cruise missiles, the B-1 bomber, and currently stealth technology to make aircraft and eventually cruise missiles harder for enemy radars and other sensors to detect. One cannot help but wonder how the U.S. Joint Chiefs-of-Staff would react if the Soviet Union were to reverse its position in Geneva and call for deep reductions in strategic offensive forces and the elimination of all constraints on ballistic missile defenses.

In addition to precluding major new strategic agreements in Geneva, the new U.S. strategic defense program poses a direct threat to the ABM Treaty, which is the keystone to the entire framework of existing arms control agreements. The President's vision and the goal of the Strategic Defense Initiative are diametrically opposed to the underlying objective of the ABM Treaty of preventing a nationwide ballistic missile defense. Despite the Administration's reassurances that the Strategic Defense Initiative at this stage is only a research program fully consistent with specific treaty obligations, the initiative and the ABM Treaty are by definition on a direct collision course.

Whatever view one takes on the legality of specific activities in the currently defined Strategic Defense Initiative, development and testing that cannot possibly be reconciled with Treaty provisions will occur in the not too distant future. The SDI test program so far described by the Defense Department will provide only a few of the an-

swers needed to make a rational decision on deployment and will certainly have to be followed by many more development tests which would be unambiguously in violation of the ABM Treaty. Some critics argue that this breach will in fact result from presently planned test within three years; the Administration asserts that by carefully defining and structuring these tests to conform to Treaty provisions the breach can be postponed for at least five years. But regardless of when these tests occur or how successful they may be, the Treaty will be breached long before a rational decision could possibly be made on whether to deploy a ballistic missile defense system.

Some critics of the program believe that, if pursued, the initiative will collapse from the weight of unresolved technical problems and mounting costs long before deployment could possibly be undertaken. Others argue that in a few years the momentum of the program will inevitably force a decision to deploy the system. Such a system would in all likelihood not be based on the much touted exotic technology displayed in the media but on updated versions of present components. The resulting partial defense would have little to do with the President's vision of an invulnerable America, completely shielded from nuclear attack. But whether the program ultimately collapses or produces some sort of limited defense, the results will very likely have been disastrous for the ABM Treaty and the prospects for future arms control.

The demise of the ABM Treaty and the unratified SALT II agreement, which is already seriously threatened and could not possibly survive the ABM Treaty, would essentially constitute the destruction of the entire framework of post World War II arms control efforts. The loss of these restraining agreements would unleash a major acceleration of the strategic offensive and defensive nuclear arms race. Ancillary agreements such as the outer Space Treaty and the Limited Test Ban Treaty would have little chance of surviving the ensuing military buildup. The terms of these treaties would not only prevent advanced development of such exotic approaches to strategic defense as nuclear pumped X-ray lasers but would also interfere with the "conventional" nuclear ballistic missile defense systems that the Soviet Union and probably the United States would actually pursue in a serious strategic defense arms race. Finally, the collapse of the U.S.-Soviet arms control relationship would have a profoundly negative effect on efforts to prevent the future proliferation of nuclear weapons to other countries. Both our allies and nonaligned states would inevitably feel compelled to reassess their national interest in obtaining an independent nuclear weapons capability in a world in which the superpowers had not only abandoned all pretense of progress in arms control but also the modest restraints of existing agreements.

The loss of the arms control regime developed over the past 25 years would not return the arms control process to square one, but would drive it completely off the board. Burdened then by a legacy of failure and confronted with vastly larger and much more complex offensive and defensive strategic systems, it would be a long and difficult process to discover an acceptable new approach to arms control. The risk of nuclear war would certainly be greatly increased in a world where the course of the arms race and crisis stability would depend solely on the unilateral decisions of two adversarial superpowers whose hostility and suspicion would have been substantially increased by the disintegration of formal undertakings to build restraint and predictability into their strategic relationship.

Tragically, the future of arms control has been made hostage to the pursuit of a technological will-o'-the-wisp that will draw us ever deeper into a fruitless high technology arms race. There is widespread agreement in the scientific community that the possibility of developing a highly effective strategic defense system against a sophisticated and determined adversary such as the Soviet Union is so remote that it should be irrelevant for serious long range national security planning.

The underlying problem with the President's vision lies in the incredible destructive power of thermonuclear weapons. Each weapon can have more than a million times the yield of a comparable-sized conventional weapon. Since a single thermonuclear warhead can destroy a city and the stockpiles of strategic weapons on each side number around 10,000, a defensive system must be extremely effective to provide a credible territorial defense. To accomplish this task, a complex network of detectors, assessors, trackers, and exotic kill mechanisms, on earth stations and in outer space, would have to be linked and operated automatically by computers dependent on an unprecedentedly large and complex program that would have to work flawlessly when used for the first time in a hostile environment. This is a staggering technical challenge even under ideal conditions. In the real world, however, such a system would be "fatally flawed" since it would not be operating against a cooperating partner but rather against an adversary determined to foil it. The Soviet Union can draw from a large range of options to defeat the defense at a small fraction of the cost of building and maintaining the defense network.

The offense can attack the vulnerable points of this system. Such an attack could take place at the outset of hostilities or even during peacetime since a clandestine, or even an overt attack on a satellite would be unlikely to trigger an all out nuclear response. Satellite battle stations will certainly prove to be highly vulnerable and tempting targets. The extreme vulnerability of the prime radars, on which the *Safeguard/Sentinel* program depended, was a primary reason these early U.S. systems were rejected as serious candidates for a nationwide defense against Soviet attack. Another option for the defense is simply to overwhelm the defense by brute force with more missiles, MIRVs, or decoys designed to simulate real reentry vehicles. Yet another approach is to nullify or diminish the effectiveness of the sensors and the kill mechanisms used by the defense. An example of such techniques would be the use of fast-burn boosters that would prevent or immensely complicate attack against the boost phase of the ballistic missile trajectory by shortening the time of exposure of the potentially vulnerable boosters to attack. Technical ingenuity will produce a host of ideas, such as spinning boosters, shields, and coatings to reduce at relatively low cost the effectiveness of directed energy systems and thereby increase the cost of defense. Finally, the offense can choose simply to circumvent the ballistic missile defense system with air-breathing systems that fly under the shield. For example, low flying cruise missiles, using stealth technology to avoid detection and launched from close-in submarines, would constitute an entirely new threat fully as difficult to defend against as ballistic missiles.

Despite the incompatibility of the evolving U.S. strategic position with prospects of progress in arms control, the American public understandably has a strong predilection to give the Administration the benefit of the doubt and an opportunity to pursue its new approach. Even if the approach seems incredible, an outsider can never be confident of knowing all the relevant facts. The papers are constantly filled with vague reports from unidentified high Administration spokesmen that the United States or the Soviet Union have hinted at some new arms control move. There are always authoritative assurances that the President really wants an agreement and sage commentaries on the obvious political advantages to the President of an agreement. In these circumstances, there is a natural reluctance to be seen as undercutting one's own government's negotiating position. A low profile also avoids the uncomfortable possibility of losing credibility by being seen as a false prophet in the unlikely event that the negotiations should eventually lead to an agreement.

Such restraint, which may have been a sign of wisdom in previous negotiations, is totally inappropriate at this time given the potentially catastrophic consequence of current U.S. policies on the future of arms control. There must be both a strong public defense of existing arms control agreements and a focused attack on those policies which are eroding these agreements and ultimately promise to destroy them. In the latter respect, one can applaud the President and the Secretary of State when they call for steps to reverse the erosion of the ABM Treaty. But they must be told clearly that the Strategic Defense Initiative coupled with Presidential rhetoric is a far more fundamental and corrosive element of this erosion than the apparently illegal Soviet Krasnoyarsk radar.

Despite the slim prospects for progress, even the most vocal critics of the Administration's arms control policy should support the resumption of the Geneva negotiations. The negotiations have had the salutory effect of focusing U.S. and Allied attention on the impasse created by the Strategic Defense Initiative. Moreover, even though the negotiations are being exploited more and more by both the United States and the Soviet Union as political theater, the negotiations in themselves do have something of a stabilizing effect on the arms race. True, the Administration uses the negotiations to justify additional expenditures for military programs, such as the MX missile, and the Soviet Union uses the negotiations to attempt to weaken the NATO alliance. At the same time, the negotiations even as political theater put pressure on both sides not to abrogate, openly violate, or consensually accelerate the erosion of existing agreements. In the absence of such negotiations, either side could more easily ignore or repudiate the agreements on the grounds that the other side by its actions had effectively destroyed the arms control process.

In this hostile environment, the arms control community should close ranks in emphasizing the critical importance of maintaining the integrity of the arms control process. The principal objective should be to insure that the United States and the Soviet Union support both the spirit and the word of the ABM Treaty. Both governments should be pressed to reverse the current erosion of the Treaty by tightening, not relax-

ing, their interpretations of its provisions. Where there are grey areas in treaty provisions, such as the definition of treaty terms like "development" or "components," the United States should take the lead in insisting on as restrictive interpretations as the negotiating and legislative history permit. The United States should not advance self-serving interpretations of these concepts which can only serve to erode the effectiveness of the Treaty. If there is serious interest on both sides, problems of definition and disputed provisions can be resolved by supplemental common understandings without recourse to amendments or additional agreements.

A major effort must be made to restrain unilaterally the scope of the Strategic Defense Initiative. Even without the accompanying rhetoric, an undertaking funded at the level of the present U.S. program is entirely inconsistent with the intent of the ABM Treaty. The same can of course be said of the very extensive Soviet ballistic missile defense program, which also undercuts confidence in the long-term Soviet approach. But we can hardly hope to restrain the scope of Soviet activities if we do not ourselves exhibit serious respect for the ABM Treaty and its goals.

A major effort must also be made to insure that the quantitative and qualitative limits of the unratified SALT II Treaty do not end when the agreement runs out December 31, 1985. In this connection, the President is to be commended for his recent decision, apparently despite contrary recommendations by some senior advisors, to continue adherence at least temporarily to the limits of the unratified SALT II treaty. The rationale for continued U.S. adherence to the SALT II limits after the scheduled termination at the end of this year is clear and compelling. The question remains: how long will the Soviet Union continue its commitments to the unratified SALT II agreement in the face of an expanding Strategic Defense Initiative?

The erosion of the arms control regime is underway not only as a result of U.S. and Soviet military programs, but also in the attitudes of the American people who in the final analysis must be willing to support the continuation of existing as well as any future agreements. Formal charges by the U.S. government of alleged "possible," "probable," "almost certain," as well as "clear" Soviet violations of various "legal" and "political" obligations have seriously eroded public confidence not only in the agreements themselves but in the entire process of arms control. This unpromising environment for public support is further poisoned by the constant leaks of highly misleading information, charging additional Soviet treaty violations or the intention of breaking out of the Treaties. The public can do little to assess independently the validity of such distorted and misleading reports from unidentified sources who are clearly dedicated to the destruction of existing agreements and prevention of any future accords.

Compliance issues cannot and should not be ignored. In fact, the arms control community has a special responsibility to face up to such problems and protect the integrity of agreements from all enemies, domestic and foreign. At the same time, a major effort must be made to help the public keep the security implications of alleged violations in proper perspective in relation to the importance and accomplishments of an agreement. Above all, the arms control community should seek and support constructive solutions to genuine problems that have arisen either through misunderstandings or the misguided efforts of either side to push the limits of their own self-serving interpretations of various Treaty provisions.

I have focused on the contribution of the United States to the present arms control impasse. The Soviet Union certainly has earned its share of criticism. The level of Soviet ballistic missile defense research and development is beyond the spirit of the ABM Treaty. The Soviet Krasnoyarsk radar appears to be a clear violation of the ABM Treaty and other Soviet activities have raised serious questions under this and other agreements. The Soviet position in Geneva, demanding that the United States abandon all research related to the Strategic Defense Initiative while the Soviet Union insists it can continue similar research, as well as development and testing, is hardly a serious approach to the problem.

Unfortunately, however, it is our own government that has introduced a new crippling concept into the arms control process. In these circumstances, it is clearly more appropriate and more constructive to try to influence the policies of our own government. We do not know what the position of the new Soviet leadership will prove to be. There appear to be strong factions in the Soviet Union interested in containing the arms race and promoting strategic stability for compelling internal economic, political, and military reasons. We can best try to influence the evolution of constructive Soviet behavior by creating U.S. policies that support the existing structure of arms control agreements and are compatible with further arms control progress. While such constructive engagement certainly does not guarantee success, it is a prerequisite to challenging the Soviet Union to a positive response.

Others have suggested that a radical new approach to arms control is necessary to alter the course of events. But, when the ship is sinking one must focus on damage control and not speculate on better approaches to transportation. The first order of business is to save the existing structure of arms control. This can only be accomplished by a broadly based campaign of constructive domestic and allied criticism of the military and arms control policies of the Reagan Administration. This campaign is the only hope that arms control will indeed have a future.

MYTH OF THE DAY

Mr. PROXMIRE. Mr. President, the myth of the day is that "workfare"—putting welfare recipients to work—can never succeed. In fact, these programs can succeed and the States are proving it right now.

For many, "workfare" has been a dirty word. It conjures up images of a coercive program wrenching AFDC mothers from their young children to federally supported day care centers and sending their mothers to meaningless make-work jobs with no future. And many remember the abysmal failure of "workfare" in California several years ago. At its most successful point, that program achieved only a 3-percent participation rate.

Now there is no question that many of these programs were poorly conceived, poorly designed and poorly implemented. But the States are proving today that they have learned from that experience. They are implementing programs that are better designed, more clearly targeted and far less coercive than the "workfare" programs of the last 15 years. And while many of the States want to avoid the "workfare" label for their programs, they are proving day in and day out that the basic concept, if applied intelligently, works. Let us look at just a few examples.

In Massachusetts, stunning successes are being registered. The Massachusetts approach is called the Employment and Training Choices Program, referred to as "ET." All State welfare recipients must sign up with ET and then choose on-the-job training, immediate job placement, career planning assistance, free education, or none of the above.

Since the program was launched in October 1983, 17,000 welfare recipients have been placed in unsubsidized private sector jobs, saving the State some $50 million, gross. Massachusetts's AFDC caseload is at its lowest level in 12 years, and its drop of 9.6 percent between January 1983 and January 1985 was tops among the leading 12 welfare States.

Moreover, the jobs in the ET Program are certainly not make-work jobs. Participants are palced in private sector jobs which span from the lowskill and clerical to the professional and technical. The average starting pay of program enrollees is $9,800 annually, more than double the annual welfare grant.

But wait, there is more. The State of West Virginia has been conducting a Demonstration Workfare Program for fathers in two-parent AFDC-U families. A preliminary evaluation by the Manpower Demonstration Research Corp., found that West Virginia had achieved not only a high participation rate—40 percent—but also a high degree of satisfaction among welfare recipients regarding the program and the work they were assigned. The report went on to project a 70-percent to 85-percent demonstration rate as a realistic possibility.

And, in San Diego, work projects have succeeded in increasing the earnings of AFDC mothers by 30 percent.

Mr. President, day in and day out, these States and local communities are proving that it is possible to design and implement programs that give welfare recipients an opportunity to work. And welfare recipients are jumping at the opportunity. And they are financially better off for it.

They are transforming the dirty image with which "workfare" programs have been saddled with for so long. They are proving that workfare programs can work. And it is time to lay this myth to rest.

PAST TIME FOR RATIFICATION

Mr. PROXMIRE. Mr. President, Holocaust researchers have recently acquired a disturbing memorandum, allegedly written by the U.S. military in 1948, that barred Jews from participating in the United States-European allied hunt for World War II Nazi sympathizers.

An American Jewish immigrant, Walter Bass, who served as a post war Army investigator, gave the memo to the Simon Wiesenthal Center. The document, which was signed by Lt. Gen. C.R. Heubner, established a requirement that individuals have been U.S. citizens at least 10 years to qualify for positions such as intelligence agents and criminal investigators. It, therefore, automatically eliminated many immigrant American Jews.

The immigrant American Jews who were barred were persons steeped in German language and culture, characteristics that uniquely qualified them to locate and identify Nazi war criminals.

Mr. Bass, who found the document while going through his files, called the policy unjust. He said it appeared to have been aimed at many of the Jews who had immigrated from Europe to the United States to escape Hitler in the late 1930's.

Because of the policy, the military government did not renew Mr. Bass' own contract as a civilian investigator in Germany.

Mr. Bass accuses America of having competed with Russia for the hearts of Germans. He said it tried to imitate pardons granted to certain classes of former Nazis by Russia.

Mr. President, although officials of that period have not validated the authenticity of the document, the damage is done.

Again, the question of the United States sincerity in its pledge to protect human rights has surfaced.

All too often, this country finds itself embarrassed. This should not be.

I find it appalling that a U.S. military unit would bar those who were not eager and sincere in their desire to bring Nazi war criminals to justice. These people are the victims and survivors of the most brutal persecution known to man.

Equally appalling is the fact that several Nazi war criminals, including Klaus Barbie, may have gone on our intelligence payroll. Permitting Nazi war criminals to penetrate our work force while barring their innocent victims, contradicts this Nation's commitment to fundamental human rights.

Mr. President, the Genocide Treaty offers us the opportunity to let the world know once and for all that we will not condone the inhumane persecution of any group of human beings.

It is past time for the United States to join the other 96 countries that have ratified the Genocide Treaty. Now that the treaty is on the Senate calendar, I urge this body to ratify it without further hesitation.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 8:30 a.m., with statements therein limited to 5 minutes each.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DURENBERGER). Without objection, it is so ordered.

AIDS

Mr. HATFIELD. Mr. President, Mother Teresa of Calcutta not only has illuminated the dark corners of the world where poverty and disease spread their shadows, she has enlightened the conscience of humankind by showering love upon the poor souls whom society has ostracized. She was asked what was the worst disease that any human being can ever experience. Leprosy? Tuberculosis? Malaria? No. She stated that being unwanted was the worst disease that any human being could ever experience. Here is what Mother Teresa said:

> For all kinds of diseases there are medicines and cures. But for being unwanted, except there are willing hands to serve and there's a loving heart to love, I don't think this terrible disease can ever be cured.

So it should come as no surprise to any one who knows her that Mother Teresa has taken her sisters to care for the AIDS victims, the pariah of the 1980's, the new class of the unwanted.

But she is not the only voice of compassion and understanding on the subject of the plight of AIDS sufferers.

On October 9, 1985, in New York City, my dear friend LOWELL WEICKER delivered a memorable speech on the occasion of the Human Rights Campaign Fund Dinner. All of my colleagues in the Senate instantly can identify occasions on this Senate floor when Senator WEICKER has raised the consciousness level, not to mention the decibel level, on issues which are the subject of spirited debate. Last Wednesday in New York City, Senator WEICKER did more than lend his formidable intellect to the debate on the AIDS controversy—he gave his heart and his hope as well. He gave to those privileged to be in attendance that night a vision of how love conquers prejudice and fear, of how compassion triumphs over the age-old urge to cast out the unwanted from our midst.

Mr. President, we can all benefit from my friend LOWELL WEICKER'S wisdom and eloquence on this subject, one so often debated in the rhetoric of hate and nasty judgment. I ask unanimous consent that the text of Senator WEICKER'S speech be printed in the RECORD at this time.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

SPEECH BY SENATOR LOWELL P. WEICKER, JR.—HUMAN RIGHTS CAMPAIGN FUND DINNER

Good evening. I and my wife, Claudia, are honored to share this evening with you and to join in tribute to those you have chosen for special recognition.

In the past, I have had to choose between applying time to the never-ending parade of human and civil rights challenges posed in Washington or speaking across the country on behalf of those Americans whose citizenship is constitutionally jeopardized. Mostly, I have opted to stay put in the capital, but tonight the challenge actually and symbolically is here as much as anyplace in the United States. And so, this is where I choose to be.

Normally, my remarks would be tied to S. 1432, the Civil Rights Amendment Act of 1985, which along with Senators Kerry, Moynihan and others I have sponsored since 1979. I continue to support it, not as the making of greater rights, but as ensuring that rights established in the Constitution apply to all equally and without equivocation.

Tragically, a more immediate though not a more important issue has intervened—that of Acquired Immune Deficiency Syndrome. Tonight in the capacity as Chairman of the United States Senate Committee on Health Appropriations, I would use this occasion to make some observations on this disease or, more specifically, on the national response to it.

Before any *national* admonitions, let me render a precise accounting as to what your government has or has not done. First, the response of the federal government—executive and legislative, Republicans and Democrats—has been timely and productive. Funding levels for AIDS have been determined scientifically, not politically.

Those levels have called for 60 million dollars in 1984; 103 million dollars in 1985, and 221 million dollars already targeted for 1986. As the demands of science are delineated, the money has been and will continue to be provided. It must also be stated as fact that the time frame of achievement to date has never been equalled in the annals of science. As Dr. Vincent DeVita of the National Cancer Institute has stated:

"Government support for AIDS funded through the Congress has allowed for extraordinary progress in undertaking and beginning efforts to conquer this dread disease. Never in the history of man has the cause of a disease which had hitherto been unrecognized been established in so short a period of time."

I am not unrealistic as to the difficulties and agonies ahead. Present clinical trials relative to chemotherapy and keeping the disease and/or its transmission under control seem to hold the most immediate promise. The matter of a vaccine is somewhat

farther off. Dr. Anthony Fauci, head of the Infectious Disease Institute has stated in referring to congressional funding:

"Given the additional support provided in the current Senate Appropriations bill, funding is appropriate and comensurate with the current need of AIDS research. This support must continue and accelerate according to the inroads that are being made and can be made. Science is inexact and we cannot precisely know what requirements will exist as progress is made."

My pledge to all tonight is that whatever financial resources are defined as needed will be provided. No research stone will be left unturned for lack of money.

AIDS is one more of history's challenges to life. With neither cash nor scientific genius in short supply, the timeliness of its demise will be in direct relationship to the timeliness of our national courage and compassion. And this brings me to the main purpose of my speech.

I would like to share with you a recent trip to Hawaii. While there, I visited the Hansen's Disease (leprosy) settlement at Kalaupapa on the island of Molokai. It's a beautiful place. It's a quiet place. A loving place. But as I stood in 1984 overlooking the Molokai Channel, I was aware that 120 years earlier, lepers in wooden crates were thrown into that channel—to make it to Kalawao Beach or not depending on waves, rocks and sharks. Once ashore, theirs was the tragic existence of being in the living graveyard that was Molokai. No care, no food, no shelter. Indeed, the cry of the inhabitants as new patients arrived was, AOLE KANAWAI MA REIA WAHI—"in this place there is no law." One man changed that Pacific hell. Father Damien Deveuster, a Belgian Roman Catholic priest. At first and all by himself, he brought dignity, comfort and, yes, additional years of life to the hurt. He had no public opinion polls to support what was to be a life commitment. Indeed, not even a majority of his clerical colleagues would accompany him on his rounds of mercy. Just Damien himself brought a world from out of the darkness of cruelty and despair toward the light of understanding and hope.

Shortly, Kalaupapa will become a national park. Beautiful St. Philomena Church, built by Father Damien and his patients, will become a historic monument. Damien's body, disinterred from its grave at St. Philomena, rests with honor in Belgium, far from his life's work. But the real monument to Damien is neither park, nor church, nor headstone.

It is in a history that saw the 7,000 ostracized victims who lived and died at Kalaupapa dwindle to the 104 who presently populate the settlement and who can leave at any time. It is in the outpatient clinics for treatment of the disease. It is in the statistics of life expectancy for the diagnosed leper.

Today, the average patient's age is 65 and most of those resident at Kalaupapa have no desire to leave it. Not that they cannot, but in the words of one resident, "We are aging gracefully. We know we can go out when we want to, that makes all the difference between now and the past."

Now this is not intended as some inspirational vignette. Damien's challenge lives next door. Today it's called AIDS and like another disease at another time in a place far away, it too travels in the company of fear born of ignorance. The New Republic this week in its lead editorial dubbed this epidemic "Acute Fear Regarding Aids" or simply "AFRAIDS."

The statistics are disturbing. A recent New York Times/CBS News poll showed 47 percent of Americans believe AIDS can be spread by a shared drinking glass and 27 percent by toilet seats. A Washington Post poll had 34 percent of the respondents fearful of associating with AIDS patients even without physical contract. In the same category, fully 22 percent of the same sample described themselves as uncertain as to this method of transmission.

Disgracefully, such great national uncertainty is a tremendous breeding ground for the politics of fear. As you know, issues like quarantine for cared and caring alike are openly discussed across the nation and have made their way into legislative proposals. Those whose far-right wing crusades have always included homophobia are spreading "AFRAIDS" at every opportunity. It's no coincidence that the same extremists who say AIDS is a form of divine justice also find this divine justice in the racist regime of South Africa.

We can never forget that the unfounded fears of many Americans are no less real. There are unanswered questions. We do not now, nor perhaps will we ever, have an answer to each question.

What scientific uncertainties exist, however, relate more to cures than transmissibility and on one subject there is no doubt. We in the United States are one people and by fact or law, there will be no pariahs among us. No one is going overboard in a crate to sink or swim. Progress in the absence of panic has already been made. More is yet to come with quiet resolve.

We are here tonight for a celebration; a celebration of the accomplishments of several distinguished guests, the accomplishments of a community. The ravages of disease don't render this celebration irrelevant. For when people gather in a time of crisis with a common purpose, there is an even greater celebration; that of the very real potential for victory.

The writer E.B. White has been a treasure of our national life for most of this century. E.B. White died October first at his home in Maine, diagnosed as suffering from Alzheimer's disease. One of White's great gifts to us as a writer, as an observer, was his description of creatures caught in circumstance, situations full of opportunity for prejudice and full of opportunity for cooperation and hope.

His words are a celebration of the hope we share tonight.

"Despair is no good," he wrote once in a letter, "for the writer, for anyone. Only hope can carry us aloft, can keep us afloat. Only hope, and a certain faith that the incredible structure that has been fashioned by this most strange and ingenious of all the mammals cannot end in ruin and disaster."

In closing, let me recount one small personal experience in order to give expression to the deep debt *I* owe to hundreds of anonymous persons who brought the mentally retarded from darkness to light in my lifetime. At the time of the birth of my third child seven years ago, I was asked by a well-meaning, Christian person whether or not I would like to give Sonny away, thus avoiding the supposed heartaches attendant to raising such a child. My immediate response was, to course, in the negative and I like to believe that it would have been my response 10 years, 15 years, 20 years, 50 years ago. But I have to wonder whether or not it was shaped in some way by those visionary brave few who brought these human beings to the status of special people from that of Mongoloid.

Now once again as a nation, we have the choice when it comes to those afflicted with AIDS. Is it to be "Over the side," or "Into our hearts?" That answer, more so than the transmissibility of an AIDS virus, will determine the life and death of this nation.

Thank you.

Mr. HATFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. SYMMS). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

THE 210TH ANNIVERSARY OF THE NAVY

Mr. COCHRAN. Mr. President, I would like to take a few minutes to congratulate the U.S. Navy on the occasion of its 210th anniversary. Recent events emphasize how important it is for us to have a strong Navy, one that is capable of reacting quickly and effectively to unexpected challenges in distant places.

Today's Navy was christened when Congress, on October 13, 1775, passed legislation authorizing the purchase and fitting out of two vessels: the *Andrew Doria* and the *Cabot.* Two months later, Congress authorized the building of 13 frigates—at a cost of less than $67,000 each. During the War for Independence, some 60 naval ships saw service, which by war's end claimed the capture of some 200 enemy vessels.

When the war ended, the New Republic could not afford a Navy, and all of the remaining ships were retired. This action was the unfortunate beginning of a practice which has persisted throughout our country's history.

The next expansion of the Navy came in the late 19th century in response to the capture of American merchant ships by the Barbary pirates. Thus began the concept of a Navy to protect, among other things, American merchant shipping. Among the ships placed in commission at this time was the U.S.S. *Constitution,* "Old Ironsides," which is still in commission today.

By the beginning of the War of 1812, the Navy consisted of 16 ships. The naval expansion necessitated by the war sparked a now familiar debate: whether to use the country's monetary resources to build large ships or small gunboats. Of course, today we talk in terms of frigates and destroyers versus aircraft carriers, but it's the same basic dispute.

In the years leading up to the Civil War, the U.S. Navy initiated the current system of worldwide deployments. "Showing the flag" from the Mediterranean to the East Indies, the Navy was chiefly concerned with furthering maritime commerce.

Still, it was during this period that the concept of deterrence reached fruition. Advocates of an extensive naval force pointed out that a strong Navy, deployed throughout the world, could open new markets and defend American shipping against discrimination by foreign traders and attack by pirates.

During the Civil War, the Navy was involved not only at sea, but also in amphibious landings and in inland waters. The U.S.S. *Monitor's* famous duel with the Confederate ironclad *Virginia*—formerly the U.S.S. *Merrimack*—was the most significant naval battle of the war, and signaled a major advance in naval warfare. Again, however, the Navy was allowed to deteriorate following the war, and technological advances such as steam propulsion were resisted for several years.

In the last hundred years, the Navy has seen the advent of submarine warfare, carrier aviation, and nuclear propulsion. It is important to remember that this modernization effort, now well under way, is as essential in peacetime as it is during times of conflict. The reason is that the complex ships and aircraft of today take a long time to produce, and expansion in time of war is not militarily feasible.

After last week's courageous action over the Mediterranean, during which a group of F-14 Navy jets forced the landing in Sicily of an Egyptian plane carrying the hijackers of the *Achille Lauro,* I hardly need to remind my colleagues of the pride and glory the Navy continually brings to this country. During its 210 year history, the one constant in the U.S. Navy has been the people who have served within its ranks both at sea and ashore. Today they come from all walks of American life, from the inner cities to rural farmlands. They are united by an exemplary sense of patriotism and duty to their country. As they serve America, above, on, and beneath the seas, they earn our deepest respect and appreciation.

I am sure that my colleagues join me in wishing the U.S. Navy a happy 210th birthday.

UNITED STATES HOLOCAUST MEMORIAL MUSEUM

Mr. MATTINGLY. Mr. President, yesterday, together with the other members of the U.S. Holocaust Memorial Council, a number of my colleagues, and several hundred individuals from this and other nations, I had the privilege of participating in the official groundbreaking ceremony for the U.S. Holocaust Memorial Museum. It was a moving experience.

As I sat in the place where the museum will stand, I was struck by the significance of the site that has been chosen to memorialize what many have called history's darkest hour, a horror carried out thousands of miles away, on another continent. In the shadow of the Washington Monument and across the Tidal Basin in view of the Jefferson Memorial, the record of the Holocaust will be preserved for posterity. I believe that is as it should be, for the juxtaposition of the symbols of liberty and tyranny remind us what can occur in any land if the foundation on which all freedoms rest is, even for a moment, forgotten. Inscribed on the walls of his memorial are Thomas Jefferson's words, "The God Who Gave Us Life Gave Us Liberty at the Same Time." This principle, articulated again in the Declaration of Independence—"We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable rights"—provides the underpinnings upon which our law and Government rest.

As the victims of the Holocaust learned, divorced from its moral basis, the law is no protection. For the law can be rewritten by dictators and actions based on these laws can be justified and ruled legal by a judiciary which blindly measures them against the laws' letter. The lesson for us then is to be ever vigilant in the defense of the rights of individuals and in insuring that the basis of our laws is not violated.

As survivors of the Holocaust and their children and grandchildren looked on, soil and ashes from the concentration camps of Auschwitz, Bergen-Belsen, Dachau, Theresienstadt, and Treblinka, and from the Warsaw Jewish Cemetary were mixed with Earth from the site, the foundation of the museum. It was a fitting symbol. For the history of Germany during the horrible period of the reign of Hitler has become a part of the world's history, and ours, just as the liberation of the concentration camps has. The people of Germany, many of them, and their descendants have become our people, our citizens. The rembrance of the Holocaust has become and must remain a portion of the world's conscience.

This year the Holocaust Council sponsored its first annual national essay contest for students. The words of one of the winning essays, by Paula Cavanaugh of Missouri, say much to me concerning what we are about in erecting this museum. Paula Cavanaugh visited Dachau, and recounting her visit there she wrote:

> I stepped over the line and walked out of Dachau. Alive, healthy, whole, and uninjured, I simply walked out. I took the stone from block 15 out of my pocket and held it in my hand as I reflected over the visit: The Jews were not the only people that suffered. The whole world suffered a wound that cannot heal as long as the possibility of the reoccurrence of such animalistic brutality exists. We are all of us obligated to prevent that. We must carry the prayer, "Nie Wieder" in our mind forever: "Never Again." . . . I left Dachau, but it has never left me. To this day, I still keep that stone from block 15 . . . it serves as my reminder . . . I will never forget.

Most young people will not visit Dachau. More, I imagine, will visit this Holocaust Museum. And when they leave, just as Paula Cavanaugh did, may they carry the lesson of Dachau with them.

Mr. President, what we did yesterday, we did in memory of the victims of a regime so terrible the imagination can barely grasp it. But we did it also for ourselves, and for our children—to warn them and to teach them. And we did it for oppressed peoples around the world.

I am honored to have the opportunity to serve on the U.S. Memorial Council at this historic time. And as the campaign to remember continues in its drive to raise the funds to build this museum, I commend it to my colleagues, for their support. It is important work, for the sake of human rights everywhere.

JOHN D. MONTGOMERY, A KANSAS FRIEND

Mr. DOLE. Mr. President, last Tuesday evening, this Senator—and my home State—lost a great friend with the passing of John D. Montgomery of Junction City, KS.

Mr. Montgomery was an influential and respected newspaper publisher and an active leader in the Democratic Party who did a lifetime of good work for my State.

Although he represented a rival political party, the two of us enjoyed a longtime friendship. The Senator from Kansas welcomed his wise counsel and respected greatly Mr. Montgomery's accomplishments in journalism and politics. Believe me, I will miss the thoughtful letters on Kansas and national issues he was kind enough to send to me over the years. In his honor, I would like to share with the Senate some of the highlights of his life.

He was a 1925 graduate of the University of Kansas Journalism School, set on pursuing a career begun by his father and grandfather before him. Before settling in Junction City to publish the Daily Union—started by his family in 1892—he published newspapers in Florida, Brazil, and Cuba.

He expanded the Montgomery newspaper chain to include papers in four other Kansas communities, and recently acquired a low-power television station to serve the people of Junction City.

John Montgomery served his national party as the national committeeman from Kansas in the early 1960's, as the State party chairman, and twice as a candidate for Congress in Kansas on the Democratic ticket. In all his many endeavors, he was success.

Mr. President, John Montgomery was 82 years old when he passed away. But his tireless efforts on behalf of our State and Nation will live on. I know the Senate joins me in expressing a deep sense of loss, and its sympathy to his family.

THE THREE FISCAL CRISES

Mr. KENNEDY. Mr. President, writing in the September issue of the Atlantic, James Fallows, that distinguished journal's Washington editor, warns that today's economic policy mistakes will combine to do deep and long term damage. He correctly argues that our deteriorating trade position, our transformation to international debtor, and our unprecedented budget deficit feed on and reinforce each other. The net effect is that we are paying for today's lunch with resources that we ought to be investing in order to ensure our long-term economic strength.

Mr. Fallows, as he has done so often and well, has shone a bright, if harsh, light on a fundamental national issue. As we struggle with these economic questions in the coming weeks, I hope we will all take his counsel as to just how much is at stake. I congratulate him and commend his work to my colleagues.

Mr. President, I ask unanimous consent that the article by James Fallows, entitled "Three Fiscal Crises," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE THREE FISCAL CRISES

Economics does not easily accept the idea of irreversibility. In principle, almost no change is so permanent that it cannot be undone. If people are no longer eager to buy your goods and services, if your nation's comparative advantage has waned, you need only lower your price. It is all a matter of adjustment; at some point—which is to say, at some price—the curves of supply and demand will intersect.

Real life is not always so flexible as economic theory would suppose. For instance, wages sometimes stop rising but they rarely decline, because people cannot stand to live under circumstances in which the price of labor fluctuates like the spot price for oil. But there is an even more important exception to the economists' contention that what goes up must eventually come down.

Because of the relentless workings of compound interest—the mathematical formula under which the interest earned in each period is added to the principal sum, so that the interest is larger in the next period than it was in the last—when things start moving in a certain direction, they can gain rather than lose speed. A debtor who has a little trouble meeting this year's interest payments will have a lot of trouble next year. Because compound interest introduces a momentum of its own, trends subject to its influence behave very differently from normal equations of supply and demand. By the time a trend of this kind is detected, it will rapidly be getting worse.

The magic of compound interest is becoming the central explanatory fact about the American economy. In three fundamental and related areas the United States is quite suddenly shifting to the wrong side of the interest curve. Taken one by one, the changes are familiar; taken all together, they tell us something about the economy which we'd rather not know.

The first change is the sudden disappearance of America's surplus in the international balance of trade. During the 1970s the United States managed to sell almost exactly as much to other countries as it bought from them—even though it was unexpectedly obliged to spend astronomical sums for imported oil, and even though foreign competitors had already made deep inroads into traditional American bastions, from radios to steel. The trade deficit for the entire decade of the seventies was $20 billion. Now things have changed so drastically that the deficit for 1985 alone will be more than $120 billion.

To make quickly the point that Walter Mondale made ad nauseam but to no effect in last year's campaign: the sudden collapse of the United States in international trade may have something to do with poor management or shoddy workmanship or unfair trade restrictions, but it mainly has to do with ballooning federal deficits. Because of the deficits, the government needs to borrow more money; because it has borrowed more, real interest rates have gone up; because U.S. interest rates are higher, foreigners are depositing more money in American banks; and because so much foreign money has been coming into the country, the exchange rate for the dollar became and has stayed unreasonably high. By most estimates, the dollar is worth about 40 percent more than its "natural" value against European and Japanese currencies. This is the equivalent of a 40 percent export tax on U.S. products, and it has had predictable results.

As recently as 1980 the merchandise category of U.S. trade accounts—which includes automobiles, shoes, and all the other manufactured goods in which the United States has psychologically conceded defeat—showed a $20 billion surplus. By last year that had changed to an $80 billion deficit, a swing of $100 billion in four years. According to Peter Peterson, a former secretary of commerce and a present-day Jeremiah about deficit spending, the decline in exports has cost the United States 2.5 million jobs. Roy E. Moor, of the First National Bank of Chicago, has pointed out that of all the dozens of categories of American industry, only five managed to sell more goods abroad in 1984 than they sold in 1981—and even in those "successful" industries imports grew much faster than exports. The greatest American success stories were in the "business and office machine" category, notably computers. But even there imports grew almost four times faster than exports. Apart from the five successful groups (the others were cars, non-medicinal chemicals, non-food consumer goods, and electrical and electronic products), *all* other categories of American industry exported less in 1984 than they had in 1981. By the middle of 1984 the United States was importing 60 percent more than it was exporting—the most unfavorable ratio in our modern history, and one found more often among developing countries than among major industrial powers.

The competitive position of the United States might theoretically be brighter than the balance-of-payments figures would imply. American companies might conceivably be building efficient new plants overseas, with which they would defend their market share, even though they would not be restoring American jobs. But since American exports have collapsed so suddenly, such long-term investments would be slow to take up the slack—and in fact the flow of investments has been running the opposite way. Rather than sending capital abroad to build new plants and equipment, the United States has started borrowing from other nations, to subsidize its own consumption. This in turn helps explain the second radical change in America's economic position: the virtually instantaneous disappearance of the financial credits the United States had slowly accumulated around the world.

During the nineteenth century, when the United States was expanding its railway network and establishing its industrial base, foreign investors made loans and bought stock to provide much of the necessary capital. Late in the century, when the United States emerged as a pre-eminent industrial and agricultural power, it began to reverse the flow, using its new earnings to make loans and start business overseas. By the beginning of the First World War the United States had become a net international creditor for the first time in its history, meaning that the value of its loans and investments in other countries exceeded the value of foreign investments here. For the next sixty-five years its standing as a creditor improved, until in 1982 it enjoyed an international-investment surplus of $150 billion.

Then, in less than three years, everything changed. In the world as economists usually imagine it, the United States could not have gone into debt as rapidly as it in fact has. If the country developed a grievous balance-of-trade problem, the obvious next step would be for the value of the dollar to fall. The Japanese and Germans, having sold their wares to Americans and bought little in return, would find themselves with unwanted surpluses of dollars. When they exchanged them for the yen or Deutschmarks they preferred to have, the pressures of supply and demand would drive down the value of the dollar relative to other currencies. This, in turn, would make imports more expensive in the United States and American exports more attractive. The trade imbalance would be self-correcting.

But that is not what the Japanese and others have done with their dollars. For a variety of reasons—lack of investment opportunities in their own countries, persistently high interest rates in the United States, other factors whose influence economists are now debating—they have deposited their dollars in U.S. banks and bought U.S. bonds, rather than trading the dollars for yen. Several consequences have followed. Japanese VCRs and Italian shoes seem artificially cheap in the United States, since the value of the dollar has been held artificially high. Credit is artificially easy for Americans to obtain, since the Bank of America can use the deposits it has received from Japanese investors to make loans to families that want to buy Japanese cars. When all the complications are boiled away, what's left is a cycle in which the United States started borrowing money from foreigners to buy cutrate foreign goods—and has kept borrowing and buying at faster and faster rates.

By the end of last year the international debts of the United States had grown so quickly that they had come to equal its in-

vestments. And they kept on growing; indeed, because of the workings of compound interest they gathered speed as the United States moved deeper into the debtor category. By the end of this year the United States will stand roughly $100 billion in debt to the rest of the world, which will make it the largest debtor nation, eclipsing the Mexicos and Argentinas—and this less then three years after being the largest creditor. By the end of next year it will owe at least $100 billion more.

One crucial technical measure of the velocity at which a country is moving into debt is the ratio between two financial indicators, the current-account deficit and the exports of goods and services. Roughly speaking, the equivalent measure for a household is the ratio between how much new money it is borrowing each year and how much it earns. In 1982, when the Third World's "debt crisis" was widely publicized and feared, this ratio reached a peak of 24 percent for the major debtors. Peter Peterson points out that in 1984 the United States' ratio rose above 25 percent.

The third and most familiar of the economic changes is the phenomenal growth of federal deficits during the past four years. "Deficit spending" has been such a traditional bogey in U.S. politics that it is surprising to realize how modest most previous deficits have been. Before 1980, only twice in America's peacetime history had the annual federal deficit equaled more than three percent of the gross national product. The deficit for 1983, the largest in American history in both relative and absolute terms, equaled 6.4 percent of the GNP. According to most projections, the deficit will remain indefinitely in the five-percent range, unless federal taxing or spending policies change far more dramatically than any politician has yet proposed.

The previous "large" deficits all occurred either during wars or during economic recessions, when tax receipts are unusually low and social-welfare spending is high. These new deficits are much less cyclical. Indeed, the Administration's projections show sustained high deficits despite an assumption that the economy will grow smoothly and uninterruptedly in the future, as it never has grown in the past. Politicians such as Congressmen Jack Kemp and Newt Gingrich and journalists such as Robert Novak and Robert Bartley, the influential editorial writer for *The Wall Street Journal*, have said that warnings about the deficits are more of the old leftist defeatism. Why concentrate on the bad news, when with the correct optimistic policies we can grow our way out of the deficit? True, the deficit may shrink if the tonic effects of Reaganomics are so powerful and long-lasting that the American economy moves onto an entirely different plane, like an underdeveloped country reaching "take-off," in W.W. Rostow's famous model. If unemployment goes below four percent and stays there, and if real growth reaches five or six percent a year and stays there, then the nation's greatest concern will be managing its affluence and leisure time. But short of that, the deficit won't "grow" away. The basic mathematics of today's tax and spending policies will leave a chronic gap between what the government takes in and what it pays out.

As Ronald Reagan understands, Walter Mondale learned, and the U.S. Congress demonstrates each day, debt and deficits are practically meaningless as political issues. "Nobody has successfully translated the evils of debt and deficits from the abstract to the real," Representative Jim Jones, of Oklahoma, a former chairman of the House Budget Committee, told me this summer. "Once it's shown to be a pocketbook issue, it will be dealt with. But for now it's all downside."

In the White House and Congress early this spring there was a flurry of concern over the deficits. The Administration's pollsters determined that with Mondale safely interred, the public was starting to express worry about the deficits. But once Congress has passed mild anti-deficit measures, which would stop the defense buildup and cut about $50 billion from the 1986 deficit (leaving it at about $170 billion), the issue resumed its accustomed seat in the rear.

The unsexiness of dealing with deficits is hardly surprising. When the workings of compound interest are considered, it becomes obvious why the sudden recent shifts in our economic standing have not yet registered as a national crisis—indeed, have done so much for our recent prosperity—and why they will cause so much harm for so many years to come.

Of the three recent changes, one can be depended on to correct itself, sooner or later. At some point we'll have sent more dollars to Japan than the Japanese care to deposit in American banks or sink into U.S. Treasury bills. Then the value of the dollar will fall, imports will become more expensive, and the trade deficit will be reduced. The main uncertainty is how this will occur. Will the United States carry out its threats to retaliate against the Japanese with protectionist laws? (It may seem quaint now, but in 1971 Richard Nixon's revolutionary package of protectionist measures was provoked by fears of a two-billion-dollar annual trade deficit, or roughly six days' worth at today's pace.) Will foreign investors decide to do us a favor, by shifting their capital to other nations gradually, thereby decreasing demand for the dollar slowly and letting its value drift gently down, in turn making U.S. exports more attractive? Will there instead be a panicked run on the dollar, suddenly disrupting certain industries and reintroducing us to our old nemesis, inflation?

Whenever and however the inevitable adjustment occurs, the years of grotesque trade deficits will have done some damage, perhaps even of the "irreversible" variety. How much goodwill and market position will the Caterpillars and IBMs have sacrificed? And will other countries be so thoroughly accustomed to our insatiable demand for imports as to have difficulty in adjusting to its disappearance? Bankers and economists point out that for the past four years the U.S. trade deficit has been a powerful, if imprecisely directed, antipoverty weapon. Our imports are everyone else's exports, so the booming demand here has given developing countries (along with Japan and Europe) a chance to sell their wares. All we have asked in return is that they lend us the money with which to make the purchases. By creating a debt crisis of its own the United States has helped other countries solve theirs.

While the adjustment may be rocky and the damage to U.S. exporters profound, the trend of the trade imbalance has to be toward correction. It is hard to be so confident, if that is the word, about what will become of the country's newly accumulated foreign debts and federal deficits.

From the beginning of the First World War to 1982 the position of the United States as an international creditor generated a steady stream of dividends and profits for U.S. investors. Money deposited in English banks caused interest payments to be sent back to the United States. Investments that helped build oil wells in Indonesia or computer factories in France or clothing works in Taiwan came back to America as profits. Some of the money was taxed away and used by our government; some was reinvested at home or abroad; some was spent on goods from cars to caviar; some may have been stashed in Swiss bank accounts, which pay little or no interest but offer the comfort of anonymity, or simply squandered. Whatever its precise disposition, all of it was money that the nation did not have to generate by other means. Taxes were lower, government benefits more generous, the standard of living higher than would otherwise have been the case. Whenever the United States had trouble exporting merchandise, the profits and dividends streaming back from overseas helped the nation pay for the imports it desired.

Now the situation is exactly the reverse. The $300 billion in foreign loans that have come into the country in the past three years have given us Hondas and Beaujolais we could not otherwise have afforded and (to the extent that foreigners have lent money to cover the federal deficit) government benefits for which we would otherwise have had to tax ourselves. In exchange for these three years of subsidized consumption we have obligated ourselves to send profits and dividends the other way from now on. Whatever benefit our six decades of foreign investment represented, our rapidly growing foreign debt now constitutes an equivalent handicap.

The increase in federal indebtedness arises from the same exchange—subsidized consumption now, in return for a lower standard of living in the future—but is on an even grander scale. During the Second World War the United States took on an enormous debt, in the attempt to defeat Hitler and Tojo. But for the next thirty-five years federal debt gradually declined relative to the rest of the American economy. That trend reversed itself with the coming of the Reagan Administration, and because of what has happened from 1981 to 1985, the United States for the indefinite future will see its freedom of action reduced. Because of just these four years of debt, Ronald Reagan's successors will find it hard to do anything other than meet the government's interest obligations, and the nation as a whole will have more difficulty investing in education, technology, or other sources of happiness and wealth.

In 1980 one dollar of each ten the federal government spent was to pay interest on the national debt. Now interest consumes one dollar of each seven. To put it another way, nearly four dollars of each ten the government collects in individual income taxes goes not for Trident submarines or National Park rangers or even for Social Security benefits but for the premiums on Treasury bills. As interest payments continue to rise, the government must collect more in taxes, reduce its other functions, or borrow more money—and borrowing more of course means that interest payments will rise even faster the following year.

As the House Budget Committee summarized the situation, in a report last May: "The rising interest burden makes the distribution of income more unequal; it will eventually lead to higher taxes which may affect economic efficiency; and it means less room in the budget for Federal programs which meet genuine national security, in-

vestment, or social needs, rather than just servicing debt."

Already the federal budget is showing signs of being squeezed by interest payments—and, of course, by defense and Social Security. Ronald Reagan continues to talk as if he were holding the line on spending for everything except defense, but in fact his legacy will be to have presided over large increases in interest payments, Social Security, and Medicare, in addition to defense. (Defense spending has risen from 5.8 percent of the GNP in 1975 to 6.5 percent now, on its way to the Administration's goal of 7.8 percent in 1990. Social Security and Medicare have risen from 5.2 percent in 1975 to 6.6 percent now.) The radical reductions have come only in the small part of the budget left over after these big-ticket accounts have been funded. Even though federal spending, as a proportion of the GNP, is higher under Ronald Reagan than it has been under any other President except Franklin Delano Roosevelt in wartime, spending for everything except interest, Social Security, plus Medicare, and defense has shrunk. In 1975 this "other" category of federal spending accounted for 11.1 percent of the GNP; it is now 9.3 percent and according to the Administration's projections should fall to 6.0 percent by 1990.

Some conservatives claim that a hidden virtue of deficits is precisely that they starve the government and thereby keep the liberals from dreaming up any crazy new ways to waste money. Twenty years ago politicians were arguing about which programs to expand; now everyone argues about where to cut. If the deficits ever shrank, the conservatives say, those irrepressible liberals would be trying to start programs again.

Useful as it may be for the conservatives at this moment, this endorsement of deficits does seem shortsighted, both for their own political interest (what greater enemy do the defense budget and lower taxes have than the deficit?) and for the nation's ability to compete economically. Far beyond the effect that the government deficit has on the federal budget, it is beginning to encroach on the entire society's ability to invest in its future. One measure of how much capital is available for productive investment is the U.S. "net savings rate"—private savings, minus depreciation, plus surpluses generated by state and local governments. Since 1960 this measure has held remarkably constant, at about eight percent of the GNP. But after the demands of the federal deficit have been satisfied, there has been less and less capital left for other purposes. For the period 1961 to 1970, 7.4 percent of the GNP, or better than 90 percent of net savings, was available for investment and capital formation, after covering the deficit. From 1981 to 1984, 2.7 percent, or about a third of net savings, was. Federal deficits now consume two thirds of the nation's net savings. Only one third is available for investment in future growth.

Many types of federal spending, of course, result in what should be considered productive investments—highways, schools, hospitals, agricultural-research stations, and even space missions are obvious examples. The public debt might be less worrisome if its growth could be explained by projects like these, which can in various ways eventually help cover their own costs. But today the government is spending and borrowing much more but investing less. The only increases in government spending have been for interest, retirement, and the military. (Caspar Weinberger often claims that defense spending is "productive," since it creates jobs, technical spin-offs, and so forth, but few economists take this idea seriously. Almost any other type of spending creates more jobs. And money devoted to commercial research and development is more likely to produce usable technical innovations—otherwise, how would the Japanese, with virtually no military establishment, have stayed in the technical race?)

Few experts pretend to understand fully the forces that have kept the dollar rising in value even as U.S. exports have fallen, thereby aggravating the accumulation of debt and confounding the underlying logic of economics. Still, it's hard not to conclude that something fundamental has changed in the U.S. economy in the past four years—namely, the assumption about how, and whether, we will pay our way.

As the President and his representatives have often emphasized, the United States has enjoyed a kind of economic renaissance in the past two years. After the severe recession of 1982 the United States began creating new jobs and generating new opportunities at a tremendous clip. Income is up; inflation is down; the Europeans are mad with envy. The bath of resultant good feelings helps explain the President's overwhelming re-election a year ago.

Part of the credit for the economic recovery must go to changes that the Reagan Administration deliberately made. Everyone likes lower taxes. Those intangible but undeniable feelings of confidence and optimism have increased. Still, a look at the balance sheets suggests a more obvious explanation for America's feeling good about itself. Why shouldn't we feel good, when we're paying only eighty cents for every dollar of government benefits we receive? What's not to like, when we can buy a dollar's worth of imports with exports worth sixty cents. Everyone feels optimistic on an expense account—and everyone is ready to believe that he deserves every comfort he's been offered, and then some. The genius of Ronald Reagan has been to play to these natural vanities, helping us believe that what looks very much like a subsidy is in fact proof that we are standing tall. Such is the emerging idea of "service" under President Reagan (they also serve who only stand and spend). We will bear any burden, except those that are inconvenient. We will do whatever it takes to re-arm the United States—except draft the soldiers or raise taxes to pay for the weapons. We will do all that's necessary to rebuild the American economy, by getting used to being subsidized.

If we could count on the boom to last forever—if other nations would subsidize us indefinitely in order to create a market for their goods—we'd have no source of discomfort except dreary puritanical reminders that we had turned into freeloaders. Or if we were sure we could readjust to the old ways whenever the boom came to an end, then even as we paid the bills we could think back fondly to a free ride that lasted a few years. But given the ratchet effect of democratic politics—it's much harder to give something up than to keep doing without something you never had in the first place—how can we ever go back to the old days? Given the humiliation of Walter Mondale, how many politicians will run on a platform calling for higher taxes?

The House of Representatives—like the Senate, and like President Reagan—has not made any significant dent in the deficits. But the House Budget Committee at least made clear in its report on deficit spending that the ultimate cost of chronic deficits was "the way citizens view their government":

"In the short term, [Americans] may find it an attractive "bargain" to receive $100 in national defense and government services for only $80 in taxes, as at present. In the longer term they will react in anger and disappointment when they find the deficit must be paid for, after all, with higher taxes and inflation. As this process proceeds, confidence in government and the competence of fiscal management will erode, further weakening the political institutions of our society. That may be the final and most costly burden placed on future generations."

Ronald Reagan's supporters contend that his Administration has restored confidence and patriotism to a nation that lacked them. Maybe so; but it may be remembered longer for conditioning us to the free lunch.

THE GREATER ST. JOSEPH UNITED WAY

Mr. EAGLETON. Mr. President, later this month a dinner will be held in St. Joseph, MO, to mark the conclusion of this year's Greater St. Joseph's United Way Giving Campaign. This victory dinner will celebrate the efforts of thousands of individuals who raised an extraordinary amount of money this year, and whose labors help fund the good works of the St. Joseph United Way. I might add that their success was achieved in the face of the difficult economic conditions affecting the St. Joseph region. Their work is a fine tribute to the generous and caring people of St. Joseph and the State of Missouri.

The victory dinner will have a most special guest of honor—Julie Bartee—a wonderful young lady who stars in this year's national United Way film with singer Loretta Lynn. Julie's association with the United Way goes back some 17 years when she made her first United Way film, also with Loretta Lynn. This year's victory dinner will be a special and memorable occasion with her presence.

I invite my colleagues to take a moment from their duties today to pay tribute to this approaching important event and the hard work, concern and generosity it represents.

RESIGNATION OF SVEN GROENNINGS

Mr. STAFFORD. Mr. President, I am sorry that Sven Groennings has resigned as the Director of the Fund for the Improvement of Postsecondary Education. Sven has done an excellent job as the Chief Administrator of this important program over the last 4½ years, and I wish him well in whatever new endeavors he chooses to undertake. My strong support for a streamlined FIPSE Program which is independent of the regular Education De-

partment bureaucracy, will continue as it always has, and will be particularly reflected in the reauthorization legislation for the Higher Education Act soon to be considered by the Senate Education Subcommittee.

TRIBUTE TO JAMES R. SPIRKO

Mr. SPECTER. Mr. President, I wish to call the Senate's attention to the exemplary life of public service of Mr. James R. Spirko the jury commissioner for Allegheny County, who is retiring after many dedicated years of community service.

A life-long resident of Allegheny County, PA, Mr. Spirko has served western Pennsylvania for more than 22 years—as the superintendent of the Pennsylvania State Highway Department and on the district attorney's staff as chief indictment clerk, chief grand jury clerk, and assistant office manager. He was elected jury commissioner of Allegheny County in 1973 and will remain in office until his retirement at the end of this year.

I am sure my colleagues join me in commending Mr. James R. Spirko for his long and devoted service to western Pennsylvania.

THE KANSAS CITY, KANSAS, ROYALS AMERICAN LEAGUE CHAMPIONS

Mr. DOLE. Mr. President, once again the Kansas City Royals have demonstrated why they are indeed one of baseball's most successful franchises. The team's stunning comeback in the American League playoffs has sent them roaring into the World Series where they will get the attention and credit they deserve. However, there is one fact that seems to have been overlooked in all the excitement.

The media are now calling the upcoming World Series "the I-70 Series," focusing on the fact that the participating cities of St. Louis and Kansas City are on either side of the great State of Missouri. Well, correct me if I am wrong, but I-70 goes all the way to my Kansas City, too. Contrary to some reports, the interstate does not fall off the end of the Earth when it hits the Kansas border. Rather it runs straight into the hearts of the most loyal fans in the major leagues. Kansas City, KS, is proud of its team. On behalf of all Royals fans in the Sunflower State, we congratulate our team and wish it all the best against the Cardinals in the World Series.

STATE ATTORNEYS GENERAL FIND ANTITRUST PROBLEMS WITH PROPOSED CONRAIL SALE

Mr. DIXON. Mr. President, today, the distinguished attorney general of Illinois, my good friend Neil Hartigan, testified before the Subcommittee on Monopolies and Commercial Law of the House Judiciary Committee. He was joined by his distinguished colleagues from Ohio and Pennsylvania, Anthony J. Celebrezze, Jr. and Leroy S. Zimmerman. These three attorneys general represented an even broader coalition of 16 State attorneys general, including the attorneys general from Illinois, Delaware, Iowa, Kansas, Kentucky, Louisiana, Maryland, Minnesota, Nebraska, New Hampshire, North Dakota, Ohio, Pennsylvania, Rhode Island, West Virginia, and Wisconsin.

All 16 of these antitrust experts believe that the proposed Norfolk Southern-Conrail merger is anticompetitive and unnecessary to ensure Conrail's return to the private sector. They found that this proposed merger would result in a radical restructuring of the American Railroad industry, and would cause substantial economic harm in the States they represent. They also testified that the merger would not be approved by the Interstate Commerce Commission if it were required to review this merger like it reviews every other railroad merger, and that the Norfolk Southern-Conrail merger should not be immunized from the antitrust laws.

These attorneys generals are not the only experts that have found antitrust problems with the Norfolk Southern transaction; even the U.S. Department of Justice believes there are problems. However, I believe they are especially well qualified to speak on this antitrust issue. They are all experienced in the antitrust area, and they all have significant antitrust responsibilities.

Attorney General Hartigan also testified separately on the issue, analyzing the impacts on regional railroads that connect with Conrail and reviewing the impacts it would have on the Illinois economy. He makes a strong case that a Conrail-Norfolk Southern merger is not in the interests of the citizens of Illinois, or the citizens of the rest of the Nation.

I share Attorney General Hartigan's views, and the views of his fellow attorneys general. I hope my colleagues will take the time to review their testimony. I'm sure they will find the attorneys general arguments persuasive, and indeed, compelling.

Mr. President, I ask unanimous consent that a copy of Attorney General Hartigan's testimony and a copy of the testimony of the 16 attorneys general be included at this point in the RECORD

There being no objection, the materials were ordered to be printed in the RECORD, as follows:

STATEMENT OF ILLINOIS ATTORNEY GENERAL NEIL F. HARTIGAN

Mr. Chairman and members of the Subcommittee, my colleagues and I would now like to supplement our joint remarks by individually addressing the specific anticompetitive harm to our respective states which would result from the proposed merger.

In order to put the issues of antitrust and competition into real terms, I want to begin by sharing with the Subcommittee today some facts concerning the debilitating effect which this merger would have on the economy of the State of Illinois.

The sale of Conrail to the Norfolk Southern would reduce the number of major rail carriers in large sections of the country from three to two, and in many instances from two to one. Norfolk Southern and Conrail today originate and terminate more than 50% of the rail traffic in eighteen counties in Illinois. Those counties account for 84,000 manufacturing jobs and annual manufacturing output of $3 billion. A merged Norfolk Southern-Conrail will dominate this rail traffic; in eleven of these counties, the Norfolk Southern-Conrail combination will control more than 90% of the inbound and outbound tonnage.

Increased concentration of this magnitude will destroy much of the railroad competition Illinois shippers now enjoy. A Norfolk Southern-Conrail combination, in the words of the International Minerals and Chemicals Corporation in Northbrook, Illinois, "would be a disaster." The American Iron and Steel Institute, the principal trade association for the steel industry, opposes the proposed sale "on the belief that the merger will reduce competition from three to two or fewer railroads for our shipments, that efficiencies that might accrue from the merger will not be passed on to shippers, and that over the long term our rail costs will increase." As you well know, our domestic steel industry can ill afford further weakening of its competitive position.

There is no question that increased competition, coupled with substantial barriers to entry, reduces price competition. The Shippers for an Independent Conrail ("SIC"), in testimony before this Committee, estimated that rail rates would increase 25% for plants now served by three lines if in the future they are ultimately served only by a combined Norfolk Southern-Conrail. This estimate was based on a survey by an SIC member which showed that plants served by only one railroad have rates 22% higher than plants served by two railroads, and that plants served by two railroads have rates 6% higher than plants served by three or more railroads.

The Quaker Oats Company recognized this economic fact when it stated, "In our last fiscal year, we shipped approximately 11,500 carloads over Conrail, and 10,000 carloads via the Norfolk Southern. We believe that the total expense for such movements will be subject to significant increases if Norfolk Southern acquires the core of the Conrail advantages." (March 26, 1985 letter from Clifford F. Lynch, Quaker Oats, to Senator Paul Simon of Illinois).

Further, increased concentration reduces railroads' incentives both to achieve efficiencies and to pass those efficiencies on to shippers in the form of lower rates. Absent effective competition, a combined Norfolk Southern-Conrail would not be required to lower its costs or reduce its rates to maintain or increase traffic volumes.

The second, but no less substantial, effect of the proposed Norfolk Southern-Conrail combination on Illinois would be the diversion of traffic from Midwest regional railroads. The U.S. Railway Association agreed with the following estimates of traffic diversion which would result from a Norfolk Southern-Conrail combination: Chicago &

North Western, $54 million; Illinois Central Gulf, $32.3 million; Grand Trunk Western, $31.4 million; and Soo/Milwaukee, $47.5 million.

Much of the $165.2 million in lost revenue will be in the form of simple diversion, i.e., traffic which flows between the same origin and destination, but via a new route. This would occur in part because a Norfolk Southern-Conrail combination is expected to divert substantial volumes of traffic from the Chicago and East St. Louis gateways to Kansas City, a proposition which is not disputed by Norfolk Southern. A Norfolk Southern-Conrail combination could also be expected to divert much of the traffic now exchanged by Conrail and the ICG at Effingham, Illinois to Norfolk Southern lines.

The diversions are particularly troublesome because of their long-term implications. Diversions of the magnitude predicted will threaten the economic viability of some of these railroads. The U.S. Railway Association expects that the ICG will lose some of the most profitable traffic on its system and that traffic density will decrease to such an extent that unit costs could be seriously affected. The same is true of the C&NW. If this happens, the survivability of these carriers may be in doubt. Shippers in Illinois will be significantly harmed if they lose the service and the competitive benefits provided by these carriers.

Proponents of the sale have tried to alleviate concerns about the regional railroads by pointing to Norfolk Southern's covenant to negotiate agreements under which Conrail will maintain or reestablish "reasonably direct and cost-competitive routes of major importance." Memorandum of Intent between the United States of America and Norfolk Southern Corporation, February 8, 1985, Paragraph 12(a)(viii).

We find nothing reassuring in this covenant. First, by its very terms, it does not apply to regional railroads in the Midwest. Second, the wording of the covenant is so vague that disputes over its interpretation may not be resolved during the entire five years it is in effect. What may seem like a reasonably direct major route to the Illinois Central Gulf or the Chicago & North Western may not seem so major to Secretary Dole or, if the Administration changes, to her successor. Third, the regional railroads have no explicit authority to enforce the covenant. Indeed, both Secretary Dole and the FRA Administrator testified before the Subcommittee on Commerce, Transportation and Tourism that it is their specific intent that the third party beneficiaries of these provisions (the regional railroads) have no independent right to enforce the covenants. Fourth, the covenant is in effect for only five years. After that then, the shippers and industries in Illinois can reasonably expect that the regional carriers upon which they depend for reliable service may not remain viable. As a result, these shippers will suffer a diminution in service and competition. Quite frankly, this is not acceptable to us and it should not be acceptable to you.

In addition, the diversion of traffic revenues from regional railroads by the Norfolk Southern-Conrail combination would also cause significant job losses in Illinois. It has been estimated that approximately 1,000 railroad jobs will be lost in the state, and that 3,000 additional jobs will fall prey to the ripple effect.

Third, the proposed Norfolk Southern-Conrail combination would harm Illinois producers who compete in national markets. Railroads will often take measures to protect companies located on their lines so that those companies will be able to compete in national markets.

For example, various Illinois producers of vegetable oil presently served by Conrail and located in Decatur, Danville and Champaign compete with producers of vegetable oil served by Norfolk Southern for sales in New York and Philadelphia. When these Illinois producers experienced a declining export market amid other unfavorable market conditions, Conrail substantially reduced its rates on Illinois vegetable oil destined to the East. This action by Conrail enabled the Illinois producers to successfully compete with the producers located on Norfolk Southern lines. If Conrail were sold to Norfolk Southern, this competition would no longer exist, and there would be no reason for Norfolk Southern-Conrail to promote Illinois producers at the expense of its Southern customers.

The adverse impact on the economy of the State of Illinois from the proposed merger of Norfolk Southern and Conrail would be swift and sure. Illinois shippers would face drastically reduced rail competition and, therefore, substantially increased rail rates. Regional railroads in the Midwest would lose millions of dollars in revenue to the combined Norfolk Southern-Conrail megacarrier, resulting in the loss of thousands of jobs in Illinois and through the Midwest, and threatening the very viability of these railroads. Moreover, Illinois shippers and shippers throughout the Midwest will permanently and irretrievably lose the unique advantage of an aggressively competitive independent Conrail. Finally, the sale of Conrail to Norfolk Southern is unnecessary to achieve the objectives of the Department of Transportation and the Congress. Conrail is a strong, independent railroad, and there is no sound rationale for damaging rail competition in the United States by selling Conrail to Norfolk Southern.

JOINT COMMENTS OF ATTORNEYS GENERAL

(Neil F. Hartigan of Illinois.)
(Charles M. Oberly of Delaware.)
(Thomas J. Miller of Iowa.)
(Robert T. Stephan of Kansas.)
(David L. Armstrong of Kentucky.)
(William J. Guste, Jr. of Louisiana.)
(Stephen H. Sachs of Maryland.)
(Hubert H. Humphrey, III of Minnesota.)
(Robert M. Spire of Nebraska.)
(Stephen E. Merrill of New Hampshire.)
(Nicholas Spaeth of North Dakota.)
(Anthony J. Celebrezze, Jr. of Ohio.)
(Leroy S. Zimmerman of Pennsylvania.)
(Arlene Violet of Rhode Island.)
(Charlie Brown of West Virginia.)
(Bronson C. Lafollette of Wisconsin.)

Mr. Chairman and members of the Subcommittee, I am Neil Hartigan, Attorney General of the State of Illinois. I am accompanied today by my colleagues Leroy Zimmerman of Pennsylvania, and Anthony J. Celebrezze, Jr. of Ohio. We are also presenting the views of the following Attorneys General: Charles M. Oberly (Delaware), Thomas J. Miller (Iowa), Robert T. Stephan (Kansas), David L. Armstrong (Kentucky), William J. Guste, Jr. (Louisiana), Stephen H. Sachs (Maryland), Hubert H. Humphrey, III (Minnesota), Robert M. Spire (Nebraska), Stephen E. Merrill (New Hampshire), Nicholas Spaeth (North Dakota), Arlene Violet (Rhode Island), Charlie Brown (West Virginia) and Bronson C. LaFollette (Wisconsin).

They share our belief that the proposed Norfolk Southern-Conrail merger is (1) anticompetitive; and (2) unnecessary to the return of Conrail to the private sector; and that it would (3) result in a radical restructuring of the American railroad industry; and (4) cause substantial economic harm to our states; (5) would not be sanctioned by the ICC if presented for approval as required for all other railroad mergers; and should not be (6) immunized from the antitrust laws.

At the conclusion of our joint remarks, I will address the specific anticompetitive harm to Illinois, General Zimmerman will discuss the specific adverse effects on the Northeast and Pennsylvania, and General Celebrezze will comment on the effects on Ohio. We are also submitting for the record a statement of Louisiana Attorney General William Guste detailing the impact in Louisiana.

We commend this Subcommittee for conducting this series of hearings to specifically examine the antitrust issues involved with the proposed merger. As the chief antitrust enforcement officers in our respective states, my colleagues and I share this Subcommittee's profound respect for our free enterprise system and the benefits conferred by a competitive marketplace.

We are here today, Mr. Chairman, to urge the Congress to reject the extraordinary and unnecessary proposed legislation to permit the largest railroad combination in American history.

I. MERGER'S MAGNITUDE

The proposed sale of Conrail by the Department of Transportation to the Norfolk Southern Corporation is of unprecedented magnitude. It will create the nation's largest railroad, with 32,000 miles of tracks extending through 23 states. It will eliminate head-to-head competition between the Norfolk Southern and Conrail throughout many of our states. It will have a devastating effect on the Midwest, the Northeast, and the South.

II. ANTITRUST IMMUNITY

The proposal is unprecedented in another way. The authorizing legislation would immunize the merger from the antitrust laws, despite the fact that the merger will create a "mega-carrier" with devastating impact on railroad competition in the Eastern and Midwestern regions of our country.

The Department of Transportation's proposed legislation would shortcircuit all the hearing and review procedures that the Congress has carefully built into the Interstate Commerce Act (Chapter 13 of Title 49, U.S.C.) to assure that rail mergers do not violate fundamental antitrust principles. Under current law, all proposed rail mergers are subjected to a full-scale adjudicatory hearing, where interested parties have an opportunity to present evidence and to cross-examine the proponents of the merger. A complete hearing record is compiled upon which the ICC must base its decision to approve or disapprove the proposed transaction. As an added safeguard, the ICC's decision is subject to judicial review.

None of these protections will apply in this case. Instead, the proposed legislation would confer absolute antitrust immunity upon both Norfolk Southern's purchase of Conrail and Norfolk Southern's future operation of Conrail as part of the giant Norfolk Southern system.

Mr. Chairman, there is no emergency or pressing national need which justifies such

a drastic and unprecedented proposal. Conrail is not a failing company that can only be saved by a sale to a major competitor. To the contrary, Conrail is a thriving, profitable carrier. By the end of 1985, Conrail will have had five consecutive profitable years. Conrail had a net income of $210 million for the first six months of this year and expects to have $995 million in cash on hand at the end of the year. A study by the independent U.S. Railway Association concludes that there is every reason to expect Conrail's record of profitability to continue.

It is clear that a transaction of this scope and magnitude merits closer scrutiny than the Norfolk Southern-Conrail merger has received to date. This Subcommittee's efforts have been highly successful in illuminating many of the heretofore unnoticed competitive problems with the proposed merger. However, the limitations inherent in the hearing process prevent it from fully replacing the rigorous analysis and judicial review which railroad mergers historically have received.

The Federal Government "bailed out" the bankrupt Penn-Central and other Northeastern railroads and created a viable Northeastern railroad system under the aegis of Conrail. Congressional approval of a Conrail-Norfolk Southern merger without an appropriate ICC evidentiary hearing would be the equivalent of legislatively sanctioning the acquisition of Chrysler by General Motors or of Lockheed by General Electric after the Federal Government's guarantees resulted in the successful rehabilitation of these companies.

Secretary Dole's objective to see Conrail transferred to the private sector is commendable and one which we endorse. Such a laudable goal alone does not, however, justify a sale that will have enormous anticompetitive impacts in violation of basic antitrust principles.

In contrast to the rigorous scrutiny to which rail mergers are traditonally subjected, the only formal scrutiny of the current proposal has been a cursory study by the Department of Justice. This review did not use the most accurate and generally accepted method of describing geographic competition, and it was inconsistent with the standard analyses used by the Department in other rail merge cases. Consequently, the Department's report significantly understates the anticompetitive effects of the merger.

Even so, the Department concluded that a Norfolk Southern-Conrail merge would violate both the Clayton and Interstate Commerce Acts without proper divestitures. But, as we discuss later, the divestitures proposed thus far—to Guilford Transportation and the P&LE Railroad—are completely inadequate.

A sale of Conrail to Norfolk Southern would constitute a radical and unnecessary departure from the long-term approach established by Congress to replace regulation with competition in the railroad industry. For example, the Staggers Act, 49 U.S.C. § 10101a (1985), states a congressional policy "to allow, to the maximum extent possible, competition and demand for services to establish reasonable rates for transportation by rail. . . ." Congress reaffirmed this policy in enacting the legislation which provides for the sale of Conrail as a single entity. The preservation of rail competition was a fundamental objective of the Regional Rail Reorganization Act of 1973, the Railroad Revitalization and Regulatory Reform Act of 1976, and the Northeast Rail Service Act of 1981. The House Report accompanying the Northeast Rail Service Act, 45 U.S.C. § 761 *et. seq.* (1981), states:

"A balanced and competitive transportation system is essential to the entire country, and in selling the assets of Conrail the Secretary must not harm the delicate and competitive balance of the transportation systems of the country." H.R. Rep. No. 153, 97th Cong., 1st Sess. 9 (1981).

Since the Staggers Act was enacted in 1980, however, the number of Class 1 railroads has decreased from 31 to 21, with three mergers now pending. Shippers are therefore faced with the loss of both regulation and competition in the battle to maintain reasonable rail rates. It is in this context that the Norfolk Southern-Conrail merger must be evaluated.

Congress clearly did not envision such increased concentration and reduced competition when it promulgated its merger policy, which is generally unfavorable to mergers. Section 7 of the Clayton Act, the primary statute under which mergers have been challenged, is intended to prevent restraints of trade in their incipiency. Thus, Section 7 prohibits mergers and acquisitions where "in any line of commerce in any section of the country the affect of such acquisition may be substantially to lessen competiton, or to tend to create a monoply." 15 U.S.C. § 18 (1980) (emphasis supplied). The Supreme Court recognized that Section 7 reflects as "intense congressional concern with the trend toward concentration" in the United States economy. *United States* v. *Philadelphia National Bank*, 374 U.S. 321, 363 (1963). Further, the Court held in Philadelphia National Bank that "if concentration is already great, the importance of preventing even slight increases in concentration and so preserving the possibility of eventual deconcentration is correspondingly great". 374 U.S. at 365 n. 42.

III. DEFICIENCIES IN DEPARTMENT OF JUSTICE ANALYSIS

The Antitrust Division of the Department of Justice concluded, based on a superficial analysis, the "the proposed [Norfolk Southern-Conrail] merger would violate both Clayton and Interstate Commerce Act merger review standards." (January 29, 1985 letter from J. Paul McGrath to the Secretary of Transportation). Assistant Attorney General McGrath further noted that "the merger would have a significant adverse effect on competition for the transport of commodities to and from a number of locations in several states, with the greatest adverse effect occurring at locations along an east-west rail corridor running between Buffalo and Pittsburgh in the east and St. Louis and Chicago in the west."

As significant as those findings are, it is clear that the Justice Department seriously understated the likely impact of a Norfolk Southern-Conrail merger. In its January 29, 1985 letter to Secretary Dole, the Antitrust Division identified only 10 counties—five in Ohio, two in Michigan, two in Indiana, and one in New York—that would suffer effects from the proposed Norfolk Southern-Conrail merger so adverse as to warrant the government's opposition to the transaction on antitrust grounds. Separate analyses by competing railroads throughout the country have identified substantially more. For example, one study identified 53 Business Economic Area (BEA) pairs that under the formula traditionally used by the Department would be considered "highly concentrated markets" where the merger would be likely to "substantially lessen competition."

This disparity is a result of several deficiencies in the Antitrust Division's analysis. First, the Antitrust Division, without explanation, made no use of the Herfindahl-Hirschman Index ("HHI")[1] in this case. The HHI, of course, is a formula used to measure the degree of concentration of a particular market. It was endorsed by the Department in both the 1982 and 1984 Merger Guidelines, and has been consistently used by the Department in analyzing the competitive effects of proposed mergers. In its Norfolk Southern-Conrail analysis, however, the Department employed a "50-10" test, whereby it examined only those geographic markets where (1) each of Norfolk Southern and Conrail currently has at least 10% of the rail transportation on movements in or out of the market, and (2) the railroads together have 50% or more of such traffic.

The exclusive use of the "50-10" test fails to recognize a substantial number of market areas which would be significantly affected by the proposed combination, since the "50-10" test would ignore all markets in which either Norfolk Southern or Conrail does not have a 10% share, regardless of the share of the other party.

For example, the Department identified Champaign, Illinois as a problem origin only for the commodity soybean oil. It identified Fort Wayne, Indiana as a problem destination for five commodities, not one of which was soybean oil. Yet, according to data compiled by CSX, Norfolk Southern carries 96.2% of all traffic from Champaign to Fort Wayne, and Conrail is responsible for the remaining 3.8%. Despite the fact that Norfolk Southern and Conrail have 100% of the rail market at this point pair, the Department did not identify it as a problem.

Second, the Department understated the anticompetitive effects of the proposed Norfolk Southern-Conrail combination because it deviated from its traditional practice of using a "point pair analysis"—that is, using actual flows of traffic between and among geographic points as the measure of railroad market share. Point pair analysis has been an important element of the government's evaluation of proposed mergers for some years.[2]

In the Norfolk Southern-Conrail analysis, the Department limited itself to consideration of traffic flows to particular locations and traffic flows from particular locations, and made no attempt either to correlate the two or to measure the true scope of the competitive foreclosure involved. For example, the Department did not identify Chicago as a problem origin or destination for any commodities, since no railroad dominates

---

[1] The HHI is calculated by summing the squares of the individual market shares of each company in the relevant (geographic and product) market. For example, the HHI for a market with four firms, each possessing 25% of the market, would be $25^2 + 25^2 + 25^2 = 25000$. The Department considers a market with a post-merger HHI above 1800 to be highly concentrated.

[2] "Point pair" analysis refers to the measurement of the market shares of various carriers who transport commodities from one location, or "point", to another. The Department has in the past used cities, counties, and Business Economic Areas ("BEAs") as its "points" for purposes of such analysis. For example, the Department recently concluded that United Air Lines' proposed acquisition of certain Pacific routes from Pan American would reduce competition in the United States-Tokyo markets. It recommended that the Department of Transportation require divestiture of a route between Tokyo and one of three U.S. cities. (Department of Justice Press Release, September 17, 1985).

the traffic at this major gateway. However, a shipper in Chicago faces highly concentrated markets when he desires to transport commodities to certain cities. According to CSX-compiled data, Norfolk Southern carries 9.6%, and Conrail 56.7%, of the traffic from Chicago to Pittsburgh. From Chicago to Cleveland, the combined market shares are greater: Norfolk Southern, 6.9%; Conrail, 75.4%. Even more concentrated is the market from Chicago to Buffalo, where Norfolk Southern carries 11.2% of the traffic, and Conrail has 80.3%. An analysis which only considers origin and destination points in isolation cannot be adequate, since the product which railroads sell is the movement of commodities from one point to another.

It is telling that the Department did not rely solely upon a "50-10" origin/destination analysis in the Sante Fe/Southern Pacific merger which is currently pending before the ICC. In that case, Dr. Pittman, the Department's economic expert, employed point pair analysis in which he applied the Department's Merger Guidelines. When questioned about the disparity between the Department's analysis in that case and in the Norfolk Southern-Conrail case, he conceded "I think I included some products by using both kinds of analysis, which it's conceivable that the Conrail analysis omitted unwisely." Santa Fe Southern Pacific Corporation—Control—Southern Pacific Transportation Company, Finance Docket 30400 at 13025 (emphasis supplied).

Application of the Santa Fe-Southern Pacific methodology to the Norfolk Southern-Conrail merger produces dramatically different results from those detailed in the Department's January 29 letter to Secretary Dole. A nationally known transportation consulting firm, which has often been retained by the Department, applied Dr. Pittman's Santa Fe/Southern Pacific methodology to the Norfolk Southern-Conrail merger. The study found that the Department had overlooked nearly 100 million tons of railroad traffic which would be adversely affected by the Norfolk Southern-Conrail combination.

Third, the Antitrust Division's analysis also discarded any market area in which the "major shipper" did not object to the Norfolk Southern-Conrail combination. This represents yet another significant deviation from the Department's historic pattern of railroad merger analysis. While the views of the major customers of a proposed combination are relevant, it is not appropriate for the Department to conclude that no competitive problem exists in a particular market simply because a large customer failed to object to a merger. The Department's economic expert in the Santa Fe case agrees. Dr. Pittman testified that "the fact that a shipper supports the merger is not the be-all and end-all, but it is relevant information, yes." Santa Fe/Southern Pacific, supra, at 13182.

Major customers are often in unique positions of strength vis-a-vis their suppliers, and are therefore not significantly affected when the level of competition is reduced. For example, major shippers may have plants throughout the country and may be able to counter the market power of a Norfolk Southern-Conrail combination by leveraging shipments from other plants, while smaller shippers must depend upon the antitrust laws to protect them from the acquisition and use of such power.

Fourth, the Department used a $2 million revenue cut-off level in determining problem markets. This cut-off removes from consideration numerous smaller markets where individual shippers or receivers are especially dependent upon rail service.

Fifth, the Department did not consider the competitive effect of traffic diversions from other railroads because it found that "it is extremely difficult to estimate the size of future diversions." In fact, the United States Railway Association found that the proposed Norfolk Southern-Conrail combination would divert hundreds of millions of dollars of traffic from several regional railroads.

Our objective in detailing the inadequacies in the Department of Justice's evaluation is to stress that there are enormous anticompetitive effects that the proponents of the merger have not even begun to address. The proposed divestiture and track-sharing remedies proposed by Norfolk Southern do not even touch on these effects. In fact, the anticompetitive effects of the merger are so fundamental and pervasive that it is difficult to visualize how they can be fixed.

IV. INADEQUACIES OF DIVESTITURE PROPOSAL

Ironically, the proposed solution to the limited problems identified by the Department—that is divestiture of certain lines to the Guilford and the P&LE—is not adequate to cure even the limited problems identified by the Department. Neither the Guilford nor the P&LE will be able to provide viable, long-term competitive rail service. The detailed ICC staff study on the viability of Guilford and P&LE, dated August 30, 1985, concludes that neither railroad will remain financially viable. The ICC forecast for Guilford is that "in fact, after a very marginal first year, Guilford will be unable to service its debt, and this deficiency will grow in each of the succeeding years. In the long run, it does not appear that Guilford will be a financially viable carrier." ICC Staff Divestiture Study at p. 9. The forecast for the P&LE is even more bleak. "It must be noted that, even if all of P&LE's projections are accepted, P&LE admits that it cannot service all of its substantial debt using revenues from rail operations. . . . In conclusion, P&LE is not now a financially viable carrier and its acquisition of the new lines will not enable it to reverse its already precarious financial position." Id. at pp. 9-10.

The Department of Justice is in agreement with the ICC staff study findings. In a letter of September 25 to Secretary Dole, the Department concluded that the divestitures to Guilford and the P&LE will not establish long-term viable competitive service to the Norfolk Southern-Conrail mega/carrier. The Department's findings were based on managerial, operational, and financial inadequacies of the Guilford and the P&LE.

After the Department released its September 25 letter, Norfolk Southern hastily announced that it was changing the divestiture plan for Guilford. Instead of selling Guilford the old Nickel Plate Line to St. Louis, Norfolk Southern announced that it would provide trackage rights to Guilford from points in Indiana and Ohio to East St. Louis. This revised plan will do little or nothing to solve the fundamental inadequacies of the whole divestiture scheme.

The Justice Department itself is not satisfied with the new proposal. Assistant Attorney General for Antitrust Douglas Ginsburg stated in a news conference that it did not appear that the new proposal addressed all his "concerns and questions." The new plan provides that Guilford can only carry "overhead" traffic. In other words, Guilford can carry traffic from Buffalo to St. Louis, but has little authority to pick up or deliver anything in between. Thus, while this substitute line may be somewhat faster and in less need of repair, it really does not provide Guilford any new markets.

In fact, the second proposal may well be somewhat worse from a competitive standpoint since Guilford will not own the track and will be dependent on cooperation from Norfolk Southern in order to provide what minimal competition it can muster. For example, if the tracks are crowded and there is a question of whose train and traffic is to get priority—Guilford or Norfolk Southern—it does not take an expert in railroad operations to know who will get the better service.

These are serious questions, and we believe they should be reviewed in depth before any action is taken. Once before, we were told by Norfolk Southern and Guilford that a perfect divestiture proposal existed, and now somehow, after criticism by the ICC and the Antitrust Division, we find that it was not so perfect, and there is an attempt at another last minute cure that is of highly questionable merit. The proposed Norfolk Southern-Conrail merger will restructure and determine the future of our nation's rail; the implications are far too important to rush to judgment on the basis of a continuum of last minute fixes.

The simple fact is that these small railroads cannot in any effective manner counter the substantial market power of a combined Norfolk Southern-Conrail. They would be attempting to compete in an extremely weakened financial state, with inferior, out-moded and out of repair equipment. In a business in which speed and reliability are the hallmarks of service to customers, these deficiencies spell disaster.

In contrast, the United States Railway Association has determined that Conrail is a viable railroad, and will continue to be for the foreseeable future. According to USRA: ". . . all available evidence supports a finding that Conrail can generate positive cash flow for the foreseeable future. Traffic shortfalls compared to the forecast should not threaten Conrail's survival as long as the rail regulatory framework allows service to be shaped to meet the demands of the marketplace." USRA Staff Report at p. 2-2.

Further, Conrail is not only viable, but has been an especially effective competitive force since its inception. For example, Conrail has withdrawn from the historically collective rate bureaus, the only railroad to have done so. Shippers have testified as to the aggressive nature of Conrail's pricing policies which directly resulted from the crumbling of the "equalized joint rate" system and its constraint of independent and, therefore, competitive prices.

V. CONCLUSION

It would be a tragic error for Congress to become an instrument in the largest and most anticompetitive railroad merger in history. There is simply no sound rationale for selling Conrail to Norfolk Southern. Conrail is a viable, independent railroad, and the Department of Transportation should maintain Conrail as a competitive force. We applaud the congressional intent to return Conrail to the private sector. However, it is not necessary to destroy the competitive railroad transportation environment in the Northeast, the Midwest, and the South to accomplish that objective.

KOREAN OPPOSITION LEADER KIM YOUNG SAM

Mr. KENNEDY. Mr. President, I would like to call the attention of my colleagues to a recent speech given at Harvard University by Kim Young Sam, one of Korea's promising opposition leaders. Mr. Kim is a courageous and dedicated leader who has suffered persecution under both former President Park Chung Hee and General Chun Doo Hwan for his defense of freedom in Korea. Over the last 2 years, he has been placed numerous times under house arrest and his most basic civil rights continue to be curbed under the current regime.

Yet Kim Young Sam has dedicated his life to achieving the restoration of civil rights to the people of Korea and continues to speak out for the return of democracy to his country. Together with Kim Dae Jung, Kim Young Sam has succeeded in unifying the opposition to the repressive policies of President Chun Doo Hwan. Together, these two leaders represent Korea's hope and future of a return to democracy in Korea.

Kim Young Sam has repeatedly stated there can be no stability in Korea as long as the current government ignores the opposition, students, labor, and other's calls for internal change. In the words of Mr. Kim, "the Korean people want a democratic system in which they can elect their own government and president and replace a government whose policies run counter to the wishes of the people."

The popular opposition in Korea is directed not only at the current regime; it is also intended to persuade the Government to use its influence in support of the effort to return Korea to democratic rule. As Mr. Kim points out, the March 1982 arson incident at the Pusan U.S. Cultural Center and the May 1985 sit-in at the Seoul U.S.I.S. library were appeals to the U.S. Government to recognize that the Korean people desire the same freedoms and democratic rights enjoyed by the American people. As Mr. Kim stated, "the American people must understand that in the eyes of the Korean people the Government of the United States is supporting the military dictatorship more than it is supporting democratization."

It is time the United States reversed that impression. It is time for the U.S. Ambassador in Korea to meet with opposition leaders Kim Young Sam and Kim Dae Jung and to establish without question that the United States is with the Korean people in their efforts to establish a true democratic system in Korea.

I urge my colleagues to read Kim Young Sam's insightful speech and ask unanimous consent that it be printed in the RECORD.

THE KOREAN PENINSULA AND WORLD PEACE

(Address by Kim Young Sam, Harvard University, Cambridge, MA, September 23, 1985)

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

To the administration, faculty, students and friends of Harvard University, the intellectual cradle of the world and a symbol of the American spirit, I bring you greetings from the Korean people who feel a deep solidarity with the people of America.

I have travelled half way across the world to appeal to you on behalf of the Korean people's earnest desire for peace. Peace is the essential condition which must be achieved and sustained if the Korean people are to succeed in their struggle for democracy and realize their true capabilities as human beings.

Peace is not simply the absence of war, nor is it just an uneasy equilibrium between unstable powers. And it is not the order brought about by silencing the voices of truth and justice through oppression. Whether we speak of one country or the world, when the human spirit and basic human rights are oppressed by a ruling clique or by a system there cannot be peace. Today, if the people of one part of the world cannot live in peace all the people of this world must accept their moral responsibility to end that people's suffering and safeguard their security.

Korea and the United States have had friendly relations and since the second half of the 20th century the two countries have walked side by side. If this relationship is to be a mutually beneficial one, however, the peace, freedoms and basic human rights enjoyed by the American people must also be enjoyed by the Korean people. It is clear that freedom and democracy are principles we both value and must seek together.

I want to talk with you today about the true threat to peace facing the Korean people. Today, as in the past, the Korean people, perhaps more than any other people, hope for peace. So it is heartbreaking to witness their unsatisfied hunger. As you know, at the end of World War II the Korean peninsula was divided along the 38th parallel. This division and the separation of the people, rather than being the result of Korea's powerlessness or divisiveness, was the result of the reorganization of the international order by the two superpowers, the United States and the Soviet Union. Shortly after this division, on June 25, 1950, the Korean War broke out and brother fought against brother. Three years later the war ended but it left behind a legacy of conflict and tension. There are currently nearly two million soldiers, heavy armaments and even nuclear weapons on the peninsula. Although there is a truce between south and north Korea, there is more military weaponry assembled along the border than any other border in the world, including the border between Israel and Syria. There are enough weapons on both side of the border to destroy our country many times over; these weapons cast the dark shadow of war across the Korean peninsula.

Because of the competing ideologies of south and north Korea and the involvement of the superpowers, the conflict on the Korean peninsula has become part of the East-West Cold War conflict. The division of Korea is, however, a national problem that continues to separate the people and fuel enmity and distrust.

The threat to peace on the Korean peninsula is a problem not only for our people but for the rest of the world as well. It is our problem but it is your problem too. On the face of it the conflict on the Korean peninsula seems irrational. But the reality of this conflict is that the anti-democratic regimes that rule both the south and the north are strengthened by the threat of conflict. Each regime keeps a firm hold on the power it was able to grab as a result of the division of the country. In order to solidify their ruling power both regimes exploit the division of the country. Power is maintained through oppression which the regimes justify in national security terms.

Before his assassination, Park Chung Hee claimed that "the people's freedom and basic human rights must be protected in spite of the conflict between south and north Korea." Yet while Park, like other dictators, professed his belief in these principles, he ruled with an iron fist and used the cloak of national security to repress dissent. In the same way, the north Korean ruling clique uses the south-north conflict to perpetuate its absolute authority. Kim Il Sung has designated his son Kim Jong Il to be his official successor. Each regime uses the presence of the other as a justification for its continued rule. If Korea had been allowed to establish an independent democratic government after its liberation from Japan based on the people's participation and creativity, I am convinced that the Kim Il Sung-Kim Jong Il dynasty would never have been allowed to develop.

The leaders of the dictatorial regimes care nothing about the danger of their disregard for democracy. Thus the prospects for peace remain uncertain. In the south, the presence of American troops may act as a brake on the actions of the dictatorship, but in so far as the north is concerned there are no internal or external restraints on the ruling clique's dangerous ventures. As a result we live in a constant state of anxiety over the possibility of another war on the Korean peninsula.

During the Korean War, 330,000 people, including U.S. and U.N. personnel, were killed, and $15 billion was spent. At the time of the signing of the truce, the U.N. military delegate, General Clark, said with great disappointment, "I am the first American general to sign a truce for a war in which America had no victory." Instead of "a war with no victory" we now think of "a victory with no war." In other words, we must win the war by some method other than war.

What is a "victory with no war?" In Korea it means that we must show the superiority of a democratic system which has as its fundamental principles human liberty, human rights and human dignity. It also means that we must prove the superiority of democracy for all the people in the whole Korean peninsula. This is why young American soldiers shed their blood in the Korean War. They fought for the precious human rights and freedoms given by God; we must be able to say that they did not die in vain. The common purpose of American and Korean soldiers was the attainment of freedom and democracy on the Korean peninsula. We must continue to pursue these ideals and wave the flag of freedom on the peninsula as we struggle for "victory without war." We must show that democracy is superior to communism. When we are prepared to dedicate our lives to the struggle

for freedom and democracy we will surely be able to achieve "victory without war."

But unfortunately we must confess that we are not moving toward "victory without war" today. Park Chung Hee's 18-year dictatorship has been followed by Chun Doo Whan's military dictatorship. The democratic aspirations of the people have been consistently suppressed. The Korean people now doubt that there can be peace on the Korean peninsula unless it can be founded on the basis of the security of the individual.

The anxiety felt every day by the people is far worse than you can possibly imagine. Not only is there the threat of war with north Korea but there is a danger from within posed by the Chun regime which uses the south-north conflict as a pretext for suppressing dissent.

Thus, the challenge to peace comes from two sources. But there is only one method for resolving these challenges—the realization of democracy on the Korean peninsula. You are well aware of how long the Korean people have struggled against dictatorial power in order to achieve democracy, freedom and human rights. The Korean people want a democratic system in which they can elect their own government and president and replace a government whose policies run counter to the wishes of the people.

Kim Dae Jung, an old friend of mine and a compatriot in the struggle for democracy, studied at this university while he was in exile. For a time the Chun regime refused to allow him to return to Korea because they feared he would pose a serious challenge to their power. With the help of the U.S. government and his many American friends he was finally able to return to Korea. But he is still banned from participating in political activity and is under the constant threat of reimprisonment.

The Korean people are becoming more concerned every day about the U.S. government's support for Chun Doo Whan's military dictatorship. These concerns are most urgently felt by the Korean student movement. The March 1982 arson incident at the Pusan U.S. Cultural Center and the May 1985 sit-in at the Seoul U.S.I.S. library were strong acts fo protest against the U.S. government's support for the dictatorship. They were also intended as appeals to the U.S. government to recognize that the Korean people desire the same freedoms and democratic rights enjoyed by the American people. The U.S.-Korea relationship must be based on a mutual respect for these ideals. The students want the American government and people to affirm their moral solidarity with the cause of democracy in Korea. The kind of direct action taken by the students was sparked by their understanding of the May 1980 Kwangju incident in which, according to government figures, 191 people were killed and thousands injured during an uprising against Chun's coup d'etat. At this time the U.S. Commander of Forces in Korea permitted Korean troops under the UN Combined Forces Command to be deployed to Kwangju. In an opinon piece in the July 2 *New York Times*, Professor Bruce Cumings wrote about the Kwanju tragedy. He said, "The significance of the Kwangju incident can be compared to the suppression of the Polish free labor union." The Korean people still grieve over the Kwangju tragedy but they have not lost their eager desire for democracy.

I don't believe that the recent actions by Korean students, such as the sit-in at the U.S.I.S. library, are desirable. But I do believe that the American people must understand that in the eyes of the Korean people the government of the United States is supporting the military dictatorship more than it is supporting democratization. I believe that it is unfortunate both for the United States and for the relationship between our two countries, that many Korean students see the United States as part of the oppressive structure which is maintaining the dictatorial regime.

The role and responsibility of the United States in the Kwangju incident must be made absolutely clear. Furthermore, the Korean students sincere appeal for democratic fellowship between the United States and Korea must not be ignored or silenced. The Korean people want a clear answer to the following question: Is the United States cooperating with the effort to establish a democratic system in Korea or is it opposing this effort? American support for the dictatorship could destroy the good relationship between our countries, a relationship that was confirmed 35 years ago by the blood of young American and Korean soldiers who fought side by side in the Korean War.

It is up to the American people and their government to decide which side they will stand with. I hope that the American people will not abandon or take lightly their moral responsibility as the custodians of freedom and democracy.

I have not come here to ask the United States to establish democracy in Korea for us. Democracy in Korea will be established by the Korean people themselves. I am sure that this will happen. I have offered my advice to you because as the struggle for democracy intensifies and after it is established I do not want America to be criticized for the position it took.

The struggle for democracy could be compared to the act of casting one's net into the sea and giving up everything one has, even life itself, for a goal. As for myself, I would empty myself of all that I am, all that I can hope to become and all my desires, and dedicate my life to the struggle of the Korean people for democracy. Regardless of what anyone else does, I will do my best to carry out my responsibility, standing on the side of justice, history and the nation. That is my role for Korea. I am convinced that in the end, the Korean people will overcome the oppression of the military dictatorship and establish democracy. That will also be a step along the road to world peace.

Mr. GARN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

HUD APPROPRIATIONS, 1986

Mr. GARN. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 3038, making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, for fiscal year 1986.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 3038) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Appropriations, with amendments, as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italic.)

H.R. 3038

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes, namely:

TITLE I

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

HOUSING PROGRAMS

ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING

(INCLUDING RESCISSION)

The amount of contracts for annual contributions, not otherwise provided for, as authorized by section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and heretofore approved in appropriation Acts, is increased by **[**$756,897,547**]** *$802,947,547: Provided,* That the budget authority obligated under contracts for annual contributions shall be increased above amounts heretofore provided in appropriation Acts by **[**$9,200,902,781**]** *$7,468,420,781: Provided further,* That of the budget authority provided herein, **[**$1,153,800,000 shall be for assistance in financing the development or acquisition cost of public housing, of which $163,800,000**]** *$409,500,000* shall be for assistance in financing the development or acquisition cost of housing for Indian families; $735,295,000 shall be available as an appropriation of funds, to remain available until expended, for modernization of existing public housing projects pursuant to section 14 of such Act (42 U.S.C. 1437l); $1,616,640,000 shall be for assistance for projects developed for the elderly or handicapped under section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701q); **[**$2,468,160,000**]** *$2,056,800,000* shall be for the section 8 existing housing program (42 U.S.C. 1437f); **[**$1,286,100,000**]** *$471,570,000* shall be for the section 8 moderate rehabilitation program (42 U.S.C. 1437f); **[**$75,000,000 shall be available as an appropriation of funds, to remain available until September 30, 1986, only for rental rehabilitation grants pursuant to section 17(a)(1)(A) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437o); $75,000,000 shall be available as an appropriation of funds, to remain available until September 30, 1986, only for development grants pursuant to section

17(a)(1)(B) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437o);] and [$672,177,500] *$937,642,500* shall be available for the housing voucher program under section 8(o) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437f), *for use in connection with the rental rehabilitation program under section 17 of such Act and, notwithstanding section 8(o)(4), for other purposes as determined by the Secretary: Provided further, That notwithstanding any other provision of law except a provision of law specifically amending this proviso, no annual contribution contract which the Secretary enters into for existing housing pursuant to section 8(b)(1) of the United States Housing Act of 1937 (42 U.S.C. 1437f) using the foregoing $2,056,800,000 of budget authority shall be for more than ten years*: *Provided further,* That any balances of authorities made available prior to the enactment of this Act which are or become available for obligation in fiscal year 1986 shall be added to and merged with the authority approved herein, and such merged amounts shall be made subject only to terms and conditions of law applicable to authorities becoming available in fiscal year 1986: *Provided further,* That none of the merged amounts available for obligation in 1986 shall be subject to the provisions of section 213(d) of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 1439): *Provided further,* That *of the amounts of budget authority recaptured during fiscal year 1986, up to $150,000,000 shall be available as an appropriation of funds for rental rehabilitation grants pursuant to section 17(a)(1)(A) of the United States Housing Act of 1937 (42 U.S.C. 1437o), to remain available until September 30, 1987; and up to $75,000,000 shall be available as an appropriation of funds for development grants pursuant to section 17(a)(1)(B) of such Act, to remain available until September 30, 1987: Provided further, That except as provided in the foregoing proviso,* all amounts of budget authority (and contract authority) equal to the amounts of such budget authority (and contract authority) which are recaptured during fiscal year 1986 shall be rescinded: *Provided further,* That [the United States Housing Act of 1937 is amended as follows:

[(1) Section 6(b) is amended by striking out the period at the end of the first sentence and inserting in lieu thereof: "except, in cases where the Department cannot demonstrate that the prototype cost sought to be imposed reflects fully costs for public housing units of comparable size and type of building for which contracts were let in the area within three months of the effective date of the prototype, the Department shall approve commitments and enter annual contributions contracts, without reference to prototype cost; instead, the Department shall approve the lowest responsible bid received by the public housing authority through a competitive process.".

[(2) In the third sentence of section 6(b) there shall be inserted after the word "determination" the phrase "or in approving plans, commitments and funding for projects excepted herein from prototype costs".

[(3) The last sentence of section 6(b) is amended by striking out the period and inserting in lieu thereof: "; no prototype costs for any area shall become effective unless the proposed prototype costs, together with the data on which such costs are based, shall have been published for notice and comment in accordance with section 553 of title 5, United States Code, and the relevant rulemaking regulations of the Department.".

[(4) Section 6(j) is amended by striking out "three or more bedrooms" and inserting in lieu thereof: "a mix of two and three or more bedrooms".] *section 6(b) of the United States Housing Act of 1937 is repealed.*

[: *Provided further,* That up to 20 per centum of the $990,000,000 provided herein for assistance in financing the development or acquisition cost of public housing shall be made available for major reconstruction of obsolete public housing projects.]

RENTAL HOUSING ASSISTANCE

(RESCISSION)

The limitation otherwise applicable to the maximum payments that may be required in any fiscal year by all contracts entered into under section 236 of the National Housing Act (12 U.S.C. 1715z-1) is reduced in fiscal year 1986 by not more than $2,000,000 in uncommitted balances of authorizations provided for this purpose in appropriation Acts.

HOUSING FOR THE ELDERLY OR HANDICAPPED FUND

In 1986, $631,033,000 of direct loan obligations may be made under section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701q), utilizing the resources of the fund authorized by subsection (a)(4) of such section, in accordance with paragraph (C) of such subsection: *Provided,* That such commitments shall be available only to qualified nonprofit sponsors for the purpose of providing 100 per centum loans for the development of housing for the elderly or handicapped, with any cash equity or other financial commitments imposed as a condition of loan approval to be returned to the sponsor if sustaining occupancy is achieved in a reasonable period of time: *Provided further,* That the full amount shall be available for permanent financing (including construction financing) for housing projects for the elderly or handicapped: *Provided further,* That the Secretary may borrow from the Secretary of the Treasury in such amounts as are necessary to provide the loans authorized herein: *Provided further,* That, notwithstanding any other provision of law, the receipts and disbursements of the aforesaid fund shall be included in the totals of the Budget of the United States Government: *Provided further,* That, notwithstanding section 202(a)(3) of the Housing Act of 1959, loans made in fiscal year 1986 shall bear an interest rate which does not exceed 9.25 per centum, including the allowance adequate in the judgment of the Secretary to cover administrative costs and probable losses under the program.

CONGREGATE SERVICES

For contracts with and payments to public housing agencies and nonprofit corporations for congregate services programs in accordance with the provisions of the Congregate Housing Services Act of 1978, $2,700,000, to remain available until September 30, 1987.

PAYMENTS FOR OPERATION OF LOW-INCOME HOUSING PROJECTS

For payments to public housing agencies and Indian housing authorities for operating subsidies for low-income housing projects as authorized by section 9 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437g), [$1,210,600,000] *$1,260,600,000, to remain available for obligation in accordance with section 9(a), notwithstanding section 9(d), of such Act until September 30, 1987: Provided, That $50,000,000 of the foregoing amount shall be made available to public housing agencies and Indian housing authorities in the discretion of the Secretary and notwithstanding the last sentence of section 9(a)(1) of such Act, to contribute toward meeting, or to meet, increases in the costs of insurance coverages required pursuant to annual contributions contracts.*

HOUSING COUNSELING ASSISTANCE

For contracts, grants, and other assistance, not otherwise provided for, for providing counseling and advice to tenants and homeowners—both current and prospective—with respect to property maintenance, financial management, and such other matters as may be appropriate to assist them in improving their housing conditions and meeting the responsibilities of tenancy or homeownership, including provisions for training and for support of voluntary agencies and services as authorized by section 106(a)(1)(iii) and section 106(a)(2) of the Housing and Urban Development Act of 1968, as amended, [$4,000,000] *$3,500,000.*

TROUBLED PROJECTS OPERATING SUBSIDY

For assistance payments to owners of eligible multifamily housing projects insured, or formerly insured, under the National Housing Act, as amended, in the program of operating subsidies for troubled multifamily housing projects under the Housing and Community Development Amendments of 1978, all unobligated balances of excess rental charges and any collections after September 30, 1985, to remain available until September 30, 1987: *Provided,* That assistance payments to an owner of a multifamily housing project assisted, but not insured, under the National Housing Act may be made if the project owner and the mortgagee have provided or agreed to provide assistance to the project in a manner as determined by the Secretary of Housing and Urban Development.

FEDERAL HOUSING ADMINISTRATION FUND

For payment to cover losses, not otherwise provided for, sustained by the Special Risk Insurance Fund and General Insurance Fund as authorized by the National Housing Act, as amended (12 U.S.C. 1715z-3(b) and 1735c(f)), $239,762,000, to remain available until expended.

During 1986, within the resources available, gross obligations for direct loans are authorized in such amounts as may be necessary to carry out the purposes of the National Housing Act, as amended.

During 1986, additional commitments to guarantee loans to carry out the purposes of the National Housing Act, as amended, shall not exceed [$50,900,000,000] *$60,000,000,000* of loan principal.

During fiscal year 1986, gross obligations for direct loans of not to exceed $89,222,000 are authorized for payments under section 230(a) of the National Housing Act, as amended, from the insurance fund chargeable for benefits on the mortgage covering the property to which the payments made relate, and payments in connection with such obligations are hereby approved.

NONPROFIT SPONSOR ASSISTANCE

During 1986, within the resources and authority available, gross obligations for the principal amounts of direct loans shall not exceed [$500,000] *$1,000,000.*

GOVERNMENT NATIONAL MORTGAGE ASSOCIATION

GUARANTEES OF MORTGAGE-BACKED SECURITIES

During 1986, new commitments to issue guarantees to carry out the purposes of section 306 of the National Housing Act, as amended (12 U.S.C. 1721g), shall not exceed $68,250,000,000 of loan principal.

[SOLAR ENERGY AND ENERGY CONSERVATION BANK

[ASSISTANCE FOR SOLAR AND CONSERVATION IMPROVEMENTS

[For financial assistance and other expenses, not otherwise provided for, to carry out the provisions of the Solar Energy and Energy Conservation Bank Act of 1980 (12 U.S.C. 3601), $20,000,000, to remain available until September 30, 1987.]

COMMUNITY PLANNING AND DEVELOPMENT

COMMUNITY DEVELOPMENT GRANTS

For grants to States and units of general local government and for related expenses, not otherwise provided for, necessary for carrying out a community development grant program as authorized by title I of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5301), $3,124,800,000, to remain available until September 30, 1988: *Provided*, That not to exceed 20 per centum of any grant made with funds appropriated herein shall be expended for "Planning and Management Development" and "Administration" as defined in regulations promulgated by the Department of Housing and Urban Development.

During 1986, total commitments to guarantee loans, as authorized by section 108 of the aforementioned Act, shall not exceed $225,000,000 of contingent liability for loan principal.

URBAN DEVELOPMENT ACTION GRANTS

For grants to carry out urban development action grant programs authorized in section 119 of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5301), pursuant to section 103 of that Act, [$330,000,000] *$352,000,000*, to remain available until September 30, 1989.

REHABILITATION LOAN FUND

During 1986, collections, unexpended balances of prior appropriations (including any recoveries of prior reservations) and any other amounts in the revolving fund established pursuant to section 312 of the Housing Act of 1964, as amended (42 U.S.C. 1452b), after September 30, 1985, are available and may be used for commitments for loans and operating costs and the capitalization of delinquent interest on delinquent or defaulted loans notwithstanding section 312(h) of such Act.

URBAN HOMESTEADING

For reimbursement to the Federal Housing Administration Fund for losses incurred under the urban homesteading program (12 U.S.C. 1706e), and for reimbursement to the Administrator of Veterans Affairs and the Secretary of Agriculture for properties conveyed by the Administrator of Veterans Affairs and the Secretary of Agriculture, respectively, for use in connection with an urban homesteading program approved by the Secretary of Housing and Urban Development pursuant to section 810 of the Housing and Community Development Act of 1974, as amended, $12,000,000, to remain available until expended.

POLICY DEVELOPMENT AND RESEARCH

RESEARCH AND TECHNOLOGY

For contracts, grants, and necessary expenses of programs of research and studies relating to housing and urban problems, not otherwise provided for, as authorized by title V of the Housing and Urban Development Act of 1970, as amended (12 U.S.C. 1701z-1 et seq.), including carrying out the functions of the Secretary under section 1(a)(1)(i) of Reorganization Plan No. 2 of 1968, [$16,900,000] *$18,900,000*, to remain available until September 30, 1987.

FAIR HOUSING AND EQUAL OPPORTUNITY

FAIR HOUSING ASSISTANCE

For contracts, grants, and other assistance, not otherwise provided for, as authorized by title VIII of the Civil Rights Act of 1968, as amended, $6,700,000, to remain available until September 30, 1987.

MANAGEMENT AND ADMINISTRATION

SALARIES AND EXPENSES

(INCLUDING TRANSFER OF FUNDS)

For necessary administrative and nonadministrative expenses of the Department of Housing and Urban Development, not otherwise provided for, including not to exceed $4,000 for official reception and representation expenses, [$592,831,000] *$591,686,000*, of which [$251,404,000] *$254,366,000* shall be provided from the various funds of the Federal Housing Administration[: *Provided*, That in the Department of Housing and Urban Development not to exceed sixteen full-time permanent positions and eighteen staff years shall be available for the Office of Public Affairs].

TITLE II

INDEPENDENT AGENCIES

AMERICAN BATTLE MONUMENTS COMMISSION

SALARIES AND EXPENSES

For necessary expenses, not otherwise provided for, of the American Battle Monuments Commission, including the acquisition of land or interest in land in foreign countries; purchases and repair of uniforms for caretakers of national cemeteries and monuments outside of the United States and its territories and possessions; rent of office and garage space in foreign countries; purchase (one for replacement only) and hire of passenger motor vehicles; and insurance of official motor vehicles in foreign countries when required by law of such countries; $10,954,000: *Provided*, That where station allowance has been authorized by the Department of the Army for officers of the Army serving the Army at certain foreign stations, the same allowance shall be authorized for officers of the Armed Forces assigned to the Commission while serving at the same foreign stations, and this appropriation is hereby made available for the payment of such allowance: *Provided further*, That when traveling on business of the Commission, officers of the Armed Forces serving as members or as Secretary of the Commission may be reimbursed for expenses as provided for civilian members of the Commission: *Provided further*, That the Commission shall reimburse other government agencies, including the Armed Forces, for salary, pay, and allowances of personnel assigned to it: *Provided further*, That section 409 of the general provisions carried in title IV of this Act shall not apply to the funds provided under this heading.

CONSUMER PRODUCT SAFETY COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Consumer Product Safety Commission, including hire of passenger motor vehicles, services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18, and not to exceed $500 for official reception and representation expenses, [$37,000,000] *$34,900,000*[, of which $1,000,000 shall be available only for activities authorized by the Cigarette Safety Act of 1984 (Public Law 98-567)].

DEPARTMENT OF DEFENSE—CIVIL

CEMETERIAL EXPENSES, ARMY

SALARIES AND EXPENSES

For necessary expenses, as authorized by law, for maintenance, operation, and improvement of Arlington National Cemetery and Soldiers' and Airmen's Home National Cemetery, [$7,759,000] *$14,778,000*, to remain available until expended: *Provided*, That reimbursement shall be made to the applicable military appropriation for the pay and allowances of any military personnel performing services primarily for the purposes of this appropriation.

ENVIRONMENTAL PROTECTION AGENCY

SALARIES AND EXPENSES

For necessary expenses, not otherwise provided for, including hire of passenger motor vehicles; hire, maintenance, and operation of aircraft; uniforms, or allowances therefor, as authorized by 5 U.S.C. 5901-5902; services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18; purchase of reprints; library memberships in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members; construction, alteration, repair, rehabilitation, and renovation of facilities, not to exceed $25,000 per project; and not to exceed $3,000 for official reception and representation expenses; [$690,176,000] *$688,376,000*: *Provided*, That none of these funds may be expended for purposes of Resource Conservation and Recovery Panels established under section 2003 of the Resource Conservation and Recovery Act, as amended (42 U.S.C. 6913).

RESEARCH AND DEVELOPMENT

For research and development activities, [$223,400,000] *$228,750,000*, to remain available until September 30, 1987: [*Provided*, That $6,000,000 of the funds provided under this heading shall be available only for a full scale demonstration of limestone injection multistage burner technology in a tangentially fired boiler on an equal cost sharing basis with the electric power industry:] *Provided, That $7,000,000 of the funds under this heading shall be available for an anerobic wastewater treatment demonstration project under section 105(c) of the Federal Water Pollution Control Act (33 U.S.C. 1255(c)). Funds for such demonstration project shall be expended on the project within the United States, its territories or possessions, and shall be available only upon the determination by the Administrator that such project will develop or demonstrate a new or improved method of treating industrial wastes or otherwise prevent pollution by industry, which method shall have industrywide application.*

51-059 O - 85 - 26 (Pt. 20)

ABATEMENT, CONTROL, AND COMPLIANCE

For abatement, control, and compliance activities, $577,600,000, to remain available until September 30, 1987: *Provided*, That none of these funds may be expended for purposes of Resource Conservation and Recovery Panels established under section 2003 of the Resource Conservation and Recovery Act, as amended (42 U.S.C. 6913), or for support to State, regional, local and interstate agencies in accordance with subtitle D of the Solid Waste Disposal Act, as amended, other than section 4008(a)(2) or 4009: *Provided further*, That $50,000,000 of the funds provided under this heading shall be available for the purposes of the Asbestos School Hazards Abatement Act of 1984, including [$5,000,000] *$2,500,000* for administrative expenses: *Provided further*, That the [$45,000,000] *$47,500,000* available for grants and loans for school asbestos abatement may be obligated only for projects conducted by [contractors] *persons* who are State-certified or [by employees] who have successfully completed a training program approved by the Environmental Protection Agency.

BUILDINGS AND FACILITIES

For construction, repair, improvement, extension, alteration, and purchase of fixed equipment for facilities of, or use by, the Environmental Protection Agency, $5,000,000, to remain available until expended.

EXECUTIVE OFFICE OF THE PRESIDENT

COUNCIL ON ENVIRONMENTAL QUALITY AND OFFICE OF ENVIRONMENTAL QUALITY

For necessary expenses of the Council on Environmental Quality and the Office of Environmental Quality, in carrying out their functions under the National Environmental Policy Act of 1969 (Public Law 91-190), the Environmental Quality Improvement Act of 1970 (Public Law 91-224), and Reorganization Plan No. 1 of 1977, including not to exceed $500 for official reception and representation expenses, and hire of passenger motor vehicles, [$700,000] *$732,000.*

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

For necessary expenses of the Office of Science and Technology Policy, in carrying out the purposes of the National Science and Technology Policy, Organization, and Priorities Act of 1976 (42 U.S.C. 6601 and 6671), hire of passenger motor vehicles, services as authorized by 5 U.S.C. 3109, not to exceed $1,500 for official reception and representation expenses, and rental of conference rooms in the District of Columbia, $2,343,000: *Provided*, That the Office of Science and Technology Policy shall reimburse other agencies for not less than one-half of the personnel compensation costs of individuals detailed to it.

FEDERAL EMERGENCY MANAGEMENT AGENCY

DISASTER RELIEF

For necessary expenses in carrying out the functions of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5121 et seq.), [$194,000,000] *$145,000,000*, to remain available until expended.

SALARIES AND EXPENSES

For necessary expenses, not otherwise provided for, including hire and purchase of motor vehicles (31 U.S.C. 1343); uniforms, or allowances therefor, as authorized by 5 U.S.C. 5901-5902; services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18; expenses of attendance of cooperating officials and individuals at meetings concerned with the work of emergency preparedness; transportation in connection with the continuity of government program to the same extent and in the same manner as permitted the Secretary of a Military Department under 10 U.S.C. 2632; and not to exceed [$1,000] *$2,000* for official reception and representation expenses, [$118,746,000] *$122,000,000*[, of which not to exceed $95,771,000 shall be available for obligation in the personnel compensation and benefits object classifications: *Provided*, That of the funds provided herein for personnel compensation and benefits (object classifications 11, 12, and 13), not to exceed $24,839,000 shall become available on October 1, 1985, and that amount shall be increased by (1) $23,644,000 on January 1, 1986, (2) $23,644,000 on April 1, 1986, and (3) $23,644,000 on July 1, 1986: *Provided further*, That of the funds provided under this heading, not to exceed $30,079,000 shall be available for headquarters management and administration activities: *Provided further*, That the funds provided herein for headquarters management and administration activities shall be used to support 42 full-time equivalent employment (FTEE) in the Office of Inspector General and not to exceed (1) 8 FTEE in the Office of the Director, (2) 18 FTEE in the Office of General Counsel, (3) 2 FTEE in Special Programs, (4) 5 FTEE in the Executive Administrator's Office, (5) 8 FTEE in the Office of Public Affairs, (6) 6 FTEE in the Office of Congressional Relations, (7) 2 FTEE in the Office of International Affairs, (8) 5 FTEE in the Office of Equal Opportunity, (9) 11 FTEE in the Office of Security, (10) 31 FTEE in the Office of Acquisition Management, (11) 41 FTEE in the Office of Personnel, (12) 74 FTEE in the Office of the Comptroller, (13) 7 FTEE in the Office of Program Analysis and Evaluation, (14) 60 FTEE in the Office of Administrative Support, (15) 64 FTEE in Automatic Data Processing, and (16) 6 FTEE in the Office of Regional Operations].

EMERGENCY MANAGEMENT PLANNING AND ASSISTANCE

For necessary expenses, not otherwise provided for, to carry out activities under the National Flood Insurance Act of 1968, as amended, and the Flood Disaster Protection Act of 1973, as amended (42 U.S.C. 4001 et seq.), the Disaster Relief Act of 1974, as amended (42 U.S.C. 5121 et seq.), the Earthquake Hazards Reduction Act of 1977, as amended (42 U.S.C. 7701 et seq.), the Federal Fire Prevention and Control Act of 1974, as amended (15 U.S.C. 2201 et seq.), the Strategic and Critical Materials Stock Piling Act, as amended (50 U.S.C. 98 et seq.), the Federal Civil Defense Act of 1950, as amended (50 U.S.C. App. 2251 et seq.), the Defense Production Act of 1950, as amended (50 U.S.C. App. 2061 et seq.), section 103 of the National Security Act (50 U.S.C. 404), and Reorganization Plan No. 3 of 1978, [$248,910,000] *$271,182,000.*

NATIONAL FLOOD INSURANCE FUND

(INCLUDING TRANSFERS OF FUNDS)

For repayment under notes issued by the Director of the Federal Emergency Management Agency to the Secretary of the Treasury pursuant to section 15(e) of the Federal Flood Insurance Act of 1956, as amended (42 U.S.C. 2414(e)), $92,852,000, of which $8,760,000 shall, upon enactment of this Act, be transferred to the Salaries and expenses appropriation for administrative costs of the insurance programs and $45,750,000 shall, upon enactment of this Act, be transferred to the Emergency management planning and assistance appropriation for flood plain management activities, including $4,778,000 for expenses under section 1362 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4103, 4127), which amount shall be available until September 30, 1987. In fiscal year 1986, no funds in excess of (1) $40,750,000 for operating expenses, (2) $67,591,000 for agents' commissions and taxes, and (3) $9,160,000 for interest on Treasury borrowings shall be available from the National Flood Insurance Fund without prior notice to the Committees on Appropriations. *For the purpose of the determination of premium rates under the National Flood Insurance Act of 1968, the flood protection system in Winfield, Kansas, shall, at the 50 per centum stage of completed construction, as required by section 1307(e) of such Act, be considered to comply with the requirements and conditions of section 1307 of such Act, notwithstanding the source of funding.*

NATIONAL INSURANCE DEVELOPMENT FUND

For one-time payments from the National Insurance Development Fund to participating Federal Crime Insurance Program States, as authorized by section 1242 of the Urban Property Protection and Reinsurance Act of 1968 as amended, not to exceed $10,000,000, to remain available until October 31, 1985. Eligibility for payment under this appropriation shall be contingent upon certification by a State that it shall develop, on an expeditious basis, an alternative mechanism for providing access to crime insurance to all current Federal Crime Insurance policyholders in that State who apply. Such certification shall be made not later than September 30, 1985. Payments to each State shall be determined by the proportionate share of this amount based on the number of policies in force in each State, as of July 31, 1985. The Administrator of the Federal Insurance Administration, Federal Emergency Management Agency, shall provide such funds no later than October 31, 1985. The Administrator shall provide complete policyholder lists to all States participating in the program by August 31, 1985.

EMERGENCY FOOD AND SHELTER PROGRAM

There is hereby appropriated [$70,000,000] *$50,000,000* to the Federal Emergency Management Agency, to remain available until September 30, 1986, to carry out an emergency food and shelter program. Notwithstanding any other provision of this or any other Act, such amount shall be made available under the terms and conditions of the following paragraphs:

The Director of the Federal Emergency Management Agency shall, as soon as practicable after enactment of this Act, constitute a national board for the purpose of determining how the program funds are to be distributed to individual localities. The national board shall consist of seven members. The United Way of America, the Salvation Army, the National Council of Churches of Christ in the U.S.A., the National Conference of Catholic Charities, the Council of Jewish Federations, Inc., the American Red Cross, and the Federal Emergency Management Agency shall each designate a representative to sit on the national board. The representative of the Federal Emergency Management Agency shall chair the national board.

Each locality designated by the national board to receive funds shall constitute a local board for the purpose of determining how its funds will be distributed. The local

board shall consist, to the extent practicable, of representatives of the same organizations as the national board except that the mayor or appropriate head of government will replace the Federal Emergency Management Agency member.

The Director of the Federal Emergency Management Agency shall award a grant for [$70,000,000] *$50,000,000* to the national board within thirty days after enactment of this Act for the purpose of providing emergency food and shelter to needy individuals through private voluntary organizations and through units of local government.

Eligible private voluntary organizations should be nonprofit, have a voluntary board, have an accounting system, and practice nondiscrimination.

Participation in the program should be based upon a private voluntary organization's or unit of local government's ability to deliver emergency food and shelter to needy individuals and such other factors as are determined by the local boards.

Total administrative costs shall not exceed 2 per centum of the total appropriation.

As authorized by the Charter of the Commodity Credit Corporation, the Corporation shall process and distribute surplus food owned or to be purchased by the Corporation under the food distribution and emergency shelter program in cooperation with the Federal Emergency Management Agency.

GENERAL SERVICES ADMINISTRATION

CONSUMER INFORMATION CENTER

For necessary expenses of the Consumer Information Center, including services authorized by 5 U.S.C. 3109, $1,249,000, to be deposited into the Consumer Information Center Fund: *Provided*, That the appropriations, revenues and collections deposited into the fund shall be available for necessary expenses of Consumer Information Center activities in the aggregate amount of $5,200,000. Administrative expenses of the Consumer Information Center in fiscal year 1986 shall not exceed $1,631,000. Appropriations, revenues and collections accruing to this fund during fiscal year 1986 in excess of $5,200,000 shall remain in the fund and shall not be available for expenditure except as authorized in appropriation Acts.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

OFFICE OF CONSUMER AFFAIRS

For necessary expenses of the Office of Consumer Affairs, including services authorized by 5 U.S.C. 3109, [$1,988,000] *$2,028,000.*

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

RESEARCH AND DEVELOPMENT

For necessary expenses, not otherwise provided for, including research, development, operations, services, minor construction, maintenance, repair, rehabilitation and modification of real and personal property; purchase, hire, maintenance, and operation of other than administrative aircraft, necessary for the conduct and support of aeronautical and space research and development activities of the National Aeronautics and Space Administration; [$2,756,800,000] *$2,790,800,000*, to remain available until September 30, 1987[: *Provided*, That of the funds provided herein, not to exceed $200,000,000 shall be available for a space station, except that the Administrator of the National Aeronautics and Space Administration may increase the aforementioned amount by the $10,000,000 made available herein for the orbital maneuvering vehicle].

SPACE FLIGHT, CONTROL AND DATA COMMUNICATIONS

For necessary expenses, not otherwise provided for; in support of space flight, spacecraft control and communications activities of the National Aeronautics and Space Administration, including operations, production, services, minor construction, maintenance, repair, rehabilitation, and modification of real and personal property; tracking and data relay satellite services as authorized by law; purchase, hire, maintenance and operation of other than administrative aircraft; [$3,402,900,000] *$3,412,900,000*, to remain available until September 30, 1987.

CONSTRUCTION OF FACILITIES

For construction, repair, rehabilitation and modification of facilities, minor construction of new facilities and additions to existing facilities, and for facility planning and design not otherwise provided, for the National Acronautics and Space Administration, and for the acquisition or condemnation of real property, as authorized by law, [$139,300,000] *$141,300,000*, to remain available until September 30, 1988: *Provided*, That, notwithstanding the limitation on the availability of funds appropriated under this heading by this appropriation Act, when any activity has been initiated by the incurrence of obligations therefor, the amount available for such activity shall remain available until expended, except that this provision shall not apply to the amounts appropriated pursuant to the authorization for repair, rehabilitation and modification of facilities, minor construction of new facilities and additions to existing facilities, and facility planning and design: *Provided further*, That no amount appropriated pursuant to this or any other Act may be used for the lease or construction of a new contractor-funded facility for exclusive use in support of a contract or contracts with the National Aeronautics and Space Administration under which the Administration would be required to substantially amortize through payment or reimbursement such contractor investment, unless an appropriation Act specifies the lease or contract pursuant to which such facilities are to be constructed or leased or such facility is otherwise identified in such Act: *Provided further, That the Administrator may authorize such facility lease or construction, if he determines that deferral of such action until the enactment of the next appropriation Act would be inconsistent with the interest of the Nation in aeronautical and space activities.*

RESEARCH AND PROGRAM MANAGEMENT

For necessary expenses of research in government laboratories, management of programs and other activities of the National Aeronautics and Space Administration, not otherwise provided for, including uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); awards; lease, hire, maintenance and operation of administrative aircraft; purchase (not to exceed thirty for replacement only) and hire of passenger motor vehicles; and maintenance and repair of real and personal property, and not in excess of $100,000 per project for construction of new facilities and additions to existing facilities, repairs, and rehabilitation and modification of facilities; [$1,367,000,000] *$1,370,000,000*: *Provided*, That contracts may be entered into under this appropriation for maintenance and operation of facilities, and for other services, to be provided during the next fiscal year: *Provided further*, That not to exceed $35,000 of the foregoing amount shall be available for scientific consultations or extraordinary expense, to be expended upon the approval or authority of the Administrator and his determination shall be final and conclusive: *Provided further, That the National Aeronautics and Space Administration will continue a flat rate per diem system for employee travel allowances under regulations prescribed by the Administrator: Provided further, That the rates will be consistent with those authorized by the Administrator of the General Services Administration: Provided further, That per diem allowances paid employees under a flat rate per diem system shall be amounts determined by the Administrator of NASA to be sufficient to meet normal and necessary expenses in the area in which travel is performed, but in no event will the travel allowances exceed $75 for each day in travel status within the continental United States, unless the statutory maximum rate of $75 per day is increased by the Congress and implemented by the Administrator of the General Services Administration: Provided further, That the flat rate per diem system approved under this section shall expire upon the effective date of permanent legislation establishing a flat rate per diem system for civilian personnel.*

NATIONAL CREDIT UNION ADMINISTRATION

CENTRAL LIQUIDITY FACILITY

During 1986, obligations of the Central Liquidity Facility for new loans to member credit unions as authorized by the National Credit Union Central Liquidity Facility Act (12 U.S.C. 1795) shall not exceed $600,000,000: *Provided*, That administrative expenses of the Central Liquidity Facility in fiscal year 1986 shall not exceed $850,000.

NATIONAL SCIENCE FOUNDATION

RESEARCH AND RELATED ACTIVITIES

For necessary expenses in carrying out the purposes of the National Science Foundation Act of 1950, as amended (42 U.S.C. 1861-1875), title IX of the National Defense Education Act of 1958 (42 U.S.C. 1876-1879), and the Act to establish a National Medal of Science (42 U.S.C. 1880-1881); services as authorized by 5 U.S.C. 3109; maintenance and operation of aircraft and purchase of flight services for research support; acquisition of one aircraft; hire of passenger motor vehicles; not to exceed $2,500 for official reception and representation expenses; uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); rental of conference rooms in the District of Columbia; and reimbursement of the General Services Administration for security guard services; [$1,347,205,000] *$1,363,000,000*, to remain available until September 30, 1987: *Provided*, That of the funds appropriated in this Act, or from funds appropriated previously to the Foundation, not more than [$71,743,000] *$72,000,000* shall be available for program development and management in fiscal year 1986, including [$3,300,000] *$3,600,000* for expenses of travel: *Provided further*, That contracts may be entered into under the program development and management limitation in fiscal year 1986 for maintenance and operation of facilities, and for other services, to be provided during the next fiscal year: *Provided further*, That receipts for scientific support services and materials furnished by the National Research Centers and other National Science Foundation supported research facilities may be credited to this appropriation: *Provided further*, That to the extent that the amount

appropriated is less than the total amount authorized to be appropriated for included program activities, all amounts, including floors and ceilings, specified in the authorizing Act for those program activities or their subactivities shall be reduced proportionally: [*Provided further,* That not to exceed $8,000,000 shall be available for the very long baseline array:] *Provided further,* That the Foundation is hereafter authorized to indemnify grantees, contractors, and subcontractors associated with the ocean drilling program under the provisions of section 2354 of title 10 of the United States Code, with all approvals and certifications required thereby made by the Director of the National Science Foundation.

UNITED STATES ANTARCTIC PROGRAM ACTIVITIES

For necessary expenses in carrying out the research and operational support for the United States Antarctic Program pursuant to the National Science Foundation Act of 1950, as amended (42 U.S.C. 1861-1875); maintenance and operation of aircraft and purchase of flight services for research and operations support; maintenance and operation of research ships and charter or lease of ships for research and operations support; hire of passenger motor vehicles; not to exceed $1,000 for official reception and representation expenses; $115,100,000, to remain available until expended: *Provided,* That receipts for support services and materials provided to individuals for non-Federal activities may be credited to this appropriation: *Provided further,* That no funds in this account shall be used for the purchase of aircraft.

SCIENCE EDUCATION ACTIVITIES

For necessary expenses in carrying out science education programs and activities pursuant to the purposes of the National Science Foundation Act of 1950, as amended (42 U.S.C. 1861-1875), including award of graduate fellowships, services as authorized by 5 U.S.C. 3109, and rental of conference rooms in the District of Columbia, $60,550,000, to remain available until September 30, 1987: *Provided,* That to the extent that the amount of this appropriation is less than the total amount authorized to be appropriated for included program activities, all amounts, including floors and ceilings, specified in the authorizing Act for those program activities or their subactivities shall be reduced proportionally.

SCIENTIFIC ACTIVITIES OVERSEAS

(SPECIAL FOREIGN CURRENCY PROGRAM)

For payments in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States, for scientific activities, as authorized by law, $1,000,000, to remain available until September 30, 1987: *Provided,* That this appropriation shall be available in addition to other appropriations to the National Science Foundation for payments in the foregoing currencies.

NEIGHBORHOOD REINVESTMENT CORPORATION

PAYMENT TO THE NEIGHBORHOOD REINVESTMENT CORPORATION

For payment to the Neighborhood Reinvestment Corporation for use in neighborhood reinvestment activities, as authorized by the Neighborhood Reinvestment Corporation Act (42 U.S.C. 8101-8107), [$17,669,000] *$16,669,000.*

SELECTIVE SERVICE SYSTEM

SALARIES AND EXPENSES

For necessary expenses of the Selective Service System, including expenses of attendance at meetings and of training for uniformed personnel assigned to the Selective Service System, as authorized by law (5 U.S.C. 4101-4118) for civilian employees; and not to exceed $1,000 for official reception and representation expenses; $27,780,000: *Provided,* That during the current fiscal year, the President may exempt this appropriation from the provisions of 31 U.S.C. 1341, whenever he deems such action to be necessary in the interest of national defense: *Provided further,* That none of the funds appropriated by this Act may be expended for or in connection with the induction of any person into the Armed Forces of the United States.

DEPARTMENT OF THE TREASURY

PAYMENTS TO LOCAL GOVERNMENT FISCAL ASSISTANCE TRUST FUND

For payments to the Local Government Fiscal Assistance Trust Fund, $4,566,700,000[: *Provided,* That, notwithstanding the provisions of 31 U.S.C. 6701-6724, payments to local governments from this appropriation shall not exceed $3,425,025,000 and this appropriation is hereby reduced by $1,141,675,000 through the elimination of the payment for the final quarter of the entitlement beginning October 1, 1985 and ending September 30, 1986].

OFFICE OF REVENUE SHARING, SALARIES AND EXPENSES

For necessary expenses of the Office of Revenue Sharing, including hire of passenger motor vehicles, [$8,000,000] *$7,800,000.*

VETERANS ADMINISTRATION

COMPENSATION AND PENSIONS

For the payment of compensation, pensions, gratuities, and allowances, including burial awards, plot allowances, burial flags, headstones and grave markers, emergency and other officers' retirement pay, adjusted-service credits and certificates, and other benefits as authorized by law; and for payment of premiums due on commercial life insurance policies guaranteed under the provisions of article IV of the Soldiers' and Sailors' Civil Relief Act of 1940, as amended, $14,160,800,000, to remain available until expended.

READJUSTMENT BENEFITS

For the payment of readjustment and rehabilitation benefits to or on behalf of veterans as authorized by law (38 U.S.C. chapters 21, 31, 34-36, 39, 51, 53, 55, and 61), [$1,026,000,000] *$826,000,000,* to remain available until expended.

VETERANS INSURANCE AND INDEMNITIES

For military and naval insurance, national service life insurance, servicemen's indemnities, and service-disabled veterans insurance, as authorized by law (38 U.S.C. chapter 19; 70 Stat. 887; 72 Stat. 487), $9,750,000, to remain available until expended.

MEDICAL CARE

For necessary expenses for the maintenance and operation of hospitals, nursing homes, and domiciliary facilities; for furnishing, as authorized by law, inpatient and outpatient care and treatment to beneficiaries of the Veterans Administration, including care and treatment in facilities not under the jurisdiction of the Veterans Administration, and furnishing recreational facilities, supplies and equipment; funeral, burial and other expenses incidental thereto for beneficiaries receiving care in Veterans Administration facilities; repairing, altering, improving or providing facilities in the several hospitals and homes under the jurisdiction of the Veterans Administration, not otherwise provided for, either by contract or by the hire of temporary employees and purchase of materials; uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); aid to State homes as authorized by law (38 U.S.C. 641); and not to exceed $2,000,000 to fund cost comparison studies as referred to in 38 U.S.C. 5010(a)(5); [$9,368,694,000] *$9,358,694,000,* plus reimbursements.

MEDICAL AND PROSTHETIC RESEARCH

For necessary expenses in carrying out programs of medical and prosthetic research and development, as authorized by law, to remain available until September 30, 1987, [$195,840,000] *$191,370,000,* plus reimbursements.

MEDICAL ADMINISTRATION AND MISCELLANEOUS OPERATING EXPENSES

For necessary expenses in the administration of the medical, hospital, nursing home, domiciliary, construction and supply, research, employee education and training activities, as authorized by law, [$61,119,000] *$57,119,000,* plus reimbursements.

GENERAL OPERATING EXPENSES

For necessary operating expenses of the Veterans Administration, not otherwise provided for, including uniforms or allowances therefor, as authorized by law; not to exceed $3,000 for official reception and representation expenses; cemeterial expenses as authorized by law; purchase of ten passenger motor vehicles, for use in cemeterial operations, and hire of passenger motor vehicles; and reimbursement of the General Services Administration for security guard services, and the Department of Defense for the cost of overseas employee mail; [$760,547,000] *$760,060,000*[: *Provided,* That in the Veterans Administration not to exceed 40 full-time equivalent employment shall be available for the Office of Planning and Program Evaluation].

CONSTRUCTION, MAJOR PROJECTS

For constructing, altering, extending and improving any of the facilities under the jurisdiction or for the use of the Veterans Administration, or for any of the purposes set forth in sections 1004, 1006, 5002, 5003, 5006, 5008, 5009, and 5010 of title 38, United States Code, including planning, architectural and engineering services, and site acquisition, where the estimated cost of a project is $2,000,000 or more or where funds for a project were made available in a previous major project appropriation, [$516,160,000] *$486,600,000,* to remain available until expended: *Provided,* That, except for advance planning of projects funded through the advance planning fund and the design of projects funded through the Design Fund, none of these funds shall be used for any project which has not been considered and approved by the Congress in the budgetary process: *Provided further,* That funds provided in the appropriation "Construction, major projects" for fiscal year 1986, for each approved project shall be obligated (1) by the awarding of a working drawings contract by September 30, 1986 and (2) by the awarding of a construction contract by September 30, 1987: *Provided further,* That the Administrator shall promptly report in writing to the Comptroller General and to the Committees on Appropriations any approved major construction project in which obligations are not incurred within the time limitations established above; and the Comptroller General shall review the report in accordance with the procedures established by section 1015

of the Impoundment Control Act of 1974 (title X of Public Law 93-344): *Provided further,* That no funds from any other account may be obligated for constructing, altering, extending, or improving a project which was approved in the budget process and funded in this account until one year after substantial completion and beneficial occupancy by the Veterans Administration of the project or any part thereof with respect to that part only: *Provided further,* That the final proviso under this heading in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1984 (Public Law 98-45) and the penultimate proviso under this heading in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1985 (Public Law 98-371) are hereby repealed: *Provided further,* That prior to the issuance of a bidding document for any construction contract for a project approved under this heading (excluding completion items), the director of the affected Veterans Administration medical facility must certify that the design of such project is acceptable from a patient care standpoint.

CONSTRUCTION, MINOR PROJECTS

For constructing, altering, extending, and improving any of the facilities under the jurisdiction or for the use of the Veterans Administration, including planning, architectural and engineering services, and site acquisition, or for any of the purposes set forth in sections 1004, 1006, 5002, 5003, 5006, 5008, 5009, and 5010 of title 38, United States Code, where the estimated cost of a project is less than $2,000,000, [$144,400,000] *$145,406,000,* to remain available until expended, along with unobligated balances of previous Construction, minor projects appropriations which are hereby made available for any project where the estimated cost is less than $2,000,000: *Provided,* That not more than $36,313,000 shall be available for expenses of the Office of Construction: *Provided further,* That funds in this account shall be available for (1) repairs to any of the nonmedical facilities under the jurisdiction or for the use of the Veterans Administration which are necessary because of loss or damage caused by any natural disaster or catastrophe and (2) temporary measures necessary to prevent or to minimize further loss by such causes.

GRANTS FOR CONSTRUCTION OF STATE EXTENDED CARE FACILITIES

For grants to assist the several States to acquire or construct State nursing home and domiciliary facilities and to remodel, modify or alter existing hospital, nursing home and domiciliary facilities in State homes, for furnishing care to veterans, as authorized by law (38 U.S.C. 5031-5037), $22,000,000 to remain available until September 30, 1988.

GRANTS FOR THE CONSTRUCTION OF STATE VETERANS CEMETERIES

For grants to aid States in establishing, expanding or improving State veterans' cemeteries as authorized by law (38 U.S.C. 1008), $3,000,000, to remain available until September 30, 1988.

GRANTS TO THE REPUBLIC OF THE PHILIPPINES

For payment to the Republic of the Philippines of grants, as authorized by law, (38 U.S.C. 632), for assisting in the replacement and upgrading of equipment and in rehabilitating the physical plant and facilities of the Veterans Memorial Medical Center, $500,000, to remain available until September 30, 1987.

DIRECT LOAN REVOLVING FUND

During 1986, within the resources available, not to exceed $1,000,000 in gross obligations for direct loans is authorized for specially adapted housing loans (38 U.S.C. chapter 37).

LOAN GUARANTY REVOLVING FUND

(INCLUDING TRANSFER OF FUNDS)

For expenses necessary to carry out Loan guaranty and insurance operations, as authorized by law (38 U.S.C. chapter 37, except administrative expenses, as authorized by section 1824 of such title), [$235,000,000] *$200,000,000,* to remain available until expended.

During 1986, the resources of the Loan guaranty revolving fund shall be available for expenses for property acquisitions, payment of participation sales insufficiencies, and other loan guaranty and insurance operations, as authorized by law (38 U.S.C. chapter 37, except administrative expenses, as authorized by section 1824 of such title): *Provided,* That the unobligated balances, including retained earnings of the Direct loan revolving fund, shall be available, during 1986, for transfer to the Loan guaranty revolving fund in such amounts as may be necessary to provide for the timely payment of obligations of such fund, and the Administrator of Veterans Affairs shall not be required to pay interest on amounts so transferred after the time of such transfer.

During 1986, with the resources available, gross obligations for direct loans and total commitments to guarantee loans are authorized in such amounts as may be necessary to carry out the purposes of the "Loan guaranty revolving fund".

ADMINISTRATIVE PROVISIONS

(INCLUDING TRANSFER OF FUNDS)

Not to exceed 5 per centum of any appropriation for 1986 for "Compensation and pensions", "Readjustment benefits", and "Veterans insurance and indemnities" may be transferred to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriations so augmented.

Appropriations available to the Veterans Administration for 1986 for salaries and expenses shall be available for services as authorized by 5 U.S.C. 3109.

No part of the appropriations in this Act for the Veterans Administration (except the appropriations for "Construction, major projects" and "Construction, minor projects") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs.

One or more pilot programs shall be conducted to determine the effectiveness of utilizing private contractual services to assist in the administrative collection of various types of delinquent debts or other funds due the government.

TITLE III
CORPORATIONS

Corporations and agencies of the Department of Housing and Urban Development and the Federal Home Loan Bank Board which are subject to the Government Corporation Control Act, as amended, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Act as may be necessary in carrying out the programs set forth in the budget for 1986 for such corporation or agency except as hereinafter provided: *Provided,* That collections of these corporations and agencies may be used for new loan or mortgage purchase commitments only to the extent expressly provided for in this Act (unless such loans are in support of other forms of assistance provided for in this or prior appropriation Acts), except that this proviso shall not apply to the mortgage insurance or guaranty operations of these corporations, or where loans or mortgage purchases are necessary to protect the financial interest of the United States Government.

FEDERAL HOME LOAN BANK BOARD

LIMITATION ON ADMINISTRATIVE EXPENSES, FEDERAL HOME LOAN BANK BOARD

Not to exceed a total of $26,213,000 shall be available for administrative expenses of the Federal Home Loan Bank Board for procurement of services as authorized by 5 U.S.C. 3109, and contracts for such services with one organization may be renewed annually, and uniforms or allowances therefor in accordance with law (5 U.S.C. 5901-5902), and said amount shall be derived from funds available to the Federal Home Loan Bank Board, including those in the Federal Home Loan Bank Board revolving fund and receipts of the Board for the current fiscal year, *of which not to exceed $500,000 shall be available for purposes of training State examiners and not to exceed $1,500 shall be available for official reception and representation expenses*: *Provided,* That members and alternates of the Federal Savings and Loan Advisory Council may be compensated subject to the provisions of section 7 of the Federal Advisory Committee Act, and shall be entitled to reimbursement from the Board for transportation expenses incurred in attendance at meetings of or concerned with the work of such Council and may be paid in lieu of subsistence per diem not to exceed the dollar amount set forth in 5 U.S.C. 5703: [*Provided further,* That not less than $500,000 shall be available only for purposes of training State examiners: *Provided further,* That not to exceed $1,500 shall be available for official reception and representation expenses:] *Provided further,* That notwithstanding any other provision of law, and in connection with the Board's delegation of certain functions to the Federal home loan banks, the Board may transfer title of related furniture, fixtures and equipment property of record as of the date of the delegation to the banks: *Provided further,* That, notwithstanding any other provisions of this Act, except for the limitation in amount hereinbefore specified, the expenses and other obligations of the Board shall be incurred, allowed, and paid in accordance with the provisions of the Federal Home Loan Bank Act of 1932, as amended (12 U.S.C. 1421-1449).

LIMITATION ON ADMINISTRATIVE EXPENSES, FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

Not to exceed [$1,404,000] *$1,440,000* shall be available for administrative expenses, which shall be on an accrual basis and shall be exclusive of interest paid, depreciation, properly capitalized expendi-

tures, expenses in connection with liquidation of insured institutions or activities relating to section 406(c), 407, or 408 of the National Housing Act, liquidation or handling of assets of or derived from insured institutions, payment of insurance, and action for or toward the avoidance, termination, or minimizing of losses in the case of insured institutions, legal fees and expenses and payments for expenses of the Federal Home Loan Bank Board determined by said Board to be properly allocable to said Corporation, and said Corporation may utilize and may make payments for services and facilities of the Federal home loan banks, the Federal Reserve banks, the Federal Home Loan Bank Board, the Federal Home Loan Mortgage Corporation, and other agencies of the government: *Provided*, That, notwithstanding any other provisions of this Act, except for the limitation in amount hereinbefore specified, the administrative expenses and other obligations of said Corporation shall be incurred, allowed, and paid in accordance with title IV of the Act of June 27, 1934, as amended (12 U.S.C. 1724-1730f).

TITLE IV

GENERAL PROVISIONS

SEC. 401. Where appropriations in titles I and II of this Act are expendable for travel expenses and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amounts set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System; to travel performed directly in connection with care and treatment of medical beneficiaries of the Veterans Administration; to travel performed in connection with major disasters or emergencies declared or determined by the President under the provisions of the Disaster Relief Act of 1974; to site-related travel performed in connection with the Comprehensive Environmental Response, Compensation, and Liability Act of 1980; *travel under the Solid Waste Disposal Act as amended;* or to payments to interagency motor pools where separately set forth in the budget schedules: *Provided further, That if appropriations in titles I and II expendable for travel expenses exceed the amounts set forth in budget estimates submitted for such appropriations, the expenditures for travel may likewise exceed the amounts therefor set forth in the estimates in the same proportion as the amounts expendable for travel expenses exceed the estimates therefor.*

SEC. 402. Appropriations and funds available for the administrative expenses of the Department of Housing and Urban Development and the Selective Service System shall be available in the current fiscal year for purchase of uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); hire of passenger motor vehicles; and services as authorized by 5 U.S.C. 3109.

SEC. 403. Funds of the Department of Housing and Urban Development subject to the Government Corporation Control Act or section 402 of the Housing Act of 1950 shall be available, without regard to the limitations on administrative expenses, for legal services on a contract or fee basis, and for utilizing and making payment for services and facilities of Federal National Mortgage Association, Government National Mortgage Association, Federal Home Loan Mortgage Corporation, Federal Financing Bank, Federal Reserve banks or any member thereof, Federal home loan banks, and any insured bank within the meaning of the Federal Deposit Insurance Corporation Act, as amended (12 U.S.C. 1811-1831).

SEC. 404. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 405. No funds appropriated by this Act may be expended—

(1) pursuant to a certification of an officer or employee of the United States unless—

(A) such certification is accompanied by, or is part of, a voucher or abstract which describes the payee or payees and the items or services for which such expenditure is being made, or

(B) the expenditure of funds pursuant to such certification, and without such a voucher or abstract, is specifically authorized by law; and

(2) unless such expenditure is subject to audit by the General Accounting Office or is specifically exempt by law from such audit.

SEC. 406. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or employee of such department or agency between his domicile and his place of employment, with the exception of the Secretary of the Department of Housing and Urban Development, who, under title 5, United States Code, section 101, is exempted from such limitation.

SEC. 407. None of the funds provided in this Act may be used for payment, through grants or contracts, to recipients that do not share in the cost of conducting research resulting from proposals not specifically solicited by the government: *Provided*, That the extent of cost sharing by the recipient shall reflect the mutuality of interest of the grantee or contractor and the government in the research.

SEC. 408. None of the funds provided in this Act may be used, directly or through grants, to pay or to provide reimbursement for payment of the salary of a consultant (whether retained by the Federal government or a grantee) at more than the daily equivalent of the maximum rate paid for GS-18, unless specifically authorized by law.

SEC. 409. No part of any appropriation contained in this Act for personnel compensation and benefits shall be available for other object classifications set forth in the budget estimates submitted for the appropriations.

SEC. 410. None of the funds in this Act shall be used to pay the expenses of, or otherwise compensate, non-Federal parties intervening in regulatory or adjudicatory proceedings. Nothing herein affects the authority of the Consumer Product Safety Commission pursuant to section 7 of the Consumer Product Safety Act (15 U.S.C. 2056 et seq.).

SEC. 411. Except as otherwise provided under existing law or under an existing Executive order issued pursuant to an existing law, the obligation or expenditure of any appropriation under this Act for contracts for any consulting service shall be limited to contracts which are (1) a matter of public record and available for public inspection, and (2) thereafter included in a publicly available list of all contracts entered into within twenty-four months prior to the date on which the list is made available to the public and of all contracts on which performance has not been completed by such date. The list required by the preceding sentence shall be updated quarterly and shall include a narrative description of the work to be performed under each such contract.

SEC. 412. Except as otherwise provided by law, no part of any appropriation contained in this Act shall be obligated or expended by any executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.) for a contract for services unless such executive agency (1) has awarded and entered into such contract in full compliance with such Act and the regulations promulgated thereunder and (2) requires any report prepared pursuant to such contract, including plans, evaluations, studies, analyses and manuals, and any report prepared by the agency which is substantially derived from or substantially includes any report prepared pursuant to such contract, to contain information concerning (A) the contract pursuant to which the report was prepared and (B) the contractor who prepared the report pursuant to such contract.

SEC. 413. No part of any appropriation contained in this Act shall be available to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.

SEC. 414. Except as otherwise provided in section 406, none of the funds provided in this Act to any department or agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such department or agency.

SEC. 415. None of the funds provided in this Act to any department or agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than 22 miles per gallon.

SEC. 416. Not to exceed 2 per centum of any appropriation made available to the Environmental Protection Agency by this Act (except appropriations for "Construction grants" or "Hazardous Substance Response Trust Fund") may be transferred to any other such appropriation: Provided, That the receiving appropriation will not be increased by more than 2 per centum.

This Act may be cited as the "Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1986".

COMMITTEE MODIFICATIONS

Mr. GARN. Mr. President, on behalf of the Committee on Appropriations, I send to the desk modifications to the committee amendments; and I ask unanimous consent that the committee amendments to H.R. 3038, as modified, be considered and agreed to en bloc, provided that no points of order are waived thereon and that the measure as amended be considered as original text for the purpose of amendment.

The PRESIDING OFFICER. Is there objection?

Mr. LEAHY. We have no objection.

Mr. PROXMIRE. Mr. President, reserving the right to object, I am not sure what the procedural effect will be on what the distinguished manager of the bill has proposed.

I suggest the absence of a quorum, for a moment, to discuss that.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GARN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GARN. Mr. President, I renew my unanimous consent request.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Utah?

Mr. LEAHY. Mr. President, I am advised there are no objections on this side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The modifications to the committee amendments are as follows:

On page 2, line 13, strike out "$802,947,547" and insert in lieu thereof "$872,191,547".

On page 2, line 16, strike out "$7,468,420,781" and insert in lieu thereof "$8,108,355,781".

On page 2, line 20, strike out "$409,500,000" and insert in lieu thereof "$327,600,000".

On page 2, lines 22 and 23, strike out "$735,295,000" shall be available as an appropriation of funds, to remain available until expended," and insert in lieu thereof "$1,500,000,000 shall be".

On page 3, line 5, strike out "$471,570,000" and insert in lieu thereof "$428,700,000".

On page 4, line 15, strike out "$150,000,000" and insert in lieu thereof "$100,000,000".

On page 4, line 19, strike out "$75,000,000" and insert in lieu thereof "$50,000,000".

On page 8, line 10, strike out "$1,260,600,000" and insert in lieu thereof "$1,240,600,000".

On page 8, line 13, strike out "$50,000,000" and insert in lieu thereof "$30,000,000".

On page 11, line 18, strike out "$3,124,800,000" and insert in lieu thereof "$3,024,800,000".

On page 14, line 3, strike out "$591,686,000" and insert in lieu thereof "$586,686,000".

On page 17, line 8, strike out "$228,750,000" and insert in lieu thereof "$218,750,000".

On page 18, line 3, strike out "$577,600,000" and insert in lieu thereof "$572,600,000".

On page 20, line 5, strike out "$145,000,000" and insert in lieu thereof "$120,000,000".

On page 27, line 18, strike out "$2,790,800,000" and insert in lieu thereof "$2,775,800,000".

On page 28, line 10, strike out "$3,412,900,000" and insert in lieu thereof "$3,382,900,000".

On page 32, line 6, strike out "$1,363,000,000" and insert in lieu thereof "$1,358,000,000".

On page 33, line 19, strike out "$115,100,000" and insert in lieu thereof "$113,100,000".

On page 34, line 7, strike out "$60,550,000" and insert in lieu thereof "$50,550,000".

On page 36, line 5, strike all following the figure down through and including "1986" on line 11 and insert in lieu thereof the following: ": *Provided*, That, notwithstanding the provisions of 31 U.S.C. 6701-6724, payments to local governments from this appropriation shall not exceed $3,995,862,500 and this appropriation is hereby reduced by $570,837,500 through a 12.5 per centum reduction is each quarterly payment".

On page 38, line 8, strike out "$9,358,694,000" and insert in lieu thereof "$9,062,694,000".

On page 18, after line 24, insert the following:

PAYMENT TO THE HAZARDOUS SUBSTANCE RESPONSE TRUST FUND

For payment, as repayable advances to the Hazardous Substance Response Trust Fund, as authorized by law, such borrowed sums as may be necessary to carry out the purposes of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 et seq.).

HAZARDOUS SUBSTANCE RESPONSE TRUST FUND

For necessary expenses to carry out the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, including sections 111 (c)(3), (c)(5), and (e)(4) (42 U.S.C. 9611), $1,200,000,000, to be derived from the Hazardous Substance Response Trust Fund to remain available until expended: *Provided*, That not to exceed $140,000,000 shall be available for administrative expenses. Funds appropriated under this account may be allocated to other Federal agencies in accordance with section 111(a) of Public Law 96-510: *Provided further*, That for performance of specific activities in accordance with section 104(i) of Public Law 96-510, the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, $21,000,000 shall be made available to the Department of Health and Human Services on October 1, 1985, to be derived by transfer from the Hazardous Substance Response Trust Fund, of which no less than $5,125,000 shall be available for toxicological testing of hazardous substances.

Mr. GARN. Mr. President, the Appropriations Committee recommendation provides a total of $54.8 billion in new budget authority for the Department of Housing and Urban Development, the Environmental Protection Agency, the National Aeronautics and Space Administration, the National Science Foundation, the Veterans Administration, and 13 other agencies, commissions, boards, corporations, institutes, and offices. This is $4.1 billion less than the fiscal year 1985 level, and almost $600 million less than the House bill. The recommendation, however, is $4.7 billion more than the budget request.

The bulk of the committee recommendation is reflected in the committee report (SR 99-129). General highlights of the bill include the following:

In housing, our recommendation continues the policy of 100,000 incremental units—although a housing moratorium was proposed by the administration.

More than a freeze level is recommended for NASA, NSF, EPA, and VA—although in each of these agencies—with the exception of EPA—less than the budget request is provided.

In EPA, funding for both Superfund—$900 million—and the Construction Grants Program—$2.4 billion—are deferred while we await passage of the authorizations for these programs.

The recommendation deletes a House provision which would terminate the Revenue Sharing Program at the end of the third quarter of fiscal year 1986.

Mr. LEAHY. Mr. President, it is a pleasure to join my colleague and friend, the Senator from Utah, in managing the 1986 HUD-independent agencies appropriation bill.

This is my first opportunity to manage this bill. Over the last 9 months, I have been impressed with the size and the complexity of this legislation. This is the third largest of the 13 appropriation bills. Only the bills for the Department of Defense and the Departments of Labor, Health and Human Services, Education are larger.

It is also a very complex bill. It includes funding for housing, of course. But, it also includes much, much more than housing.

All of our veterans' programs are funded in this bill.

Most nondefense science and space programs are funded in this bill.

It contains all the funding for the air, water, hazardous waste, and pesticide programs, at the Environmental Protection Agency, as well as the Superfund and waste water construction grants programs.

Critical economic development aid and science education programs are funded in this bill.

It includes the Disaster Assistance Programs of the Federal Emergency Management Agency.

In all, this bill appropriates $54.8 billion in new spending authority in the 19 departments and independent agencies under the bill's jurisdiction.

In my first year as the ranking member on this subcommittee, I have had three objectives:

First, to produce a fiscally responsible bill;

Second, to continue to meet national needs that cannot be met more successfully by either the private sector or local or State governments.

And third, to move forward in two vital areas—environmental protection and scientific development.

I think in this bill, the chairman and I have succeeded in meetings these goals. This bill appropriates $1.1 billion less than was appropriated in 1985 for the same programs. We have more than frozen the budget overall.

A $54.8 billion is a lot of money. But think of this. If the 1980 level of spending were simply adjusted for inflation, we would have appropriated $70 billion in this bill. Compared to the 1980 level, spending level in this bill has been cut almost 50 percent in real dollars.

Second, this bill meets the national needs that cannot be met efficently by

either the private sector or State and local governments. We have provided 100,000 incremental housing units to house the poorest of our society. The debt we owe our veterans who have served our Nation will be repaid.

Finally, this bill continues to move us forward in two criteria areas—environmental protection and scientific development.

We are in the midst of a chemical revolution that is creating environmental challenges that must be addressed by new programs and more resources. This bill recognizes these new challenges.

We are also faced with unprecedented technological competition from abroad. This bill addresses that competition by increasing support for the two science agencies by $261 million above the 1985 level.

In the midst of the discussions of national programs and national needs, I want to assure my constituents that this bill addresses their needs very directly.

For example, as the result of a statewide property reassessment, Vermont homeowners are facing increased property taxes. This bill fully funds revenue sharing to ensure that Vermont does not lose the $12.8 million in property tax relief it has received in recent years.

Vermonters are also deeply concerned about the quality of the environment. This bill includes three major environmental initiatives critical to Vermont.

First, the committee increased the State environmental protection grants by $12 million. These grants are used by States, such as Vermont, to enforce the Federal clean air, clean water, and hazardous waste statutes. If this increase is accepted by the House, Vermont's pollution control agencies will receive about $60,000 more than under the President's request.

The increased support for State clean water activities will be specially important to Vermont. Tight staffing, caused by the Kunin administration's effort to reduce the State's deficit, is making it difficult for the State to process clean water permits.

Second, the bill includes $6.8 million to increase efforts to reduce hazardous air pollution.

The Environmental Protection Agency has been dragging its feet on hazardous air pollution. This year, EPA will be deciding that eight hazardous pollutants are so dangerous that they must be regulated, but it has only asked for the funds to write the regulations to control five of those pollutants. I have asked for this increase in its budget so that the public can be sure that when the Agency determines that a pollutant is hazardous, it will immediately move to control it.

The bill also adds $2.4 million so that the Agency will be able to screen 20 of the 200 potentially hazardous air pollutants. The Agency had asked for the funds to screen only eight of those pollutants. This information will assist air pollution agencies in New England, which are taking the initiative in developing hazardous air pollution standards.

The bill also includes $2 million to survey radon pollution in homes throughout the Nation. Radon pollution has occurred in several communities in Vermont.

Third, the bill includes $50 million in funds for local school districts to use to remove or control asbestos in schools. Last year three Vermont school districts received $268,000 to remove or control asbestos. The administration request included no funds for this critical program.

Vermonters are also a critical part of the technological revolution occurring in our Nation. Vermont is one of the fastest growing high technology States. That is why earlier this year, I introduced the S. 1394, the Technology Extension and Education Act of 1985.

Although that legislation will not be enacted this year, the bill before us today reflects the premises of that legislation that we must strengthen science education, must rebuild our scientific infrastructure, and must promote cooperation between private industry and the universities.

Thus, in spite of its overall support for a freeze, the committee accepted the Agency's increased request for developing new science teaching methods, scientific instrumentation, and industry-university cooperative research.

I am glad that in my first year as Senior Democrat on the subcommittee responsible for the EPA's budget, that we have been able to move forward in these critical areas.

Finally, working with the chairman, we have included funding for the final design of the Veterans Center at the White River Junction Veterans Administration Hospital.

This facility does important agent orange research. But more importantly, it is a magnet for the high-quality medical personnel our Vermont veterans need and deserve.

In sum, Mr. President, this is a good bill that meets critical national needs in a fiscally responsible manner.

I yield back to the distinguished Senator from Utah.

Mr. GARN. Mr. President, I thank the distinguished Senator from Vermont. He and I came to the Senate together in the class of 1974 and have been good friends all those years. I appreciate the opportunity to work with him on this bill. It has been difficult.

I might just explain a little bit the difficulty, while we are waiting for our colleague to arrive to offer their amendments. The HUD and Independent Agencies appropriation bill over the last 5 years has certainly done its share in attempting to solve the budget deficit problem. As outlined in my opening statement, our bill, in 1985 dollars, is $54.8 billion in new budget authority. When I became chairman in 1981, the bill was slightly over $60 billion in 1981 dollars. I do not know whether other subcommittees have done as well or not. But considering the fact that you have had years of inflation—and we are not talking about playing with different year dollars, but comparing them exactly—this subcommittee has certainly done its share.

Despite the fact that we are at a lower level in actual dollars in 1985 than we were back in the late 1970's and 1980's, housing has taken the major brunt of this cut, and I happen to believe that that is right. We had a lot of housing programs, many of them that were very inefficient, were not working as they should.

Neverthless, we arrive at a problem on the floor today, having cut significant amounts of money over the last 5 years, being told by the Senate budget resolution that we must cut more, which we did in committee, an additional $800 million in budget outlays. The problem occurs and the controversy will be on the floor today on this bill over those very additional cuts of $800 million because they come in very sensitive areas.

I told the Senate Apporopriations Committee when we made those additional cuts that I did not like to have to recommend cuts in those areas, but it was the only way that we could possibly save $800 million in outlays. The HUD and Independent Agencies Subcommittee has a rather diverse group of agencies. You have HUD which has long spend-out programs. We could cut approximately $300 million in additional authorizations for housing programs in this bill and only save $9 million or $10 million in outlays next year. Well, that does not make much of a dent in $800 million of overage in outlays. You can look at many of the other programs that are not fast spend-out items.

And I told the Appropriations Committee that our problem would come down to having to cut veterans' medical care and revenue sharing, because those were the only two areas that you could get large amounts of additional outlay savings for next year. If you put all the rest of the agencies together and if you gutted them, I mean literally, practically put them out of existence, you simply could not come up with $800 million of outlay savings in fiscal year 1986. That is exactly the way it turned out in the committee, and the majority of the savings in that $800 million have come in those two areas. That is where the controversy will be on this bill today.

There will be amendments offered to put money back in for veterans' medical care, a worthy purpose. There will be an amendment offered to put $400 million back into revenue sharing. As a former mayor and former officer of the National League of Cities, I do not like to cut revenue sharing. I do not think the program should have been discontinued at all. I think it probably is the best program we have for the cities and counties and local governments of this country.

I think the Senate faces a time when we have to face the reality that you cannot come out here on the floor of the Senate and vote for a budget resolution that specifies budget ceilings and says you must not exceed these totals, vote for that budget resolution, and go home and tell our constituents that we have voted for fiscal responsibility and reduced deficits, but then when it comes to voting for the individual appropriations bills to implement that Budget Act, we are not willing to do it.

So even though I took no pleasure in cutting additional amounts of veterans' health care out of the Veterans' Administration or additional money out of revenue sharing, I am not going to be one of those who gives speeches at home talking about fiscal responsibility, balanced budgets, vote for Gramm-Rudman and say, "Look what a fiscal conservative I am," but then when it comes to the appropriations bills, where the money is spent, not be willing to do it. I did not like that amendment in committee at all, but I will sleep nights because this bill, as presented today, complies with the Senate budget resolution passed overwhelmingly by the Senate.

I would suggest that the Senate ought to comply, that individual Senators ought to comply with their votes on the budget resolution when it applies to the appropriations bills where the money is actually spent.

So that is where we are. If Senators are listening in their offices, or staff, that is what it is going to boil down to. This bill does comply with the Senate budget resolution. But if we add back in $800 million in veterans' health care and in revenue sharing, we face something that I think will be the most distasteful of all. Rather than going through a budget very carefully, as both Senator LEAHY's staff and mine have and the staff of the Appropriations Committee, to make cuts in every agency to obtain that $800 million reduction in outlays, we will face on the floor an across-the-board cut, which is indiscriminate, which does not evaluate individual programs and their worth and where the hurt will really come. I do not like that. I do not like that kind of action.

We have attempted—maybe not with a scalpel, but at least with a butcher knife—to trim this budget. And if we get just an indiscriminate, across-the-board cut, that may be easy for my colleagues to vote for, but it is a meat ax approach, without any consideration of the individual needs of the various agencies under this bill.

So I hope that, when we finish this bill, it will comply with the budget resolution, that we will meet what the Senate told us to do and that we will not do it with a meat ax, but that we will do it with some thought and consideration of how we meet those budget targets.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. COCHRAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 784

Mr. DURENBERGER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Minnesota [Mr. DURENBERGER] proposes an amendment numbered 784. On page 36, line 5: strike all after the numeral through line 11 and insert a period.

Mr. DURENBERGER. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DURENBERGER. Mr. President, the effect of my amendment would be to strike the Appropriations Committee proposal reducing the appropriations for general revenue sharing for fiscal year 1986 by $570 million. Listening to the chairman of the subcommittee explain the difficulty of conforming both with the budget reality and with the budget resolution, I can sympathize with the intent of their proposal. There is no more important issue facing our country today than getting control over unnecessary Federal spending, and more particularly reducing the size of the Federal deficit. But as well all know, there are no longer any quick or easy solutions to either of these problems. There are no shortcuts left. We took all of those in 1981-82. Indeed, there really are not or should not be any scapegoats left either.

Mr. President, cutting general revenue sharing for fiscal year 1986 is not the answer to our problem. It is not the answer because once again we are called upon to sacrifice taxpayers of the State and local level, to sacrifice a well-reasoned, long-term strategy for a Federal tax system for our inability to deal adequately with the problems of the deficit.

Mr. President, we all count on States and cities to do a lot of things for us. We count on them to provide for ourselves and our children, and for our elderly. We count on them to provide safe drinking water. We count on them to ensure handicapped access, to administer jails, to fill our potholes, and to provide mental health. We count on them for a lot of things. But lately they have not been able to count on us. The truth is that this proposal to eliminate a portion of the general revenue-sharing funds promised State and local governments when they already have gone through their old decisionmaking process this year violates the basic trust that we in the Federal level owe to local government. It is our responsibility to send clear signals to those governments about just what we expect from them, and how much funding they can anticipate to meet those expectations. They rely on these signals to make budget plans and to determine outlays.

In the case of general revenue sharing, the signal has already been sent. The budget resolution, which was at the focus of every mayor and council members' planning for the coming year, assumed full funding for general revenue sharing for fiscal year 1986. That was in July of this year. Now it is October and we are talking about changing the game plan. Yet nearly all of the 39,000 local governments in this country that receive general revenue sharing funds start their fiscal years on July 1—3 months earlier than the first day of the Federal calendar. They could not wait to see if we changed our mind. And because they could not wait, they had to take us at our word: They planned on full funding for general revenue sharing for this year. They all took actions, and made commitments based on the signals that we ourselves sent to them. Mr. President, they count on us. That is why proposing cuts now is unfair. It is changing the rules in the middle of the game. They counted on us and we proposed to let them down. We are thus undermining the trust that is the foundation of the federal system.

Mr. President, I do not have to tell you or any of my colleagues, really, that State and local governments are already under substantial siege in this country. In the past 5 years they have taken more than their fair share of budget cuts aimed at reducing the deficit—not their deficit, our deficit. Since 1981, Federal aid is down 25 percent, the number of programs is down 9 percent in constant dollars, down 15 percent as a percentage of GNP, down 21 percent as a proportion of the Federal budget, and down 20 percent as a proportion of State and local spending. And the attack is just beginning.

The Gramm-Rudman proposal which we so hotly debated last week would eventually force States and localities to bear the brunt of further budget reductions. In a budget where States and localities account for 40 percent of all nondefense discretionary spending, there can be little doubt that further cuts will fall disporportionately and unfairly.

In addition we have before us a tax reform proposal from the administration. Sixty-seven percent of the revenues to be raised to meet the demands of rate reduction on the Federal income tax contained in that proposal come at the expense of State and local governments.

Mr. President, for all of those reasons, on both the tax and budget sides, I must oppose the cut proposed by our colleagues in the Appropriations Committee. I am not alone. Senators MOYNIHAN, HEINZ, BYRD, GRASSLEY, ROCKEFELLER, D'AMATO, NUNN, SPECTER, KASTER, HARKIN, LONG, ZORINSKY, SIMON, SASSER, and FORD have already joined in advancing opposition to any reduction in GRS for this fiscal year.

Mr. President, I ask unanimous consent that the Senators just named be listed as cosponsors on my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GARN addressed the chair.

The PRESIDING OFFICER. The Senator from Utah.

Mr. GARN. Mr. President, it is difficult for me, or virtually impossible, to argue against the Senator from Minnesota on the substance of his arguments. I must remind my colleagues that as a former mayor of Salt Lake City and an officer of the National League of Cities I was part of a lobbying team many years ago for the initial enactment of general revenue sharing. The major reason that I sought that aid from the cities at the time is not just for the principle of local determination. As mayor I dealt with the morass of categorical grant-in-aid programs almost without number and with such control from regional headquarters of HUD and HHS and all the Federal agencies in Denver that I really did not feel I was the mayor of Salt Lake City but was the local manager for the Federal Government. The revenue sharing offered a principle that was different than we would be able to determine from our city councils and our county commissions as to how that money would be spent with all the layers of bureaucracy, and the wasted administrative expense.

I frankly was very disappointed when this administration talked about New Federalism and wanted to eliminate revenue sharing. I offered a counterproposal that we not eliminate revenue sharing. We eliminate categorical grant-in-aid programs for the same amount of money. Most of the mayors and local government officials of this country supported that concept—a willingness to take cuts in the specific categorical grant-in-aid programs, but preserve the principle of revenue sharing. That was rejected. I think that is a mistake. So it may sound strange that I am here arguing for a cut as an original proponent—not as a member of revenue sharing—feeling that the administration is wrong in proposing to eliminate it, and not wanting to take revenue away in this type of a program, but preferring to do it in the administrative bureaucratic categorical grant-in-aid programs, but I am not faced with the luxury of being able to do that. I am faced as chairman of this subcommittee of meeting budget targets and ceilings imposed by the Senate of the United States. So there are some votes in this bill that I would not like to cast. This is one that I would not like even to have come before us. I do not want revenue sharing ended. But it is going to be ended. That determination has been made. We are now talking about one-eighth of that amount of money during the last year of revenue sharing. So it is a choice that I do not like to have to make but I must. I want to reiterate what I said in my opening remarks.

I want my colleagues to listen or their staffs to listen. If this amendment passes to add $400 million back in, for each $100 million of outlays we add back into this bill that means approximately the necessity of a 1-percent across-the-board cut. That is 4 percent. So we will face later today a 4 percent across-the-board cut, indiscriminately, without regard to where it comes from, to come out of every agency.

So we are faced with some tough choices. This is one for me. It is personal support of a program that I am up here advocating we take money out of because I have no other alternative. The damage done to the rest of this bill and other agencies would be money to come out. I want my colleagues to recognize that what they are making a choice on here is between general revenue sharing and funds coming out of EPA, out of Superfund, out of Federal Emergency Management Agency, out of Veterans, out of Arlington Cemetery, the Battle Monuments Commission, all sorts of agencies, some of them with very, very tiny budgets. They will all be affected.

So I hope this amendment is defeated, that we do not do havoc to this bill with a giant meat ax because we are putting money back into revenue sharing.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, I understand and appreciate the concern the Senator from Utah has stated. It is unfortunate that we could not find ways, even if it meant removing some programs that I happen to like, to continue revenue sharing. I represent probably the most rural of all States. I know how important revenue sharing is because it allows us, as Vermonters, to make decisions for Vermont communities. These decisions might not be the same as would be made by somebody in Washington who thinks the definition of rural is Fairfax County and do not realize what rural needs truly are, whether it is rural law enforcement, rural housing, rural health care, or anything else.

Each one of us, no matter how we may vote on this, realizes the value of having such no-strings-attached funds. I would suggest for the record, Mr. President, that this is probably going to be as difficult a vote for most Senators as any we are going to have, and whichever way one votes I think there is a very clear feeling of support for revenue sharing here on the floor of the Senate. Many who feel they should vote against the amendments do so because of their concerns about budget restrictions. It will be a matter of balancing two important values. In my case, I do feel that this is probably the most effective way, at least in small areas like my own, of getting money into those programs that need it.

Mr. President, no issue is more important to the people of Vermont at this time than property taxes. Throughout Vermont reappraisals of property values have greatly increased the property taxes of thousands of Vermonters. In every city and town in the State, town meetings, town managers, and mayors are struggling to make ends meet.

With the cutbacks in the Federal budget in the recent years, Vermont's municipalities have been called on to provide the funds for social services that formerly were provided by the Federal Government. Indeed, a recent survey found that increases for such help had increased by 53 percent in recent years.

Overall, the largest use of revenue sharing in Vermont is for local roads and police and firefighting support. Fifty-five of Vermont's cities and towns use revenue sharing to fund 25 percent or more of their fire protection capital expenditures.

Let me just mention two very different areas in Vermont—Addison County and the city of Burlington.

Addison County is largely rural and depends heavily on agriculture. Cows are still king in Addison County. In Bristol, in Addison County, 90 percent of revenue sharing in used for town equipment and essential social services. In Cornwall, the town has been using $6,000 of its revenue-sharing funds to pay for a firetruck. In Mid-

dlebury, a 15-cent increase in the property tax rate will be inevitable.

In Burlington, Vermont's largest city, the situation is the same. Burlington's treasurer has recently warned that the city is on the verge of a major financial crisis due to cuts in revenue sharing. If revenue sharing is abolished, property taxes will have to be raised by 15 percent or 40 city workers will be laid off and many services will be eliminated.

I am told that many States have a surplus, and these States will be able to make up the difference. That is clearly not the case in Vermont. The present Governor is struggling to retire an inherited multimillion dollar deficit.

I would like to end my remarks with a quote from a report that was recently released by the Governor on the effect of the elimination of revenue sharing on the State.

The report states:

Even more importantly, loss of revenue-sharing funds will hurt most those Vermont communities that are least able to raise their own taxes because of low incomes or low tax capacities. Most of these communities will be simply unable to appreciably raise property taxes. Instead, the most likely scenario is that they will entirely cut less critical services like ambulance services, home health care, and the like, and make substantial cuts in essential services like roads, fire protection, police and sanitation.

In summary, Mr. President, I strongly support the amendment restoring funds for the Revenue-Sharing Program. We must not reduce this critical program.

Mr. DURENBERGER. Mr. President, I will be brief in my response. I am obviously grateful to both the Senator from Utah and the Senator from Vermont for their comments on behalf of general revenue sharing, in particular, the comments of the Senator from Utah clearly set the parameters for this discussion by indicating that some time ago he took the leadership, focusing everyone's attention on the value of general revenue sharing to State and local governments as compared to the categorical grant programs.

Categorical grant programs deliver money to State and local governments; but this form of Federal aid brings problems with it.

First, these programs deliver an increasingly smaller amount of money, but less money never seems to be accompanied by any fewer mandates, strings, other obligations on the part of State and local governments as they deliver a particular service. The money dwindles. The mandates stay. This, in turn, raises continuously the cost to State and local governments to conform with Federal mandates. That is one part of the problem. As the Senator from Vermont knows, the second part of the problem is that, compared to categorical grants, GRS is a much more efficient way of getting money to communities. Under GRS we count on them to know where to spend the money. We do not dictate the paperwork process and all the other things that go with it for doing that eats up 15 to 20 cents on every dollar of aid we send.

General revenue sharing is a good program. It is an efficient program. If you care about each taxpayer's dollars, delivering close to a dollar's worth of service GRS is your program. The one part of this appropriations bill that gets 99 cents on every tax dollar—and the only one—is general revenue sharing. Why do we cut back on the most efficient tax dollar? Simply because it is spread over 39,000 jurisdictions in this country, some of whom do not need the money. That is the whole reason we are getting rid of general revenue sharing, because there are some of those communities who in the past have not needed the money.

One of the things we are all up against here is the fact that as we bail out on our fiscal responsibility, that responsibility falls to State and local governments.

I would like to acknowledge the point that when you do that, you do it unevenly. You may find a Beverly Hills or some other rich community in each of our States that does not need the return of a portion of the Federal income tax to supplement their local property taxes. But, let's put the problem in perspective. I suggest that you come with me or I come with you to your local communities outside some of your rich suburban metropolitan areas and we can watch those communities die. Go to BILL PROXMIRE's Wisconsin and watch those little towns, the ones that are not sustained by the dairy subsidies: Watch them die.

Watch the $3,000 an acre farm land go quickly down to $500 an acre. Watch the assessed valuation of those school districts drop by 75 percent. Then watch those taxes go up while we sit here saying we do not have the money and we do not have the resources to meet our commitment to those people.

I would say that if our choice is taking Arlington Cemetery against saving a dying township or a dying school district, I will take the dying township or the dying school district any day. I would fight to save an extra teacher in a school district or a janitor in city hall, or whatever the case may be, over a couple more lots in Arlington Cemetery.

If those are the choices with which we are provided in this bill, Mr. President, then General Revenue Sharing is the place we ought to invest our dollar.

If the alternative to my amendment is a 4-percent cut across the board, then I would suggest we consider it. After all, we are going to be here for the next 5 years doing that sort of thing anyway. We may as well start today. It is the whole notion of Gramm-Rudman. It is the whole notion of the freezes we have already been through. Do not bother debating the merits of general revenue sharing or any of the tough things that the chairman of this subcommittee has to do. Let us just go through the whole bill and take 4 percent out. After all we are going to be doing that for the foreseeable future if we continue our commitment to Gramm-Rudman.

Why not start now? Four percent is a lot better than 10 percent or 20 percent. Let us start right now. Approve my amendment, put 99.5 cents of every tax dollar directly into service delivery. Then we will go 4 percent across the board.

The budget resolution contemplated a 10-percent across-the-board administrative cost saving in these appropriations. It contemplated a 4-percent program-wide work force reduction. It contemplated some trimming of NASA, EPA and the Veterans' Administration.

All of those things were accepted by the committee.

Maybe the alternative of a 4-percent cut across the board, just nick everybody a little bit, is an appropriate solution to the problem. I suggest that when we all come down here at 11 o'clock or so to vote on this amendment, that is a more appropriate solution than telling the cities, counties, townships, many of whom are dying in this country, that we are going back on our commitment.

I repeat, finally, that general revenue sharing is fully funded in the first concurrent budget resolution. This amendment is a most appropriate way to put into effect all of the votes that we all took on that resolution.

Mr. PROXMIRE. Mr. President, I rise in opposition to the Durenberger amendment. First, I want to say that the distinguished managers of the bill, Senator GARN and Senator LEAHY, certainly come to this opposition with the strongest credibility. These are men who enthusiastically support revenue sharing.

I do not know anybody who has worked harder for revenue sharing than Senator GARN. He was a fine mayor, he understands how important it is to the cities and to the counties. Yet he is willing to stand up to an effort on the part of Senator DURENBERGER to restore the cut—I might say a very slight cut—that we made in revenue sharing as a way of getting at spending in this bill now.

I oppose this effort by Senator DURENBERGER to strike the amendment and to restore the money for revenue sharing. The committee amendment would cut general revenue sharing programs $570 million. That is a lot of money. It is all, of course—not all, but

almost all of it is—outlay savings in 1986. It does that by cutting each of the four quarterly revenue sharing payments by 12.5 percent—get that figure, Mr. President, 12.5 percent; we are not cutting it by 50 percent or cutting it out entirely—achieving $428 million in outlay savings in fiscal year 1986.

Mr. President, it makes eminent good sense to endorse the committee's approach if we are serious about completely eliminating the Revenue Sharing Program in 1987, as both Houses of Congress have agreed to do in approving this year's budget resolution.

We pledged to do that in the budget bill. We said we are going to eliminate revenue sharing next year. If we really mean it, we ought to cut it one-eighth of that, or 12.5 percent, this year. Both Houses of Congress have agreed to that.

I could make all the arguments against revenue sharing that we have heard year after year after year—that the Federal Government has no revenue to share; that the funds meet no specific need but can be used for any purpose whatsoever; that it is bad policy to separate the taxing and spending authority by raising the funds at the Federal level and then turning them over to virtually every community in the United States with no strings attached.

Mr. President, that is an argument I do want a minute on, because the one kind of discipline over spending we have in this country that is effective is that the taxpayers feel it. They protest it. In the revenue sharing program, we take it away. You go up to a mayor or a county board chairman and ask him why he is spending the money, he says, "Oh, don't worry about that, that is not your money, that is the Federal Government's money." I think that separation is a big mistake.

You can make the argument that it discriminates against poorer States. It does. But it seems to me Congress has decided to go against those arguments by ending the program in fiscal 1987.

A reasonable man might ask:

If we accept these arguments, why aren't we eliminating the program in fiscal year 1986? Why are we waiting until fiscal year 1987? After all, the Congressional Budget Office tells us that we will be facing a 1986 budget deficit of $175 billion.

I understand the latest figures make that about $185 billion—"even if all the assumptions made in the budget resolution come to pass. We should take whatever steps we can to cut that deficit."

I suppose there are two answers to that question. The first answer is that the authorization does not expire until 1987. But that is purely a technical objection. If we are truly serious about cutting the deficit we can not be bound by that kind of hair splitting logic. The second answer is that we should not spring this surprise on localities without giving them a chance to make up the deficit created by the termination of the program. But if this is a serious argument, then why not motivate communities to begin searching for alternative funding sources now by deleting 12½ percent of each quarter's payment as the committee has proposed? This would give communities a 1-year transition period in which to find other funding sources at the State and local level and would not leave them with the false hope that we might change our minds about killing the Revenue Sharing Program next year.

I might quickly point out, as the Senator from Minnesota said, over 30,000 local governments receive general revenue sharing funds, but they are a small part of total local expenditure. It is not as if we are cutting the heart out of revenues available to these local communities. It is a cut of 2.5 percent. We are cutting only one-eighth of that. So we are cutting far, far less than 1 percent by this amendment.

Second, general revenue sharing is becoming less important as a source of local government funding. It has dropped in half since 1973 as a proportion of the local tax revenues.

Third, other Federal grants to State and local governments have expanded. In 1973, general revenue sharing was 15.8 percent of all Federal grants, but by 1984, it had dropped to 4.7 percent.

Fourth, local governments in the aggregate have gone from deficit to surplus while the Federal Government is moving in exactly the opposite direction. Since 1972, the local government sector has run a modest surplus except for 1975. In 1973, local governments had a surplus equal to 2.6 percent of local revenues while the Federal deficit was over 30 percent of Federal revenues.

Finally, general revenue sharing is the only domestic program which the House agreed to eliminate. They even proposed a 25-percent cut in 1986. How can the Senate chide the House if we turn around and restore the only program they have cut?

Mr. President, I point out that this year, about 20 States cut taxes, with the largest reductions coming in New York, Ohio, and Minnesota.

I yield the floor, Mr. President.

Mr. DURENBERGER. Mr. President, I could not resist responding to that. If my colleague from Wisconsin will go back 2 or 3 years, he will find that all of those same States, practically all the States in the country, were raising their taxes. They were doing that because we were in an economic downturn. Then in 1983 we worked our way into an economic uptrun. I am proud to say I participated in a billion-dollar reduction by electing Republicans in my State as well. But now all of the signs in my State are that we are up against a revenue shortfall. The cause is a bad economy plaguing my State. Minnesota is not alone. We must add the State of Wisconsin, and, even more so, other States in the Midwest. So I think the argument that States have been running surpluses is not an argument applicable to this particular amendment. It is a reality of the 1983-84 economics, but it flies in the face of the reality of 1985-86 and beyond.

I remind my colleague also that the General Revenue Sharing Program has not sent a portion of its funds to State governments since calendar year 1980. All of the money goes to local government. If my State is to be used as an example, let me say, Mr. President, that the State of Minnesota, in its efforts to reduce statewide taxes, has reduced its aid to local government. So, again, I do not see that that is an appropriate argument against continuation to the end of the period for which GRS was promised in the budget resolution.

I hope my colleagues will keep in mind that if they want to spend the few dollars that we have available to us in this deficit-ridden budget of ours efficiently, then it is appropriate to support general revenue sharing at the expense, if you will, of the UDAG's and the CDBG's and all the other categorical grant programs that do not cover 39,000 local governments in this country, that are not necessarily needs-based categorical programs, and that do not get 99.5 cents on the dollar to each of the recipient units of the government.

Mr. President, I might state to the manager of the bill that one or two of my colleagues wanted to speak briefly on the amendment before I move its adoption.

Mr. GRASSLEY. Mr. President, I have joined my colleague, Senator DURENBERGER, in cosponsoring this amendment to restore the funding levels for general revenue sharing because I recognize the importance of this program to local communities across the entire Nation.

I have tried to get an across-the-board freeze passed by this Congress for the past few years. Had we passed the freeze, we would have a balanced budget by now and would not be struggling to find ways to meet the goals of the budget resolution and having to cut a program that assured our local communities would be there at the higher level.

The budget process this year has made it hard for our local communities to set their priorities and use the money we return to them in an effective way. Through proper planning local officials can better serve the people who elected them. If we keep

playing games and changing the rules on them every 2 to 3 weeks they will never be able to plan properly.

How can we sit here and let this happen to our local governments? First we said we would cut them by a certain amount, then we asked them if they would accept a split year's funding—half this year and then half next year. Obviously, they preferred for planning purposes all the funds this year.

In Iowa the proposed committee amendment would mean a $7.1 million cut from what we had originally agreed upon for the budget. I know when the issue came up in the Finance Committee, the authorizing committee, we too agreed on the larger number.

Last March my communities and counties had to certify to the State their budget that would go into effect on July 1. They have already been in their budget cycle for over 3 months and now we are saying to them, we were wrong, we are going to go back and cut revenue sharing by 12½ percent from the beginning of the year. That's an almost impossible situation to put our local officials in.

I would hope that my fellow Senators would join us in this amendment.

Mr. BYRD. Mr. President, I support general revenue sharing and I support it at the authorized funding level of $4.6 billion for fiscal year 1986.

Authorization legislation enacted in 1983 entitled local governments of this country to full funding from the general revenue-sharing program of $4.6 billion per year through fiscal year 1986. A reduction at the 11th hour—and coming after local governments have already set their budgets for fiscal year 1986—violates the pledge made to them by Congress that they could count on this money for their basic needs.

Further, the joint budget resolution, passed earlier this year, called for full funding for the general revenue-sharing program in fiscal year 1986. Mr. President, I believe it is unconscionable to act now to cut this program on which so many local governments rely for basic services and for which there is no alternative source of funding.

In my home State of West Virginia, revenue-sharing funds have been typically used for public facilities, such as water and sewer systems, courthouse and municipal office building construction, nursing home construction, construction of low- to moderate-income family housing, and public service employment.

Revenue sharing has enjoyed bipartisan support throughout its existence. It was proposed originally by a Republican President and enacted by a Democratic Congress. President Reagan has, in the past, given his full support to the program. It is the only program that provides Federal assistance to virtually every local government in the Nation. It has worked and it has worked well. I believe it deserves to be retained at full funding for its final year of authorization and I call on my colleagues here in the Senate to assure that this is the case.

Mr. ZORINSKY. Mr. President, today we are voting to make the Federal Government a reliable partner in the job of governing our Nation. During deliberation of the budget, assurances were continually made that general revenue sharing would be fully funded in fiscal year 1986. The program would then end in fiscal year 1987. Our amendment simply fulfills the commitment we in Congress made to provide this funding.

Local governments must make their budgeting decisions before Congress approves its appropriations bills. Now, because Congress is slow about doing its duty, we have placed the local governments in a bind. After assuring them that funds would be available, this appropriations bill calls for a 12.5-percent reduction in general revenue sharing. This is a bad faith cut, and I cannot support it.

I am first in line when it comes to keeping our appropriations bills within the budget, but this is not the question here. If this bill is overbudget, we can generate the needed savings with an across-the-board cut. This amendment is about the credibility of Congress in its dealings with local governments. Unexpected cuts such as these should be shared more equally across the programs in this bill. I urge my colleagues to support this amendment so that the burden of the budget cuts is shared fairly.

Mr. HARKIN. Mr. President, I rise today to support the restoration of general revenue sharing funds for fiscal year 1986, which were cut by 12.5 percent by the Appropriations Committee.

My support for this action is based on two factors: First, my long and consistent record of support for revenue sharing, and second, my conviction that we made a commitment to local governments regarding the amount of revenue sharing that would be available for fiscal year 1986 when we passed the budget resolution months ago. I believe that we must honor that commitment.

Beyond my overall support for the program, I strongly disagree with the committee's recent actions which would immediately cut fiscal year 1986 revenue sharing by 12.5 percent. The general revenue-sharing program is not a budget buster. With the annual appropriation frozen at $4.6 billion for the last several years, revenue sharing has not contributed to increases in the deficit during those years, and it is, therefore, inappropriate to single the program out for drastic and immediate cuts.

I believe that the greater issue in this instance, however, is the commitment we made to local governments in the budget resolution. Cities and counties have already included revenue-sharing funds in their fiscal year 1986 budgets, after having received assurances that they would receive 100 percent funding this year. Few, if any, local governments are in a financial position to bear the loss of revenue-sharing funds without affecting provision of services. Certainly no communities in Iowa are; the fiscal year began on July 1. These local governments are already into the second quarter of their budgets—and we are talking about pulling the rug out from under them without any notice. Furthermore, the State has just ordered across-the-board cuts in local government appropriations. There will be no dollars replaced from that source.

We owe it to our local governments to send clear signals regarding what services we expect them to perform and what funding we will provide to enable them to meet these expectations. To break our commitment to full funding of revenue sharing for fiscal year 1986 is bad policy.

Iowa's need for revenue sharing is heightened by the constitutional constraints placed on its cities. Iowa cities are limited to property tax as the only major source of revenue for general fund operations. Cities, by State law, are denied access to other tax forms such as sales and income which other levels of government utilize.

This situation is compounded by the Iowa statutory limit on the amount of property tax that can be levied for general fund operations in a city—$8.37 per $1,000 assessed value. These limits have forced many cities to levy their maximum just to maintain current operations, much less look to capital planning and new construction. Today close to 40 percent of Iowa's cities are imposing their maximum tax levies.

The critical state of Iowa's economy further worsens the cities' and counties' situation. Many of these local governments are dependent on farming and agriculture and are facing the consequences of a decline in the value of property and the accompanying decrease in revenue that will be produced from their tax levies. They are also faced with substantial nonpayment of property taxes by the beleaguered farmers in my State who simply can't afford to pay their taxes. I urge my colleagues to support restoration of full funding for fiscal year 1986.

Mr. LAUTENBERG. Mr. President, I rise in support of the amendment offered by the Senator from Minnesota to restore the 12.5-percent reduction in general revenue sharing made by the Appropriations Committee. I voted

against this reduction when it was offered in committee.

Revenue sharing is scheduled to end in fiscal year 1987, but local governments in New Jersey and throughout the Nation have been operating on the assumption that revenue sharing will be fully funded for fiscal year 1986. Local governments are counting on this assistance to pay for basic services such as police and fire protection. New Jersey communities, which received $146.2 million in revenue sharing in fiscal year 1985, would lose some $20 million if this amendment is not adopted.

Mr. President, State and local governments have faced massive reductions in Federal assistance since 1981. In the bill before us, we include further cuts in community development block grants, urban development action grants, housing assistance and other programs. At the same time we are making these reductions, the administration is working for a tax bill which will make it infinitely more difficult for local governments to raise the revenue to make up for these cuts. For local governments, the reduction in revenue sharing now contained in H.R. 3038 means one of two things: They can either raise local taxes, regressive property taxes, to pay for services or they can cut those services.

Mr. President, I support revenue sharing. This program recognizes the fundamental role played by local governments in our Nation's economy. The Finance Committee has passed legislation, pursuant to reconciliation instructions, to end revenue sharing at the end of this fiscal year. Whatever the future might hold, local governments are well into their operations for this fiscal year and they are counting on these funds, because we told them to count on these funds for this year. I believe that fully funding revenue sharing for fiscal year 1986 is necessary to avoid disruption in local government finances.

I urge my colleagues to support the amendment of the Senator from Minnesota.

Mr. CRANSTON. Mr. President, I will vote against the amendment offered by the Senator from Minnesota [Mr. DURENBERGER] to restore $570 million to fund fully general revenue sharing for fiscal year 1986.

In fairness to our cities, counties, and school districts, it is time to send an unambiguous signal that the $200 billion Federal deficits brought on by President Reagan's misguided fiscal policies requires a further reduction in Federal assistance to local government.

The spending priorities in the Federal budget must be reserved for funds for programs which directly address permanent and temporary imbalances in the federal system brought on by local economic downturns, natural disasters, and concentrations of persistent poverty.

I've supported revenue sharing over the years, but revenue sharing, in my judgment, does not meet the test of a budgetary priority under present conditions.

It is clear that the Senate and the Nation face 5 years of ever deeper cuts in Federal spending and eventually increased taxes. The choices will not be easy nor pleasant. Today's vote is another in what will be a long line of tough actions to reduce the deficits to manageable limits.

Mr. DENTON. Mr. President, our citizens depend on our States and cities for a lot of things that general revenue sharing provides for. General revenue sharing is one of the least cumbersome programs the Federal Government operates. It does strengthen our local governments and maximize their flexibility to respond to a variety of needs including many capital improvements. It is an efficient use of tax dollars.

But the Federal Government has a huge deficit and there is no general revenue to share. Congress must cut programs to bring down the deficit. But I believe that the complete cutoff of Federal aid to needy and deserving cities would lack both compassion and good Government policy.

I would prefer an alternative to revenue sharing as it now exists. I think we should develop a program similar to GRS, but one that identifies and assists depressed communities. It might be along the lines of the criteria for enterprise zones, and would provide assistance to needy communities rather than being a blanket distribution to all cities, some of which already have surplus funds.

Revenue sharing is not fairly shared. Every local jurisdiction, including the most wealthy, receives revenue sharing funds. The program is poorly managed in that sense, because it favors our larger cities which already receive a disproportionate amount from other Federal programs.

I am working on developing an alternative program, but in the interim I support the compromise in the budget resolution. The funds had been promised to local governments, which had been given a clear signal that GRS would be fully funded and worked out their budgets accordingly. For that reason, I support Senator DURENBERGER's amendment.

Other programs than revenue sharing with much less efficiency are being cut. We must identify and cut those programs.

Mr. METZENBAUM. Mr. President, I strongly support Senator DURENBERGER's amendment to restore funds for the General Revenue Sharing Program.

Simply put, this amendment would restore revenue sharing funds to the level upon which both the House and the Senate agreed in the budget resolution. That resolution stated that revenue sharing would be funded next year at the level currently provided.

That was the agreement.

Revenue sharing is the only program we have that helps nearly every city, town, and county throughout the country.

The President's budget proposed to eliminate it.

We debated the issue all summer long, as mayors and county commissioners watched on the sidelines. I believe they were prepared to bite the bullet with some cuts, and they may have been surprised when we decided to fund the program in full. But mostly they were relieved to have the issue settled at last so they could get down to the task of writing their own budgets.

And that is exactly what they did.

They planned their budgets under the assumption that revenue sharing would be funded in full next year.

These communities simply do not have the option of raising local taxes at this late date. The only alternative that they have is to cut their education budgets, police and fire protection, libraries and every other service that municipalities must, by necessity, provide for their residents.

Mr. President, this amendment would prevent last-minute chaos in cities and towns all over the country. I believe we have an obligation to these communities. In the interest of fairness, I urge my colleagues to support the amendment.

Mr. PRYOR. Mr. President, I strongly support the amendment of the Senator from Minnesota [Mr. DURENBERGER] and I hope it is adopted by the Senate.

The pending amendment restores $570 million to the General Revenue Sharing Program for fiscal year 1986 that was cut by the Appropriations Committee. This reduction, Mr. President, which was made after the bill was originally reported, and after allowance was made for full funding in the fiscal year 1986 budget resolution, amounts to a 12½-percent cut. This cut was approved after many local governments relied on the program being continued through fiscal year 1986. Unless the pending amendment is approved, counties and cities in the State of Arkansas will lose over $5 million in this fiscal year. This action, at this late date, could cause serious budgeting problems for local officials.

Mr. President, since its inception revenue sharing has been an excellent program. It operates without some huge Washington bureaucracy. In fact, a local government is only required to complete two simple forms to receive money under the program. As such, it provides counties and cities

around our country with the flexibility to provide a variety of services to their citizens. This money is used for capital improvements, public safety services, nutrition for the elderly, and a variety of health care services, among other things.

In short, Mr. President, this program works. It gives local officials flexibility. We made a commitment in the budget resolution and local governments relied on it. For all of these reasons, I support the amendment, and I urge its adoption by the Senate.

Mr. HEFLIN. Mr. President, I rise to support the amendment offered by my friend and colleague, Senator DAVID DURENBERGER of Minnesota, to restore funds for the General Revenue Sharing Program.

Earlier this month, the Senate Appropriations Committee approved an amendment to the HUD-independent agencies appropriations bill which would have the effect of cutting revenue sharing in fiscal year 1986 by 12.5 percent. This means that $570 million would be slashed from this important program which returns Federal moneys to the State and local governments with no strings attached.

I have heard from a number of local and county officials from my home State of Alabama concerning a potential loss of general revenue sharing funds. These city and county officials are as concerned as I am that this cut in revenue sharing by the committee comes at a time when local officials have already made cuts in programs in order to reduce government spending at the local level.

These proposed cuts are being presented to us despite the fact that the joint budget resolution, which has already been adopted by the Congress calls for full funding of the general revenue sharing in fiscal year 1986 at $4.6 billion. If we adopt these cuts we would be doing a great disservice to the basic trust that we in Congress owe to our local government officials.

The Revenue Sharing Program was begun in 1972 as an integral part of a long-range plan to return government control to the people through their local, city, and county governments. The thought at that time was that Government bureaucracies in Washington had too much to say over how a local government should spend its tax dollars. That was a valid argument then—and it still is today.

Revenue sharing has been a success story from the start. Revenue sharing has the lowest administrative costs of any Federal assistance program. Its funds are distributed to city and county governments on a fair and equitable basis.

While control over how revenue sharing funds are spent rests entirely with various city and county governments—as it should—I do not believe it would be inappropriate for me at this time to appraise and comment on how these funds have been spent over the years.

Let me assure each Member of this august body, the distinguished Members of the House of Representatives, and, most importantly, the American people, that revenue sharing funds have not been wasted. Revenue sharing has been used to pay for basic essential needs of the citizens of this great Nation.

A full 15 percent of all revenue sharing funds go to pay for police protection. With crime rising at a frightening and alarming rate, I dare any Member of the Senate to go to his or her hometown and try to convince his or her neighbors, families, and friends that police protection is not an essential service. Other essential services which are paid for with revenue sharing funds include fire protection, health care, highways, and housing for the elderly, just to name a few.

Mr. President, this is not the time to make drastic reductions in revenue sharing funds. While many of the budget cuts Congress has made in recent years have been necessary to reduce Government spending and encourage economic recovery, these cuts have, in many instances, left local governments holding the bag.

Now is not the time to pull the rug out from under our city and country governments. If we endorse the committee proposal to slash 12.5 percent from revenue sharing, we will be taking an action that could be interpreted as breaking a covenant with the American people.

Thank you, Mr. President.

Mr. BINGAMAN. Mr. President, I must vote for the Durenberger amendment, which would restore full funding to the General Revenue Sharing [GRS] Program as provided for in the budget resolution. The Senate appropriations Committee voted to cut the program by 12.5 percent, or $570 million, in fiscal year 1986. Such cuts are unfair and unwise. This money needs to be restored.

The Senate Appropriations Committee action was in direct conflict with the House and Senate budget agreement, which provided for full funding of GRS in fiscal year 1986 at $4.6 billion. Moreover, the Senate Budget Committee advised the Appropriations Committee that revenue sharing was fully within the limits set by the budget resolution and therefore was in compliance with budget instructions. Therefore, the Revenue Sharing Program should not be the target of major reductions in order to make up for other programs in HUD appropriations which are over the budget assumptions.

To cut revenue sharing at this time would hit most government entities at a time when they are well into their budget year and after the Federal fiscal year has begun. Indeed, the allocations for fiscal year 1986 have been made. As a result these cities and counties enacted their own budgets and local tax rates in good-faith reliance on the allocations and the congressional budget resolution. Reversing the budget process to make up for these crucial dollars would be very difficult and most unfair.

A cut in revenue sharing would disproportionately impact those local governments with the greatest need. It would penalize most those that receive higher revenue sharing payments per capita rather than those that have benefited from the economic recovery. This would harm local governments in all States.

In my State of New Mexico, local governments could expect to lose approximately $2 million if the cuts are enacted. This would make it necessary for many local entities to request additional funds from the State legislature to meet their budget needs for fiscal year 1986. I'm not sure the legislature can provide the needed shortfall. As a result, needed services provided by revenue sharing moneys would be eliminated. These services cover a multitude of needs, from law enforcement to sanitation. Without these funds such services would be eliminated, causing hardships and disruptions in the middle of budget cycles.

I support efforts to lower the budget deficit, and I think we must adhere to the agreement worked out between the House and the Senate in the fiscal year 1986 budget. To support cuts in revenue sharing at this time would undermine the budget process; it would be unfair to our cities, counties, and States; and it would be harmful to the people who rely on these services. For these reasons, I favor maintaining the level of funding set forth in the budget resolution and will reject any attempt to single out revenue sharing for cuts in fiscal year 1986.

(Mr. COCHRAN assumed the chair.)

Mr. GARN. Mr. President, we are unable to vote before 11 o'clock in any event. We are under a unanimous-consent agreement or at least our colleagues were assured there would be no vote before 11.

So I would hope that those who wish to speak would be here in the interim so that we could vote on this amendment at 11 a.m.

Mr. DURENBERGER. I thank the Senator.

Mr. GARN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURENBERGER. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator reserves the right to object.

Mr. PROXMIRE addressed the Chair.

The PRESIDING OFFICER. The Senator cannot reserve the right to object, the Chair advises, for the purpose of calling off the quorum. He may object.

Mr. PROXMIRE. Does the Senator object?

Mr. DURENBERGER. No.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Wisconsin.

Mr. PROXMIRE. I thank my good friend from Minnesota. Mr. President, I understand that his amendment is now pending. I ask unanimous consent that it be laid aside temporarily. I understand that a call for regular order would bring it back and supersede any other amendment. I ask unanimous consent it be set aside temporarily so that I can call up an amendment.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Wisconsin?

Mr. DURENBERGER. Mr. President, on the terms that the Senator from Wisconsin suggested, that I might have the right to call for regular order—and it is my intention to try to bring my amendment to a vote as close to 11 o'clock as possible, since I understand the Senate has some other business to conduct, not here but elsewhere, at about that time—with that reservation, I have no objection to the Senator's request.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from Minnesota is temporarily laid aside. The Senator from Wisconsin is recognized.

Mr. PROXMIRE. Mr. President, this is a very substantial amendment. It will make a reduction in obligational authority of nearly $7.2 billion—$7.194 billion to be exact. I think it makes a reduction in exactly the place we should make it, that is, in obligational authority which would be spread over a number of years. About $2 billion of that reduction will be over the next 5 years. A very modest amount, something like $134 million, will be cut in 1986, but it will be increased very rapidly in the next 5 years up until 1991 when we pledge to try to balance the budget.

Mr. President, there is no easy way to cut the billions out of the budget that we must cut to bring our outrageous $200 billion deficits under control. We have to cut good programs. In fact, every dollar of the nearly $1 trillion the Congress will appropriate for 1986 not only has political muscle behind it, but in almost all cases has solid merit. If we are truly serious about bringing the budget under control we have to make reductions in this spending. We especially must make reductions in the big, expensive projects that cost hundreds of millions and over the years many billions of dollars. Here is why we must reduce the public housing program. Here is a colossal expenditure that resists party or ideology. Like old man river, it just keeps rolling along. And like a snowball rolling down an endless hill it grows bigger and bigger until it becomes a landslide. And what a landslide: Since the early 1970's the housing assistance rolls have grown by an average of 200,000 each and every year, through Republican and Democratic administrations. Think of it, the Department of Housing and Urban Development now pays rent subsidies for nearly 4 million households. That is not 4 million people. It is 4 million households. How many people? The number approaches about 15 million.

Has the conservative Reagan administration with a solid reputation for challenging domestic programs slowed it down? Mr. President, under this administraiton the program has exploded. HUD will spend over $10 billion for housing aid this year. And get this: Spending on public housing in this, the fifth year of the Reagan administration, will be almost double the amount the Department was authorized to spend in the last full Carter year. Spending has doubled, Mr. President. And that is in real terms, not nominal terms. Real terms. What is going on here? Can we account for this by inflation? No, indeed. In the past 5 years inflation has been about 30 percent. Housing aid, on the other hand, has increased almost 100 percent. In nominal terms, the Federal deficit has almost tripled since 1980. Even if we allow fully for inflation, the deficit has exploded by more than 100 percent. So we have real reason—in fact, the best reason—to cut spending on housing: We can no longer afford it. If the Congress cannot cut this runaway public housing expenditure under the threat of the worst fiscal crisis in our history, we will never cut it. And if we cannot halt this snowballing public housing expansion that bowls over the resolution of every administration, conservative Republican as well as liberal Democrat, to hold down spending, we are not going to bring our outrageous fiscal policy under control without a massive tax increase.

So what do I propose to do about it?

AMENDMENT NO. 785

(Purpose: To implement the administration's proposed moratorium on assisted housing with savings of $7,194,420,781 in budget authority)

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask for its immediate consideration. Senator ARMSTRONG is sponsoring the amendment with me.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Wisconsin [Mr. PROXMIRE], for himself and Mr. ARMSTRONG, proposes an amendment numbered 785.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning with line 9 on page 2, delete all through line 7 on page 6, and insert the following:

The amount of contracts for annual contributions, not otherwise provided for, as authorized by section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and heretofore approved in appropriations Acts, is increased by $356,445,540: *Provided*, That the budget authority obligated under contracts for annual contributions shall be increased above amounts heretofore provided in appropriation Acts by $499,000,000: *Provided further*, That any balances of authorities made available prior to the enactment of this Act which are or become available for obligation in fiscal year 1986 shall be added to and merged with the authority approved herein, and such merged amounts shall be made subject only to terms and conditions of law applicable to authorizations becoming available in fiscal year 1986: *Provided further*, That of the balances of authority made available prior to the enactment of this Act which are available for obligation in fiscal year 1986, $175,000,000 shall be available as an appropriation of funds for modernization of existing public housing projects pursuant to section 14 of the United States Housing Act of 1937, as amended (42 U.S.C. 14371): *Provided further*, That none of the merged amounts available for obligation in 1986 shall be subject to the provisions of section 213(d) of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 1439): *Provided further*, That all amounts of budget authority (including contract authority) equal to the amounts of such budget authority which are recaptured shall be rescinded.

Mr. PROXMIRE. This amendment simply strikes the $7 billion-plus to be authorized for appropriations for public housing for 1986 from the bill. This would save outlays in public housing of more than $2 billion, as I say, in the next 5 years and over $5 billion during the next decade. In the amendment I am offering, I propose to simply strike the $7 billion to be authorized for appropriations for public housing for 1986 from the bill. This would save outlays for public housing of more than $2 billion in the next 5 years and over $5 billion during the next decade. In fiscal year 1986, the savings in outlays would be a modest $135 million. But then the savings speed up impressively. Our amendment would save outlays of $394 million in 1987, and then $483 million in 1988, $514 million in 1989, and $555

million in 1990. After 1990, it would save another $5.3 billion.

So what good does it do if the amendment only curtails the $7.3 billion gradually over a number of years? The answer, Mr. President, is that this is not a 1-year fiscal crisis we face. As the Senate's action on the debt limit bill proves, this is a crisis that will last for many years. We need to cut spending now that will ease the immense, snowballing burden of paying interest on the massive debt we will otherwise accumulate over the next 5 or 10 years. My amendment would simply cancel this year's expansion of public housing.

Mr. President, let us consider what this would do to housing, because I think many Members may be interested in the amendment because it does cut spending; but they say, "After all, housing is very important." It is. Let me point out how moderate this amendment would be in its effect.

Would it curtail the addition of units receiving HUD assistance? No, it would not. Even if we pass this amendment, there will be 180,000 additional units—60,000 new and at least 120,000 existing—added in the months ahead under commitments already made.

Let me repeat that: There will be 180,000 additional units added if this amendment is adopted. And that is not all. How about families that need assistance right now but do not receive it? The answer: Just normal turnover in assisted housing will result in about 1 million assisted units being opened during the next 3 years. And, Mr. President, this would be simply for the families not now being helped.

So, Mr. President, this amendment will not disturb existing commitments to provide additional units of assisted housing. It will not diminish the number of assisted units that become available each year through normal turnover. But it will save more than $7 billion. Sure, it is painful. Yes, indeed, all of us would like to provide more housing. But housing happens to be one of the most expensive programs of our Federal Government. It is roaring out of control. Spending on the program has nearly doubled in the past 5 years. It will continue to rise by leaps and bounds if we do not find the courage to blow the whistle. For any Senator who means business about bringing the deficit under control, this is what we have to do.

Mr. President, every Member of this body knows that our problem in reducing the deficit does not begin and end with the outlays in the current year. In fact, the big problem in cutting Federal spending will come in fiscal 1987, fiscal 1988, fiscal 1989, fiscal 1990, and fiscal 1991. When those years come, we will not be able to reduce more than two-thirds of the budget, because previous years will have extended through obligational authority mandated spending. This amendment goes to the heart of this problem. It will cut outlays only modestly this year. But this amendment will cut more than $2 billion in the next 5 years and $7 billion as time goes on.

Mr. CRANSTON. Mr. President, I seek recognition so that I may yield to the Senator from Alaska.

Mr. MURKOWSKI. I thank the Senator from California.

The PRESIDING OFFICER. The Senator from Alaska.

AMENDMENT NO. 786

(Purpose: To restore funds for the Veterans' Administration medical care account)

Mr. MURKOWSKI. Mr. President, I send to the desk an amendment with respect to Veterans' Administration medical care.

Mr. GARN. Mr. President, will the Senator from Alaska yield?

Mr. MURKOWSKI. I yield.

Mr. GARN. Mr. President, I ask unanimous consent that the amendment of the Senator from Wisconsin be temporarily set aside in order to consider this amendment, which has been worked out and will be accepted, and then that we immediately return to the Proxmire amendment.

The PRESIDING OFFICER. Is there objection?

Mr. DURENBERGER. Mr. President, reserving the right to object—and I shall not object—I assume that we will add the same condition under which the amendment of the Senator from Wisconsin came to the floor, and that is that my amendment would be set aside subject to the right to offer regular order.

Mr. GARN. That is correct.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. MURKOWSKI], for himself, Mr. CRANSTON, Mr. THURMOND, Mr. DECONCINI, Mr. MITCHELL, Mr. ROCKEFELLER, Mr. DENTON, Mr. ABDNOR, Mr. BYRD, Mr. BINGAMAN, Mr. NICKLES, and Mrs. HAWKINS, proposes an amendment numbered 786:

On page 38, line 8, strike out "$9,062,694,000" and insert in lieu thereof "$9,228,694,000".

Mr. MURKOWSKI. Mr. President, today I rise to offer, with Senator CRANSTON, an amendment to H.R. 3038, the HUD-independent agencies appropriations bill for the fiscal year ending September 30, 1986. In view of the amendment to be offered by my friend from Utah, my amendment would restore $166 million in budget authority and $144 million in outlays to the Veterans' Administration medical care account above the levels contained in the amendment which will be offered by my distinguished colleague from Utah, Senator GARN. The purpose of this amendment is simple and straightforward. It would restore sufficient funds for fiscal year 1986 to bring the appropriations for the Veterans' Administration [VA] into compliance with the first concurrent resolution on the budget for fiscal year 1986.

The adoption of my amendment would achieve equity not only for our Nation's veterans, but also in terms of the budget resolution for function 700 which the Senate adopted on August 1 of this year.

Mr. President, after much anguish earlier this year, the Senate and the House agreed on levels of spending for the Veterans' Administration for fiscal year 1986. As part of the budget resolution, the Committee on Veterans' Affairs was required to find reconciliation outlay savings of $1.15 billion over fiscal years 1986 through 1988. The Senate Committee on Veterans' Affairs fully complied with the reconciliation instructions and has reported back to the Committee on the Budget, authorizing legislation which, if enacted, would achieve $1.3 billion in outlay savings between fiscal year 1986 and fiscal year 1988.

Let there be no mistake. America's veterans were asked to contribute to meaningful deficit reduction in fiscal year 1986. This challenge has been met through the budget resolution and the reconciliation process, without reducing VA employment levels and without eliminating any benefits or services to veterans. We should not now ask our Nation's veterans to endure funding reductions below the levels established in the budget resolution, as we consider the fiscal year 1986 appropriations bill for the VA.

Mr. President, H.R. 3038, as reported by the Committee on Appropriations on August 28, 1985, exceeded the levels established by the first concurrent resolution on the budget by approximately $800 million for fiscal year 1986. Consequently, the Appropriations Committee decided to reconsider the entire bill to bring it into compliance with the budget resolution outlay levels.

The Appropriations Committee has accomplished this task. However, in doing so, the committee has recommended an amendment which would reduce the fiscal year 1986 VA appropriations by $296 million in budget authority and $257.5 million in outlays. The reductions were all assumed to come from the VA medical care account.

While I appreciate and support the efforts of my distinguished colleague, Senator GARN, the chairman of the HUD-Independent Agencies Appropriations Subcommittee, to bring the overall HUD appropriations bill into compliance with the budget resolution, I cannot accept the disproportionate reduction in the VA appropriation level for fiscal year 1986.

According to the Budget Committee, the reduction proposed in the amendment to be offered by my colleague, Senator GARN, would reduce the VA appropriations outlay level by $144 million more than is necessary to comply with the budget resolution. The amendment offered by Senator CRANSTON and myself would restore this $144 million in fiscal year 1986 outlays. After conferring with the Budget Committee and the Congressional Budget Office, Senator CRANSTON and I have determined that restoration of $166 million in fiscal year 1986 budget authority is necessary to achieve our $144 million target outlay level for the VA medical care account. This is based on assumptions used in the budget resolution, Budget Committee scorekeeping methods, and spendout rates for the VA medical care account.

Mr. President, if my amendment is adopted, the net impact would result in a VA medical care appropriation budget authority level which is $130 million and a corresponding outlay level which is $113.5 million less than the level originally reported in H.R. 3038.

My amendment is supported by certain underlying assumptions for the VA medical care account which I ask unanimous consent to have printed in the RECORD at the appropriate point. I realize that these assumptions would not be binding on the Appropriations Committee. However, as the chairman and ranking minority member of the Committee on Veterans' Affairs, Senator CRANSTON and I feel strongly that these reduction assumptions which generate $130 million budget authority savings are realistic, and they can be implemented with minimal impact upon the Veterans' Administration and all veteran beneficiaries.

In conclusion, the adoption of this amendment would simply place the fiscal year 1986 Veterans' Administration appropriations at the level mandated in the first concurrent resolution on the budget for fiscal year 1986. Senator CRANSTON and I have not attempted to find savings in other portions of the HUD-independent agencies appropriations bill to offset the funds we would restore to the VA. We explored that option, but concluded that to do so would unfairly encroach upon the jurisdiction of other committees.

Mr. President, the VFW and DAV, major service organizations support this amendment and have expressed their willingness to share in the burden of deficit reduction as long as that burden is shared equitably. Veterans have already made a substantial contribution to meaningful deficit reduction this year by their support and the adoption of a fair means test and third party reimbursement.

I believe that my amendment is fair and truly equitable. I urge each of my colleagues to join Senator CRANSTON, myself, and the other cosponsors, Senators THURMOND, DECONCINI, MITCHELL, ROCKEFELLER, DENTON, ABDNOR, and BYRD in adopting this amendment. Your vote in support of my amendment would be a positive vote for our Nation's veterans and a vote to keep the VA appropriations level for fiscal year 1986 consistent with the budget resolution.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Proposed reductions from VA medical care account appropriations in H.R. 3038 as reported to conform with function 700 levels in FCR

	Millions
1. Federal employee health benefits (reduced cost of Federal share)	$16
2. Appropriations Committee add-on for advanced technology equipment	20
3. Community nursing home care (reduced per diem; no census reduction)	10
4. Annualization of fiscal year 1985, rescission (public affairs, printing, and consultancies)	3
5. Telephone improvements	20
6. Maintenance and repair of facilities	12
7. Net reconciliation savings in medical care account	19
8. Unspecified savings	30
Total, appropriations reduction	130
Corresponding outlay reduction	114

Mr. CRANSTON. Mr. President, the amendment that the able chairman of the Veterans' Affairs Committee, Mr. MURKOWSKI and I—together with Senator THURMOND, Senator DECONCINI, Senator MITCHELL, Senator ROCKEFELLER, Senator DENTON, Senator ABDNOR, Senator BYRD, Senator BINGAMAN, Senator NICKLES, and Senator HAWKINS are proposing is necessary to restore to the Veterans' Administration medical care account the level of funding necessary to maintain the VA's current capability to provide quality care to the Nation's sick and disabled veterans.

I want to emphasize to my colleagues that we are not proposing full restoration of the funding level originally proposed by the Appropriations Committee in the bill as reported—although I would note that that was essentially the same amount as was proposed by the House Appropriations Committee and approved by the House of Representatives, and is fully justified in both of the committees' reports. Rather, based on information that has come to light since the Appropriations Committee's original recommendations for the VA were adopted over 2½ months ago and based on the need to restrain Federal spending to the maximum extent consistent with the most fundamental and important responsibilities of our Government, our amendment would provide for VA medical care account appropriations of $140 million below the amount passed by the House and $130 million below the amount originally recommended by the Senate Appropriations Committee on July 30.

The $130 million reduction we are proposing from the reported bill is about 45 percent of the reduction now proposed by the Appropriations Committee and represents, in our judgment, the maximum amount by which this account can be cut without imposing cuts in services to eligible veterans or in VA health-care staffing.

The reduced funding level now being recommended by the Appropriations Committee would result in sharp cutbacks in VA programs. According to information provided to us in writing by the Office of the Chief Medical Director, the Appropriations Committee's proposed cuts would force the VA, in order to maintain an appropriate balance between personnel dollars and support dollars, to make a personnel cutback of at least 1,893 full-time employee equivalents—FTEE's—in fiscal year 1986. This would result in reductions of 16,000 episodes of hospital care and 72,500 outpatient visits for veteran-patients. Also, according to the Chief Medical Director's Office, the Appropriations Committee's proposed reduction would also force an $82.5 million cut—almost 50 percent of the $170 million provided in the total bill for this purpose—in equipment which is scheduled to be purchased in fiscal year 1986 to activate facilities in fiscal years 1986 and 1987. There are 95 such projects in 33 States.

Alternatively, if the VA were to decide not to delay these activation-related purchases, it would have to reduce its health-care staff by an additional 2,080 FTEE's and its patient-care workload by an additional 17,700 episodes of hospital care and 79,650 outpatient visits.

That would be a total staffing reduction of nearly 4,000 and cuts of more than 33,100 episodes of hospital care and 152,000 outpatient visits.

I strongly reject either of these alternatives. They both involve substantial reductions in the health-care staffing level—193,941 FTEE's—originally established by the Congress for fiscal year 1985 in Public Law 98-371, the regular HUD-Independent Agencies appropriations measure for fiscal year 1985. Congress recently reconfirmed this 193,941 staffing level in the Supplemental Appropriations Act for fiscal year 1985, Public Law 99-88. That staffing level was also established for fiscal year 1986 by the House Appropriations Committee, by the House of Representatives as a whole, and by the Senate Appropriations Committee in its report on the

fiscal year 1986 appropriations measure as originally reported.

This unbroken string of commitments to the maintenance of a stable employment level in VA health-care facilities is extremely important in order to provide for stable employment levels in VA facilities and to facilitate planning for the optimal types and amounts of services that can be provided through a health-care work force of that size.

I want to pay tribute to the Appropriations Subcommittee and its leadership, Senators GARN and LEAHY, for their actions in bringing about the fiscal year 1985 supplemental action I just described. As a result of the enactment of that measure, the Department of Medicine and Surgery put out instructions to its facilities to achieve personnel levels consistent with the 193,941 FTEE's. In fiscal year 1986, under the continuing resolution, DM&S has told its medical centers to maintain those staffing target levels. Hence, 193,941 is where VA medical-care staffing is today—if not actually somewhat higher.

The personnel reductions that I have outlined would thus be very real ones and very unfortunate ones. They would impose instability on a situation just becoming stabilized and be very counterproductive to good health-care management and quality of care.

In addition to these sound, strong programmatic reasons for voting to maintain the VA health-care staffing level at 193,941 FTEE, I believe it is also important for the Senate to draw the line and to take a stand for maintaining the commitment Congress has made—and just reconfirmed—to those who have kept our Nation free and strong and to reject the idea that we should now pull the plug on the VA health-care system and allow its strength, quality, and vitality to begin draining away.

Mr. President, I have been, for all of my 16½ years in the Senate, either the chairman—for 12 years—or the ranking minority member for the last 4½—of the subcommittee or full committee with jurisdiction over the VA health-care system. In 1970, we had a big veterans vote in the Senate to add $125 million for VA health care. It carried overwhelmingly and was the beginning of a decade-long effort to equip the Veterans' Administration to provide first quality, modern medical care to veterans, especially those veterans returning from the Vietnam war for whom in 1970 the Veterans' Administration was woefully unprepared. Over the last 15 years, we have added 66,000 health-care workers to the VA system—the vast bulk of that increase occurring in the 1970's.

Now, with eligible veterans' need for VA care growing, we are at the point at which we are dangerously close to reversing the progress we made over the past 15 years.

Let us not make this vote a signal of the erosion of the congressional commitment to veterans—a signal of the beginning of the fulfillment of David Stockman's legacy to shrink the VA system.

RESPONSE TO THE BASIS PRESENTED TO THE APPROPRIATIONS COMMITTEE FOR THE CUTS

Mr. President, I should like to respond briefly to the basis for the $296 million reduction presented to the Appropriations Committee at its markup on October 3 when it reconsidered the medical care level it had originally recommended in H.R. 3038. The specifics to which I will respond are from a list entitled "Possible VA Reductions in Medical Care," which was set forth in a document distributed at the Appropriation Committee's October 3 meeting.

Mr. President, the first proposed reduction was premised on directing the VA "to maintain average salaries in medical care account at fiscal year 1985 level throughout fiscal year 1986." This action was estimated to justify a $150 million cut in the appropriation. The apparent basis for this recommendation and estimated savings is that the average salary level in the medical care account for fiscal year 1985 turned out lower than initially estimated and that salary levels could be similary repressed in fiscal year 1986 without program disruption.

Based on a paper prepared by the Office of the VA's Chief Medical Director, this assumption is not correct. Rather, the department's position is that the fiscal year 1985 salary experience was an aberration caused by a variety of factors that will not be present in fiscal year 1986 and that reducing the appropriation based on the fiscal year 1985 experience is not warranted.

Mr. President, two points need to be understood with reference to this recommendation regarding imposing a lower average salary level under the medical care account. First, it is my understanding that the lower-than-anticipated salary level in fiscal year 1985 was a fluke that can largely be attributed to significant uncertainty about the funding level that would be available within the medical care account for that fiscal year.

In February, OMB, in connection with the submission of the fiscal year 1986 budget, severely restricted the supplemental appropriations request for the medical care account that was needed for the fiscal year 1985 costs of the Federal civilian pay raises that took effect on January 6, 1985. Instead of allowing a supplemental request for the full amount of pay-raise costs under this account—over $179 million—or even the bulk of that account, OMB allowed a request of only $72.5 million to be submitted. This was only 40 percent of those pay-raise costs.

The small amount of that request and the corresponding requirement it would entail to absorb $107 million of the pay-raise costs gave rise to great uncertainty about the level of funding that would be available to VA health-care facilities for personnel costs in fiscal year 1986.

That uncertainty was compounded by the significant changes in the civil service system that were proposed in connection with the fiscal year 1986 budget. These included the proposed across-the-board 5-percent pay reduction and grade reductions in grades GS-11 through GS-15, and created for the VA an atmosphere in which its ability to hire needed personnel at appropriate grade levels was seriously impaired.

In addition, when funds to hire sufficient personnel were finally made available very late in the fiscal year—through the enactment of fiscal year 1985 supplemental appropriations on August 19—the VA facilities felt constrained to hire personnel only in temporary positions with unusually low average salaries. This again restricted the level of individuals that the agency was able to attract. The VA notes that this situation resulted in the medical centers finding it difficult to recruit quality people with this climate projected into 1986.

None of these types of situations is likely to recur during fiscal year 1986. Indeed, the VA indicated, in an October 8, 1985, White Paper that I will ask to be inserted in the RECORD, that the agency is "confident that the average salary in fiscal year 1986 will rise from $28,996 to $30,441, or an increase of 2.4 percent from $29,726 before the VA started the downward trend."

Mr. President, I ask unanimous consent that the October 8, VA White Paper be printed in the RECORD at this point.

There being no objection, the paper was ordered to be printed in the RECORD, as follows:

[White Paper]

VETERANS' ADMINISTRATION,
DEPARTMENT OF MEDICINE AND SURGERY,
October 8, 1985.

AVERAGE SALARY

(1) During the first quarter of FY 1985, the average salary at our Medical Centers was $28,514. Correcting that figure for the January Pay Raise (3½%) and part year within-grades gives $29,726. This figure is the correct base to use in computing the requirements in FY 1986 rather than the average for the year ($28,996).

(2) In January the field facilities were short of salary funds of 40 million supplemental from 1984. They reacted by hiring lower salaried employment.

(3) At the end of March when additional funds were made available, the factor of lower salary trend continued because of the following reasons:

Information on the 1986 budget became known to the field including the 5% pay reduction and the grade reduction grades 11-15. Medical Centers found it difficult to recruit quality people with this climate projected into 1986.

(4) Using $29,726 as the base times 194,538 (193,941 and 597 Common Services) FTEE would give a base dollar of 5.783 billion dollars. The FY 1986 requested budget increase (page 5-23) should be reduced by 52,158 million to recognize that some of the increases are annualized and already incorporated in the estimated average salary.

The results of this projection follow:

Projected payroll using average salary	$5,782,836
1986 budget increments (adjusted)	155,293
FEHB reduction	(16,200)
Bottom line projection	5,921,929
House bill	5,891,000
Shortfall (without consideration of carryover)	(30,929)

(5) If a proposed reduction from the 1986 level of salaries in the amount of 150 million to be instituted by the Senate Appropriations Committee to the 5.891 billion, there is no conceivable way we can run a balanced program of employment of 193,941 over a 12 month period.

(6) Rather than the deficit projected in paragraph 4, we are confident that the average salary will rise from 28,996 to 30,441, or an increase of 2.4% from 29,726 before we started the downward trend.

Mr. CRANSTON. Mr. President, the second point regarding the recommended lower salary level is that the Appropriations Committee has also included in the report accompanying the fiscal year 1986 Appropriations Act a specified FTEE level of 193,941. I strongly support the maintenance of that staffing level. But it must be recognized that combining a specific hiring level with a reduction in average salary would require the VA to replace certain individuals who leave the system during the year with lower graded employees.

Such an approach would be detrimental to the VA's efforts to meet its health-care mission—since under normal personnel turnover, this process would produce lower and lower paid and less and less qualified personnel. This would run directly contrary to the Department of Medicine and Surgery's recent instruction to its medical centers to hire the most qualified individuals for available positions.

Mr. President, the second VA medical-care reduction proposed to the Appropriations Committee was to cut the VA's "equipment request by $25 million to keep at the level of actual fiscal year 1985." According to the Office of the Chief Medical Director, this $25 million is an apparent reference to a carry-over of equipment moneys from fiscal year 1985 and, if there is to be a $296-million reduction in the overall appropriations level, "substantially more than $25 million must be reduced from equipment if employment is to be maintained."

Also, according to the Chief Medical Director's Office, if such a reduction in fact takes place, there will be postponements of fiscal year 1986 and fiscal year 1987 facility activations pending the purchase of equipment needed in connection with the activations and a general increase in the unfunded backlog of needed equipment purchases for the entire VA health-care system. Such an approach may yield short-term savings but the adverse long-term impact would be to downgrade the quality of care available in VA facilities. It is not possible to continue to operate the VA health-care system without replacing worn-out and outdated medical equipment and adding new equipment as needed to keep reasonable pace with advances in modern medicine.

In that regard, the Chief Medical Director would feel constrained to reduce equipment spending by $171.6 million if the $296 million cut were implemented.

Mr. President, the third reduction—a $40 million cut—proposed to the Appropriations Committee on October 3 involved freezing "a number of small object classes at fiscal year 1985 levels." The areas mentioned in the Appropriations Committee document included, among others, the transportation of things, furniture repairs, maintenance and repair contractual services, and officer supplies. As the Chief Medical Director's Officer has pointed out, establishing controls on individual items of expense has the potential for causing disruption to normal operations and can lead to decisions to undertake higher-cost solutions to particular problems simply to avoid charging a frozen object class. Thus, it seems clear that such a proposal to squeeze such a large amount of funding out of this array of varied types of expenses in a tight budget already pruned by OMB is illusory.

The fourth proposed reduction was to achieve a $65.5 million savings by placing a cap on expenditures for beneficiary travel at $38 million, as opposed to the agency's fiscal year 1986 budget estimate of $103.5 million. Beneficiary travel payments are made for the cost of service-connected-disabled and financially needy veterans' travel to VA facilities. The magnitude of the reduction proposed by the Appropriations Committee is simply not a realistic alternative. Such an enormous reduction could not be achieved without a major change in the beneficiary travel program.

In the most recent study of this program, which was carried out in 1984 by the Maximus Corp., approximately 51 percent of beneficiary travel expenditures were found to support the medically-indicated transfer of patients. These expenditures are paid directly by VA facilities to the entities providing the transportation—such as ambulance and hired-car companies—and not reimbursed to the veterans. Such payments would account for an expenditure of $52 million in the current fiscal year and holding that level to $38 million would require wholly arbitrary cutbacks in such reimbursed travel across the system.

A second category of beneficiary travel costs—reimbursement to service-connected-disabled veterans for the costs of their travel to VA facilities—is expected to account for $73.5 million in fiscal year 1986, including payments both to transportation providers and to the veterans. Clearly, there would have to be drastic reductions in these payments to service-connected veterans if the $38 million cap apparently assumed by the Appropriations Committee were imposed. But, doing so would conflict with fundamental principles underlying the structure and purpose of the VA health-care system. The system's primary function is to meet the health-care needs of service-connected-disabled veterans, and the medical centers within the system serve relatively large catchment areas. The Appropriations Committee proposal would thus entail requiring service-connected-disabled veterans who must travel significant distances to receive care in VA facilities to bear the costs of traveling to receive the care that the Congress intends for them.

Finally, modest beneficiary-travel reimbursements are paid directly to eligible nonservice-connected-disabled veterans who are unable to pay the costs of their travel to VA facilities. Major reductions in appropriations for beneficiary travel payments to this category of veterans could result in poverty-stricken veterans being unable to receive VA care and, in some cases, foregoing needed care altogether.

Mr. President, a fifth area in which it was proposed that the Appropriations Committee find savings was through the conversion of "1,000 medical care beds to nursing care beds" for an estimated savings of $10 million. The Office of the Chief Medical Director provided a very succinct response to this proposal: The conversion of hospital beds to nursing care beds would decrease future construction costs associated with building nursing home care units, but such an action would not decrease current operating costs. In short, regardless of whether conversion of beds in fiscal year 1986 is a good or bad idea, it would not justify any reduction in fiscal year 1986 appropriations.

Finally, Mr. President, a $6 million reduction was proposed based on expected savings resulting from Veterans' Affairs Committee proposed reconciliation legislation establishing an income eligibility criterion for VA health care. As I will discuss in more detail in a few moments, our amend-

ment also incorporates savings—$19 million not $6 million—on this basis.

Mr. President, both the distinguished chairman of the Veterans' Affairs Committee and I are fully aware of the great need to reduce the enormous Federal deficits that are eroding our Nation's economic health and which pose such a serious threat to our future wellbeing. More must be done to reduce those deficits.

But, it is also important to keep certain points in mind regarding the relationship between veterans' programs and the budget.

First, Mr. President, I believe we must ensure that veterans' programs receive the high priority they deserve in the budget and appropriations processes. Expenditures for veterans' programs are a continuing cost of our Nation's defense. The burdens and sacrifices required to maintain our freedom and security do not end with the last sounds of battle. They continue on in the lasting impact on the lives of those who lost their limbs or their health and on the families of those who incurred serious disabilities or death. And we as a nation have a corresponding, heavy responsibility to provide for the continuing needs of those who responded to the Nation's call. We do this through a variety of programs, including those designed to provide needed income support for those injured in the line of duty and for the survivors of those who made the ultimate sacrifice and to provide education and employment assistance to help those who gave years of their lives in military service to readjust to civilian life.

A most important component of this essential array of veterans' programs is the VA medical system. The strength of this system and its capacity to provide high quality services responsive to the needs of the Nation's veterans must be accorded a very high priority. Thus, I reject the notion that the effort to reduce the Federal deficit may appropriately be achieved through major reductions in VA health-care services or by implementing changes with long-lasting, damaging implications for the VA system.

On the other hand, I also strongly believe that veterans' programs should be included in deficit-reduction efforts to the maximum extent consistent with maintaining effective, responsive programs. My colleagues on the Veterans' Affairs Committee, I am pleased to note, agree with that point of view. Thus, over the years we have word to make all possible economies and achieve all reasonable savings in veterans' programs. Reconciliation savings produced by the Veterans' Affairs Committee over the past 4 years totaled $1.6 billion through the end of fiscal year 1985 and will continue to yield substantial savings in the future. In addition, our committee has this year recommended reconciliation legislation, currently pending in S. 1730, that will yield an estimated $1.3 billion in budget savings during fiscal years 1986, 1987, and 1988. That's $150 million more in the way of deficit reduction than our committee was required to produce under our reconciliation instructions.

Thus, it should be clear to all that we do not view veterans' programs as being exempt from scrutiny aimed at finding opportunities for reasonable savings. We're at the forefront of that effort, and this amendment reflects that fact.

At the same time, however, I object to arbitrary, damaging cuts that do not reflect appropriate regard for the priority that attaches to veterans' programs.

Why should the VA medical care account be required to produce 68 percent of the outlay savings now proposed by the Appropriations Committee in this bill when that account represents only 17 percent of the total funds included in this bill—and only 27 percent of the total funds for so-called discretionary accounts in this bill?

The answer was provided by the distinguished subcommittee chairman [Mr. GARN] at the committee's October 3 markup: The reason is because VA medical care funds spend out quickly—87 percent of BA—as compared to other large accounts in the bill. With all respect, Mr. President, that's a totally unacceptable answer.

Also in terms of the budget and veterans' programs, I wish to emphasize that the outlay level resulting from our amendment would be within the overall outlay level for the VA under function 700, veterans' benefits and services, in the first concurrent resolution on the budget for fiscal year 1986, Senate Concurrent Resolution 32, as calculated by the Budget Committee at the time of the Appropriations Committee's October 3 markup and taking into account the savings in the VA service-connected disability compensation program that would result from title XI of the reconciliation bill.

If our amendment carries, we trust that the Appropriations Committee will produce further recommendations to reduce outlays under the bill as a whole by the $144 million needed to bring this bill in line with its allocation under section 302(b) of the Congressional Budget Act of 1974.

SAVINGS ALLOCATIONS

Mr. President, as I have just indicated, we have in our amendment sought to make all reasonable savings in the VA's medical care account consistent with the maintenance of the VA's ability to provide quality care through the VA health-care staffing established by the Congress in the fiscal year 1985 regular and supplemental appropriations measures. Specifically, the reductions that our amendment would make in the medical care appropriations orginally proposed by the Appropriations Committee are as follows:

First, a $16 million reduction resulting from the reduced cost of the Government's share of Federal employees health benefits premiums for personnel employed under the medical care account. At the time the budget was finalized over 10 months ago, these premium costs were estimated to be higher than actual experience in fiscal year 1985 has shown they will be in fiscal year 1986.

Second, elimination of the $20 million amount added to the administration's request by the Appropriations Committee for the purpose of additional purchases of advanced-technology equipment. The Appropriations Committee in this add-on has raised an important issue regarding difficulties experienced by the VA in successfully budgeting for the high-technology equipment it needs for the provisions of modern, care using state-of-the-art technology, and I am definitely interested in pursuing this issue further with the distinguished chairman of the HUD-Independent Agencies Subcommittee (Mr. GARN). However, in light of current severe fiscal constraints, I believe we should consider this matter in connection with next year's authorizing and appropriations legislation.

Third, a $10 million reduction attributable to community nursing home per diem costs being lower than was expected when the fiscal year 1986 budget was originally prepared. This would not result in any reduction in the quality of community nursing home care furnished to veterans at VA expense.

Fourth, a $3 million reduction attributable to applying in fiscal year 1986 the same policies reflected in the medical care account rescission that was enacted in the fiscal year 1985 Supplemental Appropriations Act. Thus, these savings would come from reduced spending in the areas of public affairs, printing, and consultancies.

Fifth, a $20 million reduction in medical spending to upgrade the VA's telephone equipment—a worthwhile, needed effort, but one which can, we understand, safely be postponed in the interest of making all possible economies.

Sixth, a $12 million reduction in spending proposed for maintenance and repair. Again, although the full amount provided for in the bill as reported can be fully justified, some of it can be deferred to fiscal year 1987, and we are proposing this reduction as part of our effort to achieve all possible savings without impinging on the quality and quantity of care provided to eligible veterans.

Seventh, a $19 million reduction resulting from the anticipated enactment of reconciliation legislation establishing an income eligibility criterion—annual family income of $25,000, initially—for VA health care and requiring modest payment for care for those with family incomes above the criterion. According to the Congressional Budget Office, these provisions would result in reduced spending in the amount of $29 million but associated administrative implementation costs would be $22 million in fiscal year 1986. However, based on the VA's lower estimate of these administrative costs, the Veterans' Affairs Committee has assumed that the administrative costs would be $10 million, yielding estimated net savings of $19 million. Our amendment reflects that assumption.

Finally, Mr. President, in addition to the foregoing $100 million in specified reductions, a $30 million reduction is included without specification of particular areas in which the necessary savings could be achieved. It is our intention that, consistent with maintenance of 193,941 medical account FTEE's and associated patient-care workload, the Administrator of Veterans' Affairs should have discretion to determine the specific areas where these savings would be applied.

CONCLUSION

Mr. President, I wish to emphasize that this is a truly bipartisan amendment that we are offering. It is an amendment that far transcends party lines. It should be considered strictly on the merits—in terms of the great need to keep our commitment to those who have served our Nation with honor in its hours of need, as well as in terms of the effort we have made to make all savings possible consistent with that solemn commitment.

Thus, Mr. President, in order to provide for fair and equitable treatment of veterans and to preserve a strong and effective VA health-care system, I urge all of my colleagues to support our amendment.

Mr. LEAHY. Mr. President, I am rising in support of the amendment of the Senators from Alaska and California which will restore funding to the budget of the Veterans' Administration.

The chairman of the Subcommittee on HUD-Independent Agencies, on behalf of the committee, has proposed a cut of $296 million in the Veterans' Administration's medical care account. I understand why he has made this cut. However, I must strongly oppose this action. These funds should be restored.

Some people believe medical care for veterans is just another Federal program. I disagree. Providing this care is a solemn obligation we owe the men and women who have risked their lives for their country. When I visit the Legion halls, VFW posts, and Vietnam vet centers in Vermont, I meet men whose dignity is very important to them. And rightly so. Nothing is more important to the dignity of an older person than the confidence that he will have the medical care that he needs when he is no longer working and cannot provide it for himself.

Thus, when this bill was originally reported from the committee, it included sufficient funds to support a staffing level of almost 194,000. This level was arrived at after much debate. It represented a consensus of opinion of the necessary medical resources needed to provide adequate medical care.

The chairman has now proposed to reduce the medical care account by $296 million. It is claimed that this cut can be achieved by changes in administrative practices, salary caps, and deferred equipment purchases. However, I must caution my colleagues that the amendment as written is a straight cut in the medical care account. It is well known that the Office of Management and Budget wants to reduce staffing levels at the Veterans' Administration. If it directed the VA to take these cuts in medical personnel, it would be a reduction in personnel of over 9,800 employees.

I have asked the Veterans' Administration what it would do if it—and not OMB—decides how to make the cuts. They report that the number of patients treated would be lowered by 16,000 and the number of outpatient visits cut by 72,000.

Mr. President, there is no free lunch. If we cut the VA medical care account by $296 million, medical care will be reduced. Is this the message we want to send to the millions of veterans now approaching age 65? I think not.

This amendment should not be adopted. Funds should be restored to the medical care account.

Mr. GARN. Mr. President, as I outlined at the beginning of the bill, we had a severe outlay problem in meeting the targets. One of those areas, unfortunately, was in veterans health care, and the committee amendment did delete $296 million in VA medical care.

The amendment offered by the Senator from California and the Senator from Alaska would restore $166 million of that proposed cut. We have subsequently had conversations, and I am willing to accept a modification of that amendment, if the Senators would be willing to offer it, whereby we would restore $100 million of that but, nevertheless still saving $196 million in the bill.

Mr. MURKOWSKI. Mr. President, I agree to the proposal of my colleague from Utah, and I send to the desk a modification of the amendment at this time.

The PRESIDING OFFICER. The Senator has a right to modify the amendment.

The modified amendment will be stated.

The assistant legislative clerk read as follows:

On page 38, line 8, strike out "$9,062,694,000" and insert in lieu thereof "$9,162,694,000".

Mr. MURKOWSKI. Mr. President, this amendment would reduce the amount to $100 million in budget authority and $87 million in outlays.

The Administrator of Veterans' Affairs would have discretion to allocate the $196 million reduction from the reported dollar level ultimately enacted.

I wish to make clear that Congress intends that the funding be sufficient to support the 193,941 FTEE level prescribed in the committee report.

Mr. President, the VA will reevaluate the average salary issue after January 1 on the basis of the first quarter's experience. If that experience shows that the funds appropriated are not sufficient to support the 193,941 FTEE level, then the Appropriations Subcommittee on HUD/Independent Agencies could favorably consider a proposal from the Veterans' Affairs Committee for a supplemental to provide the necessary fiscal year 1986 funding.

Mr. GARN. Mr. President, I have discussed these conditions with the Senator from California and the Senator from Alaska, and I agree as they were outlined by the Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I thank Senator GARN and the ranking minority member of the Veterans' Affairs Committee, Senator CRANSTON.

I also thank our Nation's veterans for their continuing sacrifices and for their participation in reducing our Nation's deficits.

The third-party reimbursement and the income-standard test represent a realization that we will have to seek other outlets for assistance in keeping our obligation to our Nation's veterans.

Mr. President, I rise with Senator CRANSTON to offer a revision to my amendment to H.R. 3038, the HUD/Independent Agencies appropriation bill for the fiscal year ending September 30, 1986. My original amendment was simple and straightforward and would have restored sufficient funds for fiscal year 1986 to bring the appropriations for the Veterans' Administration in compliance with the first concurrent resolution on the budget for fiscal year 1986.

The purpose of that amendment was to achieve equity, not only for the Nation's veterans, but also in terms of the budget resolution for Function 700 which the Senate adopted on August 1

of this year. This morning, Senator CRANSTON and I have been involved in discussions with the distinguished chairman of the HUD Subcommittee and have heard his concerns regarding the total spending levels of his appropriations bill and the possibility of an across-the-board cut in all agencies. In order to try to be responsive to those concerns, Senator CRANSTON and I have agreed to offer a smaller restoration. Therefore, our amendment, as modified, would restore $100 million in budget authority instead of the $166 million originally proposed.

This compromise was reached based upon an agreement with Senator GARN that, first, the Administrator of Veterans' Affairs would have the discretion to allocate the reductions associated with the $196 million budget authority savings. Second, that the Congress intends that this funding level be sufficient to support the 193,941 FTEE level contained in the HUD/Independent Agencies report on H.R. 3038. And third, that the Appropriations Subcommittee would favorably consider a supplemental appropriation if, based upon the first quarter's experience, the average salary level in the VA's Department of Medicine and Surgery is higher than the 1985 level and therefore appropriations are insufficient to support an FTEE level of 193,941.

The issue of adequate employee levels is one that has been debated throughout this year's budget and appropriations process.

Information received from the VA's Department of Medicine and Surgery shows that a $296 million reduction based in part on the assumption of lower average employee salaries would adversely affect the numbers of health care employees.

It is important to note that there appears to be some disagreement within the VA on this very issue.

Notwithstanding such difference of opinion, Senator CRANSTON and I have agreed with Senator GARN to appropriate a lower amount for VA medical care and review the results of that appropriation as it affects employees' levels after the first quarter of the fiscal year has elapsed.

Our commitment to request a supplemental appropriation if needed to meet the agreed upon employee level of 193,941, does not in any way indicate to the VA that there should be unrestricted or unnecessary hiring or inflated salaries. I expect that the VA will use these appropriated funds in the most cost-effective, efficient manner, balancing the promise of quality health care with the need to conserve scarce Federal resources.

My sincere thanks to the floor managers of the bill and to their able staff for working with us to reach this compromise.

I believe Senator CRANSTON has a statement as well on this matter at this time.

Mr. CRANSTON. Mr. President, I should like to clarify one point with the Senator from Alaska. If we find that the funds appropriated are not sufficient to support the 193,941 FTEE, it would be the Veterans' Affairs Committee that would seek action to remedy that problem, not the VA.

Mr. MURKOWSKI. I stand corrected. The Senator from California is correct.

Mr. CRANSTON. I am sure that is also the understanding of the Senator from Utah.

Mr. GARN. First, let us make sure. It would have to be the Appropriations Subcommittee.

Mr. CRANSTON. That is correct. It would be a request from the Veterans' Affairs Committee.

Mr. GARN. A request from the Veterans' Affairs Committee to the Appropriations Subcommittee.

We have agreed to the modified figure, however, in order to accommodate to the concerns of the distinguished subcommittee chairman [Mr. GARN] about the possible unraveling of this appropriations bill, because of the specter of a large across-the-board cut amendment being offered if major restorations are made to the $951 million-reduction package approved by the Appropriations Committee on October 3 and now included in the bill, and specifically in consideration of the three express agreements which we have reached with the subcommittee chairman [Mr. GARN] and ranking minority member [Mr. LEAHY] as follows:

That the Administrator of Veterans' Affairs would have discretion to allocate the $196 million reduction or any reduction from the reported dollar level ultimately enacted.

Mr. CRANSTON. I thank the Senator.

Mr. President, I wish to say a few words about the modification which Senator MURKOWSKI and I have proposed and which is cosponsored by Senators DECONCINI, BYRD, MITCHELL, ROCKEFELLER, and BINGAMAN on our side of the aisle.

Our amendment as modified would restore $100 million in BA and $87 million in outlays—rather than the $166 million and $144 million in BA and outlays, respectively, proposed in our original amendment—to the level now proposed by the Appropriations Committee and incorporated into the bill as a result of the modified committee amendment offered by the distinguished floor manager [Mr. GARN] and adopted at the outset of consideration of the bill this morning. This is a fair compromise, although, frankly, a greater reduction than I believe warranted for the reasons I set forth in my earlier statement.

That the Congress intends that the funding in the medical care account be sufficient to support the 193,941 FTEE level prescribed in the committee report.

That we will reevaluate the DM&S average salary situation after January on the basis of the first quarter's experience, and if that experience shows that the funds appropriated are not sufficient to support the 193,941 FTEE then the Appropriations Subcommittee would favorably consider a proposal from the Veterans' Affairs Committee for a supplemental to provide the fiscal year 1986 funding necessary to support that FTEE level.

I think these understandings make the modified amendment an acceptable outcome. In addition, I have talked to the distinguished floor manager [Mr. GARN] about the conference situation—the House-passed bill contains $206 million more for VA medical care than the amount we are now proposing—and I am confident that the Senator as well as the very able ranking minority member of the subcommittee [Mr. LEAHY] will do their best to move toward the House figure in conference.

Mr. President, I wish to thank both floor managers for their very gracious and cooperative attitude on this matter and also their able staff assistants, Stephen Kohashi and Marty Reiss for Senator GARN and Jim Cubie for Senator LEAHY, for their able assistance. In addition, I am most grateful to the minority staff of the Veterans' Affairs Committee, Ed Scott, Bill Brew, Nancy Billica, and Jon Steinberg, for their very effective work on this amendment.

Finally, I want to note my pleasure in working so closely and collaboratively with our committee chairman [Mr. MURKOWSKI], to congratulate him on a job well done, and to thank the majority staff involved, Cathy McTighe, Julie Susman, and Tony Principi, for their hard work and contributions.

Mr. BYRD. Mr. President, the HUD appropriation bill approved by the Senate Appropriations Committee on July 30, 1985, included two amendments relating to VA medical care which I sponsored and which would affect West Virginia's four Veterans Administration medical centers. My first amendment restored 5 percent to the VA budget for the Nation's medical centers, including West Virginia facilities in Clarksburg, Martinsburg, Beckley, and Huntington. This action was taken to reverse the administration's budget proposal earlier this year to cut funding for all VA medical facilities by 5 percent.

A second amendment which I sponsored and which the committee approved provided language in the committee report to correct a staffing deficiency at Huntington's VA Medical

Center, which, according to a recent VA report undertaken at my request, is suffering a 23.7-percent staffing deficiency.

I am pleased that the VA Administrator, Mr. Harry Walters, at my request, has sent a task force to the Huntington VA Medical Center to verify the magnitude of the staffing problem. I am also pleased that the committee report has urged the VA to expedite the resolution of this inequity and report back on the remedial action VA will take, along with any significant milestones by which to measure the progress.

In a subsequent meeting of the Senate Appropriations Committee, a reduction in the funds for VA medical care was adopted. I opposed this reduction and today I am a cosponsor of an amendment proposed by the distinguished chairman [Mr. MURKOWSKI], and ranking minority membert [Mr. CRANSTON], of the Veterans Affairs Committee to restore funds for VA medical care.

In summary, Mr. President, our veterans have served their country and expect that we will provide adequate funding for the provision of VA medical care. I intend to do everything I can to insure that funds are provided and I am proud to cosponsor the amendment to restore the funds.

Mr. THURMOND. Mr. President, I am pleased to join Senator Murkowski and others in the effort to ensure that funding for Veterans' Administration health care is not unjustly reduced. The medical care which we as a nation provide to our former service personnel should not be the target of indiscriminate or unfair budget practices.

The most recent proposal offered by the Appropriations Committee would reduce budget authority for VA medical care by $296 million, relative to the amount originally proposed by that committee. The amendment we have offered would restore $100 million of the $296 million proposed to be cut. We have also recieved assurance that if the staffing levels at VA medical facilities are to be adversely affected by the reductin of $196 million, a supplemental appropriation will be favorably considered by the disitinguished chairman of the Appropriations Committee.

Mr. President, I understand the importance of reducing the level of Federal spending, however, I feel that it should be accomplished in an equitable manner. Taking medical care away from our needy veterans is not an equitable solution. I oppose that sort of action, and I hope the rest of the Senate will also. I urge my colleagues to join in supporting the amendment we have offered to restore funding for VA health care to a more appropriate level.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the amendment, as modified.

The amendment (No. 786), as modified, was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CRANSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GARN. Mr. President, it is my understanding that we return to the Proxmire amendment.

The PRESIDING OFFICER. The Senator is correct.

The Senator from Minnesota.

Mr. DURENBERGER. I ask unanimous consent we move to the regular order.

The PRESIDING OFFICER. Regular order has been called. Regular order is the amendment of the Senator from Minnesota.

THE DEATH OF SENATOR LEVIN'S MOTHER

Mr. RIEGLE. Mr. President, I wish to indicate to my colleagues that we have just received the sad news that Senator LEVIN's mother has passed away this morning. So this is a moment of very deep grief and sorrow for him and his family.

She was a remarkable woman, as you would imagine, having reared two distinguished sons, among other children, the one, SANDER, serving presently in the House of Representatives, and our esteemed colleague, CARL, who serves with us here in the Senate.

Senator LEVIN will not be able to be here today or tomorrow as he has returned to Michigan to be with his family.

I know all colleagues join me in expressing our collective sorrow at this news and in extending to CARL LEVIN and to his family our prayers and deepest sentiments at this difficult time.

HUD APPROPRIATIONS, 1986

The Senate continued with the consideration of the bill (H.R. 3038).

AMENDMENT NO. 784

Mr. LONG. Mr. President, for many years, I have been a firm believer in the General Revenue Sharing Program. This program has provided a vital source of funds to thousands of local governments across the Nation.

The General Revenue Sharing Program has given these communities flexibility to target their greatest local needs. This has been done with the lowest cost of administration of any Federal program. Less than one-tenth of 1 percent of the funds are required for administrative expenses.

We are not here, to debate the merits of the General Revenue Sharing Program. That debate took place during the context of reauthorization in 1983. More recently, during consideration of the budget for this fiscal year, it was decided that the General Revenue Sharing Program should be fully funded for fiscal year 1986.

It is my opinion, Mr. President, that in taking this action we have sent a clear signal to local governments that they can count on general revenue sharing in fiscal year 1986. We have made a commitment. We cannot in fairness renege on our part of the agreement.

Mr. President, I regularly hear from communities and parishes throughout my State about the virtues of revenue sharing. On occasion, I hear from elected officials in other parts of the Nation, as well. All say one thing in common, and that is that the General Revenue Sharing Program provides an essential source of funding for fire departments, police protection, flood control, and other programs local communities need.

That is why, Mr. President, I strongly support the amendment offered by the Senator from Minnesota. This amendment ensures that the Federal Government lives up to the promise made to local governments throughout the Nation. I urge my colleagues to support the continuation of full funding for the General Revenue Sharing Program in fiscal year 1986.

Mr. DURENBERGER. Mr. President, I will now yield to the Senator from Kentucky, Senator FORD.

Mr. FORD. I thank my distinguished colleague from Minnesota.

Mr. President, I rise in support of the amendment by the Senator from Minnesota, Senator DURENBERGER, and I compliment him for offering this responsible amendment to fully fund the General Revenue Sharing Program. This program was provided for in the first concurrent budget resolution. I'd like for that point to be made.

Local governments in Kentucky stand to lose an estimated $9 million in general revenue sharing funds under the subcommittee's amendment. This is an irresponsible move, in my opinion, particularly at this late date. City and county governments have already planned their budgets based on the action taken by Congress just 5 months ago during debate on the budget resolution.

Recalling that debate, my colleagues may remember that I had intended to offer an amendment which would have gradually phased out general revenue sharing over a 5-year period, beginning with a 10-percent reduction in fiscal year 1986. I did not offer that amendment because cities and counties in Kentucky, and across this Nation, informed me that they did not have enough time to adjust their budgets to replace funds cut in fiscal year 1986. There can be no doubt that

now—I want to underscore "now"—5 months later, these same city and county governments are even less able to absorb a cut in these funds.

I do not think anyone can argue with the success of this program or its need. Local officials fully realize that general revenue sharing is going. But they knew and understood that it was going September 30, 1986, not October 1985. But it is irresponsible now to ask them to accept a cut at this late date, which, as the distinguished Senator from Louisiana said, will mean direct cuts in services to the local peoples such as police and fire protection, elderly programs, and many other vital services that have been budgeted and to have them curtailed at this late date, Mr. President, I think is again irresponsible.

I urge my colleagues to support this amendment by the distinguished Senator from Minnesota and restore the confidence in local people that when we make a statement and they move on it they can depend on what we do and that our word is good. Otherwise, this amendment destroys our credibility with locals. We pass the budget. That should be it. They performed on that basis, and then we turn around in my State and say, "Oh, no, you have to reduce that now $9 million."

I hear a lot of talk. I hear a lot of talk. If we are going to cut them in 1986, start cutting them now so they will get used to it and have an opportunity to be adjusted between now and then to the abrupt cutoff in 1986.

Let us not destroy what those programs might be able to do in this fiscal year and let us not start the hurt any earlier than we have.

So, Mr. President, I urge my colleagues again to support the distinguished Senator's amendment.

Mr. President, the amendment which has been offered by my distinguished colleague from Minnesota, Senator DURENBERGER, is a move for fairness and responsibility. Based on the action of Congress on the budget resolution, cities and counties developed their budgets on the premise that general revenue sharing would be fully funded in fiscal year 1986, but no further. As Senator PACKWOOD, chairman of the Finance Committee, pointed out at that time, Congress was giving these local governments 18 months to prepare for the termination of general revenue sharing. Based on that understanding, the Senate defeated an amendment by the Senator from Wisconsin, Senator KASTEN, which I cosponsored, which would have phased out these funds over a 3-year period, with 100 percent funding in fiscal year 1986 and 50 percent funding in each of the following 2 years. That amendment lost by a narrow margin of 11 votes, and it was clear that even in voting against Senator KASTEN's amendment, the Senate supported full funding of the General Revenue Sharing Program in fiscal year 1986. If we accept the subcommittee's recommendation to cut these funds by 12.5 percent in fiscal year 1986, we are going back on our worked to local governments across this Nation who believed us when we said in May of this year that they could count on full funding in fiscal years 1985 and 1986, but no funds thereafter. These governments believed us when we said that they would have 18 months to adjust to a loss of these funds, and these governments are now going about the business of finding replacement dollars for fiscal year 1987. But we cannot expect them, at this late date, without any notice or indication that we would tamper with this agreement, withhold a total of $570 million from them in this fiscal year.

General revenue sharing moneys fund many vital programs in our cities and counties. In Kentucky, these programs include fire and police protection, elderly meals and transportation services, sewer projects, and many other services which are necessary for the health and welfare of our citizens. These funds are not used for luxury items or frivolous programs; they provide the daily services which allow many in this Nation to survive. A cut in these funds will cause widespread disruption in these services and hardships to many. This is not a program which indiscriminately distributes funds to areas regardless of need. These funds are targeted to those communities in poor, rural areas, and financially troubled cities. It is a program which provides flexibility at the local level to design services for a particular constituency with specified needs. And because the distribution formula takes into consideration the local taxing effort, there is a built-in incentive for local governments to raise funds locally in addition to using the general revenue sharing moneys.

We in Congress must live up to our agreement to fully fund this program in fiscal year 1986. Although I support a phase-out of these funds, as opposed to an abrupt cutoff at the end of fiscal year 1986, I recognize that this program will not be around forever. Our local officials accept the inevitable, but they should not be expected to bear further cuts at this late date after budgets have been prepared and programs are already in full operation. We should give our communities the opportunity to provide these vital services and operate these necessary programs, as planned, without interruption, in this fiscal year.

Mr. President, I yield the floor.

Mr. DURENBERGER. Mr. President, I rise to express my appreciation to the Senators from Louisiana and Kentucky for their statements. They have been here a lot longer than I watching this process work. I think they have as much concern as any one of us on this floor for the Federal system and how it is being hurt by the deficits that we are raising in this country. Both have spoken eloquently to the set of priorities that the taxpayers of this country, in the larger sense, have in terms of financing the delivery of public services, and I appreciate their support for this amendment. I

I now yield to my colleague from Wisconsin.

Mr. KASTEN. Mr. President, I rise today as a cosponsor of Senator DURENBERGER's amendment to the HUD-Independent Agencies appropriations bill which would maintain the budget resolution figures for general revenue sharing.

Mr. President, I take this action because I am concerned about the impact that such a far-reaching—and previously unexpected—cut would have on local governments, not only in Wisconsin, but also throughout the United States. Through the budget resolution, the Senate made a commitment to local governments that funding for general revenue sharing would be maintained at the $4.566 billion level. We must keep that commitment.

Local governments in the State of Wisconsin stand to lose $13.2 million in general revenue sharing funds if this cutback is adopted. Nationally, local governments stand to lose $570 million. Certainly cuts in overall appropriations must be made. But local governments were virtually assured of no cuts in revenue sharing by the budget resolution for fiscal year 1986.

Since passage of the budget resolution, these same governments have put their own budget packages together. Having justifiably assumed no cuts, their budgets reflect budget resolution levels for general revenue sharing. Now, we are suddenly putting local governments on notice that we have changed our minds and that they will either have to make drastic cuts in programs slated for their next fiscal year or find their revenues from other sources.

If we change the numbers at this stage of the game, we will only be saving money on paper. The numbers might make us look fiscally responsible here—but the people back home will pay. Soon, taxpayers will find their local services cut or their taxes going up.

Who is Congress trying to fool? By reducing the levels in general revenue sharing, we are engaging in one of the biggest con jobs on the American people—a giant shell game. The bottom line is that the taxpayer is going to pay.

It is a fact that snowbelt States receive a disproportionate share of Federal money. Coastal and Southern States reap the lion's share of Federal dollars primarily due to government

contracts, defense projects, and military bases.

General revenue sharing is the only Federal program that goes to almost very local government in the country. Among them are 30,000 local governments that receive no other form of Federal aid. General revenue sharing is one of the only means for States like Wisconsin to get their fair share of Federal dollars.

General revenue sharing is one of the few federally sponsored programs which seeks to lessen fiscal disparities among the States. Governments that have the greatest needs but the fewest resources will be strengthened because monies are distributed in a targeted manner.

The largest per capita payments go to the poorest of rural communities and most financially troubled cities. The poorer communities can expect to receive up to $30 per capita, while wealthier communities receive less than $5.

General revenue sharing also allows flexibility and local decisionmaking. The local governments which receive GRS funds have the opportunity to use them for a variety of needs or capital improvements. But there are still incentives for these governments to rely more on their own resources because the distribution formula includes a measure of tax effort.

We usually assoicate general revenue sharing funds with road and highway bulding as well as construction of jails and sewage treatment centers. Yet today, more and more dollars are being spent by local governments to meet mandates imposed by the Federal Government like handicapped access requirements and environmental regulations.

There is a lot at stake here. In essence, this cutback would place local officials in the precarious situation of either reduing the levels of services or raising local taxes. Congress would effectively be making local officials do its dirty work.

Mr. President, it is our responsibility to restore and maintain the level of trust with local governments that we have enjoyed since the inception of general revenue sharing. We can count on them to provide the services on which we all depend. We must show them that they can continue to depend on us.

Again, I am happy to join my friend, Senator DURENBERGER, in this effort to retain general revenue sharing at budget resolution levels.

I hope that the Senate will concur with his amendment.

Mr. DOMENICI. Mr. President, I have not been on the floor. Parliamentary inquiry: is there any time limit on this amendment?

The PRESIDING OFFICER. There is no time agreement.

Mr. DOMENICI. I thank the Chair.

Mr. President, first let me address the Senate in terms of the bill that is before us from the Appropriations Committee from the standpoint of the efforts of the distinguished chairman of the subcommittee, the ranking minority member, and the chairman, Senator HATFIELD.

I rise to compliment the Subcommittee on HUD-Independent Agencies and the Committee on Appropriations as a full committee for their efforts to bring this spending bill into compliance with the budget resolution. The bill, as reported, was $800 million in outlays over the first budget resolution; that is, the subcommittee exceeded its allocation from the entire budget—an allocation that would keep this appropriations bill consistent with our desire to reduce the deficits—by $800 million in outlays.

I do not know anyone in the U.S. Senate who works harder and is more dedicated to achieving fiscal responsibility than the distinguished subcommittee chairman, Senator GARN. When the Appropriations Committee met to discuss the subcommittee allocations, Senator GARN said he would meet the HUD-Independent Agencies Subcommittee targets. Senator GARN said he would reduce the bill by $800 million in outlays so that this bill pending before us would not break the budget. Senator GARN, through his amendment, has achieved these outlay reductions. With these reductions, the HUD-Independent Agencies appropriations bill is in compliance with the fiscal year 1986 budget resolution. I support wholeheartedly the committee amendment which they brought to the Senate today and which the Senate adopted.

Now, what we will do in a moment when we vote on the Durenberger amendment—and everyone ought to know it—is that we are going to turn right around and, after the effort made to bring this bill into compliance with the budget resolution, we are going to immediately add $400 million in outlays. The bill, therefore, will be $400 million in outlays over the 1986 budget resolution. For those who say the budet resolution made a commitment on revenue sharing, let me suggest that the budget resolution assumptions are guidelines. What is binding from the budget resolution is the total amount of money that the appropriators are allowed to spend, not the assumptions. This is the important item.

We have had long debates about Gramm-Rudman-Hollings. We have said that, at the end of the year, we want somebody to come along and add up everything. If that sum exceeds our deficit target, we will be told by the President that "since you have exceeded the total budget we are going to impound or sequester."

Well, if we pass this bill adding the Durenberger amendment, even before we go to conference with the House, we will be saying, "If that due date was here and we really had to live up to a budget deficit, this one bill would be $400 million over."

I submit that the issue is not revenue sharing. The issue is trying to get the deficit under control and whether the HUD subcommittee did a reasonable job of cutting all the other programs that they have within their jurisdiction. After all, we all love our cities and counties. But do we have any less regard for our veterans? Are we not concerned about Superfund? How about Indian housing? How about UDAG? All of these programs have already been reduced by this subcommittee dramatically. For those who would say the cities cannot stand reductions, I wonder if they want to say veterans can take more cuts. Veterans have a difficult time too.

The addition of $400 million, as proposed by this amendment—so everyone will put it in perspective—will be that all other programs in this appropriation bill must be cut 2.4 percent. So, for those who are concerned about the cities, I submit to you that you ought to be concerned about some of our other responsibilities. The mere addition of $400 million in outlays requires that we cut all other programs by roughly 2½ percent if we are to keep this bill in compliance with the budget resolution.

If the subcommittee had not already cut some programs, it might make sense to let us go ahead and accept the general revenue sharing add-on and cut somewhere else. The subcommittee cut $81 million in budget authority from Indian housing to bring it down to this year's level. More money is needed for Indian housing, but the appropriators said, "No dice."

The subcommittee cut $43 million out of HUD moderate rehabilitation, they cut UDAG by a third, HUD rental rehabilitation by $20 million, CDBG by $100 million, HUD management administration by $5 million, R&D by $10 million, abatement and control by $5 million, Superfund by $100 million, disaster relief by $25 million, research and development by $15 million, space flight controls and data communication by $30 million, and VA medical care by $100 million as a result of the compromise that was reached here on the floor of the Senate. The subcommittee has done their work.

In my opinion, unless we are prepared to say, "We want revenue sharing and we do not want to take the 12.5 percent cut that will result in its ultimate elimination," then I think it is incumbent on anyone who wants to add $400 million to also cut $400 million. I wish I knew how to do it better

than the subcommittee did, but I really do not. And I am not going to substitute my judgment line item by line item for the judgment of the subcommittee. But everyone know that we are going to have to go back through this appropriation bill and cut every program by roughly 2.5 percent in order to achieve the $400 million that we are adding.

I have no doubts that everybody wants revenue sharing and that everybody is concerned about the 12.5 percent reduction being proposed. I join in that chorus of concern. I would be one of the first to say that general revenue sharing is a good program. But I cannot believe that we have the capacity to turn our concerns about deficits on and off depending upon what week and what bill we are talking about.

The $400 million revenue sharing add-on is a real addition to the deficit—nearly one-half billion dollars. We are never going to reduce the deficit unless we are able to comply with this year's spending targets. They are not even tough targets, Mr. President. If we want to get the deficit down, all of the appropriations bills will need to be reduced by an additional 10 or 15 percent, yet we cannot even live with the bills as reported. We need to remember that this budget is the result of enormous compromise with the House. After the Senate passed the first concurrent budget resolution, we compromised with the House on many issues and programs. Now we are trying to implement this budget and we cannot even fit within the targets we ourselves established.

There is a lot of talk about Gramm-Rudman: let us have a trigger and let us really cut the deficit. Well, this is going to be a good exercise. On each of these appropriations bills, if we breach our targets, then, under the Gramm-Rudman triggering mechanism, you can expect all programs to get cut. And it will be tougher next year. We might as well get started.

I have two tables showing the relationship of the reported bill, together with possible later requirements, to the congressional budget, the House passed bill, the President's budget request, and a summary of total appropriations action to date. I ask unanimous consent that these tables be printed in the RECORD.

Again, I would like to commend my distinguished colleagues, Senators HATFIELD and GARN, and members of the Senate Appropriations Committee, for their efforts to bring this bill into comformance with the budget resolution.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

HUD—INDEPENDENT AGENCIES SUBCOMMITTEE SPENDING TOTALS—SENATE-REPORTED

[In billions of dollars]

	Fiscal year 1986	
	Budget authority	Outlays
Outlays from prior-year budget authority and other actions completed		25.9
H.R. 3038, as reported in the Senate	54.8	36.6
Possible later requirements:		
Superfund	1.3	0.5
EPA construction grants	2.4	(*)
Veterans compensation	0.4	0.3
Veterans readjustment benefits	0.2	0.1
Subtotal	4.2	0.9
Adjustment for pending action on reconciliation:

Mr. PROXMIRE. Will the Senator from New Mexico yield?

Mr. DOMENICI. I am pleased to yield to the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I commend the Senator from New Mexico. It is not easy to do what he has done again and again on the floor. He deserves a world of credit and thanks from everyone. He has come to the floor and pointed out what we have to do to be fiscally responsible. I do not know anyone who has served in the Senate in the 28 years I have been here who has done it as consistently, as effectively, and as wisely as the Senator from New Mexico has.

Everyone knows that all of our mayors and county board members want that revenue sharing so badly they can taste it.

The Senator points out that we are going to make a 2.5 percent cut in everything including veterans' health care. Maybe that will fail. But if it fails we will really be in trouble—if that 2.5-percent cut fails, and if the Durenberger amendment survives. So I think what the Senator from New Mexico has said we should ponder very carefully. That is the real argument.

I want to thank him very much for making it so eloquently.

Mr. SASSER addressed the Chair.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. SASSER. Mr. President, I support the amendment offered by my good friend from Minnesota, Mr. DURENBERGER, to ensure full funding for the General Revenue Sharing Program for fiscal year 1986.

The Senate has time and again spoken in favor of this effective and efficient program. During consideration of the budget resolution earlier this year support for the program for

the upcoming fiscal year was reaffirmed. The budget resolution for fiscal year 1986 assumed $75 billion in deficit reductions over the next 3 years with full funding for the General Revenue Sharing Program assumed next year.

It is no understatement to say that general revenue sharing is the most efficiently administered and prudently used grant program in the history of the Federal Government. Less than two-tenths of 1 percent of these funds are used to administer the program. Over the past 6 years, the number of personnel working in the Office of Revenue Sharing has actually declined by one-third.

It is also an enormously successful and popular economic and community development program. Local officials of all political stripes and ideologies attest to this fact. Earlier this year, I held field hearings throughout my home State of Tennessee in an attempt to examine the impact of economic and community budget reduction proposals on local communities. Witnesses included city mayors, county executives, developers, and experts in the field of regional development.

Both Republican and Democratic officials alike testified to the essential importance and necessity for this program in the maintenance of essential public services.

In the face of funding cutbacks and a no-growth mentality, revenue sharing remains as the sole, reliable source of assistance for local governments nationwide. These funds are used to pay for services which range from police and fire protection, to hospitals and highways.

The loss of these funds would simply shift the tax burden on to the local governments. A recent study by the U.S. Conference of Mayors shows that 68 percent of the cities responding said that some type of local tax increase would be necessary to maintain an adequate level of services; 43 percent said that user fees would be increased; 40 percent would increase property taxes; 5 percent would increase sales taxes; and 3 percent would increase income taxes.

In my one State of Tennessee, county and municipal governments have already increased taxes over a 10-year period by 127 percent. Last year, revenue-sharing payments represented nearly 6 percent of total taxes collected by these governments.

There are 334 municipalities in Tennessee. Nearly 90 percent of them have populations of less than 10,000. For these small municipalities, nearly all of them, general revenues sharing is the only direct Federal grant they receive.

These funds are indicative of the importance of general revenue sharing. We are not seeking to expand the program, merely continue it at the current level for 1 year. It is not a budget buster but merely an investment in our future. To curtail the Government's investment in our cities' future would be unwise and counterproductive.

I urge my colleagues to support this amendment.

Mr. President, I also request that I be added as a cosponsor of the Durenburger amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURENBERGER addressed the Chair.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. DURENBERGER. Mr. President, let me thank my colleague from Tennessee for those comments. I enjoyed my introduction to the Senate when the Senator was chairman of the Intergovernmental Relations Subcommittee, and while he was the ranking member for the last 4. I do not know many people in this body that understand the value of this program more than he does.

Mr. President, I hope we can vote fairly soon on the amendment. But, let me make just a few points by way of reiteration, and another one by way of explanation.

Our colleague from New Mexico made a very brief comment on this amendment, a comment which he has made on other amendments over the last 4 years, and that he will no doubt continue to be making over the next 5 years. That comment is we are not here to discuss revenue sharing, we are not here to discuss State and local government, we are not here to discuss the Federal role in meeting the needs of housing, the needs of education, and the needs of pollution control. We are just here to discuss the budget—plain and simple.

I want to go on record, Mr. President, by saying if that is all we are going to do for the next 5 years maybe we ought to fold up shop. We have ourselves in a lot of trouble. We all know that. But we still have a responsibility. We have a responsibility to farmers, we have a responsibility to build highways, and we have a responsibility to educate young people. We still have a lot of responsibility. It is a shared responsibility. But it is still a responsibility. We share it with Governors, legislators, county commissioners, and town board supervisors who serve for nothing or next to it trying to help out communities across this country, particularly the farm areas that are dying. We have made a commitment to budget reform. We have said general revenue sharing, which is the most efficient use of Federal income tax dollars down at the township or the city level, will have to go. We are going to get rid of it despite its efficiency, despite the fact that 99 cents on every dollar actually educates a young person, or actually builds a road, or actually buys a firetruck. We are going to get rid of it starting at the end of fiscal year 1986. It is gone—typical of this body. Take the most efficient program and get rid of it. But let us hang on to the "HODAGS," the "UDAG's," the "humpbacks," and whatever else—hang on to all our acronym programs. We will hang on to those because those are the ones we can take to the appropriations committee, where everybody can say I did this in this community. What we don't say is I did it by giving you two 25-cent dollars which somehow or other force you to raise local property taxes or State taxes to match it. I gave you the 25 cents, and I made you come up with the extra 75 cents.

In summary let me say I hope we do not have to keep coming back here and listening to that speech for the next 5 years.

As much as I respect my colleagues and the incredible job he does in undertaking chairmanship of the Budget Committee, as much as I hope he still has the opportunity to be chairman of that committee after the elections next year, I would suggest that the issue is not the budget. The issue is general revenue sharing. It is the commitment of each of us to the partnership that we have with State and local government officials. You ask how about veterans? How about housing? You ask that question. I ask how about the schoolteachers? How about the firemen, the firetruck, the policeman and the patrol car, and let us not leave out how about the food—food for the food bank shelves? Yes; you took a nick out of teenage medical care. But a lot of that general revenue sharing is 99 cents on the tax dollar to teenage medical care, not 75-cent teenage medical care such as comes from the categorical grant programs.

Mr. President, I have been through this budget and the reconciliation on general revenue sharing the same as the people on Appropriations. In the Finance Committee on which I sit we had a $22-plus-million mandate for reconciliation including general revenue sharing. We cut Medicare. We took money away from elderly health care, and away from disabled health care. We took money out of unemployment compensation, AFDC, and a lot of other programs in order to make our reconciliation goal. We made a $22 million goal without having to take money away from the people in local communities who are served by general revenue sharing.

This program does not serve mayors. It does not serve county board chairmen or school superintendents. It serves people in much the same way as every other program. When it went through the Finance Committee we

found some way to reduce the budget deficit by $22 billion. We found a way to meet the obligation that you all voted on here last summer without touching this program.

I acknowledge the difficulty that the Senator from Utah and his colleagues have in the particular grouping of public services falling within their subcommittee's purview. But that does not mean that the budget is better or more poorly served or that revenue sharing is better or more poorly served by eliminating 12.5 percent of the General Revenue Sharing Program.

Mr. GARN addressed the Chair.

The PRESIDING OFFICER. The Senator from Utah.

Mr. GARN. Mr. President, once again let me say that I certainly will not take a back seat to anybody in this body on support of general revenue sharing. There are only two of us—two of us in this body, Senator RICHARD LUGAR and I—who were officers in the National League of Cities together who lobbied for this program as mayors, and not as Senators. We came back and testified. We lobbied. We worked very hard for it. So I cannot dispute what any of my colleagues have said on the principle of general revenue sharing, or on the lack of strings attached to it for local government. That is not the issue here today. I cannot argue that issue with them at all. But I can take issue that all we are considering is the budget—just the budget total. This subcommittee, the full Appropriations Committee, the ranking minority member, and I did not spend months just to comply with the budget total. We went through carefully line by line, after weeks of hearings, of listening to people to meet those ceilings and our responsibilities on a careful, well-considered way. So I do not want anybody to think we are just out here picking on anyone.

I want to repeat: Indian housing, $81.9 million; HUD modern rehab, $42.9 million; HUD HODAG, $25 million; HUD rental rehab, $50 million; HUD operating subsidies, $20 million; CDBG, $100 million; management and administration, $5 million; EPA research and development, $5 million; EPA Superfund, $100 million.

Everybody out here is for Superfund.

Disaster relief payment, $25 million; NASA, research and development, $15 million; NASA, space flight, control and data communications, $30 million; National Science Foundation, research, $5 million; National Science Foundation, Antarctic program, $2 million; National Science Foundation, science education, $10 million; VA medical care, recommended $296 million, which was modified a few minutes ago.

We went through the whole budget and tried to spread the burden out, to have the least impact on each one of them.

Yes; I support the concept of general revenue sharing. I should remind my colleagues who were not involved in the debate that many of the mayors, particularly the big city mayors of this country, did not keep their word. When DICK LUGAR and I were lobbying for revenue sharing, we made the promise to Congress that if we got revenue sharing because the principle was so important we were willing to take equal cuts in categorical grants. But once revenue sharing was granted, the mayors continued to fight for every grant program that came along, including revenue sharing.

Revenue sharing would not be going out of business today if the mayors kept their word on substituting revenue sharing for the grant-in-aid program.

To put the issue as to what the point is, to say we are just going to put $570 million back into general revenue sharing, then we will have a vote—not from me—there will be a vote on the floor today to cut 2.5 percent across the board. That means $200 million in veterans' medical care.

I want my colleagues to make that choice. None of the choices are pleasant. Which choice are you going to make? Are you going to make a choice to put this money back into general revenue sharing, or are you going to make a choice to take $200 million out of veterans' health care when we just put $100 million back in? Or are you going to take another $100 million or so out of Superfund? Are you going to take it out of EPA? That is exactly what will happen, I say to my colleagues. That is the choice they will be making.

I wish I was not on the floor having to make these kinds of choices. I wish a former mayor was not having to be out here advocating removing 12.5 percent from a program that I do not think should be discontinued, that I said earlier the administration should not have recommended be cut. But are we going to stop the demagoguery or are we going to be serious about budget restraint? Or are we going to vote for budget resolutions, put out press releases at home how we are reducing the budget, and then come back and vote for a program that puts $570 million back in?

We cannot have it both ways. I guess we can, to fool some constituents out there. But I do not want to go through and have a 2.5-percent across-the-board cut in a lot of other programs that are very vital.

I know the Senator from Vermont has worked long and hard as an advocate of more funding for EPA. A long time before he was the ranking minority member, he was constantly in there every year saying we have problems with clean air, toxic waste, and acid rain in this country, trying to do something about it. So we are going to have to take some cuts in EPA if revenue sharing is put back in or has added to the $570 million.

I certainly would hope that this amendment would be defeated so we do not have to cut all of those other programs.

Mr. LEAHY. Mr. President, I understand the proponents of the amendment will agree to a unanimous-consent request that we vote on this amendment, the yeas and nays having been ordered, not before 11:45, and that there be no amendment in order to the amendment.

Mr. GARN. Mr. President, reserving the right to object, and I do not intend to object, I would want to reserve the opportunity to table the amendment at that time.

I obviously cannot at this time request tabling because it would immediately bring us to a vote.

Mr. LEAHY. I do not intend in that unanimous-consent request to preclude the right of any Senator to move to table. I would amend my request that the vote not occur before 11:45 to add that there not be any amendment in order to the amendment but that the right to move to table would not be precluded.

Mr. DURENBERGER. Mr. President, I might say to my colleagues I would prefer not to vote now. I understand several of our colleagues can be here later but cannot be here very shortly. I would suggest, if possible, that we have a vote certain at 11:45. I have no further argument to make. I will not object to the Senator from Utah making his tabling motion now and have the yeas and nays ordered, rather than have a motion later.

Mr. GARN. Mr. President, reserving the right to object, I suggest that that would be a good modification of the unanimous-consent agreement, to have a time certain not before 11:45.

Mr. HEINZ. Reserving the right to object, the Senator from Pennsylvania hopes that he will have 2 minutes to speak on this matter.

Mr. GARN. I suggest to the Senator from Pennsylvania that if we set the vote for 11:45, he would have more than 2 minutes.

Mr. LEAHY. I suggest to the Senator from Pennsylvania that a lot of people on both sides of the aisle would be delighted to have him talk and fill up the time. But, also, Mr. President, my unanimous-consent request should state that there would be no amendments to or in relation to the amendment offered by the Senator from Minnesota that would be in order, but reserving, of course, the right of anybody, at the appropriate time, to make a motion to table.

The PRESIDING OFFICER. Is there objection?

Mr. GARN. Reserving the right to object, we are in the process of checking with the minority leader. The unanimous-consent request is acceptable to me, but we must await the approval of the minority leader. I suggest the absence of a quorum.

Mr. DOMENICI. Will the chairman withhold?

Mr. GARN. I withhold.

Mr. DOMENICI. I do not understand the request. There are no amendments in order to this amendment prior to the vote, are there?

Mr. GARN. That is correct.

The PRESIDING OFFICER. They would be in order to the language proposed to be striken.

Mr. DOMENICI. Mr. President, are amendments in order to this amendment prior to the vote which we are about to agree will occur at 11:45?

The PRESIDING OFFICER. Absent any unanimous-consent agreement, amendments would be in order to the language which has been proposed to be stricken.

Mr. GARN. Mr. President, there is a unanimous-consent request pending. The Senator from Pennsylvania reserved the right to object.

Mr. HEINZ. The Senator from Pennsylvania no longer reserves the right to object.

Mr. GOLDWATER. What is the unanimous-consent request, Mr. President?

Mr. GARN. May I suggest, until we have clearance from the majority leader, that the Senator withdraw his unanimous-consent request?

Mr. LEAHY. It is obvious that my unanimous-consent request is to accommodate a number of Senators who need the extra time to come to the Chamber for a vote. I will be happy to withdraw it and allow the discussion to go on. For those who are seeking clearance from the majority leader's office on that side of the aisle, so they understand, I will withdraw it so that there can be discussion or we can go to other matters. But I will reinstate the unanimous-consent request. I withdraw my request.

Mr. GOLDWATER. Mr. President, is there a unanimous-consent request pending?

The PRESIDING OFFICER. The request has been withdrawn.

Mr. GOLDWATER. I thank the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I rise to join my colleague, the Senator from Minnesota, to restore the general revenue sharing for fiscal year 1986. For 4 years I chaired the Subcommittee on General Revenue Sharing of the Senate Finance Committee, and have been an advocate of the continuation of this program, even through 1986 and into subsequent years. Although I suspect we all understand the fiscal reality is such that we do not have a lot of revenue to share, I still have reservations about the cold turkey cutoff, what happens at the end of 1986. I think we would have been better serving our constituents to phase that down on some realistic timetable. But that was a judgment that the Senate made during consideration of the budget resolution and I am not going to dispute that.

What I do dispute, Mr. President, is the notion that having already taken a very large hit at the municipalities that have depended on revenue sharing and having told them that if they would accommodate themselves to termination of the program in 1986, we suddenly find ourselves in a position where we have to go back on what we have told them and affect their budgets in the middle of their fiscal years for many of them. I understand all the difficulties of the Appropriations Committee, but I also hope people understand what this means in terms of difficulties for many of the municipalities that will be affected by it.

For example, in my home State of Pennsylvania, we have, because of the continued erosion of manufacturing jobs and industries like steel, textiles, and others, seen many municipalities come to the verge of bankruptcy in my State. Recently, there was a front-page New York Times article on the plight of the town of Clairton in Allegheny County, my home county, where the United States Steel works have closed. The tax base of that municipality was so depleted by that closure that they have laid off all the firemen, all the policemen; they have laid off all the employees in city hall. There is no one in local government in Clairton. Now we are going to ask them to have 15 percent less.

What are people supposed to do, start supplying water to the municipality? Supply electric service somehow, with generators, hand-rotated generators, to keep the streetlights on? What we are asking them to do is the equivalent of that.

Lest people think that Clairton is some isolated example, I can say with some certainty that it is not. We have literally dozens of municipalities—Midland, PA; Duquesne, McKeesport, White Oak—throughout that area and many other parts of my State as well, where the termination at the end of 1986 will already work an enormous hardship, but further cutbacks in it, as proposed here today, will be something with which they simply cannot cope.

Some of my colleagues will say, "Well, why do these municipalities not raise taxes?" The answer is that the State legislature will not let them. There are laws that restrain the municipalities covered under our municipal codes from exceeding certain levels of taxation. And the communities that I have just named, plus a lot of others, are at their absolute maximum. They cannot raise any additional revenue.

It is all very well and good for people to say, well, there are all kinds of other problems here, but we are putting these municipalities in a box. It is about 6 feet long and it will put them about 6 feet under, because there is no way out for them, except to reduce absolutely essential public safety services, which, in many cases, are, frankly, sparse enough.

Let me simply conclude by saying that few Federal programs serve so many people as well as the General Revenue Sharing Program. Towns, cities, and counties throughout the United States use the funds from revenue sharing to improve education, transportation, economic development, community activities, firefighting, sanitation, and police work. There are few Americans who do not directly benefit from the proceeds of the revenue sharing program. Eliminating a portion of the General Revenue Sharing Program would result in either the elimination of important services now provided by our local governments or an increase in local taxes.

Our local governments have been asked to shoulder a steadily increasing number of programs and responsibilities previously supplied by the Federal Government. They have done an excellent job of providing these desperately needed services with fewer and fewer Federal dollars every year.

One program upon which they have been able to depend is the General Revenue Sharing Program. Because the funds provided through general revenue sharing are not earmarked for specific programs or projects, our local governments have been able to use them to serve the individual needs of their citizens and communities. Recipients of revenue sharing funds use those funds most often to pay for police protection, highway maintenance, fire protection, and education—essential government functions that our citizens do not want to see cut.

I am particularly concerned about the proposed reduction of funds in the committee bill because it breaks the agreement reached in the budget resolution in June to fund general revenue sharing at the full $4.6 billion level. This agreement was of great importance to local governments, many of whose budget cycles run from July to June, unlike the Federal budget cycle, which runs from October to September. For this reason, local governments are already into their fiscal year 1986 budgets, and to reduce funding for general revenue sharing at this point would create budgetary havoc for these local governments. Moreover, this reduction defies the basic trust we established with local governments when we passed the budget resolution.

guaranteeing them full funding for the General Revenue Sharing Program.

We are all dedicated to fiscal restraint, but we must not think that we are exercising fiscal restraint when we cut the budgets of small towns, cities, and counties that are struggling to continue programs that the Federal Government no longer provides. Congress does not show fiscal courage by reducing the expenditures of other units of government.

Mr. President, I support this amendment. I urge my colleague to adopt it.

The PRESIDING OFFICER. Who yields time?

Mr. LEAHY. Mr. President, I renew my unanimous consent request that there be a vote on or in relation to this amendment at 11:45; that there not be any amendments on or in relation to it in order, but that the right of any Senator be reserved at the appropriate time to make a motion to table, but that it not be in order before the hour of 11:45 a.m.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. LEAHY. I thank the Chair. I thank the distinguished manager of the bill.

Mr. GARN. Mr. President, now that we have ordered a vote on the Durenberger amendment at 11:45 a.m and I see no one else seeking recognition, we do have some amendments that are technical in nature that have been agreed to, so I ask unanimous consent that the Durenberger amendment be temporarily set aside at this time and also the Proxmire amendment while we consider these technical amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 788

(Purpose: To make a technical change in the travel expenditure limitation set forth in Section 401)

Mr. GARN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Utah [Mr. GARN] proposes an amendment numbered 788.

On page 49, line 13, insert "initially" after the word "estimates".

Mr. GARN. Mr. President, the bill as reported by the Committee on Appropriations included an amendment to the travel restriction contained in section 401. This travel restriction has been carried in the HUD bill for several years. The committee amendment recognized that in a number of administrative accounts, the President's request was predicated on significant reductions based on field office closures and realignments, as well as cuts reflecting proposed program terminations. In many of these cases, Congress has not concurred with these underlying changes, and as a consequence we must provide restorations of funding to cover these administrative costs.

The original committee amendment permitted the travel component of these administrative costs to increase in proportion to the overall increase in the account, based on the budget request. Since the committee took action last July, the President has submitted budget amendments to add back amounts needed to restore the previously proposed 5 percent pay reduction. This action has altered the proportions which the committee earlier had adopted, especially in administrative accounts with a high proportion of personnel compensation and benefits costs.

To permit the full effect of the committee action, therefore, it is necessary to reference the initial budget estimate as the basis upon which proportionate increases in travel expenditures may be adjusted.

Mr. President, I believe that the amendment has been cleared. I know of no objections.

Mr. LEAHY. That is correct, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 788) was agreed to.

Mr. GARN. I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO 789

(Purpose: To prevent the "merger" and rescission of recaptured authority for the Sec. 235 program and the Rental Rehabilitation and HODAG programs)

Mr. GARN. Mr. President, I send another amendment to the desk and ask for its immendiate consideration.

The PRESIDING OFFICER (Mr. MATTINGLY). The clerk will report.

The legislative clerk read as follows:

The Senator from Utah [Mr. GARN], for Mr. D'AMATO, proposes an amendment numbered 789.

Mr. GARN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 4, line 9, insert after "1986:" the following:

Provided further, That notwithstanding the immediately preceding ("merger") proviso, notwithstanding any requirement of section 235(c)(3) of the National Housing Act, as amended, and notwithstanding the proviso in this paragraph concerning rescission of recaptured budget authority, any balances of the contract authority and budget authority provided in the Second Supplemental Appropriations Act, 1984 (Public Law 98-396, 98 Stat. 1369, 1380) for the home ownership assistance program under section 235 of the National Housing Act, as amended (12 U.S.C. 1715z), for which the Secretary has made fund reservations prior to the date of enactment of this Act shall remain available for obligation without regard to any fiscal year limitation until such reserved budget authority is expended, and the Secretary of Housing and Urban Development shall have the authority to enter new contracts for assistance payments and to insure mortgages under section 235 until such reserved budget authority is expended notwithstanding any sunset date specified in the last sentences of section 235(h)(1) and section 235(m), respectively: *Provided further*, That notwithstanding the "merger" proviso, and notwithstanding the proviso in this paragraph concerning rescission of recaptured budget authority, any amounts of budget authority heretofore made available for obligation until September 30, 1986 for rental rehabilitation grants and development grants, pursuant to section 17(a)(1) of the United States Housing Act of 1937, as amended, shall remain available until such date:

On page 4, line 10, strike out the work "merged'.

On page 4, line 14, after "1986" insert the following:

(other than any such amounts for assistance payments contracts under section 235 of the National Housing Act and grants under section 17(a)(1) of the United States Housing Act)

On page 4, strike out "except as provided in the foregoing proviso," on lines 22 and 23.

On page 4, line 24, insert after "authority)" the following: "under this paragraph".

On page 5, line 1, after "1986" insert the following:

except such amounts provided for assistance payments contracts under section 235 of the National Housing Act of 1937, and for grants under section 17(a)(1) of the United States Housing Act of 1937,

Mr. GARN. Mr. President, this is an amendment I offer on behalf of Senator D'AMATO.

Subsequent to the reporting of the fiscal year 1986 HUD appropriations bill, the committee learned that there were possible interpretations of prior appropriation act provisions which would have resulted in the loss of carryover and recaptured funds in several housing programs. These results are contrary to the understanding the committee had at the time the prior acts were passed, and at the time the report on this bill was presented.

The first program involved is the section 235 Homeownership Assistance Program. We had been advised that provisions of existing law could be construed so that any balances of funds at the end of fiscal year 1985 would revert to the general subsidized housing account and not be available for the purposes for which provided initially. In addition, this interpretation would have resulted in the rescission of all funds recaptured during fiscal year 1986.

The same interpretation could be made in connection with HODAG and rental rehabilitation funds, notwith-

standing the specific language in the 1984 Supplemental Appropriation Act which was intended to keep these funds available through fiscal year 1986.

The proposed amendment is intended to correct these oversights by specifying the following:

First, section 235 funding contained in the 1984 second supplemental will remain available without fiscal year limitation, without regard to whether the mortgage insurance and assistance authority for section 235 have otherwise expired; and this funding is immune from the general rescission language which is expected to apply to section 5(c) authority in fiscal year 1986.

Second, funding for the HODAG and rental rehabilitation grants which was to be available until the end of fiscal year 1986 in accordance with the fiscal year 1985 appropriations, shall be available through fiscal year 1986.

These changes are clarifying language, to assure that the fiscal year 1986 merger proviso will not have the unintended consequence of contradicting the clear intention that section 235 funding and the section 17 funding shall remain available to these programs unless the fiscal year 1985 appropriations are specifically repealed or otherwise modified by a later act of Congress.

This is a technical amendment. I believe the minority has cleared it.

Mr. LEAHY. We have no objection to it, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 789) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 790

(Purpose: To raise the limitation for administrative expenses of the Federal Home Loan Bank Board to the level in the revised President's request)

Mr. GARN. Mr. President, I send a third amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Utah [Mr. GARN] proposes an amendment numbered 790.

Mr. GARN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 46, line 6, strike out "$26,213,000" and insert in lieu thereof: "$26,877,000".

Mr. GARN. Mr. President, the level of the limitation on administrative expenses of the Federal Home Loan Bank Board [FHLBB] approved by the House and contained in the Senate reported bill does not reflect an additional $664,000 requested by the administration in a budget amendment this summer.

This additional amount reflects the decision not to pursue a 5-percent pay reduction for Federal employees. Through an oversight, this adjustment was not included in the FHLBB limitation as was the case in other agencies covered by this appropriations bill. This amendment corrects this inadvertent error by increasing the limitation to $26,877,000.

The limitation covers the use of revenues from assessments paid by member financial institutions, not tax dollars. With the continuing pressures on the thrift industry, it is critical that the principal Federal regulatory agency dealing with these problems be permitted to fully discharge its responsibilities.

I know of no objection to this amendment.

Mr. LEAHY. There is no objection, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 790) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 791

(Purpose: To permit the Secretary of the Department of Housing and Urban Development to waive the 10 percent cap on increases in local prototype cost limitations of new public housing development, in lieu of repeal of existing prototype limits)

Mr. GARN. Mr. President, I send a fourth amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Utah [Mr. GARN] proposes an amendment numbered 791.

Mr. GARN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 6, strike out lines 6 and 7, and insert in lieu thereof the following: the first sentence of section 6(b) of the United States Housing Act of 1937 is amended by striking out "by more than 10 per centum" and inserting before the period at the end thereof "except that the Secretary shall increase such amount if the Secretary determines such action to be necessary to account for location or other factors related to a particular project".

Mr. GARN. Mr. President, the bill as reported by the Committee on Appropriations included a provision which repeals a requirement of existing housing law establishing prototype costs as a mechanism to limit the cost of new public housing development.

While the committee is highly supportive of cost containment of public housing construction—it has become clear that the existing statutory procedure is deficient and, in some instances, unworkable, and an impediment to needed public housing development.

The House proposed a lengthy procedural mechanism whereby these prototype costs would be subject to extensive reviews and consideration as applied to individual areas. While laudatory in its intent, such an amendment would render the prototype cost wholly unworkable and paralyze it with complex and endless red tape.

The committee chose to recommend a cleaner but more dramatic alternative: To repeal the prototype cost provision altogether—and at that time the Department concurred that this would be a more practical approach to the problem.

Since that time, however, the Department has suggested an alternative which will maintain the cost-containment benefits of the prototype requirement but will permit the Secretary greater flexibility in applying this mechanism. The amendment proposed grants the Department the discretion to waive the prototype cost in individual instances where particular project factors such as location make such cost exemptions appropriate.

Again, I believe this amendment is acceptable.

Mr. LEAHY. There is no objection to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 791) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MR. STAFFORD. Mr. President, on July 26, 1985, EPA was ordered by a Federal district court to inform States whose pollution causes adverse effects in Canada that they must take remedial action to prevent further transboundary pollution damage. EPA has claimed that it will require a lengthy period of time to prepare the technical and analytical reports necessary to carry out the district court's order. Two days ago EPA appealed the district court order and I am told the

Agency may seek a judicial stay of the order. I and a number of my colleagues on the Environment and Public Works Committee believe EPA should carry out the analytical work necessary to enable the Agency to comply with the lower court's order even while EPA appeals the decision on legal grounds.

This analytical work is important for EPA to perform no matter how the courts decide the legal issues raised by EPA. The work involves summarizing the types of resource damages associated with the transboundary air pollution, estimating the amount of U.S. pollution contributing to damages in Canada and identifying control programs that would avoid such damages. Frankly, this type of work seems essential to carry out the envoy process now being conducted by Drew Lewis and his Canadian counterpart, Bill Davis.

Does this appropriations bill contain sufficient funds for EPA to carry out on a timely basis this fiscal year the analytical work needed to characterize transboundary air pollution impacts more fully and to identify remedial programs?

Mr. LEAHY. Yes; the funds in this bill are adequate for EPA to carry out this work without further delay.

Mr. STAFFORD. Is it the Senator's intent that EPA should assign very high priority to carrying out this work?

Mr. LEAHY. Yes, this is important work, required not only to enable EPA to comply with orders the courts have and may issue, but also to permit the prompt resolution of a very serious bilateral conflict with Canada, one of our most important allies and trading partners. EPA should immediately develop a work plan to complete these activities as early as possible in this fiscal year.

Mr. STAFFORD. I thank the Senator.

Mr. LEAHY. Mr. President, in last year's committee report on the Environmental Protection Agency's budget, the committee directed the Agency to prepare an enforcement policy that will ensure 90 percent compliance with the ground monitoring, closure, post closure, and financial responsibility provisions of the Resource Conservation and Recovery Act. That policy has been provided to the committee.

Earlier this year, we wrote to the General Accounting Office requesting that the General Accounting Office evaluate the strategy that the Agency had prepared and answer the following questions:

Are applicable regulatory requirements clear and enforceable?

Are there provisions for inspection, followup, and enforcement?

Are required enforcement resources identified and provided?

Are training and skills needs identified and provided?

Is effective oversight of EPA and State performance provided?

Is there a framework for an effective Federal/State relationship?

The report from the General Accounting Office was generally very positive. However, it did note that in four key areas the enforcement strategy was not complete. Its conclusion was that the enforcement strategy did not have the following important elements:

An analysis of the resources required to achieve the 90-percent compliance goal;

An assessment of the training and skills mix needed to achieve the compliance goal;

An oversight mechanism for tracking progress toward achieving the 90-percent compliance goal; and

A means of communicating the goal to the States, as part of the framework for the Federal/State relationship.

Since this report was issued after the issuance of the 1986 committee report, it was not possible to include material related to this matter in the committee report.

In lieu of report language, I would like to suggest that the Agency be directed to undertake the following activities identified by the General Accounting Office.

First, the Agency should prepare and submit with the 1987 budget an analysis of the resources required to achieve the 90-percent compliance goal.

Second, the Agency should prepare an assessment of the training and skills mix needed to achieve this compliance goal.

Third, the Agency should prepare an oversight mechanism for tracking progress toward achieving the 90-percent compliance goal. Activities two and three should be delivered to the committee 2 weeks prior to the hearings on the Agency's 1987 budget.

Finally, the Agency should communicate to the States that its goal is to achieve the 90-percent compliance rate. This goal should be an integral part of the delegation requirements, and the State grants process. The Agency should communicate this goal to the States and begin the process of integrating this goal in the delegation and grants progress prior to the 1987 budget submission.

Would the chairman of the subcommittee, the gentleman from Utah, agree to these directions to the Agency and agree that they should be treated by the Agency as the equivalent of committee report language?

Mr. GARN. The Senator from Vermont is correct. I believe these materials should be prepared and these actions undertaken in response to the GAO report. The Agency should consider the directions in this colloquy to be the equivalent of committee report language.

AMENDMENT NO. 792

Mr. LEAHY. Mr. President, I have an amendment which I believe has been cleared. I ask unanimous consent that it be in order at this time.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY] proposes an amendment numbered 792.

Mr. LEAHY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

After line 19, on page 18, add the following: ": *Provided further*, That of the funds provided to the states under the Safe Drinking Water Act, $300,000 shall be used for the purchase of essential equipment by state agencies."

Mr. LEAHY. Mr. President, it has come to my attention that about $300,000 of the funds that had been requested for State grants in the Safe Drinking Water Program in 1986 will not be distributed because certain jurisdictions will not be able to accept the funds.

In the past when this has occurred, the Agency has simply supplemented the grants given to the States. Divided among all States, this has meant a grant of about $6,000 per State. Such small grants have not had a significant impact on any State's ability to operate this program.

It has also come to my attention that there is a critical shortage of essential equipment, such as gas chromatograph mass spectrometers, in some States.

As an alternative to the dispersal of these funds in small amounts to all States, this amendment directs the Agency to assess which States have the greatest need for this equipment and provide grants to such States to purchase essential equipment.

Mr. GARN. Mr. President, the amendment is acceptable to the majority.

Mr. LEAHY. I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 792) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GARN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GARN. Mr. President, in order to conserve time and use it as effi-

51-059 O-86-27 (Pt. 20)

ciently as possible, we have switched from one amendment to another. Now we are back on the Durenberger amendment, but I would ask unanimous consent that the Durenberger amendment be temporarily laid aside so we can return to the Proxmire amendment, giving the Senator from Colorado the opportunity to speak on that amendment.

The PRESIDING OFFICER. Is there objection?

Mr. LEAHY. Mr. President, reserving the right to object—and I shall not object—do I understand from the Senator from Colorado that the time he expects to take would be such so as not to stop the vote on the Durenberger amendment at 11:45?

Mr. ARMSTRONG. Mr. President, if the Senator will yield, my plan is not to speak at great length and certainly not beyond the time scheduled for the vote on the Durenberger amendment.

Mr. LEAHY. I have no objection.

Mr. ARMSTRONG. May I ask the managers of the bill, assuming we proceed in this way, does that mean, after the vote on the Durenberger amendment, we will be back on the Proxmire-Armstrong amendment?

Mr. GARN. That is correct.

Mr. ARMSTRONG. I thank the mangers, and I certainly have no objection to that procedure.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 785

Mr. ARMSTRONG. Mr. President, we have been switching back and forth on amendments here this morning, and I hope in the process we have not lost the focus of what we are doing because the amendment which was called up a couple hours ago by the Senator from Wisconsin [Mr. PROXMIRE] is not only one of the most important amendments we are going to consider on this bill, it is one of the most important amendments we are going to consider this year.

Somebody coined the phrase a few days ago about shooting with "real bullets." Well, I tell you, Mr. President, this is an amendment that shoots with real bullets. It does not make a big difference in the next fiscal year—only $135 billion, which pales by comparison to the colossal proportion of the expected deficit of $200 billion, but over a period of time we are talking about billions and billions and billions of dollars because this, my friends, is one of the so-called uncontrollables.

This is one of those deals that once you get it on the books, it starts small and gets bigger every year until finally it just becomes all consuming. So I think we all owe a debt of gratitude to our colleague from Wisconsin for raising this issue and for bringing to the attention of the Senate the need to somehow step back and take a long, hard, second look at how far we want to go on subsidizing housing in this country.

Since 1962, the Federal Government has spent $102 billion on HUD-subsidized and rural housing. Since 1979, total HUD and rural housing assistance has increased from $7.8 billion to $14.2 billion, an increase of approximately 100 percent in just a very few years.

If anybody thinks that we have been tight-fisted in funding subsidized housing, I urge them to look carefully not only at what we have already spent but what has been committed, what is in the pipeline, what is going to occur automatically even if, as I would hope, we would draw a line and say we are not going to authorize or appropriate any new units of subsidized housing.

The amendment which Senator PROXMIRE and I present today actually has the effect of cutting off just 14,000-and-some new units and 85,000 existing units which will become eligible for section 8 subsidies in fiscal year 1986. It does not sound like it is a very big proposition; we are talking about 100,000 units and, as I mentioned earlier, about $135 million in the next fiscal year, but over the period of years which this will spend out, we are talking about $8.6 billion.

Mr. President, the sort of unforeseen nature of this kind of an appropriation is emphasized by the fact that while the bill presented to us by the subcommittee is under the budget resolution in outlays, it is some $7 billion above the administration request in budget authority. It is because of this very long spending of programs of this kind.

Mr. President, I do not see any real reason to argue this at length, but I do want to make a few points about the nature and scope of the commitment we have made to subsidized housing.

Today, there are 6.1 million units of subsidized housing which provide housing assistance through the Federal Government to more than 13 million people in this country. I think the threshold question we should ask—and which I have submitted to some of the experts in this field—is whether or not we have enough units of subsidized housing already to fulfill the needs of anybody who, by a reasonable definition, is housing-poor. I think the answer to that, at least to my satisfaction, is that we have plenty of such units.

Does that mean that everybody who needs one is able to get it? The answer is, "No," because the way we have distributed the money has been not to those who are most in need, but to a spectrum of people—in fact, a majority of the funding for subsidized housing has gone, is going, and will go in the future, under the present guidelines, to people who, by any reasonable standard or definition, are not needy.

However, that is not the issue. The question is, Do we have an adequate supply of federally subsidized housing? I suggest that when we talk about 4.4 million HUD-subsidized units and 1.7 million subsidized rural housing units, that is a big inventory in our country, a rich and prosperous country, where most people, in the routine of business, are expected to provide their own housing, in a private economy which expects people to provide their own housing.

In addition, between 1980 and 1985, 1.65 million new units of subsidized housing were provided: 980,000 HUD units and 670,000 rural housing units.

As Senator PROXMIRE pointed out earlier, the backlog of HUD-assisted housing units that will become available in fiscal year 1986 alone is enormous. Even without adding 1 single unit in fiscal year 1986, it is estimated that there will be 48,120 elderly housing units either reserved or under construction at the end of fiscal year 1985; 12,081 Indian housing units either reserved or under construction as of October 1 of this year; 3,978,000 newly eligible section 8 subsidized units available at the end of the current fiscal year, rising to 4,164,000, without the addition of the new units proposed in this bill.

So my point is very simple, in support of the Proxmire-Armstrong amendment: That we have already done a very generous allocation of subsidized housing. Long before this bill ever came to the floor, we had provided not only generously, but also, in the opinion of many people, including the Senator from Colorado, extravagantly for the needs of subsidized housing in this country, particularly considering the fact that many of these units go to people who are not in the poverty classifications or who are not, by a reasonable standard, needy of housing assistance.

Considering that, considering the enormous number of units which are in the pipeline and which will go forward, it seems to me only prudent to adopt the Proxmire-Armstrong amendment, which will draw the line and say that, at least for a brief time, we are going to step back and pause and not commit further to these housing programs.

I want to sum up by pointing out again that we are talking about real money here. It does not spend out very fast, and that is the insidious part of these long-term commitments where you get the Government on the hook for something that is authorized and appropriated and does not spend out very much this year, not too much the next year, but over a long time has a dramatic effect upon the soundness of our Government.

Sometimes we find ourselves debating what we are gcing to do about the

debt limit or the Gramm-Rudman amendment or the line-item veto and various proposals to get the budget under control; and we wonder how we got into the mess, into a situation where we are precommitted, before the start of a fiscal year, to those enormous expenditures. They are said to be uncontrollable. The way we do it is exactly in programs like this.

This is not only a typical program; it is one of the largest. It is one of the programs most out of control, in my opinion. Here is a chance to make a modest amendment, one which will not be hurtful to anybody, which will throttle back a fairly small number of units being added to the housing stock, which will save $135 million in fiscal 1980; and by doing so, we will save more than $7 billion during the ultimate spendout period of these housing programs. To do so will take us back to the level of HUD-assisted housing programs proposed by the administration.

I do not have a current advisory from the administration as to whether or not they support this amendment. I assume that to be the case, since the effect of the amendment which Senator PROXMIRE and I have presented is to go back to the original recommendation of the administration.

With that word of explanation, Mr. President, I am ready for the vote at the right time, which would be after the Durenberger amendment.

Mr. President, have the yeas and nays been ordered on this amendment?

The PRESIDING OFFICER. They have not been ordered.

Mr. PROXMIRE. Mr. President, I ask for the yeas and nays on the Armstrong-Proxmire amendment.

Mr. ARMSTRONG. It occurs to me, I say to the Senator from Wisconsin, that it may be that we are premature in asking for the yeas and nays, because perhaps the managers would be disposed to accept this amendment.

Mr. GARN. Mr. President, I say to the Senator from Colorado that I, personally, would be willing to do that; but I would expect a lot of opposition to my agreeing to that.

Have the yeas and nays been ordered?

Mr. ARMSTRONG. We are asking for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GARN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GARN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GARN. Mr. President, I further ask unanimous consent that a vote occur on the Proxmire amendment immediately following the disposition of the Durenberger amendment and that no amendment whatsoever be in order to the Proxmire amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GARN. Mr. President, I move to table the Durenberger amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Utah to lay on the table the amendment of the Senator from Minnesota.

On this question, the yeas and nays have been ordered, and the clerk will call on the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Nevada [Mr. LAXALT] and the Senator from Maryland [Mr. MATHIAS] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Hawaii [Mr. MATSUNAGA] is necessarily absent.

I also announce that the Senator from Michigan [Mr. LEVIN] is absent because of death in the family.

The PRESIDING OFFICER (Mr. NICKLES). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 39, nays 57, as follows:

[Rollcall Vote No. 227 Leg.]

YEAS—39

Armstrong	Goldwater	Proxmire
Bentsen	Gorton	Quayle
Boschwitz	Gramm	Roth
Bradley	Hatch	Rudman
Chafee	Hatfield	Simpson
Cochran	Hecht	Stennis
Cranston	Helms	Stevens
Danforth	Humphrey	Symms
Dole	Lugar	Thurmond
Domenici	Mattingly	Trible
Eagleton	McClure	Wallop
East	McConnell	Warner
Evans	Nickles	Weicker

NAYS—57

Abdnor	Garn	Melcher
Andrews	Glenn	Metzenbaum
Baucus	Gore	Mitchell
Biden	Grassley	Moynihan
Bingaman	Harkin	Murkowski
Boren	Hart	Nunn
Bumpers	Hawkins	Packwood
Burdick	Heflin	Pell
Byrd	Heinz	Pressler
Chiles	Hollings	Pryor
Cohen	Inouye	Riegle
D'Amato	Johnston	Rockefeller
DeConcini	Kassebaum	Sarbanes
Denton	Kasten	Sasser
Dixon	Kennedy	Simon
Dodd	Kerry	Specter
Durenberger	Lautenberg	Stafford
Exon	Leahy	Wilson
Ford	Long	Zorinsky

NOT VOTING—4

Laxalt	Mathias
Levin	Matsunaga

So the motion to lay on the table amendment No. 784 was rejected.

Mr. GARN. Mr. President, I move to reconsider the vote by which the motion was rejected and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GARN. Mr. President, I would like the attention of my colleagues. May we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. GARN. Mr. President, I ask unanimous consent to proceed for 2 minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. GARN. Mr. President, I would like some of my colleagues to listen to what went on in the debate earlier today. As former mayor of Salt Lake City and an officer in the National League of Cities, I lobbied hard with Pete Wilson, Dick Lugar, and others for the enactment of general revenue sharing. I think it is a mistake to do away with it. I take a back seat to no one in the principle of self-determination in deciding how that money should be spent.

On the other hand, I was faced with being $1.7 billion under an authorization or $800 million over and I can get $300 million out of housing and save $900 million in outlays. It was an outlay program, with a lot of programs that take 30 or 35 years to spend out.

The only two areas that you can possibly get the outlay areas that we are talking about is in revenue sharing and in veterans health care, neither one very nice to talk about.

But we voted for a budget resolution and now we are saying we are not going to comply with it. The choice simply is between general revenue sharing, which I dislike voting against, or take $200 million out of veterans health care, money out of Superfund, out of EPA, out of NASA, because the 2.4 percent across the board cut is rather indiscriminate.

This subcommittee spent a lot of time trying to surgically cut everybody across the board to come up with what was as fair as possible.

So if you want to go ahead and adopt the Durenberger amendment, so be it, but then the Budget Committee, not me, will come up with an across-the-board cut and you have the choice of voting for all of those other cuts indiscriminately, and some agencies that I think a lot of Senators support very much. I certainly do not want Superfund cut. I do not want VA medical care cut any more. It is a distasteful choice. But I had to choose between cutting revenue sharing and cutting

all of those other agencies within my budget.

I wanted to explain that so that everybody knew what the choices were. If the Durenberger amendment is adopted we will face a 2.4-percent cut across the board, which will harm everyone and will do an injustice to a lot of programs that an overwhelming majority of the Senators support.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that I may be permitted to respond for 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURENBERGER. Mr. President, the chairman of the committee has a difficult task which we have all acknowledged. But the issue is not whether or not my amendment is faithful to the budget resolution. My amendment is faithful to the first budget resolution we all adopted. It is not an alteration of that resolution. The first budget resolution contemplated the elimination of the General Revenue Sharing Program in fiscal 1987. When the resolution came to the Finance Committee, the authorizing committee, we met the reconciliation goal of $22.1 billion in spending reductions. We eliminated the General Revenue Sharing Program after fiscal 1986.

When it ended up in the Appropriations Committee where it had to compete with slower outlay programs than revenue sharing, or where it had to compete with allegedly politically popular programs, there was an alteration. Instead of taking 2.4 percent out across the board from all programs, as the Senator now suggests, they took 12.5 percent out of programs designed to meet the needs of people in townships, cities, and counties all over this country.

So I submit that is a question of whether you support that program, whether you support evenhandedness, and whether you support the budget resolution. I urge you to support the budget resolution. I urge you to support evenhandedness. I urge you to support general revenue sharing.

Mr. President, I move to table the motion and ask for the yeas and nays.

Mr. DOMENICI. Mr. President, will the distinguished——

The PRESIDING OFFICER. Is there a sufficient second?

Mr. DOMENICI. Mr. President, I ask unanimous consent that I be permitted to speak for 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, what the distinguished Senator proposes is that we reinstate the 12 percent cut in general revenue sharing. What he said about the budget resolution is true only to the extent that we made many assumptions in the resolution. As I have said, these assumptions are not binding on the appropriators. I have to say that the Appropriations Committee, under the leadership of Senator HATFIELD, has tried to make every one of the subcommittees come into compliance with the budget on both budget authority and outlays. As we are all aware, outlays create deficits, not budget authority.

The HUD Subcommittee was $800 million in outlays over the budget resolution. On their own motion today, they brought the bill into compliance with the resolution. To do that, they have taken cuts in Indian housing, HODAG, operating subsidies, CDBG, veterans medical care, Superfund, and others.

In addition, in order to reach a total reduction of $800 million in outlays, the subcommittee had to cut 12.5 percent from general revenue sharing.

My colleagues can vote to reinstate it. If they do reinstate it, this bill will be $571 million over the budget before we even go to conference with the House. That is the simple fact.

If someone has a better option than the chairman and the ranking member they should offer it. I do not have one. I have no alternative other than to tell my colleagues that we are putting the Appropriations Committee over the budget resolution by nearly $600 million. And we still have many more appropriations bills to consider.

If we bring spending down through across-the-board reductions, general revenue sharing will be included. It may not be a 12.5-percent reduction, but clearly, programs that are in need are going to be hurt as much as the cities. Veterans are going to be cut and cut dramatically. We have already cut veterans by $200 million from the Senate reported spending level.

Mr. President, I submit that our choices are real even if you do not like the notion of Gramm-Rudman, this is exactly why we need it.

Mr. DURENBERGER. Mr. President, I renew my motion to table and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Minnesota to table the motion of the Senator from Utah to reconsider the vote by which the Senate failed to table the Durenberger amendment. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Arizona [Mr. GOLDWATER], the Senator from Nevada [Mr. LAXALT], and the Senator from Maryland [Mr. MATHIAS] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Michigan [Mr. LEVIN] is absent because of death in the family.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 57, nays 39—as follows:

[Rollcall Vote No. 228 Leg.]

YEAS—57

Abdnor	Glenn	Melcher
Andrews	Gore	Metzenbaum
Baucus	Grassley	Mitchell
Biden	Harkin	Moynihan
Bingaman	Hart	Murkowski
Boren	Hawkins	Nunn
Bumpers	Heflin	Packwood
Burdick	Heinz	Pell
Byrd	Hollings	Pressler
Chiles	Inouye	Pryor
Cohen	Johnston	Riegle
D'Amato	Kassebaum	Rockefeller
DeConcini	Kasten	Sarbanes
Denton	Kennedy	Sasser
Dixon	Kerry	Simon
Dodd	Lautenberg	Specter
Durenberger	Leahy	Stafford
Exon	Long	Wilson
Ford	Matsunaga	Zorinsky

NAYS—39

Armstrong	Garn	Proxmire
Bentsen	Gorton	Quayle
Boschwitz	Gramm	Roth
Bradley	Hatch	Rudman
Chafee	Hatfield	Simpson
Cochran	Hecht	Stennis
Cranston	Helms	Stevens
Danforth	Humphrey	Symms
Dole	Lugar	Thurmond
Domenici	Mattingly	Trible
Eagleton	McClure	Wallop
East	McConnell	Warner
Evans	Nickles	Weicker

NOT VOTING—4

Goldwater	Levin
Laxalt	Mathias

So the motion to lay on the table was agreed to.

Mr. GARN. Mr. President, I ask unanimous consent that the order for the yeas and nays on the Durenberger amendment be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment.

The amendment (No. 784) was agreed to.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. GARN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 785

The PRESIDING OFFICER. The question is on agreeing to the Proxmire amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Arizona [Mr. GOLDWATER], the Senator from Nevada [Mr. LAXALT], and the Senator from Mary-

land [Mr. MATHIAS] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Michigan [Mr. LEVIN] is absent because of death in the family.

The PRESIDING OFFICER (Mr. DENTON). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 44, nays 52—as follows:

[Rollcall Vote No. 229 Leg.]

YEAS—44

Armstrong	Grassley	Pressler
Bentsen	Hatch	Proxmire
Boren	Hecht	Pryor
Boschwitz	Helms	Quayle
Cochran	Humphrey	Roth
Danforth	Kassebaum	Rudman
DeConcini	Kasten	Sasser
Denton	Long	Simpson
Dole	Lugar	Symms
Domenici	Mattingly	Thurmond
Durenberger	McClure	Trible
East	McConnell	Wallop
Exon	Murkowski	Warner
Garn	Nickles	Zorinsky
Gramm	Nunn	

NAYS—52

Dodd	Lautenberg	Wilson
Eagleton	Leahy	
Evans	Matsunaga	

NOT VOTING—4

Goldwater	Levin
Laxalt	Mathias

So the amendment (No. 785) was rejected.

Mr. GARN. Mr. President, I ask unanimous consent that the distinguished Senator from Mississippi be allowed to proceed to offer an amendment that is going to be accepted.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Mississippi is recognized.

AMENDMENT NO. 793

(Purpose: *To provide for the transfer to the government of the United States of the Mississippi Technology Transfer Center, and for other purposes*)

Mr. STENNIS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Mississippi [Mr. STENNIS] proposes an amendment numbered 793.

Mr. STENNIS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

On page 31, insert the following immediately after line 7:

MISSISSIPPI TECHNOLOGY TRANSFER CENTER

(a) The Congress finds that—

(1) section 9 of Mississippi Senate Bill No. 2984, 1985 Regular Session, which became effective on July 1, 1985, provides appropriations for constructing, furnishing and equipping a building and related facilities, to be known as the Mississippi Technology Transfer Center, at the National Space Technologies Laboratories in Hancock County, Mississippi; and

(2) operation and maintenance of the Mississippi Technology Transfer Center by the Federal Government is in the national interest.

(b) The Administrator of the National Aeronautics and Space Administration may—

(1) enter into an agreement with the State of Mississippi by which title to the Mississippi Technology Transfer Center shall be transferred to the government of the United States and by which such Center shall be operated by the government of the United States;

(2) accept title to such Center on behalf of the government of the United States; and

(3) after title has been transferred under paragraph (2) of this subsection, operate and maintain such Center, subject to the availability of appropriations for such purposes.

(c) It is the sense of Congress that, to the extent practicable, the National Space Technology Laboratories should apply its existing reimbursement policies to occupants of such Center.

Mr. STENNIS. Mr. President, this is a simple amendment which involves no money and which has been cleared by the chairman and ranking member of the Appropriations Subcommittee, as well as the authorizing subcommitte which oversees the National Aeronautics and Space Administration.

Last spring the Mississippi Legislature passed, and the Governor signed into law, a bill which appropriates $4 million to construct, furnish, and equip a building of approximately 50,000 square feet to be known as the Mississippi Technology Transfer Center. The building, which is to be constructed at the National Space Technology Laboratories in Hancock County. MS, will house, among other things, the recently announced NASA Center for Commercial Development of Space Remote Sensing and the new Institute for Naval Oceanography.

Although the State of Mississippi is assuming the entire cost of construction, the legislature has provided that the building be turned over to NASA, to become a part of their facility. However, NASA's legal counsel has advised that their regulations will not allow them to accept the building without congressional approval. This is the single, simple intent of my amendment—to permit NASA to enter into an agreement with the State of Mississippi for acceptance of the building. NASA is in agreement with this action as is evidenced by this letter from Mr. Jerry Hlass, Director of the National Space Technology Laboratories to the Governor of Mississippi.

I hope that there are no objections to my amendment and that it can be accepted as a part of the bill.

Mr. GARN. Mr. President, the amendment has been agreed to by both the minority and the majority sides.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Mississippi [Mr. STENNIS].

The amendment (No. 793) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STENNIS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RECOGNITION OF SENATOR WALLOP

The PRESIDING OFFICER. Under the previous order, the Senator from Wyoming, [Mr. WALLOP], is recognized.

Mr. WALLOP. Mr. President, I thank the Chair.

ABM TREATY

Mr. WALLOP. Mr. President, I have asked for time this afternoon, along with others of my colleagues, to express our dismay that the President of the United States has signed a national security directive which, basically, devises for his country and ours the very double standard he said he would never subscribe to. This is the interpretation of the ABM Treaty which makes it possible for us legally, within the bounds of that treaty, to proceed with the design, the research, the development, and the testing of ABM systems of new physical principles.

Some have quarreled with the idea as to whether or not there is validity in that new interpretation. We have for years followed one of the world's great oxymoron conventional wisdoms. We listened to Gerard Smith ramble on about what it said without realizing that what it said was what was written in the treaty and backed up by a negotiating record and presented in the testimony of that same Gerard Smith and others to the Senate of the United States.

Let me read to you a statement that he made in response to a question from Senator AIKEN before the Foreign Relations Committee in June 1972.

"Senator Aiken, I think it is an entirely different problem with respect to the use of lasers to help guide offensive missiles and, from their use, to guide defensive missiles. But we have

covered this concern of yours in this treaty by prohibiting the deployment"—not the research and development and testing—"the deployment of future type technology. Unless the treaty is amended," the Ambassador goes on to say, "both sides can only deploy launchers and interceptors and radars. There are no inhibitions on modernizing this type of technology except that it cannot be deployed in mobile land-based or space-based or sea-based or air-based configurations. But the laser concern was considered and both sides have agreed that they will not deploy future type ABM technology unless the treaty is amended."

In meeting with some of those opposing the new interpretation, I have confronted them on the Soviet test in June 1982, in which the full command and control techniques and technologies of the Soviet Union for ABM and Asat were tested over a week's period. The answer of the arms controllers has been that that was an ATBM and it is irrelevant to the ABM Treaty. An ATBM, or antitactical ballistic missile, against which the Soviets tested their ABM systems has the same penetration characteristics, flight speeds, and other characteristics, of America's sea-launched ballistic missiles. It is, in fact, a ballistic missile defense and, call it antitactical ballistic missiles, whatever you wish, it is irrelevant to the safety of the American people that these ex-arms controllers can draw a distinction between tactical ballistic missiles and tell Americans to roll over and go to sleep, you are still secure.

As one who first publicly supported a transition to defense in our strategic planning and operations, I have argued for years, Mr. President, that the actual words of the ABM Treaty permit the creation of ABM systems based on other physical principles. And the record shows that in 1972 when our negotiators tried to get it more specific, the Soviets rejected it again and again and again; over months, they rejected it.

So we came home and told ourselves that we had achieved something that we had not. Or in fact we did not tell ourselves any such thing. We told ourselves we had achieved what we had achieved and allowed subsequent commentary to guide us. I believe if you look at the record—and the presentations of Ambassador Smith and others—of the Senate of the United States, there never, ever was the slightest hint that we would be prohibited from moving on. Indeed, the Soviets themselves said that very thing.

There was a response that Ambassador Smith made to Senator Cooper which is as follows: "Well, I think, Senator Cooper, the Soviet Union made it very clear throughout this negotiation that their modernization program should not be interfered with." The recent reevaluation of the treaty by the administration has confirmed a view which I have espoused in the Senate since 1978. The administration announced that it was their view "based on a careful analysis of the treaty text of the negotiating record that a broader interpretation of our authority is fully justified." And in the memorandum they say the same thing. But in the memorandum they also say that we will be bound by a narrower interpretation of a treaty but the Soviets are not bound by that same interpretation.

This is the President who said that we would not have a double standard prescribing for Americans a different standard than for our enemies. This is in the face of a hope which he correctly created in our minds that we could—if we focused our minds, technology, and research—be defended. And it is a moral and just concept of a moral and just President that our money be spent on the things which do not kill people but defend us against the things which kill people. The technology exists.

Those of us who have taken time to study the architecture of such systems, and who have taken time to study the contemporary state of technology of such systems know that it is within the reach of the American people to have such a protection. Will it be perfect? No. Who has suggested that it might be? No one. Will it restore deterrence? Of course, it will by doing the one thing that is lacking in our strategic arsenal right now; that is, the ability to put doubts in the minds of the Soviet planners as to their ability to succeed should it be their desire, God forbid, to initiate nuclear war.

We cannot deter it now. And the new Soviet arms proposals would make us less able to deter it, and yet we find ourselves now bound by a traditional view of a treaty that is not substantiated, first, in the words of the treaty; second, in the negotiating record; and, third, in the presentation of that very treaty to the Senate of the United States. For those who claim that it was and now is simply to perpetrate a fraud on the American people.

Given that Secretary Shultz said on Monday that interpretation, the new interpretation, was a moot point, he then said:

> Our SDI research program has been structured and will continue to be conducted in accordance with the restrictive interpretation of the treaty's obligation.

Such a course does not bode well for our strategic programs. The President's administration has certainly gone more than one extra mile to make sure that not one program, not one penny of the defense budget is being spent to produce or develop any antimissile weapon or any possible component of any antimissile system. The SDI office has with the programs it took over scrupulously purged those previously existing elements that might be used in the foreseeable future to challenge the Soviet Union's ability to deliver nuclear weapons upon the United States or its allies. The list of near term weapons and their components that have been put off or downgraded is long and is instructive of what we could be—but are not—doing to protect ourselves. This is total self-denial, and a review of the treaty text and negotiating record will show it is not required by the treaty.

One need only look at the things that the Soviets are doing which our arms controllers do not, and rightly so—consider violations. Five out of the six large modern phased array battle management radars are perfectly legal as is the seventh even more capable radar at Pushkino. Why? Krasnoyarsk is a violation and that violation is virtually irrelevant to us because it is only the last of the ring of command and control—very handy, very useful but not the critical element in all of this. But the critical element is that the United States is surrounded by a growing threat of a Soviet Union which can protect itself and has ability to deliver death and destruction upon the United States, prevent our ability to retaliate, and thereafter to deter us from even contemplating such an act.

The mass production of the other components of the ground-based ABM system, the flat twin engagement radar, the SA-4, the SA-8 interceptors—all easily transportable—does not violate any part of the ABM Treaty nor do we claim it to. They do it but we say a restrictive interpretation tells us we cannot do the same thing, nor will we. The mass production of the mobile SA-12 system which is very effective against the mainstay of our retaliatory forces, the sea-launched ballistic missiles, transcends the ABM Treaty because the system performs both antiaircraft and antimissile functions in the same mode. At least none of the officials who have blocked us from even considering such a system for ourselves have suggested that the Soviet's mass production of these components violates the treaty. Mass production—not the design and testing of them—we do not claim violates the treaty because it does not. We only claim that it prevents us from doing the same thing in behalf of our own population.

The intelligence community tells us about the Soviet's massive building program associated with strategic defense. Since no one in the administration is calling these things violations we must presume that they are not or do not consider them to be. We are not even mentioning the development of rapidly reloadable launchers equipped

with who knows how many SA-8's around Moscow. This is a tiny part of the problem compared with the open production lines that keep on disgorging equipment. Even if we do not consider these activities together with the ones with which the administration has called violations they add up to an approach in the Soviet Union to the ABM Treaty which is diametrically opposed to the purist "extra mile" approach that this administration is pursuing. As Ambassador Nitze and countless other spokesmen have explained, the intention of American arms controllers who negotiated the ABM Treaty was to abolish defenses against missiles. This administration is adhering integrally to this stated original intention of American arms controllers, even more than to the treaty's legal terms. They did not get what they intended to get when they negotiated the treaty. And now they get it for having said it for 12 years, even though we cannot, and will not, call the same activities on the part of the Soviet Union a violation.

So the double standard is complete, Mr. President. The enthusiastic supporters of the concept of doing something at last had hopes of providing some protection to the American people. Since 1978 I have advocated this as a moral way for our country to go as well as an effective way for our country to go. By and large, it has been gradually accepted that there is truth in this. The supporters create a hope, give speeches, and say to the American people, "We can provide you with protection if you will fund it."

Now we are saying we will not. We are going to design a program to test rifles that may or may not shoot because we never take them off the drawing board until the day we build them. I weep for this day because it is not for lack of a technical capability that we are able to go out and provide for protection of the American people; it is for a lack of will. That lack of will endangers the peace and security of the world, of Europe, but more importantly it endangers this country and its people when they need not be.

As a narrow interpretation, is it the double standard that the President says he stands for? It is not one that has been insisted upon.

Mr. President, as my time draws to a close, I, as the original supporter of this program and still an advocate, must carefully consider whether there is any point in my voting for future funding for a program that is so constrictive as to be ineffective, incapable of dealing with the future needs of the defense of the American people.

Perhaps if we go back and spend the money on new missiles and not on protection, and embrace the doctrine of mutual assured destruction, which the Soviets have not embraced. I do not know what we do, except to realize we have been put in harm's way by a decision which is not required by the judgments of international law, not required by the commitments of the people of the United States, and not required by the ratifications of Senators and the signatures of Presidents.

The PRESIDING OFFICER. The Senator has 3 minutes to speak under the special order.

Mr. WALLOP. Mr. President, this Senator is prepared to yield at this point. I will also ask, since the Senator from Utah [Mr. HATCH] is unable to be here, that this time be yielded to the Senator from Idaho [Mr. MCCLURE].

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR QUAYLE

Under the previous order, the Senator from Indiana [Mr. QUAYLE] is recognized for not to exceed 15 minutes.

Mr. QUAYLE. Mr. President, it is with great reluctance that I join my colleague from Wyoming in expressing strong dismay at the recent policy decision of our administration concerning the ABM Treaty. I am not reluctant to join my good friend from Wyoming because I join him on national security matters almost all the time, but I guess we would prefer to have intramural squabbling with my administration be kept within the family and not have to have public pronouncements and get out and air the dirty linen.

I would always prefer to keep it that way. My style is to work in that fashion.

However, every once in a while issues come along that are so important that you have to make an exception to the way you prefer to conduct business.

This unfortunately is one of those occasions, Mr. President. This will not be the first time nor will it be the last time that we will be discussing the ABM Treaty and its implications here on the floor of the Senate. It will not be the last time that the administration will be forced to make the legal interpretations or policy determinations of this treaty as relates to the strategic defense issue.

But I believe that in the last couple of weeks transactions have been so convoluted that those of us who have been the strongest supporters of this administration, the strongest supporters of the strategic defense initiative [SDI], are going to have to take our case to the American people that the policy determination of this last week to restrict SDI testing and development is fundamentally wrong.

Ironically, the administration is absolutely right—absolutely correct—in its legal interpretation of how the ABM Treaty applies to the strategic defense initiative. It is correct in its interpretation of agreed statement D which covers the development of advanced ABM systems based on physical principles other than those associated with conventional ABM systems current in the year 1972. What agreed statement D allows as the administration rightly notes is not only laboratory research of advanced space, sea, air, and land-based mobile strategic defenses but field testing of full-scale prototypes of these systems as well.

Further, it says that if we are going to have deployment of these capabilities, there must be further discussion.

This is proper interpretation, one that the State Department, the Department of Defense, the National Security Council, and the President all agree to. There is no dispute in the administration family upon this legal interpretation.

But what is at dispute is, will our policy and the SDI testing and development program be predicated upon a rightful interpretation of the ABM Treaty and how it relates to SDI?

The current policy is that we will not do what the ABM Treaty clearly allows us to do in the way of research, development, and testing.

Our policy, apparently, will be, as the Secretary of State said in San Francisco, one that will restrict SDI systems development just to research within the laboratory; a restrictive policy that will prevent the United States to go forward with SDI as it should.

Mr. President, what this is is the beginning of the chipping away of SDI in this country.

Many people have opposed SDI. Many people like the Senator from Wyoming and the Senator from Indiana have strongly supported it. It is a little bit of an ironic twist that the real beginning of this chipping away of support for SDI happens to also come from those who support SDI, in this case the administration. But the administration is not going to be able to have it both ways. The administration is going to have to come to grips with that I think is a misapplication of its legal understanding of the ABM Treaty and, hopefully, redefine and rethink what its restrictive testing and development policy means.

I believe what the administration has said, what this President has said, and what this Senator has said, that the strategic defense initiative is within our national interest; that it is a hope for the future; that the SDI Program, in fact, is going to perhaps bring a new balance to the strategic forces that we have compared to the Soviet Union.

The President's SDI Program injects the idea of our having defensive capabilities. Why should we not have defensive capabilities? Why do we always have to rely on offensive capabilities—the hair-trigger ICBM's that are not defended, that encourage such a destabilizing climate?

Yes, Mr. President, I agree that SDI is important and is in our national interest. The President has also said that SDI is not a bargaining chip, that we are not going to negotiate this away at Geneva—no way is this a bargaining chip. It should not be a bargaining chip. If SDI proves out, as we think it will, it will provide technology in a defensive capability that we will want to have, that our allies will want to have, and that eventually—that the Soviet Union already has and will have—and it will provide for a more stable geopolitical situation.

This is not a bargaining chip. Yet the administration's current policy of restricting SDI research and development testing has already given a good chunk of SDI away. It makes us look like fools. We have not gotten to Geneva yet and here we are, unilaterally making these restrictive decisions, by ourselves, on a treaty that the Soviets violate. There is no doubt in anybody's mind that the Krasnoyarsk phased array radar is a violation of the ABM Treaty. Yet we come up with a policy that says that we could test SDI systems more aggressively under the treaty, but as a matter of policy, we are going to restrict our development and field testing of SDI systems and component prototypes.

I ask Members of this Chamber, if the administration thinks the Soviets will impose such a restrictive interpretation of what is permitted by the treaty on themselves. Nonsense, nonsense: that is what this policy is, in my opinion.

Mr. President, unfortunately, this is now the policy of this administration. But I, as will the Senator from Wyoming, am already working very hard to get an understanding and perhaps to get a different policy than what I believe that policy is today.

We will be working for this on this floor, I personally shall be working in the Armed Services Committee to see what in fact can be done about getting a different policy understanding of this restrictive interpretation of the ABM Treaty and its relationship to SDI. As a person who has supported SDI and as a person who will continue to support SDI, its research, its testing, and its development until we have the technology to make the determination of whether we are going to go to deployment, I shall continue to strengthen the administration's policy concerning SDI testing and development. But if I am thwarted and if others and I are denied the possibility of going forward with SDI as we think it should go forward—which is the best capability that the West has in providing for deterrence, stability, and peace—then I, along with others, shall be forced to reconsider what we should be doing with SDI under a very restrictive policy decision.

Mr. GORE. Mr. President, will the Senator yield?

Mr. QUAYLE. I am glad to yield to my friend.

Mr. GORE. I appreciate the Senator's courtesy. Normally, we do not have special orders during the day, but I happen to agree that this subject is so important, it should receive some time on the floor.

As the Senator knows, my views on this matter are different from his, but because it is the middle of the day and the subject is being aired, I wonder if it might be appropriate and if the Senator will yield for just a few minutes for the other side to be presented—and I shall be very brief on this. Personally, I believe, as do many others—did the Senator wish to interject?

Mr. QUAYLE. Mr. President, I shall give 1 or 2 minutes and that is about it. The other side has been heard amply on this question, in my opinion. If the Senator wants 1 or 2 minutes of this time, he is welcome, but he will have to go on somebody else's time.

The PRESIDING OFFICER. The Senator from Indiana is informed that he has 1 minute left.

Mr. QUAYLE. I have 1 minute left. Maybe somebody else will be able to yield a couple of minutes. The other side, I think, has been and will be heard amply.

Mr. GORE. Not in this debate, Mr. President, but I understand the Senator's position.

Mr. QUAYLE. Mr. President, to conclude, again, the administration took a very positive step forward in its legal interpretation of what the ABM Treaty permits. It is a right interpretation and it goes against the policies that were based on the incorrect interpretation of the past. In fact, we found out, by going back and reading the record, that it was the United States that wanted to prohibit future technologies, emerging technologies, and other things, but that the Soviets rejected our proposed bans on future ABM systems out of hand. That is where agreed statement D comes into effect. Agreed statement D clearly allows the research, the testing, and the development of advanced ABM systems.

Since that is what it allows and since we are going to comply with the ABM Treaty, our policy ought to reflect that interpretation. Unfortunately, our policy does not reflect that interpretation. So this issue will not go away. It will be with us. We shall debate it, I am sure, a lot this fall. The Senator from Tennessee and others will be joining in from time to time. We shall welcome the debate in the spirit of competition of ideas and the cordiality that we will, in fact, extend throughout the debate.

The PRESIDING OFFICER. Under the previous order, the Senator from Idaho [Mr. McCLURE] is recognized for 15 minutes.

Mr. GORE. Mr. President, will the Senator yield briefly?

Mr. McCLURE. Mr. President, how much time does the Senator want?

Mr. GORE. I ask the Chair if it is in order to ask unanimous consent to proceed for 5 minutes. That is not very long. We have had ample airing of some views. We are going to hear others. Yet there is another side to this. Would it be in order for me to ask unanimous consent to be able to speak for 5 minutes at this time?

The PRESIDING OFFICER. Any unanimous consent is in order. However, by previous unanimous consent, we have allotted 15 minutes to four speakers, the third of which is about to commence for 15 minutes. So the Senator may pose a unanimous-consent request.

Mr. McCLURE. I wonder if the Senator will withhold that because I think the leadership established this time with the expectation that it will be limited to 1 hour and displaced another matter. Perhaps the Senator will have an opportunity to find out if the leadership has objection. I shall have no objection as long as it is not charged to my time.

Mr. GORE. Mr. President, I ask unanimous consent that I be allowed to speak for 2 minutes at this time.

Mr. McCLURE. Mr. President, a parliamentary inquiry and reserving my right to object, that will not be charged against my time?

The PRESIDING OFFICER. That is correct. If there is no objection.

The Senator from Utah.

Mr. GARN. Mr. President, I am not involved in this discussion. I have not even been listening to it. But normal procedure on special orders is that they are ordered for that purpose, to give Senators 15 minutes of uninterrupted time. Any Senator can request any time he wants for any day and it is granted. This is going to come right in the middle of the HUD bill. I am going to object.

It is nothing personal against the Senator from Tennessee. We have to get back to the HUD bill and finish it today. I was promised when this section was put in that we would immediately go back to it and I therefore object to any extension of time to anybody, with the importance of getting the appropriations bill passed. I object.

Mr. GORE. Will the Senator from Idaho yield?

Mr. McCLURE. Mr. President, I thank the Senator from Utah. I say to my friend from Tennessee that if I cannot yield at this time, we shall see if, at the termination, there is any time.

Mr. GORE. Will the Senator yield 1 minute for a briefest hint from the

other side of this question which is being debated at such length in the middle of the day?

Mr. McCLURE. Excuse me; I did not understand the question.

Mr. GORE. Will the Senator yield for 1 minute?

Mr. McCLURE. I will yield 1 minute of my time to the Senator from Tennessee.

Mr. GORE. I appreciate the Senator's courtesy. I know his time is limited and I agree with the Senator from Utah that this procedure is unusual, but I think the record should reflect that the majority opinion is an opinion expressed by administrations of both parties for 13 years, including this administration up until very recently. The proposed reinterpretation of the ABM Treaty is in my view totally and completely preposterous. Article III limits ABM systems to land-based, fixed systems, article V prevents development, testing, or deployment of sea-based, air-based space-based or mobile land-based ABM systems or components thereof, and agreed statement D, which specifically references article III in its language, was designed to deal with the potential for high-energy lasers being used in fixed, land-based ABM sites. It was intended to plug a loophole, not to open up a Grand Canyon; otherwise the interpretation would have to be that we are prevented from space-based ABM systems with the technology of 1972 but space-based systems with all other kinds of new technology are perfectly legal. That is preposterous.

The PRESIDING OFFICER. The Senator's 1 minute is up.

Mr. GORE. I thank my colleague for yielding.

Mr. McCLURE. The Senator from Tennessee is certainly entitled to his opinion as to what the language is or ought to be, but I certainly reject out of hand the notion that it is preposterous to arrive at a correct interpretation of a treaty language that is fully supported by the treaty and by all of the negotiating history. As a matter of fact, that is not primarily what I intend to talk about, nor will I shift my emphasis primarily to that point, but I think it would be preposterous of us to assume that the reevaluation, the reading of the history that sheds a correct light on treaty interpretation is an erroneous exercise. As a matter of fact, that study has been going on for weeks and months, and the people who made the study have gone back and read every word of the negotiating history, which I doubt very much the Senator from Tennessee has done, and they arrived at the conclusion, after that exhaustive review that, indeed, we had been laboring under a misapprehension for 12 years. I mention that primarily because it was raised by others here, but also because I think it is important for us to recognize one of the pitfalls of the negotiating process; that those who negotiate sometimes try to get a provision which is rejected and they so badly wanted it to be there that they then interpret the language to mean what they desired it to mean. I think the history is crystal clear that it is precisely what happened in this instance; they desired to have a limitation which was not possible to obtain by negotiation, so they represented to us and the American people, they represented to the Senate in the ratification, that it expressed what they wanted it to express, not what it did express.

I agree with my distinguished friend from Indiana that it makes no sense at all for us to have correctly interpreted the document and then restrain our program based upon an erroneous interpretation.

Mr. WALLOP. Will my friend yield for one observation?

Mr. McCLURE. I will be happy to yield to my friend from Wyoming.

Mr. WALLOP. I think not only the negotiating record but the presentation to the Senate as well will show that it did not contain these constraints that the traditional interpretation has held. Some did but most did not, and most quite carefully did not. It was only after the books started coming out that the new interpretation which has bound us these years became conventional wisdom.

Mr. McCLURE. I thank the Senator for that addition. I think it is somewhat doubtful as to what is really intended by the administration at this time. I suspect what we are witnessing is an internal struggle within the administration for contesting points of view. The administration is made up of many people, not just one. We elect the President and he selects people to be around him, and those people do not always have identical points of view with each other or with the President. When the President is confronted with a decision that he has to make, he chooses a position and enunciates it. I think there is some ambiguity—it may be artful and it may be inadvertent, but there is an ambiguity now as to the administration's position. I share fully with my friend from Indiana the determination to make certain that this argument is settled in an appropriate way that allows us to develop the SDI along the lines the President has outlined to us and which has gained the support of so many people in this body and across the country.

The President reaffirmed in an appearance in Boise, ID, on Tuesday, that SDI is not negotiable, it is not at Geneva on the tables, it will not be negotiated away, and it is his full intention to proceed with the development of the system. Later that day, in Milwaukee, WI, he said the same thing. That was on Tuesday of this week after the other events which occurred over the last 2 weeks took place. So whatever else may be said, the President of the United States—I believe he still is the President—and I believe he was elected by the American public, and he is the head of this administration in spite of the disagreements that others may have with him—says we are going to develop an SDI system.

Now, that term may be ambiguous and there will be those who contest that development means only research, the laboratory work that sometimes is culminated by computer printouts. I suspect the Soviet Union is very, very impressed by computer printouts; they try to get our computers all the time. I suspect that they would be initimidated by the research, but I suspect they would have more respect for hardware. And there will be others within the administration and outside like the Senator from Idaho who will argue that there is no development unless you test the hardware. You cannot depend just on laboratory work, and I for one would question very seriously the expenditure of millions upon millions of dollars for research within laboratories that produce nothing but computer analyses. I am not at all convinced, as I stand here today, that the expenditure of millions of dollars is justified that does nothing more than provide the scientific background for the development of a system. I do not believe that the term "development" as appropriately interpreted could possibly mean just the laboratory work. As important as the laboratories are, as learned as the scientists are, as impressive as their technology might be in terms of concepts, there is no program until there has been some hardware developed, and there is no program developed until there is some testing of that hardware.

And so, Mr. President, there is the ambiguity which must still be tested, and that ambiguity must be resolved. And it is not enough to say, "Well, we would not be ready to deploy a system for several years. We could make that decision then. There will not be systems to test for several years, and therefore we should not decide it now." For some of us, it is essential to decide that now, before we commit millions of dollars to what otherwise might be a futile gesture of employing scientists and deploying nothing, of gaining nothing other than making work for bright Ph.D.'s. I submit that the millions of dollars that might be spent could well be wasted if that is all we do.

So I commend the Senator from Wyoming and the Senator from Indiana for the lead they have taken not only in this discussion today but also in the discussion earlier. It is a serious

matter, and I think it is important for us to understand the seriousness; because I believe it is moral for us to erect defenses, that it is proper for us to be able to have a President of the United States say, "I will defend our people by keeping them from being killed," rather than saying that his only option is, "I will defend my people by killing millions of defenseless people in another country."

Whatever "mutual assured destruction" may have meant at the outset, it is a doctrine whose day has gone. It has served us well. It has perhaps preserved the peace. But it has not deterred the arms buildup.

If you look at the treaty negotiations, if you look at the treaties as negotiated and ratified or not ratified by this body, if you look at the constraints or the activities in armaments since the treaties were adopted, that has not stopped the arms race.

The treaties and the doctrine have not deterred the continual exponential increase in the number of nuclear weapons that are in this world today which can be targeted and used. It has prevented us from developing any alternative. It has said: "This is enough. No shield; no defense. Our people are hostage to your threat; your people are hostage to ours. You kill our millions; we will kill your millions." That balance of terror which was supposed to have constrained aggressive actions, has allowed the most massive weapons buildup in the history of mankind.

It is time for us to say that although that may have been honored during this period and it may have succeeded during this period, it is not succeeding anymore and it will not succeed in the future.

We have to find a way to limit the growth and proliferation of nuclear weapons, not guarantee that they are the only weapons available for the defense of mankind by destroying mankind.

I think it is moral for us to seek a way to abort this constant increase in the number of nuclear weapons and their capacity to kill people. I think it is a legitimate debate.

As to the people who are on the other side of the debate, I think it is incumbent on them to show why it is wrong to prevent the killing of millions of people, rather than expose millions of people to that destruction. That is why I say that the ambiguity which has been now erected about SDI in the interpretation of the ABM Treaty is absolutely fundamental to our decision to move forward. I do not see how it is possible for us to say that we are going to abandon the moral principle of developing a defense, but we will not decide that now. For us to say that we are embarked upon a change of strategy and then have no change in strategy at all seems to me to be an anomaly that falls of its own weight.

For that reason, I and others will question, properly question, what that ambiguity means and seek to have that ambiguity resolved in a way which will allow us to do the scientific work, to develop and test that scientific work and those systems, short of deployment. That is what the interpretation of the ABM Treaty means today.

Finally, Mr. President, I think it is important for us, as we look at that, to keep in mind the lessons that are inherent in the negotiations and the interpretation of the meaning of language that may be in those bills. It is important for us to recognize both the strengths and the limitations of the negotiating and the treaty processes, and we should not be naive about where we are. We should recognize the trap that can be set if we are not very careful in the implementation of treaties that were negotiated some years ago, and we should be very willing to analyze both treaties and their implications for the world in which we live. That is particularly true of the ABM Treaty.

SALT I and SALT II, whatever their strengths or weaknesses, were time limited—unwisely, I think. Congress and the administration have failed to recognize the time limitations of those treaties. But the ABM Treaty was intended to be in force until changed.

Finally, we should look, too, at what I think the President very properly enunciated as proportionate response to Soviet treaty violations—not total abrogation of the treaties, but a response that is necessary to correspond to the increased threat to our national security because of violations by the other side. If, as a matter of fact—and I believe it is a fact—Soviet treaty violations have threatened our security in this field, we should not be constrained by the letter of the treaty, let alone an erroneous interpretation of the treaty. I think we are entitled to defend ourselves.

The PRESIDING OFFICER. The time of the Senator has expired.

The Senator from North Carolina is recognized.

Mr. HELMS. Mr. President, the distinguished Senator from Utah indicates that he has a very tight schedule and would like to speak now, but that would consume the remainder of the time allotted.

On the presumption that I may be able to get unanimous consent, which I will clear with the majority leader, I will defer to the Senator from Utah and let him take the next 15 minutes.

The PRESIDING OFFICER. The Chair inquires whether the Senator from North Carolina is yielding his time on the presumption that there will be a unanimous-consent agreement.

Mr. HELMS. Yes, the Chair is correct.

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Mr. President, I do not intend to take all the Senator's time.

I am extremely concerned about events which have occurred over the last couple of weeks—the back-and-forth maneuverings within the White House and back-and-forth changes of position by the White House, the State Department, the Defense Department, and others.

Mr. President, we are talking about the survival of our country. We are talking about strength at the bargaining table. We are talking about one of the most important initiatives this country has ever offered, that any President has ever offered.

I suggest that those of my colleagues who are taking this time today feel very strongly about what has been happening and about the restrictive approaches that this administration announced this past week it has taken with regard to the ABM Treaty—therefore, the restrictive approach they are taking toward the strategic defense initiative. We are all very concerned about that.

Mr. President, ever since the dawn of the nuclear age, people all over the world have been living with the ever-increasing fear of a nuclear holocaust. We have been living with the immoral strategy of two scorpions in a bottle, each deterred from stinging the other for fear that he will die in a counterstring. This strategy of mutual assured destruction, or MAD, is not only mad, based as it is on the threat of mutual suicide, it is worse than mad because it requires an ever more expensive, ever larger stockpile of nuclear weapons and nuclear missiles to make it work.

In March 1983, President Reagan outlined a bold plan designed to put an end to the nuclear threat that has hung over our heads since the end of World War II. The President explained his plan to the American people in the following words: "What if free people could live secure in the knowledge that their security did not rest upon the threat of instant U.S. retaliation to deter a Soviet attack, that we could intercept and destroy strategic ballistic missiles before they reached our own soil or that of our allies?"

The strategic defense initiative is the first essential step toward the realization of the President's ultimate goal. The SDI is a research program designed to examine the promise of effective defenses against ballistic missiles based on new and emerging technologies. The purpose of developing a spaced-based anti-ballistic-missile program is to render nuclear weapons obsolete. Many people have criticized this new plan. They say it cannot be

done. They say the technology does not exist yet. They say it will cost too much. But the critics must not know something that we members of the Senate Intelligence Committee know and that the Soviet Union knows. Look how worried the Soviets are. It has brought them back to Geneva to the arms control talks. It has brought them to agree to a summit with President Reagan. It has caused them to propose in Geneva a 50-percent reduction in nuclear weapons, one of the most dramatic moves the Soviets have ever made in the arms control talks. The Soviets are consumed by SDI. It is all they are talking about.

Significantly, while the strategic defense initiative has been under sharp attack, the Soviets' own strategic defense development program—which has been online for decades—has been relatively unnoticed. In the past 20 years, the Soviets have spent about as much on strategic defense—including missile defense, civil defense, and air defense—as they have spent on strategic offense. According to a recent publication coauthored by Secretaries Weinberger and Shultz, important Soviet activities in developing a system of strategic defense include:

Upgrading and expansion of the world's only operational antiballistic-missile [ABM] system around Moscow; construction of the Krasnoyarsk ballistic missile detection and tracking radar that violates the 1972 ABM Treaty; maintenance of the world's only operational antisatellite [ASAT] system; modernization of their strategic air defense forces; improvements in their passive defenses by maintaining deep bunkers and blast shelters for key personnel, and enhancing the survivability of some offensive systems through mobility and hardening; and, extensive research into advanced technologies for defense against ballistic missiles including laser weapons, particle beam weapons, and kinetic energy weapons.

Mr. President, as Secretary Shultz recently pointed out, the Soviets' own research efforts into SDI technologies such as high-energy lasers, particle-beam, radio frequency weapons, and kinetic energy weapons, long antedate our own. In fact, some of the Soviet scientists most active in signing declarations against our SDI Program are themselves leading the Soviet military research in the same technologies. It is clear that the Soviets' objective is to restrict our efforts to develop an anti-ballistic-missile defense system while they continue to develop their own version of star wars.

At this point, Mr. President, I ask unanimous consent that the pamphlet I referred to, entitled "Soviet Strategic Defense Programs," be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SOVIET STRATEGIC DEFENSE PROGRAMS

(Graphs and charts mentioned in article are not reproducible for the RECORD.)

PREFACE

In March 1983, President Reagan presented a dramatic new vision of a world in which we would no longer have to depend on nuclear weapons to prevent nuclear conflict. He presented that vision, and that challenge, in this way:

What if free people could live secure in the knowledge that their security did not rest upon the threat of instant U.S. retaliation to deter a Soviet attack, that we could intercept and destroy strategic ballistic missiles before they reached our own soil or that of our allies?

The Strategic Defense Initiative (SDI), which the President announced that night, marks the first, essential step toward the realization of his ultimate goal. The SDI is a research program, designed to examine the promise of effective defenses against ballistic missiles based on new and emerging technologies. If such defenses prove feasible, they would provide for a more stable and secure method of preventing war in the future, through the increasing contribution of non-nuclear defenses which threaten no one.

The Strategic Defense Initiative has been the subject of much discussion within the United States and allied countries since its initiation. Such exchanges are essential in our free societies and can only help ensure that the vision behind the research program can be achieved. There has been comparatively little public discussion, however, about the trend in Soviet defensive as well as offensive forces which provides the essential backdrop to the SDI. Indeed, the Soviet Union has intentionally tried to mislead the public about its strategic defense activities.

As this publication documents, Soviet efforts in most phases of strategic defense have long been far more extensive than those of the United States. The USSR has major passive defense programs, designed to protect important assets from attack. It also has extensive active defense systems, which utilize weapons systems to protect national territory, military forces, or key assets. Soviet developments in the area of active defenses fall into three major categories: air defense; ballistic missile defense based on current technologies; and research and development on advanced defenses against ballistic missiles.

Important recent Soviet activities in strategic defenses include:

Upgrading and expansion of the world's only operational Anti-Ballistic Missile (ABM) system around Moscow;

Construction of the Krasnoyarsk ballistic missile detection and tracking radar that violates the 1972 ABM Treaty.

Extensive research into advanced technologies for defense against ballistic missiles including weapons, particle beam weapons, and kinetic energy weapons;

Maintenance of the world's only operational antisatellite (ASAT) system;

Modernization of their strategic air defense forces; and

Improvements in their passive defenses by maintaining deep bunkers and blast shelters for key personnel, and enhancing the survivability of some offensive systems through mobility and hardening.

The following pages examine in detail Soviet programs in defenses against ballistic missiles, air defense, and passive defense. A summary of key Soviet offensive force developments is presented in the annex to this document, since those are critical to an understanding of the impact of Soviet strategic defense programs. Soviet offensive forces are designed to be able to limit severely U.S. and allied capability to retaliate against attack. Soviet defensive systems in turn are designed to prevent those retaliatory forces which did survive an attack from destroying Soviet targets.

Given the long-term trend in Soviet offensive and defensive developments, the United States must act in three main areas to maintain security and stability both in the near term and in the future.

First, we must modernize our offensive nuclear forces in order to ensure the essential military balance in the near term, and to provide the incentives necessary for the Soviet Union to join us in negotiating significant, equitable, and verifiable nuclear arms reductions.

Second, we must act now to start constructing a more reliable strategic order for the long term by examining the potential for future effective defenses against ballistic missiles. The Strategic Defense Initiative is a prudent and necessary response to the ongoing extensive Soviet anti-ballistic missile effort, including the existing Soviet deployments permitted under the ABM Treaty. The SDI provides a necessary and powerful deterrent to any near-term Soviet decision to expand rapidly its ABM capability beyond that permitted by the ABM Treaty. The overriding importance of the Strategic Defense Initiative, however, is the promise it offers of moving to a better, more stable basis for deterrence in the future and of providing new and compelling incentives to the Soviet Union to agree to progressively deeper negotiated reduction in offensive nuclear arms.

The third approach is one of negotiation and diplomacy. We are even now looking forward to a transition to a more stable world, with greatly reduced levels of nuclear arms an denhanced ability to deter war based upon the increasing contribution of non-nuclear defenses against offensive nuclear arms. Toward those ends, we are endeavoring at the negotiations in Geneva to achieve significant, equitable, and verifiable reductions in existing nuclear arsenals and to discuss with the Soviets the relationship between offensive and defensive forces and the possibility of a future transition to a more defense-reliant deterrence.

CASPAR W. WEINBERGER,
Secretary of Defense.
GEORGE P. SHULTZ,
Secretary of State.

INTRODUCTION

In the late 1960s, given the state of defensive technology at the time, the United States came to believe that deterrence could best be assured if each side were able to maintain the ability to threaten retaliation against any attack and thereby impose on an aggressor costs that were clearly beyond any potential gains. That concept called for a reduction by both the Soviet Union and the United States in their strategic defensive forces, the maintenance of a balance between the two sides' offensive nuclear forces, and negotiated nuclear arms reductions which would maintain the balance at progressively lower levels.

In accordance with those principles, the United States exercised great restraint in offensive nuclear arms and at the same time dramatically lowered its defensive forces. Thus, we removed most of our defenses against Soviet bombers; decided to maintain a severely limited civil defense program; ratified the 1972 Anti-Ballistic Missile (ABM) Treaty, which placed strict limits on U.S. and Soviet defenses against ballistic missiles; and then deactivated the one ABM site which we were allowed under that Treaty. The basic idea that stability and deterrence would be maintained if each side had roughly equal capability to retaliate against attack also served as the foundation for the U.S. approach to the Strategic Arms Limitation Talks (SALT) process of the 1970s.

The Soviet Union, however, failed to show the type of restraint, in both strategic offensive and defensive forces, that the United States hoped for when the SALT process began. The USSR has consistently refused to accept meaningful and verifiable negotiated reductions in offensive nuclear arsenals. Since the late 1960s, the Soviets have greatly expanded and modernized their offensive nuclear forces and invested an approximately equal sum in strategic defenses. The USSR has an extensive, multifaceted operational strategic defensive network which dwarfs that of the United States as well as an active research and development program in both traditional and advanced defenses against ballistic missiles. Soviet noncompliance with arms control agreements in both the offensive and defensive areas, including the ABM Treaty, is a cause of very serious concern. The aggregate of current Soviet ABM and ABM-related activities suggest that the USSR may be preparing an ABM defense of its national territory—precisely what the ABM Treaty was designed to prevent.

Soviet offensive and defensive force developments pose a serious challenge to the West. If left unchecked and unanswered, they would undermine our ability to retaliate effectively in case of Soviet attack. The situation would be even more severe if the Soviet Union were to have a monopoly on advanced defenses against ballistic missiles in addition to its sizable offensive and defensive forces. In that case, the USSR might come to believe that it could launch a nuclear attack against the United States or our allies without fear of effective retaliation. At the very least, it might see a realistic chance of successful nuclear blackmail.

THE SOVIET APPROACH

The Soviet emphasis on strategic defense is firmly grounded in Soviet military doctrine and strategy, which call for the following actions in the event of nuclear war:

Destruction and disruption of the West's nuclear associated command, control, and communications;

Destruction or neutralization of as many of the West's nuclear weapons as possible on the ground or at sea before they could be launched;

Interception and destruction of surviving weapons—aircraft and missiles—before they reached their targets; and

Protection of the Party, the State, military forces, industrial infrastructure, and the essential working population against those weapons that survived attacks by Soviet offensive forces.

In pursuit of these goals the USSR puts considerable stress on a need for effective strategic defenses as well as offensive forces. In the Soviet view, the USSR could best achieve its aims in any nuclear war if it attacked first, destroying much of the U.S. and allied capability for retaliation. Defensive measures, both active and passive, would in turn prevent those enemy forces that survived a Soviet first-strike from destroying targets in the USSR.

Marshall V. D. Sokolovskiy, in *Military Strategy*—the basic Soviet strategic treatise, originally published in 1962—defined the aim of Soviet strategic defenses in this way: "They have the task of creating an invincible system for the defense of the entire country. . . . While, in the last war, it was sufficient to destroy 15-20 percent of the attacking air operation, now it is necessary to assure, essentially, 100 percent destruction of all attacking airplanes and missiles."

Soviet offensive and defensive force developments over the past 25 years demonstrate that the strategy articulated by Sokolovskiy still applies. The following pages present a detailed description of the actions undertaken by the Soviets in the area of strategic defenses. In order to explain the totality of the Soviet strategic military effort, a description of offensive force developments is provided in the annex to this document.

DEFENSIVE FORCES

Over the last 25 years the Soviets have increased their active and passive defenses in a clear and determined attempt to blunt the effect of U.S. and allied retaliation to any Soviet attack. Passive defenses are nonweapons measures—such as civil defense and hardening—which protect important assets against attack. Active defenses utilize weapon systems to protect national territory, military forces, or key assets.

Evidence of the importance the Soviets attach to defensive damage-limitation can be traced back to the beginning of the nuclear age. National Air Defense became an independent service in the late 1950s and since 1959 has generally ranked third in precedence within the Soviet Armed Forces, following the Strategic Rocket Forces and the Ground Forces.

By the mid-1960s, two new mission areas—anti-satellite defense and anti-missile defense—were added to the National Air Defense mission. As a result, the Soviet Union has the world's only operational anti-satellite (ASAT) system, which has an effective capability to seek and destroy critical U.S. satellites in low-earth orbit. In addition, Soviet efforts to attain a viable strategic defense against ballistic missiles have resulted in the world's only operational ABM system and a large and expanding research and development program.

The Soviet emphasis on the necessity of research into defenses against ballistic missiles was demonstrated by then-Minister of Defense Grechko shortly after the signing of the ABM Treaty in 1972, when he told the Soviet Presidium that the Treaty "places no limitations whatsoever on the conducting of research and experimental work directed towards solving the problem of defending the country from nuclear missile strikes."

BALLISTIC MISSILE DEFENSE

The Soviets maintain the world's only operational ABM system around Moscow. In 1980, they began to upgrade and expand that system to the limit allowed by the 1972 ABM Treaty. The original single-layer Moscow ABM system included 64 reloadable above-ground launchers at four complexes and DOG HOUSE and CAT HOUSE battle management radars south of Moscow. Each complex consisted of TRY ADD tracking and guidance radars and GALOSH interceptors (nuclear-armed, ground-based missiles designed to intercept warheads in space shortly before they reenter the Earth's atmosphere).

When completed, the modernized Moscow ABM system will be a two-layer defense composed of: silo-based, long-range, modified GALOSH interceptors; silo-based, high-acceleration interceptors designed to engage targets within the atmosphere; associated engagement and guidance radars; and a new large radar at Pushkino designed to control ABM engagements. The silo-based launchers may be reloadable. The new system will have the 100 ABM launchers permitted by the ABM Treaty and could be fully operational by 1987.

The Soviet system for detection and tracking of ballistic missile attack consists of a launch-detection satellite network, over-the-horizon radars, and a series of large phased-array radars.

The current launch-detection satellite network can provide about 30 minutes warning of any U.S. ICBM launch and determine the general origin of the missile. Two over-the-horizon radars directed at the U.S. ICBM fields also could give 30 minutes warning.

The next operational layer of ballistic missile detection consists of 11 large HEN HOUSE ballistic missile early warning radars at six locations on the periphery of the USSR. These radars can distinguish the size of an attack, confirm the warning from the satellite and over-the-horizon radar systems, and provide target-tracking data in support of anti-ballistic missile forces.

The Soviets are now constructing a network of six new large phased-array radars that can track more ballistic missiles with greater accuracy than the existing HEN HOUSE network. Five of these radars duplicate or supplement the coverage of the HEN HOUSE network, but with greatly enhanced capability. The sixth, under construction near Krasnoyarsk in Siberia, closes the final gap in the Soviet early warning radar coverage against ballistic missile attack. Together, the six new large phased-array radars form an arc of coverage from the Kola Peninsula in the northwest Soviet Union, around Siberia, to the Caucasus in the southwest.

The United States is now constructing new ballistic missile early warning radars, known as PAVE PAWS, that are located on the periphery of our territory and oriented outward. Both the U.S. and the USSR, in signing the ABM Treaty, recognized the need for ballistic missile early warning radars. At the same time, they recognized that ballistic missile early warning radars can detect and track warheads at great distances and therefore have a significant anti-ballistic missile potential. Such an ABM capability would play an important role in a nationwide ABM defense, which the Treaty was designed to prevent. As a result, the U.S. and the Soviet Union agreed that future ballistic missile early warning radars must be located on a nation's periphery and oriented outward. In that way, the desirable and legitimate goal of early warning could be advanced while minimizing the danger that an effective nationwide battle management network could result.

The Krasnoyarsk radar is designed for ballistic missile detection and tracking, including ballistic missile early warning, and violates the 1972 ABM Treaty. It is not located within a 150-kilometer radius of the national capital (Moscow) as required of ABM radars, nor is it located on the periph-

ery of the Soviet Union and pointed outward as required for early warning radars. It is 3,700 kilometers from Moscow and is situated some 750 kilometers from the nearest border—Mongolia. Moreover, it is oriented not toward that border, but across approximately 4,000 kilometers of Soviet territory to the northeast.

The Soviet Union has claimed that the Krasnoyarsk radar is designed for space tracking, rather than ballistic missile early warning, and therefore does not violate the ABM Treaty. Its design, however, is not optimized for a spacetracking role, and the radar would, in any event, contribute little to the existing Soviet space tracking network. Indeed, the design of the Krasnoyarsk radar is essentially identical to that of other radars that are known—and acknowledged by the Soviets—to be for ballistic missile detection and tracking, including ballistic missile early warning. Finally, it closes the last remaining gap in Soviet ballistic missile detection coverage. The Krasnoyarsk radar, therefore, is being constructed in direct violation of the ABM Treaty.

The growing Soviet network of large phased-array ballistic missile detection and tracking radars, of which the Krasnoyarsk radar is a part, is of particular concern when linked with other Soviet ABM efforts. Such radars take years to construct; their existence might allow the Soviet Union to move rather quickly to construct a nationwide ABM defense if it chooses to do so. The Soviets are also developing components of a new ABM system which apparently are designed to allow them to construct individual ABM sites in a matter of months, rather than the years that are required for more traditional ABM systems. Soviet activities in this regard potentially violate the ABM Treaty's prohibition on the development of a mobile land-based ABM system or components. We estimate that by using these components, the Soviets could undertake rapidly-paced ABM deployments to strengthen the defenses of Moscow and defend key targets in the western USSR and east of the Urals by the early 1990s.

In addition, the Soviets have probably violated the prohibition on testing surface-to-air missile (SAM) components in an ABM mode by conducting tests involving the use of SAM air defense radars in ABM-related testing activities. Moreover, the SA-10 and SA-X-12 SAM systems may have the potential to intercept some types of strategic ballistic missiles.

Taken together, all of the Soviet Union's ABM and ABM-related activities are more significant—and more ominous—than any one considered individually. Cumulatively, they suggest that the USSR may be preparing an ABM defense of its national territory.

ADVANCED TECHNOLOGIES FOR DEFENSE AGAINST BALLISTIC MISSILES

In the late 1960s, in line with its longstanding emphasis on strategic defense, the Soviet Union initiated a substantial research program into advanced technologies for defense against ballistic missiles. That program covers many of the same technologies involved in the U.S. Strategic Defense Initiative, but represents a far greater investment of plant space, capital, and manpower.

Laser weapons

The USSR's laser program is much larger than U.S. efforts and involves over 10,000 scientists and engineers and more than a half dozen major research and development facilities and test ranges. Much of this research takes place at the Sary Shagan Missile Test Center where the Soviets also conduct traditional ABM research. Facilities there are estimated to include several air defense lasers, a laser that may be capable of damaging some components of satellites in orbit, and a laser that could be used in feasibility testing for ballistic missile defense applications. A laser weapon program of the magnitude of the Soviet effort would cost roughly $1 billion per year in the U.S.

The Soviets are conducting research in three types of gas lasers considered promising for weapons applications: the gas-dynamic laser; the electric discharge laser; and the chemical laser. Soviet achievements in this area, in terms of output power, have been impressive. The Soviets are also aware of the military potential of visible and very short wave-length lasers. They are investigating excimer, free-electron, and x-ray lasers, and have been developing argon-ion lasers for over a decade.

The Soviets appear generally capable of supplying the prime power, energy storage, and auxiliary components needed for most laser and other directed-energy weapons. They have developed a rocket-driven magnetohydrodynamic generator which produces over 15 megawatts of electrical power—a device that has no counterpart in the West. The Soviets may also have the capability to develop the optical systems necessary for laser weapons to track and attack their targets. Thus, they produced a 1.2-meter segmented mirror for an astrophysical telescope in 1978 and claimed that this was a prototype for a 25-meter mirror that would be constructed in the future. A large mirror is considered necessary for a space-based laser weapon.

Unlike the U.S., the USSR has now progressed in some cases beyond technology research. It already has ground-based lasers that could be used to interfere with U.S. satellites, and could have prototype space-based antisatellite laser weapons by the end of the decade. The Soviets could have prototypes for ground-based lasers for defense against ballistic missiles by the late 1980's, and could begin testing components for a large-scale deployment system in the early 1990s.

The remaining difficulties in fielding an operational system will require still more development time. An operational ground-based laser for defense against ballistic missiles probably could not be deployed until the late 1990s, or after the year 2000. If technology developments prove successful, the Soviets may deploy operational space-based antisatellite lasers in the 1990s, and might be able to deploy space-based laser systems for defense against ballistic missiles after the year 2000.

Particle beam weapons

Since the late 1960s, the Soviets have been involved in research to explore the feasibility of space-based weapons that would use particle beams. We estimate that they may be able to test a prototype particle beam weapon intended to disrupt the electronics of satellites in the 1990s. A weapon designed to destroy satellites could follow later. A weapon capable of physically destroying missile boosters or warheads probably would require several additional years of research and development.

It is still uncertain whether ground-based charged particle-beam weapons are feasible—that is, whether the beam will propagate in the atmosphere. A space-based neutral particle beam weapon, however, would not be affected by the atmosphere or by the earth's magnetic field.

Soviet efforts in particle beams, and particularly on ion sources and radio frequency quadrupole accelerators for particle beams, are very impressive. In fact, much of the U.S. understanding as to how particle beams could be made into practical defensive weapons is based on Soviet work conducted in the late 1960s and early 1970s.

Radio frequency weapons

The USSR has conducted research in the use of strong radio frequency signals that have the potential to interfere with or destroy critical electronic components of ballistic missile warheads. The Soviets could test a ground-based radio frequency weapon capable of damaging satellites in the 1990s.

Kinetic energy weapons

The Soviets also have a variety of research programs underway in the area of kinetic energy weapons, using the high-speed collision of a small mass with the target as the kill mechanism. In the 1960s, the USSR developed an experimental "gun" that could shoot streams of particles of a heavy metal such as tungsten or molybdenum at speeds of nearly 25 kilometers per second in air and over 60 kilometers per second in a vacuum.

Long-range, space-based kinetic-energy systems for defense against ballistic missiles probably could not be developed until the mid-1990s or even later. The USSR could, however, deploy in the near-term a short-range, space-based system useful for satellite or space station defense or for close-in attack by a maneuvering satellite. Soviet capabilities in guidance and control systems probably are adequate for effective kinetic energy weapons for use against some objects in space.

Computer and sensor technology

Advanced weapons programs—including potential advanced defenses against ballistic missiles—are also dependent on remote sensor and computer technologies which are currently more highly developed in the West than in the Soviet Union. The Soviets are therefore devoting considerable resources to improving their abilities and expertise in these technologies. An important part of that effort involves an increasing exploitation of open and clandestine access to Western technology. For example, the Soviets have long been engaged in a well-funded effort to purchase U.S. high-technology computers, test and calibration equipment, and sensors illegally through third parties.

Antisatellite developments

The USSR has had for more than a dozen years the world's only operational antisatellite system, a co-orbital device which enters into the same orbit as its target satellite and, when it gets close enough, destroys the satellite by exploding a conventional warhead. In addition, the nuclear-armed GALOSH ABM interceptor deployed around Moscow may have ASAT capability, and Soviet ground-based lasers could possibly damage some sensors on some U.S. satellites.

Furthermore, as noted earlier, the Soviets are engaged in research and, in some cases development, of weapons which ultimately may serve as ballistic missile defense systems, but probably will first provide antisatellite capabilities.

AIR DEFENSE

Although the United States began dismantling most of its defenses against Soviet bombers in the 1960s, the Soviet Union has

continued to invest enormous resources in a wide array of strategic air defense weapon systems. Taken together, the Soviet strategic air defense network is a potent and increasingly capable force which would attempt to limit the retaliatory capability of our strategic bombers and cruise missiles.

The Soviets have deployed numerous strategic air defense systems with excellent capabilities against aircraft flying at medium and high altitudes. They are now in the midst of a major program to improve their capabilities against aircraft and cruise missiles that fly at low altitudes. That effort includes partial integration of strategic and tactical air defenses, the upgrading of early warning and surveillance capabilities, the deployment of more efficient data transmission systems, and the development and initial deployment of new aircraft, associated air-to-air missiles, surface-to-air missiles, and airborne warning and control system (AWACS) aircraft.

Currently, the Soviets have nearly 12,000 SAM launchers at over 1,200 sites, 10,000 air defense radars, and more than 1,200 interceptor aircraft dedicated to strategic defense. An additional 2,800 interceptors assigned to Soviet Air Forces (SAF) could also be employed in strategic defense missions. In contrast, the U.S. has approximately 300 interceptor aircraft based in the U.S. dedicated to strategic defense, 118 strategic air defense warning radars, and no operational strategic surface-to-air missile launchers. These figures do not include the tactical air defenses deployed by NATO and the Warsaw Pact in Europe.

The newest Soviet air defense interceptor aircraft, the MiG-31/FOXHOUND, has a lookdown/shoot-down and multiple-target engagement capability. More than 85 FOXHOUNDS are now operationally deployed at several locations from the Arkhangelsk area in the northwestern USSR to the Far East Military District. Two new fighter interceptors, the Su-27/FLANKER and the MiG-29/FULCRUM, also have look-down/shoot-down capabilities and are designed to be highly maneuverable in air-to-air combat. These three aircraft are equipped with two new air-to-air missiles—the long-range AA-9 (for the FOXHOUND) and the medium-range AA-10 (for the FULCRUM and FLANKER)—that can be used against low-flying targets.

The USSR is also deploying the MAINSTAY airborne warning and control system (AWACS) aircraft, which will improve substantially its capabilities for early warning and air combat command and control, especially against low-flying aircraft and cruise missiles.

The Soviets maintain the world's most extensive early warning system for air defense, composed of a widespread network of ground-based radars linked operationally with those of their Warsaw Pact allies. As previously noted, more than 10,000 air surveillance radars of various types provide virtually complete coverage at medium to high altitudes over the USSR, and in some areas well beyond the Soviet Union's borders. Three over-the-horizon radars for ballistic missile warning could provide additional warning of the approach of high-flying aircraft.

The USSR also has an active research and development program to improve its air surveillance network. In 1983, it began to deploy two new types of air surveillance radars which will enhance Soviet capabilities for air defense, electronic warfare and early warning of cruise missile and bomber attacks. The Soviets are also continuing to deploy improved air surveillance data systems that can rapidly pass data from outlying radars through the air surveillance network to ground-controlled intercept sites and SAM command posts.

Soviet strategic surface-to-air missiles provide low-to-high-altitude barrier, area, and terminal defenses under all weather conditions. Five systems are now operational: the SA-1, SA-2, and SA-3, and the more capable SA-5 and SA-10. The recent Soviet air defense reorganization permits efficient integration of strategic and tactical SAM systems. While most tactical SAMs have a shorter range than their strategic counterparts, many have better capabilities against targets flying at low altitude.

Over the years the Soviets have continued to deploy the long-range SA-5 and have repeatedly modified the system. Further deployment and upgrading of the SA-5 to enhance its capability to work in conjunction with low-altitude systems like the SA-10 are probable.

The SA-10 can defend against low-altitude targets with small radar cross-sections, like cruise missiles. The first SA-10 site was operational in 1980. Over 60 sites are now operational and work is progressing on at least another 30. More than half these sites are located near Moscow; this emphasis on Moscow and the patterns noted for the other SA-10 sites suggest a first priority on terminal defense of command and control, military, and key industrial complexes.

In keeping with their drive toward mobility as a means of weapons survival, the Soviets are developing a mobile version of the SA-10 which could become operational late this year. This mobile version could be used to support Soviet theater forces and to permit periodic changes in the location of SA-10 sites within the USSR so as to counter U.S. retaliatory forces more effectively.

The Soviets are also flight-testing another important mobile SAM system, the SA-X-12, which is able to intercept aircraft at all altitudes, cruise missiles, and short-range ballistic missiles. The SA-10 and SA-X-12 may have the potential to intercept some types of strategic ballistic missiles as well. This is a serious development because these systems are expected to be deployed widely throughout the Soviet Union in the 1980s. They could, if properly supported, add a significant point-target defense coverage to a nationwide Soviet ABM deployment.

PASSIVE DEFENSES

Soviet military doctrine calls for passive defenses to act in conjunction with active forces to ensure the wartime survival and continuity of Soviet nuclear forces, leadership, military command and control units, war-related industrial production and services, the essential work force, and as much of the general population as possible. The U.S. passive defense effort is far smaller and more limited; it is no way comparable to the comprehensive Soviet program.

Physical hardening of military assets to make them more resistant to attack is an important passive defense technique. The USSR has hardened its ICBM silos, launch facilities, and key command and control centers to an unprecedented degree. Much of today's U.S. retaliatory force would be ineffective against those hardened targets. To maintain effective deterrence, the United States must be able credibly to threaten prompt retaliation against the full spectrum of Soviet targets, including those which have been greatly hardened.

Soviet leaders and managers at all levels of the government and Communist Party are provided hardened alternate command posts located well away from urban centers—in addition to many deep bunkers and blast shelters in Soviet cities. This comprehensive and redundant system, patterned after a similar system for the Soviet Armed Forces, provides hardened alternate facilities for more than 175,000 key party and government personnel throughout the USSR.

Elaborate plans have also been made for the full mobilization of the national economy in support of a war effort. Reserves of vital materials are maintained, many in hardened underground structures. redundant industrial facilities are in active production. Industrial and other economic facilities have been equipped with blast shelters for the work force, and detailed procedures have been developed for the relocation of selected plants and equipment. By planning for the survival of the essential work force, the Soviets hope to reconstitute vital production programs using those industrial components that could be redirected or salvaged after an attack.

In addition, the USSR has greatly emphasized mobility as a means of enhancing the survivability of military assets. The SS-20 and SS-25, for example, are mobile. Rail-mobile deployment of the SS-X-24 is expected before the end of the decade. The Soviets are also developing an extensive network of mobile command, control, and communications facilities.

SOVIET STATEMENTS ON THE U.S. STRATEGIC DEFENSE INITIATIVE

These extensive Soviet activities in strategic defense, combined with the large Soviet buildup in offensive forces over the past two decades, have been eroding the retaliatory capabilities of U.S. strategic forces on which deterrence has long rested. If the USSR in the future were unilaterally to add an effective advanced defense against ballistic missiles to its offensive and other defensive forces, it would pose a very serious new threat to U.S. and allied security.

The U.S. Strategic Defense Initiative is designed to counter the trend in the Soviets' favor. It is thus not unexpected that Soviet reactions to the U.S. Strategic Defense Initiative have been strongly negative. Through an intensive, worldwide propaganda campaign, the USSR evidently hopes that it can dissuade the United States from pursuing this research program, thereby preserving the possibility of a Soviet monopoly in effective defenses against ballistic missiles—a monopoly that could give the USSR the uncontested damage-limiting first-strike capability that it has long sought.

Thus, Soviet statements on the SDI must be seen in light of the extensive, long-term growth in Soviet offensive and defensive forces and of their major research effort to develop advanced weapons for defense against ballistic missiles. They should also be viewed in light of comparable Soviet propaganda campaigns on other issues. The USSR engaged in a major propaganda effort in the late 1970s and early 1980s to preserve its monopoly in longer-range intermediate-range nuclear forces, and has adopted many of the same tactics to prevent the United States from acquiring an operational ASAT system to balance its own.

On April 22, 1983, a month after the President's announcement of the Strategic Defense Initiative, a published letter signed by more than 200 senior Soviet scientists de-

nouncing the initiative appeared in the New York Times. It is interesting and instructive to note that a number of the signatories have been instrumental in the development of both traditional and advanced ballistic missile defensive systems: Petr D. Grushin, Vladimir S. Semenikhin, Fedor V. Bunkin, Yevgeniy P. Velikhov, Vsevolod S. Avduyevskiy, Aleksandr M. Prokhorov, and Nikolay G. Basov. Velikhov, for example, was for several years the director of the Institute of Atomic Energy laboratories at Troitsk, where lasers for strategic and tactical applications are being developed. Avduyevskiy has long been involved with strategic weapons research and now has responsibility for a number of projects concerned with the military use of space, including a space-based laser weapon. Other signatories have spent their careers developing strategic offensive weapons and other military systems: Vladimir N. Chelomey, Valentin P. Glushko, Aleksandr D. Nadiradze, and Viktor P. Makeyev in ICBMs and SLBMs; Oleg K. Antonov and Aleksandr S. Yakovlev in military aircraft; Nikolay Isanin in nuclear submarines; Yuliy B. Khariton in the Soviet military nuclear energy program; and Martin I. Kabachnik in chemical warfare.

THE U.S. STRATEGIC DEFENSE INITIATIVE

The U.S. Strategic Defense Initiative offers the possibility of a better, more stable deterrence based increasingly on defenses that are survivable, militarily effective, and cost-effective relative to offensive forces. If our research shows that such defenses against ballistic missiles are feasible, they would allow us to move from deterrence based solely on the threat of nuclear retaliation, toward enhanced deterrence characterized by greater reliance on defensive capabilities that threaten no one. The Strategic Defense Initiative is also a prudent and necessary response to the very active Soviet efforts in offensive and defensive forces. It responds directly to the ongoing and extensive Soviet anti-ballistic missile effort, including the existing Soviet deployments permitted under the ABM Treaty. The SDI research program provides a necessary and powerful deterrent to any near-term Soviet decision to expand rapidly its ABM capability beyond that contemplated by the ABM Treaty. It also provides insurance against an eventual Soviet attempt to deploy an effective advanced system for defense against ballistic missiles unilaterally.

SDI research complements our efforts to achieve significant, equitable, and verifiable reductions in nuclear forces. In the near term, we are seeking reductions of strategic and intermediate-range nuclear forces, and discussing defensive and space arms, in the U.S.-Soviet negotiations which opened in Geneva in March 1985. The United States and the Soviet Union have agreed that there is a fundamental relationship between offensive and defensive systems and that neither can be considered in isolation.

In the longer term, if we were to deploy advanced defenses against ballistic missiles, such defenses could increase significantly the incentives for further negotiated deep reductions in offensive nuclear forces because they could reduce or eliminate the military utility of ballistic missiles. Such significant reductions would, in turn, serve to increase the effectiveness of defensive systems.

The SDI research program emphasizes advanced non-nuclear defensive technologies. It will provide to a future President and Congress, possibly in the early 1990s, the technical knowledge required for a decision on whether to develop and later deploy advanced defensive systems. Extensive discussions with our allies would take place prior to any future decision to move beyond research to development and deployment.

Any future deployment would also be a matter for discussion and negotiation as appropriate with the Soviet Union, as provided in the ABM Treaty. Even now we are seeking to engage the Soviets at Geneva in a discussion of the relationship of offensive and defensive forces and of a possible future transition to greater reliance on defensive systems.

While we could not allow a Soviet veto over a decision which would have such a major impact on U.S. and allied security, it is our intention and hope that—if new defensive technologies prove feasible—we and the Soviets would be able both to move to a more defense-reliant balance. What we envision is thus just the opposite of an arms race or a research for military superiority. We seek instead an approach that would serve the security interests of the United States, our allies, the Soviet Union, and the world as a whole.

ANNEX

Offensive forces

Soviet military doctrine and strategy call for superior offensive forces capable of executing a successful first strike. The Soviet building in offensive forces over the last two decades has been designed to move in that direction.

Soviet strategic offensive forces introduced since 1971 include:

Four new types of intercontinental ballistic missiles (ICBMs)—the SS-17, 18, 19, and 25. In addition, the USSR probably has deployed the SS-16 in violation of the SALT II Treaty;

Five new types of ballistic missile-carrying submarines;

Four new types of submarine-launched ballistic missiles (SLBMs);

Five improved versions of existing SLBMs;

Long-range cruise missiles; and

A new variant of the BEAR bomber carrying strategic air-launched cruise missiles.

That buildup is all the more striking when compared to the relative restraint exercised by the U.S. in its acquisition of nuclear weapons systems during the same period. The number of strategic and tactical nuclear warheads in the U.S. stockpile peaked in 1967. We had one-third nuclear weapons then than we have now. Moreover, the total explosive power (measured in megatonnage) of our nuclear weapons was four times greater in 1960 than it is today.

Our lastest B-25 bomber was built in 1962. Although we modernized the missiles our submarines carried with the POSEIDON C-3 in 1971 and TRIDENT I C-4 in 1979, we did not introduce a single new ballistic missile-carrying submarine from 1966 until 1981, when we began deploying the TRIDENT submarine at the rate of about one a year. In fact, our ballistic missile submarine force declined by one-fourth between 1966 and 1981, from 41 boats to 31. During the time we were decreasing the number of our SSBNs, the Soviet Union deployed 62 new ballistic missile-carrying submarines.

Similarly, the MINUTEMAN III, fifteen years ago; today, we have fewer ICBMs than we did in 1967. By contrast, the Soviet Union has added about 800 ICBMs to its arsenal since that year. Of greatest concern for strategic stability has been the development and deployment of the SS-18 and SS-19 ICBMs. Since the late 1970s, the USSR has deployed more than 300 SS-18s, each twice as large as the U.S. PEACEKEEPER/MX and carrying ten warheads, and 360 SS-19s, each approximately the size of the PEACEKEEPER/MX and carrying six warheads. The Soviets already have enough hard-target-capable ICBM warheads today to attack all U.S. ICBM silos and launch control centers and will have a larger number of hard-target capable warheads in the future. (A weapon with hard-target capability has sufficient accuracy and yield to destroy targets that have been hardened to withstand the effects of a nuclear detonation.)

In addition to the rapid growth in its ICBM force, the Soviet Union is engaged in a major modernization and expansion of its strategic bomber and submarine forces. The bulk of Soviet strategic offensive nuclear warheads has traditionally been on ICBMs, while the U.S. has maintained a balanced force, with fewer than one-quarter of our strategic weapons on ICBMs. The growth in modern Soviet strategic offensive forces of all types is thus not only exacerbating the imbalance between U.S. and Soviet ICBMs, but also steadily eroding the traditional countervailing U.S. advantage in SLBMs and strategic bomber systems.

When the SALT I Interim Agreement on Offensive Arms was signed in 1972, the USSR had roughly 2,300 strategic ballistic missile warheads, and the throw-weight of its ballistic missile force was about 3 million kilograms. (Throw-weight is a basic measure of ballistic missile destructive capability and potential.) By the time the SALT II agreement was signed in 1979, the Soviet strategic arsenal had more than doubled to roughly 5,500 strategic ballistic missile warheads with a ballistic missile throw-weight of about 4 million kilograms. Today, the Soviet Union has over 8,000 strategic ballistic missile warheads and a ballistic missile throw-weight of about 12 million pounds.

Perhaps even more troubling is the fact that the USSR's offensive nuclear force buildup continues unabated, with a large number of new systems at or nearing deployment. For example, the Soviets are:

Continuing production of the BEAR H bombers which carry the AS-15 long-range air-launched cruise missile. They are also developing a new strategic bomber, the BLACKJACK, which when deployed before the end of the decade, will be larger than either the U.S. B-1B or B-52;

Completing development of the SS-X-24 and have announced deployment of the SS-25 ICBM. The SS-25 violates the SALT II agreement, since it is a prohibited second new type of ICBM;

Deploying two new classes of nuclear-powered ballistic missile-carrying submarines (SSBNs), the DELTA IV and the TYPHOON, and associated SLBMs. They are also testing a new sea-launched cruise missile, the SS-NX-21.

The combination of U.S. restraint and Soviet expansion and modernization of its strategic offensive forces means that U.S. forces are becoming increasingly obsolete. We are therefore modernizing our strategic nuclear forces to ensure the balance necessary for continued deterrence. That program includes development of the PEACEKEEPER/MX ICBM, a smaller single-warhead ICBM (popularly known as MIDGETMAN), the B-1B bomber, an advanced technology bomber, and the TRIDENT II SLBM. We are also deploying long-range air- and sea-launched cruise missiles and TRIDENT SSBNs. Our strategic modernization program is essential not only for the

military balance, but also to induce the Soviets to agree to negotiated offensive force reductions which would enable us to maintain the balance at far lower levels of armaments.

The Soviet Union has also greatly expanded its nuclear forces of less-than-intercontinental range, which primarily threaten our friends and allies. The USSR has developed an entirely new generation of nuclear short-range ballistic missiles. Of gravest concern has been the creation and subsequent rapid expansion of the SS-20 long-range intermediate-range missile force, which threatens our friends and allies in Europe and Asia. NATO had no equivalent systems when the USSR began to field this modern, mobile, highly accurate, triple-warhead missile. As of September 1985, the Soviets had deployed 441 SS-20s, with over 1,200 warheads. Not only is the SS-20 force continuing to grow, but the Soviets are also testing a modified version of the SS-20 which is expected to be even more accurate. In contrast, NATO plans to deploy 572 single-warhead PERSHING II and ground-launched cruise missiles and stands ready to reduce or reverse those deployments if we can reach an equitable, verifiable arms reduction agreement with the USSR.

Mr. HATCH. Mr. President, it is important to note that this document has been coauthored by the Secretaries of State and Defense, who have been making the headlines lately over their "Knock-down, drag out meeting" with the President concerning the administration's interpretation of the ABM Treaty relative to the SDI. National Security Adviser Bud McFarlane stated recently on "Meet the Press" that the ABM Treaty does not prohibit the testing or development of new technologies such as laser beams and kinetic or directed-energy weapons associated with the SDI. This interpretation of the treaty is based upon an agreed statement appended to the ABM Treaty which states that if new antimissile weapons "based on other physical principles" are created, limitation on them would be subject to further discussions between the United States and the U.S.S.R.

Regrettably, George Shultz has apparently counseled the President to voluntarily adhere to a more restrictive interpretation of the ABM Treaty. At a speech before a group of North Atlantic Assembly Parliamentarians in San Francisco this week, Mr. Shultz reversed Mr. McFarlane's position. While acknowledging that the administration is "legally justified" in applying a "broad interpretation" of the treaty, Mr. Shultz stated that the President has decided to continue to abide by a "restrictive interpretation" of the treaty.

Mr. President, this approach could be a serious setback for the future development of the SDI. I am sure the Soviets are laughing their heads off inside the Kremlin as they watch U.S. policymakers once again urging unilateral restraint while the Soviets continue to develop their own strategic defense system. Mr. Shultz' approach is tantamount to holding one leg up and hopping on the other leg—instead of walking. Frankly, it makes us look like jackasses to the Soviets.

More importantly, if the administration continues to voluntarily adhere to a restrictive interpretation of the treaty, President Reagan's plan to develop a purely defensive system designed to destroy weapons—not people—could end up on the scrapheap of history. We must not allow that to happen. The goal of President Reagan's so-called star wars plan is to bring us star peace and an end to the threat of nuclear annihilation. It would be a grave mistake to vitiate this plan by foolishly negotiating it away in Geneva or by shooting ourselves in the foot at home a la George Shultz.

Mr. President, I would like to close with a quote from "Soviet Strategic Defense Programs:"

The U.S.S.R. has consistently refused to accept meaningful and verifiable negotiated reductions in offensive nuclear arsenals. Since the late 1960's, the Soviets have greatly expanded and modernized their offensive nuclear forces and invested an approximately equal sum in strategic defenses. The U.S.S.R. has an extensive, multifaceted operational strategic defensive network which dwarfs that of the United States as well as an active research and development program in both traditional and advanced defenses against ballistic missiles. Soviet noncompliance with arms control agreements in both the offensive and defensive areas, including the ABM Treaty, is a cause of very serious concern.

Soviet offensive and defensive force developments pose a serious challenge to the West. If left unchecked and unanswered, they would undermine our ability to retaliate effectively in case of Soviet attack. The situation would be even more severe if the Soviet Union were to have a monopoly on advanced defenses against ballistic missiles in addition to its sizable offensive and defensive forces. In that case, the U.S.S.R. might come to believe that it could launch a nuclear attack against the United States or our allies without fear of effective retaliation. At the very least, it might see a realistic chance of successful nuclear blackmail.

Mr. President, we simply cannot afford to give the Soviets that option. The best way to ensure our own national security interests and to deter the Soviet from using nuclear blackmail is to develop the SDI. Unilateral restraint by the United States has never worked in the past, and it is not going to work now.

Finally, Mr. President, I ask unanimous consent to print a recent Heritage Foundation paper in the RECORD. The title of this paper is "U.S.-Soviet Arms Accords Are No Bar to Reagan's Strategic Defense Initiative."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

UNITED STATES-SOVIET ARMS ACCORDS ARE NO BAR TO REAGAN'S STRATEGIC DEFENSE INITIATIVE

INTRODUCTION

Ronald Reagan's plans to move forward rapidly with the Strategic Defense Initiative (SDI) have brought cries of concern from orthodox arms control advocates. They claim the SDI's defensive shield would be an "assault on the jewel in the arms control crown,"[1] referring to the 1972 Anti-Ballistic Missile (ABM) Treaty, a major legacy of Kissinger-era détente. ABM Treaty backers insist that even testing the anti-missile systems of SDI would violate the 1972 accord.

As with many legal documents, certain important terms and restrictions in the ABM Treaty are subject to differing interpretations. Although a number of interpretive remarks by U.S. officials support a more restrictive view, the Treaty's text is ambiguous about restrictions on SDI technologies investigated after it was ratified. Furthermore, the Soviets have apparently adopted a very loose interpretation of the ABM Treaty, stretching interpretation of its provisions to the limits of plausibility and beyond.

Yet as it is envisioned by the Reagan Administration, even under a tight reading of the Treaty's terms, the SDI program does not conflict with ABM Treaty constraints. The Treaty does not restrict research and allows for the development of the advanced technology systems being investigated in SDI. While the ABM Treaty places numerous restrictions on development and deployment of traditional ABM systems and components (that is, those based on the technologies in use when the ABM Treaty was signed), it does not specifically prohibit the development or deployment of missile defenses in general if they do not use the technologies extant in 1972. The ABM Treaty does not, moreover, prohibit deployment of an anti-tactical missile (ATBM) system to protect Western Europe.

Not only does SDI fall within ABM Treaty parameters, it does not violate other arms control agreements. The Limited Test Ban Treaty of 1963, the Outer Space Treaty of 1967, and the Threshold Test Ban Treaty of 1974 all limit certain kinds of nuclear testing or deployment of certain defensive systems, but they do not affect currently projected SDI systems. Even the deployment of the nuclear-pumped X-ray laser is arguably permissible.

Even though SDI as currently conceived does not raise compliance questions regarding the ABM Treaty, the U.S. should reassess on policy grounds its continued long-term adherence to the Treaty. Moscow's commitment to arms control is questionable in light of its persistent violation of the letter and spirit of the ABM and other trea-

[1] "Mr. Reagan's New Defense Idea," *Washington Post*, March 25, 1983, p. A22.

This is the eighth in a series of Heritage *Backgrounders* examining strategic defenses. The others were: "In Strategic Defense, Moscow Is Far Ahead," *Backgrounder* No. 409, February 21, 1985; "Air Defense: Protecting America's Skies," *Backgrounder* No. 379, September 13, 1984; "The New Case for Civil Defense," *Backgrounder* No. 377, August 29, 1984; "Strategic Defense: The Technology That Makes It Possible," *Backgrounder* No. 375, August 23, 1984; "Space Weapons: The Key to Assured Survival," *Backgrounder* No. 327, February 2, 1984; "Wanted: A Space Policy to Defend America," *Backgrounder* No. 311, December 17, 1983; and "Strategic Defense: Avoiding Annihilation," *Backgrounder* No. 304, November 9, 1983.

ties. In addition, Soviet advances in air defense and anti-tactical missile technologies threaten to erode the utility of specific constraints of the ABM Treaty. The U.S. would be at a severe disadvantage is a situation in which dedicated ballistic missile defense systems were banned, while Moscow was free to expand its air defense and ATBM systems, which possessed significant defensive capabilities. Thus, even aside from SDI, the U.S. would have to carefully consider modifying or withdrawing from the ABM Treaty in the near future.

THE CURRENT AMBIENCE FOR SDI

The legality of SDI is an important consideration for U.S. policy makers because of the significance Americans attach to strict compliance with treaty commitments and to Washington's ability to demand that Moscow abide by its treaty promises. At the same time, the U.S. must not permit the opponents of legitimate strategic programs to slow down research and development by requiring over-compliance. A detailed examination of the ABM Treaty and other arms pacts reveals that current U.S. SDI programs are legal and that many projected program developments will be well within the Treaty's limits.

There are four stages in the process of fielding such new weapons systems as SDI: research, development, testing, and deployment.[2]

Research

The current SDI program consists primarily of research. The ABM Treaty contains no constraints whatsoever on any basic or applied research. This means that SDI research is consonant with Treaty requirements.

Development

If a U.S. strategic defense system is to be deployed, full-scale advanced engineering development of specific systems and components will be necessary. There is agreement that the ABM Treaty allows development of fixed land-based systems and components; there is disagreement, however, over whether the U.S. is permitted to develop advanced technology systems and components that are not fixed land-based, such as space-based X-ray lasers, particle beam weapons, and chemical, excimer, and free electron lasers.

It seems clear, however, that development of such advanced systems is permissible under the ABM Treaty because:

(1) Article II defines the limited ABM systems narrowly as those based on ABM technologies in existence in 1972 and consisting of ABM interceptor missiles, ABM launchers, and ABM radars.

(2) Agreed Statement E discusses potential limitations on advanced technology ballistic missile defense systems in contrast to the traditional ABM systems already developed, thus indicating that development of such advanced systems was anticipated and thus is permitted.

(3) Testimony of Treaty negotiators at congressional hearings related to Senate approval of the Treaty supports the interpretation that development of "exotic" technology systems is permitted. This is true regardless of whether one accepts a restrictive view of "development" (i.e., up to point of field testing) or the looser view reflected in testimony suggesting that development up to the point of deployment is permissible.

The critics' argument that development of advanced technology systems and components is prohibited hinges on Article V, section 1, of the ABM Treaty, which states: "Each Party undertakes not to develop, test, or deploy ABM systems or components which are sea-based, air-based, space-based, or mobile land-based." Viewed in isolation, this section could appear to prohibit development of a number of mobile SDI technologies.

The key question is the proper definition of the term "ABM system or components." Article II of the ABM Treaty defines an "ABM system or components" as those technologies used in ABM systems at the time of the 1972 Treaty.[3] Article V thus only specifically prohibits the development of mobile systems based on traditional technology. The systems and components for which development is banned in Article V are only those that are based on the traditional, pre-1972 technologies described in Article II.

Development of weapons based on technology not utilized in 1972 ("advanced" or "exotic" technology), such as many of those considered under SDI, are dealt with separately in a third ABM Treaty provision, "Agreed Statement E." This provides that: "In order to insure fulfillment of the obligation not to deploy ABM systems and their components except as provided in Article II of the Treaty, the Parties agreed that in the event ABM systems based on other physical principles and including components capable of substituting for ABM interceptor missiles, ABM launchers or ABM radars are created in the future, specific limitations on such systems and their components would be subject to discussion in accordance with Article XIII and agreement in accordance with Article XIV of the Treaty."

This section states that activities with respect to advanced technologies, including deployment of systems based on new physical principles "created in the future," are not specifically prohibited. Neither the Article V language, "develop, test, or deploy," nor any part of that phrase is employed in Agreed Statement E. If the architects of the Treaty had intended that all such new advanced technology systems be banned, words prohibiting them plus the phrase "develop, test, or deploy" would surely have been used. They were not, and this omission suggests that Article V's prohibitions are inapplicable to nontraditional ballistic missile defense systems. Agreed Statement E clearly acknowledges that new systems might be created.

The ABM Treaty does not define the word "create," but this wording indicates that the development of advanced technology ballistic missile defenses was accepted and expected by the Treaty negotiators. It is well settled in international law that words or phrases otherwise undefined in a treaty are to be understood by their ordinary, normal, or plain meanings.[4] According to Webster's Third New International Dictionary, "create" is defined in a variety of ways including: "produce," "design," "invent," and "to make or bring into existence something new."[5] "Develop" and "test" would appear to fall within the common definitions of "create." Thus, the key Treaty provisions do not preclude development and testing of advanced technology defensive weapons.

The fact that advanced technologies for ballistic missile defense can be developed to the point of deployment is further supported by testimony given at the time of ratification.[6] One such statement was offered by Secretary of State William Rogers in his letter of submittal to the U.S. Senate. He stated that:

"A potential problem dealt with by the Treaty is that which would be created if an ABM system were developed in the future which did not consist of interceptor missiles, launchers and radars. The Treaty would not permit the deployment of such a system."[7]

Thus, advanced technology systems could be fully developed so long as they were not deployed prior to discussion. In addition, Administration officials specifically testified that lasers could be developed up to the point of deployment. Consider this exchange between Senator Margaret Chase Smith (R-ME) and SALT negotiator Gerard Smith:

Senator SMITH. Mr. Ambassador, you say that the treaty prohibits the development of other ABM systems. Would this affect a development of a laser ABM system by the United States?

Mr. SMITH. Senator Smith one of the agreed understandings says that if ABM technology is created based on different physical principles, an ABM system or component based on them can only be deployed if the treaty is amended. Work in that direction, development work, research, is not prohibited, but deployment of systems using those new principles in substitution for radars, launchers, or interceptors, would not be permitted unless both parties agree by amending the treaty.[8]

---

[2] Testing and development, according to testimony surrounding SALT I, are analytically very closely related. In essence, development begins when testing begins, i.e., when an ABM system or component is tested against a strategic ballistic missile or its components in flight trajectory. Thus testing, in the legal sense of the ABM Treaty, only takes place during development, and there is no development without testing. Testing of U.S. ABM systems and components is restricted by the ABM Treaty to two ranges, at White Sands, New Mexico, and Kwajalein Atoll in the Pacific Ocean. Use of other test ranges for ABM testing must be agreed upon by the Soviets and the U.S. (see Common Understanding B). These restrictions have no impact on current SDI programs. In considering the legal issues of SDI and the ABM Treaty, this paper will make no distinction between the two; both will be considered under the heading of "development."

[3] ABM systems "currently" (i.e., as of 1972) consisted of:

(a) ABM interceptor missiles, which are interceptor missiles constructed and deployed for an ABM role or of a type tested in an ABM mode;

(b) ABM launchers, which are launchers constructed and deployed for launching ABM interceptor missiles; and

(c) ABM radars, which are radars constructed and deployed for an ABM role, or of a type tested in an ABM mode.

[4] See, e.g., Article 31, section 1, of the 1969 Vienna Convention on the Law of Treaties. United Nations Conference on the Law of Treaties, Doc. A/CONF. 39/37, May 23, 1969; and J. G. Starke, An Introduction to International Law (London: Butterworth's, 1977), p. 510.

[5] Webster's Third New International Dictionary (Springfield, Massachusetts: G. and C. Merriam Company, 1971).

[6] Advocates of both narrow and wider interpretations of the Treaty cite such statements in support of their positions. Under international law, unilateral statements by U.S. government officials, offered in testimony or in response to questions are a time subsequent to the signing of a treaty, can be guides to the interpretation of ambiguous treaty terms, but are not in and of themselves conclusive as to the meaning of those terms.

[7] U.S. Congress, Senate, Committee on Armed Services, Military Implications of the Treaty on the Limitations of Anti-Ballistic Missile Systems and the Interim Agreement on Limitation of Strategic Offensive Arms, 92nd Congress, Second Session, 1972, p. 81.

[8] Ibid., p. 416. See also Gerard Smith, Doubletalk (New York: Doubleday and Co., 1980), p. 125.

In spite of the many indications that full engineering development of advanced technologies is permitted, Gerard Smith, at one point, added a somewhat more restrictive definition of "development." During his congressional testimony, he stated that development began following ". . . laboratory development and testing. The prohibitions on development contained in the ABM Treaty would start at that part of the development process where field testing is initiated on either a prototype or breadboard model".[9]

Advanced engineering development, in this view, would be restricted but not laboratory or "proof of principle" development and testing. Thus, even acceptance of this narrower definition does not seriously affect the legality of SDI in its present stage.

Deployment

Deployment of countrywide defenses based on traditional technologies is clearly prohibited by the ABM Treaty and the intent clearly was to ban deployment of all territorial defenses.[10] However, deployment of one fixed land-based traditional technology ABM site is permitted. Furthermore, Agreed Statement E provides that, if advanced technology systems were "created" in the future, "specific limitations on such systems and their components would be subject to discussion. . . ." The use of the words "specific limitations" here implies that the various deployment limitations described in the Treaty applicable to traditional ABM systems, including the apparent prohibition on territorial defenses, do not necessarily apply to the advanced technology weapon systems.

Reinforcing this analysis is the fact that, under Agreed Statement E, all that is required prior to deployment of an advanced technology system is that it be "subject to discussion"[11] in accordance with Article XIII (which establishes the Standing Consultative Commission) and in accordance with ABM Treaty amendment procedure. If the prohibitions in Article V applied to all ABM systems, present and future, there would be no need to discuss new specific limitations.

The logical implication of Agreed Statement E is that advanced technology ABM systems could be deployed but would be subject to entirely new discussions that might lead to limitations. This is, of course, at variance with Smith's understanding concerning the prohibition of deployment as reflected in the congressional testimony cited above. His view, however, is not absolutely dispositive and so this matter remains a subject of debate. But the appropriate focus for the debate is deployment; the terms of the ABM Treaty and the testimony during Senate consideration of the Treaty offer ample support for the view that development is permissible.

U.S. SDI PROGRAMS AND THE ABM TREATY

The SDI involves a number of specific projects. None of the current activities violates the ABM Treaty, even using such narrow interpretations of development as those provided by Gerard Smith.

Traditional ABM technologies

Within the SDI program, a number of system components utilizing traditional technical concepts (launchers, missiles, and radar) are being investigated. The most well-known of these is the Homing Overlay Experiment (HOE). On June 10, 1984, the U.S. successfully tested a HOE interceptor missile (a modified Minuteman ICMB booster) equipped with a small nonexplosive warhead guided to its target using an on-board infrared sensor, computer, and guidance rockets. It is alleged that the traditional technology of HOE violates the ABM Treaty because:

(1) A minuteman booster was used in the test. This allegedly violates the Treaty provision in Article VI prohibiting each party from giving "missiles, launchers, or radars, other than ABM interceptor missiles, ABM launchers, or ABM radars, capabilities to counter strategic ballistic missiles or their elements in flight trajectory, and not to test them in an ABM mode." In this case, however, the Minuteman booster used was extensively modified and thus in their current configuration, other Minuteman boosters could not be used in an ABM mode. Furthermore, the booster was a test vehicle and not a prototype of a dual capable Minuteman missile.[12]

(2) The infrared sensors used in the test are a substitute for (traditional) ABM radars. But according to Agreed Statement E, such items are only subject to specific limitations through negotiaton prior to deployment. The Treaty requires discussion prior to deployment regarding specific limits on components that have been "created" and can substitute for ABM components, as in the case of these infrared sensors.

Advance technologies—mobile

The HOE test was also criticized as violating the Treaty restrictions on the development of advanced ABM technology, because the infrared sensors carried on the HOE interceptor warhead (as an advanced technology substitute for ABM radars) allegedly violates Article V, which bans the testing of mobile ABM components.

Similarly, critics suggest that development in the Talon Gold SDI program will be restricted by Article V. The Talon Gold program involves research and preliminary development of a satellite-based infrared sensor (as opposed to the HOE where the sensors are on the intercept vehicle itself) that will provide target acquisition and tracking data. These sensors, in the critics' view, will substitute for ABM radars.

Again, the treaty does not prohibit development of components based on "other physical principles." But even if such systems or components were subject to Article V that governs the development of advanced technologies, neither Talon Gold nor the HOE sensors have ever reached the development stage, as understood by the Treaty negotiators themselves. No other mobile system or components that fall under the auspices of SDI have approached the development stage, and research on all types of systems is clearly permitted under the terms of the Treaty.

Advanced technologies—fixed land-based

The U.S. is currently researching a variety of advanced technologies, such as short wavelength lasers, free electron lasers, an charged particle beams, which could be deployed as part of a fixed land-based defense system. (Some also could be used for space-based systems.) Such research and even the development stage are not clearly restricted by the ABM Treaty. During the Senate hearings on the ABM Treaty, in fact, specific questions were raised concerning the possible prohibition of research and development of lasers as weapons. John Foster (former director of Defense, Research, and Engineering) and Gerard Smith both confirmed that the U.S. could engage in research and development of lasers for ballistic missile defense.[13]

Future SDI activities and the ABM Treaty

Only if a very restrictive interpretation of Article V or Agreed Statement E were adopted would some SDI-related activities be prohibited by the Treaty. Yet even then, the U.S. could negotiate amendments to the treaty that would permit those activities, should early research and development seem promising enough to pursue. These include such technologies as space-based lasers or particle beam weapons, infrared detection devices (that might substitute for or complement active radars), and aiming and pointing devices such as those being explored in the Talon Gold program.

Some ABM systems based at least in part on traditional ABM technology (launchers, missiles, and radars) would clearly require significant Treaty amendment. The deployment of mobile land-based systems or fixed land-based systems in excess of 100 interceptors, which could evolve from current Army ballistic missile defense experiments such as HOE and endoatmospheric hypervelocity interceptor missiles, would require amendment.

If appropriate amendments cannot be negotiated with the Soviets, the U.S. has the legal option of withdrawal from the ABM Treaty. Article XV of the Treaty guarantees both parties the right to withdraw from the Treaty, with six months notice, if supreme national interests are involved.

As Donald Brennan, a former director of the Hudson Institute, has noted: "If the time comes when continuation of the Treaty is clearly against our interests, which could happen relatively soon, it would be absurd to continue the Treaty, whether or not the Soviets would agree to its modification or termination. Except when it would clearly serve their own interests, the Soviets are most unlikely to be cooperative in improving our security even by means that would not correspondingly harm theirs."[14]

As justification for treaty withdrawal, the U.S. could either treat the ABM agreement as having been breached already, citing Moscow's numerous violations of the accord,[15] or rely simply on the threat posed

[9] Military Implications, op. cit., p. 377. See also footnote 2.

[10] Ambassador Smith has referred to the obligation not to deploy ABM systems as the "heart of the Treaty" and argued further that "the only fair interpretation . . . is that any exotic system is banned." Quoted in Patrick Tyler, "How Edward Teller learned to Love the Nuclear Pumped X-Ray Laser," Washington Post, April 3, 1984, p. D4.

[11] "Discussion" in diplomatic parlance refers to talks with no commitment to reaching an agreement; this falls short of negotiation, wherein parties have agreed to work toward an agreement.

[12] See Clarence Robinson, "BMD Homing Interceptor Destroys Rentry Vehicle," *Aviation Week and Space Technolgy*, June 18, 1984, pp. 19-20, for a good description of the technical components of the Homing Overlay Experiment.

[13] See, e.g., *Military Implications, op. cit*, pp. 222, 295, 306.

[14] Donald G. Brennan, "BMD Policy Issues for the 1980s," in *U.S. Strategic Nuclear Policy and Ballistic Missile Defense* (Cambridge, Massachusetts: Institute for Foreign Policy Analysis, 1980), pp. 31-32.

[15] For a complete description of the Soviet strategic defense program, including Soviet violations of the ABM Treaty, see David Rivkin and Manfred

by Soviet offensive forces as the extraordinary circumstances. The U.S. then could rely upon Article XV to begin withdrawal from the treaty.

Amendment possibilities include delineating specific limitations on weapons based on specific new physical principles, permitting ICBM site defense in greater numbers than are allowed by the Treaty currently, and placing further limitations on offensive weapons.[16]

THE ABM TREATY, STRATEGIC DEFENSE, AND U.S. ALLIES

There has been some suggestion by American experts that ballistic missile defense bases might be placed in Western Europe or that West Europeans could be asked to contribute to strategic defense development. None of these actions would constitute violations of the ABM Treaty.

Two provisions of the Treaty pertain directly to strategic defense and U.S. allies. Article IX states that each Party: (1) "undertakes not to transfer to other States," and (2) "not to deploy outside its national territory," ABM systems or their components limited by the Treaty. At most, these provisions suggest some constraints on the degree to which the U.S. can share traditional stategic defense technology with its allies.

European contributions contemplated thus far have been limited to financial participation and providing ground bases for anti-tactical ballistic missile (ATBM) defenses (i.e., defense against ballistic missiles with ranges less than strategic, such as the Soviet SS-20 and SS-21). The ABM Treaty does not bar financial burden sharings for SDI-related activities by nations other than the U.S. or the USSR. Nor are there any restrictions on ATBM defenses (in contrast to ICBM defense in Europe) or basing. West Germany and France, moreover, conduct SDI-type research programs, and unconstrained by the ABM Treaty, which they never signed, could construct any kind of ballistic missile defense they choose on their own initiative.[17]

TECHNICAL AMBIGUITY AND THE ABM TREATY

As air defenses, defenses against nonstrategic ballistic missiles, and anti-satellite weapons become more effective, they will almost inevitably achieve some significant capability to destroy strategic ballistic missiles and their warheads. This would violate the purpose of the ABM Treaty, and if undertaken unilaterally by the Soviets, would adversely affect Western security and undermine deterrence. Rapid development of new technologies thus makes reconsideration of the terms and definitions of the ABM Treaty almost inevitable.

Air defense

Technical advances already have raised questions about the possibility of providing anti-aircraft interceptor missiles with the capability to intercept short- and medium-range ballistic missiles. While this is arguably legal under the ABM Treaty, such a system: (a) would be very difficult to distinguish from an ABM system, rendering verification of compliance virtually impossible; and (b) could be upgraded in the future so that it could have substantial capability to intercept strategic ballistic missiles.

In fact, the Soviets are already endowing their air defense radars, interceptor missiles, and launchers with these capabilities. The Soviet SA-5, SA-10, and SA-12 surface-to-air missiles all apparently can destroy short- and medium-range ballistic missile warheads—and probably some strategic ballistic missiles warheads as well.

Anti-satellite weapons

The U.S. anti-satellite (ASAT) program raises similar questions. The U.S. ASAT system being developed uses a small missile that carries a Miniature Homing Vehicle (MHV), which detects a satellite, maneuvers itself into the path of the satellite, and destroys it through direct impact. The MHV is a direct outgrowth of ballistic missile defense technology investigated through the 1970s. Laser research and development, being pursued in the SDI and also by the Soviets, also could yield systems with ASAT and ballistic missile defense applications.

Strategic defense deployment, in the form of an ASAT system, is not prohibited by the ABM Treaty. Gerard Smith assured Congress: "It is my understanding that the treaty says nothing about ASAT systems. I think we could go to a full ASAT deployment and not violate the treaty. I think it is unfortunate. I think it may be considered a loophole.[18]

ASAT systems, while clearly permissible under the Treaty, would erode the constraints of the ABM Treaty. Yet, contrary to what some critics allege, the U.S. cannot remove this problem by unilaterally halting its ASAT program. For a number of years the Soviets have been pursuing an active ASAT program of their own.

Ambiguity and the ABM Treaty

Many SDI critics have argued that the actual capability (rather than whether it has been designed to perform ABM missions) must be the benchmark of compliance with the ABM Treaty. Article VI of the Treaty commits each party not to give missiles, launchers, or radars other than ABM interceptor missiles, ABM launchers, or ABM radars, capabilities to counter strategic ballistic missiles or their elements in flight trajectory. . . .

Thus, claim SDI opponents, any system or component, such as air defense or ASAT, that achieves some ABM capabilities violates the ABM Treaty.

This contradicts the U.S. understanding of the Treaty. "Unilateral Statement B," submitted by the U.S. delegation shortly after the signing of the Treaty, states that testing of non-ABM components for non-ABM purposes is not restricted by Article VI. Without this understanding the ABM Treaty arguably could restrict a wide range of weapons systems, such as those designed for air defense or ASAT missions, in a way never intended by Treaty negotiators. The tension between intended and actual capabilities is thus already apparent in the Treaty itself and will grow as capabilities grow.

Yet if weapons and components with ABM capabilities that are intended for other military uses can be easily deployed, the ABM Treaty is obviously of very limited relevance in limiting ABM capabilities. Moreover, given the vast differences between U.S. and Soviet compliance standards, it would be advantageous for Moscow if systems with a residual capability were freely deployed.

This growing ambiguity obviously clouds the future of the ABM Treaty. As the Treaty becomes less relevant in limiting the ABM capabilities and verification of compliance with the Treaty becomes more and more difficult, the Treaty becomes less credible.

OTHER ARMS CONTROL PACTS

Outer Space Treaty of 1967.—This treaty commits the signatories, including the U.S. and the USSR, not to place in orbit any objects carrying nuclear weapons or any other weapons of mass destruction or to install such weapons on celestial bodies or station such weapons in outer space in any other manner. Questions have been raised about the legality of one technology being investigated in the SDI, the nuclear pumped X-ray laser, which could be deployed in space, or "popped up" into space after warning of an attack. Deployment of the X-ray laser, however, would probably be legal. For one thing, the nuclear device in an X-ray laser cannot be used as a weapon of mass destruction because it could not withstand reentry into the atmosphere. For another, the nuclear explosion that produces X-rays serves exclusively as a power source and not as a means of destruction, which means it is similar in that respect to Soviet nuclear-powered satellites. As such, the X-ray laser is not a weapon of mass destruction.

Threshold Test Ban Treaty (TTBT).—In 1974, the U.S. and the Soviet Union negotiated and signed the TTBT, limiting underground nuclear testing to a maximum yield of 150 kilotons. The two nations agreed to abide by its terms, even though the Senate has never ratified it. Moscow may have violated the accord on a number of occasions.[19]

One component of an SDI system could be long-range interceptor missiles that utilize nuclear warheads. Improvements in the design and effectiveness of these warheads would require testing. TTBT ceilings on nuclear tests make future deployment of this type of system problematic and potentially eliminate one layer of a multi-tiered, multi-technology anti-missile defense. This constraint will be of less concern if the U.S. can develop non-nuclear kill warheads.

The TTBT also potentially affects the development of the X-ray laser. The size of the nuclear explosion needed for an X-ray laser is larger than 150 kilotons. New warheads designed to produce more X-rays probably could not be tested under TTBT limits.

The Limited Test Ban Treaty (LTBT).—The LTBT prohibits nuclear testing "in the atmosphere; beyond its limits, including

---

Hamm, "In Strategic Defense, Moscow is Far Ahead," Heritage Foundation *Backgrounder* No. 409, February 21, 1985. Under customary international law, if one party materially breaches a treaty, the other party may withdraw.

[16] For a discussion of amendment possibilities, see George Schneiter, "The ABM Treaty Today," in *Ballistic Missile Defense*, Ashton B. Carter, and David N. Schwartz, eds. (Washington, D.C.: Brookings Institution, 1984), pp. 244-250. If satisfactory amendments cannot be worked out, the U.S. right to withdraw is guaranteed in Article XV, Section 2, which provides: "Each Party shall . . . have the right to withdraw from this Treaty if it decides that extraordinary events related to the subject matter of this Treaty have jeopardized its supreme interests. It shall give notice of its decision to the other Party six months prior to withdrawal from the Treaty.". . .

outer space; or under water. . . ." Testing of the power source of an X-ray laser or nuclear warheads for an ABM system anywhere but underground would violate this treaty. The LTBT makes advanced development of X-ray lasers and nuclear kill ABMs very difficult, if not impossible, because it would not permit the U.S. to test new design improvements in the nuclear explosives required for these weapons.

CONCLUSION: THE FUTURE OF THE ABM TREATY

The U.S. must recognize several facts regarding the ABM Treaty.

(1) The Treaty has not prompted Moscow to abandon development of military means to provide an active defense of the USSR nor has it significantly constrained development of a nationwide Soviet ballistic missile defense system. This is apparent in the Soviet deployment of ambiguous air defense/ballistic missile defense missiles (the SA-5, SA-10, and SA-12), which allow the Soviets to deploy systems with some ABM capability while claiming ABM Treaty compliance.

(2) The Treaty has constrained the U.S. which, prior to the Reagan Administration's advocacy of the SDI, had reduced dramatically its research and development spending on anti-missile defenses.[20]

(3) While attempts at controlling offensive arms, as in SALT I and SALT II, have failed to restrain the Soviet threat to U.S. retaliatory forces,[21] the ABM Treaty has prevented the U.S. from actively defending those forces. U.S. security thus has been diminished.

If the Soviets continue their current policies, U.S. options concerning the ABM Treaty are limited. Withdrawal from the Treaty is one possibility. Arms control should serve overall U.S. national security interests. Arms control should not be an end in itself but a means of improving U.S. security. The U.S. could use either Moscow's repeated violations of the Treaty as proof of Soviet abrogation or the threat posed to supreme U.S. interests by the unremitting Soviet offensive buildup as grounds for legal U.S. withdrawal.

A second option is to seek renegotiation of the ABM Treaty. This could clarify the kinds of activities specifically permitted by the Treaty and allow the U.S. and Soviets to pursue their preferred ballistic missile defense options. Negotiations on space weapons could touch on many of these issues. The U.S. should not give up the right to pursue the research and development of strategic defense technologies.

A final option is to continue to abide by the Treaty as it is today. As currently conceived, SDI is perfectly consistent with the ABM Treaty, and the U.S. could reasonably pursue its ballistic missile defense goals within the confines of the Treaty until it is in a position to decide among the technical alternatives. At the same time, the U.S. could develop and deploy ABM systems permitted by the ABM Treaty. One possibility would be to develop and deploy site defenses that could be used to defend the MX missile at Cheyenne, Wyoming. This would improve the survivability of U.S. retaliatory forces and reduce some of the strategic defensive asymmetries that have developed during the life of the ABM Treaty. The U.S. can also deploy an ATBM system to defend key NATO assets.

All three options—withdrawal, renegotiation, or continued compliance—must be weighed at any given moment on the basis of an informed assessment of the status of Soviet ballistic missile defense, Soviet treaty compliance, and the strategic offensive balance.—Prepared for The Heritage Foundation [22]

APPENDIX A.—RELEVANT TREATY SECTIONS

Article I: prohibits the deployment of ABM systems for territorial defense or "a base for such a defense."

Article II: defines an ABM system as "a system to counter strategic ballistic missiles or their elements in flight trajectory" consisting of interceptor missiles, launchers, radars and other components. Particular characteristics were elaborated in Article 5 and Agreed Interpretations B, D, and E.

Article III: (as amended by Article 1 of the 1974 Protocol) permits each party to have one fixed land-based ABM system.

Article V, section 1: pledges each party "not to develop, test, or deploy ABM systems or components which are sea based, air based, space based or mobile land based."

Article VI: each party pledges "not to give missiles launchers, or radars, other than ABM interceptor missiles, ABM launchers, or ABM radars, capabilities to counter strategic ballistic missiles or their elements in flight trajectory, and not to test them in an ABM mode.

Article VII: permits modernization and replacement of ABM systems or their components.

Agreed Statement E: states that ". . . the Parties agree that in the event ABM systems based on other physical principles and including components capable of substituting for ABM interceptor missiles, ABM launchers, or ABM radars are created in the future, specific limitations on such systems and their components would be subject to discussion in accordance with Article XIII (dealing with the Standing Consultative Commission) and agreement in accordance with Article XIV (dealing with amendments) of the Treaty."

Mr. HATCH. I thank the Chair.

Mr. President, I thank my distinguished friend and colleague from North Carolina for his courtesy to me. He is always courteous and I really appreciate it.

Mr. HELMS. Mr. President, the Senator is quite welcome.

I want him to know that I admire his comments very much as I have the statements by Senators who have preceded us.

This is a subject of enormous importance to the American people and even to the survival of this country.

So I thank the Senator from Utah.

Mr. HATCH. I thank my friend.

(Mr. COHEN assumed the chair.)

THE DOUBLE STANDARD ON ABM

Mr. HELMS. Mr. President, Secretary of State Shultz in his remarks at the North Atlantic Assembly meeting in San Francisco on the strategic defense initiative and the ABM Treaty cast into doubt the credibility of arms control and the utility of the forthcoming summit in Geneva.

With one stroke, either by design or otherwise, Secretary Shultz has undermined President Reagan's program for the strategic defense initiative. In fact, Mr. Shultz may have achieved what many perceive to be the longstanding goal of the State Department bureaucracy to destroy SDI as a viable component of U.S. defense.

Mr. President, the SDI is the first innovative strategic concept in 20 years. It is the first concept that has sobered the Soviets' drive for strategic domination and made them fear that their massive buildup in offensive nuclear weapons might be counterchecked. For the first time a President has introduced a concept which might lead to real arms control, not the arms control process—and there is a distinction, Mr. President, not the arms control "process" but real arms control.

Such a development in strategic thinking has been anathema to the arms control establishment because of an obvious reason. If there is no arms control process, then there is no need for such an establishment—and there go their jobs.

Another reason may be found in the lingering feeling of guilt in some quarters in this country that the United States is the cause of evil in the world and that we need to be placating and appeasing the Soviet Union in a real way. Not surprisingly, this has led to the double standard in arms control. We have seen time after time the Soviets getting away with violation after violation. They can throw the SALT treaties in the dust like a scrap of paper. They can deploy forbidden radars. They can block the legitimate verification processes allowed in the ABM Treaty and SALT I. But the Soviet Union is aways forgiven by the major news media of this country and by the U.S. State Department, just so long as the pretense is maintained that the agreements are still in effect. That is all it is, Mr. President, a pretense.

In other words, the United States must keep the arms control process alive at any cost, at any risk, even

[20] From $2.1 billion in 1971 to $100 million in 1977 (constant 1977 dollars). John Collins, in U.S. Congress, Senate, *U.S. and Soviet City Defense:* Considerations for Congress, prepared by the Congressional Research Service, 94th Congress, Second Session (Washington, D.C.: U.S. Government Printing Office, 1976), p. 11. Nevertheless, many technologies were researched at very low levels of funding including virtually all those being investigated in SDI. The critics who now claim SDI is in violation of various arms control treaties, were suspiciously quiet when SDI technologies were being investigated throughout the 1970s and early 1980s.

[21] In 1979, Harold Brown, then Secretary of Defense, predicted that: "The combination of accurate guidance and the large number of warheads expected in the early 1980s will give their ICBM force the ability to destroy our silos with a relatively small fraction of their ICBMs." U.S. Congress, Senate, Committee on Foreign Relations, *The SALT II Treaty*, 96th Congress, First Session, 1979, pp. 303-304. His prediction was accurate. The expansion of Soviet strategic offensive forces and the impact of that expansion are detailed in Caspar Weinberger, *Annual Report to the Congress, Fiscal Year 1986*, January 30, 1985, pp. 48-50.

[22] This study was researched and written by a scholar, currently employed in the Administration, who requests anonymity. Inquiries regarding the study should be addressed to Brian Green at The Heritage Foundation.

though the arms control process has been dead for years. We just keep the corpse in a closet, talk about the arms control process, and ignore the fact that the corpse is no longer breathing.

On the other hand, when the role of the United States is considered, the same people say that we must bend over backward time after time so that no one will ever accuse the United States of violation with regard to the ABM Treaty. The United States for years has followed a concocted interpretation of the SALT treaties that has effectively jeopardized our strategic development.

Now, that interpretation runs something like this: The ABM Treaty allows research, development, and testing of new technologies based on new physical principles of antimissile protection but it does not allow deployment.

One is reminded of Lewis Carroll's poem, when Humpty-Dumpty says, "When I use a word, it means what I choose it to mean; nothing more, nor less."

But we always seem to let the Soviet Union's interpretation of the words become the ruling interpretation—for them.

The question comes as to what is the distinction between testing and deployment? If we test a new system, does that mean it is deployed? Oh, we are so fearful that the Soviet will accuse us of breaking a treaty if we fully test the new system, therefore, we have pulled the punches on our tests. We have only tested components, or tested them in a way which has significant aspects of the test missing. And, of course, this stretches out the tests indefinitely, reduces their effectiveness, and calls into serious question the whole effort.

Therefore, those who oppose an effective SDI, but are not able to do it in the face of the President's stated policies, are able to sneak around and neutralize the program. And that is what is afoot, Mr. President; that is what is going on in this country, inside the bureaucracy and outside of it.

Now, among recent SDI tests that have been emasculated by this bureaucratic process have been the following:

One, the airborne optical adjunct test, which was supposed to include at least three major components, but which omitted one element for fear that it would be called—and there comes that word again—"deployment."

Two, the homing overlay experiment, which was supposed to include a multiple number of the same components to test the effectiveness of the interactive coverage, was, instead, limited to only one of that component.

Three, the TALONGOLD experiment during the last space shuttle mission was run at reduced power, limiting the information received.

Four, the LODE laser test was also degraded, with the same result.

Now, Mr. President, if this kind of policy continues, this Senator and others who have spoken here this afternoon, see little reason to support the SDI Program. The SDI should not be a dispensable bargaining chip that we are keeping on the table while the diplomats talk and the Soviets build. President Reagan has repeatedly said he doesn't want that to happen. But that is what is happening. Under the current schedule, these experiments would not be completed until 1991—6 years from now. What will the strategic balance be in 1991? Will it be better? Will it be worse? I do not know. But I think we all know that, in our heart of hearts, it will be worse. So, under these bureaucrat-rigged guidelines, SDI becomes a cruel joke to deceive the American people. That is not what President Reagan has in mind; but it is what the bureaucracy is doing.

I guess, Mr. President, the question is: do we want to survive as a nation? Do we really want to inaugurate a reign of peace instead of a reign of terror? Why are we not working full blast on this program?

There are those who say that the funding is insufficient to operate a full program. Well, why is the funding not available?

I wish the American people had the information to understand this issue in detail, and then we could take a referendum to the American people. And I think I know what the result would be.

Now, we all know who in this Congress—both the House and the Senate—are responsible for crippling the SDI system. It has been only recently that it has become clear that the bureaucracy itself is undermining the program.

Then a strange thing happened. On October 6, the National Security Adviser, Robert McFarlane, appeared on the TV show, "Meet the Press." He was asked by Marvin Kalb for the administration's view on testing. Mr. McFarlane replied:

> I think the President is guided by the ABM Treaty, and the terms of that treaty are very explicit in articles II, III, IV, and V, plus Agreed Statement D. They make clear that on research involving new physical concepts, that that activity, as well as testing, as well as development indeed, are approved and authorized by the treaty. Only deployment is foreclosed, except in accordance with articles XIII and XIV.

This was a significant new development. It was like a breath of fresh air. What it meant was that the shackles imposed by the arms-control establishment had been broken.

I doubt very much that Mr. McFarlane made this statement without full authorization from the President. It is being widely discussed throughout this city that at an interagency meeting only a few days previously the policy had been debated and agreed upon. The only demurrer was expressed by Assistant Secretary of State Rozanne Ridgeway, who said that "the Allies" would be upset. Dear me.

Mr. President, this brings up a sensitive matter. When Mrs. Ridgeway came before the Senate Foreign Relations Committee for confirmation, I asked her whether she could support the President's policy as a nonpolitical Foreign Service officer. She said that she had no problem with that. But no sooner did Mr. McFarlane go public with the President's policy on this supremely important issue than she was able to deliver what amounted to a knockout punch. Within days she delivered letters from West German Chancellor Helmut Kohl and Britain's Prime Minister Margaret Thatcher strongly protesting the decision of the United States to defend itself.

Mr. President, I wonder what steps Mrs. Ridgeway took to forestall such letters if, indeed, she did not encourage them. Did she immediately confer with our so-called allies and attempt to get their support? Did she tell them that the United States would not be intimidated by anyone, not even a theoretical ally, when it comes to our basic security? Did she protest at all when the letters were delivered?

And, Mr. President, what was the role of Mrs. Ridgeway's predecessor, Richard Burt, now Ambassador to West Germany? What steps did he take? Just how did Mrs. Ridgeway and Mr. Burt cooperate to save the President's policy?

Whatever actions were taken, Mr. President, they were obviously ineffective, at best—so ineffective that many people in Washington believe that the President's European team actually instigated our so-called allies to strike a blow at our defense and at our realistic new arms control policy.

These are pretty blunt words, Mr. President, posing a tough question, but they need to be answered, and they need to be answered now.

Mr. President, just a few days ago I was privileged to insert in the RECORD remarks made by the distinguished Senator from Wyoming Mr. [WALLOP], about how the allies have continuously subverted our defense and sapped our will to conduct a sane effective arms control policy. Senator WALLOP's words I see were prophetic. Once again, we have succumbed to the appeasement policies of our so-called allies, who are worried that the profits of their trade with the Communists might decline.

This all came about, Mr. President, at an NSC meeting last Friday. At that meeting Mr. Shultz was able to throw down on the table the letters from our allies, letters which Mrs. Ridgeway was unable to forestall—if indeed she

did not encourage them. I think this Senate is entitled to know Mr. President: Was a full report given to the President on the way these letters came to be written? Did Mrs. Ridgeway deceive the Secretary and the President? I would not ask those questions did I not still firmly believe that Mrs. Ridgeway deceived the Senate Foreign Relations Committee as to certain actions which she took in relation to the governments of East Germany and West Germany. Her testimony on these questions is clear.

Mr. Shultz also had as a backup legal memorandums prepared by the bureaucracy at ACDA. Mr. Adelman, ACDA Director, said he was opposed to the conclusions of the ACDA memorandum. I like Ken Adelman. I enjoy his company. But I am bound to ask him who is running the store? If he disagreed with it, why did he not say so publicly and repudiate it? I do not understand why the director who is my friend would forward to the Secretary a memorandum with which he disagreed. The result, however, was Mr. Shultz's statement to the North Atlantic Assembly, a meeting with our so-called allies.

At that meeting, Mr. Shultz stated:

The Treaty's text, the agreed statements accompanying it, the negotiating record, and official statements made since that time are subject to differing interpretations.

It is our view, based on a careful analysis of the treaty text and the negotiating record, that a broader interpretation of our authority is fully justified. This is, however, a moot point; our SDI research program has been structured and, as the President has reaffirmed on Friday, will continue to be conducted in accordance with a restrictive interpretation of the treaty's obligations.

Furthermore, any SDI deployment would be the subject of consultations with our allies, and of discussion and negotiation, as appropriate, with the Soviets in accordance with the terms of the ABM treaty.

Our policy thus reflects . . . our commitment to pursue the program as currently structured, which is consistent with a restrictive interpretation of our obligations under the ABM treaty.

Mr. HELMS. Mr. President, what the Secretary says is that the President's position as articulated by Mr. McFarlane, is fully justified under the ABM treaty. Nevertheless, although we are free to choose a legitimate interpretation that protects our interests, we will continue to pursue the one that undermines our interests.

As they say in North Carolina, "That don't even make good nonsense."

He says it is a moot point because we had not intended to pursue a full program anyway. But why not expand the program in accordance with the interpretation that best supports its national interest?

What the Secretary is saying is that we will not seek to step up our SDI testing to effective levels. We will not depart from the present schedule. We will still not have an effective test on SDI until 1991. In order to pacify the arms control community, and those of our allies who are seeking to appease the Soviets for the sake of increased profits from trade, we will not take steps to make SDI a serious program for peace.

What has happened is that the State Department has succeeded in bargaining away SDI even before the summit starts. It will not be a "bargaining chip" because the will to produce SDI has already dissipated in the bureaucracy. There can be no confidence in the Secretary or his assistants so long as they continue to undermine and destroy the President's policy.

I yield the floor.

ENERGY AND WATER DEVELOPMENT APPROPRIATION—CONFERENCE REPORT

Mr. HATFIELD. Mr. President, I submit a report of the committee of conference on H.R. 2959 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2959) making appropriations for energy and water development for the fiscal year ending September 30, 1986, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of today, October 17, 1985.)

Mr. HATFIELD. Mr. President, the conference agreement is below the budget resolution allocation on new budget authority for energy and water programs. Moreover, the total of the bill is $90 million below the President's budget request.

I am also happy to report that I have had a pretty clear signal from the White House that the President will sign this first appropriations bill that will reach his desk. I think that augurs well for the work of Congress and the many people who have participated through the long debates on the budget resolution and through the crafting of this particular appropriations bill.

Mr. President, I bring before the Senate today the conference report on H.R. 2959, the Energy and Water Development Act for fiscal year 1986. The conferees resolved the differences in the bill between the House and the Senate on October 9. The conference report and statement of managers are filed as House Report 99-307 and are printed in the CONGRESSIONAL RECORD. Therefore, I shall not elaborate on all the items which were in disagreement, but I do want to sketch an outline of some of the important elements of the proposal which is before us today.

Before doing so, Mr. President, I wish to compliment our friends from the House, particularly the gentleman from Alabama [Mr. BEVILL], the chairman of the House conferees and chairman of the conference. I also want to thank the gentleman from Indiana [Mr. MYERS], the ranking minority member, for his cooperation and valuable contributions. I also want to express my appreciation to the Senate conferees, particularly the ranking minority member and former chairman of the subcommittee, the Senator from Louisiana, Senator JOHNSTON, for his support and assistance during the conference on this measure.

Mr. President, I believe we have reached, through long hours of negotiation, a reasonable agreement which should be cleared by the Senate and sent immediately to the President for his signature. This bill is clearly under the budget allocations. The conference agreement is $400 million below the budget resolution allocation of new budget authority for energy and water programs. Moreover, the total of the bill is $90 million below the President's budget request.

As recommended by the committee of conference, the conference agreement provides $15,253,918,000 in new budget authority for energy and water development through the activities of the Department of Energy, Corps of Engineers, Bureau of Reclamation, and several independent agencies.

To be specific, the amount of the conference agreement is $90,200,000 below the administration's budget request in budget authority. According to CBO estimates, we are $109,533,000 below the 302(b) allocation in budget outlays. The total bill is $46,996,000 above the Senate-passed version, and $19,017,000 below the House measure.

To reach this level of savings, the conferees were faced with some extremely difficult decisions. In many cases, after careful consideration, we agreed to the lower amounts for many programs and activities. Arriving at these lower amounts for specific appropriation activities, I believe, clearly shows our continued commitment and dedication to fiscal restraint.

Mr. President, the conference report and statement of managers provide much detail, and therefore, I shall summarize in rather general terms the appropriations provided for in the conference agreement.

Title I of the conference agreement provides appropriations for the U.S. Army Corps of Engineers civil works program. The conference report provides a total of $2,822,050,000 which is an increase of $159,237,000 over the

Senate level and a reduction of $49,457,000 below the House bill. The Corps of Engineers' level is $462,310,000 above the budget request, and $69,050,000 below the fiscal year 1985 level. Most of the amount added to the requested level, approximately $400 million, was restored by the conferees to offset a proposed reduction in the operation and maintenance of existing corps projects and facilities.

The administration's proposed cuts could have closed down important water projects and facilities, including ports and waterways navigation facilities across the United States. In a show of budget gimmickry, and false savings, I believe these cuts were proposed with the clear understanding that Congress would continue to provide funds for operations of these important projects. After receiving extensive testimony on the impact of these cuts, the conferees follow both the House and Senate in recommending a restoration of the O&M account. In the construction account, the conferees provide $919,345,000 for ongoing construction projects. The bill contains no funding for additional new water projects. Funding may be made available, however, for continuation of new starts included in the supplemental appropriations, Public Law 99-88, if criteria on cost-sharing set forth in that public law are met.

For title II, the Bureau of Reclamation, the conferees recommend a total of $777,915,000, which is $10,855,000 more than the Senate bill and $22,624,000 less than the House-passed bill.

The conference agreement contains $11,008,838,000 for Department of Energy programs in title III. This includes $1,772,271,000 for energy supply, research, and development activities; $685,400,000 for general science and research activities; $229,391,000 for power marketing administrations; and $29,491,000 for the Federal Energy Regulatory Commission. The energy accounts include $216,030,000 for solar, geothermal, and renewable energy development, $382,000,000 for magnetic fusion energy development, and $653,050,000 for nuclear fission activities, including $250,700,000 for liquid metal breeder reactor systems and $95,000,000 for the Uranium Mill Tailings Remedial Action Program [UMTRA]. As the statement of managers indicates, those mill tailings sites and vicinity properties with completed remedial action plans should remain on the optimum schedule. Although additional allocations may be necessary, full funding at the requested level is available for Canonsburg at $3,570,000, Salt Lake City at $28,181,000, Shiprock at $11,942,000, and Lakeview $5,336,000. Within the energy title, the conference agreement provides $7,604,615,000 for atomic energy defense activities. This is $428,285,000 below the budget request and a total of $282,294,000 over the fiscal year 1985 level. It is a 4-percent increase in military related spending and is fully consistent with earlier Senate action on the budget resolution.

As most of my colleagues know, I personally oppose these increases for atomic weapons activities. That personal view, however, is not shared by the majority of my colleagues. In any event, I believe we have arrived at a total level of new budget authority which provides adequate funding for these activities, if the Department manages the program in a prudent manner.

Mr. President, the conference agreement includes $645,115,000 for seven independent agencies and commissions in title IV, including $120,000,000 for the Appalachian Regional Development Program, $418,000,000 for the Nuclear Regulatory Commission, and $104,000,000 for the Tennessee Valley Authority. After long hours of negotiation with the House, both the ARC and TVA were provided with a level of new budget authority which represents a 20-percent reduction from the current year funding. These levels of funding are consistent with the assumptions for TVA and NRC contained in the budget resolution.

I should note at this point the work and strong support provided by the Senator from Mississippi, Senator STENNIS, for both ARC and TVA—his help was invaluable in reaching this conference agreement. Knowing of his interest in these activities, I want to indicate that the conference agreement includes $9 million for ARC to continue ongoing port development work, of which $3 million is for continued development of Columbus, MS, port facilities, and $3 million is for continued work at the Fulton-Tupelo port facilities.

Mr. President, one amendment in disagreement, amendment 46, deserves special mention due to its controversial nature. This amendment is the outgrowth of the House bill language in both section 307 and section 506 which provided a strict prohibition against certain Federal agencies procuring any foreign extra high voltage [EHV] power equipment. The Senate deleted both provisions and strongly opposed inclusion of this far-reaching legislation addressing a complex trade issue in the appropriations bill.

After very difficult negotiations with the House, I believe the conferees arrived at an acceptable compromise which is amendment 46. The House agreed to recede and concur in an amendment which would provide a limited 1-year window of opportunity for the domestic extra high voltage power equipment industry to be given an additional price differential and to improve its competitive position while still assuring that the affected agencies would purchase reliable EHV power equipment.

For purposes of amendment 46, the conference managers included as report language what they believed was a Commerce Department definition for EHV power equipment in order to clarify the scope of equipment to be covered by this amendment. The Department of Commerce now indicates that this is not its definition of EHV power equipment. To eliminate potential confusion, I believe it is prudent to limit the scope of the amendment to the type of EHV power equipment referred to in House Report 99-195. Based on the House report and the American National Standards Institute definition of EHV [extra high voltage] power equipment is alternating current [AC] and direct current [DC] electrical equipment, rated and operating above 242 kilovolts and less than 1,000 kilovolts. EHV power equipment should include only power transformers, power circuit breakers, and shunt reactors.

It was not the intent of the conferees to include in the provision any ancillary components or materials. These components and materials would be provided preferences and price differentials in accordance with the buy-America provisions in existing law.

Mr. President, I want to again express my thanks and deep appreciation to my friend and colleague, the distinguished Senator from Louisiana [Mr. JOHNSON], who is the ranking minority member of this committee. I want especially to commend him for his dedication and support.

Finally, Mr. President, both the majority and minority staff of this committee deserve special thanks for their nonpartisan and professional approach—Steve Crow, Proctor Jones, David Gwaltney, and Gloria Butland. I think they are especially to be commended for their diligent work on this bill.

Mr. President, I ask unanimous consent that a copy of the comparative statement of new budget authority be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

	Fiscal year—		House	Senate	Conference	Conference compares with—			
	1985 enacted	1986 estimates				Enacted	Estimates	House	Senate

Mr. HATFIELD. Mr. President, I yield to the Senator from Louisiana for any comments he wishes to make. He is the very able ranking minority member of this appropriations subcommittee.

Mr. JOHNSTON. Mr. President, I commend the distinguished Senator from Oregon for presenting the first of of the 13 appropriations bills to clear the whole process. It has come in under the President's budget, under the budget allocation, and in general is in such good shape that it appears now certain that the President will sign this bill.

As usual, it has been a pleasure to work under the leadership of the Senator from Oregon, and to work with our distinguished colleagues in the other body. I want to especially thank the Representative from Alabama, Mr. BEVILL, the chairman of the conference and thank the House conferees for their fine work in resolving the differences on this bill. I believe this is an excellent bill. It contains virtually nothing that is in controversy that I know of except a "buy American" provision which has been worked out.

I fully subscribe to the remarks of the distinguished Senator from Oregon with respect to the definition of the extra high voltage equipment. I believe that has been worked out satisfactorily to everyone.

Mr. President, with congratulations and thanks to our distinguished chairman of the subcommittee, and chairman of the full committee I join in asking that the conference report be approved.

Mr. HATFIELD. Mr President, I move that the Senate adopt the conference report.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I ask the Chair to lay before the Senate certain amendments which are in disagreement.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

Resolved, That the House agree to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2959) entitled "An Act making appropriations for energy and water development for the fiscal year ending September 30, 1986, and for other purposes.".

Resolved, That the House recede from its disagreement to the amendments of the Senate numbered 8, 13, 15, 20, 23, and 24 to the aforesaid bill, and concur therein.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 22 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum inserted by said amendment insert: *$48,315,000*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 32 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: , *of which $97,325,000 shall be available for verification and control technology*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 34 to the aforesaid bill, and concur therein with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

Notwithstanding provisions of title 5, United States Code, except for section 5308, no funds approved for Western Area Power Administration shall be used to pay the rates of basic pay and premium pay for power system dispatchers unless such rates are based on those prevailing for similar occupations in the electric power industry.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 46 to the aforesaid bill,

and concur therein with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

Sec. 506. No funds appropriated in this Act may be used to pay the salary of the Administrator of a Power Marketing Administration or the Board of Directors of the Tennessee Valley Authority unless they award contracts for the procurement of extra high voltage power equipment manufactured in the United States when such agency determines that there are one or more domestic manufacturers offering a product which meets the technical requirements of such agency at a price not exceeding 125 per centum of the bid or offering price of the most competitive foreign bidder. Such agency shall determine the incremental costs associated with implementing this section and defer or offset such incremental costs against otherwise existing repayment obligations. This section shall not apply to any procurement initiated before its effective date or to the acquisition of spare parts.

Mr. HATFIELD. Mr. President, I move that the Senate concur in the amendments of the House to Senate amendments numbered 22, 32, 34, and 46.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BROOKHAVEN NATIONAL LABORATORY

Mr. D'AMATO. Mr. President, I rise today to express my sincere appreciation to my distinguished colleague, the chairman of the Appropriations Committee, for his kind consideration with respect to the great programs being conducted at Brookhaven National Laboratory. He has recognized the important scientific contributions and breakthroughs being made at this facility, one of the largest employers on my native Long Island, and has worked to secure sufficient Federal funding for certain projects.

With respect to the 1986 energy and water conference report, however, I do have one question in particular which I would appreciate if the chairman would answer. It relates to funding for the cogeneration facility at Brookhaven.

In 1985, Congress provided $1.6 million for design work at this facility. The Department of Energy budget request for 1986 was $10.6 million. The Senate Appropriations Committee and the full Senate approved the full $10.6 million. The House, however, provided no funding for the project in 1986.

The conference, however, split the 1986 funding in half, approving just $5.3 million. I understand the budget constraints we all face and I am not now rising to quibble about this reduction. The problem, however, is that the appropriations conference report also includes a "general reduction" of $5 million. It is my understanding, based upon conversations my staff has had with Department of Energy officials, that up to $2.4 million of this $5 million reduction might be taken from Brookhaven programs.

This, of course, would make it exceedingly difficult to complete the cogeneration project on a reasonable schedule. In fact, it might jeopardize the entire project. This would be unthinkable because the savings generated by the cogeneration project will pay for it completely in just 2.8 years, and each year of delayed operation will cost the Government an extra $4.5 million in electricity charges.

Thus, I ask my colleague, is it his intention or the intention of his subcommittee that this general reduction be applied to Brookhaven?

Mr. HATFIELD. Mr. President, I realize that the Department of Energy requested $10.6 million for the cogeneration project at Brookhaven National Laboratory. I regret the fact that budget constraints and House action resulted in an appropriation of only $5.3 million for fiscal year 1986. I want to point out, however, that this is considerably more than the amount provided by the House, which zeroed out the program.

I agree that the cogeneration facility at Brookhaven is an excellent project and is one that should be completed. It is my hope and intention that needed funds will be provided in next year's appropriations bill for continuation of the project. In the interim, however, I would like to make clear that it was our intent that the "general reduction" should not be applied to Brookhaven National Laboratory if that in any way would jeopardize progress on the facility.

Mr. D'AMATO. Mr. President, I thank the chairman for making this clear. As I understand it, it was the intent of the conference to provide the full $5.3 million for the cogeneration facility.

Mr. HATFIELD. Mr. President, the Senator is correct. Our intent is to have none, or only that small portion of the $5 million "general reduction" which could be applied to this facility without curtailing its progress or completion, applied to Brookhaven National Laboratory.

Mr. D'AMATO. Mr. President, I again want to thank my distinguished colleague, the chairman of the Appropriations Committee, for answering my questions so forthrightly and for his support of Brookhaven National Laboratory.

Mr. DOMENICI. Mr. President, I should like to clarify the language on fusion as reported by the conference committee with Chairman HATFIELD.

As the conferees agreed to provide $383 million for the magnetic fusion program, we certainly intended to continue funding the ongoing research program at Los Alamos for compact high density devices. The language in the conference report states: "No funds are available for development of a generic test facility for compact high density devices."

This was meant to specify that no funds would be available for development and construction of a new generic test facility at a new site for compact high density devices.

Is that the understanding of the Senator from Oregon.

Mr. HATFIELD. Yes, that is my understanding.

Mr. DOMENICI. Mr. President, I should like to clarify the language of alternative disposal concepts under civilian R&D as reported by the conference committee with Chairman HATFIELD.

As I understand, the Senate conferees have receded to the House's recommendation of a reduction of $5 million for fiscal year 1986 for the highest priority program requirements, but we have not agreed to phase out the examination of the subseabed disposal alternative totally, but rather we agreed to maintain the program in its high priority items. Is that your understanding Senator HATFILED?

Mr. HATFIELD. Yes; that is my understanding.

Mr. DOMENICI. Mr. President, I congratulate Chairman HATFIELD, the distinguished ranking member, Senator JOHNSTON, and the members of the Senate Appropriations Subcommittee on Energy and Water Development for completing action on the first regular fiscal year 1986 appropriation bill.

I highly commend the chairman and subcommittee members for reporting back a conference agreement that is consistent with the fiscal year 1986 budget resolution. I would say to my colleagues that this is no easy task. We are all aware of the tight fiscal constraints facing the Congress in fiscal year 1986 and beyond.

Chairman HATFIELD has done an admirable job in keeping this bill within the budget resolution that passed with broad bipartisan support, and I thank him for his able assistance and support for many programs important to the Nation.

I would like to comment on the funding in the electric energy storage systems. The conference committee included an additional $2 million for an expanded effort in electrochemistry research which will enhance the technology base for energy conversion and storage application, in particular, the fuel cell use in future applications.

Mr. HATFIELD. I thank the Senator for his comments and for his continuing interests in energy research and development activities. As he has indicated, the conferees provided in Report 99-307 additional funding for

electrochemistry research as proposed by the Senate.

RIVERTON INACTIVE URANIUM MILL TAILINGS SITE

Mr. SIMPSON. Mr. President, I wonder if I might ask my distinguished colleague from Oregon, the chairman of the Appropriations Committee, a question about the level of funding contained in this bill for the cleanup and stabilization of inactive uranium mill tailings sites under title I of the Uranium Mill Tailings Radiation Control Act of 1978. As I read the conference report, the agreement reached by the conferees provides for $95 milion in funding for this program in fiscal year 1986. Could the Senator from Oregon explain to me how that figure was arrived at?

Mr. HATFIELD. I would be glad to, Mr. President. The Department of Energy initially requested $110 million for this program for fiscal year 1986. In response to that request, and after reviewing the programmatic needs for fiscal year 1986, the Senate approved a funding level of $100 million. The House, on the other hand, appropriated $80 million for this program for the next fiscal year. In conference, we settled on a funding level of $95 million, the amount now reflected in this conference report.

Mr. SIMPSON. If I recall correctly, Mr. President, the $100 million funding level contained in the Senate-passed bill would have provided sufficient funding to carry out those activities that the Department of Energy has planned at the Riverton, WY, site, one of the nine high-priority sites, in fiscal year 1986. Is there sufficient funding available for the Riverton activities at the $95 million funding level to carry out the activities that DOE has in mind for that site for fiscal year 1986?

Mr. HATFIELD. Yes, Mr. President. Within the funding level agreed to by the conferees, we fully expect that the Department of Energy will be able to carry out those activities planned for the Riverton site in fiscal year 1986, and, in fact, would expect DOE to allocate sufficient funding from the $95 million appropriated to move forward with the cleanup and stabilization program at the Riverton site in a timely manner.

Mr. SIMPSON. I thank the Senator for his explanation.

SOLAR COOLING AND HOT DRY ROCK GEOTHERMAL TECHNOLOGY

Mr. DECONCINI. Mr. Chairman, before we complete action on the conference report on H.R. 2959, the energy and water appropriations bill for fiscal year 1986, I would like to make an inquiry regarding items not mentioned in the conference report. Is it the chairman's understanding that items included in the Senate report but not mentioned in the conference report, stand in the final measure unless otherwise noted?

Mr. HATFIELD. Yes, that is my understanding.

Mr. DECONCINI. I should like to direct the chairman's attention specifically to two items in Senate Report 99-110. Under the heading of Department of Energy, solar buildings, there is language by the committee recommending an additional $400,000 for open-cycle solar cooling research. Second, under the heading of Department of Energy, geothermal technology, there is language endorsing a "project to demonstrate the commercial viability" of hot dry rock technology and a recommendation of $425,000 for a commercialization project in the southern Rocky Mountain area. Is it the understanding of the chairman that the conferees on H.R. 2969 intended these recommendations to stand and for these projects to be funded by the Department of Energy in fiscal year 1986?

Mr. HATFIELD. Yes. I believe the conferees did intend that the Senate recommendation on open-cycle solar cooling research and hot dry rock geothermal commercialization be approved and stand in the final measure. As will be noted on page 5 of the conference report on H.R. 2959, it states that "Senate report language which is not changed by the conference is approved by the committee of conference."

Mr. DECONCINI. I thank the chairman. These are two small items that are very important to continued work in the energy field, and I want to insure that they are not overlooked.

HUD APPROPRIATIONS, 1986

The PRESIDING OFFICER. Without objection, the Senate will resume consideration of the committee amendments, as modified.

Mr. GARN addressed the Chair.

The PRESIDING OFFICER. The Senator from Utah is recognized.

Mr. GARN. Mr. President, I was only going to clarify the present parliamentary situation. The Chair did that for me. So I do not desire recognition at this time.

Mr. GORTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Washington.

AMENDMENT NO. 707

(Purpose: to ensure that funds for research and development under the Federal Water Pollution Control Act are not used to put any facility at a competitive disadvantage and for other purposes.)

Mr. GORTON. Mr. President, I send an amendment to the desk on behalf of myself and Senators EVANS, CHILES, HAWKINS, NUNN, and MATTINGLY, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Washington [Mr. GORTON], for himself, Senator EVANS, Senator CHILES, Senator HAWKINS, Senator NUNN, and Senator MATTINGLY, proposes an amendment numbered 707. At page 17, line 9, insert a "." after "1987" and strike all following "1987." through and including page 17, line 23.

Mr. GORTON. Mr. President, in the section of this bill dealing with the appropriations of the Environmental Protection Agency for research and development purposes, there is an earmarking of the amount of $7 million in favor of the Alaska Lumber & Pulp Co., the Japanese-owned pulp mill in Sitka, AK. That $7 million is defined to defray a substantial portion of the costs which will be incurred by that mill in coming into compliance with the 1977 Clean Water Act. This amendment which I am sponsoring together with my colleagues from the State of Florida, and my two colleagues from the State of Georgia, would strike that $7 million of earmarking. It is neutral from the point of view of the overall spending level in the bill as that $7 million would simply become available for other—and I may say far more legitimate—EPA research and development activities. This motion to strike is made for several reasons.

First, and most significant, is the fact that this proposed appropriation simply would establish a terrible precedent. The Alaska Lumber & Pulp Co. has fought almost for a decade against compliance with the requirements of the Clean Water Act of 1977. It has done so skillfully and tenaciously. It has attempted first to get from the Environmental Protection Agency a waiver of those requirements. It was turned down in that request for a waiver. Next, it attempted in the last Congress when the Congress was in the process of passing amendments to the Clean Water Act, to get a statutory exemption from compliance with that act. It failed, although that attempt succeeded in preventing the passage of a new Clean Water Act in the 98th Congress.

Now, going beyond those two requirements it seeks to have the taxpayers of the United States pay for its compliance with the Clean Water Act, a compliance which every one of its competitors and other mills in the United States have paid for as the law requires on behalf of themselves.

It is claimed by the proponents of this appropriation that there is a justification for this $7 million gift on the grounds that the proposed method of complying with the Clean Water Act is somehow or another untried or experimental. That simply is not the case. The Environmental Protection Agency has rejected that proposal. Mills in Japan and in Europe utilize that tech-

nology. A different kind of mill in the State of Indiana utilizes that technology, and under the circumstances whatever special needs there are with respect to this mill would not be duplicated elsewhere. And the technology would be of no use to any other proposed user of a similar technology at any place in the United States.

As a consequence what we have here is simply an attempt to have the Congress pay for compliance on the part of a foreign-owned mill which has resisted compliance year after year after year.

What we will be saying if we include this appropriation in this bill is that it pays to defy the law, that it simply pays to delay as long as you possibly can and to make some kind of claim that you will be forced out of business and have the United States of America undertake expenditures which the mill itself should make.

There is a reason equally important, of course, to the general precedent which would be established by this proposed appropriation. That is the fact that this bill does not operate in isolation. It is not the only mill which produces the particular kind of pulp which is its product. It is in competition with a number of other similar enterprises in the United States. Nothing could be more unfair than to create a situation in which those mills, those corporations, which have complied with the law or which are in the process of complying with the law are subjected to unfair competition from a recalcitrant corporation which then as a reward for its recalcitrance has succeeded in having the Government of the United States pay for its compliance.

That competition is direct. That competition is in more than one place—in the lower 48 States of the United States.

In fact, Mr. President, when I began my investigation of this matter I was curious about why it was—if this mill was so important to the economy of the State of Alaska—that it should be subsidized by taxpayers' funds but those taxpayers' funds did not come from the State of Alaska itself, the location of the mill.

The State of Alaska is not a poor State. The income to the State government is very, very high, based on the petroleum and other mineral resources of that State.

I could not answer that question to my own satisfaction for a considerable period of time. Now, Mr. President, I can.

It turns out that there is intense opposition to this bailout, to this subsidy, within the State of Alaska itself.

The Anchorage Daily News on Tuesday, October 1, printed an editorial opposing this assistance.

I have a telegram from the mayor of Angoon, AK, which is not far from this location in southeast Alaska, opposing this proposal.

But perhaps the best summary of the reasons that there is opposition in Alaska comes from a telegram from the executive director of the Southeast Alaska Conservation Council, who states:

> The Southeast Alaska Conservation Council supports your amendment eliminating the proposed $7 million appropriation to EPA's innovative technology grant program which directly benefits the Alaska Pulp Company. We support the cleanup of our waters but oppose this appropriation because: APC should have been in compliance with clean water standards years ago, as LPK is now beginning to do; Japanese-owned APC mill is not paying its full share to clean up the water; the public ends up paying for APC's special interest grant, resulting in one more public subsidy for this foreign mill. We support the basic position submitted to you by the Sierra Club. Please share this with the full Senate.

It seems to me fairly obvious that the Legislature of the State of Alaska would not provide this subsidy for one mill while another mill, owned by Louisiana Pacific in Ketchikan, which also had these requirements for a number of years, has now agreed to comply with the Clean Water Act at its own expense.

Additionally, Mr. President, only this morning, due to the extraordinary diligence of a reporter, Steve Forrester, who represents a number of newspapers in the State of Washington and in the State of Oregon, I was handed a copy of a memorandum dated January 2, 1980, from the Chief Forester of the U.S. Forest Service to the Secretary of Agriculture, which outlines the proposition that this mill already has been subsidized for meeting pollution control requirements by the pricing policies of the Forest Service with respect to the timber which it utilizes. Those mills in Alaska have a special set of circumstances under which the cost of their stumpage reflects the fact that they are in a different part of the country, and the necessity that they make a profit.

Back as far as 1980, their rates for timber from 1976 through 1981 were lowered by some $14.9 million in order to help them comply with the requirements of the Clean Water Act.

Having taken that money, they now come to the Congress of the United States and ask for a direct appropriation of another $7 million for what is apparently the same compliance, compliance which has not been forthcoming in the years between 1980 and 1985.

There is simply, Mr. President, no justification whatsoever for the Government and for the people of the United States dealing with a technology which is not new, not innovative, to supply money to one of a group of competing mills in a particular economic field in the United States when, in fact, all of that competition has been willing to comply—sometimes reluctantly, sometimes enthusiastically—at their own expense.

Simple fairness, Mr. President, requires that all mills under the same circumstances, all competing mills, be treated by the law in the same fashion. For this Congress to begin to make appropriations to private corporations to comply with general laws of the United States relating to pollution would be to establish a terribly negative, terribly bad, precedent.

Mr. President, I ask unanimous consent that the memorandum to which I referred and the editorial from the Anchorage Daily News to which I referred be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ALASKA LUMBER & PULP CO. APPEAL OF REDETERMINED RATES—REGION 10 (SITKA UNIT LONG-TERM SALE) REPORT OF RATE REVIEW BOARD

To: the Secretary.

Through: Assistant Secretary Cutler.

Your letter of October 3 to the Rate Review Board (Board) stated that the Forest Service was to submit comments to the Board's report by December 15.

We have carefully reviewed that report and find no reason to change the rates which were established and are being appealed by Alaska Lumber & Pulp Co. We do recommend a realignment of those rates to include the volume of scaled spruce and hemlock utility logs in the total volume for which earned purchaser credit may be applied against charges for timber cut. The realigned rates which would be retroactive to July 1, 1976 are:

[Dollars per million board feet]

Species and product	Rates now in effect	Recommended realigned rates
Spruce sawlogs	$55.31	$51.19
Spruce utility logs	0.50	29.83
Hemlock sawlogs	30.69	30.69
Hemlock utility logs	0.50	29.83
Alaska cedar logs	246.37	30.55
Western redcedar sawlogs	1.22	1.22
Cottonwood and other sawlogs	1.22	1.22

In its analysis the Board spent a great deal of effort in analyzing individual appraisal items but could provide no concrete conclusion for changing these items except to include the cost of pollution abatement as a manufacturing cost instead of recognizing that cost as an increase in profit margin. Indeed, the Board was unable to make a complete analysis of the basic data used for the cost data in the appraisal because some operators refused to grant the Board access to confidential product cost data. Consequently, with the exception of pollution abatement costs being added to manufacturing costs, the Board in its report on page 149, agrees with the conversion return determined by the Forest Service. An indepth review of the Board's findings performed by the Alaska Region indicates that offsetting and compensating factors might result in adjustments to raise rather than lower established rates. A copy of that review is enclosed.

Because the Board did not have the data to make the analysis described above as well as the fact that the standard Forest Service appraisal method has been followed as prescribed by the contract, the Board made no recommendation for a change in conversion return, except for realignment of pollution abatement costs.

The issue then revolves around the equitable division of the conversion return between stumpage and margin for profit and risk described by the contract.

The major difference used by the Board to divide conversion return in this case and that used by the Forest Service was in the handling of the cost of pollution abatement costs. The board increased profit and risk to recognize interest on the capital investment for this equipment, while the Forest Service used a depreciation and operating cost estimate as a basis for increasing the profit and risk.

As a basis for their judgment, the Board cites a portion of Forest Service Manual 2422.51. The cited part states:

"Where conditions of sale require an unusual investment, perhaps a mainline logging road, which will be outstanding over a considerable period before it is amortized, recognition of the added capital requirement and consequent interest liabilities should be made by an adjustment in the profit margin."

We recognize that there is an interest cost incurred for the capital outlay necessary to install the pollution control equipment. That interest will either be incurred through payment of interest on borrowed money or through lost opportunities by not investing available capital in other investment opportunities.

Because the needs and methods of firms to obtain capital varies so widely, the Forest Service procedure is not to make a separate cost estimate for interest costs because this is a detail of internal management. Instead, we consider the cost of capital in setting profit margins along with such items as profits, risk, income taxes, and end product selling values. Our objective is to set a profit margin which is sufficient to maintain operations over the long run, including these factors.

In the specific instance of the pollution abatement costs in Alaska and more specifically in the case reviewed by the Board, it was our judgment to recognize an advance depreciation and operation cost factor on an estimated basis, rather than an estimate of the interest on capital necessary to install the equipment. This determination satisfactorily fulfills the guidelines in Forest Service Manual 2422.51 cited by the Board. The Board's recommendation would exceed those guidelines by recognizing prospective depreciation and operating costs as well as an additional amount for unusual interest. The estimated amount of advance depreciation and operating costs applied by the Forest Service to the Alaska Lumber and Pulp Company (ALP) 1976-1981 rates was $14.9 million. Interest costs estimated by ALP were $12.5 million. Both items represent means by which ALP may be compensated currently for their pollution abatement capital investment costs. The application of both means would clearly overcompensate ALP for these costs. In the Forest Service application of advance depreciation and operating costs, we have allowed ALP $2.4 million more in cost allowances than if we had used the unusual interest factor recommended by the Board.

We believe that the rates that were established for this sale conformed with the rate redetermination provisions of the timber sale contract. The industry trends, the quality of the timber, stumpage prices for comparable sales, market conditions, and general economic conditions were considered in dividing the conversion return between stumpage rate to the Government and margin for profit and risk. These items are documented in the rate redetermination report.

In summary, we recommend that the established rates remain unchanged but be realigned to include the volume of scaled utility logs in the total volume for which earned purchaser credit may be applied against charges for timber cut.

We appreciate the Board's recommendations for actions to minimize future problems. We intend to explore them. In fact, for the past 2 years we have been gathering the data to compile and evaluate a stumpage rate adjustment system for National Forest timber sales in Alaska. The data collection will be complete in January 1980. If we are able to develop a workable, responsive system for stumpage rate adjustment, we will present a proposal to the forest products industry in Alaska. A stumpage rate adjustment system when coupled with the recently implemented cost and value update system in Alaska should work to the advantage of both timber sale purchasers and the Government.

————,
R. MAX PETERSON,
Chief.

[From the Anchorage Daily News, Oct. 1, 1985]

MILL HELP A BAD POLICY

Here's an idea that may be good for Alaska but seems bad policy for the country as a whole. Alaska's Sen. Ted Stevens is trying to convince Congress to give the economically troubled Alaska Lumber and Pulp Mill in Sitka $7 million for a "demonstration project" to comply with federal water pollution laws. It sounds innocuous enough, but the mill has fought the federal requirements for eight years and is the last pulp mill in the country that will comply with the federal law. It's an issue where Alaska's own interests conflict with broader national concerns.

From Alaska's viewpoint, the proposal may make some sense. The mill and the state environmental officials contend that the federal standard, which requires the mill to install the best practical pollution technology, is too strict. They say the mill's discharges do not pollute the surrounding water—Alaska's strong tides disperse them over a wide area with no harmful effect. And the depressed state of the timber and pulp market means the extra cost of pollution control could shut down Sitka's largest employer, at a cost of 400 jobs.

But from a national viewpoint, there are good reasons for Congress to reject federal aid to the mill. It seems to reward the Sitka mill for its delay in complying. It penalizes all the other pulp mills in the country, including a mill in Ketchikan, because they are complying without federal assistance. Opponents also question the "demonstration" nature of the aid—they say the technology is in use in Europe and has little application in an industry where all other mills have complied.

It's no surprise that Sen. Stevens would seek federal aid for the Sitka mill's pollution problems. But it should be no surprise, either, if Congress rejects it.

Mr. GORTON. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is not a sufficient second.

Mr. GORTON. Mr. President, in summary at this point in the debate, this appropriation would be construed as a reward for noncompliance. It would establish a very, very poor precedent for future attempts to require companies to comply with the Clean Water Act. It would be entirely unfair to competing companies. Finally, if there is any public need or necessity for such a subsidy, that subsidy should come from the State of Alaska.

Mr. STEVENS addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I regret that this matter has been brought to the floor as it has on the basis of a competitive interest somehow expressed from the State of Washington. So let me state categorically to the Senator from Washington that I call upon him to prove that competition.

The opposition to this amount that is in this bill does not stem from competition. Alaska Pulp Co. makes only viscose pulp. ITT, which is the purported competitor of the State of Washington, makes acetate pulp. ITT has an EPA permit only for acetate pulp. The discharge levels in the State of Washington from acetate pulp plants are higher than those we are talking about. ITT has not complied with EPA standards itself. ITT until January of this year had a marketing agreement with a Canadian plant in British Columbia which did compete with the Alaska plant.

ITT has not exported viscose pulp to Japan in the last 4 years. This is the only product that the Alaska mill makes.

The Alaska Pulp Co. has now expended $66 million to comply with State and Federal guidelines. I challenge the Senator from Washington to state how much ITT has expended to meet EPA guidelines.

The situation is that in Alaska we have an entirely different situation that must be confronted than that of the pulp mills in Washington.

This is the situation we are trying to meet with this innovative technology grant.

Let me state for the sake of the Senate that I hope we realize that the competition that our mills face is from South Africa. South Africa supplies the pulp to the Japanese market that is not met by the Alaska mills. The Alaska mills have a history that goes back to World War II. Following World War II and the rebuilding of Japan, General MacArthur wanted to acquire additional resources for the

Japanese industry. He looked to Alaska, particularly to the Tongass National Forest, to supply timber for their industrial base. President Eisenhower wisely decided that if the timber from Alaska was to be exported from Japan, it would have to be subject to primary manufacturing. He called upon the Japanese to make an investment in Alaska for the purpose of building a pulp mill at Sitka in order to process this timber into primary pulp products before it was shipped to Japan.

This mill is owned by the Japanese interests that made that original investment.

In order to comply with State and Federal guidelines, more than the original cost of the mill has been expended by APC. In my time in the Senate, I have worked with this mill for 8 years to assist in its compliance with the guidelines. I hope that the Senator from Washington will listen to this and agree.

Let me first state to the Senate that this is not a clean water problem. The determination has been made that this mill must comply not because of a clean water problem but because of technical compliance with the national standards. This mill is located in an area that has very high tides. The effluent has been discharged into the salt water and has been literally flushed twiced daily by the tidal action. The EPA has never disagreed with the Alaska Department of Environmental Conservation that this is not a problem with water quality. This is strictly a matter of trying to comply with the national standards on the basis of competition. But if you look at the record, you will find that this mill has spent a tremendous amount of money to comply with national and State standards.

Our State standards have been very tough due to concerns about anadromous fish stocks. I personally went out to the State several times to witness the actions that have been taken to be sure that the logs brought into this plant are brought in a manner that will not pollute the water with bark. The mill has put in new lifting facilities to lift the logs out. There is a debarker that has been put in there, as well as a bark press and a log deck. These measures have been taken in order to meet the State standards regarding pollution of the type that would harm our marine life.

The question of secondary compliance arose some years ago. Let us also make sure we understand this point, Mr. President. This is the second round of compliance. They have in fact complied with the first round of compliance. During the second round of compliance, we asked for a variance from the national standards because it was not a clean water problem. We pointed out all of the expenditures that had been made and were ongoing at this plant. The EPA agreed that there ought to be a variance and asked the regional office to look into it. After a series of negotiations that go back to 1974, there were waivers or temporary waivers granted to this plant while they were working out a variance.

The assumption was made from 1974 on that this mill would be allowed to have some exception to the national standards, either by way of a waiver or a variance. The Regional Administrator recommended that a variance be granted in 1981, and sent that recommendation to Washington. EPA's Washington, DC staff decided that a variance should not be granted, suggesting that the regulations should be modified to grant relief.

EPA's chief of staff overruled that decision, and supported the region's position. The case was sent back to the region with orders to draw up a tentative decision granting the variance.

Before this process was completed, a new regional administrator was appointed. For the first time EPA refused to grant relief to the national standards. I might say a regional administrator that was selected by my good friend from Seattle. Let us make sure we understand that. The whole tenor of that office changed with respect to Alaskan problems. Eight years of governmental consistency with respect to this mill changed. And I will tell the Senate why it changed.

It changed because, during the consideration of the Alaska Lands Act, the Senate reached an agreement that a certain portion of this great forest would be set aside for wilderness and the balance of it would be administered to assure a supply for two mills. This is one of those two mills.

The Sierra Club and others, who lost the battle on the floor of the Senate, did not want those mills to have a supply of timber. They wanted to put them out of business. They have now seen fit to attack the mill on the basis of non-compliance with the Clean Water Act in order to eliminate timber activity in the Tongass National Forest.

We believe that the Senate must look at the basic question involved. That is, if you will cannot comply with these national standards, it must go out of business. There is not enough land area for a landfill. Most other mills take the sludge from a pulp mill, and either burn it or bury it. Even if there were enough land for this mill to use that process, EPA has placed us in a catch-22 situation: burning the sludge at this mill would create a clean air problem and the lack of landfill area will not permit burial. There is no other way to comply at this site other than to find an innovative technology to deal with the discharge into the ocean. Therefore we started looking at the anaerobic process which has been tried on limited spectrums of the effluent stream to see if it could be applied to a complex industrial waste water stream.

In order to use this technology, it will take an investment of $7 million in the technology itself. That is not spent in Alaska; it would be spent in Massachusetts and some other places to acquire the demonstration facilities. It would cost this mill about $3.5 million to install the process. We do not know whether it would work at the Sitka site. Even if it does, we do not know whether it would be economically efficient on a national basis.

However, we have correspondence which I shall share with the Senate if requested that indicates that the EPA believes that it would have national application, if the test were successful. If it is successful at Sitka, it could be successful in dealing with municipal waste treatment.

No one has demonstrated this yet on the complete effluent stream. My friend talks about this mill requesting the funding. I hasten to tell him that I went to the mill and said, let us try to get the funds to demonstate this anaerobic facility to see if it will work. They said, "We have spent more than $60 million trying to comply and 8 years of negotiations which the EPA has wiped out," and they can go no further.

We are talking about 2,000 jobs in a little town in Alaska—Sitka, AL, a one-company town—probably 2,000 jobs in Alaska are affected by this mill. Unless we can find some way to comply with the national standards, this mill will be eliminated from the Alaska scene.

I want to make the record clear here: Some people have raised the question of whether I blocked the Clean Water Act for this mill last year. In the first place, I did not block the Clean Water Act. It never was called up.

As I said in the Appropriations Committee, I think this is the time when a Senator determines who his friends are, and I will put it right on the table here as I did there. This means the survival of the the only industry in the original capitol of the Territory of Alaska. It was never the capitol of the State of Alaska. The capitol was moved to Juneau. But this is the only basic industry in that town. It is not competing with the Washington mills. It is not competing with the Florida mills. There is no direct or indirect competition between this mill in its sale of viscese pulp to Japan, the primary market since its inception, and the product of the mills from the South 48. There is just no competition.

IT&T has been all over this Capitol talking about unfair competition. A

company that comes to this Senate with unclean hands ought to be treated as such. It has not complied with the Clean Water Act itself. Its total record as a corporate entity of this country in my opinion warrants complete investigation by every Member of the Senate. I do not intend to drag this red herring through this discussion, but I think every Member of the Senate knows IT&T's record. It should not be relied on in this process.

I would rather have the debate with the people who are the primary sponsors of the opposition. They are the extreme environmental organizations that just do not want the timber cut. I respect that kind of judgment. That is their position and we have open discussions on our State about that problem. But to face this charge of competition with IT&T is spurious, it is unfair, and it is untrue. There is no competition with IT&T.

Now, we have sought and we have received the tentative approval through the committee process of using $7 million to demonstrate an innovative process, one that has never been completely demonstrated on the effluent stream in this country or anywhere else. I checked that fact again because the assertions in the editorial the Senator from Washington mentions come from one of the papers in my State. The use of this technology has not yet been demonstrated for complex waste water streams.

This matter will be discussed later in this afternoon because I consider it important. If this innovative process is not capable of being demonstrated because of our inability to get the money for it, this mill will close down and the compromise involving the Lands Act will be in vain. That compromise did not include a balance between future timber production in one of the largest national forests in the country, and wilderness withdrawals from that forest. Let me point out that three quarters of the wilderness area of the country are in my State. Let's not think that we are somehow trying to have a wilderness fight here. This is not a wilderness fight. However, the people who did not succeed entirely in what they wanted to do in the Lands Act fight are the ones, in my judgment, who are opposing this innovative grant.

Put yourself in the position of the managers of that company. You have already put up $66 million to comply. Your Senator comes to you and says, "Look, here is another process, maybe it will work." And they say, "Fine, see if you can find some way we can get the process. We will spend the $3.5 million to install it here to see if it works but don't forget, that it must have nationwide application. It must work for anyone who has the same problem on the Clean Water Act, don't tell us to put up the $7 million for it."

Their position was the right position. And I am grateful to the members of the Appropriations Committee for approving the concept that we should use this section of the Clean Water Act as it was intended, to fund innovative process demonstrations to assure that they do work. The control is totally in EPA in deciding whether or not it has national application.

This is a system that has to be pursued in order to try to save these jobs in my State. We are carrying out the policies of our Government by continuing to export to Japan the timber products that are available from our State. I believe, as I said originally, that President Eisenhower was very far-sighted when he required this kind of investment to be made before the timber from our State could be taken to Japan for use in their industrial process.

I am hopeful that my colleagues in the Senate will listen to facts in connection with this matter. I ask unanimous consent, Mr. President, that the following letters be put in the RECORD. I have a letter of December 22, 1981, from the Alaska Department of Environmental Conservation to EPA Region 10 stating that the current effluent level poses no adverse impact on water quality.

We have a letter from the Governor of Alaska to Administrator Ruckleshaus stating that there would be no additional water quality benefit resulting from the imposition of additional stricter requirements on this plant.

We have a subsequent letter of May 1984, after I again ask the Alaska Department of Environmental Conservation whether the current levels of discharge involve any water quality problems; this letter states categorically that there are no water quality problems from the current level of effluent.

The only reason for dealing with this sludge is to comply with a national standard which was designed to fit pulp mills that are on water bodies like Puget Sound. If this effluent stream went into Puget Sound, you can bet your boots there would be pollution.

In order to assure that there is competitive balance in the industry as a whole, these standards are applied to mills like the Sitka mill, even though the effluent from their plant had no adverse pollution impact. This is done for the protection of the national standard concept itself.

I hope my colleague will read these letters, if they have any question about the matter of water quality. This is not a matter of water quality. It is a matter of compliance with the Clean Water Act in the fullest sense.

I state to the Senate that I have never once asked that the act not apply to this mill. We have asked that the variance provisions of the act be invoked to take into account the situation of this mill with regard to the lack of landfill availability or lack of ability to burn. The Alaska Department of Environmental Conservation has been concerned about the clean air standards, has certified numerous times that this is not a water quality problem.

Mr. President, I ask unanimous consent that the letters be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

STATE OF ALASKA, DEPARTMENT OF ENVIRONMENTAL CONSERVATION,
December 22, 1981.

Mr. BOB BURD,
Director, Water Program Branch, Environmental Protection Agency, Region X, Seattle, Wash.

DEAR MR. BURD: A little over a week ago you called Deena Henkins asking for the department's views on water quality impacts if the variance request for Alaska Lumber and Pulp Company and Louisiana Pacific, Ketchikan Division was granted. Since we were not sure of the details of this request, we talked with Mr. Bodien of your staff. It is our understanding that the proposed variance would allow each of these companies to discharge an effluent with a 4-day BOD approximately equal to their existing discharge (52,500 Lb/day) and total suspended solids (TSS) would be permitted to increase from approximately 20,000 Lb/day to 53,400 Lb/day.

It is difficult for us to make a definitive statement saying that water quality will not be adversely affected. This issue is complicated by the alternative disposal methods and the lack of current data on water impacts. Of the possible alternatives disposal to the air and land are precluded by unique local conditions or may have substantial adverse effects on the environment. Therefore, the department has gone on record that disposal into the water is the preferred method. Based on a water quality survey we performed in the summer of 1980, it is our opinion that the proposed BOD level is not causing adverse impacts. Also, in our judgment, the TSS level in the current effluent is not causing significant adverse impacts on the water quality in the receiving waters, nor would the level proposed cause such impacts. It is unfortunate that we do not have any recent data which indicates how existing TSS discharge levels are impacting the floor of Silver Bay or Ward Cove. Judgment on impacts on the biological community on the ocean's floor will have to wait. We understand that the proposed variance addresses only the water quality parameters of BOD and TSS.

Substantial progress has been made in eliminating water quality impacts in Ward Cove and Silver Bay by upgrading the treatment used by these two mills. As we did at the March 10 and 11, 1981, hearing we continue to support their use of existing secondary treatment and do not advocate additional treatment for removal of TSS or BOD at this time.

Sincerely,

ERNST W. MUELLER,
Commissioner.

STATE OF ALASKA,
OFFICE OF THE GOVERNOR,
Juneau, AK, October 11, 1983.

Hon. WILLIAM RUCKELSHAUS,
Administrator, Environmental Protection Agency, Washington, DC.

DEAR MR. RUCKELSHAUS: The State of Alaska has, over the past years, consistently supported the efforts of both Alaskan pulp mills in their request for relief from the overly stringent requirements for best practical treatment under water quality discharge guidelines. Our reasons for this support are based upon a balance between close evaluation of all environmental impacts and costs to meet standards.

No recognizable benefit will be gained from the imposition of additional water quality requirements. Increased water quality control requirements will very likely result in severe economic hardship, threatening the viability of the pulp mills. The resultant loss of 6,000 primary and associated jobs would impact the whole of southeast Alaska. This is the issue of concern.

In addition, the wastewater discharge standards being imposed upon the Sitka and Ketchikan dissolving sulfite pulp mills create a sludge disposal problem. With the lack of suitable land disposal sites, both mills must incinerate the sludge, causing a costly air pollution control situation.

This incineration has stalled the mills' progress toward compliance with air quality regulations. It has resulted in extensive studies and the installation of additional process controls to cope with a significant increase in air pollutant emissions in the last four years. Future control requirements are still needed by the mills to solve the air pollution problem created by the existing wastewater treatment plants.

The Alaska Department of Environmental Conservation (ADEC) is on record as being committed to requiring both Alaska Lumber & Pulp Co., Inc., and Louisiana-Pacific Corporation, Ketchikan Division, to meet the air quality regulations for their pulp mills in Alaska. It is probable that the mills would be meeting air quality requirements if they did not have to incinerate sludge. If both mills install additional water quality treatment pursuant to EPA's proposed denial of their variances, air quality would be severely affected due to the increased amount of incinerated sludge. Of equal importance, there is no land storage space for the sludge.

The State of Alaska urges EPA to more fully examine the air pollution impact, taking into account exactly what has been done and what will be needed to get the mills into compliance with air quality regulations, due to impacts caused by wastewater treatment. This evaluation should include the costs needed to obtain necessary permits for new installations, or modifications to existing units.

These issues are not new. They have been presented to EPA both in public hearings and in other correspondence over the past five years. For your information, I have attached the ADEC testimony at EPA's March 11, 1980, public hearing, and correspondence recommending the variance for the two mills dated November 12, 1980, December 22, 1981, and March 9, 1983. This information is still valid.

We will more thoroughly discuss the above and other concerns regarding the proposed EPA actions in our presentation at the November 8 and 9 public hearings in Sitka and Ketchikan.

Sincerely,

BILL SHEFFIELD,
Governor.

STATE OF ALASKA,
OFFICE OF THE GOVERNOR,
Juneau, May 23, 1984.

Hon. TED STEVENS,
U.S. Senate,
Washington, DC.

DEAR SENATOR STEVENS: You have inquired about the probable environmental impact if the terms of the currently operable discharge limitations for the two southeast Alaska pulp mills are extended for ten years. It is my opinion that the current levels of discharge authorized afford reasonable protection from water quality problems. It also appears on the basis of analysis done to date that, due to the unique circumstances of these two mills, further efforts at BOD reduction may result in undesirable air quality problems since additional sludge will need to be incinerated.

Thus, I believe that it would not present an undue risk to the water quality of southeast Alaska, particularly in light of the total environmental millieu, to extend the current discharge limitation for these two mills.

If you desire any additional information, please do not hesitate to contact me.

Sincerely,

RICHARD A. NEVÉ,
Commissioner.

Mr. STEVENS. Mr. President, I do hope that any Member who has any question about the water quality problem will look at these letters.

I say to my colleagues that I am most concerned about the problem of whether or not this is innovative technology, which I understand may also be raised. I do have letters, if we want to get into that, from the European plants that have used anaerobic technology for simple, chemically treated effluents. They indicate that no one has demonstrated the application of anaerobic technology to a complex wastewater stream from this or any other type of industrial complex.

We believe that if it can be applied to this stream, it can be applied to similar types of effluent discharge, such as municipal sewage disposal. If we prove that, we will have enabled a whole series of plants to comply with the clean water standards by the acquisition of an entirely new and innovative technology.

Several Senators addressed the chair.

The PRESIDING OFFICER (Mr. CHAFEE). The Senator from Vermont.

Mr. STAFFORD. Mr. President, I rise in support of the amendment offered by my good friend, the distinguished Senator from Washington [Mr. GORTON]; and I do so not entirely happily, because it puts me in opposition to another good friend, the able Senator from Alaska, who has just spoken.

Mr. President, the issues presented by this amendment have a long history. The appropriations bill would give $7 million to a pulpmill that still is resisting, by every available means, pollution control requirements it was supposed to meet by 1977. This mill, which is owned by a long list of Japanese investors, has continued to operate with a large fraction of its wastes being dumped untreated. Other mills of the same type owned by American companies have been forced to install the required technology. They cannot compete fairly with the Japanese mill, which presently enjoys a $30- to $40-per-ton-price advantage.

The mill has raised a myriad of technical arguments trying to show that it somehow is different from the other mills and therefore deserves special treatment. The Environmental Protection Agency studied these claims for 4 years and determined, on the basis of an enormous record, that this mill is not different.

Mr. President, this is one of two pulpmills in Alaska that have resisted the Clean Water Act. A year ago, it was being claimed that both mills would close without immediate relief in the form of an amendment to the Clean Water Act. But statutory relief was not forthcoming. The other mill immediately entered into consent order and now is on a compliance schedule. The second mill continues to make administrative appeals. Now this body is being asked to reward this mill with a special appropriation to pay for the pollution control it has successfully avoided for a decade.

Mr. President, the Clean Water Act authorizes grants for the demonstration of innovative technology with industrywide applications. I support that provision of law, so long as it is not abused. But there should be a significant national benefit from such a grant. That is not the case here. There are only a very few pulpmills of this type in the country, and they already have installed their pollution control technology. The benefit to the Sitka mill is clear enough, but where is the national benefit? There is none.

Mr. President, this appropriation would set a bad precedent. Every Member of this body has constitutent companies that would like to get just such a Federal grant as this. If we grant a special appropriation for this one mill, then I could not blame them for demanding similar treatment. That is a road that the Congress should avoid taking, in the view of this Senator.

I urge my colleagues to join me in support of this amendment.

Mr. EVANS. Mr. President, I rise in support of the amendment offered by my able colleague from Washington, Senator GORTON.

I can certainly appreciate the concern of my colleague from Alaska about the number of jobs which may be lost if the mill in Sitka is closed.

The closing of pulpmills and papermills and the loss of constituent jobs in something that, unfortunately, I am much too familiar with in the State of Washington.

I am sympathetic to the arguments of the Senator from Alaska, but I cannot accept them. I am not willing to accept the perpetuation of competitive disadvantage that already exists between the Alaska/Sitka mill and other mills, whether in the State of Washington or throughout the country, that have spent their own, not Federal, money to install waste treatment facilities.

There are mills in my own State of Washington that already compete at a $20-45-per-ton-cost disadvantage simply because the Sitka mill has not yet spent the money to come into compliance with congressionally mandated EPA waste treatment regulations.

The mill in question has been able to avoid the necessary expenditures because they applied for a "unique circumstances" variance from Clean Water Act requirements. EPA conducted a thorough, intensive analysis of their application—an analysis that took more than 4 years to complete. Last fall, EPA denied the variance application, stating that the circumstances were not unique and that existing technology—incineration—could be used.

The Senator from Alaska suggested that that would create air pollution requirements. Those are fully taken into account by EPA; and EPA, in their denial of the variance, indicated that incineration, in fact, could be used.

Now we are being asked to fund a technology demonstration project at this mill. The language in the appropriations bill would provide $7 million for installation of a treatment system, if the system is determined to be innovative technology that would have application elsewhere.

I fully support technology demonstration projects. In many cases such projects involve untried or innovative techniques and technology and the results are extremely useful. Demonstration projects can provide, on a small scale, valuable information about how such new technology can be applied to problems that exist on a larger scale. Yet no such benefits would result from this demonstration.

The anaerobic wastewater treatment system they intend to install at the Sitka mill is not untested. At least four mills in Europe are currently using this technology, including one very similar sulfite mill in Sweden, and they have demonstrated the system is effective. Thus, the $7 million we are being asked to spend on this project is not for a demonstration or test but rather for simple installation of the system.

Mr. President, in former incarnation of many, many years ago, I was trained as a civil engineer. I spent some time as a structural engineer and I think I know something about the techniques and the elements used, at least their scientific background.

I suggest that we are being asked here not to support in what is suggested, a real demonstration project, but merely partially fund a way to handle the pollution problem which exists.

As Governor, one of my first acts shortly after I took office was to require pulp mills on Puget Sound to clean up. Many objected. Many objected on the same basis my colleague from Alaska suggests now, that deepwater discharge into Puget Sound did not require additional treatment. This is particularly true of the pulp mills that are on the Straits of Juan de Fuca that have water with tidal variance perhaps not as great as Alaska, but approaching that; mills with water very, very deep flowing by at great velocities. Those mills objected just as strenuously 16 years ago to the installation of effective discharge treatment.

But they did respond. They responded with their own funds. They did it earlier and as a result they did it cheaper.

I suggest that if this mill had done so earlier they would have saved themselves money, time, and an opportunity to have fully complied.

(Mr. STAFFORD assumed the chair.)

Mr. STEVENS. Mr. President, will my colleague yield right there or does he wish to finish his statement?

Mr. EVANS. That is all right. I will yield for a question.

Mr. STEVENS. I simply ask my friend, and he is my good friend, about the record of the recommendations region 10. For 7 years they recommended that this mill not be forced to comply, that it either be granted a variance or a waiver. For 7 full years of 8 years they have granted a waiver on an annual basis.

Until 1983 the EPA agreed entirely with the concept that this particular mill need not comply. They did not make the expenditures in the seventies because the EPA agreed they did not have to make them.

Does not make a difference in terms of the Senator's feelings about this mill now complying after being told for 7 of 8 years that it need not comply?

I have the records of that if the Senator would like to examine them.

Mr. EVANS. I do not agree that they were saying at that time or at any time that the mill did not have to comply. They were spending that time reviewing the case on the basis of repeated objections by the mill. The mill was doing everything possible to delay and to put off any response to EPA. The EPA, after considerable review of their own, did come down with a tentative and then later a final decision requiring the mill to respond.

Mr. STEVENS. Not until 1983, I say to my friend. I have the record that on three different occasions regional administrators recommended to the national level that this mill not comply, and on three occasions it was sent back to the region for some sort of an amendment to make sure that it did not have any adverse precedential value. The final decision was not made until there was a change in the EPA regional administrator. Prior to that, every regional administrator who dealt with the issue had said this mill need not comply.

The Senator's point is why did they not put in the facility back at the time when it was cheap to install? As a matter of fact, I will tell the Senator there is no existing technology which can be economically installed in order to achieve compliance.

Mr. EVANS. Let me suggest that is something I am getting to and will suggest to the Senator that perhaps there are.

Let me return to suggesting that other mills in other places have responded. They have responded earlier. They have responded effectively. They have not always responded with the good grace to the first request. But they have responded.

The old question, which my friend from Alaska has brought up again, is the question which was debated many, many years ago: The question of whether effective water or air pollution requirements ought to be based on the capacity of the receiving air or the receiving water, or ought to be based on effluent and the effective control of that effluent.

I suggest to my friend from Alaska that this question, debated many years ago, was decided many years ago and decided clearly and successively at both State and Federal levels. We decided not to leave the opportunity in any circumstance, and I am not suggesting that the Sitka mill is such a circumstance, to use up all of the receiving waters or the receiving air but rather that each one would be requested and required to use the best treatment possible on their own effluent to retain the highest quality air and water in the area.

I do not think it is really necessary, Mr. President, to read extensively from the tentative decision or the final decision of the EPA. Suffice it to say that they went through an extensive series of investigations. When my colleague from Alaska suggests that it all happened because there was a change in the Administrator, I think that is somewhat unfair. This was done based on the analysis made by the entire staff of the EPA. Finally, a tentative decision and then a final decision, after all of the facts were in

51-059 O-86-28 (Pt. 20)

and all of the objections of the mill were responded to, made a decision.

Mr. STEVENS. Mr. President, will the Senator yield there?

Mr. EVANS. Certainly.

Mr. STEVENS. My colleague and I had a meeting with this Administrator right after she took office, and the Senator can discuss the matter with the other Senator from Alaska. The regional office had three times recommended the course that this mill followed for 7 out of the last 8 years.

It was not until that administrator came in that the local staff was reversed. The whole continuum was reversed and she decided that this variance would not be granted.

I tell the Senator, I can open my files to him. I have been through this every week for the last 8 years because this came to Washington.

I respectfully have to tell my friend that if he has been informed that the staff of the EPA in region 10 did not agree with those prior recommendations, I can tell him I was personally involved in meetings with them when they did agree.

The reversal did not occur until she came to office. Had she not come to office that variance would have been granted as it should have been after 8 years, in reliance upon the position of the EPA that it would not be required.

Mr. EVANS. That is where I suggest my colleagues from Alaska and I just simply disagree. I am confident that not only the administrator but those who developed the material, who drafted and produced first the tentative and the final decision all participated in doing so. I am confident that the administrator of the region X did not go off in a closet someplace and write this tentative decision all by herself, nor that she wrote the final decision all by herself.

I think some elements of this decision are worth talking about.

The suggestion was made that there is not land sufficient to accommodate some of the alternative discharge techniques. In fact, in the submittals to the agency, reading from the tentative suggestions:

> ALP identified similar technology to alleviate its land availability problems; namely, if required to meet BPT, ALP would burn wastewater solids in a power boiler. This would enable ALP to produce energy while eliminating its excess sludges. EPA agrees that this is a reasonable approach to ALP's solid waste disposal problem. Thus, as this potential problem was anticipated by EPA and alternative technology is available to allow ALP to dispose of wastewater sludges, EPA does not believe that ALP's inability to landfill sludges is fundamentally different from factors considered in guidelines development.

They go on to discuss in detail land development, interestingly enough, in discussing the question of burning sludge—I think we ought to put it in some context:

> EPA determined that, to meet the national BPT limitations, ALP would burn about 7.5 tons of additional biological sludges per day; this is an increase of about three percent over the amount of solid waste now burned in ALP's existing power boilers. Neither ALP nor the State of Alaska DEC has identified or quantified any adverse impacts on air quality that would result from burning this additional wastewater sludge.

I suggest, Mr. President, that neither the problems raised by my colleagues of insufficient landfill or of air pollution problems were missed or not discussed or not analyzed by EPA. They were fully recognized, responded to, and approved in both the tentative and final decision.

As far as I am concerned, this is not a question, really, of one pulp mill versus another. It is not a question of anything other than one fundamental concept and that is that many years ago in this Nation we embarked on a direction that says, in essence, we do the maximum we can to keep the water and the air of our Nation clean.

Now, of course, other nations may not have done as much. Even our neighbor, Canada, which lies between us, may not have done as much. And, of course, we can do nothing about their laws.

But we can do something about ours. And ours reflect the concept—the answer to that question my colleague from Alaska mentioned, which was decided so many years ago—that it was not the capacity of the receiving air or the receiving water which counted, but it was effective control of the effluent being discharged into any receiving air or receiving water. The EPA has made a recommendation. There are effective alternatives.

I suggest that, finally, I do not understand the real rationale of the innovation contained here. As I have said, this is a process which has been used. Anaerobic treatment is hardly new as a fundamental concept. It has been used for the better part of two centuries in many other aspects, and it is now being used in pulp mills elsewhere.

But, if the idea here is an innovation which can be used elsewhere, what real good is it if other mills already have complied or are in the process of complying with the Clean Water Act requirements? Who is there to supply this innovation to if mills have already complied or are in the process of complying, including, incidentally, the rather similar mill at Ketchikan?

Mr. CHAFEE. Mr. President, I rise in support of the amendment of the Senator from Washington. This amendment would eliminate a special grant to an Alaskan pulp mill so that it could come into compliance with the 1977 Clean Water Act standards.

Mr. President, this issue is not a new one. As chairman of the Environmental Pollution Subcommittee of the Environment and Public Works Committee, I have watched this mill try for many years to find a way out of complying with these standards. In addition to asking Congress for all kinds of studies and special treatment, this mill applied to EPA for a variance. At this time last year, EPA issued a final decision to deny this mill a variance.

EPA took over 4 years of studying and analyzing this issue. They looked at every possible aspect of this mill to determine if it was a special case. They looked at land availability, energy costs, equipment costs, and on and on. In the final analysis EPA concluded that this mill was no different from any other mill in the industry. In fact, this same mill even asked EPA to establish a special industry subcategory of standards for it because of its so-called specialness. And EPA denied that request, also.

As my colleagues are well aware, Congress established the national water pollution standards back in 1972. It has been a long time since we discussed the theory behind those standards. Allow me to remind my colleagues that back in the old days different States would entice industries to locate within their borders by offering lower pollution control standards. This is a great technique. "You do not have to be so stringent as in your State. In our State, come here and build your plant."

Now, in addition to causing terrible pollution problems, this also caused great competitive advantages of one company over another. One of the purposes of the national standards was to eliminate those aspects of competitive advantage that were based on differences in pollution control requirements. We now have Federal industry-wide standards that all companies must meet.

The only way out is to get an EPA variance, which this Alaskan mill applied for and was denied. If we provide a special grant to this Alaskan mill, we would be perpetuating the very inequity that we hoped to eliminate by creating the national pollution standards.

By virtue of its noncompliance, this mill has had a competitive advantage ever since 1977. I do not think we ought to weep great tears over this mill. They have not been in compliance since 1977.

If we ask our Federal taxpayers to spend $7 million of their money to bring this mill into compliance, we are adding insult to injury.

It is my understanding that not a single cent of Alaskan money, the State of Alaska money, is being requested to help this mill meet these requirements that are so severe that they now want Federal money for. In other words, it is of great State importance to Alaska, but not of such importance they are willing to spend a

nickel of their money on, that is State money.

I could be corrected, but it is my understanding the State of Alaska just sent out something like $400 to every citizen in Alaska from its oil trust fund, amounting to well over the amount of money that would be required to keep this mill up and save these jobs.

So I urge my colleagues to remember that we all have plants in our States we would like to help out. What prevents us from helping is the basic unfairness of the request. Every pulp mill in the country has complied or is in the process of complying with the standards. Every other plant in the country has to comply with national standards. This company wants a separate deal. They want the U.S. Government to pay for their coming into compliance. I urge my colleagues to vote for the amendment of the Senator from Washington.

Mr. MURKOWSKI. Mr. President, it is indeed disturbing to participate in this debate and recognize that what we have at stake here is the demise of one corporation for the benefit of another. I did not have the opportunity to hear the statement of the senior Senator from Washington, but I do not think there is any question that we have here a situation where ITT Rayonier has made it very clear they would like to see the Alaska Pulp Corp. no longer in the marketplace.

This is not something that has come up recently as a consequence of the debate before us on the $7 million improved technology grant proposal for the APC facility, but indeed goes back to a former period of time when ITT Rayonier was marketing pulp from a mill in Canada. I will acknowledge that that arrangement is no longer in effect but the facts remain that it was a worthwhile relationship, and the mill in Canada did not have to live by the environmental standards that the American pulp mills are required to live by.

Further, Mr. President, another point that has been brought up first by my colleague from Washington, Senator GORTON, and the chairman of the Environment and Public Works Committee, Senator STAFFORD, and I think touched on later by my colleague from Rhode Island, Senator CHAFEE, was that the Alaska Pulp Corp. has not made a good faith effort to be in compliance.

I think what needs to be stressed, Mr. President, is the reality that Alaska Pulp Corp. has spent nearly $66 million to comply with EPA water quality standards. This is a matter of record. Yet, my two colleagues who have spoken previously would have you believe that they have not spent anything. What we have here is the fact that the APC mill at Sitka, in expenditure of this $66 million has met about 90 percent of the compliance standard. What we are suggesting now is that in order to meet the balance remaining, approximately 10 percent, why the Senate is not disposed to support a $7 million technical grant that could go a long way into bringing the mill into compliance.

I would like to refer to a statement made by the junior Senator from Washington concerning the improved technology grant. I ask unanimous consent that a letter to Mr. Lee Thomas, Administrator, Environmental Protection Agency, dated October 15, 1985, by AC Biotechnics, Inc., Woodbury, NY, be printed in the RECORD.

The quote is "anaerobic technology development is at a crossroads of sorts. It has been used to treat chemically simple waste streams both here in North America and in Europe but up to now it has not"—and I emphasize, Mr. President, it has not—"been used to treat chemically complex waste."

So the suggestion by the junior Senator from Washington that this is technology that has been around for a while is true, but while it is not new this proposal to use improved technology is certainly within the innovative and improved grant concept embodied in the Clean Water Act.

I think, Mr. President, it is noteworthy to recognize that the EPA Regional Administrator in the State of Washington, Mrs. Ernesta Barnes, in a telegram—which I will ask unanimous consent to submit for the RECORD—was also responsible for denying the APC waiver, is supportive of this grant. I refer to the telegram which I will read. It is very brief.

I would like to reply to your July 26, 1985 telegram.

This is a telegram to my colleague, the senior Senator from the State of Alaska.

The anaerobic waste treatment process being evaluated by Alaska Pulp Corporation is new and improved technology when applied to the pulp industry. We are optimistic that it can increase waste treatment efficiencies and at the same time reduce treatment costs. The data generated by such a process in Alaska would have nationwide application to similar facilities. If the anaerobic system was installed, it would aid the permitting process at APC.

I submit to you and my colleagues that have spoken against the amendment that here we have the administrator who is directly responsible for the oversight process, is in support of this $7 million technology grant. I also have a letter from EPA Administrator Lee Thomas, directed to my colleague, the senior Senator, dated September 19.

I ask unanimous consent that the entire letter and the telegram be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AC BIOTECHNICS, INC.,
INDUSTRIAL BIOTECHNOLOGY,
Woodbury, N.Y., October 15, 1985.

Via Federal Express Zap Mail

Hon. LEE M. THOMAS,
Administrator, Environmental Protection Agency, Washington, DC.

Re Anaerobic Wastewater Treatment Demonstrations Alaska Pulp Corporation, Sitka, Alaska

DEAR MR. THOMAS: This letter is written with regard to the contemplated demonstration of anaerobic wastewater treatment technology at the Alaska Pulp Corporation's mill in Sitka, Alaska.

Our company, AC Biotechnics, Inc., is an engineering company principally engaged in the design and construction of industrial wastewater treatment facilities. Our involvement in this field has included conventional aerobic approaches, the above-mentioned anaerobic technology and combinations of both. Over the past few years, we have come to concentrate, to a large extent, in the anaerobic area, primarily due to the markedly improved cost effectiveness of such systems as compared against conventional technology.

Historically, pollution control has been viewed as a necessary expense (capital and operating) and not as an investment that would yield a return. In the wastewater treatment area, conventional aerobic technologies have been widely applied and generally been very successful at achieving the environmental goals set forth. Conventional anaerobic technology, however, is fairly expensive to install, requires large amounts of energy for operation (primarily for aeration) and generates large amounts of waste sludge, which in and of itself, represents a separate and sometimes difficult solid waste environmental disposal problem.

In contrast to the above, anaerobic technology can yield a significant return on capital employed. With this technology, the organic material in the wastewater is converted to a recoverable biogas (principally methane and carbon dioxide). When this biogas is recovered and burned, the cost effectiveness of wastewater treatment is radically improved. In addition to the biogas recovered, total system energy requirements can be reduced by an order of magnitude as can the amount of waste sludge material produced. The reduction in waste sludge produced should be underscored because disposal costs and other potentially harmful environmental effects associated with solid waste disposal (air pollution if sludge is burned and leaching if it is buried) are greatly diminished.

If the benefits of anaerobic technology are so striking when compared against conventional technology, the logical question is why has the technology not taken hold in the United States. This is a valid question and has a several part answer:

1. Conventional anaerobic technology has been in use for many decades for the treatment of liquid waste streams. The use of anaerobic technology has been limited to food type waste and other chemically simple waste streams. It has not been used to treat chemically complex wastes like the pulp mill bleach plant components Alaska Pulp plans to treat from its waste stream.

2. Over the years, the consulting engineering community has assumed an extremely conservative posture with regard to design. This orientation has its roots in the municipal wastewater treatment industry, where an engineering company, representing a city or town, would design a wastewater treat-

ment system with an over-abundance of safety factors and redundancy, knowing full well that the bulk of the capital cost would be paid for by the Federal Government via the construction grants program. When the major movement in industrial wastewater treatment began in the 1970's, these same engineers performed the bulk of the design work with the same conservative orientation. Industry scrutiny eliminated much of the unnecessary redundancy in design, but no incentive existed to test out innovative design concepts.

3. Sludge disposal was not considered a major problem at the time the municipal and industrial waste water treatment plants were being designed and constructed. There was no incentive to focus on technologies which reduced sludge production, like anaerobic technology.

4. Energy costs have also proved to be an important factor. Costs for fuel and electricity were relatively low for many years. In the mid 1970's, cost for fuel and electric power rose significantly.

5. The next generation of waste treatment systems are now being designed with the energy and environmental realities of the 1980's influencing those designs. So far, there has been no demonstration in Europe, Japan or North America of a full scale anaerobic system which treats the chemically complex wastes produced by industrial and municipal systems. It is important that this technology be demonstrated now so that it can be included in designs for the new systems.

Presently, anaerobic technology has received limited acceptance in U.S. industry. In most cases, as in Europe, the applications have been relatively small and have primarily treated chemically simple waste streams. In Europe, where anaerobic systems have been used for treating waste from three pulp mills, it has been used mainly to treat a chemically simple component, not an entire waste stream.

Although our company obviously has something to gain from any government assistance that would facilitate demonstration of the technology, many valid reasons exist that justify involvement by our Federal Government to assist with technology development.

The specific case of Alaska Pulp Corporation deserves some comment. First, Alaska Pulp is in the pulp and paper industry. This industry is large, energy-intensive and undoubtedly represents an industry that could benefit from anaerobic technology. This industry can be characterized as conservative from a technology standpoint and spends a great deal of time and money on environmental-related research activities. In the environmental area, they also communicate rather freely in seeking solutions to common problems. This is an important factor in selecting a suitable demonstration location.

Alaska Pulp Corporation's mill, at Sitka, is large and certain testwork will be required to gather the necessary process design data before a full scale design can be established. We are fully aware of the specific components of the wastewater at Sitka and consider it to be an ideal candidate for anaerobic treatment from a process standpoint. Once the necessary design data are gathered (this could take as long as one year), we are confident that a reliable full scale system design can be established.

Regarding system design and performance, a comment is needed regarding the risk to the Federal Government and Alaska Pulp. Under the municipal construction grants program, billions of Federal dollars were awarded for the construction of plants designed by consulting engineering firms. These engineers were not held directly accountable for the performance of systems that were constructed. This is not the case with engineering firms like AC Biotechnics, that operate exclusively in the industrial market. Speaking strictly for our company, when given the proper data base from which to establish a process and system design, we are fully prepared to guarantee the performance of the system constructed.

Anaerobic technology development is at a crossroads, of sorts. It has been used to treat chemically simple waste streams, both here in North America and in Europe. Up to now, it has not been used to treat chemically complex wastes. We are now at the point in the research and development of anaerobic systems that a full scale demonstration facility needs to be built and operated. Until this is done, industries and municipalities which must treat chemically complex wastes, which have sludge disposal problems and are faced with ever increasing operating costs associated with conventional aerobic systems, will be unwilling to make an investment in this still unproven technology.

Once a full scale anaerobic system which treats chemically complex wastes has been demonstrated, we expect many industries and municipal waste treatment systems to add anaerobic systems to their conventional aerobic systems and to make it a part of new systems still under development.

This is an important next step. I would be happy to provide any additional information that may be required.

Sincerely yours,

WILLIAM A. BONKOSKI,
President.

U.S. ENVIRONMENTAL PROTECTION AGENCY,
Washington, DC, September 19, 1985.

Hon. TED STEVENS,
U.S. Senate, Committee on Appropriations, Washington, DC.

DEAR TED: Thank you for your letter of September 18, 1985, regarding the $7 million grant for a demonstration project in Alaska under Section 105(c) of the Clean Water Act.

You asked three questions:

1. Would the demonstration project meet the improved technology requirements of Section 105(c)?

While we do not consider anaerobic treatment technology to be new, *we would consider such a system to be an improvement* for this mill if, as Alaska Pulp Corporation asserts, this system (1) is demonstrated in combination with the mill's existing activated sludge treatment system to be more cost-effective in removing biochemical oxygen demand (BOD) from the mill's effluent than if a conventional aerobic treatment system were used, (2) recovers energy in the form of methane sufficient to pay for all or a significant portion of the operating and maintenance costs of the anaerobic system, (3) reduces the total land area required for technology to comply with the nationally applicable BOD limitations reduced from that required for conventional aerobic treatment, and/or (4) reduces the total wastewater solids generated by the combined anaerobic and existing activated sludge system below that generated in a completely aerobic system.

2. Would the results of such a project have nationwide application to similar facilities?

Yes, anaerobic treatment could have industry-wide application. This might include (1) the limited number of situations similar to this mill where there is limited land availability for treatment system construction and solid waste disposal and (2) cases where permit conditions, based either on the national guidelines or on water-quality considerations, are not being met and existing aerobic systems must be augmented. Other mills are exploring this option; for example, at least one U.S. mill has already employed anaerobic treatment without energy recovery to supplement an existing aerobic lagoon system to meet State water quality criteria.

3. Would this aid in permitting the facility? The demonstration project would aid in permitting if the mill (1) agreed to meet the best practicable control technology requirement (BPT) for biochemical oxygen demand promulgated in 1976, 40 CFR Part 430.112 and (2) withdrew its request for a fundamentally different factors variance and for resubcategorization of 40 CFR Part 430 to establish a separate subcategory for Alaska pulp mills. If the mill did not withdraw its variance and subcategorization requests, funding of the demonstration project would leave unresolved when, if ever, a permit containing the national BPT effluent limitations would be uncontested.

I hope that this provides the information that you seek. I should point out, however, that funding for this project is not consistent with the priorities contained in the President's Budget.

Sincerely,

LEE M. THOMAS.

[TELEGRAM]

From: ERNESTA B. BARNES, Regional Administrator, region 10.

To: Senator TED STEVENS, 260 Russell Senate Office Building, Washington, DC.

I would like to reply to your July 26, 1985, telegram. The anaerobic waste treatment process being evaluated by Alaska Pulp Corporation is new and improved technology when applied to the pulp industry. We are optimistic it can increase waste treatment efficiencies and at the same time reduce treatment costs. The data generated by such a process in Alaska would have nationwide application to similar facilities. If the anaerobic system was installed, it would aid the permitting process at APC.

Let me know if further information is required.

Mr. MURKOWSKI. To the question could the results of such a project have nationwide application to similar facilites, I read the answer from Mr. Thomas: "Yes, anaerobic treatment would have industrywide application."

So I think the support of the improved technology grant, of not only the Administrator of EPA, Mr. Thomas, but the region 10 administrator, certainly speaks for itself.

It disturbs me, Mr. President, to reflect on just what we are undertaking here. It reminds me of a bit of a cannibalistic process. What we have here is a wood production industry in the United States that is going through a difficult time. And obviously the idea of lessening competition within the industry benefits the survivor.

Mr. President, at stake here, as my colleague so eloquently stated, is the survival of an industry, the survival of a community, and it is a very real issue. The likelihood of the mill shutting down in Sitka would have a devastating effect throughout southeastern Alaska, not just on the community, but the logging industry as a whole, and those who live off it. I might add that the timber industry is the fourth largest industry in our State, Mr. President. We do not have a lot of pulpmills. We have two pulpmills in our State. Both have had a very difficult time as well as other pulpmills on the west coast. But there are some significant differences that have not been pointed out in the debate so far. The pulpmills down in the State of Washington, and the pulpmills in other States in this country, do not have to generate their own power. They have the availability of power generation from existing power grids. That is not the case in the Sitka mill. They have to generate their own power at considerable cost. The statement has been made in the debate concerning the ability to go ahead and burn the sludge. We have documentation from the State of Alaska, Department of Environmental Conservation, that indeed to initiate the burning of any sludge would have an adverse impact on Clean Air Act standards. The ability to store sludge in that particular environment, because of the severe sliding that comes from the topography of the land, eliminates that as a possibility.

So, Mr. President, basically we are left with the reality of how you get there from here.

As we reflect on how to resolve this issue, I, for one, would rather spend my energies trying to assist the entire timber products industry in its recovery efforts rather than to kill one particular firm so that others can benefit. I find it peculiar, Mr. President, as we reflect on just what kind of competitive situation we are in because the major mills in the State of Washington operated by ITT operate under an acetate permit. Both are under the general dissolving pulp category of sulfite pulp, but the acetate process is a specific process which produces an entirely different type of pulp than the pulp produced by the Alaska mills which is viscose pulp.

My colleague has indicated that the major competitive markets for the viscose pulp come from pulpmills in South Africa. Perhaps we should suggest that our colleagues reflect on the merits of limiting pulp from South Africa coming into this country. Certainly, that pulp does not have to be produced under the stringent and worthwhile environmental laws that we have in the United States.

But the point is, Mr. President, what we have here is a mill that has complied, they have expended funding, and they are quite correct and quite right in requesting from EPA a statement on the appropriateness of pursuing improved technology.

It would be very difficult to argue the merits of this, Mr. President, if indeed the Administrator of EPA and the region 10 administrator had not specifically recommended it. But the fact is, Mr. President, they have recommended it.

I would like to turn to other specific areas that I think should be addressed for the record. I find it extraordinary that in an issue such as this, there are responses from some of the media, that are generated with no effort to contact or interview either of the Senators from the State of Alaska with regard to their accuracy.

The allegation has been made publicly, Mr. President, that the Sitka mill discharges 16 million gallons a day of partially treated waste into Alaska waters.

That is incorrect, Mr. President. All waste discharged from the mill has previously received primary and/or secondary treatment. Before pollution control was installed in early 1970, the mill was discharging 270 pounds of BOD per ton of bulk. But that has been reduced to 75 pounds of BOD at the cost of $66 million.

I take issue with my colleagues who generalize and say the mill has not made any effort to meet the environmental quality of water standards. EPA new standards would require an additional reduction of 20 pounds of BOD which will cost the mill an additional $35 million. That is the point; that is the fact.

The State of Alaska has certified—and this is what is so incredible to me, incredible to me that we cannot penetrate the mentality of the Environment and Public Works Committee—the State has certified that this additional reduction would have no benefit whatsoever to the water quality in our State. That has never been acknowledged by the committee.

There has been an allegation that the mill has refused to comply with the standards set forth in the Clean Water Act amendments of 1977. The mill is in compliance with its current permit. The mill is now working to comply with the Clean Water Act. They have reduced the discharge from 275 to 75 pounds of BOD. As I have indicated, to reduce it further the amount I stated, would cost them an additional $35 million without improving water quality.

This is specifically why EPA gave tentative approval for a variance prior to a change of administrators within EPA Region 10. These are facts. They are documented. They are in our files.

The mill is contesting the requirement for the additional reduction of 20 pounds. EPA until 1983, through actions and regulations, has always treated the mill differently because of its uniqueness, and its uniqueness, Mr. President, is that it is the only mill in the country that has to generate its own power; it is the only mill in the country that has the topography so unique to southeastern Alaska.

There is a further allegation that the timber is further subsidized through the Forest Service at the rate of $171 per 1,000 board feet sold. That is thrown up to both myself and the senior Senator as an issue that comes time and time again.

But, Mr. President, as a means of preserving wilderness, not underwriting the timber industry but preserving wilderness—certainly the environmental interest, ANILCA provides the Tongass Forest in southeastern Alaska where the mill is located receives $40 million annually to increase timber production on lands not withdrawn for wilderness. As a consequence of the land exchange, it was necessary to make additional timber available after the wilderness set-asides. These were areas not in the original allotments. So the expense is not to timber activities in Alaska but it is to support the wilderness system. It is for wilderness. This point is missed so often by those who so casually look at the situation in Alaska.

My colleague has already indicated the allegation that Alaska Senators were responsible for killing the Clean Water Act last year.

Mr. President, I happen to know where some of that emanated from, and it emanated from the staff of the Environment and Public Works Committee. I take issue with that. It bothers me a great deal how some of the staffs, professional staffs that we have on the various committees, can dictate policy that is indeed a responsibility of the Senators themselves.

That is absolutely untrue and every one of my colleagues is aware of it.

There were 41 differences in the House and Senate bill last year. Alaska Senators were informed that many of the other differences would be needed to be resolved even before getting to the pulp mill issue. We all know that that is a fact. We did not kill it. It died its own death.

The allegation was made that the demonstration project is not innovative, it is widely used in other industries and by European pulpmills.

I have already commented on that, Mr. President. We are not contending that it is innovative but that it is improved, and by the testimony submitted for the RECORD by Mr. Lee Thomas, of EPA, I think it stands on its own that EPA has indicated that the technology is improved and has a nationwide applicability.

I would state for the RECORD, Mr. President, that the anaerobic technol-

ogy has never been used on a chemical complex waste system such as the by-product of the Sitka mill. This would be the largest anaerobic facility in the United States, and if it works, Mr. President, other industrial users and municipalities having large volumes of chemical complex waste streams, such as municipal sewage treatment plants, could utilize the technology.

The allegation has been made that other U.S. mills are operating at a cost disadvantage because they paid for their own equipment. That has been stated in the debate here today.

Alaska Pulp Corp. [APC], has already outspent ITT on pollution control equipment, yet the allegation has been made that APC has not been expending funds.

The PRESIDING OFFICER (Mr. CHAFEE). The Senate will be in order. The Senator has the right to be heard.

Mr. MURKOWSKI. I thank the Chair.

Alaska Pulp Corp. has already outspent ITT on pollution control equipment. ITT has spent an average of $52 million on three of its mills; APC has spent $66 million and will have to pay at least another $3 million to implement the technology, bringing the amount spent by APC far above ITT Rayonier.

The allegation has also been made that the taxpayers should not pay for a Japanese-owned company to cease pollution. My colleague, Senator STEVENS, touched on the background and history of the Sitka mill. It was the first United States investment by Japanese encouraged by the Eisenhower administration after reconstruction.

But the benefits are not to Japanese investors, but to Americans—residents of Alaska, contributors to the economy. The grant would not give competitive advantage to APC. APC has already outspent ITT on pollution control. Labor, production, and transportation costs also keep APC's cost of production above any other mill.

Everything in the APC mill at Sitka is shipped in by barge from the lower 48, all the chemicals, everything used in the mill. The only product native to the process is the timber.

No other mill in the United States is really a direct competitor of APC with exception of the mill at Ketchikan.

The allegation has been made that the effort to obtain funding for the pulpmill is inconsistent with standards on reducing the deficit, trade imbalance, and pollution. Reducing the deficit is obviously important. Keeping a basic industry alive, which provides jobs and stimulates economic growth, is consistent with the administration's supply-side theory of reducing deficits. In addition, the technology could save other industries and local, State, and Federal Governments millions for water pollution control. So it does have an application uniformly, Mr. President.

I advise that the mill, with its annual sale of pulp of about $120 million a year, is a significant contributor to a positive balance of payments with our neighbors in the Far East—Japan, Korea, Taiwan. So it does make a significant overall contribution to the U.S. economy.

One of the things that I find a bit amusing is that my colleagues from the State of Washington who are objecting to the technology grant are at the same time very much opposed to the concept of assisting some of our domestic industries, as evidenced by the debate that we had the other day on the textile bill. It seems inconsistent, if you will, that they are perhaps motivated by the significant contribution that Japanese trade makes in the Puget Sound area, particularly, but here is an inconsistency, they are opposed to the continuation of a mill that is owned by Japanese but has no Japanese workers or labor force associated with the operation of that mill.

I observe my colleagues from various other States trying to encourage Japanese investment within their own areas to where today, I understand, we have some $58 billion worth of Japanese investment in the United States—we have Mazda in such places as Flat Rock, MI; Honda in Marysville, OH; and I could go on and on.

Alaska is no different from anybody else, Mr. President. We have Japanese capital, the first of Japanese capital that came into this country, and we are selfish enough to want to keep it.

Mr. President, I have gone on at some length to try to counter some of the negative aspects and clarify the RECORD. I refer specifically to two editorials that attack the stance of my senior colleague [Mr. STEVENS] and myself, from the New York Times and the Washington Post, on this issue. I find it extraordinary that neither one of them made any attempt to contact our offices for any comment on the accuracy of either of those stories. So, as we consider the merits of this debate, I think it is indeed unfair that there is so much generalization on this particular issue.

Alaskans are very proud of the quality of our air and proud of the quality of our water. We intend to use the very best available technology to maintain the pristine state that we presently enjoy. But the facts of the operation of this mill cannot be understood by just participating in this debate. As Senator STEVENS has said, he has seen the mill and walked through it. I have seen the mill.

Some of the best fishing that exists in the Sitka area is adjacent to that mill. So the suggestion that the effluent that is being discharged is harmful in the sense of the general terms of pollution is absolutely incorrect. As I have indicated in my statement, 90 percent of the effluent guidelines have been met. The balance, we hope, could be met by the application of improved technology.

It seems to me, with the money that is spent around here, $7 million could go a long way if, indeed, it does work for the benefit of our entire Nation as we face pollution problems that obviously do need attention, and have no merit at all in comparison to the situation that is before us in Alaska. I assure my colleagues that Alaskans are not going to stand by and allow our State to be victimized by pollution. The very fact that the State of Alaska, in its very stringent permitting process, has come to the conclusion that the original waiver which was proposed would be consistent with the application of EPA guidelines and that any further effort to meet EPA qualifications suggested under their current order would have no beneficial effect on water quality standards whatsoever, is the question that has to be dealt with.

Obviously, the State of Alaska supports a waiver for the mill. Mr. President, I ask unanimous consent to have printed in the RECORD a letter from Governor Sheffield indicating support for the improved technology. It is not an emotional support; it is support based on the State department of environmental services and their analysis that the water quality is no problem.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

STATE OF ALASKA,
Juneau, AK, October 11, 1983.

Hon. WILLIAM RUCKELSHAUS,
Administrator, Environmental Protection Agency, Washington, DC.

DEAR MR. RUCKELSHAUS: The State of Alaska has, over the past years, consistently supported the efforts of both Alaskan pulp mills in their request for relief from the overly stringent requirements for best practical treatment under water quality discharge guidelines. Our reasons for this support are based upon a balance between close evaluation of all environmental impacts and costs to meet standards.

No recognizable benefit will be gained from the imposition of additional water quality requirements. Increased water quality control requirements will very likely result in severe economic hardship, threatening the viability of the pulp mills. The resultant loss of 6,000 primary and associated jobs would impact the whole of southeast Alaska. This is the issue of concern.

In addition, the wastewater discharge standards being imposed upon the Sitka and Ketchikan dissolving sulfite pulp mills create a sludge disposal problem. With the lack of suitable land disposal sites, both mills must incinerate the sludge, causing a costly air pollution control situation.

This incineration has stalled the mills' progress toward compliance with air quality regulations. It has resulted in extensive studies and the installation of additional process controls to cope with a significant increase in air pollutant emissions in the

last four years. Future control requirements are still needed by the mills to solve the air pollution problem created by the existing wastewater treatment plants.

The Alaska Department of Environmental Conservation (ADEC) is on record as being committed to requiring both Alaska Lumber & Pulp Co., Inc., and Louisiana-Pacific Corporation, Ketchikan Division, to meet the air quality regulations for their pulp mills in Alaska. It is probable that the mills would be meeting air quality requirements if they did not have to incinerate sludge. If both mills install additional water quality treatment pursuant to EPA's proposed denial of their variances, air quality would be severely affected due to the increased amount of incinerated sludge. Of equal importance, there is no land storage space for the sludge.

The State of Alaska urges EPA to more fully examine the air pollution impact, taking into account exactly what has been done and what will be needed to get the mills into compliance with air quality regulations, due to impacts caused by wastewater treatment. This evaluation should include the costs needed to obtain necessary permits for new installations, or modifications to existing units.

These issues are not new. They have been presented to EPA both in public hearings and in other correspondence over the past five years. For your information, I have attached the ADEC testimony at EPA's March 11, 1980, public hearing, and correspondence recommending the variance for the two mills dated November 12, 1980, December 22, 1981, and March 9, 1983. This information is still valid.

We will more thoroughly discuss the above and other concerns regarding the proposed EPA actions in our presentation at the November 8 and 9 public hearings in Sitka and Ketchikan.

Sincerely,

BILL SHEFFIELD,
Governor.

Mr. CHILES. Mr. President, I support the amendment offered by the Senators from Washington to strike the provision in this bill which provides a $7 million appropriation for the construction of a demonstration anaerobic wastewater treatment system at an Alaska pulp mill. I can understand and appreciate the legitimate interests of the Senators from Alaska in attempting to address the very real economic problems surrounding this pulp mill in their State. This is not the first time the problem facing the Sitka, Alaska, pulp mill has been brought before the Senate. Quite frankly, I believe the Senators from Alaska are doing their jobs by working to help this company. However, I believe I must do my job and oppose this direct appropriation to the Alaska mill because of the adverse impact it will have on a company operating in the State of Florida.

I support the amendment to strike this provision in the bill because I believe the $7 million appropriation is both unwise and unfair. It is unwise in terms of setting a precedent for singling out individual private companies to receive Federal grants in order to comply with mandatory Clean Water Act requirements, and it is unfair in that it penalizes other U.S. companies who have complied with pollution control laws that were to have been met by July 1977.

I want to share with my colleagues a little background on this particular situation. The Alaska lumber and pulp mill is not in compliance with requirements of the Clean Water Act concerning BPT effluent limitations. These requirements were to have been met by July 1977, but for some years now the Alaska mill has sought an administrative waiver from the law's requirement. After its lengthy study of the variance request, EPA rejected the request. EPA concluded that the Sitka mill was not significantly different or unique from other mills of its type. EPA further concluded that there were no extraordinary reasons why the mill could not use conventional technology to treat its wastes or meet BPT. Additionally, an attempt was made in the 98th Congress to grant a special statutory exemption from normal Clean Water Act requirements. This effort failed as well.

Mr. President, ITT Rayonier owns two pulp mills in Washington and in Florida that make the same grade of viscose pulp and, therefore, compete directly with this Alaskan mill.

The plant that ITT-Rayonier owns in Florida does make the same grade of viscose pulp and therefore does compete directly with this Alaskan mill. The plant in Florida had to expend $58 million in order to meet the clean water requirements. I have been told that these mills compete at a $25- to $45-per-ton cost disadvantage specifically due to the Alaska mill's noncompliance.

The Fernandina mill has not been very successful in competing for viscose pulp business in recent years. This coincides with the installation of waste treatment facilities at the Fernandina mill which have added about $185 in costs/ton of pulp produced. In 1980, Fernandina sold 5,000 tons of viscose pulp to the People's Republic of China. The Alaska mill also sells to the PRC. Since 1980 and until 1985, Rayonier has been unsuccessful in competing in this market. While the Washington State mill has been able to just recently enter this market,

Fernandina has not been able to compete in this market since 1980. To award a specific appropriation to the Alaska pulp mill would permit the mill to retain the strong competitive advantage that this facility enjoys under noncompliance with existing statutory requirements.

In summary, Mr. President, let me emphasize that if the company qualified for relief from statutory requirements because of extenuating circumstances, then that relief, when appropriate, should be granted through the administrative process. A waiver was, in fact, sought by the mill but was denied on its merits by the Environmental Protection Agency. To receive relief now from mandatory, statutory pollution control requirements by receiving a Federal appropriation undercuts the intent of the Clean Water Act and unjustly penalizes other companies who have spent their own funds to comply with the law.

I urge the adoption of the amendment.

Mr. President, I urge the adoption of the amendment.

Mr. GORTON addressed the Chair.

The PRESIDING OFFICER (Mr. GOLDWATER). The Senator from Washington.

Mr. GORTON. Mr. President, my distinguished colleague, the senior Senator from Alaska, has spoken with both passion and fervor in favor of this subsidy to the Alaskan mill. He has, however, omitted any discussion of at least two points which were made in favor of this amendment. The first of these points is if in fact the survival of the mill in Sitka depends upon this subsidy, which I may say I find to be doubtful, and if in fact so many jobs are dependent upon it, it is highly curious that the State of Alaska has offered no subsidy, no share of the subsidy which is sought here. Given the wealth of that State, one would have thought that long since the State of Alaska would have helped this vital employer to comply with the law if it felt it justified to do so. Apparently, however, there is intense opposition to this subsidy in Alaska itself, and it may well be that the legislature of that State would be unwilling to provide this assistance. In any event, it is totally inappropriate to ask for it from the people of the United States. Nor did the distinguished senior Senator from Alaska refer to in any respect the fact that this mill and the other mill in Alaska are already subsidized by the Federal Government with respect to the installation of their production control equipment by the Forest Service in its charge for the raw materials which they use.

Now, we are here quite literally being asked for a double dip, a direct subsidy on top of an indirect subsidy already offered to them.

The primary points, however, which the Senator from Alaska makes, first, is this is an important and innovative, improved new technique and we must therefore direct the Environmental Protection Agency to grant this $7 million on its behalf.

Mr. President and my fellow Senators, I want to emphasize to you that my amendment does not seek to take any authority from the Environmental Protection Agency which it already has. This bill includes almost $220 million for research and development on the part of the Environmental Protec-

tion Agency. Nothing will be accomplished by the passage of this amendment which will prohibit ALP from competing for that money. If, in fact, as the junior Senator from Alaska says, the EPA regards this as a very important and innovative, new technique, it is perfectly capable of granting an application to ALP for this amount of money or any other amount of money in competition with all other such grant requests. What the twin amendment of the Senator from Alaska now included in this bill does is to say that the EPA shall not make that judgment in comparison with other applications. It is for all practical purposes a direction that this grant be given. If my amendment passes, it can still be given if in fact their case is correct.

Next, we have heard a great deal about the fact, presumably the uncontroverted fact, according to the senior Senator from Alaska, that this mill has already paid more money for the correction of pollution than has any of its competitiors. We do agree on one thing: The three ITT mills in the United States, in the lower 48, have spent an average of $52 million each in complying with the Clean Water Act. The claim of the two Senators from Alaska, however, is that this ALP mill has already spent 66 million such dollars.

Not so, Mr. President. It is simply the claim of ALP that it has spent $66 million on polution control equipment. EPA has specifically found that only $44 million of that amount were in fact spent to construct pollution control equipment.

Mr. STEVENS. Will the Senator yield?

Mr. GORTON. The Senator will not yield at this point. He will at the conclusion of his remarks. ALP has gone to the Environmental Protection Agency in connection with its request for a waiver with this claim of spending $66 million and has had that claim rejected, with only $44 million of it allowed as spent. In other words, the ALP mill has spent less than its competitive mills in the lower 48 by direct comparison by the findings of the EPA.

The fundamental policy of the Clean Water Act, Mr. President, is that it will deal and require certain techniques. There was great debate in the Senate and in the House of Representatives at times before I was a Member here as to whether or not pollution control should be judged by the quality of receiving waters or on the basis of specific technology requirements. For better or worse, the Congress of the United States decided the latter. The reason that it decided the latter, as the senior Senator from Alaska, who was then a Member of this body, has already correctly stated is that it did not want to give competitive advantages to one mill or another; that, therefore, they should all have an analogous type of equipment.

That is what this debate today is about. This mill seeks to avoid the requirment that it pay for its own equipment. In fact, the so-called innovative equipment, or the technique which it seeks, is less expensive than the standard method of responding to this clean water challenge which has been adopted by each of the competitive mills.

In summary, Mr. President, if, in fact, this is truly innovative technology, it can be granted by the Environmental Protection Agency without the special treatment which this mill seeks to have provided through the initiative of the senior Senator from Alaska.

Second, the question before us is not whether or not the Environmental Protection Agency should have granted a waiver at sometime in the past, whether the regional directors wanted to do so sometime in the past. The question is now who will pay for its compliance with the Clean Water Act, the mill itself or the people of the United States through the EPA.

Third, the expense of complying, even if the entire expense is placed on the company itself, will still leave it having spent less than its competition in the lower 48, not more.

Fourth, there is clearly competition; there would be no debate here in all probability were these mills not competitive. The Senator from Alaska correctly pointed out that the ITT Rayonier mill in Florida does in fact directly compete with this one in the same category of produce. So in the past, and perhaps in the future, have those in the State of Washington.

And, last, of course, if this is vital to the future of the economy of the State of Alaska, it would be appropriate for the State of Alaska to come up with this subsidy, which presumably legally and validly it can do. It has not done so.

This is a question of whether or not fundamental fairness will apply and the same rules of compliance at their own expense will be absorbed by this recalcitrant mill, which has fought 10 years against the requirement of the Clean Water Act; whether it will abide by the same rules as do all of its competitors or whether its very recalcitrance, its very refusal, its very tenacious fight against these requirements will be rewarded by having the people of the United States pay for its compliance.

Mr. MURKOWSKI. I wonder if my colleague will yield for a question.

Mr. GORTON. Yes.

Mr. MURKOWSKI. The statement was made why did Alaska not come up with the dollars. My question to the senior Senator from Washington specifically is: Why would Alaska even address the issue of coming up with assistance when the appropriate and responsible Department that oversees environmental matters in the State of Alaska has indicated that it does nothing for water quality of any kind and, as a consequence, there is no need to comply because it will have absolutely no effect on water quality?

Mr. GORTON. In answer to that question, I say to my friend from Alaska, the reason why this money is being sought here by the senior Senator, in this bill, according to his own statement, is to prevent this plant from going out of business.

While I am not willing to accept that this modest amount is the make-or-break element for this mill, what would seem to me to provide incentive enough to the State of Alaska to provide this $7 million, whatever its affect on the quality of the water.

I simply go back to the next-to-the-last remark I made: the people of the United States, through Congress, when they passed the Clean Water Act, based it on a technology standard, not a quality of receiving waters standard. The reason they did so, primarily, was to avoid questions about unfair competition between one mill and another; that one mill could claim that the waters were not adversely affected, and therefore avoid an investment which other mills had to make. It is the fundamental policy of the law of the United States.

Here we have an entity which seeks to avoid the expenses which its competitors have undertaken by asking the people of the United States to pay for that compliance. I do not think that proper.

If, in fact, it is a threat to the economy of Alaska, a wealthy State like that should be able to come up with the money with which to comply. The question is really one for the Senator from Alaska: Why has the State not come up with any such offer?

Mr. MURKOWSKI. Because the State, obviously, has indicated, by the State Department of Environmental Conservation report, that it makes no contribution whatsoever to water quality standards.

Mr. GORTON. But presumably it makes a contribution to the economy of the State of Alaska.

Mr. STEVENS. Mr. President, I regret the difference with the Senator from Washington. I regret it because until he personally became involved in this process, EPA maintained that this mill did not have to comply. Now he questions why it did not comply for those 7 years prior to the time he came to the Senate.

My friend says that I have not commented upon the two points he raised, so let me comment on them again.

The $7 million of taxpayers' money is required because this process, even if purchased by the State of Alaska, would not warrant granting a variance

to this mill. It must be demonstrated on a national basis, not on a local basis, in order to become improved technology to comply with this section of the act.

I hope the Senator listens to me. I have tried to listen to the Senator from Washington and understand his position in this.

I tell him, in all good humor, that when the billions of dollars rolled across the floor of the Senate after Mount St. Helens and a few other things, I cannot remember the objection being raised on the basis that it was not necessary for the national interest.

This is in the national interest, and that is why this Senator sought this money. The Senator from Washington seems to think that my constituents sought the money. I sought the money in order to comply with the national law, not to avoid it. I was the one who asked for the waivers for 7 years, and for 7 years the EPA agreed that they were warranted and administratively implemented that conclusion, until the Senator selected a new regional director.

This gets to be a little personal, and I do not like to become too personal on the floor of the Senate. I will address the Presiding Officer, in order to comply with the rules.

Mr. President, the record is clear that the Federal agency told this company for 7 years that it did not have to comply with the Federal clean water standards and would receive either a variance or a waiver. Now it is being criticized for not having complied and not having had the common sense to realize that, at some time or other, some person would come along and administratively change that conclusion.

This is a clear record; and notwithstanding the assertions of the Senator from Washington, I have the documents in my file to prove that the EPA, on all occasions, favored the waiver or the variance from the time it was originally approached. We are talking about a continuum that started with President Nixon and ran through President Ford, President Carter, and to President Reagan.

Those who are federally appointed in that regional office all agreed that the conclusion would be that the mill would not have to comply with these standards, until the Senator from Washington selected a new person for the regional administrator's position.

I understand the Senator's position, and we obviously disagree on various points. But I can tell the Senate that this mill now is being punished because of an administrative reversal of a 7-year-old position, and this Senator said, "Let us see what we can do."

I looked at the EPA law, and this portion of the law has never been funded, Mr. President. The Senator asked why they do not use money. There is no money in this portion of the EPA authorization for demonstration grants. My amendment puts it there and specifically directs that it be used to demonstrate this anaerobic process on a complex waste water stream in order to comply with national standards—not, as the Senator indicates, to clean up water quality.

This mill has spent $66 million. EPA contests the fact that this sum was spent for compliance at the effluent discharge limits.

I thank the Senator for his courtesy in yielding to me at that point.

As a practical matter, EPA said that some of the money that this mill said was spent for compliance was not spent for compliance because EPA does not recognize some of the State requirements, and the requirements have been met in my State.

I hope that every Member of the Senate will think of the circumstance we are in, after having represented our constituents—and I believe well—through the whole period of time since enactment of the Clean Water Act.

The question was raised whether this mill could comply with these national standards, although it was not required for water quality. Both the EPA Administrator and the Regional Administrator, on each occasion, agreed that some relief should be granted and this mill would not have to comply with this portion.

Mind you, we have complied with 90 percent of the requirements. It is the last part of the spectrum, the 10 percent reduction in the BOD levels that are required now.

Having complied all the way through and having in good faith pursued this administrative process, I ask every Member of the Senate, what would you do? What would you do to represent a legitimate interest? We are representing the people who work there—1,000 jobs directly, 1,000 jobs indirectly. If this process will work, they have been saved. If it does not work, they are going to lose their jobs.

It must, by law, have the potential of nationwide applicability before the project can be funded. That is why it should be taxpayers' money and not local money that tries to prove whether this is a nationally acceptable process to comply with these standards.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent to have printed in the RECORD a memorandum from John R. Spencer, Regional Administrator, U.S. Environmental Protection Agency, Region 10, Seattle, WA, to Anne Gorsuch, EPA Administrator.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. ENVIRONMENTAL PROTECTION AGENCY,
REGION 10,
Seattle, Washington.

Re Alaska Pulp Mill Variance Request.

JOHN R. SPENCER,
Regional Administrator.

ANNE M. GORSUCH,
Administrator.

JOHN E. DANIEL,
Chief of Staff.

Consider this a request for the Administrator's concurrence with my recommendation that Alaska Lumber and Pulp Company and Louisiana-Pacific Corporation be granted variances from wastewater effluent guideline limits (BPT) for mills located at Sitka, Alaska and Ketchikan, Alaska respectively.

Both companies have requested variances under EPA regulations pertaining to fundamentally different factors (FDF). The most basic issue raised by the companies in support of their variance requests is that the cost of compliance with national effluent guidelines would result in waste treatment and operation costs significantly greater than costs for the model mill described in EPA effluent limitations development documents. Other issues raised in support of the variance requests include the lack of land for waste treatment sludge disposal and the lack of external sources of electricity.

BACKGROUND

Both Alaska Lumber and Pulp (ALP) and Louisiana-Pacific (LPK) are currently operating secondary waste treatment facilities at their southeast Alaska mills. The EPA issued permits controlling their wastewater discharges, were originally issued in 1973 and later amended in 1974. In 1977, EPA promulgated BPT guidelines for the dissolving grade sulfite subcategory which the two Alaska mills fall under. ALP and LPK are requesting variances from the biochemical oxygen demand (BOD) effluent limitation and variances from the total suspended solids (TSS) limitation specified in their present permits. These are summarized below:

VARIANCE REQUESTS

	Present permit limits	BPT	Variance request
1. ALP & LPK:			
BOD, Lbs/T [1]	75	46.8	75
TSS, Lbs/T [1]	60	76.3	76.3

[1] (Lbs per ton of mill production.)

Region 10 staff have thoroughly analyzed the variance requests, and in particular, the water pollution control costs. The cost figures incorporate incurred costs for existing water pollution control facilities plus the future costs to meet BPT. They include capital and O&M costs expressed in March 1980 dollars. A comparison of the model mill costs with the two Akaskan mills is as follows:

[Dollars in millions]

	Capital cost	Total annual cost	Total annual cost/T
A. Model mill (scaled up to 700 T/day production)	$49.34	$15.2	$63.9
LPK (700 T/day)	68.9	21.9	92.0

	Capital cost	Total annual cost	Total annual cost/T
The ratios of the costs (LPK: Model mill) are therefore: 1.40, 1.44, and 1.44.			
B. Model mill (scaled up to 621 T/day production)	$42.7	$14.4	$69.9
ALP (621 T/day)	84.4	26.9	123.5
The ratios of the costs (ALP: Model mill) are therefore: 2.0, 1.9, and 1.8.			

In summary, my recommendation that variances be approved is principally based on LPK's costs being 40 to 50 percent greater than the model mill and ALP's cost being essentially double the model mill costs.

Finally, attached is a letter from the State of Alaska certifying there will be no known water quality impacts resulting from granting a variance to either mill. Further support for a variance based on solids disposal is provided in that letter: "Of the possible alternatives disposal to the air and land are precluded by unique local conditions or may have substantial adverse effects on the environment". Also, attached is a staff analysis of the variance request. As indicated, some of the material is confidential and should not be released outside the agency.

Concurrence:

Non-Concurrence:

Mr. MITCHELL. Mr. President, I rise in support of Senator GORTON's amendment to strike funding of $7 million for construction of a wastewater treatment system at the pulp mill in Sitka, AK.

I am against the grant for the Sitka mill for two reasons: First, the treatment system to be installed with these funds is not innovative and would not serve as a legitimate demonstration of treatment technology. Second, and most importantly, providing a direct grant to a single mill is grossly unfair to the pulp and paper mills in Maine and throughout the country which have complied with the Clean Water Act without Federal assistance.

The Clean Water Act provides for research and demonstration activities to develop needed wastewater treatment technology. We can not expect industry to make substantial investments in unproven pollution control technology. The EPA Research and Demonstration Program develops needed technology through both conventional research activities and direct demonstration grants to private parties.

Demonstration grants, however, are narrowly defined and are limited to projects which demonstrate a new or improved technology and which are a benefit to an entire industry. The proposed demonstration grant for the Alaska mill fails to meet both of these criteria.

The type of treatment system to be built at the Alaska mill is now in place at several other mills and is being marketed by several companies. In addition, there is little evidence that this treatment system would be a benefit to other mills because most other mills have already installed adequate treatment system.

I am also troubled by the Sitka mill's record of noncompliance with the Clean Water Act. The Sitka mill repeatedly avoided compliance, seeking variances and, when these were not granted, a special amendment to the Clean Water Act, which was also rejected. I think most of us agree that our limited demonstration funds should be used to support legitimate demonstration projects by those who have a proven commitment to clean water.

I am pleased to say that the pulp and paper industry in my home State of Maine and throughout the country has a fine record of compliance with the Clean Water Act. Most of the industry installed required wastewater treatment by the 1977 deadline. The pulp and paper mills in Maine spent about $120 million to install treatment systems in compliance with the Clean Water Act and continue to spend about $12 million a year to operate the systems. These expenditures have contributed substantially to the remarkable improvement in the quality of the rivers and streams of the State.

Mr. President, the pulp and paper mills in Maine used their own resources to make the investment in water pollution controls required by the Clean Water Act. The mills in Maine cleaned up their discharges by the deadline in the act. It is not fair to these mills to provide a direct Federal grant to another mill to offset the same expense. It is doubly unfair to hand $7 million to another mill as a reward for a decade of delay and noncompliance with the act.

Finally, I believe that we set a very bad precedent if we make direct grants to private industries so that they can comply with the Clean Water Act. The principle that industries pay the costs of pollution control has served us well since the passage of the act. It is essential that we not retreat from this basic principle if we hope to continue to make progress in water pollution control.

I urge my colleagues to join Senator GORTON in opposition to the grant for the Sitka mill.

Thank you, Mr. President.

Mr. GARN. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Nevada [Mr. LAXALT] and the Senator from Maryland [Mr. MATHIAS] are necessarily absent.

Mr. BYRD. I announce that the Senator from California [Mr. CRANSTON] is necessarily absent.

I also announce that the Senator from Michigan [Mr. LEVIN] is absent because of a death in the family.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 70, nays 26, as follows:

[Rollcall Vote No. 230 Leg.]

YEAS—70

Armstrong	Glenn	Moynihan
Baucus	Gore	Nickles
Bentsen	Gorton	Nunn
Biden	Gramm	Packwood
Bingaman	Grassley	Pell
Boschwitz	Harkin	Pressler
Bradley	Hart	Proxmire
Bumpers	Hawkins	Quayle
Burdick	Hecht	Riegle
Byrd	Heflin	Rockefeller
Chafee	Heinz	Roth
Chiles	Helms	Rudman
Cochran	Humphrey	Sarbanes
Cohen	Kasten	Simon
Danforth	Kennedy	Specter
Denton	Kerry	Stafford
Dixon	Lautenberg	Trible
Dole	Leahy	Wallop
Domenici	Lugar	Warner
Durenberger	Mattingly	Weicker
East	McConnell	Wilson
Evans	Melcher	Zorinsky
Exon	Metzenbaum	
Ford	Mitchell	

NAYS—26

Abdnor	Hatch	Murkowski
Andrews	Hatfield	Pryor
Boren	Hollings	Sasser
D'Amato	Inouye	Simpson
DeConcini	Johnston	Stennis
Dodd	Kassebaum	Stevens
Eagleton	Long	Symms
Garn	Matsunaga	Thurmond
Goldwater	McClure	

NOT VOTING—4

Cranston	Levin
Laxalt	Mathias

So the amendment (No. 707) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GARN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 794

(Purpose: To implement the Adminstration's proposed termination of the Urban Development Action Grant Program (UDAG) in fiscal year 1986 with saving of $352,000,000 in budget authority.)

Mr. ARMSTRONG. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistance legislative clerk read as follows:

The Senator from Colorado [Mr. ARMSTRONG], for himself and Mr. PROXMIRE, proposes an amendment numbered 794.

On page 12, delete lines 3 through 8.

Mr. ARMSTRONG. The President, this amendment is as simple as it is profound.

The Senator from Wisconsin, Mr. PROXMIRE, and I offer this amendment which has a very simple purpose. It simply strikes out of this bill the amount of $352 million funding for the UDAG Program. When the notion first crossed my mind that maybe this would be as good a time as any to do away with this costly extravagant program, I thought I might write quite a thundering speech about it because certainly it deserves that sort of treatment. I decided on balance not to do that, but merely quote what others who are even more familiar with it than I have already said. Let me quote first from the Office of Management and Budget which describes the UDAG Program—and accurately describes it—in the following way. It has "engendered corporate junkies, grantsmen, cities and developers getting rich off the UDAG game." That is exactly what this program does. In a moment or two someone is going to ask for recognition, and start to explain what a wonderful program it is. These will be people in whose communities UDAG has been used to build hotels, convention centers, marinas, and other kinds of luxury developments. One of the most permanent features of life in 20th century America is that if you get free Federal money you are going to think it is a good idea. So I will stipulate in advance that UDAG has done some wonderful things; building hotels is a good thing to do. The question which Senator PROXMIRE and I raise today is whether or not that is a Federal function or whether or not that is better left to the Marriotts, the Hiltons, and others who are in the hotel business. Why should the taxpayers particularly at this moment in the life of our country be requested to put up the money to build these facilities?

"UDAG"—again, if I might quote further from the OMB—

Is a low priority, inefficient program which merits repeal. While the program has achieved some good, its cost and abuse far outweigh its benefits. In the current austere budget environment it makes little sense to fund a program which benefits large corporations, hotels, motels, inns, shopping centers, restaurants and caterers.

Do you know that is really the essence of this? Here is a program which, if we had lots of money, if there were no imminent budget crisis, maybe we could say, "Well, this does some good. It is going to provide some employment. Certainly some marvelous facilities have been constructed."

But I would ask my colleagues to consider whether or not at this moment, when we are facing budget deficits of enormous magnitude, at this moment in the life of our country when we are on the verge for the first time of enacting an automatic sequestering mechanism which will cut back automatically programs of real priority—veterans' programs, education programs, programs of health, of national defense and others, which really are critical programs, programs which are clearly needed—do we want at the same time to be spending large amounts of money for something of such a questionable and low priority nature,

I would also like to point out to Senators that UDAG is not a targeted program. This is not a case where money is being aimed like a rifle shot at areas of deprivation and poverty. It simply does not work that way. As a matter of fact, 45 percent of the UDAG attributed jobs are in the higher paying, higher skilled categories, and 61 percent of the UDAG housing units are for middle-and upper-income persons.

Fifty-five percent of UDAG funds have been allocated to local commercial development projects such as hotels, shopping centers, office buildings, parking lots and recreational facilities. In Michigan a $3-million marina, boatyard, restaurant, 16 condominiums and 200 dockominiums have been built on the Black River.

I am not saying that is a bad thing to do. It is a good thing to do. The question is, Is this a Federal responsibility? I would suggest that it is not.

A $600,000 grant to a ski resort to help build hotel facilities for these upper-class resorts; a grant to help finance a 20-acre theme park and a water play park.

I am not against that. Disneyland I like and it is fine, 7 Flags Over Texas and what-not. Those are great. But those are private functions. That is what the private sector is for. To suggest that we ought to tax the people of this country, the poor people of this country, the working people of this country, to pay for such extravagance seems completely off the wall.

Others help create a park-like atmosphere of one of the Nation's largest corporations. UDAG industrial projects are anything but exclusively industrial. They fund everything from manufacturing frozen pizza to a rubber puzzle manufacturer. Again, I have no quarrel with pizza. I eat pizza every Sunday night. But is financing the manufacture of pizza a Federal function? I do not think it is.

Conventional wisdom would say that an amendment such as this is not likely to pass, but I am enough of an optimist to think that we are coming to our senses here in the Senate and we have looked squarely in the eye a financial crisis, a budgetary crisis of real seriousness and that we are ready to make some tough decisions.

Personally, I hope when the Gramm-Rudman amendment is enacted, the Senate will not be disposed to let that automatic sequestering process take place; that instead of leaving it to an autopilot sort of mechanism, though I support it, the establishment of national budgetary priorities, that we will do that, that we will decide what are the high priority programs and which are the ones that can be cut back on.

Here is chance to do it. UDAG is inadequately targeted to low-income families and serves no coherent national purpose. Really, if I can say this in conclusion, it amounts to very little more than a way for the Federal Government to finance rivals between various areas of the country.

I cannot see any reason why the taxpayers of Michigan ought to be taxed to send money to Denver, CO, so that the people of Denver can use that money to encourage industry to move out of Illinois into Colorado, or vice versa. That is exactly what is going on. This is money which is used to encourage industries to move from one community to another.

Again, there is nothing wrong with that. If the Colorado Chamber of Commerce wants to do that, then I say fine. But it is not a Federal function and it should not be paid for with Federal money.

Mr. President, I hope all Senators will support this amendment. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I rise in support of this amendment. I think it is time we took a large look at UDAG and realize that in times of enormous budget deficits it does not make any sense at all.

The Senator from Colorado has made an excellent statement. I will not be long, but I want to point out some facts.

Seventy-five percent of the money in UDAG goes for these purposes: hotels, motels, inns, resorts, convention centers, malls and shopping centers, office and professional buildings, recreation facilities, sales centers, restaurants, and caterers.

The Senator from Colorado is absolutely correct. That is a fine investment. It helps the country. But let us not kid ourselves. This should be done in the private sector. It should be done with private money. It does not make one bit of sense for the Federal Gov-

ernment to fund this again and again and again.

There is a matter of building a convention center in Milwaukee or in Chicago so you attract the convention business from a competing town. It is often duplicated and it is very hard to justify.

Let me give a few examples: Chase Manhattan Bank—there is an institution that really needs Federal help—$9.3 million goes to assist in the building of a new office tower for the Chase Manhattan Bank.

Here is another example: $600,000 UDAG and a $5.3-million UDAG will help build more hotel facilities for two noted upper-class resort cities.

Another case: a new ski resort.

Still another case: a hotel project anchoring a Spanish galleon off the beach to create a swimming area.

These are not just a few horror stories. This is where the UDAG money goes. It does not help poor people. It does not go to help people who desperately need subsidized housing or they otherwise would not be able to stay out of the elements. It goes for the most elaborate hotels. In fact, the biggest hotel chains have gotten the most money.

For example, we have a case here of the UDAG of $50 million to help Abel's Bagels, a subsidiary of Lender's Bagels, to expand production from 32,000 bagels a day to 64,000 bagels. That is fine. I like to see the bagel business go up. But should the Federal Government pay for it?

Here is another example. A $600,000 action grant to a city necessary to make sure that the growth syndrome does not get the particular concern into trouble.

Then we have a river city page 1 development receiving a $3.1 million UDAG to help develop an FHA section 220 project with 446 rental units, 210,000 square feet of commercial space, and a marina on the Chicago River. Ginnie Mae provides permanent financing. None of the rental units have been set aside for lower-income people.

The Senator from Colorado has said that the people who work on this are people in the high wage or high salary area and the beneficiaries who can enjoy the results of their labor are people in the affluent sector.

Mr. President, I cannot resist pointing out that back in May in the golden fleece I stated another example of HUD for bestowing over $1 million in public money to build an access road, ramp, and tunnel to a privately funded entertainment spa in Pittsburgh featuring a passenger boat, a shuttle, and a three-tiered floating dock. Mr. President, not only was this for an extravagant purpose, and the taxpayers' money was actually spent, but the promised passenger boat ended up in New York, the shuttle has yet to be seen, and the dock to be bustling with restaurants, lounges, and offices faded into the bureaucratic fog and reemerged as two barges. So the sinking of that project gives new meaning to the phrase "up the creek without a paddle." It leaves the taxpayer with a losing hand.

Mr. President, it would be one thing if these things were exceptions. They are not. These are the rule. That is what UDAG is going for.

I am sure that these are the kinds of projects that many of us in the Congress have a great deal of resistance to.

I talked to some of my colleagues in the House the other day who are very reluctant to extend UDAG further.

Of course, it is a great opportunity for elected officials to make friends with the people back home. You point out to the business community and the labor community that you are bringing them jobs, you are bringing them a fine luxury hotel or some other attractive project that will make the city look better and they may even name it after you. But we all know that this is something that should be done in the private sector with private money, not by Federal taxpayers.

Mr. RIEGLE. Mr. President, I rise in opposition to the amendment. I want to make several points in response to the comments made by my two good friends and colleagues, the Senators from Colorado and Wisconsin.

I think the UDAG Program has been one of the few Federal programs which has been a genuine success. It is very widely acknowledged to be a success throughout the country, not only by State and local officials who are involved with economic development, but by others who pay attention to the critical question of how we provide jobs in declining areas and get them back on the upswing.

The philosophy of the USAG Program is very much in line with the central philosophy of the Reagan administration; namely, to find ways to bring the private sector into the act to solve problems that otherwise will not be solved. Normally, in UDAG projects, we have a leverage factor of 5 to 8 dollars in private investment for every single dollar of UDAG money. So for a very small percentage of Federal incentive we are able to trigger a very substantial private sector investment in projects put together by the private sector, carried out by the private sector, and managed by the private sector. That, in turn, enables, in a highly targeted way, to revitalize and strengthen areas that are in trouble.

The kinds of projects that are being talked about are those in urban areas that are suffering very severe economic decline, with high unemployment and other economically difficulties. They are projects that put in place significant infrastructure and other economically important investments.

The Senators have mentioned hotels. They stimulate convention business that can be vitally important to many areas. But many other types of projects have been submitted in the national competition for UDAG. From those investments, in turn, will flow other private sector investments with which the Federal Government has no involvement at all.

In other words, UDAG is an effort to get positive things started in areas that are struggling to reverse downward economic trends.

I would say the competition that has ensued nationally with UDAG is a measure of its success and value. This is probably the most highly competitive program in the country, where literally hundreds and hundreds of communities, together with private sector developers, have put together innovative projects to compete for what is a very limited amount of UDAG money nationally.

The competition now is increasingly intense. And as a result, we get really outstanding projects being submitted because otherwise they would not have any practical chance for funding. We have managed over a period of time to help a number of communities begin to pull themselves up by using this public and private partnership.

This is, I think, very consistent with the philosophy of the Reagan administration, namely, to rely more on the private sector. That is what this does.

(Mr. PRESSLER assumed the chair.)

Mr. PROXMIRE. Mr. President, will the Senator yield on that point?

Mr. RIEGLE. I will in just a moment, Mr. President; I shall be happy to yield when I finish.

The UDAG Program since its inception has assisted development projects in over 1,000 cities with 2,400 public and private partnerships. During the Reagan administration alone, there have been 1,581 project supported. All of this with an annual appropriation of $440 million, which I think is a relatively modest amount given the enormous multiplication of resources that we get through this public-private partnership.

Out of these investments have been created over 240,000 new permanent jobs by HUD's own estimates. In addition, 36,000 jobs have been retained which otherwise would have been lost. Of these, 128,000 are classified as lower income jobs; 59,000 are jobs that minority persons were able to take—and we know, unemployment rates are very high among minorities. Of those jobs, 60,000 went to people who are defined as structurally unemployed—those who would otherwise be out on a scrap heap of unused talent.

There were 206,000 construction jobs created from that series of investments. It is estimated that the increase in local tax revenue flowing from these investments across the Nation totals over $270 million. UDAG has leveraged a private investment total of more than $12 billion across the country that has resulted in 4,329 contracts to minority firms, companies that are struggling to bring minority people fully into the private economy in a significant way.

These benefits, I think, are to be illustrated best through some concrete examples. Let me cite two or three because we have heard from some proponents of this amendment.

Action grant funds to Wheeling-Pittsburgh Steel in Follansbee, WV, will assist in developing a state-of-the-art 60-inch steel coating mill in an otherwise abandoned industrial plant. This is an example of Japanese-American cooperation that emulates the best private sector development model. Not only will that plant directly employ 200 laid-off employees but it will stimulate the callback of another 200 additional employees in a related supplier plant.

Another action grant project example is in St. Louis, MI, which has made important contributions toward reducing the city's decline in certain areas.

The city's center shopping mall has retained the major department stores in the core of the city. As we all know, this has been a problem in cities, where the center core of the city too often loses that commercial activity as it has gone out to surburban sites; then the rest of the downtown area continues to decline as an aftereffect.

There has been a staggering amount of spinoff development of new offices and retail space, totally disconnected from UDAG but caused to happen by UDAG, as well as other widespread renovation of adjacent properties.

I also call to people's attention other projects in Cleveland which have supported a variety of commercial projects there, industrial expansions, health care facilities, and neighborhood housing projects. Renovation of the 60-year-old theater, Cleveland's Playhouse Square, not only will provide a new home for the Great Lakes Shakespeare Festival.

That is like planting a flower around which other flowers are then planted and grow. In fact you begin to turn an area that is declining into an area that shows broad new strength. That has happened here.

In this area, other important architectural, historic, and cultural resources have been refurbished and brought back on line in an area that is roughly 60 acres in size.

What we are seeing here is an intense national competition, where communities together with private developers are able to put together powerful development packages, according to very tightly targeted criteria. They are showing how they can solve problems, how they can build new economic strength in a declining area, how they can provide new jobs and not just see areas continue to deteriorate and fall apart with rising crime rates and the rest of it. That is what the record shows.

Some have expressed a concern that the UDAG formula has recently operated in such a way that certain areas of the country were not getting a fair share of these funds. As the person on the Senate Banking Committee who has taken a lead responsibility in this area, I can state we undertook to sit down with Senators on both sides of the aisle and we have successfully revised that formula with the help of Senator GRASSLEY of Iowa, Senator D'AMATO, Senator THURMOND,and others—Senator SASSER on this side of the aisle—I do not mean to omit anyone. We have, over a period of several months, created a set of revisions to UDAG formulas that will enable them to work even better in terms of equity across the country.

We have fought hard to accomplish that because it is sound, it is fair, and it is something that needed to be done.

Mr. ARMSTONG. Will the Senator yield to me at that point?

Mr. RIEGLE. As soon as I finish I promised to yield to the Senator from Wisconsin and then I will be happy to yield to my colleague from Colorado.

Mr. ARMSTRONG. I just wanted to ask a question but I will ask it later.

Mr. RIEGLE. There are any number of illustrations that we might cite. We could take the rest of the day citing tremendously exciting breakthrough projects that have occurred and multiplied and radiated out through distressed communities. Projects that have done things of great value and have been very constructive to those communities, those States, and to the country. This is a very small program. We have agreed to a 20-percent reduction in funding in light of the budget pressures, of which we are all aware. And that is difficult to appreciate because the number of people wanting to compete nationally has gone up and many communities around the country hope to win a UDAG grant. But we have agreed to a 20-percent reduction in the funding, which was already at a modest level. We have done so in light of the budget pressures that we are feeling.

I might say that over in the Department of Housing and Urban Development, the UDAG team that has been assembled to do this work is very small and very accomplished in their work. I do not know of any part of the Federal Government where such a crack team of economic analysts accomplishes more with as small and efficient an operation as is the case with this group operating within HUD. I do not ask you to take my word for it, Mr. President, but I think if you will examine it carefully you will find that to be the case. This is a group that has won very broad accolades from people around the country who know that, although we have a very scaled-back degree of Federal support for economic revitalization, this particular part has produced outstanding results across the country. It is small, it is carefully targeted it is tightly managed.

And for that reason I hope that we would reject the amendment and stay with something that has worked and worked very well.

I will say one other thing and then yield to my colleague from Wisconsin.

Mr. President, this particular program has been around for a period of time and it has stood the test in the previous administration and now into the fifth year of the Reagan term. We now have Reagan administration appointees in charge of the Department of Housing and Urban Development and down through the other positions that are filled by executive branch appointments. So we see a program that has proved itself through administrations regardless of party. Interestingly, it is among those programs that are most directly in line with the philosophy of the Reagan administration to scale down the Federal involvement to the smallest amount that we can but use what is there to induce and enlarge private sector investment. And so with our multipliers of 6 to 1, 7 to 1, and 8 to 1 of private money to Federal grant money, we are making that principle work and work well.

Mr. PROXMIRE. Mr. President, the Senator from Oregon, the distinguished chairman of the Appropriations Committee, has been waiting very patiently to bring up a conference report. I do not want to detain him because I would like him to go ahead, but I will take 1 minute to point out a couple things and ask a question. I am the author of the UDAG bill. When it passed in 1977, I introduced it. I pushed it. And I think at that time it might have made some sense, although I have been disappointed in it consistently. It makes absolutely no sense now.

My good friend from Michigan has three times referred to this being in accordance with the Reagan administration philosophy. I have a letter here addressed to the distinguished author of the amendment, Senator ARMSTRONG, from the administration which he received just today and is on the desks of all Senators, saying that they support the amendment to eliminate fiscal year 1986 funding for the Urban Development Action Grant Program. They are for it. They are for eliminating the program and they are for the Armstrong amendment. Final-

ly, my good friend from Michigan stressed one point particularly hard and effectively I thought in his presentation. He said this is a leveraging device; the Federal Government puts in a little money and the local people match it with private sector money. The Office of Management and Budget has said the following: "The UDAG program's aggregate leveraging ratios are misrepresented because much of the private capital invested in the projects is subsidized through some other governmental program." That is a fact. And it seems so clear to this Senator that virtually all the projects the Senator from Michigan has referred to, the author of the amendment has referred to, and this Senator has referred to are projects which are wholesome and healthy projects but none of them, none of them, can be justified as being for a governmental purpose. You do not build restaurants or you do not build office buildings which are for affluent people to enjoy for a public purpose. They are built by the private sector much more efficiently and competently and they should be. I thank my good friend but I must say that his implication that the administration is against this amendment is wrong. They are for the amendment. They want to wipe out the bill and so do I, although I am the author of it.

Mr. RIEGLE. Let me say briefly in response, Mr. President, that the point I was making, and I repeat, is that the philosophy of getting a maximum private-sector response is very central to much of what I hear the Reagan administration advocating, and that clearly happens with UDAG.

It is also significant that these projects are not something that the Federal Government initiates at all. Local business leaders, local elected officials have to put together packages themselves which they then enter in a national competition against all other projects put together by other communities and private-sector groups throughout the country. So this is something where the Federal involvement is kept to an absolute minimum. This is something where local communitis take the lead and maintain the lead in deciding the best way to trigger sustained economic redevelopment in their economically troubled area.

Years ago we said that those kinds of decisions should be made in Washington. Vast sums of money were directed from Washington to local communities to try to carry out certain activities we thought would help make them stronger. UDAG reverses that. It works exactly the other way around. UDAG says to local communities,

You figure out how to do it, you devise a solution that you think will work in your particular community. We think you understand far better what the problems are and what the potentials are than somebody sitting in the central Government in Washington, DC. Instead, you put together a package that meets your local needs, that you think will get the job done and that requires private-sector players to invest substantial sums of money, money that they stand to lose if the project does not go, just as everybody else would stand to lose.

What has happened is that those local communities have taken that initiative and they have gone to work with private sector people to put together these packages. And in area after area they are pulling distressed parts of their communities up by their bootstraps. We are helping, yes, with a small amount on the margin. But we have completely shifted the basis of where the initiation comes from and that also I think is in line with the philosophy that the Reagan administration talks about and that I happen to think is healthy. I think it is very desirable we are doing it this way and it is the reason we are getting good results.

I know the Senator from Oregon needs to proceed and so I am prepared to yield the floor.

Mr. LAUTENBERG and Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I ask unanimous consent to yield the floor to the Senator from Colorado to complete the colloquy he wanted to start with the Senator from Michigan, and then I would like to call up the energy conference report which is a privileged matter.

Mr. ARMSTRONG. Mr. President, I thank the chairman for his courtesy but my suggestion would be we just lay aside the pending amendment so that the chairman can call up the conference report. I understand it will only take a moment or two and then we will straighten out the areas of dispute between the Senator from Michigan and myself and go to a vote very quickly.

Mr. LAUTENBERG. Mr. President, parliamentary inquiry. Are we then planning to come back to this issue? I am not at this point willing to relinquish my right to respond unless I am so assured. The Senator from Oregon did ask for unanimous consent.

Mr. HATFIELD. I withdraw that unanimous-consent request.

Mr. LAUTENBERG. Mr. President, I rise in opposition to the amendment of the Senator from Colorado and the Senator from Wisconsin and in support of the comments made by the Senator from Michigan, to say that the UDAG program is one of those programs in which we see the Federal Government at its best, and that is encouraging the generation of private capital for projects seeded by the Federal Government, which is typically in distressed areas.

Although there may have been projects that do not meet the standards that some would impose for appropriate investments for a community, they nevertheless are directed for distressed communities. If it is a hotel or even a pizza parlor, that provides some economic life to a neighborhood or a community and I think we dare not throw the baby out with the bath water.

There are perhaps even some occasions when some Federal assistance helps get such casual recreation things like ski areas developed and to encourage resort and tourism business—often very important to States and communities that do not have access to other projects.

I point out that this proposal to terminate the UDAG Program is one that surprises me, and I am opposed to this proposal. Few, if any, programs enjoy the support of the private sector more than the UDAG Program. On average, for every public dollar spent on a UDAG grant, we see $6 of private sector capital.

To hear that the administration is opposed to this strikes me as somewhat of an anomaly, because for the first 4 years of the Reagan administration, the UDAG Program enjoyed the support of HUD and the White House.

UDAG was touted as a program before mayors from our States as one program worth saving. That was true, and what was true for the last 4 years, I think, remains true today.

I would like to recount for the benefit of my colleagues what has happened with these projects as they have developed. There have been over 2,400 public-private partnerships and the result of these investments created 232,000 new permanent jobs, 36,000 retained jobs, 128,000 lower-income jobs, 59,000 jobs for minorities, 60,000 jobs for the structurally unemployed and $11.5 billion in private investment with an original program of some $440 million.

So I think that before we start talking about what the taxpayers of one State are going to do to help the taxpayers of another State—the Senator from Colorado has been engaged in that kind of a discussion before—whether it deals with water projects or irrigation projects or what have you, there are times when each of us in the States supports a program that benefits another State perhaps more than the benefit that we in our own locations get.

I hope that we rethink this proposal and see that we do not destroy something that has worked and fits the description of what I think Government's role could most effectively be, and that is to generate private capital, to encourage investment, to help some of the cities, that have come on dis-

tress, revitalize themselves and provide jobs in the private sector.

That is the mission of the UDAG Program as it was originally developed, and again, if it has gone astray, maybe we should review what some of the problems have been.

But I do believe that it would be a terrible mistake to kill this program at a time when many cities and many communities in the country have not participated in the economic revival that we hear about so often.

Mr. ARMSTRONG. Mr. President, I do not know if this amendment is going to pass or not. I will tell you something. UDAG is a dead duck. That is a program which did not work. The author of the program, the distinguished Senator from Wisconsin, is a cosponsor of this amendment. And its just like some of these programs which we have tried and did not work out that are gradually coming into focus, and some of them are going to get a 20-percent cut this year. It is like Amtrak. There is a program which by its own definition turned out to be a failure. And gradually we are taking the money away from them.

My suggestion would be this: In view of the kind of budget emergency that we are facing, and we all know that is true, this is a low priority program which we ought to just chop off instead of phasing it out. No one is going to get hurt if we do that. All of the debate thus far, and I think we are about at the end of it—I certainly do not expect to speak much longer—really proves just one thing: People who are getting that free Federal money like to get it, and I am ready to stipulate to that, and I am willing to stipulate, as someone said earlier, building these hotels creates jobs. That is absolutely right. Anytime you build a hotel, it is going to create jobs. No one is arguing that.

The question is, Who should pay for it? I cannot see—and there has not been so far as I am aware—one scintilla of evidence brought forward to show why the Government ought to pay for it. If Hilton wants a hotel, let Hilton pay for it. It is as simple as that.

It has been said during the last few minutes that this program will be substantially reformed under amendments which are proposed by the Banking Committee in the reconciliation bill. I am going to tell you, in the first place, that it is a travesty to have the UDAG authorizing in the reconciliation bill. That is not before us today and when the time comes, I expect to raise that issue again. That is an abuse of the reconciliation process and it ought not to be permitted.

Whether or not we can knock it out of there, I do not know.

But I would concede, let me say to my friend from Michigan, that the proposal which is in the reconciliation bill does now represent a significant degree of reform of one aspect of the program. And it is the geographic distribution of the money. Up until now three cities—New York, Chicago, and Baltimore—have received 44 percent of all the money in this UDAG fund. As I understand the effect of the amendments that will be proposed, it will be to permit other areas to bid for the money. So to that extent it is fairer, but it does not justify the program to begin with.

We are told that this is a program that has proven itself, that this is a program that enjoys the support of the private sector. I think that is a direct quote. Of course, it enjoys the support of the private sector. Who do you think is benefiting from this? General Motors received $50 million from UDAG. Trammell-Crow and other big developers—these are people who deal in billions of dollars—have also received large amounts of money from UDAG.

I am not against General Motors or Trammell-Crow. I am not against the hotelkeepers or shopping center developers. But there is no excuse for these being paid for by the Federal Government.

Recently $9.3 million went to Chase Manhattan Bank. Is there any wonder there is support in the private sector for a program like that?

Not all of the money has gone to outfits like GM and Chase Manhattan Bank. In fact, one of the programs for $422,000 went to build what was described as a high-quality horse arena in Uvalda, GA, in November 1982.

So we are building everything from hotels, office buildings, shopping centers, to horse arenas, to marinas, to condominiums.

This does not make sense. Maybe it would make sense if these were times in which the Federal Government was running a large budget surplus. But when we are facing a $200 billion deficit, when we are going to be looking down the gun barrel of a tax increase if we do not get the deficit under control, when a sequestering process is going to go into effect, which will cut back on programs of high priority, education, health, veterans, defense, you name it, it just does not make sense.

Most of the money, even though it has done some good, ends up going for the kinds of projects I have described, including recently a $1 million UDAG grant to a company whose 1984 sales were $16.3 billion.

This is a good chance for us to decide, are we, in the words of one Senator, shooting with real bullets? Are we serious about this or are we not?

I hope the amendment will be adopted.

Mr. RIEGLE. Mr. President, I want to just respond to a couple of comments made by my colleague from Colorado.

First of all, I appreciate his kind words about the provision in the formula that we worked out over a period of several months on a bipartisan basis with a number of Senators. That set of revisions to the UDAG project selection system involved as cosponsors Senators D'AMATO, SASSER, HEINZ, GRASSLEY, DURENBERGER, LEVIN, SARBANES, GORE, SPECTER, HAWKINS, THURMOND, DODD, STENNIS, METZENBAUM, HARKIN, BOSCHWITZ, CHILES, and SIMON. All of those Senators have been active in the effort to revise that formula, and I have sort of taken the lead in that effort.

I think we have been very successful in doing so.

I was pleased to hear the Senator from Colorado, despite his other criticism which he has made very clear, stating that he thought that was an improvement.

But I want to just make one other point to him, if I may. I want to try to reach my friend from Colorado, whom I consider a good friend of long standing for many, many years, in the other body as well as in this body. The point I want to make is that the purpose of UDAG is not just to cause certain projects to happen, whether they be hotels or other commercial buildings or other types of projects. The purpose of UDAG is to influence where that investment is made. In virtually every instance the investment is made in a location where it otherwise would not be made because it is in a marginal area, it is in an area that is in economic distress, it is in an area that the private sector would normally not find to be an attractive area if they had to go just with cold market costs.

When a local community, when a consortium at the lcoal level, when local public officials and the local business community have a distressed area that they are trying to stabilize and improve, UDAG is designed to enable positive investment to go into an area that it is otherwise not economically attractive if you go in cold turkey as a sheer private sector investment. UDAG allows those communities to come in with a small measure of public financing and bring a project into reach financially so that they can do it in the location where it is thought to be the most needed. That really is the essence of UDAG. If you leave that fact out, if you simply make it sound as if the purpose is to build a hotel and ask if the Government ought to be concerned with whether or not a hotel goes up you misstate the purpose of UDAG.

The purpose of UDAG is to target certain kinds of revitalizing investments into areas that are in trouble and where otherwise the investments will not occur.

The Senator can argue that that is not a proper function of Government or that he does not think it ought to be done, and we can have that debate. But that is really UDAG's essential purpose. It is to keep areas that are in trouble from deteriorating further.

We have found that when local communities can go in with these highly targeted investments in certain areas, they can turn things around. A declining area starts to strengthen, new jobs are added, new vitality is added, and then quite soon in most cases other private sector investments start to take place without any connection whatsoever with UDAG or any other Government funding source.

So an area that has been a problem area starts to cure itself. That is the whole thrust of UDAG.

I just want to stress the locational aspect of UDAG and the fact that the Federal Government leverage is normally about $1 for every 6 private dollars and is designed to move a project into economic reach in a marginal area where it otherwise would not be done.

Mr. LAUTENBERG. Mr. President, will the Senator from Michigan yield?

Mr. RIEGLE. I yield.

Mr. LAUTENBERG. Would the Senator consider examples of the efficacy of the UDAG Program to be things like those funds provided to the Wheeling-Pittsburgh Steel Co., in Follansbee, WV, one of the highest unemployment areas in the country that helped put that mill into condition where it can compete with foreign competition?

Would the Senator consider also the valuable asset of the use of UDAG grants in St. Louis where a shopping mall, which was funded in part, seeded in part by UDAG funds, reversed the decline of an enormous part of the city that has helped create a number of new jobs and new development? Is that the kind of example the Senator from Michigan would consider as some of those that improved the value of this program?

Mr. RIEGLE. Yes, I believe so. I thank the Senator for citing those. There is a very long list of projects like that, virtually throughout the country, that could be named. This is why other national organizations have a particular interest in urban revitalizations. The National League of Cities, the U.S. Conference of Mayors, the National Association of Counties have all endorsed this.

Mr. ARMSTRONG. Before we leave Wheeling-Pitt, will the Senator yield for a minute?

Mr. RIEGLE. I will be happy to yield in just 1 second.

Mr. ARMSTRONG. I just want to find out if Wheeling-Pitt is in bankruptcy. That is my understanding. Is Wheeling-Pittsburgh in bankruptcy?

Mr. RIEGLE. I am not in a position to describe accurately the financial outlook of that particular company or what the full circumstances are.

Mr. ARMSTRONG. I did not mean to interrupt the Senator's train of thought. But this was held out as an example of job creation, this company that is in bankruptcy. There is no question about it, you spend money to create jobs. What we are doing is moving jobs from one place to another. We are not creating new jobs.

Mr. RIEGLE. No, I believe we are creating new jobs. I believe we have a disagreement on that.

Whether or not a given company is in bankruptcy is not relevant. I have had companies in bankruptcy in my State that have worked their way out of bankruptcy. So I am not sure that is particularly relevant in this case.

Mr. President, I yield the floor.

Mr. ARMSTRONG. Mr. President, I believe we are ready to vote, although the Senator from Alabama indicated that he wanted the floor. I see the Senator is now here, and I believe he wishes to be recognized.

Mr. DENTON. Mr. President, I thank my colleague from Colorado.

Mr. President, the debate in which we are engaged illustrates nothing so much as the fact that we are being wrongheaded about our spending priorities. I could talk about defense versus social spending, I could talk about a number of areas. I start with the premise that, in trying to return to sanity on spending, we are at least trying to save where we can but, in some cases, in saving money we are cutting programs for people who have earned their benefits. Our veterans are a special case in point.

Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. The Senator deserves to be heard. The Senate will be in order.

Will conversations in the rear of the room among the staff please cease?

The Senator from Alabama.

Mr. DENTON. Mr. President, I say again, we are cutting programs for people who have earned their benefits, our veterans being a principal case in point. No group of people have done more to earn the gratitude of this Nation, and the benefits that it can provide, than our veterans have done.

On the other hand, we are not cutting or cleaning up programs where dollars are given to people who have done nothing to earn them. We are making no distinction between those who have done something to receive something from this Government and those who have done nothing. We are making distinction between the truly needy, who should be receiving money from the Government, and those who are not needy.

Any government should be judged on how it takes care of its truly needy, or the unfortunates in society who have no recourse than governmental assistance.

But, in many cases, in far too many cases, there is no accountability for who is getting how much in total from the various welfare sources. There is not enough means testing. There is no effort to ensure that adequate assistance gets to those who really need it, and only to those who really need it. We are running a gravy train, and that is the principal reason, still essentially unaddressed by the Congress, that we have a budgetary problem, perhaps a fatal problem, as a result.

We are simply not facing it. We are going across the board incrementally and cutting program after program without applying any real judgment to whether the programs are set up to give away the money are judicious in the first place, or whether they were politically demagogic and economically unsound. We are not making a distinction between those who have earned and those who have not earned, those who are needy and those who are not truly needy, between that which is pure giveaway and that which is investment and comes back to us in sociological or economic benefit.

I am going to say something uncharacteristic for the junior Senator from Alabama. I am going to ask that we take a close look when we propose to cut a program like Urban Development Action Grants, because I think that sector of our spending, like some educational grants and other categories of so-called Government spending, are actually investments.

In terms of UDAG, I think we have been making an investment in jobs, in economic development, and in a chance for the disadvantaged citizens of our urban areas. What could be more in the interest of our country, or of its disadvantaged citizens, than conducting programs that promote economic growth, generate jobs, in many cases beautify cities, improve the transportation and the shopping in cities, and reduce the need for programs of public welfare assistance?

There will be economic returns on these investments, as well as sociological returns. Perhaps the biggest sociological returns are the opportunities provided to the minorities and the disadvantaged.

In my part of the country, we have minorities who have long been suppressed in terms of educational opportunities, who have been denied equal opportunity in business. Those minorities are now coming into their own, partly because of a boot in the tail by the Federal Government to those in my part of the country, and partly because of a change of heart that is going on in my part of the country.

UDAG grants are being applied in support of that effort. The Sun Belt is not getting more prosperous and more

populous because the Sun has gotten any brighter or any warmer. It is getting more prosperous and more populous because the job opportunities, the production of goods and services, have increased as a result of educational opportunities and job opportunities afforded to those who were previously denied them.

Mr. President, I ask for order again. I have listened all day. I think I am saying something that deserves to be heard as much as what I have been listening to.

The PRESIDING OFFICER. The Senator cannot be heard. There will be order in the Senate. Those Senators having conversations will please move into the cloakrooms.

The Senator from Alabama.

Mr. DENTON. Mr. President, UDAG, as much as any other Government program, has provided an opportunity to these previously denied citizens to become part of the economic mainstream of America. Those sociological improvements later translate into economic advantages to the previously denied individuals, to the region where they live, and to the Nation as a whole, because the revenues that come from the increased business result in balancing, and even being a payoff, to the investment that was made in many of these UDAG grants.

So the contributions of UDAG to the national welfare, I believe, are substantial. I cannot forget the concerns of my State, which are a little different from those of others. There are, in Alabama, many depressed areas and depressed cities where, because of the War Between the States, there is still a hangover. There is a hangover from Reconstruction. There is a hangover from the propensity to deny equality of opportunity in education and equality of opportunity in business. There are depressed areas and depressed cities that are depressed because of those denials.

One investment that has been helping eliminate those ill effects has been UDAG, which this Senator has been careful to try to allocate in areas where that kind of improvement will take place.

The UDAG Program in my State gives an essential hand to the local governments that are deserving. It gives hope to the people who live there, and who are also deserving. The grants are an investment in those cases—not a giveaway. I know there are parts of the country that have not had the problems that Alabama has had, the problems that have hit other traditional industrial areas. All areas and all cities are not equally in need. UDAG's are essential to parts of my State, but they are not essential in some other places in my State, and they may not be essential in other States where the economic dislocations have been less severe.

The formula governing UDAG grants should take that difference into account. It should ensure that the money goes to the places that have the greatest need, and the greatest deservability. That need should be based on the current situation today, not on factors that may not be relevant, not those worked out because of political clout in cloakrooms, formulas where the population and the powers of the State determine that the formula favors that State.

For example, one city may have an old housing stock, and another may have housing that is comparatively new. The key factor, however, in determining who should get UDAG's is not the age of the housing, but whether or not the people who live in those houses have jobs and a chance to improve their lives—and whether the spirits and deeds of those cities merit that concentration in the sense that I have been discussing.

Mr. President, I must oppose the amendment offered by my distinguished friend and colleague from Colorado. I hope he does not find it too surprising, because normally I do support his efforts to cut spending. I believe that for Colorado, from his perspective, his amendment is a wise thing to offer. I just ask that he consider parts of the country where it will be devastating, and undeserved, to suffer the effect of the loss of investment, opportunity for growth of individuals, and production of goods and services which have resulted from the program.

It may be that the program can be reduced, restructured, and I would be in favor of looking at that possibility. But since all I am confronted with is its abrupt and complete termination, which would inflict hardship not deserved and exceeding any possible benefit in the State from which I come. I must oppose the amendment.

I ask my colleagues to consider the questions of need, of fairness, and join me in voting against the amendment. I ask them to come up with some other way—a more fair way, a more efficacious way—to correct the problem than the one before us as it now stands in its simplicity and, I believe, inadequacy.

I thank you, Mr. President.

Mr. KASTEN. Mr. President, I rise to voice my support for the Department of Housing and Urban Development's Urban Development Action Grant Program.

Since the program's inception in 1978, Wisconsin has been a chief beneficiary of UDAG funds; 54 projects totaling $77 million have been approved, 8,900 new jobs have been created, and a tremendous amount of spinoff projects have resulted. In my opinion, no Federal grant program has contributed more in stimulating economic growth in Wisconsin than the UDAG Program.

UDAG's have also been successful in forging a partnership between private and the public sector. In fact, the private sector has invested nearly a half a billion dollars in Wisconsin communities. Hand in hand these two sectors of our society have been successful in redeveloping and revitalizing Wisconsin.

Mr. President, as we all know, Wisconsin is the 16th largest State and has ranked near the bottom in the receipt of Federal funds. The UDAG Program is different. Wisconsin has received its fair share. Only 15 States have received more UDAG funds than Wisconsin has. This is a result of a strong commitment by communities to enhance their economic well-being.

Mr. President, I am very much aware of the criticism that has been leveled against the Urban Development Action Grant Program. Some of it is well founded, some misleading. In Wisconsin, we're proud of the fact that UDAG funds are being used as the program was intended. I would like to brag a little bit about Wisconsin's success in this area. In 1979, the city of Milwaukee received a $12.5 million UDAG for the development of a mall in downtown Milwaukee. 800 new jobs were created, several spinoff projects have resulted, but more importantly downtown Milwaukee is alive, and kicking, and is a viable place to do business once again. The same story can be told in Wausau and in Stevens Point. Mall projects in these two cities have turned dilapidated areas into financial gold mines. The Wausau project has exceeded all financial expectations and the same is expected in Stevens Point. Office buildings in Milwaukee and La Crosse have brought new industry into these cities and created new employment opportunities. These are just a few of the success stories in Wisconsin. UDAG works, and it should be continued.

Elimination of the UDAG Program will not only have a profound effect on Wisconsin but the entire country. Let's review the facts. Since 1978, 2,614 projects have been approved, 1,020 cities have benefited, $3.9 billion obligated, $24 billion invested by the private sector in our communities, and 522,000 new jobs created, not to mention the hundreds of thousands of jobs retained and construction jobs added. These figures are startling. How can we afford to eliminate a Federal program which has done more for this country in revitalizing our communities and creating needed jobs in the last 7 years?

I am confident that without the UDAG Program, future development projects may not be feasible and our urban communities will see a decline in economic growth. I challenge my

colleagues to carefully examine the impact UDAG has had on their States and believe they will come to the same conclusion that I have.

Mr. President, I will oppose any effort to eliminate this program. I believe it has been too valuable to this country and should be continued. Economic growth is the backbone of our society. Without the UDAG Program our communities will lack the sufficient resources to encourage revitalization in our cities.

Mr. BYRD. Mr. President, I agree that we must cut the budget wherever possible and reasonable, but I also believe we must protect essential community and development programs of proven value which continue to be vitally needed by communities and our people throughout the country.

One of these programs is the Urban Development Action Grant Program. It has been an excellent one for my home State of West Virginia and for other States which have suffered substantial economic devastation in the recent recession.

In concept, this program provides seed money or leveraging funds to bring investment by the private sector into economically devastated areas.

In my home State of West Virginia, the unemployment level reached 21 percent in the not-too-distant past. Absent the UDAG Program and the help which it and other community and regional development programs have provided we would, undoubtedly, not have been able to lower this level to the present level of around 15 percent—a level which remains unacceptably high.

Since the UDAG program's inception in fiscal year 1978, it has provided funding for 17 projects in West Virginia, amounting to $40 million. These funds have leveraged an investment into the State of almost $200 million in private sector funding, along with the creation of 5,500 permanent jobs.

With the continued help of such programs as UDAG, we can continue to move forward. Without them, I fear that we will revert to a down-slide in our economy and quality of life.

We need this type of incentive program. It is a good program with a proven track record. There is much remaining to be done, and I call upon my colleagues to join in support for the continuance of this program at a responsible level of funding.

Mr. KERRY. Mr. President, I rise today to voice my objections to the proposed elimination of the Urban Development Action Grant Program. While I am fully cognizant of the need to reduce the budget deficit, I do not think that it is either prudent or appropriate to focus on successful, revenue-generating programs such as this one to accomplish that goal.

The report issued by the Appropriations Committee accurately points out that the primary objective of UDAG is to revitalize distressed communities by stimulating economic development, which in turn will create new permanent jobs and new sources of tax revenue. Evidence of the effects of this objective and of the success of the UDAG Program are particularly evident throughout communities in New England and in a number of communities in my home State of Massachusetts.

In general, Massachusetts has an outstanding record for using UDAG's effectively. During the period from 1978 to 1984, UDAG grants to the State resulted in the creation of more than 35,000 jobs, of which 9,000 have been retained. This retention figure is the third highest among the States receiving awards during that period, second only to the States of New York and Ohio. In addition, the $231 million in Federal dollars awarded during that period generated $1.3 billion in private investment; a ratio of almost 6 private dollars for every public dollar.

In fiscal year 1984 alone, eligible cities and towns in Massachusetts received more than $32 million in UDAG awards, which in turn helped to create over 4,000 permanent jobs and 2,000 jobs in the construction industry.

Mr. President, one specific example that is particularly noteworthy can be found in the city of Lawrence, MA. In 1984, Lawrence received a UDAG in the amount of $6 million for the GCA Corp., to rehabilitate an old mill, closed for 20 years, and to convert it for use in the high technology industry. This $6 million Federal investment leveraged $22 million in private investment, provided for 217 construction jobs and almost 1,000 permanent jobs; jobs which will reduce spending on unemployment and other social programs as well as generate additional tax revenues to reduce the deficit.

Equally significant is the fact that the project led to the creation, this year, of a bilingual job training program for low-income, non-English speaking persons. Over the next 4 years, this program will train more than 1,200 residents of the city of Lawrence, a rate of 300 persons per year. Mr. President, this one UDAG grant has and will continue to result in positive gains in the areas of unemployment, job training, language skills and tax revenue, all espoused goals of the UDAG Program.

UDAG's have not only been effective in the high tech industry, they have also been instrumental in maintaining a diversified economic base throughout New England, a positive insurance policy against international competition.

In Ayer, MA, a UDAG helped to open the first flour mill in New England since 1900 and allowed the Prince Spaghetti Co. to use locally milled flour instead of having it imported from Italy.

In Eastport, ME, a town with an unemployment rate of 25 percent, a salmon cannery reopened with the help of a UDAG after years of neglect. The cannery now uses a new technology developed in Norway to process the fish.

In Central Falls, RI, a UDAG reopened a steel mill that no bank would invest in on their own. The company is now running profitably.

Finally, in New Bedford, MA, a city with an unemployment rate of 10 percent in 1983, a UDAG turned a downtown lot, vacant for 12 years, into mixed income housing units, providing jobs and housing for the community.

These are just a few examples of both the immediate and long-term benefits of the UDAG Program. Distressed urban areas in every State have their own list and dozens of potential success stories waiting for the opportunity to flourish. Elimination of the UDAG Program or a reduction in the amount of funds available will lead to a reduction in job creation and private sector expansion throughout the distressed communities of our Nation.

Mr. ARMSTRONG addressed the Chair.

Mr. GARN addressed the Chair.

The PRESIDING OFFICER. The Senator from Utah is recognized.

Mr. GARN. Mr. President, I ask for movement of the amendment. I do not wish to deny Senators speaking. I would not want to preclude them from that opportunity.

Mr. NICKLES addressed the Chair.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. Mr. President, I appreciate the chairman's comment. I will make my comments very brief. I would like to congratulate the Senator from Colorado, and also the Senator from Wisconsin for their leadership in this area. I think it is awfully important that we actually come out, make some hard votes, and make some tough choices. They are calling for termination of the UDAG Program. This is one of the President's programs that called for termination. He actually said let us terminate 23. This is one of them. When the Senate passed our budget bill we had only terminated 13. When we came back from conference in the House we only had terminated two, and only one single program. So I compliment our colleagues. We are talking about $352 million. You know, it is not just $352 million in 1 year's appropriation, but also you might say our children will be paying, and we will be paying about $32 million per year in interest to finance this. The Senator from Virginia is aware of it. If you look at your State grants that go into UDAG, you will find a lot of

things that maybe you kind of question—whether they really bear public scrutiny and value.

So I hope that we would have the courage to actually terminate this program. I think it is wise. I think it is prudent. I think it is time that we start actually making more difficult decisions. I think this is one of them. I hope the Congress will follow the lead of our two Senators and terminate this UDAG Program.

Mr. GARN. Mr. President, I move to table the amendment.

The PRESIDING OFFICER. Is there further debate?

Mr. RIEGLE. Mr. President, was the Senator moving to table or was he moving to vote?

Mr. GARN. No. The debate is finished. The only purpose in considering tabling was to cut off debate and speed up the process.

Mr. RIEGLE. I think some of us on this side still wish to speak. I know the Senator from Tennessee does.

Mr. GARN. Mr. President, I move to table, and ask for the yeas and nays.

Mr. ARMSTRONG. Mr. President, will the Senator withhold the tabling motion?

Mr. President, I have no objection to the tabling motion but I would like to inquire of the chairman if he would tell us how he is going to vote on the tabling motion.

Mr. GARN. On the tabling motion, I will vote no.

Mr. ARMSTRONG. So what we have in effect is a vote on the main issue. If the tabling motion fails, as I hope it will, then we go to a voice vote presumably on the underlying amendment.

Mr. GARN. Mr. President, I move to table and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Utah to lay on the table the amendment of the Senator from Colorado. On this question, the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON I announced that the Senator from Utah [Mr. HATCH], the Senator from Nevada [Mr. LAXALT] and the Senator from Maryland [Mr. MATHIAS] are necessarily absent.

Mr. BYRD I announce that the Senator from California [Mr. CRANSTON], is necessarily absent.

I also announce that the Senator from Michigan [Mr. LEVIN] is absent because of death in the family.

The PRESIDING OFFICER [Mr. RUDMAN]. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 53, nays 42, as follows:

[Rollcall Vote No. 231 Leg.]

YEAS—53

Abdnor	Glenn	Metzenbaum
Andrews	Gore	Mitchell
Baucus	Grassley	Moynihan
Biden	Harkin	Murkowski
Boren	Hart	Nunn
Bradley	Hatfield	Pell
Burdick	Hawkins	Pryor
Byrd	Heflin	Riegle
Chiles	Heinz	Rockefeller
Cohen	Hollings	Sarbanes
D'Amato	Inouye	Sasser
DeConcini	Kasten	Simon
Denton	Kennedy	Specter
Dixon	Kerry	Stennis
Dodd	Lautenberg	Stevens
Eagleton	Long	Weicker
Exon	Matsunaga	Zorinsky
Ford	Melcher	

NAYS—42

Armstrong	Goldwater	Packwood
Bentsen	Gorton	Pressler
Bingaman	Gramm	Proxmire
Boschwitz	Hecht	Quayle
Bumpers	Helms	Roth
Chafee	Humphrey	Rudman
Cochran	Johnston	Simpson
Danforth	Kassebaum	Stafford
Dole	Leahy	Symms
Domenici	Lugar	Thurmond
Durenberger	Mattingly	Trible
East	McClure	Wallop
Evans	McConnell	Warner
Garn	Nickles	Wilson

NOT VOTING—5

Cranston	Laxalt	Mathias
Hatch	Levin	

So the motion to lay on the table amendment No. 794 was agreed to.

The PRESIDING OFFICER. The Democratic leader is recognized.

Mr. BYRD. I thank the Chair.

Mr. President, while there is relatively good attendance of Senators on the floor, I wish to inquire of the distinguished majority leader if he could give us a reading for the rest of the day and also for tomorrow, how long we will be in today and what be expects for rollcalls, and also Monday, if he can do that at this time.

Mr. DOLE. Mr. President, I thank the distinguished minority leader. It may not be possible, but it was my hope earlier that we could complete action on this bill by 7 o'clock. I understand from the distinguished chairman of the committee that that may not be possible. There will be an amendment offered by Senators DOMENICI and CHILES in an effort to reduce the cost of the bill, and then I was hoping that if we could complete that we might get some agreement from Senator CHILES and Senator DOMENICI to give us 2 or 3 hours on reconciliation by agreement, not by staying here but just by agreement. Then we could depart here about 7 o'clock and come back early in the morning and work on transportation appropriations until about 12:30, and then go to reconciliation and stay on that throughout tomorrow afternoon. And then on Monday morning either stay on reconciliation or move to the Labor-HHS appropriation bill, again have a fairly early morning Monday and try to finish reconciliation on Monday.

Mr. BYRD. How long does the majority leader anticipate the Senate would be in tomorrow, Friday, and how early does the majority leader expect rollcall votes to occur on tomorrow and Monday?

Mr. DOLE. If we could have rollcall votes early, we could leave earlier tomorrow afternoon. That is how it adds up. If Senators are willing to let us have votes as early as 9 a.m., we could hopefully do as much as we can do on a Friday by 3:30, 4 o'clock, maybe a bit earlier.

Mr. BYRD. Will the distinguished majority leader answer my question with respect to Monday rollcall votes?

Mr. DOLE. On Monday, I do not believe we will be able to delay votes. We will bring up Labor-HHS appropriations. I assume we could stack votes until 1 or 2 o'clock on Monday. I would be willing to do that.

Mr. BYRD. I thank the distinguished majority leader.

Mr. DOLE. I wonder if this evening we could get some idea—some Members would like to know. I have had inquiries from both sides of the aisle—how much can we do between now and 7 o'clock. I might ask, if the Senator will yield, the chairman of the committee. Will the Senator yield to me?

Mr. BYRD. Yes. Mr. President, I yield the floor.

Mr. GARN. I thank the distinguished majority leader for yielding. I will explain where we are.

If we had not passed the Durenberger amendment, this bill would already be finished. I said at the time that we had a $428 million problem in outlays. We had worked in the committee over a period of months on a very carefully constructed amendment that took some from everybody, every single agency within the committee. It was distasteful but nevertheless necessary to meet budget totals. We still now are $428 million over in outlays in the budget.

The Senator from New Mexico and the Senator from Florida are going to offer an amendment that is very distasteful because it gets involved in across-the-board cuts, which is what I warned the Senate about earlier today. It makes no sense to me to go through the exercise that we did, working with the agencies, attempting to minimize the impact on them and have that voted down, and then come back with an across-the-board that is indiscriminate without regard to the merit or sensitivity of some programs, whether that is Superfund, whether that is science education, EPA, abatement control, and things of that nature. But that is what we are faced with because of the earlier actions of the Senate.

Now, if the amendment passed, we could be through here within an hour or so, but I have already heard rum-

blings. The same arguments are made again that we will have people, if it passes, or if not even, who will try to add things back. I just say to my colleagues, in the 11 years I have been here I have never been more frustrated. Last year it took 17 minutes to pass the HUD bill. Every other year it has been passed and signed into law in June before the old fiscal year. We have been on the floor for about 10 hours, minus some time off for special orders, but we are still down to the same basic question, my colleagues, of whether we are willing to vote for individual cuts after we have voted for a budget resolution mandating cuts. Apparently we are not willing to do that.

I did not mean to take so much time, Mr. Leader, but that is where we are. Until this body is willing to start making some individual cuts, we cannot reach the budget totals. I for one, if we do not pass this—this is distasteful—as distasteful as an across-the-board cut is to me particularly, after all the work that staff and others have done in crafting this amendment that was turned down because people were so interested in listening to their mayors—and I say that as an ex-mayor. I spent 7 years in local government—if they are not willing to take their share along with CDBG and EPA research and development, all of that, no cuts at all, then I will vote against the bill. I will not vote for a bill that is $400 million over in budget outlays even if it is my own. So I cannot answer the question of the majority leader as to how long we are going to be. It depends on whether this body is willing to get serious about its commitments when it voted for a budget resolution.

Mr. DOLE. Mr. President, I wonder if we might have a time agreement on the amendment to be offered by Senators CHILES and DOMENICI. It seems to me it is pretty much straightforward. It is an across-the-board cut. Is that correct?

Mr. DOMENICI. I say to the distinguished majority leader that it is not exactly that. I have discussed it with the chairman of the subcommittee.

Actually, what it does is take half the savings we need from revenue sharing, which will be a 6-percent reduction, and the other half of the savings from a 1.1-percent across-the-board reduction. With this amendment the programs within this bill will be cut 1.1 percent and revenue sharing, instead of a 12.5-percent reduction, which we had before, will have a 6.1-percent reduction.

I am willing, subject to the wishes of the Senator from Florida, to have one-half hour on the amendment.

Mr. DOLE. Mr. President, I ask unanimous consent that there be one-half hour on the amendment, the time to be equally divided.

Mr. BYRD. Mr. President, reserving the right to object, I have to check on my side, I say with great respect to the majority leader.

Mr. GARN. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. GARN. So that my colleagues understand the disparity, we are talking about 1.1 versus 6.1. The 1.1 is on top of all the cuts that were already made and are in the bill. So the disparity is not that great. It sounds like it in percentages. Thirty-five million dollars out of disaster relief is a good piece of change, already taken out. The 1.1 would be on top of that, and at this point revenue sharing has not been cut at all.

Mr. DOLE. Mr. President, if we can reach an agreement for a fairly quick vote on this amendment, if it is satisfactory with the managers of the bill, when we come back we can move to reconciliation this evening and come back on this bill at 8 in the morning and complete action on it by 10, and then move to transportation.

The PRESIDING OFFICER. Does the majority leader withdraw his pending unanimous-consent request?

Mr. DOLE. I withdraw it, yes.

Mr. LAUTENBERG. Mr. President, I say this to the majority leader: If this is going to be offered, are we precluded presently from adding amendments? I have one that has been agreed upon by both sides.

Mr. DOLE. That would be right afterward.

Mr. LAUTENBERG. I have one that I want to offer to the proposal of the Senator from New Mexico.

Mr. DOMENICI. I do not know anything about it, I say to the Senator from New Jersey.

I do not want anybody to be misled. I am going to offer two amendments and vote on my amendment. If it is adopted, the Senator can amend it. If it is not adopted, we will be finished. The Senator will have a chance to amend it if it is adopted.

Mr. LAUTENBERG. I am reminded that my amendment would not be an amendment to the Domenici amendment.

Mr. DOLE. Is it going to be accepted?

Mr. LAUTENBERG. I hope so.

Mr. MURKOWSKI. Mr. President, will the majority leader yield?

Mr. DOLE. I yield.

Mr. MURKOWSKI. I point out to the majority leader a dilemma. It is certainly not my intent, as chairman of the Veterans' Committee, to take disproportionate cuts. It is obviously how the cuts are allocated that matters.

There have been $400 million in outlay cuts, $170 million of which is proposed to be taken in the veterans' health care. I think my colleague from Alabama joins me in enlightening the leadership as to where we are.

The original plan of the Senator from Utah today was to cut VA by $296 million. I submitted an amendment which added $100 million back. That would have been a net cut to the veterans of $196 million.

Now a 1.1-percent across-the-board cut is proposed, which would cut another $101 million. Therefore, the veterans' cuts would be $297 million. We are worse off than when we started.

I say to the leader that I will have to come back in with an amendment after the pending amendment, to at least put back what we had before we started, with this 1.1-percent cut, which would be approximately $101 million.

Mr. DOLE. I do not know how the Senator form Alaska put it on an amendment this morning. We cannot have it both ways. Obviously, if adopted, it would be opened to amendment, and he could come back with that amendment.

Mr. President, I withdraw my request, and we will stay tonight until we see what happens.

AMENDMENT NO. 795

(Purpose: To conform the bill as reported to the Second Concurrent Resolution on the Budget for fiscal year 1986)

Mr. DOMENICI. Mr. President, on behalf of myself, and Senator CHILES, and Senator EXON, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. DOMENICI], for himself, Mr. CHILES, and Mr. EXON, proposes an amendment numbered 795.

Mr. DOMENICI. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new section;

"SEC. 417. Except as otherwise provided in this section, each dollar amount contained in this Act, as amended, which is provided for non-defense discretionary programs and activities is hereby reduced 1.1 per centum;"

Mr. DOMENICI. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 796

(Purpose: To conform the bill as reported to the Second Concurrent Resolution on the Budget for fiscal year 1986)

Mr. DOMENICI. Mr. President, I send an amendment to the desk, amending the amendment which I just sent to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. DOMENICI] for himself and Mr. BOSCHWITZ proposes an amendment numbered 796 to amendment numbered 795.

Mr. DOMENICI. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike the words "per centum, and insert in lieu thereof, add the following: per centum, *Provided*, That this section shall not apply to the amount on page 2, line 16; *Provided further*, That, notwithstanding the provisions of 31 U.S.C. 6701-6724, payments to local governments are hereby reduced by 6.1 per centum; *Provided further*, That, notwithstanding the provisions of 31 U.S.C. 6701-6724, in fiscal year ending September 30, 1986, persons charged with administration of any provision of 31 U.S.C. 6701-6724, shall limit the value of any payments conferred by 31 U.S.C. 6701-6724 to amounts not in excess of the amount provided in this annual appropriation act, as amended by this section, and if the requirements of 31 U.S.C. 6701-6724 exceed the amount so provided, the payments shall be reduced to the extent necessary to stay within the amount provided in this annual appropriation act, as amended by this section."

Mr. DOMENICI. Mr. President, I hope everybody knows that this is not a delightful undertaking. I have nothing but the highest regard for the distinguished chairman of the subcommittee and the ranking minority member. They have tried diligently to bring this bill within the budget allocation.

In fact, they prescribed a rather substantial cut in the various programs and then took a 12-percent cut in revenue sharing. With these reductions, the subcommittee achieved the budget targets that were established and assigned to them in the formal 302(b) allocation by the Appropriations Committee. However, earlier today, it was decided that the revenue-sharing portion of the savings—approximately $428 million—would be deleted from the bill. So, as the chairman said, we have a very simple proposition. The HUD-independent agencies appropriation bill is now $428 million to $450 million above the subcommittee's budget allocations.

I have the highest regard for the subcommittee and its efforts to prioritize. I do not want to exert my will on individual programs and go through this bill and say: "Here is my preference. I want to lower spending for this program, and raise spending for that program." I think that is the wrong way to do it. So I have decided that we should take the $428 million that we are currently over, and we should move in the direction in which the subcommittee had moved. Let us cut revenue sharing, but let us cut it only 6 percent instead of 12 percent. We recognize that the Appropriations Committee wanted to reduce revenue sharing. But we have said: "OK. We do not want to reduce the program by 12 percent. Let us take half of it." Let us take 6 percent and we can take care of half the problem. We can then take the other half of the problem and achieve these savings through a 1.1-percent reduction to all of the other discretionary programs.

I regret that we have to cut these programs, but, fortunately, it is a 1.1-percent across the board reduction. The Senator from Alaska is correct: a 1.1-percent reduction against the veterans' programs is a lot of money. But obviously you cannot get savings unless you cut programs that spend money. You cannot cut housing, which does not outlay in the first year, because you will not save any money.

I think it is fair, and not too inconsistent with the way the subcommitee has done their work, to take half the savings from revenue sharing and half the savings programs which are just as crucial and critical to many of my colleagues.

I cannot believe that the mayors and country commissioners of this country cannot bear half of the needed savings. If they understand that we are restraining our veterans' programs—even though we have already cut veterans' programs and are going to cut them an additional 1.1. percent—and other programs such as Superfund and EPA, I cannot believe that they cannot bear half of the needed savings.

Can you tell me that cities and counties are not going to be able to adjust to a 6-percent revenue sharing cut when we are trying to maintain spending consistent with the budget we have voted for? We are even going to reduce veterans' programs in order to maintain this consistency. We are only going to let veterans medical care grow 3 percent. This will be 3-percent growth even after 1.1-percent across the board reduction.

For those who think we are decimating anything—I do not think we are—veterans medical care will be growing at 3 percent.

The amendment is simple in form and simple in its accomplishment. It will bring this bill in on target. There is no doubt in my mind that, with 100 Senators, if we had a week to consider this bill, these Senators might find some other way to bring spending down. I chose not to go within this bill and challenge the priorities of the subcommittee. I think the subcommittee did a tremendous job, and the only thing I can do is what I have done here with an across-the-board amendment. Granted, I could have a 4-percent reduction for revenue sharing and a 1½ percent across-the-board reduction for all other programs. Someone suggested a 5-percent reduction for revenue sharing and a 1.3-percent across-the-board reduction for all others. Obviously, anyone who wants to can do that. We have the numbers. However, it is not the only way. This amendment has some symmetry; half the savings come from revenue sharing and the other half from programs we have already cut. It seems to me that is a pretty fair shake for everyone.

Mr. RUDMAN. Mr. President, I rise to express my support for Senator DOMENICI's amendment to require an across-the-board cut to the HUD and independent agencies appropriations bill for fiscal year 1986. The purpose of this amendment is to bring this bill back in line with the budget resolution's outlay target. The amendment is made necessary by the Senate's irresponsible action taken earlier today to add a half billion dollars for general revenue sharing without an offsetting cut. I would note, that, in general, I view this type of indiscriminate, across-the-board amendment, which negates that work and function of the Appropriations Committee, as poor legislating. Nonetheless, it seems that there is no alternative to this approach in this case, other than to concede to endless additions to the Federal deficit.

If fact, Mr. President, today's vote to restore funds for general revenue sharing demonstrates exactly why we need a Gramm-Hollings-Rudman amendment adopted by the Senate last week. It has been proven time and time again that when it really comes down to the line, Congress is incapable of meeting its own budget targets. Last week we saw a lot of posturing on both sides of the aisle about the need for fiscal responsibility—each side claiming that they had a better plan to enforce budget discipline. The Gramm-Hollings-Rudman amendment, which dealt with the budget process, passed by an overwhelming vote of 75-24. Yet, it is much harder to cast the hard votes—those votes on whether to reduce funds for X, Y, or Z program. Then, the groundswell of support for fiscal discipline evaporates into thin air.

Let's look at today's problem. The Appropriations Committee found itself with a bill which was about $800 million over the budget resolution's outlay ceiling. The committee, under the leadership of the subcommittee chairman, Senator GARN, sought to meet the budget target in the most equitable way possible. Having faced a similar problem with the Commerce, Justice, State bill, I know how difficult the task was. The committee proposal cut money from Indian housing, community development block grants, environmental research and development funds, Superfund, disaster relief

funds, NASA, science education and VA medical care. None of these cuts were easy. The committee also recommended that general revenue sharing—a program which is supposed to be phased out next year, regardless—be cut by 12 percent. To disagree with one cut in this responsible plan is fine, but those who do so have an obligation to develop an offsetting adjustment. Now we are left with an across-the-board approach to meet our own budget target. This amendment means reductions in Superfund, disaster relief, VA medical care, and HUD operating subsidies cut.

But the only alternative is to bust the budget. This is the problem that requires an automatic enforcement mechanism as envisioned in the Gramm-Hollings-Rudman proposal, which seems to be the only hope for achieving fiscal responsibility. For the time being, however, I hope that we can at least pass this amendment and bring this bill back in line with the budget targets.

Mr. DOMENICI. Mr. President, I will be pleased to answer any questions at this time.

I yield the floor.

Mr. LEAHY. Mr. President, the Senator from New Mexico is right in saying that each one of us is looking for the best way to make the cuts. Each of us may choose to do it slightly differently. One Senator may want to cut one piece a little more as a little less than another piece.

My friend, the distinguished Senator from Utah, and I have worked long and hard on this bill, doing exactly that, finding a little piece here and there and trying to keep under the budget.

To support the proposal of the distinguished Senator from New Mexico and the distinguished Senator from Florida means that certainly in my case that I will have to vote to cut a number of programs that I have worked with ever since I have been on the Appropriations Committee. A number of these are important to me and important to my State.

But as the distinguished Senator from Florida and I have discussed before, we have to do more than give great speeches on how we are going to balance the budget and bring deficits down. Each one of us have at one time or other has made such a speech. As my friend from Florida has remined me on occasion, he says, "Pat, you know sometimes you have to vote to do that, too," which is a difficult thing.

I wish that we did not have to face the amendment that my friend has introduced. It would be nice if we could say as sometimes Secretary Weinberger is able to say, "We just opened the drawer and found all this extra money," and we could pay for all of the programs. I know, having spent several months with the Senator from Utah in my capacity as ranking minority member of this subcommittee, that there is no drawer. We have opened every single drawer there is. We turned them upside down and shook them out, and we found every cent there is.

So, even though it means that there are cuts that will have to be made in programs that I happen to like, to be consistent with the votes that I have cast, both for the Hollings freeze 3 years ago and straight through to the Gramm-Rudman-Hollings amendment, I will support this amendment and vote for it. I will do it because I think that, within the framework that the Senator from Utah and I have established in this bill, that this amendment, spreads the cuts as fairly as possible. No one likes to have a program cut if they support that program. But I think that within the framework of the bill, the amendment of the Senator from Florida and the Senator from New Mexico, is as fair as any other approach. That does not mean it does not hurt. But at least it is as fair as we can be within the budget restraints.

For that reason, Mr. President, I will support the amendment.

Mr. CHILES. Mr. President, last week we had a lot of rhetoric in this Chamber and it seemed to me that basically I have heard two kind of themes. One of them in support of Gramm-Rudman was that we need to enforce a discipline upon ourselves and to get that discipline it is necessary to have a bill with a trigger in it so that if you fail to achieve through the normal process, that you should be achieving, the trigger will be pulled and it sort of does it for you.

The other argument seemed to be that there is no need for an additional procedure, we have all the procedures that we need, we simply have had an absence of will, and so we do not need a trigger. We do not need anything else. We just need the will.

I would say to my colleagues no matter what side of that argument you were on I think you can vote for this amendment. If you need a trigger, this is a trigger, and it is not one that the Senator from New Mexico liked to design nor I either, but we have gone through the normal process. We had the subcommittee report. We had the subcommittee come to the full committee and say our bill is out and we propose to bring it in by making a series of cuts and making a cut in revenue sharing, and the full committee accepted that.

We brought that bill to the floor within sort of the framework, and the floor working its will said, "Wait a minute, we do not want to make those cuts, we do not want to make it." So if we do not make it, then we have the trigger. On the other hand, if you were one of those people who likes to argue, well, you have an opportunity here to exercise your will. You have an opportunity to exercise your will without Gramm-Rudman. It has not become law yet, and so if you are of that persuasion, then I would encourage you to exercise that today.

Mr. SIMON. Mr. President, will the Senator from Florida yield?

Mr. CHILES. I am glad to yield.

Mr. SIMON. Is it not also true that it is important that since we have adopted the Gramm-Rudman-Hollings amendment, that we establish a tradition we are going to live within those ceilings that we have, so that if we reject this amendment, we are immediately setting the wrong precedents?

Mr. CHILES. I think so. If I were a Member of the House of Representatives and one of the 48 conferees or one of the other couple hundred people who are left after you have the conference, I would say, "What in the world is the Senate doing about talking that they are serious about this proposition, when they will not even abide by the ceilings that they have set for themselves through a floor vote, a budget resolution, through the action of the Budget Committee and then the Appropriations Committee in setting these ceilings?" I think they would have every right to say, "You are not serious about this. I do not know why you brought it over to us."

I think the Senator from Illinois is exactly correct.

Mr. SIMON. I thank my colleague from Florida and the Senator from New Mexico. I think they are absolutely right on target.

Mr. CHILES. Mr. President, I just say again I would like to see the subcommittee honored. You do not like to make these across-the-board cuts. I do not like the idea of having them at all. But it seems to me that we need to do that and I also want to say to my distinguished friend from Vermont, that I think his is a stand of courage of what he is doing because I know he does not want to cut any more in programs like Superfund, programs like veterans, as the Senator from Florida does not.

We stood on this floor with many other people and championed those causes before for NASA which is in my State and which I argued in the Budget Committee and tried to argue some in the Appropriations Committee that we were not putting enough money in for things like the space lab, those kinds of areas.

So it is not a task that I know he likes, but I compliment him on this stand in that as well.

Mr. GARN. Mr. President, I will be very brief because I have been on the floor a long time today and I cannot really say anything new, other than that I will support this amendment, reluctantly, because I think it was far

more responsible to go through each of the agencies and judge what their capability was than to apply 1.1. So I am sorry that we could not have done that. It will hurt ERA and it will hurt NASA a great deal more then the scalpel approach we are taking to those agencies. But the Senate spoke, whether I agree with them or not—and I do not—and this is the only alternative at this point that I see.

Although I feel very strongly against across-the-board cuts without prioritizing cuts within agencies, I will vote for this amendment. I will further let the Senate know that if this amendment does not pass and we do not meet the budget ceiling as required by the Budget Act, then I will vote against the bill and try to defeat it. I will not go into the House conference with a bill that is $400 million over the budget allocation.

Mr. EXON. Mr. President, I am pleased to cosponsor the amendment that has been offered by the chairman of the Budget Committee and the ranking member thereof, the Senator from Florida.

I want to add my voice to those that have already said that this is not a pleasant procedure. There are many projects that we are cutting with this across-the-board cut that I, too, think are probably wrong.

When the amendment was offered by the Senator from Minnesota, my distinguished colleague, Senator DURENBERGER, I voted in support of that for the reason, if you will check back on the records, it was this Senator who, in the Budget Committee, said that we had to make some cuts in revenue sharing, but it was this Senator who first suggested that we fund it fully for 1 year and then phase it out. That was eventually accepted on all sides and is now law.

I thought it was, frankly, quite unfair, though, because the cities have already established most of their budgets and I thought it was creating undue pain on those who had committed their budgets to make the cuts that were suggested by the hard-working committee.

Therefore, I anticipated that something like the amendment that has been offered would follow if the amendment by the Senator from Minnesota prevailed, as it did. Now this does make a cut in the previous commitment that we made to the cities with regard to revenue sharing. But I say that this is Gramm-Rudman in action and I cannot imagine anyone who voted on this floor for Gramm-Rudman who would not fall in line with the amendment that has been offered by the chairman of the Budget Committee and the ranking member thereof. I think this is the time to put your vote where your rhetoric was and since Gramm-Rudman is a part of the law now, let us get on with putting it into action now. And, as painful as that is, this Senator is going to vote for the amendment that has just been offered. I thank the Chair.

Mr. DURENBERGER. Mr. President let me just briefly pick up where my colleague from Nebraska left off with the amendment that went through here last week with the name of the presiding officer on it. When I was in the well on one of the votes on this amendment earlier in the day, several colleagues came up and made the same observation the Senator from Nebraska made. "Aren't you lucky? You are getting your experience on Gramm-Rudman early. Instead of waiting for next year, you are doing it this year."

I think the Senator from Nebraska is accurate in his analysis of the experience we are going through. It is not a pleasant experience. Yet, it is not one that the authors of that particular piece of legislation would have wanted to put themselves through. It has been forced on us by a variety of circumstances. But I do think that today's experience is a very good example of that.

We rely on authorizing committees and we rely on appropriation committees to do the work that it takes to pass judgment on the value of what our predecessors did and how many dollars we ought to put against that in a particular current period of time. Then we come to the floor, those of us who disagree with their judgment, and it is our right here to state our disagreement and, in my case today, to have 56 or 57 of my colleagues agree that my particular judgment on the issue was more supportable than the judgment of the appropriations committee.

But then the inevitable happens. The Senators from Colorado and Wisconsin gave us opportunities to take care of the Senator from Minnesota and revenue sharing by substituting, in effect, dollars from more selectively targeted housing or Urban Development Action Grant Programs, the savings in that area, for the dollars lost in the general revenue-sharing program. Perhaps, it was taking the Senator from Minnesota up on his theory that revenue-sharing money gets spent all over. It gets spent where it does the most good; 99-cent dollars compared to UDAG and HUD-assisted housing probably is a better expenditure of scarce Federal funds.

But the Senator from Wisconsin and the Senator from Colorado were not persuasive enough or the time was not right, but, in any case, they lost out. But I supported them in each of those cases.

The chairman of the Appropriations Subcommittee has worked very hard and is used to passing bills in 17 minutes rather than 17 hours and is very frustrated on the floor. But this body has to come to a judgment, which I believe the body has come to. I believe, as usual, the chairman of the Budget Committee and the ranking member of the Budget Committee have captured the spirit of this body. They have now had 4½ or 5 years of capturing the spirit of the body at crucial times, up against a 7 o'clock departure time or a midnight departure time, or whatever.

I am willing to concede that in this case they have also captured the spirit of this body and I am willing to support the amendment by the chairman of the Budget Committee, as long as the chairman of the Appropriations Subcommittee is willing to do the same.

And, by that, I do not want him to think that I am substituting, or anything I had done today was to try to substitute my judgment for his, because I do respect his judgment in revenue sharing. I know the problem that he has had to face is a difficult problem. I also recognize the argument that he makes in terms of across-the-board cutting is not fair, it is just the only thing we have available to us.

I looked at the EPA account, for example, and I found that the subcommittee had already taken at least 10 percent out of the EPA account. In that are some accounts, such as construction grant programs, for my local communities and every else's local communities. They have also reduced certain other programs in HUD and FEMA, for example, by 3 to 5 percent. So, at that point, I became persuaded, to the degree that if the burden can be shared almost as equitably as possible, I ought to recommend to my colleagues that the chairman of the Budget Committee has captured that burden-sharing with his amendment and I will support that amendment.

Mr. FORD. Mr. President, I wish to make just a point or two. I am going to join with my colleague from Minnesota to accept this proposal. Like everything else, there is something wrong with it; we can always find problems.

But, there is one thing about revenue sharing that has not been brought out. It is carrying a whale of a cut to take care of other programs when it will be abolished on September 30 next year. We have already cut revenue sharing. We have cut it to the bone. We have cut it out—o-u-t. It is gone, every penny of it.

Then we made a budget 5 months ago, the budgets of the communities had already been made, and now we come back 5 months later and say, "We are going to cut you some more, which you hadn't anticipated."

The programs that we are taking 1½ percent off of—I do not want to do it either—but we have to take into consideration that they are going to be here long after revenue sharing is

gone. So you are saying to our communities, to our mayors, to the county judges, and our local constituents that not only are we going to abolish this program but cut it this year; and it is probably the best philosophy of Government for taking care of local communities. Sure, you say it comes out of the deficit. But what does not come out of the deficit?

We talk about getting onto Gramm-Rudman early; the Senate voted against that. Primarily those on the other side of the aisle voted against getting onto it early and voted against increasing revenues early. They voted against this early move. Now they are saying we have to get adjusted to it, and do it early. We heard last week: let us start it after next year, after 1986, and begin January of 1987. Now we are saying let us do it now—lean on Gramm-Rudman now, and the philosophy now. That is fine. I understand that. I accept it. Maybe I am wrong about how we have put this together. But we have broken our word to the cities, to the counties, and it relates to this.

Maybe we have broken our word to some others. But we have gone much farther than a 1.5-percent cut. We have to abolish revenue sharing. All of that is gone. Go to some of these smaller communities, and see what that means to them. Go to some of my small counties where revenue sharing is 70 percent of the county budget because they do not have any taxable assets. It is going to be devastating.

So when you cut revenue sharing, you are not just cutting a project. You are cutting the ability of many of the counties to be able to survive.

Mr. President, I accept the position taken by my distinguished friend from Minnesota, and offered by my friends from New Mexico and Florida. I hope there will not be any more cuts in revenue sharing.

I might make one other point where the Senator said it passed in 17 minutes last time and in 17 hours this time. This is what is going to happen from now on. We might as well put on the easy shoes and nonsweat shirt because this is going to be something that will be our problem from now on. It is not going to be easy. There is going to be a lot of debate. You are going to pick and choose. When you start picking and choosing, then you are not fair. You are exercising your judgment. Then you get in trouble out here. If you say we would need so much money and everybody takes an equal cut, then I think you are going to be a lot better off as proposed by the Senator from New Mexico than to start picking and choosing. The Senator may like some things. I may like some things. The Senator will cut something I like. I will want to cut something the Senator likes. It just will not work. If we are all going to take some hurt, let us take it equally. I will stand on that a lot better than I will if we start picking and choosing about programs. You go back home and say everybody is sharing equally. I am willing to stand on that. But what you have done to our cities and communities here is completely eliminate this whole program.

It is going to be devastating come October 1, and many who are standing here now saying we want to abolish it completely—and it is gone—will turn around one of these days and say, Hey what happened to those counties and those communities out there, particularly in the rural areas of Appalachia—you have them in your State and I have them in mine. And you just stop a minute, think about a county whose fiscal budget for a year is 70 percent of revenue sharing. They just do not have the assets to tax to do the things that they would like to do.

Somebody is going to have to make it up. That somebody is going to probably be the State. The county cannot do it, nor the community.

Mr. President, I apologize again, like others, for taking so long. But I compliment my friend from Minnesota. The Senator brought this to our attention. The Senator is one individual that wants to send funds back to the States. He has been consistent in that. The Senator wants to help the States and communities.

This was one of the best programs I had when I was Governor; and still is, since I have been here—because the people at the local level can make a judgment on what they think is most important for their community, better than a bunch of bureaucrats sitting up here and telling them what they think is good for them—revenue sharing on that basis has been very good.

I again compliment my colleague and yield the floor.

The PRESIDING OFFICER (Mr. TRIBLE). Is there further debate?

Mr. LAUTENBERG addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. LAUTENBERG. Mr. President, I rise in strong opposition to the pending amendment. This amendment would make a 1.1-percent cut across the HUD-independent agencies appropriations bill, H.R. 3038.

This across-the-board cut represents the second round of cuts we will be making to programs that should not have been subject to the first round. These programs include the Community Development Block Grants under HUD, cut by $100 million, the Rental Rehabilitation and Hodag Programs under HUD, cut by $75 million or by one-third, and the NASA Research and Development, cut by $15 million. Another program subject to double cuts is the Veterans' Administration medical care, only partially restored by an amendment offered this morning.

Mr. President, the across-the-board cut would also make a second cut in the EPA budget.

I find it particularly painful in States like mine, with programs that EPA is responsible for where only this agency has the authority, expertise, and skill to carry out the mandate of our Federal environmental statutes, we find that, despite the fact that we have hammered away at their budget time and time again, we face, Mr. President, additional cuts. They are underfunded to begin with, and here once again we are going to include them in an across-the-board cut.

Mr. President, the bill already includes $115 million in cuts the committee made to EPA's budget when the committee returned to this bill to reduce its size. These cuts included $100 million in Superfund, $10 million in research and development, and $5 million in abatement, control, and compliance.

Mr. President, I voted against cutting EPA's budget in committee. I had considered offering an amendment to this bill when it came to the floor to restore the $115 million in cuts the committee made to EPA's budget. But, I decided not to offer this amendment because I was afraid that such an amendment would invite the situation we now face, an across-the-board cut, one that ignores program needs and ignores the programs that have already been cut by the committee. An across-the-board cut of 1.1 percent, offered by the chairman and ranking member of the Budget Committee, additional $29 million cut for EPA on top of the $115 million cut already made to meet budget targets.

Mr. President, this cut would jeopardize essential programs at EPA.

First, the Superfund Program: The Senate Superfund reauthorization bill, which the Senate passed only weeks ago, provides an annual authorization level for Superfund of $1.5 billion a year. The budget resolution allowed for $1.3 billion for Superfund in fiscal year 1986. With the cuts made by the committee, Superfund is down to $1.2 billion. An across-the-board cut would reduce that even further, by another $16 million. Mr. President, there are 850 Superfund sites on the national priority list and thousands more that require cleanup funding. Every State has a stake in this program.

In addition this program is self-financing. The Senate reauthorization bill raises all the revenues for Superfund from taxes. Superfund is not a drain on the budget and we should not be cutting it under the guise of balancing the budget.

Second, clean air and water: The Clean Air and Water Programs at EPA are directed at meeting the Nation's

air and water quality standards. The funding included for these programs in this bill go to the States to implement these programs, for research into new pollution control technologies, and to enforce standards and regulations and carry out the Clean Water Act amendments approved by the Senate in July by a vote of 94 to 0.

Third, drinking water: The safe Drinking Water Program requires public water supply systems to meet standards restricting contaminants in drinking water. It also protects underground water supply sources. Contamination of our Nation's water supplies is a burgeoning problem—funding will allow the Agency to move forward to set contaminant levels, to assist the States in enforcing these standards, and to implement controls on underground injection of wastes. The Senate voted unanimously to reauthorize the Safe Drinking Water Act earlier this year.

Fourth, hazardous wastes; the RCRA Program manages the cradle-to-grave handling of hazardous wastes. It reduces risks from the improper disposal of wastes. EPA's responsibilities were significantly increased last year when we reauthorized RCRA. Congress added deadlines in this reauthorization that are coming into effect this year. Funding is necessary to make it possible for the Agency to meet these deadlines.

Mr. President, the Senate has approved strengthening amendments to a number of our Nation's most important environmental statutes this year. If the Senate intends for EPA to carry out these programs, we have to fund them.

EPA's budget is a small part of this overall bill. It is about $2.6 billion out of upward of $50 billion. It has already been subjected to major cuts.

If the Senate is going to go with an across-the-board cut, EPA and the HUD and NASA programs I mentioned earlier will be hit twice. Therefore, Mr. President, I urge the Senate to reject this across-the-board cut.

Mr. DOMENICI. Mr. President, I ask unanimous consent to have printed in the RECORD a list of nondefense discretionary accounts in the HUD-independent agencies appropriation bill.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

NON-DEFENSE DISCRETIONARY ACCOUNTS IN THE HUD-INDEPENDENT AGENCIES APPROPRIATION BILL

National Science Foundation, Research and related activities, 49-0100-0-1-251.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. DOMENICI. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the second-degreee amendment of the Senator from New Mexico (Mr. DOMENICI).

The amendment (No. 796) was agreed to.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the yeas and nays on the first amendment, which I sent to the desk, be vitiated.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I move the adoption of the amendment, as amended.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the underlying amendment, as amended, of the Senator from New Mexico (Mr. DOMENICI).

The amendment (No. 795), as amended, was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I want to thank my colleagues on both sides for quick disposition of that important amendment. If we could now reach an agreement on any amendments that are to be offered to this amendment, and then preclude any other amendments be offered to this amendment, I would be prepared to come back to this bill in the morning. I know the Senator from New Jersey has an amendment.

AMENDMENT NO. 797

(Purpose: To permit NSF to address higher personnel compensation requirements in research program management)

Mr. GARN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Utah [Mr. GARN] proposes an amendment numbered 797.

Mr. GARN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 32, line 9, strike out "$72,000,000" and insert in lieu thereof "$73,000,000".

Mr. GARN. Mr. President, this is the first of three amendments that involve no dollar increases to the bill. They are technical amendments. I have consulted with Senator LEAHY, the distinguished minority member, and he has agreed to them.

The committee was recently advised of a serious shortfall in personnel compensation and benefits funding for program management. This shortfall is the result of understandable shifts in the staffing of the Foundation whereby productivity increases have yielded a higher per FTEE average cost. But just as significantly, this shortfall has been caused by a failure to properly plan for and estimate personnel costs.

The committee understands the full shortfall totals about $1.9 million. Rather than grant an increase in this limitation in this amount, the amendment provides roughly half the shortfall. The balance of these costs will have to be absorbed by more careful and stringent personnel management.

Mr. President, I know of no objection to the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 797) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHILES. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 798

(Purpose: To facilitate the activities of the National Commission on Space)

Mr. GARN. Mr. President, I send a second amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Utah [Mr. GARN] proposes an amendment numbered 798.

Mr. GARN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 31, line 7, insert the following immediately before the period: ": *Provided further*, That, of such funds, $500,000 shall be available for the activities of the National Commission on Space, established by the National Aeronautics and Space Administration Authorization Act, 1985 (Public Law 98-361; 98 Stat. 422)".

On page 31, insert the following immediately after line 7:

NATIONAL COMMISSION ON SPACE

Section 204(c) of the National Aeronautics and Space Administration Authorization Act, 1985 (Public Law 98-361; 98 Stat. 430) is amended by striking "twelve" and inserting in lieu thereof "18".

Mr. GARN. Mr. President, the Committee has been requested by the Commerce Committee to make a modification in existing law which will permit the National Commission on Space to discharge their responsibilities to make recommendations to the future course of our Nation's space policy and programs.

The modification will extend the period available to complete their report by six months. Additional, $500,000, in the form of an earmark of NASA fundings, is providing to permit the Commission to continue its deliberations during this extended period.

Again, Mr. President, this amendment has been cleared on both sides.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 798) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DURENBERGER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 799

(Purpose: Adjustment in travel limitation of the Council on Environmental Quality to permit cooperation on environmental issues with Japan)

Mr. GARN. Mr. President, I send another amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Utah [Mr. GARN] proposes an amendment numbered 799.

Mr. GARN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 19, line 11, insert after the comma the following: "and not exceed $16,000 for travel expenses"

Mr. GARN. Mr. President, the committee recently has been requested to increase the travel limitations on the Council on Environmental Quality to permit their general counsel to participate in a meeting in Japan to discuss our system of environmental protection laws. The cost of this trip is $3,000. Given the existing limitation of $13,000, such an expenditure could not be made without significantly disrupting other planned travel activities.

Mr. President, we are authorizing it, but it is not additional money added to the bill.

This is also acceptable to the minority.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 799) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DURENBERGER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who seeks recognition?

The Senator from Minnesota.

AMENDMENT NO. 800

(Purpose: To provide funds for a study of the effects of a reduction in the lead content of gasoline on engines used in agricultural machinery and for other purposes)

Mr. DURENBERGER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Minnesota [Mr. DURENBERGER] proposes an amendment numbered 800.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On Page 17, Line 9 after "1987:" insert the following: ": *Provided*, That $1,000,000 of the funds under this heading shall be available for a study of the use of fuel containing lead additives, or alternative lubricating additives, in gasoline engines which are used in agricultural machinery. The study shall analyze the potential for mechanical problems (including but not limited to valve recession) which may be associated with the use of other fuels in such engines. All testing of engines carried out for purposes of this study shall be reflective of actual agricultural conditions to the extent practicable including revolutions per minute and payload. The Secretary of Agriculture shall be consulted in the design of such study and shall be given opportunity to comment on the results which shall be reported to the Congress no later than December 31, 1986: *Provided further*, That, notwithstanding any other provison of law, no funds available under this Act or carried over from prior appropriations shall be used to provide exemptions for users or classes of users of motor fuels or otherwise modify the regulation of fuels or fuel additives for gasoline lead content made final on March 7, 1985 in volume 50, *Federal Register* 9386 and the regulation for banking of lead rights made final on April 2, 1985 in volume 50, *Federal Register* 13116."

Mr. GARN. Mr. President, will the distinguished Senator yield to the distinguished majority leader?

Mr. DURENBERGER. I yield.

Mr. DOLE. Mr. President, I have been on the telephone with the distinguished Senator from Alaska [Mr. MURKOWSKI]. He does have an amendment concerning veterans. He has agreed to offer it tomorrow morning about 8:30, and he has agreed to have 15 minutes on a side. I make that request.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Reserving the right to object.

Mr. DOLE. And that we would take up a couple of amendments that have been agreed upon.

Mr. DURENBERGER. Mr. President, this amendment is directed——

The PRESIDING OFFICER. Will the Senator suspend?

Does the majority leader withdraw his unanimous-consent request?

Mr. DOLE. Yes.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. DURENBERGER. Mr. President, this amendment is directed at the lead in gasoline regulations which have recently been issued by the Environmental Protection Agency. In a very few weeks now the regulation setting a maximum lead content of 0.1 grams of lead per gallon will go into effect. That will reflect more than a 90-percent reduction in lead content from just a year ago when the maximum standard was 1.1 grams of lead per gallon.

Mr. President, I have been a constant advocate of a rapid phase down and early elimination of lead from the Nation's gasoline supplies. In fact, in the last Congress I introduced legislation to ban the sale of leaded gasoline by January 1. 1988. And so I was pleased when in March of this year the Environmental Protection Agency issued regulations which took a large step in the direction of a total ban on lead in gasoline.

Lead in gasoline is a problem for two reasons. First, the airborne lead which results from the combustion of leaded gasoline is a serious health problem for millions of Americans who live in major urban centers where automobile traffic is constant and congested.

Evidence accumulated in a whole series of studies over the past 2 or 3 years indicates that lead, even at low levels, is far more harmful to humans than previously thought. Those who run a special risk are young children and pregnant women. In children, high levels of lead affect the central nervous system causing irreparable brain damage, mental retardation, coma and death. At low levels—levels found in tens of thousands of kids today—lead causes poor performance on intelligence tests, higher incidents of speech impairment, and larger number of psychiatric referrals.

Studies that were included in EPA's regulatory impact analysis and which were examined by the Committee on Environment and Public Works when it held a hearing on this issue a year ago show that children suffer lower average IQ scores of 1 to 3 points at blood lead levels than are all too common in this Nation today.

So there is a serious risk to health and intellectual development from lead. The evidence is clear. It is compelling. And it convinced this administration to act to reduce lead in gasoline by over 90 percent effective on January 1, 1986.

The second problem caused by lead is environmental. In the early 1970's when this Nation made a commitment to clean the air it turned to the catalytic converter as a technology that could reduce nitrogen oxide and carbon monoxide emissions from automobiles. But lead in gasoline fouls the catalytic converter so that it cannot do its job. So we have tried to switch the Nation's car fleet to unleaded gasoline to take advantage of the converter.

Since about 1975 automobiles sold in the United States have been required to have converters and have been designed to use unleaded gas. Nevertheless, a large percentage of the gasoline—more than 40 percent of the gasoline—sold in the United States today is leaded. Ten years after we switched to new cars that take unleaded, American motorists are still consuming large amounts of leaded gasoline. One explanation for this is called misfueling—putting leaded gasoline in a car designed for unleaded gasoline. After about three tankfuls of this practice, the catalytic converter is poisoned and cannot do its job to remove nitrogen oxide and hydrocarbon pollutants from the exhaust.

Something close to 20 percent of the owners of cars designed for unleaded misfuel—use leaded. They do so because leaded gasoline is cheaper—during some periods by large amounts. Recently I saw a leaded/unleaded differential of 9¢ per gallon. Service stations use low priced leaded as a come-on, as a loss leader to attract business. The result is a great deal of dirty air that we in the Congress were determined to eliminate more than a decade ago.

So there are two problems with lead in gasoline—the health effects, particularly on small children, and the undoing of our national policy to reduce other air pollutants through the use of catalytic converters. The obvious solution to these problems is to ban lead from gasoline and we are on the way to doing that. Lead is not necessary. There are other octane enhancers that can perform just as well without the negative environmental consequences and at no or only little additional cost. On the question of costs and benefits, EPA did a regulatory impact assessment before publishing its lead phasedown regulation and found that the benefits far outweighed the costs. In fact, the EPA study showed that the savings in automobile maintenance alone—not even to mention the health benefits—outweighed the cost of shifting to unleaded gasoline. Chris DeMuth, who at the time was Director of the Office of Information and Regulatory Affairs, went public with his praise of the EPA analysis which was unique in his tenure at OMB.

So we as a nation can well afford to do without lead in our gasoline. But there are some owners or heavy-duty engines, motorboat engines, antique automobiles and specialty engines who have expressed a concern that the phasedown of lead in gasoline will present them with difficult mechanical problems. I am sure that all Members of the Senate are familiar with these concerns, because I know that they are expressed by our constituents in letters and when we visit with them back home. The amendment that I am offering this morning is addressed to their concern and in particular to the efforts of one group, the farmers, to have their concerns heard down at EPA.

Mr. President, in addition to being an octane enhancer, lead in gasoline also serves as a lubricant for valves. Without lubrication soft valve seats may suffer a condition called valve recession which can impair the mechanical performance of some engines. Newer model cars and farm equipment have hardened valve seats and are thus not subject to the same kinds of problems.

It is not clear at this time whether valve recession will be a problem or not when leaded gasoline is taken off the market. There are some studies on Government-owned vehicles which indicate that there will be no difficulty in using straight unleaded gasoline in almost all American engines. It should be noted that the regulations which take effect on January 1 do not ban leaded gasoline and that EPA has allowed so-called banking rights to accumulate which means that in reality gasoline will contain about 0.2 grams of lead per gallon until the end of 1987. It is clear that lead at this level will provide sufficient lubrication. There are also several companies out trying to develop alternative lubricants and we fully expect that one or more alternative additives will be on the market in the next few weeks. Lead was not originally intended to be a lubricant. It is only a lubricant accidentally. It was originally intended only as an octane enhancer. There is every reason to believe that the chemical industry of the United States will develop an alternative lubricant which is more effective, which is cheaper and which does not have any negative environmental consequences.

But it is understandable that farmers who have spent thousands of dollars on equipment with heavy-duty, high payload gasoline engines, and who understand that lead now serves as a lubricant for the valves in those engines, will have a concern. They expressed that concern to EPA. They asked EPA to do a study of the performance of engines without lead before any ban was put in place. That seems to me a more than reasonable request. But EPA turned them down saying that they did not have sufficient resources to do a study and that they were sure that valve recession would be no problem.

I think that farmers—and others who own old or specialty engines—should get a study. I am confident that such research will show that there are alternatives that can do the job better without negative health and environmental consequences. The Appropriations Committee has reported this legislation which contains the budget for EPA. In the committee report at page 41, the committee indicates that EPA should do such a study and notes that the House Appropriations Committee included similar instructions in its report. So, in part, all this amendment that I am offering does is make explicit that which the Appropriations Committees already had requested.

But there is a second provision in my amendment which I would also call to the attention of the Senate. It assures that the EPA Program to get lead out of gasoline will stay on track.

When EPA refused to do a study, Members of the House of Representatives added a floor amendment to the 1985 farm bill that would provide an exemption for farmers from the 0.1 standard. It would guarantee that farmers could purchase gasoline containing 0.5 grams per gallon lead until 4 months after the study is completed. Such an exemption goes way too far in my estimation; 0.5 is not needed for valve lubrication. Not more than 0.2 is needed and that will be provided for at least 2 years under the current regulatory scheme. The House amendment makes no accounting for the likelihood that alternative lubricants will soon be available. But the real problem with the House amendment is that it is unworkable. It is not an exemption for agriculture. An agricultural exemption will not work in this case. Gasoline engines on the farm are only a miniscule part of the total gasoline market. In fact, even on the farm most engines are diesel engines today. So this exemption is for a fairly small part of the market. And refiners and distributors are simply not going to make a special blend of gasoline just for farmers. If we are to guarantee

them 0.5 grams per gallon leaded gasoline—as the House farm bill would require—we will have to provide 0.5 grams of lead per gallon gasoline to everybody. And that would undo the lead phase-down that this country has been working so hard to accomplish for many years. That is just wrong in my view. It is not necessary. It is not timely. In fact, the farm community does not even want to go that far. They were just forced into that position because EPA would not agree to do a study.

Some of the Members here in the Senate have tried to reason with the sponsors in the House to find a compromise that is more realistic and that will really meet the needs of farmers. But those attempts to discuss the issue have not been successful as yet, because the Senate has not gone on record in favor of a lead phase-down. They will not talk to us until we take some action. So, Mr. President, the second part of my amendment would prohibit EPA from using any funds in this bill to modify the regulations that will become effective on January 1.

I again say, Mr. President, that this amendment accomplishes the objective of the farm community by requiring EPA to do a study of the mechanical problems that may be caused by unleaded gasoline and the alternatives that are available to solve that problem, but it also keeps the Nation on a course that will get lead out of gasoline at an early date. This is a necessary amendment under the circumstances and I urge Senators to study the amendment so that they will see that is a balanced answer to the questions that have been raised.

Mr. President, I yield to the distinguished manager of the bill.

Mr. GARN. Mr. President, I have discussed this amendment with the Senator from Minnesota and also with the staff of the committee. I am willing to accept it. It is my understanding that it is acceptable to the minority as well.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 800) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, let me make a unanimous-consent request on the amendment to be offered by the distinguished Senator from Alaska, Senator MURKOWSKI, on veterans. There will be a time limitation of 30 minutes, equally divided, and that amendment would be in order tomorrow morning.

Mr. CHILES. Will the Senator yield?

Mr. DOLE. I am happy to yield.

Mr. CHILES. Mr. President, I just want to say to the distinguished floor leader and the manager that there were people who did not want a rollcall vote on the last proposition. The Senator from Florida felt we should have a rollcall vote. It was probably the most important amendment we will consider on this bill. We have a good bill. I think the Senate was willing to vote on that in large numbers. We took it on a voice vote.

I believe there are two proposed amendments on tomorrow.

Mr. DOLE. I understand the Senator from New Jersey will offer an amendment.

Mr. CHILES. And there may be others. I just wanted to say that I think there are a lot of Members who, because they did not vote, might come in here tomorrow and think there is nothing inconsistent with taking any kind of position they feel they need to take tomorrow.

On behalf of myself and I hope the Senator from New Mexico, we will see if amendments are adopted tomorrow to change this, and, if so, we will have to come back with another across-the-board amendment and there will be a vote if we do that. People will get a chance to record themselves.

Mr. DOMENICI. So the leader will protect us in a unanimous-consent agreement for an amendment that the Senator from Florida has described.

Mr. CHILES. We want to be protected in the right to offer such an amendment.

Mr. GARN. I thank the Senator from Florida for his observation. He is correct. I would have favored a rollcall vote. However, any amendments that are offered tomorrow to this amendment I will move to table without regard to their merit.

Mr. CHILES. Regardless of that, Mr. President, I think we should be protected to be able to propose a further across-the-board cut in these.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the majority leader?

Mr. BYRD. Mr. President, I ask unanimous consent that no amendments whatsoever be in order to the Murkowski amendment.

Mr. DOLE. That is correct, Mr. President.

The PRESIDING OFFICER. Is there objection?

Mr. GARN. Mr. President, reserving the right to object, and I do not intend to object, I just want to understand. We have had two unanimous-consent requests. I want to understand that we allow only one amendment, the Murkowski amendment, to the Domenici-Chiles amendment.

Mr. DOLE. That would be included in my request. There would be no amendments to the Murkowski-Cranston amendment, I assume it will be.

Mr. GARN. I believe that is a good addition. I just want to make sure that we are not leaving here tonight with opening it up to other than one amendment to the amendment.

Mr. DOLE. That was my request.

Mr. BYRD. No, Mr. President; I do not think so.

Mr. DOLE. My request was to get a time agreement on the Murkowski amendment, the only one we are aware of. Then I hope to make another unanimous-consent request.

Mr. BYRD. And that there be no amendment whatsoever——

Mr. DOLE. Whatsoever——

Mr. BYRD [continuing]. On or in regard to the Murkowski amendment.

Mr. GARN. I withdraw my reservation, Mr. President.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the majority leader as amended? Without objection, it is so ordered.

Mr. DOLE. The only other amendment we are aware of that would have been offered to this amendment is that of the distinguished Senator from New Jersey [Mr. LAUTENBERG]. It is my understanding that he will not now offer an amendment to that amendment.

Mr. LAUTENBERG. Mr. President, it is my understanding—I have an amendment that has been agreed to that is essentially a language change. I will not be offering the amendment I think the majority leader is referring to.

Mr. DOLE. Mr. President, I ask unanimous consent that there be no further amendments in order to the amendment of Senators DOMENICI and CHILES.

Mr. BYRD. Mr. President, reserving the right to object.

The PRESIDING OFFICER. If the Senator will suspend, the Senate is not in order.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 1730—RECONCILIATION BILL

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate recesses this evening, 2 additional hours be considered as having been used on S. 1730, the reconciliation bill.

Mr. BYRD. Mr. President, reserving the right to object, and I have no ob-

jection, does the distinguished majority leader, by his request, intend that once the action on the pending appropriations matter is resolved as far as this evening is concerned, there will be nothing that would occur on the reconciliation measure——

Mr. DOLE. That is correct.

Mr. BYRD [continuing]. But that we would go out; nevertheless, notwithstanding that, there would be 2 hours charged, equally divided, to both sides against the reconciliation time?

Mr. DOLE. That is correct.

Mr. BYRD. I have no objection.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? If not, without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. DOLE. Mr. President, in addition to the amendment by Senators MURKOWSKI and DECONCINI on which we have a unanimous-consent agreement, I ask unanimous consent that amendments by Senator DIXON, which is a $20 million FEMA amendment; an amendment by Senator BIDEN to allocate $50 million to reduce lead paint danger; another amendment by Senator BIDEN, OSHA consideration; an amendment by Senator LEAHY, $3 million for National Science Foundation Presidential young investigators; an amendment by Senator HEINZ to add $2 million for HUD neighborhood development demonstration programs; and a second-degree amendment to the DIXON amendment by Senator GORTON—which does what?

Mr. GORTON. Mr. President, it shifts the program from FEMA to HUD.

Mr. DOLE. Is that acceptable to Senator DIXON?

Mr. GORTON. Yes, Mr. President; Senator DIXON and I worked it out.

Mr. DOLE. I ask unanimous consent that those amendments be the only amendments in order.

Mr. BYRD. Reserving the right to object, Mr. President.

Mr. DOLE. And that no other amendments be in order than the amendments just listed by the majority leader.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. Let me add the distinguished Senator from New Jersey [Mr. LAUTENBERG] who has another amendment which will be accepted.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? If not, without objection, it is so ordered.

Mr. DOLE. Mr. President, there will be no further votes this evening. I hope we can complete action on the bill by 10:30 or 11 tomorrow morning.

Mr. BYRD. Mr. President, I thank the distinguished majority leader.

Mr. GARN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I would make one additional unanimous-consent request, that in the event the amendment of Senators MURKOWSKI and DECONCINI is adopted, an amendment would be in order to be offered by Senators CHILES and DOMENICI.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 804

(Purpose: To provide that funds carried over from prior fiscal years may be used for construction of sewage treatment plants, including new starts)

Mr. LAUTENBERG addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey is recognized.

Mr. LAUTENBERG. I send an amendment to the desk for Senator BRADLEY and myself and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from New Jersey [Mr. LAUTENBERG], for himself and Mr. BRADLEY, proposes an amendment numbered 804.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 54, between lines 12 and 13, insert the following:

SEC. 417. Any funds previously appropriated for the purposes of construction grants under title II of the Clean Water Act shall be available for all projects for which such funding was initially available when such appropriations were made and not be limited to phases or segments of previously funded projects.

Mr. LAUTENBERG. Mr. President, the Clean Water Act establishes this Nation's commitment to clean up the Nation's waters—waters which are used for fishing, swimming, recreation, and drinking water. The act contains numerous programs to achieve this goal. One of the most important programs is the funding of sewage treatment plants. Properly running sewage treatment facilities are an essential component of the Clean Water Act's program for cleaning up the Nation's waters.

Early this year, the Senate passed the Clean Water Act Amendments of 1985 by a vote of 94 to 0. This bill includes a continuation of the Construction Grants Funding Program and a gradual transition to State revolving loan programs. The Senate's vote on this bill is a strong statement about the importance of providing Federal assistance for constructing sewage treatment plants.

The Environment and Public Works Committee, of which I am a member, spent a significant amount of time on the Construction Grants Program during its consideration of the Clean Water Act Amendment of 1985. One option before the committee was the administration's proposal to fund no new starts of sewage facilities. Only plants under construction by the end of fiscal year 1985 would continue to receive Federal funding. EPA's testimony, however, showed that remaining sewage treatment needs which are eligible for Federal funding are estimated by EPA to exceed $50 billion nationwide. In my own State of New Jersey, eligible sewage treatment construction needs are $4.5 billion.

The administration's proposal simply would have dumped this problem into the laps of States and local governments at a time when these entities are facing a 1988 deadline for installing sewage facilities which provide secondary treatment. The Environment and Public Works Committee rejected the administration's proposal and this rejection was affirmed in the Senate's vote on the Clean Water Act. The administration's proposal also has been rejected by the House of Representatives.

It was with shock, then, that I just learned that the Office of Management and Budget has effectively prohibited EPA from funding any new project starts. Simply put, this is a backhanded way of achieving the administration's "no new starts" proposal by administrative order. EPA has approximately $800 million remaining in unobligated fiscal year 1985 construction grants funds. OMB's orders prohibiting EPA from spending these funds on new starts could have a devastating effect on those local governments that were planning to initiate sewage treatment construction with Federal funds this year. In New Jersey, at least two sewage treatment facilities would be adversely affected by OMB's order.

Mr. President, my amendment is simple. It would reverse OMB's policy, a policy which has been thoroughly repudiated in the Congress. The reversal of this policy will allow EPA to continue to manage the Construction Grants Program without interruption using existing unobligated funds until the Congress appropriates additional funds for the Construction Grants Program. I want to reiterate that my amendment does not address fiscal year 1986 funds. My amendment only addresses funds already appropriated

by the Congress but not yet obligated by EPA.

Mr. President, this is not the first time OMB has attempted to thwart the Congress' intent. I believe we need to send a clear message to OMB and I urge my colleagues to send this message by supporting this amendment.

Mr. President, I have cleared this amendment with the managers on both sides and ask for its immediate consideration.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

Mr. CHAFEE. Yes; I would like to ask a question on this. Is this in connection with Superfund and the funds there?

Mr. LAUTENBERG. No; this has nothing to do with Superfund.

Mr. CHAFEE. What is this in connection with?

Mr. GARN. EPA construction grants.

Mr. LAUTENBERG. The Clean Water Act, the ability to use these funds for new starts as well as existing starts.

Mr. CHAFEE. I thank the Senator very much.

The PRESIDING OFFICER. Is there further debate? If not, the question is now on agreeing to the amendment of the Senators from New Jersey.

The amendment (No. 804) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. EAGLETON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 805

(Purpose: To provide funds for the neighborhood development demonstration program)

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Pennsylvania [Mr. HEINZ] proposes an amendment numbered 805.

Mr. HEINZ. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 13, between lines 5 and 6, insert the following:

NEIGHBORHOOD DEVELOPMENT DEMONSTRATION

For financial assistance and other expenses not otherwise provided for to carry out the neighborhood development demonstration program pursuant to section 123 of the Housing and Urban-Rural Recovery Act of 1983, $2,000,000, to remain available until September 30, 1988.

Mr. HEINZ. Mr. President, I have discussed this amendment with both sides of the aisle. I offer the amendment on behalf of several of my colleagues, including Senator DIXON and Senator MOYNIHAN.

Mr. President, this amendment would appropriate $2 million to continue the Neighborhood Development Demonstration Program [NDP]. Although first approved in 1983, the first grants were not made until this spring. Only now, 2 years later, is this demonstration program reaching the point where it can benefit our distressed communities. It would be a grave mistake to terminate financial support for this program at the very moment it is beginning to make itself felt as an effective catalyst for positive neighborhood change.

The Neighborhood Development Demonstration Program was originally authorized under section 123 of the Housing and Rural Recovery Act of 1983—Public Law 98-181—in order to stimulate revitalization activities by local, nonprofit groups in economically distressed neighborhoods. Federal funds are used as incentive funds to promote revitalization activities and to encourage neighborhood organizations to become more self-sufficient in their development activities which benefit low- and moderate-income people.

Forty-four neighborhood groups in 33 communities and 21 States—including California, Colorado, Connecticut, Florida, Illinois, Indiana, Kentucky, Massachusetts, Maine, Missouri, North Carolina, Nebraska, New Mexico, New York, Ohio, Pennsylvania, Puerto Rico, Rhode Island, Tennessee, Texas, Washington, and Wisconsin—were selected to receive the matching funds this year. The amount each group receives is based on the amount each group is able to raise in voluntary contributions in the neighborhood, the size of the neighborhood and the degree of the neighborhood's economic distress but, in any event, no more than $50,000.

The projects funded by this program must: Create new permanent jobs; establish or expand businesses; develop new housing or rehabilitate or manage existing housing stock; develop essential services such as fair housing counseling, youth training, health services or day care; or help voluntary improvement efforts such as a new neighborhood credit union or local cleanup programs.

To qualify, a neighborhood must be located in a city or urban county eligible for the urban development action grant [UDAG] program or a UDAG pocket of poverty.

The $2 million earmarked for the Neighborhood Development Demonstration Program under my amendment is the same amount originally appropriated for the program. The use of these funds is carefully spelled out. Five percent of the funds may be used by HUD for administrative purposes. The rest of the funds are to be matched by voluntary contributions raised from individuals, businesses, nonprofit and other organizations located within the neighborhood to be revitalized over the 1-year grant period. The neighborhood activities, however, may be conducted over a period of 2 or 3 years. Federal payments—up to $50,000 per project—are made on a quarterly basis as neighborhood organizations verify the amount of funds raised from private sector sources from the previous quarter.

Mr. President, it is this type of self-help program that our Government should be supporting and encouraging. The Neighborhood Development Demonstration Program was designed to give distressed communities the ability to lift themselves out of their dire straits through cooperative action between all those most involved in the community. It can work and it will work. We just have to give these neighborhoods a chance. This $2 million will give this demonstration program the chance to prove itself on its merits by allowing private organizations to put new life into declining neighborhoods.

Mr. GARN. Mr. President, I have conferred with the distinguished Senator from Pennsylvania, and this amendment is acceptable. I believe it also has been cleared with the minority.

Mr. LEAHY. It has been cleared, Mr. President.

The PRESIDING OFFICER (Mr. TRIBLE). The question is on agreeing to the amendment.

The amendment (No. 805) was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GARN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HEINZ. Mr. President, I thank all Senators.

AMENDMENT NO. 803

Mr. LEAHY. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY] proposes an amendment numbered 803.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 32, line 6, increase the figure by $3,000,000.

Mr. LEAHY. Mr. President, this amendment adds $3 million to the re-

search and related activities account of the National Science Foundation.

These additional funds will support 50 additional Presidential young investigators.

Every assessment of our Nation's competitive position in this technological world has concluded that we must improve the quality of science education.

Unfortunately, it is difficult to keep the best scientific minds in teaching positions in our universities. Salaries are so high in the private sector that all too many of our best young science professors leave the university.

In order to address this critical issue, the Presidential Young Investigation Research Award Program was created in 1984. The awards, which usually combine NSF and industrial support, encourage promising young scientists and engineers to select and remain in academic careers.

The additional funds in this account will raise the level of Presidential young investigators to 550. The administration had requested a level of 500.

I believe this is an essential, positive step in saving our Nation's technological leadership and promoting excellence in scientific education.

I urge its adoption.

Mr. GARN. Mr. President, the amendment is acceptable.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 803) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GARN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 806

(Purpose: To increase the appropriations for the Emergency Food and Shelter Program by $20,000,000)

Mr. DIXON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON], for himself, Mr. HEINZ, Mr. KERRY, Mr. MATSUNAGA, Mr. GORTON, Mr. SIMON, Mr. KENNEDY, and Mr. MOYNIHAN, proposes an amendment numbered 806.

Mr. DIXON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 24, line 15, strike out "$50,000,000" and insert in lieu thereof "$70,000,000".

On page 25, line 17, strike out "$50,000,000" and insert in lieu thereof "$70,000,000".

Mr. DIXON. Mr. President, I rise today for the purpose of offering an amendment on behalf of Senators HEINZ, KERRY, MATSUNAGA, KENNEDY, GORTON, SIMON, MOYNIHAN, and myself, to continue to fund the National Board Emergency Food and Shelter Program under the Federal Emergency Management Agency or FEMA.

Our amendment would add an additional $20 million to the HUD-independent agencies appropriation for fiscal year 1986 to help the millions of people in this country who are hungry and homeless. This would bring the bill up to the House-passed level. It is vitally important to continue this assistance to the most destitute among us.

The existence of hunger and homelessness in the United States of America is a national disgrace. The Congress recognized that fact in March 1983 by creating an Emergency Food and Shelter Program through FEMA. We acknowledged its importance again with supplemental appropriations on three more occasions, the most recent being 3 months ago, when the Senate approved $110 million intended to carry the program through next fiscal year. The House, however, in conference, preferred to separate 1985 and 1986 appropriations, and accepted $20 million of my amendment for $110 million. The House then included $70 million in the fiscal year 1986 bill. The Senate has included $50 million. The amendment we are offering today would bring the Senate amount to the House level—still $20 million short of what we approved only 3 months ago.

This program works with a minimum of overhead, and does amazing things with very little money. I would like to insert a list of States and the funds each has received for the RECORD.

Last year, the Senate very convincingly passed an amendment that I introduced adding an additional $60 million to the Emergency Food and Shelter Program; $60 million was already included in that supplemental appropriations bill. So, in essence, the Senate, by a very bipartisan vote of 57 to 40, supported a total of $120 million last August 8 to assist the most needy among us. That was $50 million more than we are asking for today.

Mr. President, we all feel a responsibility to the homeless. We meet them in urban, suburban, and rural areas across our country. Unfortunately, in many instances they have come to that station in life as a result of budget cuts which have occurred in the past. It is painfully obvious when we cut nutrition programs—people will be hungry; when we cut housing assistance—people will be homeless; and when we cut low-income energy assistance—people will have to choose between paying their heating bill and buying food.

We have recognized the prevalence of the hungry and homeless among us by voting for funds to help those poor people that you and I see every single day in this capital city and other places across this land. This has been the right thing to do.

But without this amendment, even the most minimal assistance—a bowl of soup and a cot in a shelter will no longer be available to these people. There will be even more people living on the streets. I cannot speak for others here, but I would find it difficult to explain 3 months from now that the Congress chose not to continue a program which in many cases serves as a lifeline for the indigent. When the snow is falling and the temperature is below zero and the streets are icy and there are no beds or meals in Chicago or Rock Island or East St. Louis, or Peoria, the explanation that we decided not to appropriate the necessary money simply won't do. The hungry women and children will not understand that. When their basic need is to get a bowl of soup and a night's sleep on a cot in a shelter, there is no way in the world for us to explain why we turned our backs on them.

There was an extremely poignant article in the June 16 issue of the New York Times Magazine which included research from my State and many others. It detailed the story of the Sawatzki family of Peoria, IL. Mrs. Sawatzki takes only a small portion of food at dinner and then pretends she isn't interested in eating so that her children will not guess that she is denying herself for their sakes. She eats popcorn instead of meals. They are proud people. Mr. Sawatzki used to work at the Caterpillar plant in Peoria. They lost their home because they couldn't meet their mortgage payments. The parents' worst moment, however, was when their son asked why there wasn't any milk in the refrigerator. He was told that it was because there wasn't any money for milk. The 9-year-old boy found 32 cents in his drawer and gave it to his mother to buy food.

Last March, I held a field hearing on hunger and homelessness in Chicago. I heard testimony from service providers, homeless people, a physician, and Government officials. One of those witnesses, Ms. Lulu Walker, the director of Tabitha Community Services, was particularly eloquent in explaining the help which is available because of the FEMA Emergency Food and Shelter Program. Prior to receiving a grant from FEMA, she said that she had to turn away over 200 women with children in December 1984. She had to turn away women with children because there were no funds for milk.

She said that the first thing that people do when they arrive at her shelter is to eat, and made this observation: "I think a person should be able to eat, sleep, and work." I agree.

Lulu Walker detailed the situations of many of her wards. Many have never been on Medicaid; many have never had food stamps. Some are battered women, others are unemployed and no longer eligible for benefits.

Lulu Walker ended her testimony by thanking me for funds she had received through the FEMA Program. Without those funds she would have turned away at least 300 people in January of this year. In closing she said:

> The gas people can wait, they can wait until it gets above 32 degrees. The light people can wait, but when people are hungry they cannot wait.

On this amendment, we must vote from the heart as much as from the mind. We must think about the fact that poverty is increasing. We must determine that the dispossessed among us are not to be forgotten. We must take time to remember the needs of the homeless and the hungry. They are sleeping under bridges in Chicago and they still will be when it is 50 below zero this winter. They are searching for scraps of food in the dumpsters behind restaurants in Los Angeles and they still will be later this year. They are losing their farms in Illinois, Kansas, Iowa, Minnesota, and Missouri, wondering how to feed their own families instead of growing food for themselves and for us.

I suppose everyone in this Chamber is aware of a concert which was held recently in Champaign, IL, by Willie Nelson and 40 other musicians to raise money and bring the plight of the American farmer to the attention of the entire country. The first check that was signed by Willie Nelson from the proceeds of the concert went to the National Council of Churches for distribution to food pantries serving poor farmers and their families in seven Farm Belt States. We are a nation rich is resources, energy, and generosity, with an ability to feed the world, and yet many of the people we depend on are in desperate need of help themselves.

This amendment is a responsible step to take. It is an absolutely necessary step to take. Until we have determined the best way to address this national problem, the immediate needs of this Nation's hungry and homeless must be met.

I urge the distinguished chairmen of the Governmental Affairs Committee and the Banking, Housing and Urban Affairs Committee to hold hearings on two authorization bills for programs for the homeless. They are S. 739, which I introduced March 29 to authorize to national endowment for the homeless and S. 394, the bill Senator GORTON introduced are both awaiting action in these committees.

In the meantime, we need to continue a program which, in the last year has provided 52 million meals at an average cost of 71 cents and 14.5 million nights of shelter at an average cost of $2.24.

Mr. President, I urge the adoption of this amendment.

Mr. President, I ask unanimous consent to have printed in the RECORD a table in this connection.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

DISTRIBUTION OF EMERGENCY FOOD AND SHELTER FUNDS

	FEMA I	FEMA II	FEMA III
Alabama	$1,731,205	$1,069,399	$1,905,335
Alaska	69,978	100,000	125,000
Arizona	1,018,278	748,445	911,187
Arkansas	156,780	106,593	630,934
California	8,465,493	6,238,135	8,831,979

Washington	1,758,521	1,015,009	1,746,775
West Virginia	553,106	761,966	1,035,434
Wisconsin	977,622	643,432	883,281
Wyoming	[1]	100,000	125,000
Total appropriations	50,000,000	40,000,000	70,000,000

[1] Funds not used, therefore reallocated to other States.

Mr. HEINZ. Mr. President, I am proud to join Senator DIXON in sponsoring this important amendment to provide an additional $20 million for emergency food and shelter for the homeless. Homelessness in America can only be described as a national tragedy, and I believe we have a responsibility to respond to this crisis.

Although reliable statistics are hard to find, it is clear that an enormous number of Americans are homeless—probably between 1 and 3 million. This is simply unacceptable. In April, the General Accounting Office released a report on homelessness and found that there was widespread agreement that homelessness is increasing. While improvement in the unemployment rate may help to reduce the number of homeless, deinstitutionalization of mentally ill persons and a continuing decline in low-income housing and public assistance programs are believed to offset any decrease in the overall number of homeless persons.

At the most basic level, the homeless need help in simply finding haven from the elements. For the most part, shelters for the homeless are operated by private, nonprofit organizations, and to a lesser extent, by local governments.

Mr. President, the primary response of the Federal Government to the problem of homelessness in this country has been through the Emergency Food and Shelter Program administered by the Federal Emergency Management Agency [FEMA]. This program has provided a mechanism through which Federal dollars have been distributed quickly and efficiently to the people who can best put them to use—local shelter and soup kitchen operators.

It is clear that long-term solutions to the problems of homelessness are needed. For this reason, earlier this year, Senator DIXON and I introduced a bill to replace the FEMA Program with a National Endowment for the Homeless. I know that Senator GORTON and Senator MOYNIHAN have introduced similar legislation which would transfer the FEMA Program to HUD. In the House, some Members recommend putting the program under the jurisdiction of the Department of Health and Human Services. I think all of these are reasonable long-term approaches, and we should pursue them. In the meantime, however, it is critical that we continue to fund the FEMA Program. We cannot allow emergency assistance for the hungry and homeless to be wittled away—unraveling support efforts so carefully woven—with brutal results for the homeless.

Mr. President, in 1984, Congress appropriated a total of $110 million for the homeless, a miniscule amount when contrasted to the enormity of the problem. From that small amount, over 100 million meals were served, and more than 15 million nights of shelter were provided. On average, a meal provided from these funds cost less than 75 cents; a night in a shelter less than $3. From my viewpoint, this is a very good bargain, and demonstrates the remarkable cost-effectiveness of each Federal dollar spent on emergency assistance.

In June 1985, the Senate passed an amendment to the second supplemental appropriations bill (H.R. 2577), sponsored by Senator DIXON and I, appropriating $110 million for the homeless through 1986. Subsequently, the

conference committee recommended $20 million for the rest of 1985 and recommended that any funds for 1986 be included in the 1986 HUD-Independent Agencies appropriations bill.

The House included $70 million for fiscal year 1986 for the homeless, but the Senate Appropriations Committee cut this back to $50 million in markup. Our amendment seeks only to restore the House appropriation level and would still be $20 million less than the Senate originally appropriated for this program this past summer. Mr. President, this is not a generous amendment—it is the bare minimum.

In a society plagued by holes in the safety net of support programs, the homeless are faced with the cruel possibility of no net at all. As a nation, we have an obligation to provide basic food and shelter for the most desperate of our poor—the mentally ill woman living on a park bench, the unemployed veterans sleeping in an abandoned car, the broken family evicted from their tenement with no place to go. A country as bountiful as ours should not tolerate its citizens living in subhuman conditions. It is a challenge to our national conscience and to all our public and private institutions to meet the needs of the homeless. This amendment represents a small, but important Federal contribution to this effort. As winter descends upon us, I strongly urge its passage.

Mr. KENNEDY. Mr. President, I rise in strong support of Senator DIXON's amendment to bring the 1986 Senate funding for the FEMA Emergency Food and Shelter Program in line with the amount provided by the House. As my colleagues know, the Senate has provided $50 million for this critical program and this amendment will add the $20 million needed to reach the House figure of $70 million. I am proud to be a cosponsor of this amendment.

As you may recall, Mr. President, the Congress reaffirmed its commitment to the Emergency Food and Shelter Program by providing a total of $90 million in 1985. I don't believe that that commitment will or should wane in 1986. This amendment adds $20 million to programs that aid the 20 million Americans who are hungry and the thousands upon thousands of our citizens who are homeless.

Some of my colleagues may argue that this funding is not needed in 1986 because of the recently released Census Bureau data showing a reduction in the poverty rate of 0.8 percent. Yet, at 14.4 percent the poverty rate is still the highest since 1966, except for 1982 and 1983 when we were in the throes of a severe recession. I want every Senator to know that we still have 33.7 million people in the United States who live in poverty. And even more frightening, almost 22 percent of America's children live in poverty and the poverty rate for young black children is the highest ever recorded for them at 51 percent. This recent change in the poverty rate gives no indication of continuing a downward trend. Further reduction in unemployment has now halted. The unemployment rate has been stuck around 7 percent for most of 1985 and real wages have stopped rising.

Coupled with these indicators is the recent action of the Senate Agriculture Committee which reported out a disappointing reauthorization of the Food Stamp Program that will cut $1 billion from food stamps. Mr. President, if we cannot meet our responsibilities to our citizens in need through longstanding proven Federal programs such as food stamps, then we have a moral obligation to continue adequate funding for effective emergency programs. I do not believe that emergency programs should take the place of other Federal programs. But, I will not allow millions of needy Americans to be left without even the barest of emergency aid.

The FEMA Emergency Food and Shelter Program has been proven to be effective. The $20 million we are asking for today will not help the thousands of hungry and homeless in this country who are not reached by already overburdened shelters and food pantries. It will only help them to try to serve the number of people they now serve. And, may I remind my fellow Senators, even with this amendment we are still short of last year's appropriations.

I call on the Senate to accept this amendment for the poor children of this country, their mothers and fathers, and the thousands of elderly who depend on the emergency food and shelter programs.

Mr. KERRY. Mr. President, I am pleased to join with the senior Senator from Illinois in cosponsoring this amendment that will reaffirm America's commitment to the problem of homelessness by providing adequate funding for the Emergency Food and Shelter Program.

Last year Congress appropriated $90 million to assist the homeless through the successful FEMA Emergency Food and Shelter Program. This year the Senate Appropriations Committee has recommended $50 million for the Emergency Food and Shetler Program in their appropriations bill, while the House has taken a more realistic look at this critical problem and requested $70 million. Senator DIXON's amendment will add $20 million to the Senate FEMA appropriations level, making it consistent with the House request.

Mr. President, once again I want to point out that causes of homelessness are as complex and wide ranging as the cities and towns across America which are afflicted with this ever pervasive problem. Homelessness can be attributed to a variety of social failures including persistent poverty, scarcity of low-income housing, alcohol and drug abuse, cutbacks in care for the mentally ill, spiraling inflation and the ongoing attempts by the present administration to make major cuts in Federal human service programs.

Some of my colleagues may contend that FEMA appropriations are supposed to be utilized for emergencies and that FEMA money being used to combat the homeless problem has become institutionalized in our appropriation process. I would like to emphasize that the problem of homelessness has reached epidemic proportions and that we do have a national emergency on our hands. There are over a million homeless and hungry American citizens throughout our cities and towns, and quite honestly Mr. President, the Federal Government's response to this crisis has been wholely inadequate and ineffective. Two years ago the Secretary of Health and Human Services created the Homeless Task Force whose mission was to coordinate and distribute Federal resources such as food, property, and supplies to the homeless. A recent House investigation concluded that although the "few Federal buildings, food and supplies donated to the homeless through the efforts of the task force are commendable achievements, the overall performance of the task force has been inadequate and its mission must be termed unsuccessful."

Lastly, Mr. President, I would like to point out that America's modern homeless population is changing significantly. There is an alarming increase in the number of homeless women and children. Families and children are flooding America's shelters and soup kitchens on a daily basis.

In addition, numerous families who depend on food stamp benefits for their meals are frequenting food pantries at an increasing rate. This can be attributed to the meager food stamp allotment—40 cents per meal per person—which is often depleted before the month's end. Furthermore, families and children can be found living in automobiles all across this Nation. It is obvious to me that until we eradicate hunger and homelessness, we will have a state of emergency on our hands.

In conclusion, Mr. President, I would like to impress upon my colleagues that as Government officials it is our responsibility to address this widespread crisis plaguing our Nation by funding the Emergency Food and Shelter Program at an adequate level of $70 million, and that it would be wholely irresponsible for us to decrease funding while this critical situation prevails. I rise before my colleagues today and request that they

accept Senator DIXON's amendment to add $20 million to the Emergency Food and Shelter Program and reaffirm America's commitment to the pervasive problem of homelessness.

AMENDMENT NO. 807

(Purpose: To provide housing assistance to the homeless through emergency food and shelter, renovation and conversion of facilities for use as shelters, and provision of housing and services in the transition to independent living.)

Mr. GORTON. Mr. President, I send a second-degree amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Washington [Mr. GORTON], for himself, Mr. MOYNIHAN, Mr. DIXON, and Mr. MATSUNAGA, proposes an amendment numbered 807 to amendment numbered 806.

Mr. GORTON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1 of the amendment, strike out lines 3 and 4 and insert the following:

On page 24, line 18, before the period, insert ", and $15,000,000 to carry out a transition to independence demonstration".

Beginning with "the following" on page 24, line 20, strike out all through page 26, line 12, and insert in lieu thereof "titles VI and VII.".

At the end of the amendment, add the following:

At the end of the bill, add the following:

TITLE V—SHELTER PROGRAM: GENERAL PROVISIONS

SHORT TITLE

SEC. 501. The following titles may be cited as the "Homeless Housing Assistance Act of 1985".

DEFINITIONS

SEC. 502. For the purpose of this Act—

(1) the term "emergency shelter", as used in section 608(b) of this Act, means an entire facility, or that part of a facility, which is used or designed to be used to provide temporary housing to not fewer than twenty individuals;

(2) the term "homeless" means individuals who are poor and who have no access to either traditional or permanent housing;

(3) the term "local government" means a unit of general purpose local government;

(4) the term "locality" means the geographical area within the jurisdiction of a local government;

(5) the term "operating costs" means expenses incurred by State, local governments, and private nonprofit organizations operating transitional housing for the homeless under title VII of this Act with respect to—

(A) the administration, maintenance, minor repairs, and security of such housing;

(B) utilities, fuel, furnishings, and equipment for such housing;

(C) the conducting of the assessment required in section 705(a)(2) of this Act; and

(D) the provision of supportive services to the residents of such housing;

(6) the term "private nonprofit organization" means a secular or religious organization described in section 501(c) of the Internal Revenue Code of 1954 which is exempt from taxation under subtitle A of such Code, and which has an accounting system and a voluntary board, and practices nondiscrimination in the provision of assistance;

(7) the term "Secretary" means the Secretary of Housing and Urban Development;

(8) the term "shelter", as used in title II of this Act, means broadly the provision of protection from the elements for homeless individuals;

(9) the term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, or any territory or possession of the United States;

(10) the term "supportive services" means assistance to the residents of transitional housing in obtaining permanent housing, medical and psychological counseling and supervision, employment counseling, referral to job training, nutritional counseling, and such other services essential for establishing independent living as the Secretary determines to be appropriate. Such term includes the provision of assistance to the residents of transitional housing in obtaining other Federal, State, and local government assistance available for such persons, including mental health benefits, employment counseling, referral to job training programs, and medical assistance; and

(11) the term "transitional housing" means a single- or multi-family structure suitable for the provision of housing and supportive services for not more than 15 homeless persons, who cannot presently live independently without supportive services in a supervised residential setting but who are believed capable of transition to independent living with 6 months of assistance in a stable environment.

TITLE VI—EMERGENCY FOOD AND SHELTER PROGRAM

EMERGENCY FOOD AND SHELTER PROGRAM NATIONAL BOARD

SEC. 601. (a) The Director of the Federal Emergency Management Agency shall, as soon as practicable after September 30, 1985, constitute a national board for the purpose of carrying out an emergency food and shelter program.

(b) The national board shall consist of seven members. The United Way of America, the Salvation Army, the National Council of Churches of Christ in the United States of America, the National Conference of Catholic Charities, the Council of Jewish Federations, Inc., the American Red Cross, and the Federal Emergency Management Agency shall each designate a representative to sit on the national board.

(c) The representative of the Federal Emergency Management Agency shall chair the national board.

NATIONAL BOARD TRANSITION

SEC. 602. (a) The national board constituted by the Director of the Federal Emergency Management Agency, pursuant to section 601, shall continue to be authorized until March 30, 1986, and on such date, the personnel, property, records, and undistributed program funds of such national board shall be transferred to the national board constituted under subsection (b).

(b) On or before March 30, 1986, the Secretary of Housing and Urban Development shall constitute a national board for the purpose of carrying out an emergency food and shelter program. This national board shall consist of the same representatives, or their successors, of the same organizations as the national board constituted pursuant to section 601(b), except that the Secretary of Housing and Urban Development shall designate a representative to replace the Federal Emergency Management Agency representative. Such national board shall assume authority on March 30, 1986.

(c) The representative designated by the Secretary of Housing and Urban Development shall chair the national board constituted pursuant to section 601. On and after March 30, 1986, local boards constituted pursuant to subsection (a) shall be accountable to the national board constituted pursuant to subsection (b).

DISTRIBUTION OF PROGRAM FUNDS

SEC. 603. The national boards constituted pursuant to sections 601 and 602(b) shall determine how program funds are to be distributed to individual localities. The national boards shall identify localities having the highest need for emergency food and shelter assistance, based on unemployment and poverty rates and such other need-related data as the national boards deem appropriate, determine the amount and distribution of funds to these localities, and ensure that funds are properly accounted for.

AGENCY RESPONSIBILITIES

SEC. 604. (a) The Director of the Federal Emergency Management Agency shall award a grant for such amount as Congress appropriates for this program to the national board constituted pursuant to section 601 within 30 days after the beginning of fiscal year 1986, for the purpose of providing emergency food and shelter to needy individuals through private nonprofit organization and through units of local government.

(b) The Director of the Federal Emergency Management Agency, or his representative, shall have the following responsibilities: provision of guidance, coordination, and staff assistance to the national board in carrying out the program; and cooperation and coordination with the Secretary of Housing and Urban Development in the conducting of an aduit of program funds awarded to the national board constituted pursuant to section 601 or transferred to the national board constituted pursuant to section 602(b). The responsibilities of the Director of the Federal Emergency Management Agency with respect to this program shall end with the completion of the audit for program funds distributed during fiscal year 1986.

(c) The Secretary of Housing and Urban Development shall award a grant for such amount as Congress appropriates for this program to the national board constituted pursuant to section 602(b) within 30 days after the beginning of fiscal years 1987 and 1988, for the purpose of providing emergency food and shelter to needy individuals through private nonprofit organizations and through units of local government.

(d) The Secretary of Housing and Urban Development shall have the following responsibilities: provision of guidance, coordination, and staff assistance to the national board in carrying out the program; and the conducting of an audit of program funds awarded to and transferred to the national boards constituted pursuant to section 601 and 602(b).

(e)(1) In carrying out the responsibilities under subsection (d), the Secretary shall coordinate activities with the Federal Interagency Task Force on Food and Shelter, chaired by the Secretary of Health and Human Services, to identify vacant and surplus Federal facilities which could be ren-

ovated or converted for use as emergency shelter facilities for the homeless.

(2) Not later than 3 months after the end of fiscal year 1986, the Secretary shall submit to the Congress a report on obstacles, if any, including agency rules or procedures, to the availability of vacant and surplus Federal facilities for renovation or conversion to use as emergency shelter facilities for the homeless, with recommendations for legislative or administrative changes to overcome such obstacles.

LOCAL BOARDS

SEC. 605. (a) Each locality designated by the national boards constituted pursuant to sections 601 and 602(b) shall constitute a local board for the purpose of determining how program funds allotted to the locality will be distributed. The local board shall consist, to the extent practicable, of representatives of the same organizations as the national boards, except that the mayor or other appropriate heads of government will replace the Federal Emergency Management Agency or Department of Housing and Urban Development member. The chair of the local board shall be elected by a majority of the members of the local board. Local boards are encouraged to expand participation of other private nonprofit organizations on the local board.

(b) Local boards shall have the following responsibilities: determining which private nonprofit organizations of public organizations of the local government in the individual locality shall receive grants to act as service providers; monitoring recipient service providers for program compliance; reallocation of funds among service providers; ensuring proper reporting; and coordinating with other Federal, State, and local government assistance programs available in the locality.

(c) Prior to March 30, 1986, local boards constituted pursuant to subsection (a) shall be accountable to the national board constituted pursuant to section 602(b).

LOCAL HOMELESS ASSISTANCE PLAN

SEC. 606. (a) At the end of each fiscal year, each local board shall submit to the national board constituted pursuant to section 602(b), a plan describing programs, goals, and objectives for providing assistance to the homeless in that locality. The plan shall be developed in cooperation with the local government head represented on the local board.

(b) The local plan shall address the following subjects: description of existing shelter, mass feeding, and food bank activities in that locality, including activities not receiving assistance under this title; use and availability of all public and private resources in the locality to assist the homeless; coordination of all public and private services and resources in that locality to assist the homeless; coordination among all shelter providers in the locality to use all available shelter space for the homeless; and preservation of low-income housing in the locality.

(c) The local plan shall be placed on file in the office of the local government head represented on the local board and shall be made available to the public. The local plan shall be forwarded to that individual localities representatives in Congress. The national board shall maintain files of local plans and make them available upon request to other localities.

(d) The preparation and submission of the local plan shall be regarded as the legal duty of the local board, but failure to do so shall not be grounds for the withholding of funds appropriated under this title from that locality. Any citizen residing in the locality in which such local board is constituted shall have standing in the Federal district court of jurisdiction to seek an order compelling the preparation and submission of the local plan as required by this section. The substance and contents of the local plan shall be within the sole discretion of the local board and shall not be subject to administrative or judicial review.

SERVICE PROVIDERS

SEC. 607. Designation by the local board of a service provider to receive program funds should be based upon a private nonprofit organization's or unit of local government's ability to deliver emergency food and shelter to needy individuals and such other factors as are deemed appropriate to program objectives by the local board.

USE OF FUNDS

SEC. 608. (a) The national boards constituted by sections 601 and 602(b) may authorize the following use of funds to address the emergency food and shelter needs of needy individuals:

(1) Expenditures necessary to purchase emergency food and shelter for needy individuals, to supplement and extend currently available resources and not to substitute or reimburse ongoing programs and services; and

(2) Expenditures necessary to conduct minimum rehabilitation of existing mass shelter or mass feeding facilities to make facilities safe, sanitary, and bring them into compliance with local building codes.

(b)(1) Local boards are authorized to expend up to 25 percent of the funds allotted to that locality for substantial renovation or conversion, but not acquisition or new construction, of buildings for use as emergency shelter facilities to provide additional shelter space. Such expenditures shall be made in the form of noninterest bearing advances, repayment of which shall be waived if—

(A) the applicant utilizes the building as an emergency shelter facility for not less than the 10-year period following the completion of such renovation or conversion, or

(B) the Secretary determines that such facility is no longer needed to provide shelter to the homeless and approves use of the building for another charitable purpose for the remainder of such 10-year period. If the recipient of such advance fails to comply with the conditions for such a waiver, the recipient shall repay to the Secretary in cash the full amount of the advance received on such terms as the Secretary shall require. It shall be the responsibility of the local board to obtain documentation, signed by the responsible official. Showing that the recipient of such advance is aware of and agrees to the conditions of its receipt.

(2) Local boards are encouraged to provide, to the neighborhood in which a new emergency shelter facility is to be located, adequate notice and an opportunity to comment. Local boards are also encouraged to achieve the widest possible distribution of emergency shelters throughout the locality to avoid a disproportionate burden on any one section or neighborhood of the locality.

LIMITATION ON CERTAIN COSTS

SEC. 609. Not more than 3 percent of the total appropriation for this program each year may be expended for the costs of administration.

PROGRAM GUIDELINES

SEC. 610. (a) The national boards constituted pursuant to sections 601 and 602(b) shall establish written guidelines for carrying out this program, including methods for identifying localities with the highest need for emergency food and shelter assistance; methods for determining amount and distribution to these localities; eligible program costs, with the aim of providing emergency essential services based on currently existing needs; and responsibilities and reporting requirements of the national boards, local boards, and service providers.

(b) These guidelines shall be published annually, and whenever modified, in the Federal Register. The national boards shall not be subject to the procedural rulemaking requirements of subchapter II of chapter 5 of title 5, United States Code.

(c) Guidelines established by the national board constituted pursuant to section 601 shall continue in effect until modified or revoked by that board or by the national board constituted pursuant to section 602(b).

PROGRAM AUTHORIZED

SEC. 611. (a) To carry out this title, there are authorized to be appropriated $70,000,000 in fiscal year 1986, $88,000,000 in fiscal year 1987, and $91,000,000 in fiscal year 1988.

(b) Any appropriated funds not obligated in a fiscal year shall remain available for obligation during the following fiscal year.

SURPLUS FOOD DISTRIBUTION

SEC. 612. The Commodity Credit Corporation shall process and distribute surplus commodities acquired by the Corporation for the purpose of carrying out the food distribution and emergency shelter program in cooperation with the national boards constituted pursuant to sections 601 and 602(b).

TITLE VII—TRANSITION TO INDEPENDENCE DEMONSTRATION PROJECT

AUTHORITY TO MAKE GRANTS

SEC. 701. (a) The Secretary of Housing and Urban Development shall make grants to States, local governments, or private nonprofit organizations for the operation of demonstration projects to develop and apply innovative approaches in providing transitional housing and supportive services to the homeless to assist them in the transition to independent living.

(b) Grants under subsection (a) may be made in the form of:

(1) annual payments for operating expenses of transitional housing, not to exceed 75 percent of the annual operating expenses of such housing;

(2) technical assistance in establishing and operating transitional housing and providing supportive services to the residents of such housing to assist them in the transition to independent living; and

(3) a one-time only non-interest bearing advance, not to exceed $100,000, for the purposes of acquiring, rehabilitating, or acquiring and rehabilitating an existing structure for use in providing transitional housing, if the applicant agrees to utilize such structure as transitional housing for not less than 5 years. Repayment of such advance shall be waived if the applicant utilizes the structure as transitional housing for not less than the 10-year period following the initiation of operation of such transitional housing facility, or if the Secretary determines that such structure is no longer needed for use as transitional housing and approves the use of such structure for another charitable purpose for the remainder of such 10-year period. If the applicant fails to comply with

the conditions for waiver of repayment, the applicant shall repay to the Secretary in cash the full amount of the advance received on such terms as the Secretary shall require.

(c) Grants made under this section are to be used to supplement and extend currently available resources and not to substitute or reimburse ongoing programs and services.

APPLICATIONS FOR GRANTS

SEC. 702. Each application for a grant submitted by a State, local government, or private nonprofit organization shall contain—

(1) documentary material demonstrating that such applicant has the ability and resources necessary to operate transitional housing;

(2) documentary material describing the program and supportive services intended to be provided in such transitional housing, including the innovative quality of the proposed program;

(3) documentary material demonstrating that the State, local government, or private nonprofit organization involved has provided the emergency food and shelter program local board, constituted pursuant to section 605 of this Act, if such local board has been constituted in the locality where the proposed transitional housing will be located, an opportunity to comment with respect to this application, and a statement as to whether the local board approves or disapproves of such application and its reasons for any disapproval; and

(4) such other information or material as the Secretary shall establish.

ALLOCATION OF GRANTS

SEC. 703. In selecting States, local governments, or private nonprofit organizations for assistance in providing transitional housing under this title, the Secretary shall consider—

(1) the innovative quality of the proposal to provide transitional housing and supportive services to the homeless to assist them in the transition to independent living;

(2) the ability of the State, local government, or private nonprofit organization to develop and operate transitional housing for homeless persons and to provide supportive services to the residents of such housing;

(3) the need for such transitional housing and supportive services in the locality to be served; and

(4) such other factors as the Secretary determines to be appropriate for purposes of carrying out the demonstration project established in this Act in an effective and efficient manner.

DISTRIBUTION OF GRANTS

SEC. 704. (a)(1) Not later than 120 days after the beginning of each fiscal year for which Congress makes appropriation to carry out this title, the Secretary shall make grants under section 701.

(2) If the aggregate amount of funds requested in applications submitted and approved, during the 120-day period referred to in paragraph (1), is less than the amount of such appropriation available to make such grants, then the Secretary shall publish in the Federal Register a notice that additional funds are available for distribution under this title.

(b) The aggregate amount of all appropriations made to carry out this title shall be used to make grants under section 701 unless the sum of the administrative costs incurred by the Secretary to carry out this title and the aggregate amount of funds requested in applications approved under this title is less than the aggregate amount of such appropriation.

PROGRAM REQUIREMENTS

SEC. 705. (a) Each State, local government, or private nonprofit organization receiving assistance under this title shall agree—

(1) to operate transitional housing assisting residents in the transition to independent living and limiting the stay of individual residents to not more than 6 months;

(2) to conduct an assessment of the supportive services required by the residents of such transitional housing to assist them in the transition to independent living;

(3) to employ a full-time residential supervisor with sufficient expertise to provide, or supervise the provision of, supportive services to the residents of such housing;

(4) to keep and make available to the Secretary such records of the expenditure of funds as the Secretary may require by rule; and

(5) to comply with such other terms and conditions as the Secretary may establish for purposes of carrying out the demonstration project established by this title in an effective and efficient manner.

(b) Each homeless individual residing in transitional housing assisted under this title shall pay as rent an amount determined in accordance with the provisions of section 3(a) of the United States Housing Act of 1937.

REGULATIONS

SEC. 706. Not later than 120 days following the date of enactment of this Act, the Secretary shall issue such regulations as may be necessary to carry out the provisions of this title.

REPORTS TO CONGRESS

SEC. 707. (a) The Secretary shall submit to Congress—

(1) not later than 3 months after the end of each of the fiscal years 1986 and 1987, an interim report summarizing the activities carried out under this title during such fiscal year and setting forth any preliminary findings, conclusions, or recommendations of the Secretary as a result of such activities; and

(2) not later than 6 months after the end of fiscal year 1988, a final report summarizing all activities carried out under this title and setting forth any findings, conclusions, or recommendations of the Secretary as a result of such activities.

(b) Such interim and final reports shall address—

(1) the cost of operating transitional housing and providing supportive services to the homeless to assist them in the transition to independent living;

(2) the various types of transitional housing assisted under this title, including innovative approaches to assisting the homeless in the transition to independent living;

(3) the social, financial, and other advantages and disadvantages of transitional housing and supportive services as a means of assisting the homeless;

(4) the success of transitional housing programs assisted under this title, as measured in terms of placement of homeless individuals in permanent housing, placement in employment, and reductions in welfare dependency; and

(5) such other findings, conclusions, and recommendations as the Secretary deems appropriate with regard to assisting the homeless in the transition to independent living.

PROGRAM AUTHORIZED

SEC. 708. To carry out this title, there are authorized to be appropriated $15,000,000 in each of the fiscal years 1986, 1987, and 1988.

Mr. GORTON. Mr. President, there is one group of citizens in our Nation that have not enjoyed the fruits of our strong economic recovery—the mentally ill, evicted families, abused spouses, and castoff children that make up our homeless population. Relief agencies throughout the country are finding that their financial resources are inadequate to meet the emergency created by homelessness.

In my home State of Washington, public and private agencies were able to accommodate only 20 to 30 percent of those requesting shelter last year. In Seattle, the homeless population is estimated at 3,500, while there are only 1,100 to 1,300 beds available to meet their shelter needs. The City of Yakima reports that it is struggling to meet the food and shelter needs of a growing population of single women. Washington's Clark County was forced to deny shelter assistance to more than 100 families as recently as last July. A relief agency dedicated to meeting the needs of mobile families in King County, WA, had to refuse service to almost one-third of the families seeking help during 1984 because of a shortage in funds. Communities in Washington State, and throughout the United States, are faced with the tragic, growing problem of homeless youth—teenagers whose address is a highway underpass, and who live from day to day on food scavenged from supermarket dumpsters. The homeless are, indeed, still with us, and there is every indication that the problem is continuing to grow.

Over the past 3 years, Congress has addressed the particular needs of the homeless through an emergency food and shelter program. This temporary program has allowed the Federal Government to work in partnership with States and private organizations to relieve some of the pressing needs of the homeless. Most notably, it has provided support to mass shelters, soup kitchens, and food banks.

Although Congress has not turned its back on those citizens who require assistance in order to have the basic necessities of life, we have failed to duly authorize a continuing Federal program. The ad hoc, year-to-year approach we have taken to this issue has inhibited long-range planning by local providers of services for the homeless. The problem of homelessness is not going to disappear this year or next year. It is time to establish a properly authorized Federal effort to assist the homeless.

Mr. President, the amendment before you today is identical to an amended version of S. 394, a bill jointly sponsored by Senator MOYNIHAN

and me. This amendment would authorize an emergency food and shelter program for the homeless, assist in the revovation or conversion of buildings for use as emergency shelters, and support transitional housing to assist homeless individuals in the transition to independent living.

I. EMERGENCY FOOD AND SHELTER PROGRAM

In 1983, Congress first established an emergency food and shelter program, administered under the Federal Emergency Management Agency [FEMA], operated through a national network of the private voluntary organizations. This amendment would retain the emergency food and shelter program in its present format, although shifting its agency administration to the Department of Housing and Urban Development. The impetus for originally placing this program under FEMA was the emergency nature of the high unemployment in 1982 and early 1983, and the need to provide assistance swiftly. Yet, this program simply does not fit the primary mission of FEMA—that of managing flood control and providing disaster relief. In establishing the program on a permanent 3-year basis, it is appropriate to provide for transition of administrative responsibilities to HUD, which has proper jurisdiction for public housing activities.

The program would continue to operate through a national board of private voluntary organizations distributing grants to individual localities with the greatest need for emergency food and shelter assistance. Each locality would constitute a local board of nonprofit organization, chaired by the representative of the local head of government, to determine the actual distribution of funds to service providers.

This proposal thereby preserves the emphasis on private nonprofit organizations in managing the program and serving those in need. The focus continues to be on encouraging private initiatives through churches, neighborhood groups, and other organizations moved by compassion to devote time, energy, and resources to those who have fallen off even the bottom rung of the economic ladder.

In addition, local boards, in cooperation with the local government, would be required to develop a local plan describing programs, goals, and objectives for providing assistance to the homeless in that community. This requirement would, I hope, spur those communities that have not already done so to examine the problem of homelessness, to coordinate public and private resources for meeting the need, and to work to provide shelter and preserve low-income housing.

The amendment would authorize and appropriate $70 million for the emergency food and shelter program in fiscal year 1986, and authorize $88 million in 1987, and $91 million in 1988.

II. SHELTER RENOVATION AND COVERSION ADVANCES

The amendment creates a program that allows local boards to make competitive noninterest bearing advances to service providers for the renovation or conversion of buildings to use as emergency shelters.

Local boards could advance up to 25 percent of their funding to service providers for renovation and conversion efforts. Repayment of the advances would be waived if the recipient used the facility as a shelter for 10 years or more. The provision thus ensures long-term use of the buildings upon which funds are expended.

III. TRANSITION TO INDEPENDENCE DEMONSTRATION PROJECT

The amendment establishes a demonstration project under HUD providing competitive grants to States, local governments, and nonprofit organizations to develop and apply innovative approaches to assisting homeless individuals in the transition from living on the streets or in shelters to independent life.

The proposal is for "second stage" housing in a small-group residential setting. The program established by this amendment would pay up to 75 percent of the operating costs of transitional housing providing a residential environment for up to 15 individuals, with a full-time supervisor and supportive services.

The program would serve homeless persons who cannot presently live independently without supervision and supportive services but who are capable of eventual transition to independent living. The transitional housing would provide homeless individuals with a stable address, counseling, the opportunity to seek employment, and information on other available resources including referral to job training programs.

In this transitional program, the residents would be expected to assume greater responsibility for their own care. Residents would be required to pay 30 percent of their income or public assistance as rent, as do public housing tenants receiving rental subsidies.

At the end of each fiscal year, HUD would provide a report to Congress evaluating the wisdom of this approach to assisting the homeless and the success of the transitional project, objectively measured in terms of placement of homeless individuals in permanent housing and employment.

The amendment would authorize and appropriate $15 million for this demonstration project in 1986, and authorize $15 million for each of the fiscal years 1987 and 1988.

Mr. President, I ask my colleagues to join me in resolving that this will be the year in which Congress finally acts to establish a properly authorized program to feed the hungry and provide shelter to the homeless. I do not believe that this amendment would be the answer to all of the problems of homelessness in our Nation, but this proposal is a step forward in our awareness of the problem of homelessness and signals the determination of Congress to address it.

Mr. President, this second-degree amendment is cosponsored by the distinguished Senator from Illinois. We have worked out a cooperative approach, pursuant to which the program he seeks to enhance is now transferred permanently to the Department of Housing and Urban Development.

This also adds a demonstration project for the transition from the status of the homeless to being able to operate and live self-sufficiently.

Mr. HEINZ. Mr. President, I rise in support of the amendment offered by our distinguished colleague from the State of Washington [Mr. GORTON]. He deserves a great deal of credit for the homeless legislation we will vote on today. The essence of this amendment is the Homeless Housing Assistance Act of 1985, S. 394, which Senator GORTON introduced earlier this year. The elements of that bill will authorized an Emergency Food and Shelter Program similar to the program currently operated by the Federal Emergency Management Agency [FEMA]. I am particularly pleased to support this amendment because it is similar to legislation which Senator DIXON and I introduced in March of this year for a National Endowment for the Homeless, S. 739. Although there are some differences in this amendment, the primary objective of providing food and shelter through grants from a national board to local entities is preserved.

Senator GORTON's amendment also includes a demonstration project under HUD which would provide competitive grants to States, local governments, and nonprofit organizations to develop and apply innovative approaches to assisting homeless individuals in the transition from living on the streets or in shelters to independent living. I support this measure which emphasizes efforts to assist in the transition from temporary shelter to permanent homes—this is particularly important to meet the special needs of the homeless with mental and physicial disabilities and to facilitate access for the homeless to other sources of services.

A vote for this amendment is one more step toward the real commitment we need to address the growing challenge of homelessness and hunger in America.

HOMELESS HOUSING AMENDMENT

Mr. MOYNIHAN. Mr. President, I rise today in support of the amendment offered by my distinguished colleague, Senator GORTON, to provide for housing assistance for the homeless.

The amendment would provide a limited amount of funding for emergency food and shelter to the large and growing number of homeless Americans. Mr. President, this problem needs to be put in perspective: the Coalition for the Homeless has estimated the total homeless population in the United States at an alarming 2 million persons. Although three-quarters of the homeless are single individuals, a substantial proportion, 21 percent, are individuals in families, a large number of them children. The number of homeless persons keeps rising, especially in large cities across the country. The stock of affordable housing units for low- and moderate-income people is dwindling largely as a consequence of reductions in Federal housing aid.

This homeless housing assistance amendment would provide for the following. First, this measure would maintain the current Emergency Food and Shelter Program, but shift its administration from the Federal Emergency Management Agency, to the Department of Housing and Urban Development. The program would still be directed by a national board, comprised of seven representatives of private, voluntary organizations. Administration of the program by HUD will help foster the development of a national housing policy for low-income, homeless families and individuals. The amendment would also direct HUD to provide advances to State and local governments and private, nonprofit agencies to support the renovation or conversion of buildings for use as emergency shelters. These advances, which would be awarded on a competitive basis to governments and agencies, would not have to be repaid if the building is used as a shelter for at least 10 years. Finally, the amendment would authorize a demonstration project of small group housing to help homeless individuals make the transition to independent living. We envision this project as a short-term transitional program, with individual stays limited to 6 months.

The tragedy of homeless Americans is nowhere more vivid, or more painful, than in New York. Governor Cuomo has estimated the homeless population in New York at 40,000 to 60,000. The number of homeless families in New York City has increased a dramatic 158 percent over the 1982-1984 period. This year, some 3,775 homeless families—13,500 men, women, and children—were housed in hotels and family centers in New York City.

The desperate situation of the homeless in New York City is repeated in many other cities throughout the country. In Philadelphia, 15,000 persons received emergency family housing in 1983—five times the numbers in 1981. In Connecticut, 54 emergency food programs were operating in 1981; today, there are more than 200. In Colorado, some 300 emergency food programs are operating; 900 in Michigan; 2,000 in Texas; and 358 in Kansas.

Unfortunately, State and local government have had to bear nearly the full costs of providing homeless food and shelter. Both New York City and Washington, DC have committed resources to the homeless. To meet the growing demand, New York City spent some $123 million last year. Since 1979, New York City's costs to house homeless men and women in public shelters alone have increased more than seven times from $8 million to $58 million in 1984, and the city expects to spend $75 million on such this year.

New York City, as many other cities in this Nation, receives little Federal support to help meet its obligations and responsibilities to shelter and feed its homeless residents. In recent years, Congress has provided funds for emergency food and shelter services but only on an ad hoc basis. The time has come for the Federal Government to assume its responsibility for the homeless by permanently authorizing funds for emergency food and shelter.

To be sure, this legislation would address but one aspect of a most complex problem. Though it is important to provide Federal assistance for emergency food and shelter, the Federal Government must also assume its obligation to provide such services, assistance, and permanent housing for the growing number of families and individuals in need.

Moreover, the Federal Government must begin to address some of the root causes of homelessness and the problems of specific groups within the homeless population: former foster care children who are discharged from foster care with no where to go—a study of New York City shelters revealed that one-half of homeless youth had previously been in foster care; the mentally ill who become homeless for lack of sheltered living arrangements; homeless families who ride the subways at night rather than enter a large public shelter.

I urge my colleagues to join me and Senator GORTON in support of this amendment. It represents an essential first step in providing urgently needed assistance to the growing number of homeless Americans.

Mr. GARN. Mr. President, I will not take long, and I could, because this is a longstanding, real problem, and I have not liked the method in which Congress has attempted to solve it. I would say that the amendment of the Senator from Washington does improve the delivery system. It does, however, involve an increase in funding. We currently have $50 million in the bill. He is requesting in the second-degree amendment that we go to $85 million. That is unacceptable to me.

I make an offer to the Senator from Washington, that if he will reduce that amount, modify it, so that the total is $75 million—the $50 million we already have in the bill plus $25 million—I would be willing to accept it. I must oppose it at the $85 million level.

Mr. GORTON. Mr. President, I have discussed this matter with the distinguished—and in this case thoughtful and generous Senator from Utah, and I am prepared so to modify my amendment.

I ask that the amendment be modified in line 4 of the first page by striking $15 million and substituting $5 million, and amended in precisely the same fashion on line 17 of the last page.

The PRESIDING OFFICER. Is the Senator asking unanimous consent?

Mr. GORTON. Yes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIXON. Mr. President, will the Senator yield?

Mr. GORTON. I yield.

Mr. DIXON. I ask the Senator for further clarification: Do I correctly understand that the $20 million will be for the emergency relief and the $5 million for the demonstration project?

Mr. GORTON. The Senator is correct.

Mr. DIXON. I thank the distinguished Senator from Washington.

The PRESIDING OFFICER. The question is on agreeing to the second-degree amendment, as amended, of the Senator from Washington [Mr. GORTON].

The amendment (No. 807) was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the underlying amendment, as amended, offered by the Senator from Illinois [Mr. DIXON] on behalf of himself and other distinguished Senators.

The amendment (No. 806), as amended, was agreed to.

Mr. GORTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GARN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GARN. Mr. President, so that my colleagues will know where we are with this bill now, we have completed action on everything except three amendments.

There will be a Murkowski amendment offered in the morning at 8:30

a.m., on which there will be a rollcall vote; if the Murkowski amendment fails, there will not be an additional Chiles-Domenici amendment; if it does succeed, we will except another across-the-board cut amendment to make up for that loss in revenue.

There are also two Biden amendments approved for action in the morning.

On those amendments, three minimum, possibly only two, and four maximum, we will then be ready to go to final passage.

EPA SEWAGE TREATMENT CONSTRUCTION GRANT PROGRAM

Mr. LAUTENBERG. Mr. President, in considering H.R. 3038 the committee also deferred appropriations for the Construction Grants Program for sewage treatment plants pending approval of reauthorizing legislation. In July, the Senate passed S. 1128, the Clean Water Act of 1985, by a vote of 94 to 0. One key provision in this bill extends the authorization of the Construction Grants Program. It also authorizes a new allotment formula and would make financing contingent upon the establishment of State revolving loan banks, a concept that originated in New Jersey.

Mr. President, the Construction Grant Program is key to achieving the goals of the Clean Water Act. Since its enactment in 1972, Federal, State, and local governments have invested more than $56 billion in municipal wastewater treatment facilities. These expenditures have resulted in the construction or upgrading of approximately 3,500 treatment facilities. Yet, according to EPA, construction needs eligible for Federal funding through the year 2000 are $53 billion. According to the latest estimates, New Jersey alone has $4.5 billion in eligible funding needs.

At the same time, municipalities are facing a 1988 deadline for meeting secondary treatment requirements at sewage treatment facilities. EPA has threatened to restrict development in municipalities which are not in compliance with this deadline. New Jersey has already imposed construction bans in a number of municipalities and has threatened other municipalities with such a ban if their sewage plants are not in compliance with the requirements of the act.

If we are to achieve the goals of the Clean Water Act and avoid unnecessary restrictions on development, it is imperative that the Congress appropriate the funds authorized by the Clean Water Act. While both the Senate and House have approved Clean Water Act amendments which would reauthorize the Construction Grants Program, the conference committee has not yet met to resolve differences between the House and Senate bills.

Mr. President, I know that the distinguished chairman of the HUD-Independent Agencies Subcommittee recognizes the importance of this program. In our scorekeeping on this bill, we have assumed $2.4 billion in fiscal year 1986 funding for it, although the funds are not actually in the bill. At this point, I would like to clarify with my chairman that it is his intent to seek appropriations for the Construction Grants Program as soon as possible after the Construction Grants Program is reauthorized. Perhaps on the continuing resolution, if one is necessary, or on the first fiscal year 1986 supplemental?

Mr. GARN. I appreciate the concern of the Senator from New Jersey about funding for this important program. It is indeed my intent to seek appropriations for the Construction Grants Program as soon as the program is reauthorized.

Mr. LAUTENBERG. I thank the distinguished chairman of the subcommittee, Senator GARN, for his assurances. Mr. President, funding for the Construction Grants Program is essential to cleaning up our Nation's waters and avoiding construction bans in communities around the Nation. I look forward to working with the chairman to provide funds for the Construction Grants Program as soon as possible.

Mr. GORE. Mr. President, the amendment I have proposed would add $500,000 to the fiscal year 1986 EPA research and development budget for the purpose of maintaining the facilities and six key personnel engaged in the study of the biological effects of nonionizing radiation at the EPA research facility in Research Triangle Park, NC. Nonionizing radiation is the umbrella term that encompasses radio frequency, microwave, and extreme low-frequency radiation.

The administration, for the fourth consecutive year, has decided not to request funding for this project. In the last 3 years, Congress, recognizing the vital importance of EPA expertise in this area, has continued the program. This year, however, despite rising public concern and the likelihood that EPA will propose a national guideline for exposure to nonionizing radiation, so far no money has been added back for this important program.

My amendment, quite simply, provides only the funds necessary to keep the program breathing. Let me make clear that even under my amendment there would be severe cuts in this program. The number of scientists working on the program would be cut from 17 to 6. This will require the scientists to wind down the current research program. But it will allow projects in which a great deal of time and resources have been invested to reach a logical stopping point and not be halted in midstream. More important, with EPA about to enter the public debate on establishing a national guideline for exposure to nonionizing radiation, my amendment provides the EPA Administrator the minimum necessary expertise to do this.

My amendment is endorsed not only by the experts working in the field, but by the National Association of Broadcasters, the Electromagnetic Energy Policy Alliance—an association consisting of manufacturers and users of electrical and electronic devises, and the former director of research and development at EPA, Dr. Bernard Goldstein.

Two years ago, responding to public concerns, EPA considered setting a natinal guideline for exposure to nonionizing radiation at 100 microwatts per square centimeter. That level would be 10 times more restrictive than the current, voluntary guideline of 1 milliwatt per square centimeter put forth by the American National Standards Institute [ANSI]. EPA eventually decided not to go forward with this proposal.

Without an enforceable national standard for exposure and faced with growing public concern, States, counties, and cities have begun setting their own standards. Massachusetts has adopted a standard five times as strict as the ANSI guideline. Multnomah County, OR, has adopted this same standard. Portland, OR, in Multnomah County, proposed a standard 10 times as strict. And New York City has adopted a standard 20 times as strict.

With public concern mounting, we can expect to see even more of these actions. Broadcasters will face different standards not only State to State, but possibly from city to city. Such differing restrictions could seriously interfere with the ability of the broadcast industry to continue to meet the public mandate embodied in the Communications Act of 1934, "to make available, so far as possible, to the people of the United States a rapid, efficient, nationwide, and worldwide wire and radio communication service with adequate facilities at reasonable charges * * *".

Mr. President, we should not leave it to States and cities to act independently in setting nonionizing radiation exposure standards.

This fall, EPA, alerted to the public health concerns and recognizing the benefit of a single standard, is again considering a national guideline. The EPA proposal will provide four options for controlling public exposure. The options range from taking no action at all to adopting a national guideline several times more restrictive than the current ANSI guideline. It is certain that during the public comment period strong arguments will be made for each of the options. It will be the responsibility of the EPA Administra-

tor to sort through the claims and counter claims and reach the correct public policy. Yet if Congress does not act to restore funds for the EPA Nonionizing Radiation Health Effects Program, he will be stripped of the in-house expertise and resources to do so.

Finally, Mr. President, abrupt termination of this program makes bad economic sense. The EPA facilities include $3 million worth of very sophisticated equipment paid for by the taxpayers. The highly specialized nature of the equipment required several years of testing by EPA's scientists before they could turn to questions about the health effects of nonionizing radiation. Abrupt cancellation of the program will mean this significant investment will be lost. Yet that is what the administration is proposing. I hope we have the wisdom to avoid this shortsighted policy.

Government has an obligation to provide leadership, particularly where there is growing public concern about an issue. This is such a time.

Leadership requires making informed choices, and to make informed choices government leaders must have access to the best possible expertise. That is why we fund programs such as EPA's Nonionizing Radiation Health Effects Program in the first place, and that is why we must continue to provide support at this critical juncture. My amendment does just that. I urge the support of my colleagues.

Mr. GARN. I am sympathetic to the Senator's amendment. He has done a very thorough job researching this issue and I want to thank him for his efforts. I am familiar with this issue as the University of Utah has, in its Nonionizing Radiation [NIR] Research Program and its director Dr. Om Gandhi, one of the premier NIR programs in the nation.

This issue the Senator from Tennessee has raised is an important one and one I think deserves the further consideration of the Senate. I agree with the Senator that it would be extremely shortsighted at this time to dismantle this program on the eve of EPA rulemaking on allowable standards for exposure to nonionizing electromagnetic radiation.

But in light of the severe fiscal constraints we are under in this bill, I wonder if he would be willing to withdraw his amendment and accept in its place my commitment to attempt to add language in conference instructing EPA to hold in abeyance dismantling this program until the committee has the opportunity to thoroughly examine this issue early in calendar year 1986.

During this period of time EPA would be required to maintain the NIR health effects research laboratory at Research Triangle Park, NC, and further maintain a core group of scientists on this program of not less than six full-time equivalents.

Mr. GORE. I thank the gentleman for his suggestion, and given the situation we find ourselves in on this bill I would be willing to reluctantly accept his offer to withhold my amendment with the understanding that language will be sought during conference to prevent the dismantling of this crucial program until we have the opportunity to examine the issue thoroughly. I look forward to continuing to work with the gentleman on what I believe is an extremely important subject and hope we can work something out on the future of the NIR Health Effects Research Program early in the calendar year.

Mr. GARN. That is my offer.

Mr. GORE. I will not then offer my amendment.

Mr. SPECTER. Committee language deletes funds for the parking garage portion of the high priority Philadelphia Veteran's Administration clinical addition. This garage is a structurally integral part of the addition's design. If the garage cannot be built, the addition will have to be totally redesigned, forcing the project to be totally redesigned and causing a 2-year delay. Would you be opposed to allowing the hospital to build their parking garage from available funds; that is, by stretching some projects at the hospital? The director of the hospital in Philadelphia has indicated his ability to do this. This does not mean an increase in the 1986 appropriation.

Mr. GARN. We have directed the VA to immediately promulgate a program by which parking facilities can be provided at VA medical center sites and the costs paid for or amortized by the charging of user fees and will consider permitting parking construction when a VA employee parking fee-based cost-recovery system is implemented. If the VA implements such a program, I would have no objection to allowing the Veterans' Administration to build their parking garage out of available funds as an integral part of the construction of clinical addition and nursing home at the Philadelphia Veterans hospital.

Mr. SPECTER. That is acceptable. Thank you for your cooperation and help in this matter.

HUD DETERMINED WAGE RATES UNDER THE CIAP PROGRAM

Mr. ROTH. Mr. President, the Department of Housing and Urban Development issued a notice, PIH-84-1, on January 5, 1984, prescribing HUD determined wage rates under the CIAP Program. While this notice apparently had the result of savings for a large number of public housing agencies, for others, of which the Wilmington Housing Authority is one, it had the exact opposite effect; our housing authority estimates that this notice will result in an increase of 25 percent in their labor costs. The director of the housing authority, Mary Ann Russ, suggested that public housing agencies be allowed to use the lower of two wage rate determinations. As this seemed sensible to me both from an equity and cost effective standpoint, I wrote to the Department to see if they could implement this suggestion. To date the Department has not implemented this idea. I would add that the CIAP Program has been very important to our housing authority due to the age of their housing stock; this program has greatly assisted the authority in helping them meet the mandate of providing decent, safe, and sanitary housing. It clearly makes sense to allow the maximum use of Federal funds to meet this mandate. I would like to ask the distinguished Senator from Utah if he would agree that HUD should undertake to implement the suggested change for wage rate determinations under the CIAP Program?

Mr. GARN. I would reply to the Senator from Delaware that this suggestion certainly does seem to be a sensible one. I would be happy to work with him to have the Department implement what would seem to be a simple change to the HUD handbook for the CIAP Program, the design of which is supposed to be for guidance in running our public housing in an orderly and efficient manner, not to increase costs.

Mr. ROTH. I thank the Senator for his support and would hope that together we could get a timely solution to the problem of increased labor costs under the CIAP Program.

● Mr. LEVIN. Mr. Chairman, the HUD-independent agencies appropriations bill passed by the House includes $26.7 million for design, site acquisition and site preparation for a VA Medical Center in Detroit. The Senate version of the appropriations bill does not include funding for the Detroit hospital.

I understand the subcommittee's reluctance to appropriate money for this project since a specific site for the hospital has not been officially selected. However, it is crucial that we get this project underway. The Detroit Medical Center has been in the planning stages for years now, and its construction is badly needed. Current facilities need to be upgraded to allow the use of modern medical equipment. Veterans are not receiving the care they are entitled to, and will not until the Detroit Medical Center is completed.

The VA considers this project a top priority. A formal site decision is expected early in fiscal year 1986. It is important that money be appropriated now so that the design stage of the project can be started as soon as the VA announces the site.

I would ask the chairman if he would give serious consideration to

this issue and work for a mutually satisfactory agreement on this point. I request particularly that he be sensitive to the reasons for going ahead with an appropriation for the project even without a formal site selection.

Mr. RIEGLE. Mr. President, I would also like to share my thoughts on this issue with the chairman of the subcommittee. I have been working to secure funding for this important facility in my state over the last few years, and would hope that the chairman would work with us in the effort to finally get this project underway.

Mr. GARN. I assure the Senators that I will work to attempt to reach an accommodation on this issue.●

AUTOMATION, ADVANCED ROBOTICS, AND ELECTRONIC CINEMATOGRAPHY

Mr. D'AMATO. Mr. President, I rise to seek a clarification of the language included in H.R. 3038 concerning the use of computer aided engineering, the research and development section of the National Aeronautics and Space Administration from my distinguished colleague, the chairman of the HUD-Appropriations Subcommittee.

Is it correct that the committee is directing NASA to focus attention on new developments in automation, advanced robotics, computer graphics, and electronic cinematography and to report the findings back to the Congress within 6 months? Is it also true that efforts included in this study would encompass a development to intermix live-action photography with the imaginary world of computer graphics?

This advanced technology in computer aided systems would reduce cost and increase efficiency. The results of this development would also present images stored in digital form that is first generation copy with no downgrading in quality at any time. The committee has been advised of the potentials of the pragmatic, research and national significance of this development that can be readily developed by the New York Institute of Technology.

Mr. GARN. Mr. President, the Senator from New York is correct in his interpretation of this language. This language promotes the development of advanced computer aided engineering and enhances U.S. scientific competition. The committee directs NASA to explore this research and development potential with centers of technology leadership such as the New York Institute of Technology. The facility that can be developed by such institutions should receive support and assistance necessary for advances in this critical design capability including such closely related areas as high definition television, computer graphics, and digital sound capability.

Mr. D'AMATO. Mr. President, I thank the Senator from Utah for clarifying this language. I also commend the Senator from Utah for developing a bill that will greatly benefit our Nation on a number of matters of national concern.

Mr. HEINZ. Mr. President, if I may have the attention of the Senator from Utah, Mr. GARN, I would like to address some questions to him. My colleague from California, Senator CRANSTON, and I understand that the committee has approved a $34.9 million budget to fund the activities of the Consumer Product Safety Commission for fiscal year 1986. Is that correct?

Mr. GARN. The Senator from Pennsylvania is correct.

Mr. HEINZ. Is it also true that none of these funds has been specifically earmarked to fund the Cigarette Safety Act study, which, as you will recall, was authorized by law last year to explore the technical and economic feasibility of producing self-extinguishing cigarettes?

Mr. GARN. That is also correct. Although the committee did not target money specifically for this project as the House has done, we did include report language stating that the Consumer Product Safety Commission in establishing its own priorities has the authority to spend up to $1 million to fund this project.

Mr. CRANSTON. May I inquire of my colleague whether he has any objections to the study itself?

Mr. GARN. No, I do not; I support the Cigarette Safety Act study and, as you know, agreed to inclusion of $500,000 in the fiscal year 1985 supplemental appropriations bill to ensure that the work of the interagency committee was not interrupted due to lack of funds. I am told that 99 percent of this money will be available in fiscal year 1986 and provide funds while the CPSC, National Bureau of Standards and the Appropriations Committee work out the final details of the study.

Mr. CRANSTON. Both Senator HEINZ and I have been assured that CPSC is committed to the completion of this study. Because of the reduction in the Commission's budget in recent years, it is our understanding that under the Senate's proposed funding level, it would be difficult for the Commission to divert limited agency resources to the Cigarette Safety Act study at the expense of other ongoing and long-standing safety programs, and that a special allocation may be necessary to continue the work of the study group. Should this be the case, would you consider additional funding?

Mr. GARN. If the agencies responsible for coordinating the study provide me and my subcommittee with sufficient information legitimizing the need for more funds, I would be open to such recommendations.

Mr. HEINZ. I would like to say to my colleague from Utah that I have received assurances from CPSC Chairman Scanlon that he has given this project high priority and that he will provide you with any information you might require concerning the Cigarette Safety Act project.

Mr. GARN. I would be happy to reconsider this matter in light of any new information that might be provided as expeditiously as possible.

ASBESTOS IN SCHOOLS

● Mr. MATHIAS. Mr. President, the $50 million recommended for the School Asbestos Abatement Program in the HUD appropriation bill pales before the billions to be spent on other toxic problems by Superfund. The magnitude of the asbestos problem in our public schools far exceeds the size of this appropriation. Still, it is an encouraging beginning.

Our youth deserve better than to suffer from our mistakes. A year ago, I said that "the presence of asbestos in schools is a public health menace because children are especially susceptible to the effects of the material." I have heard nothing since to make me change my mind.

Asbestos can cripple or kill through asbestosis, lung cancer, and mesothelioma, also a form of cancer. All three are horribly painful and debilitating. And all three develop over the course of many years. They are creeping, insidious maladies.

In its first year, the School Asbestos Abatement Program has come under heavy fire, even from some of its own supporters, for failing to achieve its stated purpose. But, as the committee report for H.R. 3038 rightly argues, our next step should be to improve the program, not to cripple or kill it.

Let me illustrate the problem, and a model solution. In my home State of Maryland, in its largest city, Baltimore, almost all of the public schools contain asbestos. The obvious solution, removing the asbestos, was not the best one. In the removal process, asbestos particles would have been set free into the air and onto other surfaces, creating a worse hazard yet.

So what to do? Tap the experience and ingenuity of those most closely involved with the asbestos program, and innovate. That is what Mayor Schaefer of Baltimore and the Baltimore Board of Education did. They entered into a contract with the White Lung Association, a national organization of asbestos victims, to encapsulate the asbestos in a durable material instead of removing it.

I would like to commend Mayor Schaefer and the board of education for their willingness to experiment. Their bold leadership produced results. I would also like to commend the White Lung Association for both their courage in fighting their own asbestos-induced disabilities and their selfless labor to contain the asbestos threat to future generations. We profit by their examples.

We already are developing the new techniques which we need to deal effectively with the asbestos threat. The $50 million provided by this bill continues our progress. I commend the distinguished chairman of the Appropriations Subcommittee, Senator GARN, and the ranking minority member, Senator LEAHY, for continuing this essential program.●

CLOSURE OF HUD FIELD OFFICES

Mr. ROTH. Mr. President, I noted with interest language contained in the committee report accompanying H.R. 3038, reaffirming the committee's directive contained in Senate Report 99-82 on the Supplemental Appropriations Act for fiscal year 1985, directing the Department to provide the committee with details of any plan for implementing a reorganization of regional/field office structures and functions no later than 30 days prior to the date on which the Department would be required to publish its analysis in the Federal Register. Earlier this year it was rumored that HUD intended to close the FHA Wilmington field office. This caused a great deal of concern among my constituency who would be left without a HUD presence in Delaware. Currently all States have at least one HUD office. The current design of the regional network and field office structure was an attempt to insure local needs would be met and input received in order that the Federal services offered under a vast array of programs would reach the people they were intended to serve. I have a concern that the closure of the FHA Wilmington Office would adversely affect this delivery of services. I personally met with Secretary Pierce with my colleagues, Senator BIDEN and Congressman CARPER to request that the office be retained. Subsequently it was my understanding that HUD had dropped plans for closure of this and other offices. Therefore, I was very concerned recently to be contacted by several of my constituents who have heard that the office will, in fact, be closed. I would like to ask the distinguished Senator from Utah if he has been advised of any such proposed closures, particularly the office in Wilmington, in light of the committee report directive or has knowledge of any impending action?

Mr. GARN. I would reply to the Senator from Delaware that the committee has not at this time been notified by HUD of action to close the Wilmington FHA Office. I would take this opportunity to repeat that the committee expects to be notified by the Department no later than 30 days prior to Federal Register publication in order that the committee can have the opportunity to review the required cost benefit analysis.

Mr. ROTH. I appreciate the Senator's response. I would add that the Wilmington FHA Office appears to generate revenue for the Department and I would therefore hope that in the event that the committee is presented with a proposal to close the FHA Office in Wilmington the evidence will clearly support its retention.

RADON INDOOR AIR RESEARCH

Mr. LAUTENBERG. There is a matter in the EPA R&D account that needs to be clarified. I wonder if the distinguished manager might take a moment to discuss it at this point?

Mr. GARN. I am happy to respond to any questions the Senator from New Jersey might have.

Mr. LAUTENBERG. I am very concerned about the public health threat posed by radon contamination. When the subcommittee met to mark up this bill, I offered an amendment to provide funding for radon work in EPA's Indoor Air Research Program. The chairman very graciously agreed to a $2 million increase in the R&D appropriation for this purpose. The problem is that, although the bill before us contains the aggregate level the committee approved for R&D—$228,775,000—the report explaining the committee's recommendations fails to mention indoor air research specifically. My understanding is that this is an inadvertent omission—that GPO just left the language out by accident. I just want to be sure that the Senator from Utah agrees and that the $2 million for indoor air research is included in the R&D number.

Mr. GARN. I am, of course, aware of the Senator's concerns for environmental problems and I want to commend him for his initiative on radon and indoor air pollution research. He has stated the situation regarding his amendment exactly as I understand it. It is the intent of the committee to provide $2 million for this important research program within the R&D account. Reference to this activity in our report was accidentally omitted when the report was sent to the printer. That, however, in no way alters the fact that the committee has approved the money for indoor air research.

Mr. LAUTENBERG. I thank my friend for his clarification and for his assistance in securing funding for this program.

Mr. MITCHELL. I would like to commend the Appropriations Committee for its decision to include $2 million for EPA research of indoor air pollution and exposure to radon gas. We now have clear evidence that indoor air pollution is a serious threat to public health. Responding to this evidence, the Senate recently approved legislation, which I sponsored with Senator LAUTENBERG providing the EPA with a clear mandate to conduct a comprehensive program of research into indoor air pollution. The $2 million included in the Appropriations Committee bill will assist the EPA in implementing this important legislation.

Mr. BUMPERS. Mr. President, no one is more concerned about protecting our Nation's valuable natural resources than I am. I can understand my colleagues' interest in having the problems facing Oklahoma corrected. Arkansas, too, has serious water problems. I am completely dedicated to seeing those problems eliminated, and my interest is by no means a purely parochial one.

Mr. President, we in Congress have done our best to pass laws which will ensure that positive actions are taken to improve the quality of our Nation's water. We have set high standards and have charged the EPA with implementing regulations to carry out these laws in order to ensure that those standards are met. Under those regulations, the EPA is bound to act in a timely manner.

Since the early 1970's, EPA has been issuing waste water permits to protect water standards. The process has been a highly successful one, and has led to significant water quality improvements, a record which must be continued. The existing process allows all interested parties in a given situation to participate fully and receive due consideration. This process includes a built-in administrative appeals mechanism if there is disagreement over a decision and they may be followed by an appeal to the Federal courts.

I want to express my strongest belief that the Congress should not interfere in this administrative process, but rather should allow EPA to perform its duties as charged by law, in a timely manner. I am not saying we should persuade the EPA to reach a particular conclusion; I am merely saying we should not even by implication impede the administrative process. I would like to call attention to the fact that a permit is not cast in iron once issued—it may be reopened and modified at any time. This process has been underway for a couple of years now and I fully believe we should show faith in the EPA's ability to act objectively and in compliance with the law.

I would like to express confidence in the Fayetteville facility's ability to produce an environmentally acceptable discharge. I have discussed the proposed plan at great length with EPA officials and with officials of Arkansas' Department of Pollution Control and Ecology. It is my understanding that the "state-of-the-art" technology that will be utilized will produce a discharge that is far cleaner than the polluted waters of the Illinois River are now.

Mr. President, the Clean Water Act requires that effluent limits for permits must be sufficiently stringent to meet water quality standards which

will support beneficial uses including public water supply, fish and wildlife propagation, and recreation. The Fayetteville discharge will meet Arkansas and national water quality standards. Fayetteville is committing a significant percentage of local funds into this project, which is approximately 15 percent complete. Even if the permit is granted, discharge is not due to begin until 1987, after the completion of the Illinois River Water Quality Study in late 1986. I certainly recognize the importance of this study, and share my colleagues' interest in seeing it completed in an expeditious manner. It is important that a permit decision be made, however, so that local officials can make important timely decisions regarding further commitments and investments. I hope that the conference committee will not include any language in this report which might influence officials in a way that would slow the timely completion of this project.

Mr. BOREN. Mr. President, I appreciate the opportunity to discuss a very important problem to the State of Oklahoma with the distinguished chairman of the HUD-Independent Agencies Subcommittee on Appropriations. The Oklahoma congressional delegation, including my good friend, Mr. NICKLES, have been attempting to find a solution in cooperation with the Environmental Protection Agency to the possible degradation of our scenic Illinois River in eastern Oklahoma.

The city of Fayetteville, AR, is in the process of upgrading and expanding its current waste water treatment facility. The present plan for discharge would be into Mud Creek which flows into the Illinois River in Oklahoma.

Last year, in answer to our inquiry, the EPA, the State of Arkansas, and the State of Oklahoma started work on a comprehensive study of the entire Illinois River basin to measure the extent of nutrient loading and degradation problems along the river. This is a positive step in the effort to preserve and protect one of Oklahoma's most important natural resources.

We were under the impression that EPA would not issue the final discharge permit until the completion of this study. Our understanding is the granting of this permit is imminent.

Mr. President, EPA is spending $350,000 for this study which is to be completed in December 1987. Preliminary findings should give a fairly accurate appraisal, perhaps as early as May of next year. Oklahoma has asked the Administrator of EPA to delay issuing this permit until this time, but can get no satisfactory answer.

We would like to request language in the conference report directing the Administrator of EPA to issue an interim NPDES permit which maintains the current limits the basinwide study of the Illinois River is complete.

Mr. NICKLES. Mr. President, today I join my distinguished colleague from Oklahoma, Senator BOREN, in this discussion about a very important issue in my State: Maintaining the quality of the State's premier scenic river, the Illinois.

The city of Fayetteville, AR, is presently upgrading its sewage treatment facility. And under current plans, this facility would discharge about 50 percent of its effluent into Oklahoma's Illinois River.

I have been working with the Environmental Protection Agency since May of last year to resolve the pollution problems facing the Illinois River in Oklahoma. Senator BOREN, other members of the Oklahoma congressional delegation, and I met with Mr. Ruckelshaus on this last year. As the result of a September 20 meeting last year, the EPA agreed to conduct a comprehensive study of the Illinois River basin.

This study began in August of this year and will not be completed until fall of next year. The members of the Oklahoma delegation were under the impression that the EPA would not grant a final discharge permit to the sewage treatment facility in Fayetteville until this study was completed.

During a meeting last month with EPA's new Administrator, Lee Thomas, we asked that the discharge permit be delayed until the study is completed. However, we have yet to receive a conclusive answer as to what action the EPA plans to take.

Because the Illinois River is such an important part of the State's economic, cultural, and scenic condition, it is vital that every step be taken to ensure its preservation for this and future generations.

I echo Senator BOREN's request that there be language in the conference report directing the Administrator of EPA to issue an interim NPDES permit which maintains the current limits until the comprehensive study is completed.

Mr. GARN. Mr. President, I understand the concerns of my colleagues from Oklahoma. It is important that we all work to preserve the natural resources of our States. It seems reasonable to me to ask the EPA to attempt to expedite the study of the Illinois River basin so that at least the preliminary findings might be available before the final discharge permit is issued. I will convey to the conference committee this point of view and will urge them to give it serious consideration.

Mr. PRYOR. Mr. President, I understand the concerns of the Senators from Oklahoma. I want to point out, however, that there's another side to this issue.

I feel very strongly that Congress should not intervene in the administrative process in any way that would hinder the timely completion of the waste water treatment facility at Fayetteville, AR.

We should allow the Environmental Protection Agency [EPA] to move ahead.

It's been shown, Mr. President, that this project will meet all existing water quality standards. Further, most of the money for this facility will be raised locally. This waste water treatment facility has been in the works for a couple of years, and construction has already begun. The timely issuance of necessary discharge permits will allow the Fayetteville project to continue on schedule. There have been hearings on this project, and an extensive review process has been undertaken by the EPA. The Agency is convinced there is no violation of water quality laws. It is my understanding that the discharge will be cleaner than water now in the river.

Mr. President, last year all parties concerned agreed to have a study made of the Illinois River Basin. That study is now underway and will be completed in the fall of 1986—before any effluent is scheduled to be discharged into tributaries of the Illinois River. I too, hope the study can be completed as soon as possible.

For all these reasons, I don't believe any action should be taken by the Congress to impede the EPA's permit schedule in any way that would delay the project.

KANAWHA VALLEY HEALTH EFFECTS STUDY

Mr. BYRD. Mr. President, I want to commend the distinguished chairman of the Department of Housing and Urban Development Appropriation Subcommittee for including within H.R. 3038 my amendment to add $250,000 to initiate a comprehensive health effects study in the Kanawha Valley of West Virginia.

The tragedy of Bhopal, India, on December 3, 1984, heightened concern throughout the world regarding the manufacture and handling of chemical products such as methyl isocyanate [MIC]. That concern is especially keen in the Charleston, WV, area where more than 20 plants, manufacturing a broad array of chemicals, are located, including the sole American MIC production unit. The continued operation of these plants is essential to the economic well-being of the region, while safe chemical production is of utmost importance to the health of the residents of the Kanawha Valley.

In order to protect both the economic and physical health of the area, local leaders, working with their elected officials, have established the National Institute for Chemical Studies to ensure that a balanced approach is applied. Well-defined public policy on

issues such as these depends on the thorough collection of relevant data and careful analysis. That is the purpose of the health effects study which is included in this fiscal year 1986 Department of Housing and Urban Development appropriation bill. The National Institute for Chemical Studies, in conjunction with the Harvard University School of Public Health and others, is prepared to carefully review existing health records and analyze physiologic health changes that may be associated with chemical pollutants. The results of this study will permit a careful assessment of the hazards and will suggest cost-effective remedies.

Other areas of heavy chemical production elsewhere in the country will benefit from the results of this study. I am pleased, Mr. President, that the National Institute for Chemical Studies will be taking a leadership role in this regard. I look forward to the results of this work and wish to thank the managers of the bill, Senator GARN and Senator LEAHY, for their cooperation and foresight in making this study possible.

BUDAPEST CULTURAL FORUM

Mr. D'AMATO. Mr. President, I ask to have printed in the RECORD the remarks I delivered at the Budapest Cultural Forum, on October 17, 1985.

The material follows:

REMARKS BY SENATOR ALFONSE D'AMATO, CHAIRMAN OF THE HELSINKI COMMISSION AT SPECIAL ORDER ON THE BUDAPEST CULTURAL FORUM OCTOBER 17, 1985

Mr. President, as members of the Commission on Security and Cooperation in Europe, my esteemed colleagues and I came here today intending to commemorate the opening of the Budapest Cultural Forum as part of the Helsinki process. We came here today to praise the first East-West cultural gathering in the 10 years since the final act was signed. We came here intending to applaud the Hungarians for holding the first of such meetings in a Warsaw Pact country, and holding it in a Democratic and open environment.

I regret to have to inform my distinguished colleagues that there are no grounds for this praise. In spite of assurances we have received over the past 2 years that the Hungarians would hold a free and open conference; in spite of a preparatory conference in Budapest last year where these assurances were repeated and; in spite of recent statements by the Government of Hungary maintaining that the forum would adhere to all Helsinki principles; the Hungarian authorities on Tuesday, the opening day of the forum, have denied the right of a number of private, non-governmental groups like the U.S. Helsinki Watch to engage in any activities connected with the Conference.

The circumstances of the Hungarian ban are revealing. The International Helsinki Federation for Human Rights, a European and North American group of Helsinki monitoring organizations, planned a 3-day cultural symposium to begin on the opening day of the Budapest meeting. That forum was to have covered such issues as literary freedom, cultural, and the future of culture in Europe. Noted authorities such as Susan Sontag, William Shawcross, Amos Oz, George Konrad, and others were scheduled to participate. The Federation has delegations in Budapest from the United States, Canada, France, Austria, the Netherlands, Norway, Sweden, and Switzerland.

After the Federation learned Tuesday that their plans to hold meetings in the Intercontinental Hotel in Budapest had been abruptly cancelled by the Hungarian Government, the group crowded into a private apartment to hear from leading Hungarian and Czechoslovakian dissidents, as well as American writer Susan Sontag, Israeli novelist Amos Oz, and German poet Hans Magnus Enzensberger. The group vowed to continue to free intellectual exchange during the forum. Hungarian writer George Konrad said: "We should have the right to hold this meeting in public, but if we don't have a public place, then every apartment will be public." Gerald Nagler, Executive Director of the Vienna-based Federation said: "The Hungarian Government was fully informed of our intention in advance. We did this through many channels to avoid any overreaction. We did not see any signs of nervousness on their part." Mr. Nagler said the symposium would continue, "we will look for other solutions," he said, "we are not going home."

The U.S. Delegation, headed by Ambassador Walter Stoessel, former Ambassador to Moscow and Deputy Secretary of State, has lodged a strong protest with the Hungarian Government. The protest said that the ban was "a violation of Hungary's commitment to allow the full range of activities for non-governmental organizations, and that it has harmed the spirit of the Budapest Cultural Forum." The Hungarians have replied that such private groups will be permitted no public activities during the Conference.

Yesterday, the International Helsinki Federation held the first of its planned symposia in another private apartment. At this event, a number of eloquent papers were given which discussed creative freedom and other aspects of culture. But more eloquent than these statements is the fact that this meeting had to be held in a private apartment whose location had to be kept secret to avoid police interference. This situation is actual proof of the denial of freedom for creative activities within Hungary and throughout the Warsaw Pact States. It is also a symbolic counterpoint to the Soviet emphasis on State-sponsored and produced culture. Though tolerance of these hidden meetings is desirable, and I hope they will be allowed to complete their activities without official interruption, such tolerance fall far short of the Hungarian Government's promise to respect and abide by the Madrid precedent.

My esteemed colleague and co-chairman of the Helsinki Commission, Representative Steny Hoyer, and I co-authored a letter to the Hungarian Ambassador last week after we received reports of visa difficulties for certain private non-governmental representatives. We expressed the concern of the Helsinki Commission and reminded Ambassador Hazi that the Government of Hungary had agreed to permit the full range of private activities at this forum. We reminded the Ambassador that in discussions between U.S. and Hungarian officials that repeated reminders of their commitments have not once been challenged by the Hungarian authorities. Furthermore, an illustrative list of private citizen activities permitted at the Madrid meeting was delivered to Hungarian authorities at the end of the preparatory meeting late last year. No objection to this illustrative activities list was made by the Hungarians. In his reply, dated October 14, Ambassador Hazi stated that "the Government of Hungary has been driven by the desire to meet her full commitment to the Helsinki process and to make the Budapest Cultural Forum successful both as a contribution to the Helsinki process and to the easing of international tensions, and the furthering of peace and understanding. May I assure you, dear Senator D'Amato that the Government of the Hungarian People's Republic will do its utmost to honor both the letter and the spirit of its international commitments." It is a tragedy for the cause of human rights that the very next day the Ambassador's Government chose to break both the letter and the spirit of the commitments they made on the Budapest Cultural Forum. The Helsinki Final Act and the Madrid concluding document recognize that individuals, as well as institutions, organizations and governments, play a relevant and positive role in the CSCE process. If they are prevented from conducting planned activities in Budapest, the Commission on Security and Cooperation in Europe has serious questions about the utility of continuing this cultural dialogue.

I have said time and time again that we can have no confidence in future agreements made by the Soviet and their Warsaw Pact allies when they do not honor the commitments they have already made. How can we arrive at any useful plan for lessening tensions between the two superpowers if we cannot be assured that they will abide by any agreement made in Geneva? If we sit idly by and react only with words to Hungarian actions against non-governmental groups at the cultural forum, we will simply strengthen their impression that they can continue to ignore those provisions of treaties and agreements that they find troublesome.

The purpose of the cultural forum, as established in Madrid in 1983, is to discuss problems concerning creation, dissemination, and cooperation in the different fields of culture, human rights concerns are covered by this mandate, ensuring that issues for freedom, cultural heritage, and the free dissemination of cultural expression will not be ignored in Budapest.

The U.S. Delegation includes officials of the Department of State and the Helsinki Commission. In addition, there are 26 leading U.S. cultural figures on the delegation. The group including prominent representatives of American Culture, such as Playwright Edward Albee, Jazz Pianist Billy Taylor, Actor Cliff Robertson, Author William Least Heat Moon, Artist Larry Rivers, and Architect Peter Blake. All signatories to the final act have brought leading cultural figures to the forum. The U.S. cultural personalities will freely express their opinions about the conditions that promote or prevent creativity, and the sharing of that creativity among member States. The actions of the Hungarian Government have prevented the open atmosphere we expected to see in Budapest and will impede further cooperation in culture between East and West.

The Soviet Union and its Warsaw Pact allies record on cultural rights demonstrates their lack of concern for human rights and cultural creativity. In the U.S.S.R. Moscow has systematically sought to russify the non-Russians and to suppress any cultural

forms not consistent with the goals established by the party.

In Bulgaria, the regime recently has undertaken extremely harsh measures, which have caused many deaths, to slavicize its ethnic Turkish minority.

In Czechoslovakia, the regime rewards ideological conformity, punishes any attempts at cultural independence, and has drawn protests from the Hungarian minority for discrimination against them.

In Romania, the regime's heavy-handed attempts to homogenize the national culture is leading to the elimination of all ethnic diversity. Suppression of cultural figures is widespread and has pushed a number of active cultural figures underground.

In Poland, the Government's attempts to destroy the Polish culture by attacking the church has backfired, intensifying the Poles' interest in their national culture, rather than dissipating it.

In the German Democratic Republic, official efforts to create an East German national identity distinct from its German heritage have been opposed by the German church and the peace movements active in the GDR.

Mr. President, what happens to those who speak out for cultural freedom or for the interests of national minorities? What happens to those who do not want to see their culture destroyed? What happens to those who resist the destruction of their history and to those who promote their language or culture beyond the narrow parameters imposed by the State? They are harassed, beaten, arrested, imprisoned, or committed to psychiatric hospitals.

I call upon my colleagues in the Senate and the House to condemn this action by the Hungarian authorities, and to leave no doubt that we will not sit idly by and allow the noble purposes of the Helsinki process to be misused and ignored by either Hungary, the Soviet Union, or any of their Warsaw Pact allies. The time has come to match our words with action.

Mr. HEINZ. Mr. President, I originally hoped to speak today on positive developments at the Budapest Cultural Forum currently in progress in Hungary. The forum is the first Helsinki accords meeting to take place in a Warsaw Pact country. Regrettably, the Communist Government of Hungary has instead chosen this occasion to once again make a mockery of the Helsinki human rights agreements.

As a member of the Commission on Security and Cooperation in Europe, I rise today to express my deep concern over the actions of the Government of Hungary in banning the activities of private, nongovernmental organizations who are represented at the Budapest Cultural Forum. By preventing the International Helsinki Federation on Human Rights, which includes the U.S. organization Helsinki Watch, from holding a public symposium on culture in Europe at the forum, the Hungarians have violated agreements they made to ensure the open and unrestricted exchange of views at this cultural conference.

While Hungary's human rights policies may not be as repressive as some of their east bloc neighbors, it must be noted that Hungarian performance over the past few years has dramatically worsened. Hungarian citizens who, in conformity with the Helsinki Final Act, speak out for human rights and express their independent views on other issues are harassed. This harassment takes the form of denial of permission to travel abroad, periodic apartment and automobile searches, short-term detention for questioning, and monetary fines. The Government has been successful in forcing Hungarian intellectuals, writers, and artists to carry on their work in a much less open manner. As a result, Hungarian citizens have had a much more difficult time in obtaining independently published materials.

The names of Hungarians who have been victimized by these repressive actions, many of whom were simply asking their Government to comply with the Helsinki accords it had signed, are too lengthy to list. In light of these incidents, the Helsinki Commission has been watching Hungarian actions closely to ensure that private citizens and nongovernmental organizations would have access to the country and the conference site and would be permitted to participate in CSCE activities and organize seminars, exhibits, and press conferences. The decision of the Hungarian Government to ban the cultural symposium organized by the International Helsinki Federation for Human Rights is lamentable and exposes the myth of greater freedom of cultural expression in Hungary for what it is.

This action will certainly affect next year's review of most-favored-nation status for Hungary. As a member of both the Finance Committee and the Helsinki Commission, I am deeply concerned over the continuing deterioration of human rights in Hungary. At this year's MFN hearings, we continued to insist on further progress on human rights in Hungary in the next 12 month period; 3 months later, these new developments are discouraging and will certainly be a factor in assessing Hungary's future access to MFN.

Hungary is, however, only one of a number of signatory states that are violating the spirit and the letter of the Helsinki Final Act. Indeed, in a number of instances, the pattern has been one not of progress but of regression. In the Soviet Union and its Warsaw Pact allies, governmental restrictions on the free flow of information and culture have intensified; churches, cultural monuments, and other symbols of minority cultures have been destroyed; limitations on the use of native languages and cultural facilities have increased; histories have been rewritten; persons who criticize these developments have been harshly persecuted; and in at least one instance, an effort is underway to end the existence of a national minority by forcing it to change its ethnic attributes.

As members of the Senate, as Helsinki Commissioners, and as human beings, we must protest these violations of basic human rights as well as the recent action of ther Hungarian Government in banning activities at the Budapest Cultural Forum and continue to press for full compliance with the compliance with the Helsinki Final Act.

Mr. WALLOP. Mr. President, I would like to address the important subject of the Helsinki accords on Security and Cooperation in Europe [CSCE], which as you know, were signed by 35 nations in West and East 10 years ago. The basic idea of these international agreements was to reduce political and military tensions between the countries of NATO and Western Europe and the countries of the Warsaw Pact and the Soviet bloc. Since the Helsinki accords were signed back in 1975, there has been an ongoing series of review meetings and international conferences held by the signatory states to review what progress, if any, has been made in achieving the lofty goals of the accords.

This week, the first Helsinki CSCE meeting ever to be held behind the Iron Curtan—is that not by itself a comment on Soviet commitment?—opened in Budapest, Hungary. Many in the West, especially human rights groups and groups hopeful that meaningful reductions in East-West tensions might be possible, waited expectantly for the opening of the Budapest meeting—the Budapest Cultural Forum. They hoped for a miracle at Budapest. What is that hope? It is that at Budapest the Soviet Union and its client states might display some sign of goodwill toward the Helsinki process in this season of arms control negotiations and preparations for President Reagan's summit with Gorbachev next month.

And what has happened? Our U.S. Helsinki Watch Group, a part of the the International Helsinki Federation, traveled all the way to Budapest, Hungary, only to be stymied by the Communist government there. Our U.S. Helsinki watchers were not even allowed access to the hotel conference rooms where the Cultural Forum meetings are taking place. Naturally our Ambassador protested. Our Ambassadors always do. Just as naturally the Hungarian Government went right ahead and issued their statement anyway that said that no activities of the federation group would be permitted at any time or place. I ask you, is this the signal of good will from the East bloc that the eternal optimists had hoped for? Of course not. But, Mr. President, I am not surprised. There was never any reason for hope but hope itself. These are not new Com-

munists. Should the American people be surprised? Is this international fiasco at the Budapest Cultural Forum any different from what we can expect from the Soviet Union and its client states in the world today? Absolutely not. Give them credit for consistency and give us credit for the same. They are predictable in their intransigence toward release at any level of their totalitarian grip on information, human rights, and imperialism. We are predictable for one thing: Naivete.

Mr. President, let me say that I am not caught by surprise by this fiasco at Budapest. Nor should anyone be. The behavior of the Hungarian Government is perfectly consistent with the behavior of the East bloc in general toward the Helsinki accords and toward the whole CSCE process in the past 10 years. What is that behavior? It is to make a mockery of them.

In the Helsinki accords the East agreed to respect human rights and to allow emigration and family reunification. They have not done so. In the Helsinki accords, the East agreed to build confidence between the Warsaw Pact and NATO. They have not done so. In the Helsinki accords, the East bloc agreed to a freer flow of information, persons, ideas, and freedoms which we in the West take for granted. In the end they would have none of it. They have locked up, tortured, and persecuted their own Helsinki Watch committees. They blame the Helsinki process for the emergence of groups, like Solidarity in Poland, which they will go to any extreme to suppress. In the final analysis, the East would have no part of the real Helsinki process.

The East-bloc countries and the Soviet Union attend the Helsinki followup meetings for one essential purpose—to mislead and lull the West into a false sense of comfort. Comfortable that the East bloc will behave according to our definitions of civilized and cooperative. Comfortable that we can believe they can be trusted to conform to Western standards on human rights and essential freedoms. Comfortable that they will notify us of their major troop movements in Central Europe. We know they have violated this provision of the Helsinki accords repeatedly.

Mr. President, I must question the wisdom and the utility of continuing U.S. participation in these Helsinki CSCE followup meetings. The fiasco at the Budapest Cultural Forum is but one more blatent example of the attitude of the East bloc toward those meetings and toward the whole Helsinki process in general. The United States should consider stopping its participation in this process. We should not agree to being made fools by the Soviet Union and its clients states. At the very least, the United States delegation should walk out when confronted by a situation as ridiculous as that which took place at the CSCE-sponsored Budapest Cultural Forum in Hungary this week.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 2:29 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 92. Joint resolution to designate October 1985 as "National Foster Grandparents Month".

The message also announced that the House has passed the bill (S. 1042) to authorize certain construction at military installations for fiscal year 1986, and for other purposes, with an amendment; it insists upon its amendment to the bill, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. ASPIN, Mr. DELLUMS, Mr. MONTGOMERY, Mr. HUTTO, Mr. LEATH of Texas, Mr. DICKINSON, Mr. WHITEHURST, and Mr. KRAMER as managers of the conference on the part of the House.

The message further announced that the House has agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2959) making appropriations for energy and water development for the fiscal year ending September 30, 1986, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 3, 13, 15, 20, 23, and 24 to the bill, and has agreed thereto; and it recedes from its disagreement to the amendments of the Senate numbered 22, 32, 34, and 46 to the bill, and has agreed thereto, each with an amendment in which it requests the concurrence of the Senate.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 195. Concurrent resolution commemorating the fiftieth anniversary of the Congressional Staff Club.

ENROLLED BILL AND JOINT RESOLUTION SIGNED

At 4:05 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bill and joint resolution:

H.R. 2174. An act to provide for the transfer to the Colville Business Council of any undistributed portion of amounts appropriated in satisfaction of certain judgements awarded the Confederated Tribes of the Colville Reservation before the Indian Claims Commission; and

H.J. Res. 386. Joint resolution to designate November 24, 1985, as "National Day of Fasting to Raise Funds to Combat Hunger."

The enrolled bill and joint resolution were subsequently signed by the President pro tempore [Mr. THURMOND].

MEASURE REFERRED

The following concurrent resolution was read, and referred as indicated:

H. Con. Res. 195. Concurrent resolution commemorating the fiftieth anniversary of the Congressional Staff Club; to the Committee on the Judiciary.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, October 1, 1985, she had presented to the President of the United States the following enrolled bill:

S. 1349. An act to provide for the use and distribution of funds awarded in docket 363 to the Mdewakanton and Wahpekute Eastern or Mississippi Sioux before the United States Court of Claims and Claims Court.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1893. A communication from the Secretary of the Interior transmitting, pursuant to law, the Alaska National Interest Lands Conservation Act annual report; to the Committee on Energy and Natural Resources.

EC-1894. A communication from the Deputy Associate Director for Royalty Management, Department of the Interior, transmitting, pursuant to law, a report on four refunds of excess royalty payments; to the Committee on Energy and Natural Resources.

EC-1895. A communication from the Deputy Chief of Staff for Installations and Logistics, Department of the Navy, transmitting, pursuant to law, the annual report on the retirement plan for civilian employees of the Marine Corps Exchanges, Recreation Funds, Clubs, Messes, and Exchange Service; to the Committee on Governmental Affairs.

EC-1896. A communication from the Chairman of the Consumer Product Safety

Commission transmitting, pursuant to law, the 1984 Government in the Sunshine Act report; to the Committee on Governmental Affairs.

EC-1897. A communication from the Secretary of Commerce transmitting a draft of proposed legislation to amend the Bankruptcy Reform Act of 1978; to the Committee on the Judiciary.

EC-1898. A communication from the Director of the National Science Foundation transmitting, pursuant to law, the 1983 report on Federal support to universities, colleges, and selected nonprofit institutions; to the Committee on Labor and Human Resources.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-467. Joint resolution adopted by the Legislature of the State of California; to the Committee on Finance.

"ASSEMBLY JOINT RESOLUTION No. 17

"Whereas, The prompt, efficient, and accurate collection and reporting of state use taxes by persons selling tangible personal property in this state are goals of vital concern to both the government of the United States and the government of the State of California; and

"Whereas, The accomplishment of those goals would be greatly facilitated by enacting federal legislation which would overturn the holding of National Bellas Hess, Inc. v. Department of Revenue of the State of Illinois, 386 U.S. 753, 18 L. Ed. 2d 505 (1967); now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature respectfully memorializes the President and the Congress of the United States to enact federal legislation which would reverse the holding in National Bellas Hess, Inc. v. Department of Revenue of the State of Illinois and thereby allow states to require mail-order houses to collect and report state use taxes; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-468. Joint resolution adopted by the Legislature of the State of California; to the Committee on Finance.

"ASSEMBLY JOINT RESOLUTION No. 4

"Whereas, Chapter 853 of the Statutes of 1984 amended the California Personal Income Tax Law and Bank and Corporation Tax Law to make permanent the allowance of a deduction for the cost of repairing or remodeling any building, facility, or transportation vehicle owned or leased by the taxpayer in order to permit handicapped or elderly individuals to enter or leave, to have increased access to, or to have more effective use of, that building, facility, or transportation vehicle; and

"Whereas, Federal law currently allows a similar deduction but the deduction applies only to taxable years beginning before January 1, 1986, and does not apply to homeowners or to the installation of emergency egress or safe area refuge systems; and

"Whereas, There are not a sufficient number of dwellings accessible to physically handicapped and elderly persons and these persons have no alternative but to modify their existing dwellings to provide this access; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to amend the Federal Income Tax Law to include a deduction similar to that allowed by Chapter 853 of the Statutes of 1984 in order to encourage businesses to retrofit their buildings to provide access for handicapped persons, to enable elderly and handicapped homeowners to recover a portion of necessary costs incurred by them in modifying their dwellings to provide this access, and to encourage the installation of emergency egress or safe area refuge systems; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-469. A resolution adopted by the County Legislature of the County of Monroe, New York relating to medicare; to the Committee on Finance.

POM-470. Joint resolution adopted by the Legislature of the State of California; to the Committee on Foreign Relations.

"ASSEMBLY JOINT RESOLUTION No. 52

"Whereas, An increasing number of scenarios, including misjudgment, miscalculation, misunderstanding, possession of nuclear arms by a terrorist group or a state-sponsored threat, could precipitate a sudden increase in tensions and the risk of a nuclear confrontation between the United States and the Union of Soviet Socialist Republics (Soviet Union), situations that neither side anticipated, intended, or desired; and

"Whereas, The current communication links represent equipment of the 1960's and as such are relatively outdated and limited in their capabilities; and

"Whereas, President Reagan, responding to Congressional initiatives, proposed the establishment of additional and improved communication links between the United States and the Soviet Union and other measures to reduce the risk of nuclear confrontations and has initiated discussions at a working level with the Soviet Union covering the following:

"(a) The addition of a high-speed facsimile capability to the direct communication link (hotline).

"(b) The creation of a joint military communication link between the United States Department of Defense and the Soviet Union Defense Ministry.

"(c) The establishment by the governments of the United States and the Soviet Union of high-rate data communication links between each nation and its embassy in the other nation's capital; and

"Whereas, United States Senators Sam Nunn (D-Georgia), John Warner (R-Virginia), and Bill Bradley (D-New Jersey) sponsored an amendment to the 1985 Department of Defense Authorization proposing the establishment of United States and Soviet Union Crisis Control Centers, which was adopted by the United States Senate by a vote of 82-0; and

"Whereas, The establishment of crisis control centers in Washington and Moscow could reduce the risk of increased tensions and nuclear confrontations and accidental nuclear war, thereby enhancing the security of both the United States and the Soviet Union; and

"Whereas, These centers could serve a variety of functions including the following:

"(a) Discussing procedures to be followed in the event of possible incidents involving the use of nuclear weapons by third parties.

"(b) Maintaining close contact during nuclear threats or incidents precipitated by third parties.

"(c) Exchanging information on a voluntary basis concerning events that might lead to the acquisition of nuclear weapons, materials, or equipment by subnational groups.

"(d) Exchanging information about military activities of the United States and the Soviet Union which might be misunderstood by the other party during periods of mounting tensions.

"(e) Establishing a dialog about nuclear doctrines, forces, and activities; and

"Whereas, The continuing and routine implementation of these various activities could be facilitated by the establishment within each government of facilities, organizations, and bureaucratic relationships designated for these purposes, such as risk reduction centers, and by the appointment of individuals responsible to the respective head-of-state with responsibilities to manage these centers; and

"Whereas, The establishment of crisis control centers would, by reducing the risk of accidental nuclear war, promote the public health and safety of every Californian, in each of our cities and counties; and

"Whereas, The establishment of these United States and Soviet Union Joint Crisis Control Centers is more likely to occur upon a showing of broad public support for them; now, therefore, be it

Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California commends the President for his announced support for these confidence-building measures and for his initiation of negotiations which have occurred, and urges the President to pursue negotiations of these measures with the government of the Soviet Union, and to add to these negotiations the establishment of crisis control centers in both nations; and be it further

Resolved, That the Legislature encourages each city and county in California to join in this endeavor to support the creation of the United States and Soviet Union Crisis Control Centers, especially by passing a similar resolution endorsing the creation and by sending money (up to ten cents ($0.10) per resident) to the President to be held in trust for the support of the centers, the money to be raised either by initiating a public fund drive within each jurisdiction or by appropriation; and be it further

Resolved, That the Legislature encourages the people of California to enlist themselves, their families, friends, neighbors, and colleagues in this endeavor to show the President and Congress that there is broad public support for the establishment of crisis control centers; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to each city and county in California."

POM-471. Joint resolution adopted by the Legislature of the State of California, to the Committee on Governmental Affairs.

"ASSEMBLY JOINT RESOLUTION No. 16

"Whereas, Women and their basic socioeconomic concerns need coordinated representation in the executive branch of our national government; and

"Whereas, Women and their socioeconomic concerns are also not adequately represented in Congress, since only a few of the proposals to prevent the expanding poverty of women have become law; and

"Whereas, Women's economic and social concerns are not adequately dealt with by any official oversight mechanism on the national policymaking level to prevent the documented and growing trend called the feminization of poverty; and

"Whereas, Large numbers of women of all ages who are classified as dependents so often are dependent on absent providers; and

"Whereas, Most women take the responsibility of being the primary care providers for their children and their elderly parents; and

"Whereas, The stability of our society's future is at a serious risk due to the deprivations endured by so many children in poverty; and

"Whereas, since it is estimated that two out of three adults in poverty are women and since the United States government lacks any comprehensive national policy that addresses those women's economic issues that would provide some measure of income and health care security, especially as these problems relate to single parents and older women—adult groups that constitute a disproportionately high percentage of the nation's poor; now, therefore, be it

Resolved by the Assembly and the Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to enact legislation which will establish a Federal Council on Women to operate as an independent agency and to function as an oversight body on matters relating to the feminization of poverty; and be it further

"Resolved, That:

"1. The Federal Council on Women perform the following functions designed to combat the growing feminization of poverty trend:

"(a) Advise and assist the President, the Congress, and the Cabinet by reviewing proposed and existing laws and regulations related to the special needs of women.

"(b) Review and evaluate on a continuing basis federal policies for a national voice on behalf of women by initiating policy recommendations.

"(c) Inform the public about the problems and needs of those women in poverty by collecting and disseminating information.

"(d) Provide public forums for discussing antipoverty measures for the disproportionately large numbers of indigent females.

"(e) Serve in an advisory capacity by initiating policy recommendations that would reduce the numbers of indigent females of all ages.

"2. Membership on the Federal Council on Women shall be comprised of 15 people with three members each appointed by the President and the Majority and Minority Leaders of both Houses of Congress. Each appointing authority shall name at least one person who represent a state commission on the status of women.

"3. Until Congress enacts this proposed legislation, the President may wish to establish by executive order a Federal Council on Women following the guidelines proposed in this legislation; and be it further

"Resolved, That the Chief Clerk of the Assembly is directed to transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM—472. A resolution adopted by the Senate of the State of Pennsylvania; to the Committee on Governmental Affairs.

"RESOLUTION

"Whereas, The Slovak-Americans are the second largest Slavic ethnic group in the United States; and

"Whereas, Slovaka came to the United States to escape cruel oppression and religious persecution, and worked long and hard in some of our most important industries such as steel and coal mining, helping to build America into a great industrial power; and

"Whereas, Slovak-Americans have played significant roles in American history; and

"Whereas, Father Joseph Murgas, pastor of the Sacred Heart Slovak Church, Wilkes-Barre, Pennsylvania, for 35 years in the early part of this century, is an excellent example of a Slovak-American who made a major contribution, not only in the development of the United States, but to world history, as well; and

"Whereas, Father Murgas, who was born February 17, 1864, in Slovakia and died May 11, 1929, in Wilkes-Barre, is considered by many to be the co-inventor with Marconi of the modern radio; and

"Whereas, Father Murgas conducted one of the first successful transmissions of a message by wireless on November 23, 1905, in Wilkes-Barre; and

"Whereas, The Wilkes-Barre Murgas Amateur Radio Club will reenact that successful transmission on the 80th Anniversary of the event, November 23, 1985; and

"Whereas, The United States Postal Service has honored numerous groups and individuals for their contributions to the United therefore be it

"Resolved, That the Senate designate the month of November as "Slovak Heritage Month" in Pennsylvania, recognize the achievements of the brilliant inventor Father Joseph Murgas of Wilkes-Barre, Pennsylvania, and the Citizen Stamp Advisory Committee of the United States Postal Service to issue a stamp commemorating Slovak heritage and carrying the likeness of Father Murgas; and be it further

"Resolved, That copies of this resolution be transmitted to the President of the United States, to the presiding officers of each house of Congress, to each member of Congress from Pennsylvania, and to Mr. Belmont Faries, Chairman, Citizen Stamp Advisory Committee of the United States Postal Service."

POM-473. Joint resolution adopted by the General Assembly of the State of Tennessee; to the Committee on the Judiciary.

"HOUSE JOINT RESOLUTION No. 295

"Whereas, the 1st Congress of the United States of America, at its first session, by a two-thirds (⅔) majority of both Houses, made the following proposition to amend the Constitution of the United States of America in the following words, to wit:

"Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, two-thirds of both Houses concurring that the following (article) be proposed to the legislatures of the several states, as (an amendment) to the constitution of the United States, . . . which (article), when ratified by three-fourths of the said legislatures, to be valid to all intents and purposes, as part of the said Constitution,

"ARTICLE

"No law varying the compensation for the services of the Senators and Representatives shall take effect, until an election of Representatives shall have intervened.

"Now, therefore, be it resolved by the House of Representatives of the Ninety-Fourth General Assembly of the State of Tennessee, the Senate concurring, That the proposed amendment to the Constitution of the United States of America quoted in the preamble of this Resolution is ratified.

"Be it further resolved, That certified copies of this Resolution be forwarded by the Secretary of State of Tennessee to the Governor of Tennessee; to the Administrator of General Services, Washington, D.C.; and to the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States."

POM-474. A resolution adopted by the Council of the City of La Porte, Texas, relating to the Federal Fair Labor Standards Act; to the Committee on Labor and Human Resources.

POM-475. A resolution adopted by the Douglas County Board of Supervisors relating to the Fair Labor Standards Act impact on State and local governments; to the Committee on Labor and Human Resources.

POM-476. Joint resolution adopted by the Legislature of the State of California; to the Committee on Commerce, Science, and Transportation.

"ASSEMBLY JOINT RESOLUTION No. 25

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectively memorializes the Congress of the United States to require that a notice be printed on all advertisements for the purchase and sale of South African Krugerrands to the effect that the United States has presently imposed an arms embargo on South Africa due to its racial policies; and be it further.

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-477. A resolution adopted by the Village of Calument Park, Illinois, supporting the continued use of tax exempt bonds for important public purposes; to the Committee on Finance.

POM-478. Joint resolution adopted by the Legislature of the State of Oklahoma; to the Committee on the Judiciary.

RESOLUTION No. 1016

"Whereas, a resolution of the First Congress of the United States, proposing an amendment to the Constitution of the United States to restrict the effective date of any law which would change the amount of compensation received by United States Senators and Representatives, was approved

by the Congress, two-thirds (⅔) of each house concurring therein, in the following words:

"(An ARTICLE) in addition to, and Amendment of the Constitution of the United States of America, proposed by Congress, and ratified by the Legislatures of the several States, pursuant to the fifth Article of the original Constitution.

"Article. . . No law, varying the compensation for the services of the Senators and Representatives, shall take effect, until an election of Representatives shall have intervened."

"Now, therefore, be it resolved by the House of Representatives and the Senate of the 1st session of the 40th Oklahoma Legislature:

"Section 1. The amendment to the Constitution of the United States to restrict the effective date of any law which would change the amount of compensation received by United States Senators and Representatives, proposed by a resolution of the First Congress of the United States, is hereby ratified.

"Section 2. Pursuant to 75 O.S. 1981, Section 26.42, this resolution shall expire on December 31, 1995.

"Section 3. Duly authenticated copies of this resolution shall be transmitted to the Governor of the State of Oklahoma, to the President of the United States, to the Administrator of General Services of the United States, to the President Pro Tempore of the Senate of the United States, and to the Speaker of the House of Representatives of the United States."

POM-479. A resolution adopted by the Council of the City of Maui, Hawaii, relating to the Fair Labor Standards Act; to the Committee on Labor and Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources, with an amendment in the nature of a substitute and an amendment to the title:

S. 1570. A bill to amend the Fair Labor Standards Act of 1938 to exclude the employees of States and political subdivisions of States from the provisions of that act relating to maximum hours, to clarify the application of that act to volunteers, and for other purposes (Rept. No. 99-159).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. McCLURE, from the Committee on Energy and Natural Resources:

Anthony G. Sousa, of Hawaii, to be a Member of the Federal Energy Regulatory Commission for a term expiring October 20, 1988.

(The above nomination was reported from the Committee on Energy and Natural Resources with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. THURMOND, from the Committee on the Judiciary:

Stephen J. Markman, of Virginia, to be an Assistant Attorney General; and

Charles Fried, of Massachusetts, to be Solicitor General of the United States.

(The above nominations were reported from the Committee on the Judiciary with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HEINZ:

S. 1769. A bill to extend through June 30, 1990, the suspension of import duties on synthetic rutile; to the Committee on Finance.

By Mr. HATCH (for himself, Mrs. HAWKINS, and Mr. THURMOND):

S. 1770. A bill to amend the Federal Food, Drug, and Cosmetic Act to establish conditions for the export of drugs; to the Committee on Labor and Human Resources.

By Mr. CHILES:

S. 1771. A bill to amend the Elementary and Secondary Act of 1965 to provide grants to local educational agencies for dropout retention and recovery demonstration projects; to the Committee on Labor and Human Resources.

By Mr. HECHT (for himself and Mr. LAXALT):

S. 1772. A bill to authorize and direct the Secretary of the Interior to convey certain real property to the Pershing County Water Conservation District; to the Committee on Energy and Natural Resources.

By Mr. HATCH:

S.J. Res. 219. A joint resolution to designate the week of November 3, 1985, through November 9, 1985, as "National Humanities Week, 1985"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. EAGLETON (for himself and Mr. DANFORTH):

S. Res. 239. Resolution to recognize the outstanding accomplishments of the St. Louis Cardinals and the Kansas City Royals; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HATCH (for himself, Mrs. HAWKINS, and Mr. THURMOND):

S. 1770. A bill to amend the Federal Food, Drug, and Cosmetic Act to establish conditions for the export of drugs; to the Committee on Labor and Human Resources.

PHARMACEUTICAL EXPORT AMENDMENTS

Mr. HATCH. Mr. President, I am very pleased to send to the desk a set of amendments designed to bring reason to our country's laws on the export of unapproved pharmaceuticals, save American jobs, prevent the export of American biotechnology, and decrease our balance-of-payments deficit, without increasing the health risk to foreign consumers, without erecting trade barriers that invite retaliation, and without costing the taxpayer money.

These amendments correct an unintended mistake in our laws and allow the export—under controlled conditions—of drugs not yet approved by the Food and Drug Administration.

Under current law, drugs not approved by FDA for use in this country may not be exported. This policy is the result of an oversight in the drafting of the 1938 amendments to the Food, Drug and Cosmetic Act, and is not consistent with the way other unapproved substances or devices are handled under the act. While on its face the policy may seem praiseworthy, it is in fact illusory and pointless. To negate the impact of this law, all a manufacturer needs to do is to locate its production facilities overseas. Because no other country has a ban on unapproved exports, the manufacturer may ship from his foreign plant any drug he desires to any country that will permit its import.

And there are valid reasons for making such a move. Because foreign marketing approval often is obtained earlier than FDA approval, a U.S. manufacturer is faced with the bitter choice of either moving his production plant overseas, or simply not serving the foreign market, conceding that market to foreign competitors until FDA approval is received. Naturally it has become a common practice for plants to be built abroad. This sends to foreign shores jobs and capital investment which should remain here, and when the drug is approved in the United States the manufacturer then serves the U.S. market by importing the drug from the foreign plant, thereby worsening our balance-of-payments deficit.

Under our current misguided policy, then, we needlessly tax the American economy while giving foreign consumers no protection from exposure to unapproved drugs. What I proposed to do in the pharmaceutical export amendments is to keep jobs and investment at home and allow—under restrictions—the export of some pharmaceuticals not yet approved by the FDA.

Last year I introduced S. 2878 to correct the export problem. This bill was developed with help from many parties. It contained significant modifications addressing concerns over harmful drugs leaving our shores. I feel strongly that its approach was a sound one and was vindicated in testimony we heard in a June 5 committee hear-

ing this summer. However, in an attempt to gather the support of as broad a spectrum of my colleagues as possible, we have developed a three-tier proposal we are introducing today.

Under this proposal, drugs which have been banned could not be exported, as in S. 2878. But other drugs which have not yet been approved by FDA could be exported depending on the level of competence of the importing country's regulatory system. Unapproved drugs could be shipped to those countries with adequate, respected systems if import is legal under their laws. These are the first-tier countries. By definition these nations are fully capable of protecting their own citizens, and there is no reason for us to ignore their sovereign right to balance drug risks versus benefits according to their own circumstances.

The second-tier countries are those with systems not qualifying as first-tier, but which are capable of ensuring that information provided to physicians, pharmacists, and patients is consistent with the drug's labeling. Export to second-tier countries would be allowed only if a first-tier nation had approved the drug and its labeling were consistent with such approval. Thus, if a drug approved in Britain, a first-tier country, is exported from the United States to a second-tier country, we could be comfortable that the label of the drug as marketed at the corner pharmacy would not add uses beyond those in the British approval nor delete warnings or side effects imposed in the British approval.

All other nations fall into the third tier, to which export would not be authorized, except for so-called tropical disease drugs. Such drugs, while important abroad, treat diseases rare or not found in this country, and which would therefore not be submitted to FDA for approval.

There are additional provisions to give manufacturers a strong incentive to responsibly export only drugs in which they have full confidence. And the proposal would ensure that drugs exported to second- and third-tier countries are subject to testing, labeling, and quality control procedures which don't govern the same drug purchased now from another foreign source. So contrasted with present law, my proposal would be a step forward in health terms.

This bill will increase our exports by an estimated $400 to $500 million per year and add to our economy 8,000 to 10,000 jobs, jobs which otherwise will be located overseas. In light of our current trade crisis, this is good news.

Mr. President, I am delighted to be joined in these amendments by my colleagues on the committee, Senators HAWKINS and THURMOND.

I invite the support of all of my colleagues for this beneficial bill, and ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1770

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Pharmaceutical Export Amendments of 1985".

SEC. 2. Section 801 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 381) is amended by adding at the end thereof the following new subsecton:

"(e)(1)(A) A drug (including a biological product) intended for human or animal use which—

"(i) requires approval by the Secretary under section 505 or section 512, or

"(ii) requires licensing by the Secretary under section 351 of the Public Health Service Act or by the Secretary of Agriculture under the Act of March 4, 1913 (known as the Virus Serum Toxin Act),

before it may be shipped in interstate commerce to a country and which does not have such approval or license may, notwithstanding such sections or Act, be shipped by a person only to a country described in paragraph (2) if the drug meets the requirements of paragraph (3).

"(B) If a drug (including a biological product) described in subparagraph (A) is shipped by a person to a country in accordance with this subsection, such drug shall not be considered to be in violation of section 505 or 512, section 351 of the Public Health Service Act, or the Act of March 4, 1913 (known as the Virus Serum Toxin Act), and shall not be deemed to be adultered or misbranded for purposes of this Act.

"(2)(A) A drug described in paragraph (1) may be shipped to—

"(i) a country which is on a list established by the Secretary of each developed country that has an adequate governmental health authority to approve drugs including—

"(I) regulatory procedures sufficient to assure adequate scientific review of the animal and clinical studies relating to the safety and effectiveness of drugs before drugs are approved for marketing; and

"(II) trained personnel with sufficient scientific knowledge and experience to implement such procedures;

"(ii) a country which is on a list established by the Secretary of each developed country that has an adequate governmental health authority—

"(I) to assure that labeling information provided in such country to physicians, pharmacists, and patients is consistent with the labeling for the drug approved or licensed by a country on the list established by the Secretary under clause (i); and

"(II) which has procedures and personnel sufficient to implement the policies of that authority; or

"(iii) a country which is not included on a list established by the Secretary in clause (i) or (ii) if the Secretary determines that the shipment of such drug to such country is justified to promote the public health in such country because of the particular diseases and health conditions in such country which do not exist to a significant extent in the United States.

"(B) Within 90 days after the date of enactment of this subsection, the Secretary shall establish the lists of countries required by clauses (i) and (ii) of subparagraph (A).

"(C) The Secretary shall periodically revise the lists of countries established under clauses (i) and (ii) of subparagraph (A).

"(D) In establishing and revising the lists of countries under clauses (i) and (ii) of subparagraph (A), the Secretary—

"(i) may consult with experts in the field of drug regulation; and

"(ii) shall provide reasonable opportunity for public comment before such lists are established or revised.

"(3) A drug described in paragraph (1) may be shipped by a person to a country on a list established under clause (i) or (ii) of paragraph (2)(A) or a country described in clause (iii) of such paragraph only if—

'(A) the drug meets the requirements of subparagraphs (A) through (D) of subsection (d)(1);

"(B) the drug is not the subject of final action by the Secretary or the Secretary of Agriculture denying, withdrawing, or suspending approval or licensing or otherwise banning the drug on the basis of safety and effectiveness;

"(C) the drug is not the subject of a notice by the Secretary or the Secretary of Agriculture of a determination that the manufacture of the drug in the United States for shipment to a country is contrary to the public health and safety in the United States;

"(D) in the case of a drug to be shipped to a country on the list established under clause (ii) of paragraph (2)(A) or a country described in clause (iii) of such paragraph, the drug is the subject of—

"(i) a current application for exemption for investigational use from the approval or licensing requirements described in paragraph or licensing requirements described in paragraph (1)(A);

"(ii) an application for approval or licensing for a drug containing the same active ingredient as the drug which is to be exported; or

"(iii) a current master file containing all safety information required to be included in an application for an exemption for investigational use from the approval or licensing requirements described in paragraph (1)(A);

"(E) in the case of a drug to be shipped to a developed country on the list established under paragraph (2)(A)(ii)—

"(i) the drug has been approved or licensed by a country included on the list established under paragraph (2)(A)(i); and

"(ii) the labeling of the drug is consistent with the labeling for such drug approved or licensed by a country on the list established under paragraph (2)(A)(i); and

"(F) the person seeking to ship the drug has complied with paragraph (4) with respect to such drug.

"(4)) A person seeking to ship a drug pursuant to this subsection shall submit to the Secretary or the Secretary of Agriculture, at least sixty days prior to the date of first shipment of the drug to each country, a notice of intent to ship which—

"(A) identifies the drug to be shipped;

"(B) identifies the establishment where the drug has been or will be manufactured;

"(C) identifies the country or countries to which such person will ship the drug; and

"(D) in the case of a drug to be shipped to a country on the list established under paragraph (2)(A)(ii), includes a copy of the labeling described in paragraph (3)(E)(ii).

"(5) (A) Within 60 days after a person submits a notice with respect to a drug under paragraph (4), the Secretary or the Secre-

tary of Agriculture may determine that a proposed shipment of a drug not comply with all the requirements of this subsection. If the Secretary or the Secretary of Agriculture makes such a determination, the Secretary or the Secretary of Agriculture shall provide such person with a written statement specifying—

"(i) the deficiencies which such person must correct in order to enable such shipment to comply with such requirements; and

"(ii) that such person has a reasonable opportunity to correct such deficiencies within 60 days after receiving such statement.

"(B) If a person who has received a statement under subparagraph (A) does not correct the deficiencies specified in such statement within 60 days after receiving such statement, the Secretary or the Secretary of Agriculture may issue an order stating that the shipment of a drug with respect to which such statement was made does not comply with all the requirements of this subsection and prohibiting such shipment.

"(6)(A) Except as provided in subparagraphs (B) and (C), at any time after the shipment of a drug to a country is permitted under this subsection, the Secretary or the Secretary of Agriculture may determine that such shipment is unlawful because such shipment does not comply with any requirement of paragraph (3), and may issue an order to prohibit such shipment.

"(B) If, at any time after the shipment of a drug to a country is permitted under this subsection, the Secretary or the Secretary of Agriculture determines that such shipment does not comply with subparagraph (A) of paragraph (3) or subparagraphs (C) through (F) of such paragraph, the Secretary or the Secretary of Agriculture shall, prior to issuing an order with respect to such shipment under subparagraph (A) of this paragraph, provide the person who submitted the notice under paragraph (4) with respect to such shipment with a written statement which—

"(i) specifies such determination; and

"(ii) states that such person may, within 30 days after receiving such statement, take such action as the Secretary or the Secretary of Agriculture determines necessary to comply with the requirements of subparagraph (A), (C), (D), (E), or (F) of paragraph (3), as the case may be, in order to permit the shipment of such drug.

"(C) If the Secretary or the Secretary of Agriculture determines that the person who receives a statement under subparagraph (B) does not take the action required by the Secretary or the Secretary of Agriculture under clause (ii) of such subparagraph, or that such person takes an action which is inadequate to comply with the requirements of subparagraph (A), (C), (D), (E), or (F) of paragraph (3), as the case may be, the Secretary or the Secretary of Agriculture shall issue an order under subparagraph (A) with respect to such drug. Any such order shall be accompanied by a written statement—

"(i) specifying each requirement of paragraph (3) which has not been complied with relating to such shipment; and

"(ii) stating that the person who is the subject of such order will be provided, on request, with an opportunity for an informal hearing with respect to such order.".

SEC. 3. The list of countries initially established by the Secretary of Health and Human Services under section 801(e)(2)(A)(i) of the Federal Food, Drug, and Cosmetic Act (as added by section 2 of this Act) shall include the following countries unless the Secretary determines that a country should not be included on such list because the country does not have an adequate health authority to approve drugs:

Australia.
Austria.
Belgium.
Canada.
Denmark.
Federal Republic of Germany.
France.
Japan.
The Netherlands.
New Zealand.
Norway.
Sweden.
Switzerland.
The United Kingdom.

By Mr. CHILES:

S. 1771. A bill to amend the Elementary and Secondary Education Act of 1965 to provide grants to local educational agencies for dropout retention and recovery demonstration projects; to the Committee on Labor and Human Resources.

DROPOUT RETENTION AND RECOVERY ACT

● Mr. CHILES. Mr. President, I am pleased to introduce today legislation entitled "The Dropout Retention and Recovery Act of 1985." This bill is similar to S. 1525, introduced by Senator SPECTER and others. I am offering an alternative version of the measure to raise some issues that I hope the committee will consider in developing legislation for the full Senate. These issues include—

First, the need to focus on prevention and early intervention, particularly in the critical middle school, junior high, and early high school years;

Second, the need to insure that the $50 million we authorize for demonstration projects at the local level truly "buys" innovation and change;

Third, the need to address the drop out problem adequately in rural, as well as urban, areas, and particularly among high risk populations such as pregnant teens, migrants, and Indians that have unique needs; and

Fourth, the need for an adequate and thorough study of the problem at the national level and for involvement of the States in the development of a model standard definition of dropout.

Today I testified before the Education Subcommittee on this legislation and the great challenge we face in addressing our Nation's dropout problem. I would like to submit for the RECORD my statement to the subcommittee and a summary of the Dropout Retention and Recovery Act, and ask unanimous consent that they be printed following my remarks. Before doing so, I would like to commend my colleague from Pennsylvania, as well as Senators BRADLEY, CHAFEE, and the chairman and members of the Education Subcommittee for the leadership they are taking on this issue. I look forward to working with them to see that Congress enacts an effective program and provides funds to support these very vital demonstrations.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR LAWTON CHILES ON THE DROPOUT RETENTION AND RECOVERY ACT OF 1985

Mr. Chairman, I appreciate the opportunity to appear before the Subcommittee to discuss legislation to prevent school dropout. I want to commend you, the Ranking Member, other members of the Subcommittee, as well as Senators Specter, Chafee, and Bradley, for the leadership you are taking in addressing this national crisis.

I say "national crisis" because that is what we have when 28 percent, that is over one-fourth, of the Nation's 17- and 18-year-olds fail to complete high school. In some metropolitan areas, the drop out rate is over 50 percent.

We are not talking just about an urban problem. The drop out rate for migrants in my State is estimated between 60 percent and 90 percent, and those migrants still enrolled average only 75 days per year attendance. Nearly 30 percent of the Native Americans in the sophomore class of 1980 had dropped out by 1982. Hispanic students have the highest rate of dropping out: almost half the Hispanic youth who enter high school do not finish. The drop out rate for Blacks is almost one out of every three. By comparison, over 90 percent of the students in Japan complete secondary education.

What is the cost of our drop out rate to society and the economy? In 1981, over a third of high school dropouts were unemployed. While overall youth unemployment has risen dramatically over the years, the rise in unemployment among young Blacks is unprecedented: Only six of every 100 Black teenagers not in school are employed fulltime.

Between 1970 and 1983, 22 million new jobs were created. Only 19 percent of these jobs went to youth between the ages of 16 and 24. And a mere one-tenth of 1 percent of these new jobs went to Black male youth.

By 1982, men and women aged 25 and older who had not completed high school were earning about one-third less than those who had graduated. Once students leave school, the task of assisting them becomes much more expensive and difficult:

(1) Only about 20 percent of those who drop out will enter any type of training program.

(2) Only 14 percent of the male and 9 percent of the female dropouts will enter the General Equivalency Diploma (GED) program, and some will drop out of that.

(3) Many of the female dropouts will marry or have babies, lessening the likelihood of their returning to school. Last year, unwed teens gave birth to 650,000 babies, and around 90 percent of such teens in my state opt to keep their babies. When you couple the statistics on single teen parenthood, with their drop out rate and incidence of welfare dependency, you get a staggering picture of the social and economic costs.

(4) Finally, a 1978 study by the Department of Justice found that the majority of inmates in local jails lacked a high school diploma, with 59 percent of white inmates and 63 percent of Blacks having dropped out. Ironically, it costs a lot less to keep a student through three years at Miami Jackson Senior High School, than to keep an

inmate for a three-year sentence at Miami-Dade Correctional Center.

Many high school dropouts will become our next generation of illiterates. In his book, "Illiterate America," Jonathan Kozol estimates that adult illiteracy costs the Government $120 billion per year. Our population of 23 million adults who are functionally illiterate puts us 49th out of the 158 members of the U.N. in illiteracy. That results in 85 percent of juveniles who come before the courts being unable to read; 22 percent of adults being unable to write a check so a bank will take it; and an illiteracy rate among Black youth that will rise to 50 percent by 1990. We simply cannot afford this waste of human resources.

What is so urgent about the drop out issue at this juncture is the fact that our Nation has launched a broad-based educational reform effort. That drive for excellence must include effective means for the "at risk" student to meet higher standards, stiffer graduation requirements, and to pass basic competency tests. Otherwise, we are going to see more of the "at risk" students—those young people who are more than a year below grade level in achievement, those students who fail a course their first year of high school—opting out of the educational system.

So it is critically important the Subcommittee address this problem, and I want to commend the approach you are taking. We do need a working definition of drop out. We need a national information network on the scope of the problem, who is "at risk," and the effective programs states and localities can adopt. The demonstration approach is wise, in these times of fiscal restraint, to try out what works and to serve as an incentive and complement to what local schools are doing. The kinds of activities S. 1525 would support at the local level are on target. We know that things like getting kids and families more involved with the school and having mentors or role models develop one-on-one relationships with potential dropouts have the most likelihood of success.

I am today introducing legislation that is very similar to S. 1525. The name of my bill is also very similar: The Dropout Retention and Recovery Act. You know, there just are not a lot of synonyms for "keeping kids in school and bringing them back when they leave." In doing so, I wanted to present, in legislative form, some issues that I hope the Subcommittee will address in moving a bill for action by the full Senate.

I have testified before your Subcommittee before; I believe the last time was when practically everyone in the Senate, myself included, had math-science bill. I want to thank the Committee, by the way, for the masterful way you crafted that program to include everyone's concerns. This time, I am the Lone Ranger with an alternative. I think my proposal raises some important points about the structure and features of an effective Federal drop out prevention program.

As you have heard me say before, my interest as a member of the Budget and Appropriations Committees is in seeing that we can actually tell what the Federal dollar is "buying" in education. Funds are tight now and they are only going to get tighter. Fifty million dollars for dropout prevention has to really trigger some change to be effective. And in the long run, if the money is well spent, we will save. Or to look at it the other way, there is a T.V. ad with an auto mechanic who says, "You can pay me now, or you will have to pay me later." Drop out programs are like that—if we do not invest in keeping these kids in school now, we are going to pay a lot more later—in welfare, unemployment, reduced revenues, and lower productivity.

I would like to enter a factsheet in the record, which describes the different features of my bill. I would like to briefly summarize its thrust:

(1) The Dropout Retention and Recovery Act authorizes a phased, three-year study.

It doesn't seem like in one year we are going to learn much about the drop out problem that we do not already know. Plus, it seems important to involve the States up front in the development of a definition of dropout. We need to provide the states some very modest funds to share information on the scope of the problem from their enrollment data.

My bill also involves state advisory panels of educators, business, and community organizations serving the high risk populations in looking at the problem, its causes and solutions.

(2) My proposal directs two-thirds of the grants to urban areas and one-third to rural local education agencies.

We do have a concentration of dropouts in the cities. But we also have some really serious problems keeping kids in school in states like West Virginia. States with large Indian populations face tremendous challenges with their drop out rate. And I have already mentioned the problems encountered by districts serving migrants.

We should allow the state education agency to compete for funds to serve remote local education agencies that have significant drop out problems but lack the resources or ability to compete themselves. My bill would also permit locals to join together, where feasible, to compete for a demonstration program.

(3) The bill I am offering would allow local districts to craft a prevention project, or a project for youth who have already dropped out, or both, without restriction on how funds should be distributed among those priorities.

Research shows that it is awfully hard to get kids to come back to the system in which they failed. We should be willing to let local education agencies attempt such projects, but truly effective legislation to recover dropouts would require a joint program between education, job training, and community-based organizations. My bill does increase the involvement of business and entities serving dropouts at the State and local level.

(4) The Dropout Retention and Recovery Act streamlines the planning process, so the district applying can establish specific objectives for the project and define a yardstick by which to measure its success.

It clearly distinguishes what the program is aimed at—broad objectives like comprehensive identification and outreach, special services for teens, migrants and other high risk populations, etc.—from the activities for which funds can be used.

(5) Finally, my proposal increases the emphasis on the middle school and junior high levels. These are the years when the die is often cast as to whether a student will drop out or not.

It does so by having the local education agency target the high schools with the biggest drop out problem and the major "feeder schools" from which these students come. The range of activities districts can undertake is expanded to permit business partnerships for guaranteed jobs for high school graduates, collaboration with higher education institutions such as community colleges, and use of vocational education and extra curricular activities to retain potential dropouts.

I appreciate the consideration and action this Subcommittee has given legislation I have offered in the past. And I am hopeful that the measure I am introducing today will be a positive alternative on a number of issues you will be addressing in preparing legislation for the full Senate.

I am sure we agree on the magnitude of the problem and the idea that whether it is called Dropout Prevention and Re-Entry, or Dropout Retention and Recovery, a study and demonstration program for the local schools is just one piece of the comprehensive approach that must be taken. Dropout prevention, to be effective, has to start at the preschool level, with programs like Head Start and the new Even Start demonstration I have sponsored with Senator Chafee. It has to continue with basic skills instruction in Chapter I. It has to be supplemented with truly effective programs linking the schools, community-based organizations, and job training for high risk and out-of-school youth.

But our opportunity with this legislation is to focus on the critical middle school, junior high, and early high school years when a potential dropout begins to opt out, through truancy or failure, drugs or pregnancy, or delinquency that results in a push-out. Our goal for these children must not be simply to "hold 'em in school." It must be offering them the opportunity to succeed and excel by staying in school.

All too often after students drop out of school, they drop into a lot of other things. They "drop in" at unemployment lines, welfare offices, and prisons. Mr. Chairman, it's "grade time" for America's schools. Right now if we were graded on our ability to keep kids in school, I am afraid we would get an F or a D−. That is simply not good enough. The challenge is to work toward an A.

FEATURES OF THE CHILES' DROPOUT RETENTION AND RECOVERY ACT OF 1985

Focuses on early intervention to retain potential drop outs and enable them to succeed in school;

Provides for a three-year study by the Secretary of Education to—develop a model definition of drop out in the first year, establish a model dropout information collection and reporting system in the second year, and study the factors that contribute to dropping out and successful retention and recovery methods in the third year;

Involves state education agencies in development of the model definition of drop out, the information collection and reporting system, and the data on the factors and characteristics that are associated with dropping out;

Provides for state advisory panels on the drop out problem to assist the state in evaluating the nature and scope of the problem and broadly represent education, business, and entities serving high risk populations;

Distributes grants to local education agencies, consortia of LEA's, and state education agencies desiring to serve remote areas on a competitive basis related to the relative numbers and proportion of drop outs and the project's potential for success;

Directs ⅔ of the grants to urban areas and ⅓ to rural areas and requires regional balance in the distribution of the grants;

Streamlines the planning process for local education agencies to include—identification of the high risk, target population, description of the interventions to be used and their potential for success, development of annual goals, and criteria for determining the success of the program and progress toward meeting those goals;

Clearly distinguishes the broad objectives of the demonstration program—to develop effective programs for early identification, retention and recovery of high risk populations—from the range of activities for which funds may be used to achieve these objectives;

Focuses on the unique needs of high risk populations such as pregnant teens, migrants, and Indians;

Provides for evaluation of the success of various programs and interventions by the Department of Education; and

Allows local education agencies to develop dropout prevention programs, re-entry programs, or both without restrictions on the allocation of funds between such programs.●

By Mr. HECHT (for himself and Mr. LAXALT):

S. 1772. A bill to authorize and direct the Secretary of the Interior to convey certain real property to the Pershing County Water Conservation District; to the Committee on Energy and Natural Resources.

PERSHING COUNTY WATER CONSERVATION DISTRICT

● Mr. HECHT. Mr. President, today I am pleased to introduce, together with my colleague Senator LAXALT, a bill to convey some land in Nevada to the Pershing County Water Conservation District.

Approximately 50 years ago, the people of this part of Nevada worked with the Interior Department and the Congress to establish the Humboldt Reclamation Project. One component of that project was a piece of land known as the Battle Mountain Pasture. The costs of the original project have now been totally repaid to the U.S. Treasury. The communities are currently repaying some more recent expenses for raising the height of the Rye Patch Dam.

This bill simply transfers title to the Battle Mountain Pasture from the United States, to the people for the water project, and have been paying property taxes on that land for many years.

Since the people of this area have in essence bought and paid for this land, as well as paid taxes on it, I hope all my colleagues will agree it is entirely appropriate that they should enjoy ownership of that property. It is in this spirit that I invite the Senate to give this simple bill prompt and favorable attention.●

By Mr. HATCH:

S.J. Res. 219. A joint resolution to designate the week of November 3, 1985, through November 9, 1985, as "National Humanities Week, 1985"; to the Committee on the Judiciary.

NATIONAL HUMANITIES WEEK 1985

Mr. HATCH. Mr. President, this year marks the 20th anniversary of the establishment of the National Endowment for the Humanities. As the Endowment begins its third decade, it is appropriate for us to pause a moment in celebration of the Endowment's past achievements and to proclaim anew our commitment to its promotion of progress and scholarship in the humanities. An appropriate symbol is to establish the week of November 3-9, 1985, as "National Humanities Week."

The establishment of the National Endowment for the Humanities expressed the intention of Congress that the U.S. position of world leadership reflect our national achievement "in the realm of ideas and of the spirit" as well as our "superior power, wealth, and technology." We in Congress also understand that "Democracy demands wisdom and vision in its citizens."

Congress expected the Endowment to play a leading role in educating Americans about our heritage and traditions, and thus about our political freedoms and duties. Through the study of history, philosophy, and literature, we learn about our common cultural heritage, about what it means to be an American, and also about the diversity of human experience. Through this study in the humanities we become shareholders in our civilization and we gain the wisdom and vision that familiarity with the humanities can impart.

When I review the record of the Endowment's first two decades, I am impressed by three things. I am impressed by the vitality and achievements of the Endowment's programs, by its ability to stimulate private-sector funding for the humanities, and by the character of its leadership of the humanities community. Let me discuss each in turn.

Working in partnership with Congress, the Endowment has shown a remarkable degree of flexibility and foresight in designing its programs. Yet, it has avoided the creation of cumbersome and self-sustaining entitlement programs.

In 1969, a Division of Public Programs was added to assist in the design and implementation of quality humanities programs for the out-of-school public. In 1971, the State programs were established to ensure that a broad variety of humanities programs reached the citizens in each State. The highly successful Challenge Grant Program, to assist educational and cultural institutions plan for the stability, quality, and future financing of their humanities programs, was instituted in 1977.

Creative programming at the Endowment has continued into the 1980's. Because it wisely anticipated the need to strengthen precollegiate humanities instruction, the Endowment began the highly successful Summer Seminars for Secondary School Teachers in the fall of 1982. In 1983, the Endowment's Bicentennial Office was established to encourage renewed scholarly interest in and public reflection on the principles and foundations of our constitutional government. By late this past summer, the Bicentennial Office had awarded over 160 grants amounting to almost $11,500,000. To support a sustained, coherent attack on the escalating problem of deteriorating humanities materials, an Office of Preservation was created earlier this year. Just the other day, October 8, 1985, the Endowment announced a two-pronged initiative entitled "Understanding America" and "Understanding Other Nations." This initiative will promote the study of the language, literature, and culture of America and of foreign countries within the curriculum of U.S. secondary schools.

The Endowment has also had remarkable success in encouraging private-sector funding of the humanities. Since Federal dollars constitute only a small segment of humanities funding, expanding the contribution of the private sector is crucial. Taken together, the Challenge Grant and Project-Matching Programs have been highly successful in fulfilling Congress' mandate to the Endowment to "complement, assist, and add to programs for the advancement of the humanities by local, State, regional, and private agencies."

Finally, the Endowment has provided leadership for the humanities community as a whole. In many respects, this has been the Endowment's most notable achievement, since, as I just mentioned, the Endowment's support for humanities programs is dwarfed by that of private, State, and local entities. The Endowment has become a forceful and persistent advocate for the highest standards in teaching, scholarship, and general audience programming. It has done so primarily by the example it sets, year after year, in funding only the best of humanities projects.

Additionally, with minimal expenditure of the taxpayer's money, the Endowment has been at the forefront of progress in the humanities. For instance, last year NEH conducted an informal poll to determine if there was a consensus on the books every high school student must read before graduation. The results showed that there is, indeed, a cultural heritage we share as a nation and did as much as any other Endowment-supported activity to stimulate active discussion and a revival of interest in the humanities in schools and communities across the country. Just recently, the publication of "To Reclaim a Legacy" exhorted

colleges and universities to renew their commitment to offering a "living" and "enticing" humanities education to their students. By all accounts, this publication was a major stimulus for the curricular re-evaluation now being conducted on college campuses across the country.

The Endowment thus deserves congratulations on its achievements in all spheres—on its ability to formulate programs, to stimulate private-sector funding, and to lead by example. Ultimately, however, we measure the effect the Endowment has had on our lives not by examining its individual achievements, but by recognizing its constant pursuit of excellence in all that it supports, by applauding its ability to inspire us to come to terms with the best that our history and culture have to offer.

For these past 20 years, we owe the Endowment a debt of gratitude. For the future, we owe it to ourselves to sustain the traditions begun by this important Federal agency. Mr. President, recognizing November 3-9, 1985, as "National Humanities Week" is the appropriate way to begin.

ADDITIONAL COSPONSORS

S. 713

At the request of Mr. WILSON, the name of the Senator from Alabama [Mr. HEFLIN] was added as a cosponsor of S. 713, a bill to prohibit the interstate sale and transportation of drug paraphernalia.

S. 867

At the request of Mr. ROTH, the name of the Senator from New Mexico [Mr. BINGAMAN] was added as a cosponsor of S. 867, a bill to amend title XIX of the Social Security Act to provide coverage for hospice care under the Medicaid Program.

S. 1107

At the request of Mr. NUNN, the name of the Senator from Florida [Mrs. HAWKINS] was added as a cosponsor of S. 1107, a bill to authorize the Society of the Third Infantry Division to erect a memorial in the District of Columbia or its environs.

S. 1233

At the request of Mr. DOLE, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of S. 1233, a bill to amend the Animal Welfare Act to ensure the proper treatment of laboratory animals.

S. 1437

At the request of Mr. THURMOND, the name of the Senator from South Dakota [Mr. ABDNOR] was added as a cosponsor of S. 1437, a bill to amend the Controlled Substances Act to create new penalties for the manufacturing with intent to distribute, the possession with intent to distribute, or the distribution of "designer drugs," and for other purposes.

S. 1440

At the request of Mr. STEVENS, the name of the Senator from Oregon [Mr. HATFIELD] was added as a cosponsor of S. 1440, a bill to restrict smoking to designated areas in all U.S. Government buildings.

S. 1508

At the request of Mr. SPECTER, the name of the Senator from Illinois [Mr. DIXON] was added as a cosponsor of S. 1508, a bill to amend title 18, United States Code, to authorize the death penalty for first degree terrorist murder, and for other purposes.

S. 1618

At the request of Mr. GORE, the names of the Senator from Ohio [Mr. METZENBAUM], and the Senator from Iowa [Mr. GRASSLEY] were added as cosponsors of S. 1618, a bill to amend the Communications Act of 1934 to clarify policies regarding the right to view satellite-transmitted television programming, and for other purposes.

SENATE JOINT RESOLUTION 160

At the request of Mr. WILSON, the name of the Senator from Virginia [Mr. WARNER] was added as cosponsor of Senate Joint Resolution 160, a joint resolution designating the week beginning November 10, 1985, as "National Disabled Veterans Week."

SENATE JOINT RESOLUTION 179

At the request of Mr. KENNEDY, the name of the Senator from Michigan [Mr. RIEGLE] was added as cosponsor of Senate Joint Resolution 179, a joint resolution requesting the President of the United States to resume negotiations with the Soviet Union for a verifiable comprehensive test ban treaty.

SENATE JOINT RESOLUTION 195

At the request of Mr. KASTEN, the names of the Senator from Maryland [Mr. MATHIAS], and the Senator from Connecticut [Mr. WEICKER] were added as cosponsors of Senate Joint Resolution 195, a joint resolution to designate the week of October 20, 1985, through October 26, 1985, as "National Temporary Services Week."

SENATE JOINT RESOLUTION 207

At the request of Mr. WILSON, the names of the Senator from Washington [Mr. EVANS], and the Senator from Rhode Island [Mr. PELL], and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of Senate Joint Resolution 207, a joint resolution to designate November 1, 1985, as "National Philanthropy Day."

SENATE JOINT RESOLUTION 208

At the request of Mr. COCHRAN, the name of the Senator from Louisiana [Mr. JOHNSTON] was added as cosponsor of Senate Joint Resolution 208, a joint resolution to designate the week of October 27, 1985, through November 2, 1985, as "National Alopecia Awareness Week."

SENATE JOINT RESOLUTION 213

At the request of Mr. FORD, the name of the Senator from Indiana [Mr. LUGAR] was added as cosponsor of Senate Joint Resolution 213, a joint resolution to designate January 19-25, 1986, "National Jaycee Week."

SENATE CONCURRENT RESOLUTION 59

At the request of Mr. TRIBLE, the names of the Senator from Kansas [Mr. DOLE], and the Senator from Indiana [Mr. LUGAR], the Senator from South Carolina [Mr. HOLLINGS], and the Senator from Idaho [Mr. MCCLURE] were added as cosponsors of Senate Concurrent Resolution 59, a concurrent resolution expressing the sense of the Congress that food producers who permit gleaning of their fields and nonprofit organizations which glean fields and distribute the resulting harvest to help alleviate hunger should be commended for their efforts, and for other purposes.

SENATE RESOLUTION 239—RECOGNIZING THE ACCOMPLISHMENTS OF THE ST. LOUIS CARDINALS AND THE KANSAS CITY ROYALS

Mr. EAGLETON (for himself and Mr. DANFORTH) submitted the following resolution; which was considered and agreed to.

S. RES. 239

Whereas, the great State of Missouri is home to both the Kansas City Royals and the St. Louis Cardinals, and therefore on this day of October 17, 1985, is the Baseball Capital of the World;

Whereas, the World Series has not been better placed since 1944, when the St. Louis Browns faced the St. Louis Cardinals;

Whereas, both the Cardinals and the Royals have overcome great adversity, coming from behind to win in their opponents' ball parks, in their respective League Championships, and in so doing proved themselves great teams;

Whereas, these two teams will soon meet in the 1985 World Series;

Whereas, their performance demonstrates once more to the Nation and the world that the very best baseball in the world is played in two areas of the country—eastern and western Missouri;

Whereas, St. Louis, the Gateway to the West, is now the Gateway to the Best in the National League;

Whereas, Kansas City, the Heart of America, is now the Heart of the American League;

Whereas, the "Show Me" State of Missouri is now the Showcase of the World's Greatest Baseball Teams and Fans; and

Whereas, the two Senators from Missouri are incurable baseball fans, and are most pleased and proud of the accomplishments of the Royals and the Cardinals: Now, therefore, be it

Resolved, That the Senate recognizes the great accomplishments of the St. Louis Cardinals and the Kansas City Royals, wishes both the Cardinals and the Royals the best of luck, and looks forward to a great "Show-Me" Series.

AMENDMENTS SUBMITTED

HOUSING AND URBAN DEVELOPMENT AND INDEPENDENT AGENCIES APPROPRIATIONS ACT, 1986

DURENBERGER (AND OTHERS) AMENDMENT NO. 784

Mr. DURENBERGER (for himself, Mr. MOYNIHAN, Mr. HEINZ, Mr. BYRD, Mr. GRASSLEY, Mr. ROCKEFELLER, Mr. D'AMATO, Mr. NUNN, Mr. SPECTER, Mr. SIMON, Mr. KASTEN, Mr. HARKIN, Mr. LONG, Mr. ZORINSKY, Mr. FORD, and Mr. SASSER) proposed an amendment to the bill (H.R. 3038) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes; as follows:

On page 36, line 5, strike all after the numeral through line 11 and insert a period.

PROXMIRE (AND ARMSTRONG) AMENDMENT NO. 785

Mr. PROXMIRE (for himself and Mr. ARMSTRONG) proposed an amendment to the bill H.R. 3038, supra; as follows:

Beginning with line 9 on page 2, delete all through line 7 on page 6, and insert the following:

The amount of contracts for annual contributions, not otherwise provided for, as authorized by section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and heretofore approved in appropritions Acts, is increased by $356,445,540: *Provided*, That the budget authority obligated under contracts for annual contributions shall be increased above amounts heretofore provided in appropriation Acts by $499,000,000: *Provided further*, That any balances of authorities made available prior to the enactment of this Act which are or become available for obligation in fiscal year 1986 shall be added to and merged with the authority approved herein, and such merged amounts shall be made subject only to terms and conditions of law applicable to authorizations becoming available in fiscal year 1986: *Provided further*, That of the balances of authority made available prior to the enactment of this Act which are available for obligation in fiscal year 1986, $175,000,000 shall be available as an appropriation of funds for modernization of existing public housing projects pursuant to section 14 of the United States Housing Act of 1937, as amended (42 U.S.C. 14371): *Provided further*, That none of the merged amounts available for obligation in 1986 shall be subject to the provisions of section 213(d) of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 1439): *Provided further*, That all amounts of budget authority (including contract authority) equal to the amounts of such budget authority which are recaptured shall be rescinded.

MURKOWSKI (AND OTHERS) AMENDMENT NO. 786

Mr. MURKOWSKI (for himself, Mr. CRANSTON, Mr. THURMOND, Mr. DECONCINI, Mr. MITCHELL, Mr. ROCKEFELLER, Mr. DENTON, Mr. ABDNOR, Mr. BYRD, Mr. BINGAMAN, Mr. NICKLES, and Mrs. HAWKINS) proposed an amendment, which was subsequently modified, to the bill H.R. 3038, supra; as follows:

On page 38, line 8, strike out "$9,062,694,000" and insert in lieu thereof "$9,162,694,000".

NON-SMOKERS RIGHTS ACT OF 1985

CRANSTON AMENDMENT NO. 787

(Ordered referred to the Committee on Governmental Affairs.)

Mr. CRANSTON submitted an amendment intended to be proposed by him to the bill (S. 1440) to restrict smoking to designated areas in all U.S. Government buildings; as follows:

On page 2, strike out all from lines 12 through 17, and insert in lieu thereof:

(1)(A) Except as provided in subparagraph (B), the Administrator of General Services shall prescribe and implement such reasonable rules and regulations as may be necessary to designate smoking areas in any building under the jurisdiction and control of a department or agency of the United States.

(B) The Administrator of Veterans' Affairs, after consulting with the Administrator of General Services, shall prescribe and implement such reasonable rules and regulations as may be necessary to designate smoking areas in buildings under the jurisdiction of the Veterans' Administration and not under the control of the Administrator of General Services. In prescribing rules and regulations under the preceding sentence, the Administrator of Veterans' Affairs, upon recommendation of the Chief Medical Director of the Veterans' Administration, shall adopt policies consistent with the policies reflected in the rules and regulations prescribed by the Administrator of General Services under subparagraph (A) except to the extent that the Administrator of Veterans' Affairs determines, and so specifies in a written determination, that the adoption of such policies would be inconsistent with the proper execution of the statutory missions of the Veterans' Administration.

Mr. CRANSTON. Mr. President, I am today submitting amendment No. 787 to S. 1440 for printing in the RECORD and appropriate referral. S. 1440, the proposed Non-Smokers Rights Act of 1985, which was introduced by my good friend from Alaska [Mr. STEVENS], would, among other things, require the Administrator of General Services, to prescribe and implement regulations to designate smoking areas in any building under the jurisdiction of any executive branch department or agency. The amendment I am proposing would, with respect to facilities exclusively under the VA's jurisdiction, assign responsibility to the Administrator of Veterans' Affairs for developing and issuing, after consultation with the Administrator of General Services, regulations to designate smoking areas in those facilities.

Mr. President, in proposing this amendment, I am not expressing opposition to the thrust of S. 1440. Indeed, I support the purpose of the measure. However, I feel strongly that as to facilities under the VA's jurisdiction and not under GSA control—this covers all of the VA's 172 hospitals, 116 nursing homes, and 16 domiciliary facilities—the Administrator of Veterans' Affairs is the proper official to be assigned responsibility for actions affecting those facilities. In assigning this responsibility, the amendment I am proposing is designed to ensure that the Administrator of Veterans' Affairs acts in close cooperation with the Administrator of General Services and that the results of the VA Administrator's efforts generally follow the policies put in place by GSA except where that result would be inconsistent with the VA's statutory missions.

This same approach of recognizing the special statutory role and responsibility of the Administrator of Veterans' Affairs with respect to establishing policies for VA health-care programs but directing the Administrator to establish those policies, to the maximum extent feasible and consistent with the VA's statutory missions, in a way consistent with overall Government policies has been followed in other areas. Examples of such provisions of law are as follows: Informed consent of VA patients in section 4131 of title 38, United States Code, confidentiality of certain medical records in section 4132 of title 38, and nondiscrimination in the admission of alcohol and drug abusers to VA facilities in section 4133 of title 38.

Finally, Mr. President, I note that the approach I am advocating of assigning responsibility to an agency head for facilities exclusively under his or her sole jurisdiction but requiring the maximum feasible Governmentwide consistency would be applicable with reference to agencies other than the VA—for example, the Secretary of Defense for DOD facilities and the Attorney General for Bureau of Prison facilities. In my amendment, however, I have proposed a change only for the VA because of my responsibilities as the ranking minority member of the Veterans' Affairs Committee with respect to the operations and programs of that agency.

Mr. President, I look forward to working with the Senator from Alaska [Mr. STEVENS] with regard to this amendment to his legislation.

HOUSING AND URBAN DEVELOPMENT AND INDEPENDENT AGENCIES APPROPRIATIONS ACT, 1986

GARN AMENDMENT NO. 788

Mr. GARN proposed an amendment to the bill H.R. 3038, supra; as follows:

On page 49, line 13, insert "initially" after the word "estimates."

D'AMATO AMENDMENT NO. 789

Mr. GARN (for Mr. D'AMATO) proposed an amendment to the bill H.R. 3038, supra; as follows:

On page 4, line 9, insert after "1986:" the following: *Provided further,* That notwithstanding the immediately preceding ("merger") proviso, notwithstanding any requirements of section 235(c)(3) of the National Housing Act, as amended, and notwithstanding the proviso in this paragraph concerning rescission of recaptured budget authority, any balances of the contract authority and budget authority provided in the Second Supplemental Appropriations Act, 1984 (Public Law 98-396, 98 Stat. 1369, 1380) for the home ownership assistance program under section 235 of the National Housing Act, as amended (12 U.S.C. 1715z), for which the Secretary has made fund reservations prior to the date of enactment of this Act shall remain available for obligation without regard to any fiscal year limitation until such reserved budget authority is expended, and the Secretary of Housing and Urban Development shall have the authority to enter new contracts for assistance payments and to insure mortgages under section 235 until such reserved budget authority is expended notwithstanding any sunset date specified in the last sentences of section 235(h)(1) and section 235(m), respectively: *Provided further,* That notwithstanding the "merger" proviso, and notwithstanding the proviso in this paragraph concerning rescission of recaptured budget authority, any amounts of budget authority heretofore made available for obligation until September 30, 1986 for rental rehabilitation grants and development grants, pursuant to section 17(a)(1) of the United States Housing Act of 1937, as amended, shall remain available until such date:

On page 4, line 10, strike out the word "merged".

On page 4, line 14, after "1986" insert the following: (other than any such amounts for assistance payments contracts under section 235 of the National Housing Act and grants under section 17(a)(1) of the United States Housing Act.)

On page 4, strike out "except as provided in the foregoing proviso," on lines 22 and 23.

On page 4, line 24, insert after "authority)" the following: "under this paragraph".

On page 5, line 1, after "1986" insert the following: except such amounts provided for assistance payments contracts under section 235 of the National Housing Act of 1937, and for grants under section 17(a)(1) of the United States Housing Act of 1937,

GARN AMENDMENT NOS. 790 AND 791

Mr. GARN proposed two amendments to the bill H.R. 3038, supra; as follows:

AMENDMENT NO. 790

On page 46, line 6, strike out "$26,213,000" and insert in lieu thereof: "$26,877,000".

AMENDMENT NO. 791

On page 6, strike out lines 6 and 7, and insert in lieu thereof the following:

the first sentence of section 6(b) of the United States Housing Act of 1937 is amended by striking out "by more than 10 per centum" and inserting before the period at the end thereof "except that the Secretary shall increase such amount if the Secretary determines such action to be necessary to account for location or other factors related to a particular project".

LEAHY AMENDMENT NO. 792

Mr. LEAHY proposed an amendment to the bill H.R. 3038, supra; as follows:

After line 19, on page 18, add the following: ": *Provided further,* That of the funds provided to the states under the Safe Drinking Water Act, $300,000 shall be used for the purchase of essential equipment by state agencies."

STENNIS AMENDMENT NO. 793

Mr. STENNIS proposed an amendment to the bill H.R. 3038, supra; as follows:

On page 31, insert the following immediately after line 7:

MISSISSIPPI TECHNOLOGY TRANSFER CENTER

(a) The Congress finds that—

(1) section 9 of Mississippi Senate Bill No. 2984, 1985 Regular Session, which became effective on July 1, 1985, provides appropriations for constructing, furnishing and equipping a building and related facilities, to be known as the Mississippi Technology Transfer Center, at the National Space Technologies Laboratories in Hancock County, Mississippi; and

(2) operation and maintenance of the Mississippi Technology Transfer Center by the Federal Government is in the national interest.

(b) The Administrator of the National Aeronautics and Space Administration may—

(1) enter into an agreement with the State of Mississippi by which title to the Mississippi Technology Transfer Center shall be transferred to the government of the United States and by which such Center shall be operated by the government of the United States;

(2) accept title to such Center on behalf of the government of the United States; and

(3) after title has been transferred under paragraph (2) of this subsection, operate and maintain such Center, subject to the availability of appropriations for such purpose.

(c) It is the sense of Congress that, to the extent practicable, the National Space Technology Laboratories should apply its existing reimbursement policies to occupants of such Center.

ARMSTRONG (AND PROXMIRE) AMENDMENT NO. 794

Mr. ARMSTRONG (for himself and Mr. PROXMIRE) proposed an amendment to the bill H.R. 3038, supra; as follows:

On page 12, delete lines 3 through 8.

DOMENICI AMENDMENT NO. 795

Mr. DOMENICI proposed an amendment to the bill H.R. 3038, supra; as follows:

At the end of the bill add the following new section:

"SEC. 417. Except as otherwise provided in this section, each dollar amount contained in this Act, as amended, which is provided for nondefense discretionary programs and activities is hereby reduced per centum;"

DOMENICI (AND BOSCHWITZ) AMENDMENT NO. 796

Mr. DOMENICI (for himself and Mr. BOSCHWITZ) proposed an amendment to amendment No. 795 proposed by him to the bill H.R. 3038, supra; as follows:

Strike the words "per centum and insert in lieu thereof "per centum provided that this section shall not apply to the amount on page 2, line 16; *Provided further,* That, notwithstanding the provisions of 31 U.S.C. 6701-6724, payments to local governments are hereby reduced by 6.1 per centum; provided further, that, notwithstanding the provisions of 31 U.S.C. 6701-6724, in the fiscal year ending September 30, 1986, persons charged with administration of any provision of 31 U.S.C. 6701-6724, shall limit the value of any payments conferred by 31 U.S.C. 6701-6724 to amounts not in excess of the amount provided in this annual appropriation act, as amended by this section, and if the requirements of 31 U.S.C. 6701-6724 exceed the amount so provided, the payments shall be reduced to the extent necessary to stay within the amount provided in this annual appropriation act, as amended by this section."

GARN AMENDMENT NO. 797

Mr. GARN proposed an amendment to the bill H.R. 3038, supra; as follows:

On page 32, line 9, strike out "$72,000,000" and insert in lieu thereof "$73,000,000".

GARN (AND OTHERS) AMENDMENT NO. 798

Mr. GARN (for himself, Mr. RIEGLE, Mr. HOLLINGS, and Mr. GLENN) proposed an amendment to the bill H.R. 3038, supra; as follows:

On page 31, line 7, insert the following immediately before the period: ": *Provided further,* That, of such funds, $500,000 shall be available for the activities by the National Commission on Space, established by the National Aeronautics and Space Administration Authorization Act, 1985 (Public Law 98-361; 98 Stat. 422)".

On page 31, insert the following immediately after line 7:

NATIONAL COMMISSION ON SPACE

Section 204(c) of the National Aeronautics and Space Administration Authorization Act, 1985 (Public Law 98-361; 98 Stat. 430) is amended by striking "twelve" and inserting in lieu thereof "18".

GARN AMENDMENT NO. 799

Mr. GARN proposed an amendment to the bill H.R. 3038, supra; as follows:

On page 19, line 11, insert after the comma the following: "and not exceed $16,000 for travel expenses".

DURENBERGER AMENDMENT NO. 800

Mr. DURENBERGER proposed an amendment to the bill H.R. 3038, supra; as follows:

On page 17, line 9 after "1987:" insert the following: ": *Provided*, That $1,000,000 of the funds under this heading shall be available for a study of the use of fuel containing lead additives, or alternative lubricating additives, in gasoline engines which are used in agricultural machinery. The study shall analyze the potential for mechanical problems (including but not limited to valve recession) which may be associated with the use of other fuels in such engines. All testing of engines carried out for purposes of this study shall be reflective of actual agricultural conditions to the extent practicable including revolutions per minute and payload. The Secretary of Agriculture shall be consulted in the design of such study and shall be given opportunity to comment on the results which shall be reported to the Congress no later than December 31, 1986; *Provided further*, That, notwithstanding any other provision of law, no funds available under this Act or carried over from prior appropriations shall be used to provide exemptions for users or classes of users of motor fuels or otherwise modify the regulation of fuels or fuel additives for gasoline lead content made final on March 7, 1985 in volume 50, Federal Register 9386 and the regulation for banking of lead rights made final on April 2, 1985 in volume 50, Federal Register 13116."

IMPROVEMENTS IN FEDERAL COAL LEASING PROGRAM

McCLURE AMENDMENT NOS. 801 AND 802

(Ordered referred to the Committee on Energy and Natural Resources.)

Mr. McCLURE submitted two amendments intended to be proposed by him to the bill (S. 570) to amend the Mineral Lands Leasing Act of 1920 to improve the administration of the Federal Coal Leasing Program, and for other purposes; as follows:

AMENDMENT No. 801

On page 2 after line 6 insert a new section 2 as follows and renumber succeeding sections accordingly:

SEC. 2. Section 2(c) of the Mineral Lands Leasing Act (30 U.S.C. 202) is amended to read as follows:

"(c)(1) A common carrier railroad company or any company that controls, is controlled by, or is under common control with such company (hereinafter in this subsection referred to as a "railroad or affiliated company") may hold leases of coal deposits pursuant to this Act subject to the special conditions on (i) lease bidding in paragraph (2); (ii) lease holdings in paragraph (3); and (iii) transportation of leased coal in paragraph (4).

"(2)(A) No railroad or affiliated company shall be eligible to bid for a lease under this Act of coal deposits that are adjacent to coal deposits which (i) are in lands granted by the United States to such railroad or affiliated company or to a corporate predecessor thereof and (ii) are owned by such company (hereinafter in this paragraph referred to as "the federal lease") unless such company notifies the Secretary of its intention to bid by a date, established by regulation, prior to the sale of the federal lease. Whenever such a notification has been received and a tract for the federal lease has been delineated, the Secretary shall identify a potential mining unit containing the federal lease (hereinafter in this paragraph referred to as "the potential mining unit") and, if he finds that competition for the federal lease would be substantially enhanced thereby, shall require as conditions to the right of the railroad or affiliated company to bid when and if the federal lease is offered for sale, that, prior to the sale, the railroad or affiliated company shall—

"(i) upon request, make available at reasonable cost to any potential bidder for the federal lease any and all exploration data in the possession of the company concerning the extent and nature of the land-grant coal deposits within the potential mining unit; and

"(ii) agree that, if not the successful bidder for the federal lease, it will offer for lease the land-grant coal deposits owned by the company in the potential mining unit on reasonable terms which are mutually agreed to by the Secretary and the company: *Provided*, That, whenever the Secretary makes a finding of significant competition enhancement pursuant to this subparagraph (A), he shall promptly enter into good faith negotiations with the railroad or affiliated company to establish such terms and shall not offer the federal lease until such terms are established or he and the company mutually agree in writing that the negotiations have concluded and no agreement on terms can be reached; in which latter event, the railroad or affiliated company shall not be eligible to bid on the federal lease: *Provided further*, That the Secretary may determine without company concurrence that no agreement on terms can be reached if, after publishing a complete statement of his final offer to the company in the *Federal Register* and allowing 30 days for a response, the company has failed to agree to such terms.

"(B) After notification to the Secretary pursuant to subparagraph (A), a railroad or affiliated company may bid upon the federal lease without the conditions specified in said subparagraph whenever the Secretary does not make a finding of significant competition enhancement as provided in subparagraph (A), or when the railroad or affiliated company has a less than thirty percent interest in a joint venture which would own or control the federal lease, or where the coal deposits to be included in the federal lease—

"(i) constitute less than thirty-five percent of the recoverable reserves in the potential mining unit; or

"(ii) would be bypassed by or are required to maintain ongoing mining operations owned in whole or in part by the railroad or affiliated company and located in the potential mining unit; or

"(iii) are within or adjacent to the permit area of a mining operation that is owned in whole or in part by the railroad or affiliated company and that is operating, and has coal committed to a purchase, prior to the date of enactment of this subsection.

"(3) Any railroad or affiliated company shall be subject to the acreage restrictions of section 27(a)(1) of this Act and, within these limitations, shall not take, hold, or control at one time, whether acquired directly from the Secretary or otherwise under this Act, leases of coal deposits adjacent to land-grant coal deposits which were granted by the United States to such railroad or affiliated company or to a corporate predecessor thereof and are owned by such company in an aggregate of more than twenty-three thousand and forty acres.

"(4)(A) Whenever a railroad or affiliated company obtains a lease under this Act of coal deposits situated within the exclusive service area of such railroad company, the railroad company may not thereafter enter into a contract to transport coal produced from said lease or from a mining unit that includes said lease (hereinafter in this paragraph referred to as "the Contract") except as provided in this paragraph.

"(B) In addition to any filing which may be required by any other provision of law, the railroad company shall submit the Contract to the Secretary, together with copies of any formal transportation bid notice or request from the purchaser of the coal to be transported pursuant to the Contract (hereinafter in this paragraph referred to as "the purchaser") to which the railroad company responded and all formal transportation bids submitted by the railroad company in response to such notice or request. The railroad or affiliated company shall also submit to the Secretary its supply contract with the purchaser. Within five days of submission of the Contract, the Secretary shall publish in the Federal Register notice of such submission, including identification of the contracting parties, the affected lease, and the lessee. The Contract shall not become effective until thirty days after the date of such publication.

"(C) Within that same thirty-day period, any coal producer (hereinafter in this paragraph referred to as "the complainant") may file a complaint with the Secretary alleging that the Contract is in violation of law and that it prevented complainant from selling its coal to the purchaser in lieu of the coal to be transported pursuant to the Contract. The complainant shall submit with its complaint a copy of its coal supply bid to the purchaser and any other information necessary for the Secretary to make the disclosure determination provided for in this subparagraph. If the Secretary determines that (i) the purchaser requested and received a timely and responsive supply bid from the complainant, the terms of which were substantially similar to those of the supply contract, (ii) the complainant had no reasonable alternative transportation available for its coal except that supplied in whole or in part by the railroad company, (iii) the purchaser requested a bid from the railroad company to transport in whole or in part the complainant's coal, and (iv) the Contract and the bids, if any, submitted by the railroad company to transport the complainant's coal are not identical in all material respects, the Secretary shall disclose the submissions of the railroad or affiliated company to the complainant and the submissions of the complainant to the railroad company (and to its affiliated company, if the latter holds the lease to the coal to be transported pursuant to the Contract).

"(D) The submissions to the Secretary pursuant to this paragraph shall be disclosed by him only pursuant to subparagraph (C) and, except as provided in subparagraph (E), shall otherwise remain proprietary and not be released to any other

person or entity, any other provision of law notwithstanding.

"(E) The complainant may make use of the submissions of the railroad or affiliated company solely for the purpose of determining whether a cause of action may exist against the railroad or affiliated company and disclose such submissions solely for the purpose of prosecuting such cause of action. The railroad or affiliated company may make use of and disclose the submissions of the complainant solely for the purpose of defending such cause of action. No other disclosure or use may be made of such submissions."

AMENDMENT NO. 802

On page 2 after line 6 insert a new section 2 as follows and renumber succeeding sections accordingly.

● Mr. McCLURE. Mr. President, I am today submitting two amendments to S. 570, legislation to amend the Mineral Lands Leasing Act. The first amendment would repeal subsection 2(c) of the 1920 Mineral Leasing Act. That subsection is an antiquated provision of law which prohibits any company or corporation operating a common-carrier railroad from holding a permit or lease for coal deposits except for its own use for railroad purposes. The provision is long overdue for repeal. The Public Land Law Review Commission recommended its repeal in 1970. Successive administrations have recommended its repeal. The fears of anticompetitive actions were addressed fully in the 1976 Federal Coal Leasing Act amendments. In 1980, the Department of Justice specifically concluded that not only were there sufficient protections in existing law, but that the subsection itself operated as an impediment to competition.

The 1980 Justice Department report, which was prepared in connection with its responsibility to provide an annual assessment of competition in the coal industry under the Federal Coal Leasing Amendments Act of 1976, concludes:

Plainly, whatever the merits of a general prohibition on leasing to railroads in 1920, the broad sweep of section 2(c) is now an impediment to rather than a bulwark (sic) of competition.

And further that:

Competitive concerns embodied in section 2(c) could be handled on a case-by-case basis under the antitrust review procedure without the detrimental effect on competition that arises from prohibiting Federal coal leasing to all railroads.

Not only do the statements by Justice compel me to offer this amendment, but also an opinion and legal interpretation of 2(c) rendered by both the Interior and Justice Departments respectively. In that opinion and legal interpretation, it was determined that the barrier of section 2(c) also extends to companies that are separate from but affiliated with railroads as part of a corporate holding company structure.

The Congress is now faced with the necessity of reviewing the 1976 amendments to the Mineral Leasing Act. Three measures have already been introduced which will be the subject of hearings before the Subcommittee on Natural Resources Development and Production on October 22 and 24. It had not been my intention at the beginning of this year to complicate the important issues involved in those measures with the repeal of subsection 2(c). The repeal, however, does address a related issue and that is the proper and prudent development of this Nation's energy reserves. I recognize that there are strong feelings about the repeal of 2(c). Some of these concerns are honest.

Although I feel strongly that the provision is an anachronism and should be repealed at the beginning of the Congress, I did not reintroduce the same measure which Senator JACKSON and I had introduced during the 97th Congress and on which the Committee on Energy and Natural Resources held extensive hearings. Rather, at the outset of the year, I requested the concerned organizations—the railroads and the coal companies, as well as other interested groups—to sit down and discuss their concerns and determine if reform of the 2(c) prohibition could be accomplished rather than outright repeal. Quite frankly I have been surprised by how forthcoming and accommodating the railroad affiliates have been in attempting to lay a basis for discussion. I suppose I am not surprised, but I am certainly displeased, with the attitude of some in the industry who refuse to even discuss the subject.

I do not want the submission of this amendment to be misinterpreted by those who have honestly tried to develop a comprehensive reform which will eliminate the anticompetitive aspects of present law while ensuring that the railroads would not abuse their position in the future. I still believe that outright repeal is in the national interest and I fully agree with the conclusion of the Department of Justice in 1980 that the present law is anticompetitive. That may explain some of the opposition to repeal. I am willing to support reform and those who have spent so much time in trying to work out an acceptable compromise can be assured that they will have my full support.

I am submitting this amendment in this form because it does represent my position and so as not to prejudice the ongoing discussions of reform. I think that this subject should be raised and fully explored during our upcoming hearings and the introduction of this amendment will accommodate a full exploration of the issue.

The second amendment which I am submitting is a reform of section 2(c) and demonstrates how far the railroad affiliates have gone in attempting to address the various concerns which have arisen with respect to outright repeal. I want to emphasize that this is not a final product in any sense and does not represent the views of any organization. It does represent a working document which has been used to try to focus the discussion on the details of a compromise and avoid the useless sophistry which opponents have resorted to in an effort to prevent any consideration of section 2(c).

I am hopeful that those who in good faith have tried to work out a compromise will take advantage of the hearings which will be held next week to focus not only on the overall issue of repeal of 2(c) which is presented by my first amendment, but will also discuss the details of the reform of section 2(c) as set forth in my second amendment. I understand that some additional refinement of the reform proposal may be needed, but I would hope that the committee will be spared the same groundless litany which certain elements of the industry resort to whenever this subject is raised.

It is long past time to realize that we are no longer in 1920. Every major independent review of the continued need for section 2(c) has recommended its repeal—The Public Land Law Review Commission, the Linowes Commission, the Departments of the Interior and Justice, administrations both Democratic and Republican. It is long past time for the Congress to act.●

LEAHY AMENDMENT NO. 803

Mr. LEAHY proposed an amendment to the bill H.R. 3038, supra; as follows:

On page 32, line 6, increase the figure by $3,000,000.

LAUTENBERG (AND BRADLEY) AMENDMENT NO. 804

Mr. LAUTENBERG (for himself and Mr. BRADLEY) proposed an amendment to the bill H.R. 3038, supra; as follows:

On page 54, between lines 12 and 13, insert the following:

SEC. 417. Any funds previously appropriated for the purposes of construction grants under title II of the Clean Water Act shall be available for all projects for which such funding was initially available when such appropriations were made and not be limited to phases or segments of previously funded projects.

HEINZ AMENDMENT NO. 805

Mr. HEINZ proposed an amendment to the bill H.R. 3038, supra; as follows:

On page 13, between lines 5 and 6, insert the following:

NEIGHBORHOOD DEVELOPMENT DEMONSTRATION

For financial assistance and other expenses not otherwise provided for to carry

out the neighborhood development demonstration program pursuant to section 123 of the Housing and Urban-Rural Recovery Act of 1983 $2,000,000, to remain available until September 30, 1988.

DIXON (AND OTHERS) AMENDMENT NO. 806

Mr. DIXON (for himself, Mr. HEINZ, Mr. KERRY, Mr. MATSUNAGA, Mr. GORTON, Mr. SIMON, Mr. KENNEDY, and Mr. MOYNIHAN) proposed an amendment to the bill H.R. 3038, supra; as follows:

On page 24, line 15, strike out "$50,000,000" and insert in lieu thereof "$70,000,000".

On page 25, line 17, strike out "$50,000,000" and insert in lieu thereof "$70,000,000".

GORTON (AND OTHERS) AMENDMENT NO. 807

Mr. GORTON (for himself, Mr. MOYNIHAN, and Mr. MATSUNAGA) proposed an amendment, which was subsequently modified, to amendment No. 806 proposed by Mr. DIXON (and others) to the bill H.R. 3038, supra; as follows:

On page 1 of the amendment, strike out lines 3 and 4 and insert the following:

On page 24, line 18, before the period, insert ", and $5,000,000 to carry out a transition to independence demonstration".

Beginning with "the following" on page 24, line 20, strike out all through page 26, line 12, and insert in lieu thereof "titles VI and VII.".

At the end of the amendment, add the following:

At the end of the bill, add the following:

TITLE V—SHELTER PROGRAM: GENERAL PROVISIONS

SHORT TITLE

SEC. 501. The following titles may be cited as the "Homeless Housing Assistance Act of 1985".

DEFINITIONS

SEC. 502. For the purpose of this Act—

(1) the term "emergency shelter", as used in section 608(b) of this Act, means an entire facility, or that part of a facility, which is used or designed to be used to provide temporary housing to not fewer than twenty individuals;

(2) the term "homeless" means individuals who are poor and who have no access to either traditional or permanent housing;

(3) the term "local government" means a unit of general purpose local government;

(4) the term "locality" means the geographical area within the jurisdiction of a local government;

(5) the term "operating costs" means expenses incurred by State, local governments, and private nonprofit organizations operating transitional housing for the homeless under title VII of this Act with respect to—

(A) the administration, maintenance, minor repairs, and security of such housing;

(B) utilities, fuel, furnishings, and equipment for such housing;

(C) the conducting of the assessment required in section 705(a)(2) of this Act; and

(D) the provision of supportive services to the residents of such housing;

(6) the term "private nonprofit organization" means a secular or religious organization described in section 501(c) of the Internal Revenue Code of 1954 which is exempt from taxation under subtitle A of such Code, and which has an accounting system and a voluntary board, and practices nondiscrimination in the provision of assistance;

(7) the term "Secretary" means the Secretary of Housing and Urban Development;

(8) the term "shelter", as used in title II of this Act, means broadly the provision of protection from the elements for homeless individuals;

(9) the term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, or any territory or possession of the United States;

(10) the term "supportive services" means assistance to the residents of transitional housing in obtaining permanent housing, medical and psychological counseling and supervision, employment counseling, referral to job training, nutritional counseling, and such other services essential for establishing independent living as the Secretary determines to be appropriate. Such term includes the provision of assistance to the residents of transitional housing in obtaining other Federal, State, and local government assistance available for such person, including mental health benefits, employment counseling, referral to job training programs, and medical assistance; and

(11) the term "transitional housing" means a single- or multi-family structure suitable for the provision of housing and supportive services for not more than 15 homeless persons, who cannot presently live independently without supportive services in a supervised residential setting but who are believed capable of transition to independent living with 6 months of assistance in a stable environment.

TITLE VI—EMERGENCY FOOD AND SHELTER PROGRAM

EMERGENCY FOOD AND SHELTER PROGRAM NATIONAL BOARD

SEC. 601. (a) The Director of the Federal Emergency Management Agency shall, as soon as practicable after Septemer 30, 1985, constitute a national board for the purpose of carrying out an emergency food and shelter program.

(b) The national board shall consist of seven members. The United Way of America, the Salvation Army, the National Council of Churches of Christ in the United States of America, the National Conference of Catholic Charities, the Council of Jewish Federations, Inc., the American Red Cross, and the Federal Emergency Management Agency shall each designate a representative to sit on the national board.

(c) The representative of the Federal Emergency Management Agency shall chair the national board.

NATIONAL BOARD TRANSITION

SEC. 602. (a) The national board constituted by the Director of the Federal Emergency Management Agency, pursuant to section 601, shall continue to be authorized until March 30, 1986, and on such date, the personnel, property, records, and undistributed program funds of such national board shall be transferred to the national board constituted under subsection (b).

(b) On or before March 30, 1986, the Secretary of Housing and Urban Development shall constitute a national board for the purpose of carrying out an emergency food and shelter program. This national board shall consist of the same representatives, or their successors, of the same organizations as the national board constituted pursuant to section 601(b), except that the Secretary of Housing and Urban Development shall designate a representative to replace the Federal Emergency Management Agency representative. Such national board shall assume authority on March 30, 1986.

(c) The representative designated by the Secretary of Housing and Urban Development shall chair the national board constituted pursuant to subsection (b).

DISTRIBUTION OF PROGRAM FUNDS

SEC. 603. The national boards constituted pursuant to sections 601 and 602(b) shall determine how program funds are to be distributed to individual localities. The national boards shall identify localities having the highest need for emergency food and shelter assistance, based on unemployment and poverty rates and such other need-related data as the national boards deem appropriate, determine the amount and distribution of funds to these localities, and ensure that funds are properly accounted for.

AGENCY RESPONSIBILITIES

SEC. 604. (a) The Director of the Federal Emergency Management Agency shall award a grant for such amount as Congress appropriates for this program to the national board constituted pursuant to section 601 within 30 days after the beginning of fiscal year 1986, for the purpose of providing private nonprofit organizations and through units of local government.

(b) The Director of the Federal Emergency Management Agency, or his representative, shall have the following responsibilities: provision of guidance, coordination, and staff assistance to the national board in carrying out the program; and cooperation and coordination with the Secretary of Housing and Urban Development in the conducting of an audit of program funds awarded to the national board constituted pursuant to section 601 or transferred to the national board constituted pursuant to section 602(b). The responsibilities of the Director of the Federal Emergency Management Agency with respect to this program shall end with the completion of the audit for program funds distributed during fiscal year 1986.

(c) The Secretary of Housing and Urban Development shall award a grant for such amount as Congress appropriates for this program to the national board constituted pursuant to section 602(b) within 30 days after the beginning of fiscal years 1987 and 1988, for the purpose of providing emergency food and shelter to needy individuals through private nonprofit organizations and through units of local government.

(d) The Secretary of Housing and Urban Development shall have the following responsibilities: provisions of guidance, coordination, and staff assistance to the national board in carrying out the program; and the conducting of an audit of program funds awarded to and transferred to the national boards constituted pursuant to sections 601 and 602(b).

(e)(1) In carrying out the responsibilities under subsection (d), the Secretary shall coordinate activities with the Federal Interagency Task Force on Food and Shelter, chaired by the Secretary of Health and Human Services, to identify vacant and surplus Federal facilities which could be renovated or converted for use as emergency shelter facilities for the homeless.

(2) Not later than 3 months after the end of fiscal year 1986, the Secretary shall

submit to the Congress a report on obstacles, if any, including agency rules or procedures, to the availability of vacant and surplus Federal facilities for renovation or conversion to use as emergency shelter facilities for the homeless, with recommendations for legislative or administrative changes to overcome such obstacles.

LOCAL BOARDS

SEC. 605. (a) Each locality designated by the national boards constituted pursuant to sections 601 and 602(b) shall constitute a local board for the purpose of determining how program funds allotted to the locality will be distributed. The local board shall consist, to the extent practicable, of representatives of the same organizations as the national boards, except that the mayor or other appropriate heads of government will replace the Federal Emergency Management Agency or Department of Housing and Urban Development member. The chair of the local board shall be elected by a majority of the members of the local board. Local boards are encouraged to expand participation of other private nonprofit organizations on the local board.

(b) Local boards shall have the following responsibilities: determining which private nonprofit organizations or public organizations of the local government in the individual locality shall receive grants to act as service providers; monitoring recipient service providers for program compliance; reallocation of funds among service providers; ensuring proper reporting; and coordinating with other Federal, State, and local government assistance programs available in the locality.

(c) Prior to March 30, 1986, local boards constituted pursuant to subsection (a) shall be acccountable to the national board constituted pursuant to section 601. On and after March 30, 1986, local boards constituted pursuant to subsection (a) shall be accountable to the national board constituted pursuant to section 602(b).

LOCAL HOMELESS ASSISTANCE PLAN

SEC. 606. (a) At the end of each fiscal year, each local board shall submit to the national board constituted pursuant to section 602(b), a plan describing programs, goals, and objectives for providing assistance to the homeless in that locality. The plan shall be developed in cooperation with the local government head represented on the local board.

(b) The local plan shall address the following subjects: description of existing shelter, mass feeding, and food bank activities in that locality, including activities not receiving assistance under this title; use and availability of all public and private resources in the locality to assist the homeless; coordination of all public and private services and resources in that locality to assist the homeless; coordination among all shelter providers in the locality to use all available shelter space for the homeless; and preservation of low-income housing in the locality.

(c) The local plan shall be placed on file in the office of the local government head represented on the local board and shall be made available to the public. The local plan shall be forwarded to that individual locality's representatives in Congress. The national board shall maintain files of local plans and make them available upon request to other localities.

(d) The preparation and submission of the local plan shall be regarded as the legal duty of the local board, but failure to do so shall not be grounds for the withholding of funds appropriated under this title from that locality. Any citizen residing in the locality in which such local board is constituted shall have standing in the Federal district court of jurisdiction to seek an order compelling the preparation and submission of the local plan as required by this section. The substance and contents of the local plan shall be within the sole discretion of the local board and shall not be subject to administrative or judicial review.

SERVICE PROVIDERS

SEC. 607. Designation by the local board of a service provider to receive program funds should be based upon a private nonprofit organization's or unit of local government's ability to deliver emergency food and shelter to needy individuals and such other factors as are deemed appropriate to program objectives by the local board.

USE OF FUNDS

SEC. 608. (a) The national boards constituted by sections 601 and 602(b) may authorize the following use of funds to address the emergency food and shelter needs of needy individuals:

(1) Expenditures necessary to purchase emergency food and shelter for needy individuals, to supplement and extend currently available resources and not to substitute or reimburse ongoing programs and services; and

(2) Expenditures necessary to conduct minimum rehabilitation of existing mass shelter or mass feeding facilities to make facilities safe, sanitary, and bring them into compliance with local building codes.

(b)(1) Local boards are authorized to expend up to 25 percent of the funds allotted to that locality for substantial renovation or conversion, but not acquisition or new construction, of buildings for use as emergency shelter facilities to provide additional shelter space. Such expenditures shall be made in the form of noninterest bearing advances, repayment of which shall be waived if—

(A) the applicant utilizes the building as an emergency shelter facility for not less than the 10-year period following the completion of such renovation or conversion, or

(B) the Secretary determines that such facility is no longer needed to provide shelter to the homeless and approves use of the building for another charitable purpose for the remainder of such 10-year period. If the recipient of such advance fails to comply with the conditions for such a waiver, the recipient shall repay to the Secretary in cash the full amount of the advance received on such terms as the Secretary shall require. It shall be the responsibility of the local board to obtain documentation, signed by the responsible official showing that the recipient of such advance is aware of and agrees to the conditions of its receipt.

(2) Local boards are encouraged to provide, to the neighborhood in which a new emergency shelter facility is to be located, adequate notice and an opportunity to comment. Local boards are also encouraged to achieve the widest possible distribution of emergency shelters throughout the locality to avoid a disproportionate burden on any one section or neighborhood of the locality.

LIMITATION ON CERTAIN COSTS

SEC. 609. Not more than 3 percent of the total appropriation for this program each year may be expended for the costs of administration.

PROGRAM GUIDELINES

SEC. 610. (a) The national boards constituted pursuant to sections 601 and 602(b) shall establish written guidelines for carrying out this program, including methods for identifying localities with the highest need for emergency food and shelter assistance; methods for determining amount and distribution to these localities; eligible program costs, with the aim of providing emergency essential services based on currently existing needs; and responsibilities and reporting requirements of the national boards, local boards, and service providers.

(b) These guidelines shall be published annually, and whenever modified, in the Federal Register. The national boards shall not be subject to the procedural rulemaking requirements of subchapter II of chapter 5 of title 5, United States Code.

(c) Guidelines established by the national board constituted pursuant to section 601 shall continue in effect until modified or revoked by that board or by the national board constituted pursuant to section 602(b).

PROGRAM AUTHORIZED

SEC. 611. (a) To carry out this title, there are authorized to be appropriated $70,000,000 in fiscal year 1986, $88,000,000 in fiscal year 1987, and $91,000,000 in fiscal year 1988.

(b) Any appropriated funds not obligated in a fiscal year shall remain available for obligation during the following fiscal year.

SURPLUS FOOD DISTRIBUTION

SEC. 612. The Commodity Credit Corporation shall process and distribute surplus commodities acquired by the Corporation for the purpose of carrying out the food distribution and emergency shelter program in cooperation with the national boards constituted pursuant to sections 601 and 602(b).

TITLE VII—TRANSITION TO INDEPENDENCE DEMONSTRATION PROJECT AUTHORITY TO MAKE GRANTS

SEC. 701. (a) The Secretary of Housing and Urban Development shall make grants to States, local governments, or private nonprofit organizations for the operation of demonstration projects to develop and apply innovative approaches in providing transitional housing and supportive services to the homeless to assist them in the transition to independent living.

(b) Grants under subsection (a) may be made in the form of:

(1) annual payments for operating expenses of transitional housing, not to exceed 75 percent of the annual operating expenses of such housing;

(2) technical assistance in establishing and operating transitional housing and providing supportive services to the residents of such housing to assist them in the transition to independent living; and

(3) a one-time only non-interest bearing advance, not to exceed $100,000, for the purposes of acquiring, rehabilitating, or acquiring and rehabilitating an existing structure for use in providing transitional housing, if the applicant agrees to utilize such structure as transitional housing for not less than 5 years. Repayment of such advance shall be waived if the applicant utilizes the structure as transitional housing for not less than the 10-year period following the initiation of operation of such transitional housing facility, or if the Secretary determines that such structure is no longer needed for use as transitional housing and approves the use of such structure for another charitable purpose for the remainder of such 10-year period. If the applicant fails to comply with

the conditions for waiver of repayment, the applicant shall repay to the Secretary in cash the full amount of the advance received on such terms as the Secretary shall require.

(c) Grants made under this section are to be used to supplement and extend currently available resources and not to substitute or reimburse ongoing programs and services.

APPLICATIONS FOR GRANTS

SEC. 702. Each application for a grant submitted by a State, local government, or private nonprofit organization shall contain—

(1) documentary material demonstrating that such applicant has the ability and resources necessary to operate transitional housing;

(2) documentary material describing the program and supportive services intended to be provided in such transitional housing, including the innovative quality of the proposed program;

(3) documentary material demonstrating that the State, local government, or private nonprofit organization involved has provided the emergency food and shelter program local board, constituted pursuant to section 605 of this Act, if such local board has been constituted in the locality where the proposed transitional housing will be located, an opportunity to comment with respect to this application, and a statement as to whether the local board approves or disapproves of such application and its reasons for any disapproval; and

(4) such other information or material as the Secretary shall establish.

ALLOCATION OF GRANTS

SEC. 703. In selecting States, local governments, or private nonprofit organizations for assistance in providing transitional housing under this title, the Secretary shall consider—

(1) the innovative quality of the proposal to provide transitional housing and supportive services to the homeless to assist them in the transition to independent living;

(2) the ability of the State, local government, or private nonprofit organization to develop and operate transitional housing for homeless persons and to provide supportive services to the residents of such housing;

(3) the need for such transitional housing and supportive services in the locality to be served; and

(4) such other factors as the Secretary determines to be appropriate for purposes of carrying out the demonstration project established in this Act in an effective and efficient manner.

DISTRIBUTION OF GRANTS

SEC. 704. (a)(1) Not later than 120 days after the beginning of each fiscal year for which Congress makes appropriation to carry out this title, the Secretary shall make grants under section 701.

(2) If the aggregate amount of funds requested in applications submitted and approved, during the 120-day period referred to in paragraph (1), is less than the amount of such appropriation available to make such grants, then the Secretary shall publish in the Federal Register a notice that additional funds are available for distribution under this title.

(b) The aggregate amount of all appropriations made to carry out this title shall be used to make grants under section 701 unless the sum of the administrative costs incurred by the Secretary to carry out this title and the aggregate amount of funds requested in applications approved under this title is less than the aggregate amount of such appropriation.

PROGRAM REQUIREMENTS

SEC. 705. (a) Each State, local government, or private nonprofit organization receiving assistance under this title shall agree—

(1) to operate transitional housing assisting residents in the transition to independent living and limiting the stay of individual residents to not more than 6 months;

(2) to conduct an assessment of the supportive services required by the residents of such transitional housing to assist them in the transition to independent living;

(3) to employ a full-time residential supervisor with sufficient expertise to provide, or supervise the provision of, supportive services to the residents of such housing;

(4) to keep and make available to the Secretary such records of the expenditure of funds as the Secretary may require by rule; and

(5) to comply with such other terms and conditions as the Secretary may establish for purposes of carrying out the demonstration project established by this title in an effective and efficient manner.

(b) Each homeless individual residing in transitional housing assisted under this title shall pay as rent an amount determined in accordance with the provisions of section 3(a) of the United States Housing Act of 1937.

REGULATIONS

SEC. 706. Not later than 120 days following the date of enactment of this Act, the Secretary shall issue such regulations as may be necessary to carry out the provisions of this title.

REPORTS TO CONGRESS

SEC. 707. (a) The Secretary shall submit to Congress—

(1) not later than 3 months after the end of each of the fiscal years 1986 and 1987, an interim report summarizing the activities carried out under this title during such fiscal year and setting forth any preliminary findings, conclusions, or recommendations of the Secretary as a result of such activities; and

(2) not later than 6 months after the end of fiscal year 1988, a final report summarizing all activities carried out under this title and setting forth any findings, conclusions, or recommendations of the Secretary as a result of such activities.

(b) Such interim and final reports shall address—

(1) the cost of operating transitional housing and providing supportive services to the homeless to assist them in the transition to independent living;

(2) the various types of transitional housing assisted under this title, including innovative approaches to assisting the homeless in the transition to independent living;

(3) the social, financial, and other advantages and disadvantages of transitional housing and supportive services as a means of assisting the homeless;

(4) the success of transitional housing programs assisted under this title, as measured in terms of placement of homeless individuals in permanent housing, placement in employment, and reductions in welfare dependency; and

(5) such other findings, conclusions, and recommendations as the Secretary deems appropriate with regard to assisting the homeless in the transition ot independent living.

PROGRAM AUTHORIZED

SEC. 708. To carry out this title, there are authorized to be appropriated $5,000,000 in fiscal year 1986, and there are authorized to be appropriated $15,000,000 in each of the fiscal years 1987 and 1988.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON DEFENSE ACQUISITION POLICY

Mr. GARN. Mr. President, I ask unanimous consent that the Subcommittee on Defense Acquisition Policy of the Committee on Armed Services be authorized to meet during the session of the Senate on Thursday, October 17, to receive testimony on the implication of the 1984 defense procurement legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. GARN. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on Thursday, October 17, to conduct a meeting on the nominations of Edward Hickey and Frank Ivancie to the Federal Maritime Commission and John Gaughan to the Maritime Administration.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. GARN. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Thursday, October 17, to consider the nomination of Anthony Sousa, to be reappointed as a FERC Commissioner.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. GARN. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Thursday, October 17, in order to receive testimony concerning the following nominations:

SOLICITOR GENERAL

Charles Fried, of Massachusetts, to be Solicitor General of the United States;

ASSISTANT ATTORNEY GENERAL

Stephen J. Markman, of Virginia, to be an Assistant Attorney General (Office of Legal Policy).

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

SENATOR COHEN—A RENAISSANCE MAN

● Mr. LUGAR. Mr. President, in a truly superb piece of journalism, our distinguished colleague from Maine, Senator COHEN, was profiled October 11 in the Christian Science Monitor.

As the article states, Senator COHEN is truly a Renaissance man of this body. I ask unanimous consent that the article be printed in the RECORD.

The article follows:

SENATOR COHEN, A RENAISSANCE MAN AND POET

(By Scott Thompson)

Poet, novelist, artist, linguist, athlete, and United States senator, William S. Cohen of Maine is a true "Renaissance man."

He has written two volumes of poetry, co-written a spy novel with fellow Sen. Gary Hart, had some of his artistic "doodles" published in the Washingtonian magazine, and continued his study of Latin, Hebrew, and Spanish. He also finds time to jog and play basketball, a game that was his professional ambition before his senior year at Bowdoin College in Maine.

As he tugs off his tie and loosens his silk shirt in a stately room at the Four Seasons Hotel in Boston, Senator Cohen explains that his poetry flows more from his roots in Maine than his experience in Washington.

"It's very hard to write in Washington," he says, "because the business of Washington is not nature and it's not the elements, it's a definition of power and the contest of power." There is nonetheless a bridge between these aspects of his life—the use of language to persuade, to evoke, to create images.

Cohen says the object of a poem is "to try to compress an idea into a very few words and to make that idea almost phosphorous, to light up in one's mind or memory." The same is true of great speeches, he says. The most effective orators "use words to create an image that is unmistakable. . . . If you look at Churchill or any of the great orators, there's a phraseology of words that can stimulate and move people."

William Cohen first became visible on the national scene in 1972 when, as the little-known mayor of Bangor, Maine, he campaigned for a seat in the US House of Representatives by walking 600 miles, covering the district from New Hampshire to the Canadian border. Not only did this unusual campaign style garner him news media attention, it allowed him to meet many of his future constituents and gave him a deep appreciation of their way of life and concerns. The trek was more than a campaign gimmick and Cohen has returned often to hike among the citizens of Maine, whom he has represented as a US Senator since 1978.

What Cohen feels was his most important speech came early in his Washington career. As a freshman Republican congressman, he wound up on the House Judiciary Committee, which investigated grounds for impeaching President Nixon.

When the committee subpoenaed the tapes from the Oval Office, President Nixon handed over edited transcripts. The transcripts were unacceptable for two reasons: They were incomplete, and all the subleties of inflection and tone were lost on paper.

Committee chairman Peter W. Rodino Jr. (D) of New Jersey drafted a letter informing the President that the transcriptions were inadequate. When Republicans on the committee held a caucus in which they refused to support the letter, Cohen objected, saying that if they were concerned that the letter was partisan, he could draft one in its place. They refused and Cohen walked out.

The night before the vote, Cohen did not sleep. He would have 15 minutes on the House floor the next morning in which to justify breaking ranks with his Republican colleagues and breaking the tie to ensure passage of the letter.

Cohen's speech could not be poetry, but he was conscious of the need to create an image in the listeners' minds in order to persuade them. He compared the circumstantial evidence of presidential involvement in Watergate to snow: If you wake up and there's snow on the ground where there wasn't any the night before, you conclude that it snowed during the night, even if you didn't see it fall. Conspiracy is too subtle and ambiguous to leave smoking pistols, but the fallen snow must not be ignored. Cohen's image stuck. His colleagues continue to comment on it more than a decade later.

As a result of his deviation from the party line, however, Cohen found himself cold-shouldered. Antagonism was developing, and Cohen felt much of it was directed at him for failing to support President Nixon. The next day, during the course of a 22-mile hike, he sought relief from the sun and heat. He recalls being overwhelmed by the peace of the woods, the scent of the pines, the serenity of the trees. He wrote: "I felt the green fill of life flow from the trees gently into me."

Partisan politicking is Cohen's strongest criticism of Congress. His dissenting vote against Mr. Nixon is only one example of Cohen's nonpartisanship. He also cosponsored the nuclear build-down bill with Democratic Sen. Sam Nunn of Georgia.

In an unofficial bipartisan effort, he co-wrote a spy novel, "The Double Man," with Sen. Gary Hart (D) of Colorado. Cohen explains the collaboration this way: At about 3 a.m. on a July morning in 1980 most of the senators on the Hill were stretched out on cots, as one or two of their colleagues were prolonging a filibuster. Cohen spotted Gary Hart, whom he didn't know too well. They shared a cot in the otherwise empty Senate dining room. After Cohen complained that this was an asinine way to run a country, he asked Hart what he'd rather be doing. Hart said, "I'd rather be in Ireland writing a novel."

Cohen said, "Well, I'm half Irish and have always wanted to go to Ireland and have always wanted to write a novel. Since we can't go to Ireland, why don't we just write a novel." And so they did.

Hart flipped over a large brown envelope he was carrying and started jotting down "a whole torrent of ideas between the two of us." They discovered shared concerns and interests that would be the ingredients of the story: Senate investigations, espionage, terrorism, the influx of drugs into the US, organized crime, and the John Kennedy assassination. After an hour, they had the outline for an entire international intrigue novel.

At 8 that morning, when Cohen got back to the Hill after showering and changing clothes, he glanced over the outline and said to himself, "That's a heck of a story." He called Bill Adler, his literary agent in New York, who flew down the next evening to discuss the project with the two senators over dinner.

The senators told Mr. Adler they wanted to write a book together, not based on their names. "We wanted the book to stand on its own merits," says Cohen.

Adler left for New York and called Cohen at 8:30 the next morning to say, "I just sold your book." He sold the story to William Morrow & Co. without revealing the identities of its authors until the time of publication.

The protagonist of the novel is Tom Chandler, a U.S. senator with presidential aspirations. He heads an intelligence committee task force investigating terrorism after the gruesome killing of the secretary of state's family. The novel has the pace and suspense of a good thriller, and the smell of reality—details, complexities, and authentic possibilities. As Bob Woodward put it, "['The Double Man'] is an expertly crafted thriller that is full of many uncomfortable plausibilities."

Chandler's investigation not only ensnares him in the shadowy business of present-day crime and espionage, but also plunges him into recent history, including the assassination of Mr. Kennedy.

"We tried to use Kennedy's assassination as a metaphor for our current existence," says Cohen, "because there are so many things left undecided, unresolved, ambiguous. What we have found in our lives, as senators, is that the closer you are to things doesn't necessarily mean they are more clear, but sometimes more opaque. We were trying to deal with the absence of clarity, the ambiguity of all the people who had motives in the Kennedy assassination, and the undiscovered truth that may still be there."

Since publication last spring, "The Double Man" has become a Book of the Month Club Selection. It will also be published in England, France, Italy, Japan, and India, and a condensed version will appear in the November issue of Reader's Digest.

Meanwhile, Cohen's agent is trying to find a publisher for "Baker's Nickel," the senator's second volume of poems. The title refers to his father, a Russian Jew who made his living as a baker.

When asked if he shares the presidential ambitions of his co-author and protagonist, Cohen immediately says, "I let Gary Hart take care of any presidential aspirations." But whether the immediacy of his response came from resolution or from habit was less than certain.●

UNITED NATIONS REFORM

● Mr. KENNEDY. Mr. President, during this the 40th anniversary of the founding of the United Nations there has been a great deal of discussion on the need to reform the United Nations—to take this opportunity to deal with some of the fundamental problems which have crippled the effectiveness of the United Nations in recent years.

Of the many recommendations that have been offered, few have been more thoughtful than those offered last week by Sadruddin Aga Khan, the former U.S. High Commissioner for Refugees, and Maurice Strong, the current executive coordinator of the U.N. Office for Emergency Operations in Africa.

Mr. President, I should like to draw to the attention of my colleagues the

article by Sadruddin Aga Khan and Maurice Strong on reforms that might actually help the United Nations work. I ask that it be printed at this point in the RECORD.

The article follows:

[From the New York Times and International Herald-Tribune, Oct. 9, 1985]

UNITED NATIONS: REFORMS MIGHT HELP IT TO WORK

(By Sadruddin Aga Khan and Maurice F. Strong)

NEW YORK.—For all the champagne and the fine words, it should be obvious to friends and foes alike that the United Nations is in trouble and has fallen far short of what its founders dreamed of 40 years ago.

One of the main complaints is that as a multilateral organization the United Nations hinders proper bilateral international relations. But the world is now more interdependent than ever. Also, like it or not, power is now parceled out more widely than it used to be. That requires talking to more governments, more of the time. The United Nations is the mechanism for doing that.

For its friends, of which we are two, the real complaint should be that the United Nations is such an imperfect expression of multilateralism. The problem is not so much that it fails to meet grandiose expectations of a "world government" but that it is not particularly effective in averting conflict or fighting poverty.

The United Nations, as it is presently limping along, is clearly not up to the task of reversing those trends, let alone its own genteel deterioration. Officials carry on with their routine business ever more removed from the politics of the real world. With notable exceptions such as the present secretary-general, Javier Pérez de Cuéllar, whose frank annual reports mostly fall on deaf ears, those who profess to be friends of the United Nations seem to believe that history and time are on their side. What the United Nations suffers from is the dangerous presumption that it will outlive its critics.

If this state of affairs is to be improved, much will depend on the "middle-sized" states. Everybody talks about polarization between East and West and North and South. Not much can be done about that in the short term, but what can be resisted is the tearing apart of the organization by the big states on the one hand and the smaller ones on the other. India and Australia, to take just two very different examples, could help bridge the polarization between the powerful yet indifferent big states, for whom the United Nations is more often a scapegoat than an instrument, and the small but weak who resort to politics of frustration in the General Assembly.

These "middle" governments—of whom there are, say, 20—obviously will not suddenly find common cause politically. But what they do have in common are important international interests and, at the same time, a short bilateral reach of their own. They thus share an interest in turning the United Nations into an effective, workmanlike forum.

There are a number of ways this can be done without interfering with the essential constitutional character of the United Nations—the power of veto in the Security Council and the one-state, one-vote principle of the General Assembly.

Here we suggest just one reform. The top contribution of any government to the United Nations' regular budget should be brought down over a period of time to considerably less than the present percentages—to a maximum, say, of 10 percent. The difference would be made up by the middle states, thereby encouraging them to play a bigger role.

Such a change would not challenge the interests of the major powers, who would gain more than anybody from a more coherently functioning and balanced world body. And the small states should have no complaint. The United Nations is often their principal diplomatic outlet; indeed, they worry that it is only they who invest a relatively large part of their diplomatic effort there.

Some think the organization is in decline because the secretary-general has so few powers. Not necessarily. What has happened is that the agenda of the United Nations has become an unwieldy millstone around his neck. The secretary-general and his staff should be allowed to concentrate on, say, half a dozen crucial issues. At the moment, the United Nations is an octopus walking in every direction at once.

Nor need an action always wait until the last moment. A useful intervention as soon as the early warnings sound can do much more good than a later Band-Aid. Many Third World upheavals, for example, involve a cycle of political, ecological and economic instability that could be broken at an early stage by judicious injection of multilateral aid together with discreet diplomatic work. Left to fester, such situations can lead to the all-too-familiar crises of mass exodus, famine or civil war that become cemented into political geography.

But even if the secretary-general does not need new powers, he must have the basic authority to manage his own organization: to hire and fire according to the highest professional standards and thereby provide overall tone and leadership to the system.

There must also be a higher caliber of appointments at the top. There is nothing wrong with political appointments if appointees have a distinguished and relevant career record. But governments too often consider comfortable UN sinecures a dumping ground for mediocre diplomats. A board of independent, eminent people should be set up to establish the desirable qualifications for each senior vacancy as it comes up. If individual governments still insisted on sending poorly qualified timeservers, at least their actions would be recognized for what they are.

The entire structure should be rationalized. Its current organizational shape includes the accumulated whims and false starts of 40 years. Many programs that have run out of steam linger on. Sometimes their budgets are consumed to staff costs, leaving them no funds to work with. Units with overlapping mandates or inadequate capacities should be eliminated or merged. There is even a case for creating new activities when needed, such as transport to move food and other relief goods. But the United Nations should not try to do everything, only what it can do well.

Finally, it must learn to project itself. It still enjoys good will in the opinion polls. But its supporters either try to market it as some higher order of government or become utterly defensive and secretive about obvious weaknesses in performance. Little attempt is made to explain the United Nations for what it is—a far from perfect but nevertheless remarkable experiment in international cooperation that urgently needs a helping hand from all of us.●

THREE MILE ISLAND

● Mr. McCLURE. Mr. President, the recent decision to allow the restart of the unit I reactor at Three Mile Island has rekindled the unfounded fears of many regarding nuclear power. As could be expected, most reports of the restart focused on the emotional and the sensational aspects, rather than the objective and the factual.

Fortunately, some observers have undertaken a more dispassionate analysis of the restart, and the questions on nuclear power surrounding it. One of these observers, as he almost always is, is Vermont Royster of the Wall Street Journal. In Wednesday's edition of the Journal, Mr. Royster devoted his "Thinking Things Over" column to this subject, and in doing so provided a refreshing analysis that is not fraught with the fear found in most reporting of nuclear power.

I ask that Mr. Royster's column of October 16 be printed in the RECORD, and I urge those Members who are concerned with the energy self-sufficiency of this country to consider his excellent remarks.

The column follows:

THREE MILE ISLAND

(By Vermont Royster)

The brief news item was tucked away in the back of the paper where it might easily have escaped notice.

It reported that the Pennsylvania Health Department has so far found no health hazard fallout from what the Associated Press calls "the nation's worst commercial nuclear accident," the one that shut down a reactor in 1979 at Three Mile Island, near Harrisburg. An extensive study found no more than a normal cancer rate among residents living within a 20-mile radius of the plant, including 3,582 women who were either pregnant at the time or soon after became so.

The item caught my eye because six years ago I shared the alarm that swept the country when Unit 2 of the plant had an emergency shutdown, resulting in all sorts of dire predictions about nuclear disaster. I had a personal as well as journalistic interest because I then had a daughter living in Harrisburg.

It was some time, I admit, before I noticed that the reports on television and in the press seemed grossly exaggerated. In fact, no one was killed or even injured. And now comes this study that casts doubt on all those predictions of radioactive aftereffects on people living nearby.

So the thought crossed my mind that if Three Mile Island was our "worst nuclear accident" maybe there was a good bit of hysteria about the dangers from nuclear power plants in general. There are such plants all over the world—many more outside this country than in it—and I've heard of no accident anywhere of the kind so often warned against by anti-nuclear doomsayers.

But of course I put this thought down as an unscientific reaction of an uninformed layman. I did, that is, until there came to hand a book by Bernard L. Cohen, professor of physics at the University of Pittsburgh and formerly chairman of the American Physical Society Division of Nuclear Phys-

ics, entitled "Before It's Too Late" (Plenum Press, 1983, recently reissued).

Prof. Cohen's thesis can be simply stated. It is that nuclear energy is actually safer than other sources of energy, such as coal-powered electric plants, and that because of the hysteria after Three Mile Island the U.S. is falling behind the rest of the world in using nuclear power. In the long run, he argues, this will be costly to this country.

Mr. Cohen is not alone in so thinking. His book comes with a foreword by Rosalyn Yalow, who won a Noble Prize in 1977 and who thinks Prof. Cohen is if anything "too conservative" in his support for nuclear energy. Hans Bethe, another Noble laureate, finds Mr. Cohen's book a "comprehensive analysis of the facts and fancies about nuclear power." Alvin Weinberg director of the Institute for Energy Analysis at Oak Ridge, thinks the book "a much needed antidote for the mindless anti-nuclear propaganda."

Unfortunately, if Prof. Cohen's basic thesis can be simply stated it isn't always presented in simple language. It's not a book for casual reading. I also doubt, more unfortunately, if it will be read, as Dr. Yalow puts it, "by the anti-nuclear activists who need it most."

The problem here is that what is in actuality a scientific question, the merits and safety of peaceful atomic energy, has became a misunderstood emotional question. Thus the decision by the Nuclear Regulatory Commission, upheld this month by the Supreme court, to restart Unit 1 at Three Mile Island brought out the usual anti-nuclear demonstrators. Some paraded out side the home of Pennsylvania Gov. Dick Thornburgh carrying placards denouncing him for not supporting a restraining order against restarting the unit, one in no way involved in the shutdown of the other unit six years ago.

I suppose all this is understandable. The whole subject of atomic energy is shrouded in mystery with an overlay of fear generated by association with the atomic bomb. Neither Mr. Cohen nor any other scientists denies the horrors inherent in atomic bombs. Nor does Mr. Cohen deny the possibility of a serious accident in a nuclear power plant. What he challenges is the probability, basing his argument not only on the record (there has yet to be one) but also on a careful, if technical, examination of the fundamental difference between the force of atomic energy used in bombs and its use in power plants. One is designed to cause an explosion. The other carefully designed to avoid one.

Moreover, shunning nuclear power is not just a matter of avoiding some remote danger. There is a positive loss in our refusing to use peaceful atomic power.

The Soviet Union builds eight complete power reactors each year. The French, by 1981, already supplied 38% of their electric power from nuclear plants (built from American designs supplied by Westinghouse). Japan has completed at least six plants since 1979. West Germany started three plants in 1982. Meanwhile, only about 13% of U.S. electric power is from nuclear plants.

The result, Prof. Cohen persuasively argues, will be that those nations "will end up having the cheapest electricty in the world while the United States will have the most expensive among large industrialized nations."

The blame for this lies in part on the anti-nuclear activists. But part of the blame must lie on my own craft, the media, that we have armed the protesters by our reporting. Three mile Island is itself a good example. It was reported on TV and in the papers as a sensational disaster, which it never was. But it is still referred to as a great nuclear accident.

Somehow, someway we must end the hysteria and see peaceful nuclear power as the great boon it is and could be to or country. Before, as Prof. Cohen fears, it is too late.●

THE STUDENT LUNCH PROGRAM: A VICTORY FOR OUR CHILDREN

● Mr. SASSER. Mr. President, I rise today in support of the commemoration of this week, October 13-19, 1985, as "National School Lunch Week."

The School Lunch Program is a success. It has proven itself to be an economical and effective way to facilitate our children's learning by providing them with the nutrition which we all know is necessary for good health and mental alertness. Study after study has shown that proper nutrition enhances physical health and increases academic performance. By providing school lunches, we essentially invest, not only in the current well-being of our children, but as important, in their futures as our leaders of tomorrow.

The School Lunch Program, originated in 1946, celebrates its 39th anniversary this year. We have seen it grow from its infancy—a program reaching only a few thousand children—to its current level of services reaching nearly 24 million children. And these are children from families of every income level and every walk of life. More specifically, the School Lunch Program provided assistance in fiscal year 1985 for serving an estimated 3,929 million school lunches including 1,901 million for children from middle- and upper-income families and 2,028 million for children from low-income families.

Indeed, the School Lunch Program is reaching a tremendous number of our Nation's children, and we can be proud of the fact that America's children are not going hungry while they are at school. In commemoration of this program, I join my colleagues in the U.S. Senate as we acknowledge the success of the Federal role in securing adequate nutrition for our children by recognizaing this week in October as National School Lunch Week. Safeguarding the health and proper physical development of our children is of the highest priority. And it is fitting that we observe this week, National School Lunch Week, as a victory for the children of this country.●

CONGRESSIONAL SPACE CAUCUS ON THE FUTURE OF SPACE SCIENCE

● Mr. SARBANES. Mr. President, I was fortunate to have the opportunity recently to meet with a group of preeminent space scientists assembled in Washington, DC, to participate in a conference sponsored by the congressional space caucus on the future of space science. Over a 3-day period, October 8-10, individual panels explored the various disciplines of space science, ranging from planetary exploration to life science to theoretical research. I would like to share with my colleagues some of the information gleaned from two particular panels.

The panel on astronomy and astrophysics, which included Dr. Riccardo Giacconi, director of the Space Telescope Institute located on the campus of the Johns Hopkins University, and Dr. Arthur F. Davidsen, professor of physics and astronomy and director of the Center for Astrophysical Sciences, also of the Johns Hopkins University, described the history of astronomy and astrophysics and future developments in these disciplines.

Astronomers study the nature of the universe by observing its contents and behavior, while astrophysicists seek to understand these observations in terms of consistent laws of physics. Limited for centuries to observations in the visible band of the electromagnetic spectrum, scientists now have access to virtually all wavelenghts. This tremendous advance has occurred in our lifetimes and is largely made possible by the advent of space flight. Placing sensitive astronomical instruments above Earth's filtering atmosphere opened new windows into the cosmos and raised new possibilities for research.

We now have at our disposal the most advanced technology and can place entire observatories into space for scientific investigations. Over the past two decades, the National Aeronautics and Space Administration has introduced increasingly sensitive instruments into space. In astronomy, families of telescopes have been developed and placed in orbit for observations across the entire electromagnetic spectrum. Each successive telescope has extended the range and sensitivity of these instruments and provided greater insight into the structure of stars, galaxies, and the cosmos. For these successes, new technologies had to be created and exploited.

Two new observatories are now under development:

The Gamma Ray Observatory [GRO] will explore the most energetic part of the spectrum across a much greater wavelength range than its predecessors; and

The Hubble Space Telescope [HST] which will penetrate deep into the universe in visible and ultraviolet light, expanding the volume of observable space several hundred times.

Under consideration are two further space observatories:

The Advanced X-ray Astrophysics Facility [AXAF] which will cover the x-ray portion of the spectrum with a hundredfold improvement in sensitivity.

The Space Infrared Telescope Facility [SIRTF] will span the infrared part of the spectrum with a thousandfold increase in sensitivity.

These space telescopes will enable us to open the universe to more accurate observation and to look back in time and space for order and meaning. We will be more capable of answering fundamental questions such as: How old is the universe? How much matter is there in the universe? What is the power source of quasars?

The panel on solar and space physics, chaired by Dr. Stamatis Krimigis of Johns Hopkins University, focused on the single object in nature that mankind is most dependent upon—the Sun. Without the Sun's radiant energy, there would be no life on Earth as we know it. Even our primary source of energy today, fossil fuel, is available because of solar energy millions of years ago. Mankind is now trying to tame the nuclear reaction that converts hydrogen into helium for our future energy needs, the same reaction in the Sun's core which provides our solar energy. Meanwhile, the Sun's radiation will continue to drive the circulation of our terrestrial atmosphere and will contribute to changes in our climate through subtle variations in the quantity and the spectrum of that radiation.

Beyond its importance to life on Earth, the Sun is also of fundamental importance to stellar astronomy. The Sun is a very typical star, and it is the only star which can be studied with high angular resolution thanks to its proximity to us. The history of astronomy demonstrates convincingly that much of our understanding of the physics of stars comes from understanding these same physical processes on the Sun first. It is for this reason that the Sun is often called the Rosetta Stone of Astronomy.

Dr. Krimigis and his copanelists discussed the Ulysses Mission scheduled for launch aboard the shuttle in 1986. This mission, also known as the International Solar Polar Mission, will obtain the first view of the Sun above and below the plane in which planets orbit the Sun. Also discussed was the proposed International Solar-Terrestrial Physics Program, which would involve six spacecraft missions designed to provide comprehensive data on the Sun-Earth environment.

I want to congratulate all those involved in putting this conference together and to urge my colleagues to review carefully the information provided to Members of Congress and their staffs on the Federal role in astronomical and astrophysical research.●

TWENTY-FIFTH ANNIVERSARY OF THE OPPORTUNITY CENTER OF GREATER NEW BEDFORD, INC.

● Mr. KERRY. Mr. President, I wish to honor the Opportunity Center of Greater New Bedford, Inc., as they celebrate 25 years of service to the community.

Since its inception, the Opportunity Center has provided the mentally and physically disabled with many services, including opportunities for employment. It has grown from a small, storefront operation to a large facility serving over 100 clients a day.

The Opportunity Center of New Bedford has become a significant force throughout southeastern Massachusetts by providing meaningful work for handicapped clients who take pride in contributing to the society in which they live.

I hope that you will join me in congratulating the Opportunity Center of Greater New Bedford, Inc., for their numerous achievements and contributions to the community, as they celebrate their 25th year of service.●

TAX REFORM AND THE TIMBER INDUSTRY

● Mr. HATFIELD. Mr. President, the September edition of Oregon Business magazine contained an article by Win McCormack on the probable impact of President Reagan's tax reform proposal on the State of Oregon. This insightful and well-written article serves to underline my concern about the economic burdens which would be placed upon Oregon taxpayers. I am particularly concerned about the proposed revision of the tax treatment of the wood products and timber industry and the possible elimination of the deduction for payment of State land local taxes. While supporting the effort to make our Tax Code simpler and more equitable, I highly recommend this article to my colleagues from other States as an example of the way in which one State would be affected by a proposal which would appear on the surface to be equitable.

I ask to have printed in the RECORD, the Oregon Business magazine article.

The article follows:

[From Oregon Business, September 1985]

A DISASTER FOR OREGON?

(By Win McCormack)

It is called "The President's Tax Proposals to the Congress for Fairness, Growth and Simplicity." But, at 461 double-spaced pages, it does not have simplicity as a virtue. And many are questioning whether key individual provisions of the plan, or the plan as a whole, will promote either economic growth or fairness—especially in Oregon.

In brief, the President's May 28 tax initiative, known in Washington, D.C. circles as "Treasury II" (and also as "Reagan I"), contains several provisions that appear to have the potential to create some significant economic problems in the state. Besides the well-known proposal to eliminate the federal deductibility of state and local income and property taxes, there are proposals in the plan to alter the current favorable tax treatment of the timber industry; to nullify the current tax-exempt status of many types of state government and municipal bonds; to end favorable tax treatment for the construction of certain kinds of rental housing, particularly low-income rental housing; and to abolish mortgage interest deductions for second homes.

Taken together, some analysts say, these provisions of the Reagan tax package could further undermine an already weakened timber industry and further erode the ability of hard-pressed Oregon governmental agencies and educational districts to finance even their minimal needs.

The plan does contain three features with potentially positive impacts on Oregon, according to tax analysts. First, the thrust of Treasury II, as with the Treasury I and congressional "modified flat tax" packages before it, is to broaden the federal tax base. Since Oregon's tax code is tied to the federal code, any broadening of the federal tax base would *ipso facto* result in a broadening of Oregon's revenue base as well. Second, Treasury II asks for a reduction in the capital gains rate from the current maximum 20% to a maximum of 17.5%, which would help capital formation in Oregon's burgeoning high tech sector.

(However, Dan Rostenkowski, the Democratic chairman of the House Ways and Means Committee, has indicated he probably will eliminate the lowering of the capital gains rate from any tax reform bill passed by the House.) Third, Treasury II, unlike Treasury I, retains lower rates of taxation for small business, which are reputed to be more prevalent in Oregon than in most other states.

Some Oregon business leaders believe that the potentially negative features of the Reagan tax plan far outweigh its potentially positive aspects. Floating Point Systems chairman Norm Winningstad, for instance, believes that the plan as a whole, by further weakening America's industrial base in the traditional "smokestack" industries through such features as the repeal of the investment tax credit and the lengthening of allowable depreciation schedules on new equipment, would weaken the overall economy and eventually hurt the electronics industry as well. Winningstad also says the proposal to abolish tax credits for research and development harms all industries, traditional and high tech alike.

The provision in the Reagan tax initiative of greatest concern to Oregon political leaders is the one that calls for the abolition of the federal tax deduction for state and local tax payments. The Oregon Taxpayers Association ranks the state as having the third highest income tax as a percentage of personal income in the country. Oregon also has the twelfth highest property tax in the nation. Because of this local tax burden, Oregon taxpayers itemize their federal returns and make use of the state and local tax deduction to a greater extent than taxpayers in almost any other state. A study by the Oregon Department of Revenue, requested by Oregon Congressman Ron Wyden, shows that more than 400,000 Oregonians used the state and local deductibility provision on their federal tax returns in 1980, with their average deduction in this category in excess of $2,000. Oregon political leaders of both parties fear that Oregon taxpayers, already disgruntled with high

state income and property taxes, would revolt completely against having their local tax burden increased even more by the loss of federal deductibility. This is especially true with respect to property taxes, which currently finance most of the cost of Oregon's school systems.

ANOTHER BLOW TO THE TIMBER INDUSTRY

The increase in effective local property tax rates, by escalating the cost of home ownership, could also curtail the demand for housing, thus dealing another blow to a timber industry already reeling from the inordinately high interest rates of recent years which caused a decline in housing starts. The Reagan administration's proposal to eliminate mortgage deductions on second homes could erode the demand for housing even more. In addition, proposals to depreciate rental apartment buildings over a longer period of time, to reduce the value of tax write-offs to builders, to scale down the deduction for interest on money borrowed to finance construction, and to limit the use of tax-exempt bonds to finance construction of rental housing for low- and moderate-income people, might cripple the housing market still further.

The timber industry also would take it directly on the chin under the administration tax plan. A 1944 provision in the federal tax code allows income from the sale of timber to be taxed as capital gains. The administration proposes to repeal that provision and to tax timber sales at a much higher ordinary income rate. It also proposes to prohibit the timber industry from deducting on an annual basis expenses associated with growing timber, as it is permitted to do now, and to make the industry capitalize them over the life of each tree.

William Condrell, a Washington tax lawyer and timber industry lobbyist, has said that the administration's tax proposals relating to timber would "not only penalize forestry and timber regeneration but would encourage poor management or no management."

Rick Schack of Associated Oregon Industries says, "Without qualification, the President's tax plan would uniformly discriminate against all classes of forest landowners." All the members of Oregon's congressional delegation have complained that these provisions could have a devastating impact on the nation's timber and pulp and paper industries.

Spokesmen for the state's second largest industry, agricultural and livestock, also have expressed serious reservations about sections of the Reagan tax reform proposal. Clare McGhan, executive vice president of the Oregon Farm Bureau Federation, says that it is particularly concerned about the section that seeks to rescind tax breaks for agricultural products that can't be cultivated in a single year and the section that calls for taxing the sale of livestock at ordinary income rather than capital gains rates. McGhan says that Oregon farmers and cattle breeders also are upset about the proposed elimination of the investment tax credit for the purchase of new machinery.

This chorus of dire predictions about the potentially adverse effects of the Reagan tax initiative on Oregon has been joined by Oregon state and municipal officials, concerned not only by the proposed elimination of state and local tax deductions, but also by the proposed elimination of the tax-exempt status of 80% to 90% of state and local bond issues. Under the Reagan plan, such issues would forfeit their tax-exempt status if more than 1% of their proceeds went to benefit a private citizen or corporation. Among other agencies, the Oregon Department of Veterans' Affairs almost certainly would lose the ability to float tax-exempt bonds to underwrite its farm and home loan program.

What of the direct effects of Treasury II on Oregon taxpayers themselves? According to the Oregon Department of Revenue study, middle-income families in Oregon might see their overall tax burden rise, particularly those families with two children in which both spouses work and in which the spouses file jointly and itemize their returns. The study predicts that for such a family with $30,000 in income, federal taxes would rise by $191. For such a family with $50,000 in income, the study says, the increase would be $391. But, according to the study, a similar family making $100,000 a year would see its federal taxes fall by $438—and, if its gross annual income were $200,000, by a total of $3,047. "The facts are clear," said Wyden when he received the study in Washington, "while the very rich do well, many middle-income Oregonians are left high and dry."

According to another view of the study, the majority of taxpayers would receive a slight decrease in federal tax obligations. But a "significant pocket" of taxpayers would be hit with a tax increase, points out John Colvin, general counsel for the Senate Finance Committee and a member of Oregon Senator Bob Packwood's staff. He predicts adjustments will be made to correct the imbalance, likely through a compromise on the proposal to eliminate state and local tax deductions and through maintenance of the child care credit and the "two-earner" deduction.

In addition to Wyden, other Oregon congressmen also have expressed serious reservations about aspects of the plan, and on the Senate side, Oregon's Mark O. Hatfield, influential as chairman of the Senate Appropriations Committee, has come out against the state and local tax provision, the second home mortgage-interest deduction provision, and the timber industry-related provisions.

THE POLITICS OF TAXES

Any tax bill, after it is passed by Ways and Means, will go to the Senate Finance Committee, which Packwood chairs. Packwood has taken a succession of stands on the Treasury proposals, ranging from mild disapproval of Treasury I last December, to wholehearted support of Treasury II when it was first released in late May, to a fierce denunciation of Treasury II as "unfair and misfocused" after the Oregon Department of Revenue study was released in mid-July. Packwood, up for reelection in 1986, must walk a fine line between loyalty to the Republican party and administration and concern about the interests of his home state. Packwood now has stated that he "will be guided" on the tax issue by what Oregonians tell him.

Meanwhile, "The President's Tax Proposals to the Congress for Fairness, Growth and Simplicity" sits on Capitol Hill in the Ways and Means Committee, with members of that panel subject to intense pressure from lobbying groups. Rostenkowski recently gave a speech to the National Press Club at which he assured his listeners that, despite reports to the contrary, the administration's tax reform proposal was not dead. He said that the plan would undergo substantial revision in the House to shift more of the tax burden from middle-income taxpayers and to upper-income individuals.

The betting now is that this fall the Ways and Means panel will approve a bill that lowers tax rates, drastically reduces the number of brackets, and reduces or eliminates a number of tax deductions and preferences. Among other things, it's expected that the House will eliminate some, although not all, of the state and local tax deduction, repeal the investment tax credit, and stretch out current depreciation schedules.

If it takes Ways and Means two or three more months to complete work on the tax package before sending it on to Packwood's panel in the Senate, it is obvious that it will be well into 1986 before work on the legislation can be completed by both houses of Congress. After Rostenkowski's speech, Packwood said it was not imperative that a tax bill be passed this year. He said that a number of tax bills have been passed in election years, and this package could be too.

Given the past history of Congress, however, for any tax bill to pass during an election year, it must offer members the chance to tell voters just before the election that the new law lowers their taxes—which means even more of the tax burden could be shifted to business. As another alternative, the bill could turn into a "Christmas tree" for both business and individuals, further increasing the unmanageable federal deficit. Given those tendencies and the harsh effects that Reagan's tax bill—before it is even touched by Congress—would create for important sectors of Oregon's economy, many business people would like to see this bill die quietly—unlamented, unmourned, and unloved.

THE EFFECTS ON THE BOTTOM LINE

RETAIL TRADE CORPORATION

	Current law	Reagan proposal
Gross income:		
Gross receipts	$20,000,000	$20,000,000
Cost of goods sold	12,000,000	12,000,000
FIFO indexing adjustment	0	200,000
Gross profit	8,000,000	7,800,000
Other income-bad debt reserve amortization	0	30,000
Total income	8,000,000	7,830,000
Deductions:		
Salaries and wages	3,000,000	3,000,000
Dividends paid	0	90,000
Rents	100,000	100,000
Taxes	600,000	600,000
Interest	500,000	500,000
Bad debts	300,000	250,000
Depreciation	2,000,000	1,500,000
Total deductions	6,500,000	6,040,000
Taxable income	1,500,000	1,790,000
Tax	690,000	590,000
Tax credits Investment tax credit	15,000	0
Net tax	675,000	590,000

NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS

● Mr. RUDMAN. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The select committee has received a request for a determination under rule 35 which would permit Mr. Jeff Bingham, a member of the staff of Senator JAKE GARN, to participate in a program in Brussels and Norway, sponsored by the NATO Information Service, for October 13-20, 1985.

The committee has determined that participation by Mr. Bingham in the program in Brussels and Norway is in the interest of the Senate and the United States.●

THE CLEAN COAL TECHNOLOGY RESERVE

● Mr. BOSCHWITZ. Mr. President, Minnesota is a State of unsurpassed beauty whose natural wonders, unfortunately are threatened by acid rain. Controlling the emissions that cause acid rain will be expensive and will take several years. This year Congress can take a large step forward in this effort, however, by funding the Clean Coal Technology Reserve. The Reserve will support the demonstration of technologies that use coal cleanly and economically.

One special area of concern that the Reserve should address is the problem of industrial atmospheric emissions and the burden that costly pollution controls, using current technologies, impose on industrial modernization. The steel industry in particular has suffered significant economic hardship as a result of its efforts to comply with Clean Air Act regulations.

According to a 1984 report by the Congressional Research Service, the U.S. steel industry spent 15 percent of its 1980 capital investment on pollution abatement equipment and was expected to commit another $10 billion in pollution control equipment between 1980 and 1990 to meet current Federal air quality standards. The report concludes that the result of these environmental regulations on steel manufacturing can be seen in the reduction of domestic coking capacity, where, over the last two decades, the closing down of old coke ovens has accelerated.

Now a new process has been developed, the kohle-reduktion [KR] process, for manufacturing steel by using coal directly and without coking. By using the KR process, the U.S. steel industry will not have to invest in expensive air pollution controls for its old, smokey coke ovens. Instead, it can turn to an innovative technique that not only will be much cleaner than conventional steel manufacturing, but also will substantially reduce production costs.

U.S. Steel, along with the Minnesota Department of Natural Resources, has submitted a proposal to the Reserve to receive funding for the demonstration of the KR process. A recent article in Business Week ably describes this worthwhile project. I ask that it be printed in the RECORD.

The article follows:

[From the Business Week, Sept. 30, 1985]

U.S. STEELMAKERS ARE HOT FOR THE COKE-FREE FURNACE

As if foreign competition weren't bad enough, the U.S. steel industry also faces an insidious threat from within: a dwindling supply of coke, the coal derivative that is essential to making iron in blast furnaces. Close to half of all coke ovens are virtually obsolete, and by 1990 the U.S. may be left with only enough capacity to produce 25 million tons of coke annually—a third of the figure in the 1950s and 5 million tons short of what was used last year.

Having suffered losses of more than $6 billion in the past three years, steelmakers are hardly eager to spend the $100 million in takes to rebuild a battery of coke ovens to conform to today's stringent pollution codes. But unless something is done, the steel industry could be even more dependent on imported coke by the turn of the century.

So U.S. Steel Corp. and Weirton Steel Corp. are separately battling to get federal help in building the first American plant for making iron by a new method that doesn't need coke—it burns ordinary coal instead. Moreover, the kohle-reduktion (KR) process, developed in West Germany by Korf Engineering, promises to slash capital investment by 25% and trim the overall cost of making iron by as much as 44%. At stake, says Dominic A. Pengidore, vice-president for engineering at Weirton, is nothing less than "the survival of the U.S. basic steel industry in the next 20 years."

INFERNO

The companies hope to persuade the Energy Dept. to dig into its Clean Coal Technology Reserve Fund—which will spend $500 million to develop new technology over the next three years—and cough up a big share of the cost of constructing a $100 million KR plant that can produce 300,000 tons of iron a year. U.S. Steel wants Energy to chip in $95 million, including more than $20 million for two years of demonstrations. The state of Minnesota and local sources, eager to revive the flagging Great Lakes iron ore industry, would contribute $25 million, and U.S. Steel and other steelmakers would foot the remaining $15 million. Armco, Inland Steel, and Bethlehem Steel have expressed interest in joining the project.

Weirton is seeking $65 million from Washington for its version of the KR plant, which would be built at its steel facility in West Virginia. The employee-owned company, together with the state of West Virginia and local coal producers, would make up the difference.

So far, the KR process has been used only at Korf's prototype plant, which produces 60,000 tons of iron per year. In the process—a variation of the coke-based direct-reduction technology pioneered by Korf in the 1970s—coal is injected into a superhot furnace (2,500F) and ignited with oxygen. This creates an inferno of pressurized gases that vaporizes the combustibles in the coal, which rise into an overhead chamber that contains the iron ore, leaving behind the coal's carbon. Carbon monoxide and hydrogen in the combustion gases strip oxygen from the ore to produce so-called sponge iron. The melting metal then drops into the furnace, where it combines with carbon. The molten iron flows out of the bottom of the furnace.

Energy Dept. officials are enthusiastic about the KR process because it causes

much less pollution than smoky coke ovens and conventional blast furnaces. So last fall, Energy, the Bureau of Mines, the states of Minnesota and West Virginia, and the American Iron & Steel Institute doled out $590,000 to ship Minnesota ore and West Virginia coal to West Germany, for a test run.

20-YEAR PROJECT

The results were so promising that Weirton's Pengidore insists that "it's time to build a plant that will operate in the real world." However, Jack S. Siegel, Energy's deputy director for coal utilization, cautions that "it's a little premature" to speculate when funds might be forthcoming. The appropriation for the Clean Coal Technology Reserve Fund won't clear the Senate until fall, and proposals to fund KR are among scores that will compete for the federal money.

The U.S. doesn't have a lot of time to waste. Steel producers in Brazil, India, and other countries are also taken by the economies of the KR process. South Africa's state-owned steelmaker, Iscor Ltd., is already building a 300,000-ton KR plant, which is scheduled to come on line by 1989. While Japanese steelmakers are reluctant to divulge their plans, sources close to the industry say they, too, are studying KR.

Unless a commercial-scale plant proves the technology, however, the conservative steel industry isn't apt to abandon its traditional blast furnaces and coke ovens. Even if it does, conversion to the process will not happen until at least the 1990s. Weirton President Robert L. Loughhead says his company will rely entirely on KR if its proposed demonstration plant is successful, but he adds that such a conversion could not be complete for 20 years.

Still, most experts believe that the days of conventional ironmaking are numbered. "The initiative belongs to those companies and countries that build demonstration plants," says John F. Elliott, a professor of metallurgy at the Massachusetts Institute of Technology. The longer the Americans wait, he warns, the greater their chance of being left behind. Given the already precarious position of the U.S. industry, this looks like one race it can't afford to lose.●

THE GERMAN DEMOCRATIC REPUBLIC

● Mr. GORE. Mr. President, there are times when the great affairs of states and the smaller affairs of individuals intersect. Sometimes, and very rarely at that, something happens to even the odds between the little man and the state.

One of the principle aims of the German Democratic Republic [GDR] is to garner acceptance from all the nations of the world—not an easy task, considering the East German Government's reputation for hardline internal discipline and its talent for espionage, which recently embarrassed our West German allies yet again.

A second purpose in the German Democratic Republic grand design, not unrelated to the first, is to find the resources it needs in order to pursue its economic development. The German Democratic Republic is already one of the world's leading industrial producers, and stands at the forefront of those countries that make up the Soviet Union's trading block. But it aspires to a more prominent role in the economic world at large. And to have that, it must first have access to investment capital from the West.

In both these areas—broader international acceptance and access to capital—the United States is important for the German Democratic Republic designs. Our markets are of interest; our bankers are of interest; and the ability to be treated and received as a sovereign equal is also of interest.

Now let me turn to the interests of a number of private U.S. citizens. There are, in this country, some 2,000 individuals whose property was confiscated by the Government of the German Democratic Republic, generally in the late 1950's. Their cases have been culled from a much larger group which submitted claims to the U.S. Foreign Claims Commission. According to the Commission, the German Democratic Republic owes these people on the order of $70 million plus back interest.

Since 1975, when the United States formally recognized the German Democratic Republic, our Government has been negotiating with the German Democratic Republic for settlement of these claims.

Another negotiation has also been underway, to which the U.S. Government is not a party, but a sympathetic observer. Groups representing Jewish survivors of the Holocaust are seeking reparations from the German Democratic Republic, just as—much earlier—reparations were secured from the Federal Republic of Germany.

The common denominator between these two negotiations is that the claimants are not young people and cannot wait forever for justice to be done.

These two questions converge, in my case, because I have a constituent who holds one of these 2,000 claims, and who corresponds with me about it, just as she corresponded with my predecessor, Senator BAKER.

Recently, my constituent sent me a clipping from the financial pages, showing that U.S. banks had been involved in floating a $500 million loan for the German Democratic Republic. That didn't seem right to her, and it doesn't seem right to me—although it's perfectly legal and it may be good business (since, after all I'm sure that our bankers won't get in the kind of trouble lending to East Germany that they got into when they lent to Poland).

Oddly enough, the day her letter came, I was reading another letter—from the German Democratic Republic's Ambassador here in Washington. The Ambassador was drawing my attention to an arms control proposal related to chemical weapons, developed through the collaboration of experts from his country and from West Germany's Socialist party. Whether or not you agree with this proposal, it is clear that the German Democratic Republic takes it seriously.

Mr. President, these things capture the essence of the German Democratic Republic's situation. They want to deepen their commercial ties with our country, and they want to be dealt with as serious players in the global economy. But they are also playing a slow, grudging game against the interests of 2,000 of our citizens, and against the principle of reparations.

I must admit that I considered submitting legislation designed to bar the German Democratic Republic from access to American banks, until the claims are equitably settled. But the Department of State argues with some force that this would lock the situation in place, and completely block the negotiations now underway.

So I am prepared to wait awhile to see whether the Department's very cautious optimism turns into any genuine progress. In the meantime, I will not only refrain from attempting this kind of legislation, but will counsel others to refrain as well.

During this period, I hope to impress upon the German Democratic Republic's diplomatic representatives the need for the country to assess its priorities. Do they want to speed up the process of settlement and do some good for the living; or do they want to continue this waiting game. I am confident that if the East German officials think this through, they will conclude that these claims are just, and that the best way to serve their own country's interests is to make sure justice is served.●

BREEDER TECHNOLOGY

● Mr. McCLURE. Mr. President, I want to call to the attention of Members of the Senate an article that appeared in the October 1985, issue of Nuclear News, the major publication of the American Nuclear Society whose membership encompasses the full spectrum of engineers, scientists, and other professionals in the field of nuclear power research and commercial nuclear power production.

The article to which I refer describes an innovative approach to breeder technology that has the potential of resolving global concerns about proliferation and safety with respect to breeder reactors and reprocessing of reactor fuels. As the article points out, this new concept is not just another paper study, but a system whose key elements have been demonstrated through experiments performed at the Argonne National Laboratory facilities in Idaho.

Ever since the cancellation of the Clinch River Breeder Reactor Pro-

gram, the U.S. program in breeder research has suffered from a lack of focus, to the point where we have severly lagged behind the international community in what we are able to bring to the table of international collaboration in breeder research.

Argonne's Integral Fast Reactor Program, described in this article, holds the promise of leapfrogging the foreign progress in breeder research in a manner that can contain the problems of plutonium proliferation, and do so in an inherently safe and economical way.

Already, this concept is receiving tremendous domestic attention. The two companies under contract with DOE to provide innovative breeder reactor designs have stated in no uncertain terms that their choice of fuel would be metallic—the key component of the integral fast reactor concept—if further testing of this fuel verifies what Argonne already predicts in terms of costs and safety margins.

Quoting from Rockwell International's letter to DOE,

". . . metal (fuel) is less well proven but offers a number of potential, significant advantages. Testing proposed for the next few years is aimed at substantiating the characteristics and integrity of metal fuel, thereby permitting the realization of economic, safety, and other perceived advantages of this fuel type. . . . (We) have chosen to focus (our) design around metal fuel.

A similar letter to DOE from General Electric Co. states:

To date our analyses indicate that there are several metallic fuel advantages. . . . We continue to be encouraged by . . . ANL's program to confirm the potential benefits of metallic fuel. We think the current U.S. DOE Program on innovative liquid metal reactors and supporting national laboratory technology will yield the technological breakthroughs needed for the economic deployment of this important technology.

Mr. President, I ask that the complete text of the Nuclear News article on the "Integral Fast Reactor" be printed in the RECORD.

The article follows:

THE IFR: A FRESH LOOK AT AN OLD CONCEPT

(By John Graham)

The scientists and engineers at Argonne National Laboratory believe they can build a better mousetrap (i.e., a better nuclear power reactor), and they are anxiously awaiting the world to beat a path to their doorway. Better yet, the Argonne officials say their mousetrap is not just a paper design. It is based on the Experimental Breeder Reactor II (EBR-II) and associated fuel cycle facilities, which have demonstrated years of operating experience.

The Argonne concept, which is called the Integral Fast Reactor (IFR), came to the forefront with the demise of the Clinch River Breeder Reactor (CRBR) project, and IFR proponents have since been laboring to convince a skeptical world that this is, indeed, the best new approach for advanced fission reactors. As this is written in September 1985, IFR advocates appear well on their way toward some degree of success; nonetheless, they must overcome many obstacles before they can hope to claim the grand prize.

In the first place, U.S. national leaders must decide if the country truly needs an advanced reactor and if they can justify spending taxpayers' money for such a hedge against future energy shortages. They will vote to spend this money only if there is sufficient public agreement on an urgent need for new reactor concepts.

The old free-market axiom about the better mousetrap implies an "urgent need" to kill mice. Thus, *need* (the more urgent, the better) is a primary motivator in both democratic and free-market ideologies. The CRBR project, for example, foundered when U.S. political leaders—hard-pressed to cut the federal budget—became convinced that a majority of the national electorate felt no urgent need to demonstrate any advanced nuclear reactor. These same leaders also argued that the private sector should do more to guarantee the future of nuclear power, including making a basic decision on what, if anything, should be done about advanced reactor concepts.

For its part, the private nuclear sector is wedded to the light-water reactor, which has been proven commerically, and industry officials generally expect the LWR to be the preferred reactor for the foreseeable future. Nonetheless, some nuclear advocates argue that the LWR, which relies on engineered safety devices (i.e., redundant pumps, redundant power and cooling resources, etc.), should be phased out and replaced by more advanced reactors, such as the IFR, which have "passive" (also called "inherent") safety features. Only then, these advocates argue, will the public perceive nuclear power as "safe enough."

All this has driven a wedge into the heart of the nuclear community and has caused LWR advocates (the nuclear lobby, reactor, vendors, many utility executives, and others) to view the IFR and other advanced reactor concepts as a potential near-term threat to all nuclear commerce. This has created a great deal of confusion both within the nuclear community and on the outside, because previous advanced concepts, except gas-cooled reactors, were considered extensions of LWR technology.

The IFR and other advanced reactor concepts face yet another related problem. In the wake of CRBR, the Reagan Administration sought to get out of the nuclear business by handing much of it over to the private sector, which has traditionally depended on the federal government to pay for costly advanced reactor programs. This has led to a paradox where some federal officials say that the private sector is not interested in advanced reactors, and certain private sector spokesmen have said the same thing about their federal counterparts. In truth, since CRBR, neither side has shown much interest in new reactor concepts, but federal leadership in this arena has been particularly chaotic.

Within the past few days, however, U.S. Department of Energy officials have taken positive steps to correct this leadership deficiency (see related story, page 32). This action suggests that the future of advanced reactor concepts may not be so tightly bound by the DOE's unwillingness to play a dominant leadership role as by the Department's ability to convince the budgetmakers that the taxpayers should pay for some nuclear demonstration projects.

The politics of the next decade will likely be dominated by budget deficits; thus, all federally funded projects will be weighed individually against the question of an urgent need for them. Even now, there is considerable concern that the IFR may die aborning for want of adequate funding, and the future scrutiny of all such projects will become increasingly more severe.

THE IFR

The history of the IFR is as old as nuclear power itself and as new as the ongoing national contest for the best conceptual advanced reactor design. It is a progeny of the Experimental Breeder Reactor I (EBR-I), which, on December 20, 1951, produced the first electricity by nuclear fission, and of EBR-II, which has been operating very successfully for more than 20 years while generating electricity, proving breeder technology, and providing invaluable irradiation test services.

Despite their proud history in the realm of research and development, the progenitors of IFR have not achieved star billing in the commercial world of nuclear power. In the first instance, the nation's decisionmakers turned away from EBR-I and breeding technology and developed light-water, thermal reactors for commercial service. Later, in the first breeder reactor conceptual design contest, EBR-II was passed over because it uses metallic fuel and has a "pool" configuration.

Soon after the nuclear industry was launched, the attention of the decisionmakers turned toward the most logical advanced reactor successor to the LWR. At that time, it was believed that economies of scale would mandate increasingly larger plants, which, for even greater economies, would be clustered together, with several large reactor units on each site. At the same time, it was perceived that uranium, especially its fissionable isotope (uranium-235), would be relatively scarce in nature. Because of this assumption, which has proven to be faulty, the subsequent line of philosophy held that plutonium, produced in the early cycles of the thermal reactors, must be recycled as fuel in LWRs. Gradually, but relatively soon on the planning horizon, breeder reactors would be needed for fuel conservation, and they would be committed to replacing LWRs. In this scheme, it was only natural that the most logical future breeder was once thought to be a direct descendant of the LWR.

All this, in turn, led to the hardening of a philosophy around mixed-oxide fuels for both LWRs and breeders, along with large, free-standing, chemical reprocessing plants using the "Purex" technology. The idea was that all spent fuel would be shipped to several large commercial reprocessing plants around the country, where the plutonium and uranium would be separated from a waste stream. The usable fuel would then be refabricated and returned to operating reactors.

This view of a commercial enterprise built around LWRs, reprocessing, and breeder reactors prevailed until the early 1980s, although gradual opposition, from both inside and outside the nuclear community, has finally tipped the scales against this structured concept. In the first place, uranium has been found in far greater abundance than the prudent early estimates; then, the users of nuclear fuel have gradually turned their backs on reprocessing, because plutonium recycle has not been demonstrated to be either desirable or economic in the U.S. marketplace. Moreover, the need for breeder reactors, especially large ones designed to replace LWRs, has simply not yet been

proven by nuclear advocates. Plutonium recycle also fell from grace during the Carter Administration, which condemned the whole Purex process and associated breeder reactors as being "proliferation-prone." And, finally in the wake of the Three Mile Island accident and numerous and costly construction fiascoes in the early 1980s, the concept of large nuclear plants—as well as nuclear power itself—has been called into question by a substantial percentage of the nation's electorate.

The theories on what went wrong with nuclear power are as numerous as the nuclear advocates and nuclear opponents. Whatever the central cause, if indeed there is one single root cause, the U.S. nuclear power industry is certainly in a depressed state. Indeed, the very future of the nuclear power option in the United States has been called into question by major industrial groups of nuclear advocates, and they have argued for major national institutional changes. Meanwhile, a large segment of the nuclear advocacy community continues to be wedded to the LWR and committed to the philosophy that large breeders will ultimately be required as successors.

Others within the nuclear advocacy community, however, believe that institutional conditions are not likely to return to a position favoring old nuclear reactor concepts, and especially not that of large, free-standing, Purex reprocessing plants. These people believe that the future of nuclear power lies in the realm of small, inherently safe reactors, with integral reprocessing plants making them self-sufficient. Such reactors would better fit the conditions that exist in this country today, these proponents say.

Enter EBR-II and the IFR concept. EBR-II was committed as a natural successor to EBR-I, when a larger demonstration facility seemed appropriate, and was placed into service during the summer of 1964. The primary focus of EBR-II operation was to demonstrate the feasibility of metallic-fueled, sodium-cooled fast breeder reactors as generators of electricity. A very important secondary step involved a demonstration of the applicability of pyrometallurgical techniques for onsite reprocessing of the reactor's spent fuel.

The performance of EBR-II as a power generator has been highly satisfactory, with a record of high plant availability and power production factors exceeding that of commercial LWRs. EBR-II's normal power rating is 57.25 MWt, from which it provides 17 MWe to the Idaho National Engineering Laboratory and 12,000 lb/hour of saturated steam for local space heating.

The reprocessing of spent EBR-II fuel was conducted routinely on site from 1964 to 1969, during which time the inherent promise of a simple and rapid on-site turnaround of discharged fuel was amply demonstrated. One of the spectacular values of metallic fuel is that it does not require an extensive cooling-off period, and, on certain occasions, EBR-II fuel was discharged, reprocessed, and returned to the reactor core within 29 days.

In the early days, however, metallic fuel had a major problem of swelling during the fissioning process. This was such that very low fuel burnups of only one or two atomic percent were achieved. Fast reprocessing provided a partial compensation for this low burnup; metallic fuels fell out of favor during the developing years described above, however, and mixed-oxides became the world's favorite for commercial applications.

Meanwhile, R&D work on metallic fuels continued at ANL, and, by the time of the CRBR demise, the Laboratory had developed a promising alloy of plutonium, uranium, and zirconium. This new fuel has proven to have a sufficiently high burnup (More than 10 atomic percent) to be competitive with mixed-oxide fuels. In the eyes of many in the research community, metallic fuel offers so many benefits that it must now be considered the perferred fuel for advanced reactor concepts. Nonetheless, this postulated theory lacks an adequate data base, and ANL officials are seeking, as part of the IFR effort, to use EBR-II to demonstrate the feasibility of this new fuel. Likewise, they want to refurbish the adjacent fuel reprocessing facility and prove out the entire process of burning the new metallic fuel, reprocessing it, and handling the waste products. All these steps can be performed in a highly successful manner, the researchers at Argonne say confidently; nonetheless, all three must be proven before the IFR can become commercially feasible.

Argonne officials argue that EBR-II and existing facilities offer the best route for demonstrating the advanced liquid-metal reactor (LMR) concept. The facilities exist, and adapting them for use in the demonstration project is relatively simple and, they say, a real bargain compared to the projected costs of other demonstration projects. According to Charles Till, associate laboratory director for reactor research and development, the cost of the demonstration reactor is zero, because EBR-II is there and operating, and the cost of refurbishing the reprocessing facility is "modest." In a 1985 Congressional hearing, Till stated that the reprocessing facility has been decontaminated and is ready for new equipment. He estimated the facility upgrade and modification costs at $12.2 million and the new equipment at $3.0 million—or a mere $15.2 million, which is infinitesimally small alongside the once-projected costs of CRBR and the Barnwell reprocessing facility.

The IFR is a generic concept, not a fixed design. It does, however, depend on the pool concept, metal fuel, and pyrometallurgical reprocessing technology. As such, it is closely associated with the DOE's current contest for a conceptual design for an advanced LMR. This contest has been narrowed to two industrial competitors—Rockwell International and General Electric.

In the preliminary, first-year stage of this three-year contest, Rockwell has signaled its preference for metallic fuel; General Electric, which argues that there are not yet enough data on the Pu-U-Zr alloy, has indicated that mixed-oxide is its first choice. The Rockwell design, apparently, could be demonstrated by EBR-II and associated facilities; GE's, at the Fast Flux Test Facility (FFTF) in Washington state. GE will also propose an integrated reprocessing (Purex) option. Both conceptual designs will be for small, modular, pool-type reactor units, which can be manufactured in a shop and shipped to a building site. The IFR concept is particularly suitable for this last condition.

INHERENT SAFETY

Part of the current controversy over reactor design concerns the question of "inherent" or "passive" safety, which relies on the natural laws of physics—and not engineered safeguards—as the ultimate barrier against severe reactor accidents.

Various reactor designers have pet philosophies on the best approach to an inherently safe reactor. The most basic arguments are on the coolant (or heat transfer) medium. Some designers continue to favor light water, while others prefer gas, which has had a long and distinguished technological history. A large portion of the nuclear R&D community, however, prefers liquid sodium as the optimum coolant. Sodium-cooled reactors operate under normal atmospheric pressure and at a temperature of about 500 °C, well below the 900 °C boiling point of sodium. Moreover, sodium-cooled reactors do not present a corrosive environment, and this enhances the potential longevity of a sodium-cooled plant.

In the first major breeder contest, liquid sodium was the overwhelming favorite for the coolant. As for "best fuel" and "best design," the CRBR and its complement, the FFTE, were committed, and both incorporated mixed-oxide fuel and the"loop" design. In a loop configuration, primary sodium is pumped through large pipes to heat exchangers outside the reactor vessel. As noted elsewhere, the CRBR project was scrapped, but FFTF was completed. It is in operation and, as does its counterpart in Idaho (EBR-II), provides invaluable test data for breeder reactor technology (see *NN*, May 1984, pages 56-61).

Due to the early problems with metallic fuels, mixed-oxides won the first best fuel contest rather handily; the loop design decision for CRBR and FFTF, however, was not based on such conclusive evidence. Today, it appears that the pool-type reactor has become the favorite among designers of LMRs; thus, the major breeder argument has shifted to deciding on the best route to inherent safety and the preferred reactor fuel.

Among their argument for the pool design, and the demonstrable inherent safety features that flow therefrom, Argonne officials cite EBR-II, which is submerged in a pool of liquid sodium coolant. (see Fig, 1). Tests at EBR-II have demonstrated that natural convection currents in the sodium pool will keep the core acceptably cool, even if all coolant pumps were to fail simultaneously.

Other arguments for the pool configuration include the following:

The regular conformation of the primary containment tank and the lack of nozzles and penetrations greatly simplify design, construction, and inspection activities. Such simplification reduces the required size of the containment building, and the compact design means smaller amounts of construction materials.

All systems containing primary (radioactive) sodium are located within the primary containment barrier. The effects of sodium leakage from primary components are, for the most part, confined to the primary tank.

The submersion of all primary components under constant temperature sodium greatly reduces problems of thermal stress.

The effects of loss of pumped coolant flow are considerably mitigated because the core will always remain covered with sodium.

The location of intermediate heat exchangers within the primary containment vessel eliminates the need for heavily shielded external facilities, e.g., pipe galleries, equipment cells, etc.

Now that they have developed a fuel alloy that, they say, can compete economically with mixed-oxides, Argonne researchers are hailing their metallic fuel for its positive safety advantages. Its superior heat transfer properties, they say, give metal fuel a distinct safety advantage over conventional mixed-oxides. Among other things, they

have studied the effects of different fuel pins on reactor performance during simulated loss-of-coolant flow accidents (i.e., where external power is lost to coolant pumps), as demonstrated in Fig. 2, have found that—under these accident conditions—metal fuel produces much smaller rises in coolant temperature than its oxide competitor. Because metal fuel cools faster, it presents less chance for heat to build up in the core. Accordingly, in a loss-of-coolant accident in an LMR with metal fuel, coolant temperature would never approach the boiling point of sodium. Thus, a core melt accident is not postulated as credible, while the potential for a molten core in an LWR has become a celebrated issue since the TMI accident.

IFR FUEL

The metallic fuels proposed for IFR are composed by a heavy concentration of plutonium, and this mandates reprocessing if the concept is to become commercially feasible. Some people set on-site reprocessing and refabrication as a negative element because it would add an additional facility at a commercial nuclear power plant and would require yet another layer of technical competence at each station. Moreover, reprocessing has a bad reputation within diplomatic circles because of its relationship to separated plutonium and the associated potential for the diversion of weapons materials. The Argonne officials believe that the IFR, because of the compact nature of the reprocessing and refabrication modes, can easily overcome the first objection. As for the second, they say that the IFR can enhance national nonproliferation goals because, in the pyrometallurgical process (and associated refabrication of new fuel), plutonium is never separated into a single element. In addition, the entire operation remains very radioactive throughout and must be conducted remotely using complex robotic technologies. This, say, precludes tampering by terrorists or by anybody else. The same officials are quick to point out, however, that reprocessing and refabrication were run sucessfully during five years of routine operations at FBR-II. "It's complex," they say, "but it has been proven by years of operating experience."

In the pyrometallurgical process proposed for IFR, the fuel elements would first be disassembled to remove the pins from their cladding. This is a mechanical process. The second step is halide slagging, which takes advantage of the fact that the rate and direction of chemical reaction between a molten fuel alloy containing fission products and a molten halide salt can be controlled by the composition of the salt.

In the IFR halide slagging process, the molten fuel alloy would be dissolved in the salt mixture, and magnesium dichloride would be added to control the reaction. If the control agents are added in the right proportions, the fission products—notably barium, strontium, and rare earth elements—are transferred from the molten fuel to the molten salt, which becomes a waste stream and carries the fissions products with it.

Next, the fuel alloy is transferred to electrorefining. In this step, the molten fuel alloy is dissolved in cadmium and placed in a crucible with a molten salt electrolyte, which is a mixture of lithium and potassium chlorides along with small amounts of uranium and plutonium chlorides. The electrolyte floats on the surface of the more dense cadmium-molten fuel mixture.

A positive electrode is formed by the cadmium-fuel mixture in the bottom of the crucible, while a negative electrode is inserted into the electrolyte from above. When the appropriate voltage is applied across the electrodes, the uranium-plutonium mixture collects on the negative electrode. Other, unwanted elements remain in the cadmium, which becomes waste.

Fresh fuel for the IFR would be fabricated in a single-step casing process by injecting molten fuel into Vycor glass, Up to 100 pins can be made in a single operation. When hardened, the fuel would be removed from the glass and sheared to the proper length.

Fuel refabrication foreseen for the IFR is exceedingly less complex—and therefore more cost-effective—than the processes involved in preparing mixed-oxide fuel pellets.

The reprocessing and refabrication operations described above have been demonstrated thousands of times with the EBR-II driver fuel. They must be fully demonstrated, however, with the Pu-U-Zr alloy now being proposed for the IFR. Argonne officials say they are confident that this can be accomplished in a straightforward and cost-effective manner.[1]

The simplicity and compact nature of the equipment involved in fuel reprocessing and refabrication technology is one of the most impressive among the numerous Argonne claims for IFR economic feasibility. For example, in a cost estimate for a new, central facility to handle 1400 MWe of power from several modular LMRs, Argonne officials have designed a reprocessing/refabrication facility that would be housed in a 32- × 52-ft building. The estimated cost of this facility, fully equipped, is only $48 million. Among the other installed equipment, this building would house two remote cells for electrorefining core and blanket fuel. Note that each cell would occupy only a 5- × 5-ft-square space.

IFR ADVOCATES

On August 28, 1984, Walter Massey, at that time the director of Argonne National Laboratory, formed a blue-ribbon peer review panel to give an expert appraisal of the IFR concept. This group is composed of fast reactor experts of world renown from academia, the utility industry, and private consultants. After meeting several times, the panel filed its first finding on October 31, 1984, in a letter to Massey. The text of this letter is very optimistic about the IFR's potential as an advanced reactor concept, and the review panel strongly recommends a demonstration (in EBR-II and associated facilities) of the new alloy fuel, its reprocessing and refabrication, and the associated treatment of waste products. (An edited version of the group's findings appears in the box.)

Active support for the IFR at the DOE has not been very apparent since the demise of CRBR. The Department has undergone several top management changes at both the departmental and nuclear energy levels, however, and this obviously has affected its ability to maintain a good focus on the IFR and related programs.

In the recent past, however, the Office of Nuclear Energy has been reorganized with a new division designated specifically to watch over LMRs and other advanced reactor concepts (except HTGRs, which have a separate division). Ross Humphreys, who has been placed in charge of the LMR division, is an old-timer in breeder research activities, having served at the national laboratories at Oak Ridge, Argonne West (on EBR-II), and Los Alamos before moving to the Atomic Energy Commission and ultimately to the DOE. Humphreys says he is "very excited" about the IFR concept and the future of metallic fuels.

John Herrington, Secretary of Energy, by his own words, appears to have become an advocate of the IFR as well. After a recent visit to EBR-II, where he was briefed on the concept, Herrington told a reporter he thinks the IFR "is the best technology in the world, and many countries will be coming here to learn about it."

If Secretary Herrington's prediction comes true, and the world beats a path to Idaho to learn about the IFR, then the metaphor about the better mousetrap will be appropriate.

SUMMARY FINDINGS—IFR SPECIAL COMMITTEE

Findings:

There is a national need for a proven breeder reactor since the breeder represents the one single technology in existence today which has been demonstrated to be practical and have the capability to provide an inexhaustible source of power.

The IFR appears to offer a new, exciting approach for the U.S. to recapture leadership in breeder technology.

The capital costs to develop and demonstrate the IFR metal fuel element and the associated fuel cycle appear to be modest and could be accomplished rapidly.

The IFR offers a breeder concept in which the potential for theft or diversion of fissionable materials is significantly minimized and offers significant non-proliferation advantages over fuel cycles based on the Purex process.

The scientific evidence in support of the concept is judged to be more than adequate to justify proceeding rapidly with research and development and demonstration of feasibility as presently envisioned for the FY85 and 86 period.

The committee is favorably impressed by the potential of pyrochemical reprocessing. It is inexpensive, has many operational advantages, and as stated above minimizes the possibility of theft.

Characteristics of the metal fuel tend to give the metal-fueled reactor the ability to tolerate a variety of transients as readily as, and possibly more readily than, an oxide-fueled reactor.

Committee members:

Max Carbon, chairman, Chairman, Nuclear Engineering Department, University of Wisconsin.

Wallace B. Behnke, Vice Chairman, Commonwealth Edison Company.

Manson Benedict, Professor Emeritus, Nuclear Engineering Department, Massachusetts Institute of Technology.

Hans Bethe, Nobel Laureate in Physics, Cornell University.

Spencer Bush, Retired, formerly with Pacific Northwest Laboratory.

Walter McCarthy, Jr., Chairman, Detroit Edison Company.

David Okrent, Chairman, Mechanical, Aerospace, and Nuclear Engineering Department, University of California at Los Angeles.

[1] The information on IFR fuel reprocessing has been taken in large part from written material prepared in 1984 by Charles Till, Argonne's associate director for reactor research and development. Other material in the literature suggests that the pyrometallurgical steps now planned may not be in the exact same sequence as given in Till's early and simplified text. Nonetheless, the above material is believed to be sufficiently correct for this level of presentation.

Lombard Squires, Retired, formerly with E. I. Du Pont de Nemours Company.

Richard Wilson, Chairman, Department of Physics, Harvard University. ●

AN ALL-MISSOURI WORLD SERIES

Mr. EAGLETON. Mr. President, I have a resolution which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

S. RES. 239

Whereas, the great State of Missouri is home to both the Kansas City Royals and the St. Louis Cardinals, and therefore on this day of October 17, 1985, is the Baseball Capital of the World;

Whereas, the World Series has not been better placed since 1944, when the St. Louis Browns faced the St. Louis Cardinals;

Whereas, both the Cardinals and the Royals have overcome great adversity, coming from behind to win in their opponents' ball parks, in their respective League Championships, and in so doing proved themselves both great teams;

Whereas, these two teams will soon meet in the 1985 World Series;

Whereas, their performance demonstrates once more to the Nation and the world that the very best baseball in the world is played in two areas of the country—eastern and western Missouri;

Whereas, St. Louis, the Gateway to the West, is now the Gateway to the Best in the National League.

Whereas, Kansas City, the Heart of America, is now the Heart of the American League;

Whereas, the "Show Me" State of Missouri is now the Showcase of the World's Greatest Baseball Teams and Fans; and

Whereas, the two Senators from Missouri are incurable baseball fans, and are most pleased and proud of the accomplishments of the Royals and the Cardinals: Now, therefore, be it

Resolved, That the Senate recognizes the great accomplishments of the St. Louis Cardinals and the Kansas City Royals, wishes both the Cardinals and the Royals the best of luck, and looks forward to a great "Show-Me" Series.

The Senate proceeded to consider the resolution.

The PRESIDING OFFICER (Mr. GORTON). The Senator from Missouri.

Mr. EAGLETON. Mr. President, I want to point out this resolution is offered on behalf of myself and the distinguished junior Senator from Missouri [Mr. DANFORTH]. Yesterday, Mr. President, was perhaps one of the most exciting days of my life. Two Missouri teams clinched their respective drives for the pennants of the National League and the American League. Only one other day looms as large in my mind, 1944; September, Chet Laabs, right-handed hitter, two home runs against the New York Yankees to do the impossible dream for the bedraggled St. Louis Browns, later to become the Baltimore Orioles. And that was the last all-Missouri series, two St. Louis teams at that time, 1944—sort of bedraggled, decrepit athletes while the robust and those in good shape were off fighting World War II, and now the dream has come true again in 1985, an all-Missouri World Series.

Senator DANFORTH and I by this resolution wish to pay tribute to the noblest of the noble, the Cardinals and the Royals. I yield to my colleague.

Mr. DANFORTH. Mr. President, I compliment Senator EAGLETON on his well-crafted resolution, which so accurately, if in somewhat understated fashion sets forth the present condition of major league baseball.

Mr. President, my only regret at this point in the Senate's procedure today is that this resolution comes so late in the day that many of our colleagues, who undoubtedly would like to sign up as cosponsors for the resolution or come to the floor and participate in debate on the resolution, are unable to be present. But I know that the resolution does speak for the hearts and minds of a number of us, such as Senator EXON and Senator DIXON, Senator SIMON, and others, because this has really been an absolutely remarkable year in baseball, particularly the end of the season with the tremendous effort by both the Cardinals and the Royals first to win their divisions—and it was a battle in both cases, decided in the last couple of days of the season—and then after winning their divisions to enter into the league championship series.

The Royals found themselves in a situation that has only taken place five or six times in the history of major league baseball in postseason play. They were behind three games to one. They won first in Kansas City and then twice up in Toronto, and that sort of come-from-behind spirit I think has exemplified that team, not to mention the incredible performance of George Brett, who has truly become Mr. October, replacing Reggie Jackson in that category. In game three, which was the pivotal game—the Royals had already lost twice—Brett went 4 for 4, including two home runs. He had three runs batted in, four runs scored, and he made the defensive play of the game. And then consider the Cardinals, who have the most brilliant manager in major league baseball, Whitey Herzog. They came up with two clutch home runs in the last two games, one by Ozzie Smith in the ninth inning in St. Louis in the fifth game of the playoffs, and one by Jack Clark yesterday in the sixth game with two outs in the ninth inning—an amazing line drive for a home run to snatch victory from the jaws of defeat.

This has been a great 24 hours for the State of Missouri, and it is going to be a great 10 days or so during the time of the World Series.

I have this wonderful thought in my mind of all these sports writers and media executives from the East, who downplayed the ability of the Royals to win the league championship series and downplayed from the beginning of the season the ability of the Cardinals to do anything but finish last in their division, packing up their Vuitton luggage with their Sulka shirts and moving out to Missouri for 10 days.

We have a lot of hotels and restaurants in our State and a lot of good stores, and I hope they are happy visiting our State and that they will spend a lot of money.

Mr. DIXON. Mr. President, I am delighted to hear those eloquent words. I support this resolution by my distinguished colleagues the senior Senator and the junior Senator from the great State of Missouri. They certainly have every right to be proud tonight.

As a Senator from Illinois, who comes from Belleville, directly across the river from St. Louis, that as a youth in high school, I recall the last time they had an all-Missouri World Series in St. Louis.

In fact, I recall the St. Louis Browns in the American League very well. I used to go to ball games in Sportsman's Park years ago, when the old Browns played there. They were only about 700 to 800 people in the ballpark.

I remember the saying in our part of the world about St. Louis, which was, "First in shoes, first in booze, and last in the American League." [Laughter.]

I recall going to the World Series, going the night before in a pickup truck from Belleville, with some of my high school buddies, and spending the night on the sidewalk, sleeping under an army blanket. I saw the St. Louis Cardinals defeat the St. Louis Browns in that World Series.

I congratulate my colleagues for repeating once again—only about four decades later.

Mr. EAGLETON. Mr. President, I move the adoption of the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to.

The preamble was agreed to.

ORDERS FOR TOMORROW

RECESS UNTIL 8 A.M.

Mr. GARN. Mr. President, I ask unanimous consent that once the Senate completes its business today it stand in recess until the hour of 8 a.m., on Friday, October 18, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. GARN. Mr. President, further, I ask unanimous consent that following the recognization of the two leaders under the standing order, there be a

period for the transaction of routine morning business not to extend beyond 8:30 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. GARN. Mr. President, following morning business the Senate will resume consideration of H.R. 3038, the HUD appropriations bill; at that point Senator MURKOWSKI will be recognized to offer an amendment on which there is 30 minutes of debate.

RECESS UNTIL 8 A.M. TOMORROW

Mr. GARN. Mr. President, there being no further business to come before the Senate, I move that the Senate stand in recess until tomorrow at 8 a.m., Friday, October 18, 1985.

The motion was agreed to, and at 7:52 p.m., the Senate recessed until tomorrow, Friday, October 18, 1985, at 8 a.m.

NOMINATIONS

Executive nominations received by the Senate October 17, 1985:

DEPARTMENT OF STATE

Gregory J. Newell, of Virginia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Sweden.

DEPARTMENT OF TRANSPORTATION

Jennifer Lynn Dorn, of Maryland, to be Associate Deputy Secretary of Transportation, new position.

DEPARTMENT OF EDUCATION

Bruce M. Carnes, of Virginia, to be Deputy Under Secretary for Planning, Budget and Evaluation, Department of Education, vice Gary L. Bauer.

SECURITIES AND EXCHANGE COMMISSION

Edward H. Fleischman, of New Jersey, to be a member of the Securities and Exchange Commission for the remainder of the term expiring June 5, 1987, vice James C. Treadway, Jr., resigned.

U.S. INSTITUTE OF PEACE

Allen Weinstein, of the District of Columbia, to be a member of the Board of Directors of the U.S. Institute of Peace for a term of 4 years expiring January 19, 1989, new position.

EXTENSIONS OF REMARKS

CONGRATULATIONS ON YOUR 125TH ANNIVERSARY

HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. GALLO. Mr. Speaker, this year marks the 125th anniversary year of the Oheb Shalom Congregation, of South Orange, NJ.

The congregation was founded in 1860, and was one of the seven charter member congregations of the United Synagogue of America, the congregational arm of Judaism's Conservative Movement.

Congregation Oheb Shalom is the second oldest congregation in my State, and the congregation has a very impressive history. Remarkably, nearly 100 members of the present congregation are direct decendants of the founding members of the congregation. The congregation treasures its history, and has maintained an accurate record of its development and its progress.

Recently I was lucky enough to have the history of the congregation forwarded to me by Mr. David Schechner, historian of the congregation.

This history is fascinating. It is the story of a small collection of people who shared a common vision of the future, of the past, and of their role in God's universe. It is the story of growth, commitment and responsibility. It is an understanding of the importance of men and women in all of our endeavors, be they spiritual or secular. Also, it is the story of how progress can be made even after there are differences of opinion.

Certainly, there is much that this body can learn from the congregation's history.

Mr. Speaker, today I would like to present just a portion of this history to my colleagues so that they, too, may have the opportunity to learn from its contents.

HISTORY OF OHEB SHALOM

The history of Oheb Shalom starts before its birth with the founding of B'Nai Jeshurun in the City of Newark in 1848, at a time when there were less than 200 Jewish families in the City.

B'Nai Jeshurun prospered and grew but as it grew there developed a quarrel within the congregation over whether the congregation should continue to function in what they referred to as the traditional manner or whether they would adopt the Reformed method of worship just as many German congregations were doing. This was a local aspect of what was, in fact, a worldwide argument. In 1869 the argument reached a crescendo at the congregation's annual meeting when the then President, Bernard Hauser, failed in his bid for re-election to the office of the President by one vote and Rabbi Isaac Schwarz, who was a supporter of the views of Mr. Hauser, was not reappointed to his position as Rabbi. The two of them and many of their adherents resigned their membership and left B'Nai Jeshurun. After some discussions, they determined that they would form a new synagogue where the practices would be similar to the ones that they had established at B'Nai Jeshurun and which were now being abandoned. A meeting was held in the Hauser house on Prince Street and a decision was made to form a new congregation to be called Oheb Shalom. It was also decided that Rabbi Schwarz was to be its first Rabbi. The synagogue was formally incorporated in the Fall of 1860. Dues were established at 36 cents per month, and the new congregation got underway. Services were held on the top floor of a dwelling on the West side of Prince Street, between Springfield Avenue and South Orange Avenue in Newark. Services were what we today call Orthodox and were conducted in Hebrew and German.

The building in which the services were conducted was large enough to have a two-story kind of arrangement; the women sat in the balcony. The men during services, particularly the officers, wore high silk hats. Sermons and instruction were in German which was for all practical purposes the official language of the synagogue even though it had, in fact, ceased to be the language of many of its members. At that time the language and other customs of the synagogues of Newark were determined chiefly by the European heritage of their membership.

Even in those days the vision of Oheb Shalom was broad, far beyond the recitation of prayers. The school was always of prime importance and, while the teachers were volunteers, they were always required to be competent.

As a further service to its membership, the congregation in 1866 bought and started operating the original congregational cemetery on South Orange Avenue.

The little congregation grew slowly but steadily. Members spoke to each other in either German or English, and many were beginning to feel the congregation's official language should be changed to English because that would evidence the ever-growing desire among the members to be more American and more like our neighbors.

Years of growth and change occurred. The congregation built and moved into what was then its brand of new brick edifice on the East side of Prince Street, halfway between Springfield Avenue and South Orange Avenue in the City of Newark. Here there was a gallery but it was used only for overflow worshippers. The records of the congregation appear to indicate that when the congregation moved to the new building on Prince Street, men and women began to sit together.

Rabbi Bernard Drachman, who served from 1885 to 1888, was the last of the European educated German-speaking Rabbis. English became the pulpit vernacular, although according to congregational records, a few times each year as a special treat for old-timers, Rabbi Willner would speak in German which was the language of his forebearers. That kind of practice continued through 1890.

At about that time, Rabbi Gluck became the Rabbi, and presided over what was a great period of expansion in the Prince Street building.

The year 1906 marked a turning point in the history of the congregation. That was the beginning point when the congregation began to move toward what we would call today's Conservative Judaism.

Oheb Shalom at the time numbered among its members more native-born Americans than immigrants. These native-born Americans had a burning desire that was spurred on by Rabbi Charles I. Hoffman and Dr. Solomon Schechter to build new styles and new practices and, yes, new rituals "as Jewish as the Torah and as American as apple pie." The view was popular and the synagogue grew.

It soon became apparent to the officers at that time that neither Prince Street as a locale (it had become the commerical center of the Jewish world of Newark) or the synagogue building itself (it had become overcrowded and much too small) were suitable. In 1907 a decision was made to move and planning and fund-raising began. In quick succession there came the property purchase of the High Street site, building decisions, fund-raising, breaking ground, and finally a cornerstone-laying ceremony for the new building in 1910.

The High Street synagogue building was dedicated in 1911. Among the speakers at what has always been described by those in attendance as an awe-inspiring service were Woodrow Wilson, then Governor of New Jersey and soon to be President of the United States, Solomon Schechter, head of the Jewish Theological seminary and worldwide leader of Conservative Jewry, and Dr. Solomon Solis-Cohen, renowned leader of the Philadelphia Jewish community. The dedication and the mood it generated sparked tremendous activity within the congregation. In that year, the Oheb Shalom Review was created; a synagogue library was installed; the Hebrew School volunteer principal and teachers gave way to professionals.

The programs of the congregation grew during the next ten-year period, and the congregation flourished as few congretations had. At the congregation's 1930 annual meeting, right at the deepest point of the Depression, the congregation burned its mortgage. It had been a nineteen-year financial struggle to do it, and the memory of that struggle coupled with the economic condition of the nation so impressed itself upon the minds of the congregation's leaders that it became an Oheb Shalom principle to say "that's the last of mortgages—never again!" This rule has continued to this very day so that all subsequent improvements and construction has occurred without the use of mortgages.

Rabbi Leon S. Lang joined the congregation in 1927. He was to be Dr. Hoffman's assistant, and his accent was to be on youth. He nurtured the high school which had been started in 1925 and founded the Men's Club which was called Kadimah. He continued the work of emphasizing the congregation's social and educational life.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member of the Senate on the floor.

Boldface type indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

With the departure of Rabbi Lang, the burden became too great for Rabbi Hoffman and thoughts of his retirement became a reality. Oheb Shalom called to the post Dr. Louis M. Levitsky, who proved to be a dynamo, sparking Oheb Shalom to render even greater service and to be more effective for the benefit of its members and the community. He pushed the congregation so that its name became synonymous with the words "adult education." Our program, which incidentally began in 1911 and was one of the first in the nation, was fine-tuned and expanded under Dr. Levitsky so that it became our most prominent feature.

In the mid-1940s, pressure started building for moving the congregation to the suburbs. Many of the members had moved to the suburbs, and those that remained were moving in increasing numbers. The distance members had to travel for services began to be a topic of discussion.

A substantial percentage of the members of the congregation urged the congregation to move to South Orange, but the majority approached the idea half-heartedly. Sufficient impetus for the move had not yet developed, and several motions on moving the congregation to South Orange, while provoking strong debate, failed to win passage at annual and special meetings.

Eventually a group of the members of Oheb Shalom led by Jennie Beck and Ralph Jacobson gathered a number of their South Orange and Maplewood neighbors and founded Beth El. The circle had become complete. Oheb Shalom, born of B'Nai Jeshurun, now had a daughter congregation of its own.

Pressure kept building for the move to South Orange. The controversy yielded eventually to necessity. In reasonably rapid order, the property at Scotland Road was purchased and plans for the building were prepared. Fund-raising became a major project with the slogan "No fanfare, no pressure, no mortgage." Through this low-key approach, four hundred families met each with the other and raised the one million dollars needed. The building in Newark was sold and all eyes turned to South Orange.

To save the gorgeous Silver Birch tree that stands outside the current building, the building was built as a mirror image of the one drawn by the architect so that the tree could remain. After much discussion, it was determined that the plans would be reversed, and the tree would be saved. The result of this decision is that in many ways the building is the reverse of what was planned.

All of this to save one of God's most beautiful creations—the tree that is outside.

Oheb Shalom showed its devotion to its tradition of continuity in the structure itself: The inscription above the Ark in the main sanctuary is the same one that was over the Ark on High Street, and the inscription on the side of the Ark in the Schechner Chapel is the inscription that appeared carved in stone on the outside of the building on High Street; the eternal light in the Schechner Chapel is the one from the original building on Prince Street; the doors of the High Street Ark are the doors of the Ark in the Schechner Chapel; the memorial tablets that appear in the Founders Hall are in most instances the memorial tablets that were brought from the High Street building; the cornerstone of the High Street building sits in the wall of our building here. Being unable to remove the stained glass windows, replicas of the memorial tablets on those windows were made and are today in Founders Hall.

Groundbreaking ceremonies for the building occurred on May 1, 1957, and the building was advanced sufficiently for a simple ceremony when the cornerstone was put in place in March of 1958. By July, the building was ready and in a moving ceremony the building on High Street was locked with the key that opened it and turned over to the new purchasers. The Torah scrolls were taken by a suitable parade to South Orange and installed in the new edifice over the weekend of July 22, 1958.

Oheb Shalom clearly had arrived and was the prime synagogue in the country. As what seemed to be the height of our activity, Dr. Levitsky advised that he would retire and in 1973 did so. After a search, Rabbi Alexander Shapiro was called to the pulpit and became the Rabbi of the congregation in that year and has recently celebrated his tenth anniversary with us, marked by his election to the presidency of the Rabbinical Assembly. He is the third Rabbi of Oheb Shalom to be so honored.

In 1983 Congregation Beth Torah, which had been established many years before in Orange and had a rich history of its own, found that it was unable to continue to operate at its own building. It sought to merge with another congregation whose philosophical views it shared.

In a moving ceremony, described and performed as if it were a wedding, Beth Torah brought her Torahs to the Ark of Oheb Shalom where they were lovingly accepted and the two congregations became one.

HOPES FOR THE FUTURE

It is difficult to compress one hundred and twenty-five years into a few pages. While one hundred and twenty-five years have passed, it is the hope of this important congregation that this period is merely an introduction to the future. We share that hope today.

DISTRICT HEATING AND COOLING TAX INCENTIVES

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. OBERSTAR. Mr. Speaker, district heating and cooling, one of the most cost effective and imaginative answers to America's quest for energy independence, was the subject of both the cover story and editorial in the September issue of Domestic Engineering magazine. This article is worthy of the attention of our colleagues.

The use of district heating and cooling systems [DHC] has ramifications far beyond the inherent energy efficiency of the systems themselves. Research by the Department of Energy shows that the expanded use of this technology can dramatically reduce oil imports, preserve the vitality of our cities and towns, and stimulate strong local economies.

Studies by the International Energy Agency indicate that if the United States were to begin to shift toward the expanded use of DHC, such a move would create significant additional downward pressure on the world price of oil.

Reduced oil prices have contributed greatly to the rebuilding of our current economic strength. But, think how much more competitive we would become if we reduced our balance of payments by significantly reducing oil imports. Such a move would also provide our domestic industry with less expensive energy at the same time.

Stabilization of the now lopsided balance of payments would not only help our manufacturing sector become more competitive in world markets, it would also help revitalize some of our basic industries such as steel, coal, and railroads.

The installation of citywide district heating and cooling systems will utilize now wasted thermal energy, and can make use of domestic energy resources such as coal, peat, wood waste, and municipal refuse.

The national self-interest mandates the promotion of such technology. But the key to this innovation is to assist the private sector as it gathers the financing needed to construct such systems. I have introduced H.R. 1507 which would clarify the tax and lending laws so such financings would be available.

In a year when tax expenditures are a major topic of discussion in Congress, I would ask my colleagues to recognize two facts as they consider supporting the 15-percent energy investment tax credit contained in H.R. 1507.

First, DHC technology is not experimental or unproven. However, the process of planning and installing these systems in cities is complicated, in the sense that the cooperation of the city government, various State and local agencies, and the building owners in an affected area must all be obtained.

Installing such a system is analogous to installing sewer or waterlines in a town where connection to them is voluntary. Thus the tax credit is needed for a short term to attract investor interest into an area filled with challenges, even though the technology is well known. However, the district heating and cooling industry feels confident that once attention is focused on this area, as the tax credit will do, the progress and examples developed during the period will inspire others to engage in expanding the use of this technology in the future.

I should note at this point that our West European allies have vastly expanded the installation of new district heating systems, particularly since the 1973 oil embargo. Today they use domestic fuels including coal, straw, and peat to heat their cities. We should do the same.

Second, the tax expenditure involved is very modest. Because of the planning time that preceeds the actual installation of a system, the industry projects the energy investment tax credit expenditure for a 5-year period following passage of H.R. 1507 to be less than $100 million.

I am confident that, upon careful consideration of the merits, my colleagues will agree that district heating and cooling is both a modest, and a very prudent invest-

ment in the energy future of our country. I urge their support for inclusion of the provisions of H.R. 1507 into the tax bill currently in markup, and its passage into law. I ask unanimous consent to include, at this point in the RECORD, "District Heating/Cooling, a Key in Energy Independence", and the editorial "District Heating/Cooling: on the Side of the Angels."

DISTRICT HEATING/COOLING—A KEY IN ENERGY INDEPENDENCE

(By Steve Shafer)

Wouldn't it be amazing if we could find a technology that would heat and cool America's urban areas and: Lower our dependence on foreign oil sources; make use of the vast amounts of waste heat from electrical generation plants; or burn garbage, helping eliminate the galloping pollution problems caused by landfills; or use America's abundant supply of coal.

This technology would also cut energy costs for inner cities and military bases; help keep exports competitive by lowering industrial energy costs and create many new jobs in the U.S. rust belt.

A "Star Wars" system, far in the future? No! That "amazing technology" is summed up in the phrase District Heating/Cooling—systems which deliver steam, or hot and chilled water, through piping to buildings in a given "district." America is the home of district heating—the first major system in the world was built in Manhattan in 1881.

Interest declined in these systems after World War II because of tax and investment policies that limited growth and because of pre-occupation with kilowatt production. There are some 3,000 unregulated institutional systems, which have increased in number since 1950. But investor-owned urban systems have decreased—there were 250 in 1951, 59 in 1980. There has been slow growth in municipally-owned systems, due largely to stimulus by HUD and DOE demonstration and grant programs, and some major utilities have recently decided to modernize DHC systems instead of abandoning them. (Consolidated Edison, downtown Manhattan; Hartford, CT; Baltimore Thermal, downtown Baltimore; Pacific Gas & Electric, downtown San Francisco system).

This hardly scratches the surface. The potential value in energy savings is huge. The Department of Energy says: "The technology for district heating and cooling is well understood and there are opportunities to improve system components in ways that would reduce costs . . . If the capital and operating costs of DHC systems can be reduced by 10 to 20 percent, its market potential in the United States could more than double and 2.5 quads of energy, primarily in oil and gas, could be saved over the next 20 years." (These estimates do not include institutional systems, district cooling or noncogenerating facilities.)

There are more compelling reasons for investing in DHC systems.

Energy Independence. Offshore oil production is down 55 percent this year. "You can't get away from the conclusion that there is less oil than we thought there was, and that has long range implications for the country," says Energy Secretary John S. Herrington. Every year, American consumers pay $57 billion for energy purchases overseas, weakening the U.S. economy.

"Energy security cannot be viewed only in terms of crude oil available as an improved commodity," the North American District Heating/Cooling Institute says. "If foreign oil producers will not supply us with oil or natural gas but only with derived products, we become more susceptible to indiscriminate price increases than in the past. While U.S. refineries are being closed down, heavy refinery construction activity is going on overseas. We require diverse domestic fuel and raw material sources in order to avoid being dependent on the import of critical products of many types . . ."

Use of waste heat. Every day the equivalent of more than 20 percent of the nation's river flow is heated with the energy wasted by power plants and industry, plus additional energy is blown into the atmosphere—enough to keep virtually every American home in comfort. DHC systems can make use of this wasted resource.

Fuel flexibility. "This represents district heating and cooling's major advantage over competing energy sources. The ability to use a variety of solid fuels, such as coal and municipal solid waste, allows district heating and cooling systems to offer lower prices. District heating and cooling's primary competition is oil and gas burned in onsite boilers. If district heating and cooling systems can burn cheaper fuels, distinct economic advantages can be realized . . ." From an extensive report by the National Academy of Sciences.

Using coal. America is the "Saudi Arabia of coal," yet the industry is severely depressed. Technology exists for "clean" coal-burning power plants. A proposal of DOE by NADHCI, supported by the American Boiler Mfrs. Assn., would showcase clean coal technologies and stimulate regional revitalization through the development of coalfired DHC systems.

Increasing export competitiveness. At recent DOE hearings updating the National energy Policy, NADHCI representatives John Patrick, Ameron Corp., Jurgen Kleinau, Keller/Dorr-Oliver and NADHCI president Richard Eckfield stressed the U.S. needs an adequate supply of energy at the lowest possible cost to maintain competitiveness in export markets and maintain and advance the standard of living in the U.S.

"Substantial and sustained growth in gross national product will be virtually impossible without low cost energy and we need this growth in our economy to assure continuing increases in employment." And exporting high technology isn't the ultimate answer.

Job creation. If only 5 percent of U.S. homes, factories, and office buildings were hooked into a district heating and cooling system, $19 billion in construction and manufacturing employment, $27 billion in piping and equipment sales, and $1 billion in domestic fuel sales would be created, according to Stuart W. Temple, new chairman of NADHCI and General Manager of Baltimore Thermal Inc.

Almost everyone who has looked at this problem agrees that sweeping investment, tax and regulatory reforms are necessary.

[From Domestic Engineering, September 1985]

DISTRICT HEATING/COOLING AND MECHANICAL CONTRACTORS: ON THE SIDE OF THE ANGELS

(By Steve Shafer)

After reviewing testimony by members of the North American District Heating and Cooling Institute at Department of Energy hearings held to update the nation's Energy Policy, it's difficult to figure out why DHC systems don't get unquestioned acceptance—and all the breaks the U.S. can deliver.

DHC systems offer big advantages to America: Cutting energy costs for colleges and military bases; burning garbage to produce power and help eliminate poisonous landfills; promoting exports by reducing industrial power costs. Also, not so incidentally for the readers of this magazine DHC systems mean big piping contracts.

Still, NADHCI leaders are involved every day in a major "selling" job in Washington. The pressure to simplify the taxation system is a factor. Across-the-board elimination of such features as tax incentives could rob the nation of the benefits of DHC systems.

Another factor seems to be the notion in high places that the U.S. will become an exporter of "high technology" and investment in basic industries is no longer very important.

Jurgen Kleinau, Keeler Door-Oliver, stressed this point in his testimony before DOE. Kleinau noted that, until 1973, one of the strong reasons for the large U.S. export business was low energy costs.

"Substantial and sustained growth in Gross National Product will be virtually impossible without low-cost energy, and is also necessary to assure continuing increases in employment," Kleinua said.

"High technology will not be the ultimate answer because it is a service activity and cannot be self-serving. High technology will serve primarily the manufacturing industries, who in turn can grow only when low-cost energy is available . . ."

NADHCI recommends a series of steps necessary to make full use of DHC systems, many of which are contained in a bill introduced by Representative James Oberstar (DFL-MN) and endorsed by MCAA.

Every mechanical contractor in the country ought to understand and get behind Congressman Oberstar's bill. As so often happens, mechanical contractors have a chance to be on the side of the Angels—and brighten their business prospects at the same time.

LET'S LOOK BEFORE WE LEAP

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. FIELDS. Mr. Speaker, a dark cloud is looming on America's horizon. A worldwide trade war is brewing, waiting to unleash its economic fury across every continent.

As Members of Congress, we must recognize not only the gravity of the current trade imbalance but the gravity of the actions we may take in response. I am not advocating sitting idly by while our trade deficit rises. But, we must act with extreme care and forethought, ever conscious that repeating the protectionist policies of Smoot-Hawley will bring that ominous black cloud rolling across our Nation and the world.

Mr. Speaker, let's "look before we leap" into trade protectionism. In that spirit, I commend to my colleagues the following insightful remarks by a man of great stature, Mr. Jack Rains. Chairman of 3/D International, a Houston design and management firm, Jack is a prominent Houston

businessman, a renowned civic leader and a frequent lecturer on international trade.

The article follows:

"TRADE WAR; AMERICA ON THE BRINK"

(October 1, 1985)

At first we heard "the United States has a trade problem," then it became apparent we had more than a problem—we face a crisis. Many fear headlines will soon read, "America in Trade War."

The United States has not enjoyed a positive balance in merchandise trading in 10 years. Until recently the current account, or the account which reflects our total trade balance, was positive. But since 1975, like the popular song says, "we're rolling downhill like a snowball headed for hell." We suffer devastating trade deficits. Further, we have become a debtor nation. Now domestic political pressures demand protectionist legislation—if granted it could well plunge the U.S. into a desperate trade war.

Three major root causes have created this crisis: First, an overvalued or "strong dollar;" second, unfair trade practices by our trading partners; and finally, America's private sector, in all too many cases, is not prepared to meet international competition. Let's examine each area separately:

DISADVANTAGE FROM A STRONG DOLLAR

The strong dollar is by far our biggest trade problem. Since 1969, when the Federal Reserve Board, in an effort to fight inflation, jacked up interest rates, the U.S. dollar has increased steadily in value. The resulting high yields, plus the safety offered by the U.S. investment climate, resulted in a flood of offshore funds seeking investment opportunities in this country. Predictably, the dollar rose against other currencies. Simultaneously the U.S. Congress dramatically increased deficit spending.

That in turn forced the U.S. Government to increase borrowing to cover the cost of the deficit. Increased demand created fierce competition for funds with borrowers from the private sector from Third World governments. Inevitably too much demand was chasing too few dollars. No one should have been surprised when interest rates rose. In reaction, the dollar soared above other currencies. Predictably the United States began to experience trade problems; as U.S. goods were over priced for export, imports became bargains—all due to the over-valued dollar.

Most experts agree that two-thirds of the U.S. trade problems today can be traced to government policy creating a strong dollar. Simply stated, the overvalued U.S. dollar prices U.S. goods and services out of the world's markets and lowers the price of imports. America's offerings are overpriced by 30%—that is a severe disadvantage.

The debilitating impact on the ability of U.S. businesses to export or compete with imports at home has resulted in a catastrophic trade imbalance. As exports fell and imports increased, the two combined to inflict pain on many American businesses and workers. This is a bad situation we must remedy. But remember, the overvalued or "strong dollar" is only two-thirds of the problem. Trade practices are also a culprit.

UNFAIR TRADE PRACTICES

The trade practices of our trading partners disadvantage American business. the United States believes in "free trade;" we must insist, however, that our trading partners practice "fair trade." Japan is a "worst case" example.

We grant Japanese businesses virtually total access to U.S. markets. But despite Japanese posturing to the contrary and repeated assurances of "good faith efforts," the bottom-line results are clear. Neither the United States, nor any other country's products and services for that matter, can significantly penetrate the Japanese domestic market.

It is reminiscent of the U.S. civil rights debate; whether de facto or de jure, the results are the same. The burden is on the Japanese to address and solve their patently unfair practices. Time is running out. Japan's continued failure to restore a balance of trade can only lead to cataclysmic results. We are on the brink of a disastrous trade war.

When reviewing United States-Japanese relations, consider the allocation of the United States and Japan of their Gross National Product (GNP) to defense and trade subsidies.

The Japanese spend 1% of their GNP on defense. In contrast, the United States spends 6.7% of their GNP on defense. The Japanese depend on a security umbrella provided by the U.S. military to protect the sea lanes so critical to Japan's survival. Meanwhile, the Japanese invest the money saved on defense spending to subsidize their industries, undercutting other countries in competition for international trade. Japan spends more than twice as much as the United States on trade subsidies.

While there is great alarm in America over the direct trade imbalance between the United States and Japan, that is merely the tip of the iceberg. The American taxpayer should be more concerned, even alarmed, over the effect of Japanese and United States policy on trading opportunities in the developing areas of the world, particularly the Pacific Rim.

Today the most promising area for future growth and trade opportunities exists in the Pacific Rim. The nations in that region are growing at a far faster rate than the rest of the world. Japan is moving to dominate that market . . . United States influence and business opportunities for U.S. firms are systematically excluded. Our government must address such fundamental problems, American business must not be placed at a disadvantage because of government intervention when competing with businesses of other countries. It is the U.S. Government's responsibility to see that the trade game is played fairly.

The European Economic Community (EEC) also takes a few cheap shots at Uncle Sam. Take for example the EEC practice of buying sugar at $0.27 per pound, providing farmers with an artificially high income, thus encouraging over-production. The EEC then dumps that sugar on the world market at $0.06 per pound. Such predatory trade practices have grievously injured the sugar industry in the United States.

We must demand that the Executive Branch of the U.S. Government—the President and his Cabinet—move decisively and promptly to level the field of competition.

The U.S. competitive stance is a problem. We can not blame all of our problems on the United States and foreign governments. The hands of American management and labor are far from clean. In the United States we have been living off the advantage we enjoyed following World War II. We dominated the world economically at that time, possessing the only economy not devastated by the war. While the United States grew fat, we tolerated special interest—business and labor—that today exacerbates our trade problems.

We lost in some cases, and surely handicapped in far too many others, our ability to compete in basic industries. We ignored the fact that our nation is no longer self-sufficient. We must import oil and other vital resources. In the 40 years since World War II the world has changed. Today Europe and Japan are competing with the United States on equal footing if not at an advantage. We must be competitive. America must trade successfully to survive.

The current posted productivity gains in manufacturing underscores our eroding competitive position. The United States gained 3.5% in productivity last year, while Germany moved up 4.7%, France 5% and Japan a whopping 9.5% or almost 3 times the U.S. gain. Our disadvantage grows.

Organized labor demands high wages and fights automation which would increase productivity. U.S. management asks for protection from foreign competition. When granted it allows sheltered U.S. businesses to gouge the American consumer for inflated profits. Worse yet, the management teams of those most favored businesses take their ill-gotten-gains, and instead of reinvesting in new plants and equipment to improve productivity and America's competitive stance, they follow the example of steel and autos, and diversify into unrelated industries like computing and real estate.

Basic U.S. industries must become competitive. The auto industry is a classic example of how the U.S. Government's protectionist policy is counter-productive.

Japanese automobiles require significantly fewer hours to produce in comparison with their U.S. counterparts. The cost of Japanese labor is substantially lower than the U.S. rate. The American public ranks the Japanese automobile superior to its U.S. competitor. When a product costs less, and is of better quality, clearly protectionist legislation preventing imports only serves to perpetuate Detroit's inferiority. Protectionism is not in America's best interest. Surely Congress can understand and embrace such a simple truth.

Steel is another grim case. The American steel worker is paid more than twice the wage of the average U.S. manufacturing worker. Yet, his productivity is less than that of his European or Asian counterpart. However, through U.S. government imposed quotas, we ensure that all steel available in America, whether domestic or imported, will be over-priced. The resulting ripple effect throughout our economy, when that overly expensive steel is used in products, ensures that we handicap the competitiveness of all American merchandise.

Every product produced is over-priced. Did you ever stop to ask how Japan can import 100% of its oil, 100% of its iron ore, yet produce and deliver steel to the U.S. at a cost below U.S. steel. Contrast those circumstances with our own. We enjoy abundant iron ore, an abundant supply of domestic energy, and U.S. steel bears no transportation burden from Japan. It is a scathing indictment of management and labor in the U.S. steel industry. There is more than enough blame for everyone for our trade mess.

"OK—so it's a real crisis," then why you ask, shouldn't we demand that our government protect our domestic industries and otherwise engage in trade practices designed to eliminate foreign competition? That would certainly be appealing to steel, autos and the labor and management teams of many other non-competitive industries. It is also a dangerous move. Protectionism is like

dope: seductive, deadly and destructive for everyone even remotely involved.

PROTECTIONISM: THE POISONED PILL

Protectionism is expensive, counter-productive and dangerous. I will prove each point of that statement:

THE COST OF PROTECTIONISM

First let's focus on the cost of protectionism. Again autos provide a clear-cut case study. When Detroit complained it could not meet foreign competition, labor and management of this powerful industry joined forces to pressure the U.S. Government to negotiate "voluntary" import quotas with the Japanese. The Japanese are no fools; they saw an opportunity for huge profit. All parties agreed to the quotas—well, almost everyone—no matter, soon the Japanese began shipping high-priced, fully-loaded models to the U.S. market.

With supply reduced, those more expensive units sold quickly and the profits of the Japanese automakers soared. With foreign competition diminished the profits of the U.S. automakers rose. Everyone was happy . . . well, almost everyone. The only real loser was the poor old American consumer. As a result of this "cozy quota" arrangement, the U.S. consumer paid billions of dollars in premiums to purchase autos. Yes; that's right billions of dollars over the real world market price. Say "thank you" to your nice Uncle Sam. Windfall profits went right into the pockets of the Japanese and U.S. automakers.

Sure we saved some American jobs, but look at the cost; for each auto worker's job saved the U.S. consumer paid an additional $240,000. I'll bet those "saved auto workers" would have preferred to take that loot in a termination bonus. Remember that the next time you see Lee Iacocca wrapped in a flag and condemning imports. He is not nearly as glamorous a figure when you realize he's like a carnival huckster . . . distracting us while he picks our pockets. Those extra billions of dollars came out of the pockets of American workers.

It is the same story in other industries. For every job we save with tariffs or quotas it cost the U.S. consumer. How much? Well, $114,000 in the case of each steel worker, $60,000 for the shoemaker, $24,000 for a tuna fisherman and $43,000 for each textile job. I think it is clear the U.S. consumer, "the price is not right."

All Americans—workers and consumers—must realize the times and circumstances have changed. Make no mistake, it's a tragedy when anyone loses a job, when communities are wrenched and forced to adjust to structural changes in the world economy. However, as a nation competing for global markets, America must use her resources prudently. We should re-train and when forced to, relocate workers.

It is unconscionable to ask the American consumer to pick up the tab for futile attempts by posturing politicians to perpetuate the past; change is inevitable. Why, if the ideas some congressional leaders are advocating today had been adopted at the turn of the century, we would still have hundreds of thousands of people turning out horseshoes and harnesses. American industry and American workers have always changed with the times. It is the same today, we must adapt to change—we must meet competition.

PROTECTIONISM IS COUNTER-PRODUCTIVE

When we protect our weak industries, other countries retaliate. In the end no one wins a trade war.

Our economy has some great strengths. The United States enjoys a "comparative advantage" over competing countries in such areas as agriculture, aircrafts, high-tech industry, medicine and services of all types. In fact, services are the fastest growing segment of the U.S. economy and account for one-third of all U.S. exports. Strong industries such as those compete successfully in the world market, earning valuable balance of trade credits for the U.S. economy. If we enact protectionist barriers to protect weak industries, our trading partners will retaliate. And they will retaliate against the strong, competitive segments of our economy.

Protectionism does not save jobs, it just reshuffles jobs to our over-all disadvantage. Protectionism bleeds the strong, but worst of all, it guarantees that the weak will never become competitive. Protectionism is like dope; once hooked it's all downhill. Protectionism is a "lose, lose" strategy. Fair, free trade is a "win, win" strategy. Increased exports create jobs—imports ensure lower prices for quality goods benefitting all Americans.

Those who ignore history are doomed to repeat it. God help America if we did not learn from the tragedy of the Smoot-Hawley Act. That ill-conceived piece of legislation in the late 1920's erected high tariffs in a move designed to protect American industry. While popular at the time, the results were tragic. True, imports fell from 4.8 billion in 1929, to 1.7 billion in 1932, but at the same time exports were falling from 5.4 billion to 2.4 billion during the same period. The Great Depression resulted. America recovered after paying a terrible price in human suffering and, finally, in enduring World War II.

Today, as was the case in the late 1920's, debtor nations who owe their debts in U.S. currency must earn dollars to make repayment. When we restrict imports we deprive a country of the ability to earn the necessary dollars. We insure that those nations will default on their debt. Ask any banker what would happen should foreign debtors default on their payment to U.S. banks. First, make sure he is sitting down.

We are more fortunate. American owes her debts in U.S. dollars. That is a great advantage. Charles de Gaulle complained of our "arrogance" because of the U.S. ability to borrow in our own currency. Sorry Charlie, but there are few advantages left for ol' Uncle Sam.

While other nations must earn dollars to pay their debts, the U.S. Government controls the supply of dollars. I would rather America be a debtor nation owing dollars, than destroy other nations' ability to earn dollars to repay their debts . . . particularly to American banks.

Free trade is the only solution. Protectionism only reshuffles jobs and destroys our competitive advantage in those areas of our export economy where America enjoys a comparative advantage. Protectionism is a serious threat to the American banking system. Protectionism is a "dangerous drug" threatening the health of the world economy.

WHAT IS THE ANSWER?

We did not get into this mess overnight, so we can expect easy, simple, "quick fixes." We must fight this battle simultaneously on three fronts. It is a struggle we can not afford to lose. Let's focus separately on each ingredient in the prescription for a healthy America.

FIRST YOU HAVE TO GET THE MULE'S ATTENTION

A farmer once bragged his mules would respond to his whispered commands. His neighbor added, "True, but first he hits them upside the head to get their attention." We face a similar challenge.

The first and most critical step is that we demand that Congress address the problems of the U.S. Government's deficits and the over-valued U.S. dollar. Only Congress can bring down deficits; they control spending and revenue. Who submits what budget is merely political posturing—a smoke screen. Congress controls income and expenses. We, the people, must insist that Congress face its responsibilities. Our elected representatives must either raise taxes, cut spending or utilize a combination of the two . . . the latter probably a more realistic tack. In all events, only Congress has the power to bring deficits down. A reduction in deficit spending will cause the dollar to stabilize at a competitive rate. Only when the dollar is realistically aligned with other currencies can American business compete in world markets. No one can successfully compete at a 30% disadvantage which is what American business is asked to do today.

Congress and Congress alone, must address that fundamental problem. We must raise unmitigated hell until they act; you know how to get their attention.

The Reagan administration recently announced plans to intervene in monetary markets in an attempt to lower the value of the dollar. Intervention cannot be relied upon for permanent relief. President Carter's administration committed over $20 billion annually to monetary intervention with poor results. Today money markets ringing the world never close. These markets have a daily volume exceeding $150 billion. In the face of that torrent of funds, I fear all the king's horses and all the king's men can not bring the dollar down against the Yen. It is a little like spitting in the ocean; you can't expect to effect the level of the tide.

We can realistically expect the dollar to properly align itself only after Congress acts to reduce deficits, and move toward balanced budgets. Enacting the law recently proposed by Senator Phil Gramm, which would require balanced budgets in five years, would bring huge benefits. While President Reagan's and Secretary Baker's efforts are to be applauded and perhaps will provide short term relief, don't bet the family farm on the long term results.

Congress isn't the only "one stubborn as a mule." Some of our trading partners are refusing to budge. It is past time for the Executive Branch of the U.S. Government to gain their attention and engage in candid talks. We must have "fair trade." Other countries must see that Uncle Sam does not blink when he demands equal access to their domestic markets. More importantly, we must insist that other nations compete with us fairly for business in the developing nations, particularly those of the Pacific Rim.

The American taxpayer can not pay for the defense of other nations, and in turn, allow those economic "draft dodgers" to subsidize their industries to American disadvantage. Remember every time a railroad is built, a project air-conditioned, an elevator installed, a TV or communication system designed and built in a developing nation by any other industrial nation except the U.S.A., it becomes their market for replacement and add-ons for the next 30 or more years.

That is the advantage the United States gained following World War II. Today America's competitors are building the same advantage in the most rapidly growing parts of the world. We can not mortgage our children's future; America must compete on a level field. Our government must see to it that our trading partners play fair.

AMERICAN BUSINESS—MANAGEMENT AND LABOR—MUST BE COMPETITIVE

Government can not do it all; American management and labor must also play a key role. Consumers must unite and demand that our elected representatives muster the political courage to tell powerful special interest groups, "you must meet world competition," and "you must do so in a short period of time." Everyone must understand they will not be protected from change. We can not subsidize the inefficient; the obsolete. When jobs are lost we must re-train and, if necessary, even assist in relocating workers.

It is clear we can no longer ask the American consumer to subsidize a lack of competitiveness. Consumers must demand that Congress reject unrealistic demands. Restricting imports costs us all. America is in transition. Change is unsettling, even threatening, and it can cause pain. But inevitably change must be accommodated. We can do it—America is a winner.

GUN REGISTRATION—THE TIME HAS COME FOR ACTION

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. TRAFICANT. Mr. Speaker, I rise today to express my concern over the lack of adequate constraints and controls over the sale of firearms. I want to make it clear that I am a strong supporter of the right to bear arms. I would fight against any effort to deny law-abiding Americans that right. But this Nation's disgraceful homicide rate at the hands of guns is so alarmingly high, that I feel some action is necessary.

As a former sheriff, I can attest to the fact that some form of gun registration would be helpful to police and would go a long way in tackling violent crime in this Nation. I have introduced legislation, H.R. 2570, that I feel is a necessary step in the right direction.

H.R. 2570 would require that States, in order to receive Federal Criminal Justice Block Grants, enact firearms registration laws. These laws must require that all firearms be registered with local law enforcement agencies—making it a criminal penalty for failure to do so. States would also have to make it a criminal penalty to obliterate, remove, or alter the manufacturer's or importer's serial number on a firearm.

Under this bill, gunowners can keep their guns and own as many as they want. All I am saying is they must at least register them with local police officials. Many people in this country are firmly against any form of gun registration—claiming it is a direct violation of the right to bear arms and that it will lead to the eventual confiscation of firearms. This is simply is not true. I believe that law-abiding gunowners would have no problem registering their weapons with local police. More importantly, I believe that some action is necessary to put some type of handle on the gross number of violent deaths in this country. One cannot ignore the grim statistics.

For example, in 1980 there were 11,522 handgun homicides in the United States. That same year there were only 77 handgun homicides in Japan; a mere 8 in Great Britain; 24 in Switzerland; 8 in Canada; 18 in Sweden; and 4 in Australia. Not surprisingly except for the United States, all of these countries require some form of gun registration. And the statistics haven't gotten any better here in America. In 1983, the FBI reported that there were over 9,000 homicides committed with firearms. We cannot afford to ignore these statistics. Sure, stiffer laws are needed against those who commit violent crime. I strongly support such initiatives. But as a former sheriff, I recognize the fact that fighting crime is a war that must be fought on many fronts. Firearm registration is a front that can no longer be overlooked.

I feel that my bill, H.R. 2570, deserves close consideration. Some opponents of gun registration have raised the concern that such an initiative would impose a burden on taxpayers. Not true. A revealing assessment of California's handgun control initiative—(a gun registration measure)—conducted by Duke University in 1982, uncovered some interesting facts. The study showed that registration of guns would impose only negligible costs on taxpayers. The study also revealed that the processing time of such an initiative would be less than 15 days if only the State criminal records are checked. My bill provides States with the leeway to develop their gun registration laws and programs. The Duke University study clearly shows that, if done correctly, States can implement a gun registration program that works, that is not burdensome to taxpayers, and does not infringe upon the right of law-abiding citizens to bear arms.

At this time, Mr. Speaker, I would like to submit into the RECORD an editorial that appeared in the October 16, 1985 edition of the Cleveland Plain Dealer. I urge all of my colleagues to read it:

[From the Cleveland Plain Dealer, Oct. 16, 1985]

ONE GUN IN FIVE

A recent Justice Department survey of more than 1,800 felons ("serious, long-term offenders") found that one in five obtained handguns through "customary retail channels." Two of five acquired their guns from relatives or friends. The rest went to the black market or used other illegitimate means to get their weapons. The National Rifle Association says this shows the ineffectiveness of gun control.

The NRA is accustomed to refractive, prismatic logic. That's how it can use a survey showing that retail gun sales are a major source of criminals' weapons to argue against greater regulation of such sales. Smoking is only one cause of cancer, therefore smoking isn't a health risk. You've never had an automobile accident, ergo, you don't need a driver's license.

Even presuming that all the friends and relatives who provided weapons to criminals got their guns illegally, 20% still is too high a figure to justify gun-control obstinancy. And even presuming that criminals are going to get weapons regardless of stern gun control, 20% is too large a figure to write off. To the contrary, that one gun in five is compelling evidence of the need for tight gun laws.

Gun controls needn't work a hardship on law-abiding toters. Registration and licensing won't hinder their pursuits. Waiting periods won't chill the legitimacy of their desire, nor seriously impede their pleasure. But tough laws might reduce the number of felons with legally acquired guns to one out of 10—maybe even one out of 20. Especially if such legislation is tied to restraints on the manufacture and sale of Saturday Night Specials.

This nation doesn't need surveys to make a case for tighter controls. It witnesses handgun killings every day of the year. Rather, it needs local, state and national leaders willing to recognize the NRA's distortive perceptions for what they are—atavistic constitutional delusions. Unlike legally acquired criminal weapons, such lawmakers are fewer than one out of five.

SOVIET CAMPAIGN OF DISINFORMATION

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. LAGOMARSINO. Mr. Speaker, on July 17 of this year, I rose along with several of my colleagues to discuss the dangerous threat to Western, particularly United States security interests posed by the Soviet Union's covert operations programs, known as "active measures."

Certainly, as recent events have dramtically proven, Soviet covert operations and activities against the United States are on the rise. One particularly challenging component of the Soviet "active measures" campaign is disinformation.

One of my constituents, Jack Mathews, has written an informative article entitled, "The Soviet Disinformation Juggernaut." Jack was formerly with the Central Intelligence Agency, and has received several awards and medals for his fine performance in this capacity.

As the threat we face from Soviet subversion and "active measures"—including disinformation—has certainly not diminished over the last few years, the Mathews article is timely and instructive, and I commend it to my colleagues' attention.

[From Gung-Ho Magazine, March 1984]

THE SOVIET DISINFORMATION JUGGERNAUT

(By Jack Mathews)

Organized deceit has always played a major role in the planning and conduct of the Soviet Union's foreign policy, and is known as disinformation by the Soviet's intelligence services. The word "disinformation" is not in our dictionaries; it comes from the Russian word "dezinformatsiya," which means a deliberate effort to mislead your opponent on your real intentions.

The Soviet intelligence services, the KGB and the GRU, through the use of disinformation operations, place distortions and lies in the U.S. and European media in such a way to mislead the American people and to influence U.S. foreign military, and economic policy in a manner favorable to the Soviet Union. The Soviets also undertake disinformation activities in support of international terrorist organizations, communist-inspired insurgency movements in the Third World, and the international movement to induce the U.S. to undertake a unilateral nuclear freeze.

The ruthless murder of 269 men, women, and children on board Korean Airlines flight 007, shot down on orders from the Kremlin by a Soviet SU-15 fighter plane over the Sea of Japan, shocked the whole world. Within hours of the act, however, the Soviets commenced to utilize their worldwide disinformation capability to place blame for this Soviet-sponsored atrocity on the United States. Soviet and Bloc country media claimed that "The KAL 747 was on a spy mission for the U.S., that its profile was the same as that of a U.S. RC-135 reconnaissance plane, and that it was flying with its lights out." Regardless of proof the U.S. and Japan can place before the United Nations, demonstrating without a shadow of a doubt that the KAL 747 was shot down in cold blood on orders from the Kremlin, the Soviets will never admit they are guilty of this barbaric act.

Over the next several weeks and months, certain segments of the U.S. and western media can be expected to support the Soviet claims that "The responsibility for the loss of the KAL 747 lies with the U.S. because of its provocative intrusions of Soviet airspace on spy missions using RC-135s and other military aircraft." Most U.S. and Western "Kremlinologists" believe U.S. and Japanese intelligence which established that the Soviets tracked the KAL 747 on radar for more than two hours, which lends credence to the surmise that the Kremlin gave the order, "Shoot to kill." Edward Luttwak of the Georgetown University Center for Strategic and International Studies has stated that "I have never known of (lower-level Soviet officials) deciding on something that can be referred all the way up, and in this case they had the time and opportunity to refer it all the way up to (Yuri) Andropov."

The best-selling novel *The Spike*, written by two well-known journalists, describes how Soviet intelligence services conduct disinformation operations in the U.S. and other Western countries. Until the publication of *The Spike* in 1980, there was very little known in the public sector about the massive Soviet disinformation program, because U.S. and European intelligence services were reluctant to bring it to the attention of the public for reasons of their own.

In 1959, General Ivan Ivanovitch Agayants established a new clandestine organization within the KGB's headquarters, known as the Disinformation Department or Department D. It has recently been estimated by Suzanne Labin, as French authority on Soviet intelligence and disinformation operations, that the KGB was spending over $2 billion annually and supporting several hundred thousand people on disinformation outside the USSR as agents, fellow travelers, or active sympathizers.

KGB disinformation activities conducted in the U.S. involve such clandestine devices as forgeries of official government documents, planted articles in newspapers and magazines, bribery of media representatives, and funding of so-called liberal think tanks.

The main objectives and topics of the Soviet disinformation activities change as new international problems and issues arise. However, one thing that does not shift is the fact that the main thrust of the massive disinformation operations conducted by the KGB are always targeted against the Main Enemy ("glavnyy protivnik"), the United States of America. In recent Congressional investigations into KGB operations in the U.S. a high CIA official listed the following as major goals of the Soviet disinformation campaign:

To influence world public opinion against U.S. military and political programs perceived as threatening to the Soviet Union;

To isolate the U.S. from its allies and friends;

To discredit those who cooperate with the U.S. (even communist countries such as China);

To discredit and weaken Western intelligence services and to expose their personnel;

To demonstrate that the policies and objectives of the U.S. are incompatible with the ambitions of the underdeveloped or "Third World" countries;

To create and maintain a favorable environment for the conduct of Soviet foreign policy worldwide;

To confuse world public opinion regarding the highly aggressive nature of a broad range of Soviet foreign-policy objectives.

In July 1982, the House of Representatives' Permanent Select Committee on Intelligence counducted extensive hearings on the KGB's disinformation, or active measures, operations carried on in the U.S. Stanislav Levchenko, a recent defector from the KGB, provided the committee with a firsthand account of his own disinformation activities on behalf of the Soviets. One of Levchenko's most startling disclosures concerned the fact that millions of dollars in cash are carried into the U.S. by KGB officials serving in the Soviet UN Mission, and the Soviet Embassy in Washington, D.C. These funds are used to support KGB intelligence collection and disinformation operations in the U.S.

In testimony before the House Committee on Intelligence, in February 1980, Ladislav Bittman, a former deputy chief of the Disinformation Department of the Czechoslovak Intelligence service, outlined his own successful efforts to plant disinformation in the U.S. and European media. (The disinformation activities of East European and Cuban intelligence services are under the direct control of the KGB.) Bittman told the Committee, "If somebody had at this moment the magic key that would open the safes of Soviet Bloc intelligence services and looked into the files of secret agents operating in Western countries, he would be surprised to find that a relatively high percentage of these agents are journalists. A journalist operating in Britain, West Germany, or in the U.S. is a great asset to Soviet intelligence. It is his job to acquire important, even highly sensitive information in addition to his role in placing KGB disinformation articles in the media. This is particularly true in the U.S. with its tradition of an aggressive adversary press."

Llya Dzhirkvelov, who defected from the KGB in 1980, operated in Africa and Western Europe as a correspondent for the Soviet publication *Novosti*. Dzhirkvelov was interviewed in London in 1981 by the editor of the American Bar Association's magazine, *Intelligence Report*. He declared that "The KGB is only the arm, the tool, the performing force in disinformation operations. The goals for disinformation are set, the targets are chosen, and the plans made only by the 'apparatus' and the Secretariat of the CPSU's central committee, the nine men who run the Soviet Union."

Dzhirkvelov also said, "The KGB supported and sponsored 'national liberation' movements in Africa, Asia, Latin America, and even European (Ireland) countries. Prominent in this category is the Palestinian Liberation Organization." He claimed that in the Soviet training of "fighters" for the PLO and other "movements," active assistance is sought (and received) from Bulgarian, East German, and Cuban intelligence services. Dzhirkvelov reported that urban guerrillas are trained on Soviet territory, and now in several African states like Angola, Mozambique, and Libya.

On 13 May 1981, Mehmet Ali Agca, a 23-year-old Turk, shot and nearly killed Pope John Paul II in St. Peter's Square in Rome. Just hours after the Pope was shot, front-page stories around the world described Agca as a "fascist thug" and a member of Turkey's neo-Nazi Gray Wolves. The media presumed that the Gray Wolves had sent Agca to Rome to kill the Pope or that he was a right-wing crackpot working on his own. As we now know, Agca was not a member of the Gray Wolves, and he did not work alone in his attempt to murder the Pope. Even NBC, in a recent TV Special Report, documented in great detail Agca's contacts with Bulgarian intelligence officers. The September 1982 edition of *Reader's Digest* carried a very informative article on Agca's Bulgarian and Soviet connections prior to his attack on the Pope. Agca declared on international TV in July 1983, outside of a Rome courtroom, that he was directed against the Pope by the Bulgarians and the KGB.

The majority of the U.S. and Western media are intent on ignoring the now-proven connection agents of Bulgarian and Soviet intelligence had with Agca, even though he has openly exposed his contacts with personnel of these services.

Philip Agee, the CIA's first known ideological defector and whose close contact with Soviet and Cuban intelligence services in Europe, where he has resided since his defection in 1970, is well-known to all Western intelligence services. He is considered by the KGB to be one of its most effective disinformation agents.

In early 1981; Agee held a press conference in West Germany and provided the international media representatives with copies of his 46-page analysis of the U.S. State Department's "White Paper" on Soviet and Cuban support of the communist insurgents in El Salvador. His critique of the administration's "White Paper" charged that all the evidence of purported Soviet support to the Salvadoran insurgents was fabricated. Agee claimed that "The white paper turned out to be a total fraud and simply a pretext to fool Americans into thinking the Cubans and Soviets were behind the civil war in El Salvador." Agee's allegations, provided by the KGB, were avidly carried by a large number of international news services. In June 1981 both the *Wall Street Journal* and the *Washington Post* published articles questioning the validity of the administration's "White Paper on El Salvador." Neither of these papers made any reference to the fact that Agee was the primary source of these articles. In a front-page interview with a correspondent of the *Los Angeles Herald Examiner*, carried

on 1 July 1981, Agee stated, "You may have seen news dispatches in February, and as recent as a couple of weeks ago in the *Wall Street Journal* and the *Washington Post*. All of this reporting was based on my analysis of the State Department white paper."

Andrei D. Sakharov, the Soviet dissident, is a hero to liberals in the Western World. His political testament was smuggled out of his KGB-imposed exile in his own country and was published as a cover story in the *New York Times Magazine* on 8 June 1980. Dr. Sakharov cites the categories of disinformation agents who are busy promoting Soviet "expansionist objectives" in Western governments, parliaments, business and news organizations. Among them, Sakharov listed "a great many writers and journalists."

In 1981, James L. Tyson, an economist and journalist, published *Target America*, a nonfiction expose of Soviet disinformation operations conducted in this country by the KGB. Tyson's book documents in great detail what a good number of journalists in the U.S. and Europe have known for many years, i.e., this country is the target of a massive and frighteningly successful Soviet disinformation campaign which is aided by a host of knowing and unwitting journalists and important media organs. Tyson's book has uncovered important new insights on the KGB's recruiting tactics, the amount of time and funds expended on disinformation activities, and the army of unwitting "sympathizers" in the media who are being manipulated to support Soviet foreign-policy objectives without their knowing it.

Tyson has cited what he terms the "Far Left Lobby," which is composed of think tanks ostensibly engaged in research and publishing but are also highly active in the sponsorship of conferences and seminars. They brief Congress and the executive departments and, in fact, become involved with more activist roles in lawsuits or even mass demonstrations. The most important of these think tanks is the tax-exempt Institute for Policy Studies located in Washington, D.C. The IPS was founded in 1963 and presently has an estimated budget of more than $2 million a year. The IPS has evolved into the operational center of a truly revolutionary political network operating at the national and international levels. The declared goal of the IPS' multifaceted program, both overt and covert, is the radical transformation of America's basic intellectual, religious, economic, and political institutions. The IPS is involved in disinformation operations in just about all phases of its well-funded efforts to bring about radical changes in our society. The IPS has some 10 subsidiary operations that in turn influence and shape a whole series of independent groups.

The April 26, 1981, edition of the New York Times magazine carried an article by Joshua Muravchik, entitled "The Think Tank of the Left," which provided an excellent insight on the IPS. The Times' article on the IPS represented the first attempt by a major liberal publication to take a critical look at an organization that is now 20 years old. What seemed to intrigue Muravchik and the New York Times executives who commissioned the article was the mounting evidence that the Institute for Policy Studies is aligned with those forces, at home and abroad, that are trying to impose a "Socialist" or Marxist system on the United States and other countries.

Muravchik pointed out that on defense and foreign-policy matters, a number of IPS officials have voiced support for communist regimes such as Cuba and North Vietnam and revolutionary movements in Africa, Central America, and the Middle East. He also noted that the IPS facilitated CIA defector Philip Agee's travel in Europe.

The April 9, 1983, edition of *Human Events, The National Conservative Weekly* (published in Washington, D.C.) carried an eight-page special supplement entitled "The IPS and the Media: Unholy Alliance." The *Human Events* article on the IPS is the most interesting and informative study of the extensive impact the IPS and its subsidiary organizations have on the U.S. press and TV networks that has been published in this country. One of the most important segments of the article deals with two West Coast media operations funded "under the table" by the IPS. They are *Mother Jones*, a monthly political review in magazine format, and the Pacific News Service.

Mother Jones, named "pioneer socialist" Mary Harris "Mother" Jones, is published by the tax-exempt Foundation for National Progress, which claimed in its 1976 financial report that it was established on the West Coast to carry out the "charitable and educational activities of the IPS." It appears that in its July 1983 edition, *Mother Jones* "blew its cover" by featuring an 11-page article, with a photograph of Pope John Paul II, entitled "Is the CIA Splitting His Church?" written by Martin A. Lee. In his article on the Catholic Church and every Pope since Pope Pius XII, Lee made the following charges:

Since World War II, the CIA has:

Subsidized a Catholic lay organization that served as the political slugging arm of the pope and the Vatican throughout the Cold War;

Penetrated the American section of one of the wealthiest and most powerful Vatican orders;

Passed money to a large number of priests and bishops, some of whom became knowing agents in CIA covert operations;

Employed undercover operatives to lobby members of the Cura (the Vatican government) and spy on liberal churchmen on the pope's staff who challenged the political assumptions of the United States.

Lee's article is especially critical of Pope John Paul II and implies that the CIA indirectly had a hand in the selection of the "Polish Pope" through contacts in Opus Dei, a fast-growing Catholic lay society. He claims that Opus Dei's political activities are shrouded in secrecy. The absolute irony of Lee's article in *Mother Jones* is the fact that the charges he makes regarding purported links between the Vatican and the CIA, over the past 25 years, were first carried in the Soviet newspapers Izvesitya and Pravda. In fact, the Soviets have carried on a brutal media campaign against the Polish Pope since he took office five years ago.

In what appears to be a direct quote from the Soviet press, Lee makes the following disparaging remarks regarding Pope John Paul II's support for the Polish trade union, Solidarity:

"It is rather ironic that John Paul II should chastise priests for engaging in political activity when he is by far the most overtly political pope of modern times. John Paul has even threatened to fight alongside his countrymen should the Soviets try to crush the worker's rebellion in Poland. And his political activism has not only included well-publicized trips and rhetrocial speeches. With his approval, the Vatican quietly funneled $40 million to Solidarity. But despite the pontiffs support for the Polish union—and the issuing of an encyclical in strong defense of the rights of labor—his sympathies do not extend to the rights of workers in Vatican City: he has opposed demands for decent wages by the Vatican's low-paid employees, and there have even been rumblings of a possible strike."

The above-cited, so-called facts by Lee attacking Pope John Paul II are right out of the KGB's disinformation manual for its media campaign against the Polish Pope.

The most effective outlet for the IPS is the Pacific News Service (PNS), an "alternate news agency" that began as a project of the Bay Area Institute, an organization established with money from the IPS in 1970. IPS cofounder Richard J. Barnet serves as a "contributing editor" of the PNS. According to Human Events, PNS supplies about 30 stories a month to more than 200 subscribers. These have included newspapers such as In These Times, the Guardian, as well as major newspapers such as the Cleveland Plain Dealer, the Atlanta Journal, the Boston Globe, the Chicago Tribune, the Los Angeles Times, and the San Francisco Examiner.

Perhaps the most important outlet for the PNS, which is marketed nationally by the *Des Moines Register* and Tribune Syndicate, is the *Washington Post*. According to Sandy Close, an editor at PNS, Post Executive Editor Ben Bradlee made the decision several years ago to purchase a subscription to PNS stories.

Another interesting fact cited in the *Human Events* article on the IPS is that Karen DeYoung, Foreign Editor for the *Washington Post*, is a paid instructor at the IPS "Washington School" for journalists . . . what a cozy relationship the IPS enjoys with one of the most powerful papers in the country.

In January 1982, M.A. Suslov, the most powerful member of the Secretariat of the Communist Party of the Soviet Union (CPSU), died as the result of a heart attack. Suslov was quietly replaced on the Secretariat by no less than Yuri Vladimirovich Andropov, who had been the Director of the KGB since 1967. Immediately after taking control of the KGB in 1967, Andropov elevated the Disinformation Department to the status of an independent Directorate, known as Directorate "A," one of only five principal Directorates in the KGB. In order to follow this rather complicated study on Soviet disinformation, it is important to remember that Andropov is a hard-line, tough, and xenophobic Russian communist leader who headed the KGB for 15 years, which is by far longer than any other Soviet "Spy Boss" was able to stay in office.

Within a week after Andropov was appointed to the secretariat of the CPSU, the KGB's worldwide disinformation apparatus commenced a campaign to enhance his image and to make him appear to be the "second coming of Christ" in the eyes of the Western media. The U.S. and European media, print and TV, took the KGB's phony background on Andropov—hook, line and sinker. Leonard Brezhnev, the leader of the Soviet Union for 18 years, died in early November 1982, and the U.S. media speculated that it would be months before the CPSU could reach an agreement on Brezhnev's successor. However, as usual, the media's crystal-ball gazing on Soviet political intrigue was dead wrong. Just five days after Brezhnev expired, Andropov was appointed by the CPSU to take over the helm of the Soviet Union.

The KGB's clever disinformation campaign to make Andropov look like a liberal intellectual with "Jet Set" tendencies paid off beyond their wildest dreams. Every major newspaper, magazine, and TV network swallowed and then regurgitated the KGB's phony image of its longtime boss Andropov. Ironically, only one major U.S. publication had the moral courage and fortitude to blow the whistle on the ridiculous portrayal of Andropov as an urbane and benevolent leader who would be a pussycat in dealing with the U.S. on such serious matters as arms control and Soviet support to guerrillas in El Salvador. The 7 February 1983 edition of *The New Republic* magazine carried a cover story entitled "The Andropov Hoax—The Americanization of Yuri." The author of this fine piece of investigative journalism is Edward J. Epstein, who is currently completing a book on international deception. The mere fact that *The New Republic* had the "guts" to publish Epstein's expose of the Andropov myth that was being foisted off on the American people by all segments of our media restores my faith in the old adage, "The truth will out." In his article on the Andropov hoax, Epstein provides examples in the following newspapers and magazines; The *Washington Post, The New York Times, The Wall Street Journal, The Christian Science Monitor,* and the *U.S. News & World Report.* I have included several paragraphs from Epstein's article to graphically demonstrate just how gullible and uninformed our media is when it comes to reporting on a broad gamut of topics concerning the Soviet Union.

"Andropov's accession to power last November was accompanied by a corresponding ennoblement of his image. Suddenly he became, in *The Wall Street Journal,* silver-haired and dapper." His stature, previously reported in *The Washington Post* as an unimpressive 'five feet, eight inches,' was abruptly elevated to 'tall and urbane.' The *New York Times* noted that Andropov 'stood conspicuously taller than most' Soviet leaders and that 'his spectacles, intense gaze and donnish demeanor gave him the air of a scholar.' *U.S. News & World Report,* on the other hand, reported that 'he has notoriously bad eyesight and wars thick spectacles.'

Andropov's linguistic abilities also came in for scrutiny. Harrison Salisbury of the *New York Times* wrote, "The first thing to know about Mr. Andropov is that he speaks and reads English." *Newsweek* reported that even though he had never met a "senior" American official, "he spoke English and relaxed with American novels." The *Washington Post* passed along a rumor that Andropov was partly Jewish. (Andropov was rapidly becoming That Cosmopolitan Man.)

Soon there were reports that Andropov was a man of extraordinary accomplishments, with some interests and proclivities that are unusual in a former head of the KGB. According to an article in the *Washington Post,* Andropov "is fond of cynical political jokes with an antiregime twist. . . collects abstract art, likes jazz and Gypsy music," and "has a record of stepping out of his high party official's cocoon to contact dissidents." Also, he swims, "plays tennis," and wears clothes that are "sharply tailored in West European style." *The Wall Street Journal* added that Andropov "likes Glenn Miller records, good scotch whisky, Oriental rugs, and American books." To the list of his musical favorites, *Time* added "Chubby Checker, Frank Sinatra, Peggy Lee, and Bob Eberly," and, asserting that he had once worked as a Volga boatman, said that he enjoyed singing hearty renditions of Russian songs.

The press narrowed down Andropov's birthplace to an area stretching from Finland to Iran. There was also some vagueness with respect to his education. The *Wall Street Journal* reported that he had "graduated" from an unnamed "technical college," but *U.S. News & World Report* had him "drop out" of Petrozavodsk University, while *Newsweek* awarded him a diploma from the Rybinsk Water Transportation Technicum, a vocational school that teaches river navigation.

Columnist Joseph Kraft, who was in Moscow in January 1983, was told by Giorgi Arbatov, the Soviet Union's most prestigious "Americanologist" and an associate of Andropov, that Andropov, to his knowledge, "does not speak English."

What emerges from Epstein's article on the attempts of the U.S. press to piece together a version of Andropov's background would make a good script worthy of playing on "Saturday Night Live": the head of the KGB as one wild and crazy guy. Epstein makes the point at the conclusion of his story on the Andropov hoax, that the excesses that led to the invention of a media Andropov proceed directly from a common conceit of journalism that witnesses and "color" can be found for any great event. For the press, the humbler—and more honest—alternative is to admit that virtually nothing is known about this man Andropov: not the names of his parents, not his ethnic background, not his linguistic abilities, not even his ideas. He stands at the helm of the Soviet Union, but we don't even know how tall he really is.

Representative Lawrence P. McDonald was killed in the crash of the KAL 747, shot down by a Soviet SU-15 fighter in early September. Rep. McDonald, a five-term Georgia Democrat, was known as the most fervent anticommunist in the Congress. In the late 1970s, Rep. McDonald and a small group of other concerned congressmen, businessmen, and retired military officers established a conservative foundation known as Western Goals. The foundation is dedicated to "rebuild and strengthen the political, economic, and social structure of the United States and Western Civilization so as to make any merger with totalitarians impossible."

Western Goals publishes a monthly newsletter and, in addition, prepares special reports and studies on international, political, diplomatic, economic, and military matters. One of the most informative and interesting reports they have published in book format is entitled *Broken Seals.* This report provides an in-depth account of foreign and domestic attempts to destroy, through disinformation activities, the intelligence and counterintelligence capabilities of the CIA and the FBI. *Broken Seals* pulls no punches, and details the names of individuals and organizations in this country believed to be involved in disinformation operations targeted against the CIA and the FBI.

Representative Newt Gingrich, a fellow Georgia conservative, declared on national TV that "Perhaps the death of Rep. McDonald will educate more people about the Soviet Union's real threat to world peace than he could in his life." As time goes by, the Soviets may wish that McDonald were still alive, rather than being remembered in the U.S. as an anticommunist martyr who was murdered by them.

The 12 June 1982 edition of *TV Guide* carried a cover story entitled "Why American TV Is So Vulnerable to Foreign Disinformation." *TV Guide* had every reason to bring to the attention of the public that the television networks, including the Public Broadcasting System (PBS), had been influenced by KGB disinformation intrigues for many years. For instance, in May 1980, the taxpayer-funded PBS aired a three-hour documentary entitled "On Company Business." The documentary was narrated by Philip Agee, the CIA defector, and was a KGB masterpiece of lies, distortions, and innuendo about U.S. foreign policy and the U.S. intelligence community. In its six-page expose of disinformation programs that ABC, CBS, and NBC have aired over the past several years, *TV Guide* was brutally frank, and to say the least, the TV networks were shocked and displeased over the article. The article extensively quoted Arkady Shevchenko, the highest-ranking Soviet diplomat ever to defect to the U.S. Shevchenko claims that American TV networks and viewers are the prime targets of the KGB's disinformation program. "To get on American TV is one of the highest priorities on the agenda of the KGB's Directorate "A."

The numerous examples of KGB disinformation I have cited in this article are, of course, those that have been exposed over the past two or three years. I can assure the readers that there are hundreds of KGB disinformation operations, known to the FBI and the CIA, going on in this country and that there are probably just as many disinformation cases that have yet to be ferreted out by our intelligence services.

This article on the Soviet Union's massive disinformation effort in the U.S. and Europe is not intended to impugn the honesty or integrity of our journalists or the media. However, I believe that only through public disclosure of the Soviet Union's attempt to manipulate U.S. public opinion through the KGB's disinformation program can the public acquire the knowledge needed to discern what is factual reporting of the news and what constitutes disinformation. In the event a reader believes he has been subjected to disinformation in the press or on TV, I suggest he or she write a letter to the editor of the newspaper or manager of the TV station and cite your reason for questioning what you've read or heard. Writing letters to newspapers or TV stations is one of the most powerful tools we citizens have for thwarting KGB disinformation planted in our media.

BIOGRAPHY OF JACK F. MATHEWS

Lecturer and consultant on United States and Soviet Intelligence operations as they relate to national security and foreign policy.

Service as Senior Intelligence Officer with Central Intelligence Agency, Foreign Intelligence Directorate for period of twenty-five years. Last assignment as Acting Chief of Operations for Latin America. Service performed in Asia, Africa, Europe and Latin America. Conversational in French, Spanish and Mandarin Chinese. Awarded Distinguished Service Commendation for 1972-1973 Vietnam service with agency.

Service with U.S. Army, Korea.

Graduate of University of Montana with major in Anthropology.

IN THE MATTER OF THE FAILURE OF FAIRVIEW ORCHARDS ASSOCIATES TO HIRE THE SCRIVENS CREW

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. BERMAN. Mr. Speaker, during the course of hearings before the Subcommittee on Immigration, Refugees, and International Law on H.R. 3080, the subcommittee heard testimony from grower representatives and from the administration to the effect that there are not enough domestic farmworkers to harvest perishable crops in this country, and that as a part of immigration reform designed to protect domestic jobs, hundreds of thousands of temporary agricultural guestworkers must be admitted to the United States.

This assertion regarding the unavailability of domestic farmworkers is the basis of proposals that we dramatically expand the size of the current H-2 Program and weaken its protections for domestic workers, institute a transition program to warn growers from their dependence on undocumented workers, and that we, in effect, restore to public law the shameful bracero program.

Today and in the coming weeks, I want to call to the attention of my colleagues a series of opinions issued by the Department of Labor that disproves the assertions of growers that domestic farmworkers are unavailable. What these opinions document is that growers have engaged in a consistent pattern of discriminating against domestic farmworkers, refusing to hire them, and kicking them out of such jobs as they are able to secure, only to turn around and claim that domestic farmworkers are unavailable.

I begin today with the opinion captioned "In the Matter of the Failure of Fairview Orchards Associates to Hire the Scrivens Crew," in which the Regional Administrator of the Department of Labor found that the grower simply refused to hire 31 U.S. farmworkers, in violation of the regulations governing the H-2 Program.

I invite my colleagues to read this and other DOL opinions. What we find is not the unavailability of U.S. farmworkers, but rather the growers' preference for foreign farmworkers, and I do not think we should sanction that preference in the name of immigration reform.

The article follows:

IN THE MATTER OF THE FAILURE OF FAIRVIEW ORCHARDS ASSOCIATES TO HIRE THE SCRIVENS CREW

(By William J. Haltigan)

This is a case involving an allegation by a United States crew leader (William Scrivens) that he and his crew were referred to jobs with a Maryland employer (Fairview Orchards Associates) by the Maryland State Employment Service in 1983, but were denied employment by the employer in violation of the assurances made by the employer pursuant to 20 CFR 655.203(e).

A worker with this type of complaint is required to exhaust his remedies at the State level before bringing the matter to the Federal level. However, the time limits for the complainant to file a complaint under the Job Service Complaint System had long since passed when I was informed of this case. Thus, Scrivens could not use the Job Service Complaint System.

The regulations governing the labor certification process for temporary agricultural and logging employment (20 CFR 655.210) state, "If, . . . the RA has probable cause to believe that an employer has not lived up to the terms of the temporary labor certification, the RA shall investigate the matter." The regulation has no requirement as to the recency of the event. The information provided by Scrivens gives me probable cause to believe that Fairview Orchards Associates did not live up to the terms of its temporary labor certification issued in 1983. Therefore, I am required to investigate this matter.

This is my decision made as the result of that investigation.

BACKGROUND

This matter was called to my attention in a letter dated April 25, 1985, from Gregory Schell, Attorney for Scrivens. Schell asked that I ". . . conduct an investigation and take appropriate action. . . ."

The letter alleged that Scrivens and his crew contracted the Easton, Maryland office of the Maryland Employment Security Administration seeking farm employment on or about August 17, 1983. The Easton office told Scrivens of the Fairvew Orchards Associates Job Order. Scrivens called Fairview Orchards Associates that day speaking with Jeffrey Reed. Scrivens indicated his willingness to accept the job. Scrivens was told that Fairview Orchards Associates could not immediately hire a crew since its camps were full. Scrivens did not go to Fairview Orchards since he was informed that no family housing was available for him or his crew. Scrivens then transported his crew back to Immokalee, Florida, where the crew did not have regular work until late October 1983.

Fairview Orchards Associates received certification for the temporary employment of alien farm workers in 1983. As a condition for obtaining this certification, Fairview Orchards Associates was required to make, and did make, the following assurance:

"From the time the foreign workers depart for the employer's place of employment, the employer will provide employment to any qualified U.S. worker who applies to the employer until fifty percent of the period of the work contract, under which the foreign worker who is in the job was hired, has elapsed." 20 CFR 655.203(e)

The job offer made by Fairview Orchards Associates was required to contain, and did contain, this benefit:

"The employer will provide the worker with housing without charge to the worker." 20 CFR 655.202(b)(1)

At the time this alleged incident occurred, Fairview Orchards Associates was employing foreign workers. The job order submitted as a condition to obtain these foreign workers (Agricultural and Food Processing Clearance Order No. 4072459) showed an anticipated period of employment from July 12, 1983 to November 4, 1983. The 20 CFR 655.203(e) "50 percent rule" would require U.S. workers to be hired if they applied for work prior to September 7, 1983. Thus, if Fairview Orchards Associates refused to hire workers and provide them with housing prior to September 7, 1983, they would not have lived up to the terms of the temporary labor certification.

DISCUSSION

Staff from the Philadelphia Regional Office of the Employment and Training Administration were assigned to investigate this matter. They visited Hagerstown, Maryland June 18 and 19, 1985, to conduct this investigation. Many of the principals involved were no longer available for questioning. These include Robert Storer, Employment Counselor at the Hagerstown local office and Drew Hess, Rural Services Representative at the Hagerstown local office, both of whom contacted Fairview Orchards Associates on behalf of Scrivens, and Jeffrey Reed, Comptroller at Fairview Orchards, who represented Fairview Orchards in the dealings with Scrivens. Scrivens and Schell were interviewed as where John Porterfield, the present Orchards' Manager for Fairview Orchards Associates, and Merlin Williams, the present Rural Services Representative in the Hagerstown local office. Telephone notes made by Hess and Reed in 1983 were made available to the investigators and were reviewed. In addition, an August 4, 1983, memorandum from the Hagerstown local office manager to Stuart O. Douglass, Maryland Employment Service Director, was reviewed.

This material provided contemporary information about the 1983 incident so that valid conclusions can be made about what transpired, despite the long lapse of time between the incident and the investigation.

The investigation revealed the following facts:

(1) On August 4, 1983, Reed informed Storer that Fairview Orchards Associates was hiring on ". . . an as needed basis. When a vacancy exists in the camp they will consider hiring a non-local domestic." Storer pressed the issue, reminding Reed of the 50 percent rule. He called Reed's attention to the fact that foreign H-2 workers were employed, but Reed refused to change his position on the hiring policy. Later that day Storer called Reed to refer a crew and was told Reed would ". . . follow through with the formality of speaking with the crew leader but will inform the crew leader that Fairview has no openings for crews at this time." (Information and quote from August 4, 1983, Pruett to Douglass memorandum.)

(2) Scrivens and his crew were experienced farm workers and were interested in and available for employment with Fairview Orchards Associates. Crew consisted of 31 individuals, including 5 married couples.

(3) Staff of the Hagerstown local office and Scrivens spoke with Reed about employment with Fairview Orchards Associates for Scrivens. Scrivens was not offered employment.

(4) Reed's notes indicate that Scrivens was familiar with the job order; that he had Federal and State Crew Leader Registration numbers; that his crew consisted of 31 individuals, including five women; and that in the absence of family housing, the crew leader "will make arrangements."

(5) While Reed's notes are related in item (4), it was apparent from all available evidence that there was ample housing available to accommodate Scrivens and his crew.

DECISION

I find that Fairview Orchards Associates is in violation of 20 CFR 655.203(e) since employment was not provided to qualified U.S. workers who had applied to Fairview

Orchards Associates within the time period covered by the 50 percent rule.

Having found this violation, I must now decide whether to invoke the only penalty available under the regulations: Notification of the employer that it will not be eligible to apply for a temporary labor certification in the coming year.

In considering whether to apply the ineligibility sanction, I will follow the principles in the MESA CITRUS GROWERS decision by Administrative Law Judge Afred Lindeman, September 5, 1980 (Cases Nos. 80-TLC-10 through 80-TLC-13). These principles involve imposing the sanction only where there has been a demonstrated adverse effect on U.S. workers, bad faith on the part of the employer, or a pattern of violations.

It is my opinion that the principles of MESA CITRUS are met in this case.

There was a demonstrated adverse effect on U.S. workers in that Scrivens and his crew of 31 workers were not offered employment.

There was bad faith on the part of the employer involved. The record shows that Reed had no intention of hiring migrant workers, if they needed housing. His statement that he would ". . . follow through with the formality of speaking with the crew leader but will inform the crew leader that Fairview has no openings for crews at this time . . ." (quoted by Pruett in his August 4, 1983, memorandum in relation to another crew seeking employment) is an especially blatant disregard for his obligation to hire U.S. workers as Fairveiw Orchards Associates obligated itself to do when it provided the assurances required by the labor certification regulations. This violation is particularly egregious since Reed was advised and warned by Storer that his policy was not proper.

This is not the only violation of the labor certification regualtions by Fairview Orchards Associates. I have previously (August 2, 1985) found Fairveiw Orchards Associates to be in violation of 20 CFR 655.202(a), 20 CFR 655.203(e), and 20 CFR 655.207(c). I conclude that the violation found in this instance is part of a continuing pattern of violations of the labor certification regulations by Fairview Orchards Associates.

Therefore, it is my decision that Fairview Orchards Associates is not eligible to apply for a temporary labor certification in the coming year.

Fairview Orchards Associates may request a hearing on this matter before a United States Department of Labor Administration Law Judge. The request for a hearing must be made within 30 days of the date of this decision. The request for a hearing must be addressed to William J. Haltigan, Regional Administrator, Employment and Training Administration, United States Department of Labor, P.O. Box 8796, Philadelphia, Pennsylvania, 19101.

A REPORT ON THE 1985 WORLD FOOD CRISIS

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. LELAND. Mr. Speaker, I commend to you a report on the 1985 World Food Crisis prepared by the Interfaith Hunger Appeal, an activity of Church World Service, Catholic Relief Service and the American Jewish Joint Distribution Committees.

WORLD FOOD SECURITY: A PERSONAL RESPONSIBILITY

A REPORT ON THE 1985 WORLD FOOD CRISIS

(Prepared by Interfaith Hunger Appeal)

An activity of Church World Service, Catholic Relief Services, the American Jewish Joint Distribution Committee

Hunger and malnutrition in the midst of plentiful harvests worldwide constitute the major scandal of our time. Enough food is produced in the world every year to feed every person on the planet, and yet half a billion people, twice the population of the United States, face starvation every day because they do not have access to adequate food. Starving people have neither the land, water, seeds nor tools to grow food nor the income to buy it from others who have grown it.

Not all hungry people die from lack of food, but many of the most vulnerable among them, children, nursing or pregnant women, the elderly, the refugees, the landless, do die of hunger and its accompanying illnesses and disabilities. All of these people at risk are created in the image of God; all of them have the unalienable right to life. Death from hunger violates that right. And it is unnecessary.

Those who know the hunger story and who are in a position to affect private and public policy have a responsibility to do so. In last years' report IHA stated that hunger is a problem to the family—the human family, all of us. This year we carry this point one step further; hunger is the personal responsibility of each of us.

Hunger in the world challenges the strength and solidarity of the human family; more than that, it tests the depth and sincerity of each person's religious and moral commitment. We who have so much are obliged to help those who have so little and whose need is so great. This is an obligation in justice as well as in charity, and we must come to terms with it. Hunger is man-made; human effort can and must resolve it.

THE CHALLENGE

In 1974 the United Nations convened the first World Food Conference in Rome. Based on the analysis presented, the Conference adopted a score of recommendations for remedial action and pledged, in an emotional statement, to eliminate hunger within ten years. Failure to achieve that goal was acknowledged at last year's Tenth Anniversary session held, appropriately, in Addis Ababa.

The international community has fallen short on two of the three objectives that underpinned the WFC recommendations: 1. There is no international grain reserve. 2. Small-farm agriculture has not improved in most food-deficit countries. 3. Despite increasing world food surpluses, the food aid target of ten million tons annually was not reached until 1984, the year of the deadly African famine.

However, the situation is not hopeless. The world's food production has increased substantially over the decade. Today, the world is now feeding about a billion more people than eleven years ago. In a quantitative sense, ground has not been lost. In response to prodding by the World Food Council, Developing World governments are committing more resources to producing their own food and to improving nutrition and primary health care. Aid through multilateral channels has increased, and many poor countries have improved their food security position by reducing imports and becoming more self-reliant in food.

Yet the numbers of malnourished people have not declined; the accompanying map shows where most of these people are located. Vulnerable groups are not being reached effectively in many instances. UNICEF estimates that in 1985 as many as 15 million children will die unnecessarily in these food-deficit countries unless immediate remedial and preventive action is taken.

The World Food Council's 1985 meeting confirmed and underscored the tragic paradox that had been apparent a year earlier in Ethiopia. On the one hand, hunger now is better understood; it is acknowledged that its roots lie deep in history, that it is more a problem of underdevelopment and lack of access than lack of production. Almost everyone now agrees that hunger can best be addressed by a strategy in which food-deficit country governments act in concert with the international community in a coordinated effort to eliminate this scourge. The other side of the paradox, ironically, is that at the precise moment when the above consensus is emerging and the commitment of Developing World governments is increasing, the resources available from the international community are decreasing. Although the global recession has not slowed global military expenditures, it has clearly combined with the clash of ideologies to dampen concerted remedial action against hunger.

ETHIOPIA, A WINDOW TO A HUNGRY WORLD

To be understood clearly and addressed effectively, hunger has to be seen in concrete, specific, vivid terms; it is hungry people. No one needs any longer to be reminded that there are famine and drought in Africa, most particularly in Ethiopia. However, it was not the consistent emphasis of UN bodies and the pleading reports from private agencies that captured the attention of policymakers in the international community. It was the graphic television news coverage of starving people that penetrated American and European homes beginning in October, 1984. The tragic pictures of emaciated mothers and starving children evoked an unprecedented outpouring of public giving to private relief agencies and a demand for governmental action.

The situation on Ethiopia and in several other African countries continues to be critical. This crisis reflects not so much the limitations of the relief efforts, as the failure of the affected governments and the international community to grasp the magnitude of the disaster. What private relief agencies had been reporting as far back as the Sahel famine of 1973 suddenly became a worldwide, televised tragedy.

The dramatic events in Ethiopia, which have seized the attention and moved the hearts of many people throughout the world, are, however, no more than the most current manifestation of trends and tendencies that will not be corrected merely by massive shipments of food. Food is essential to starving people, but at the same time the international community has an opportunity to go beyond the moment and to study and treat the causes of hunger, poverty and underdevelopment. What is needed in addition to food is preventive developmental assistance. Otherwise, the African tragedy of 1984–85 will be repeated time and time again.

Even allowing for adverse climatic conditions, inadequate and unpredictable rainfall, the major lesson of Ethiopia is that hunger is the result of human decisions and actions. Soil depletion, overgrazing, deforestation, population pressures, etc., all resulting from human decisions, have taken their toll. Civil war and the influx of refugees from other countries have complicated the problem in Ethiopia as well as in other nations of the world. International economic factors beyond the control of developing nations undercut their ability to meet the basic needs of their people. Inappropriate internal policies, especially economic discrimination against rural populations and the agricultural sector, have reduced farmer incentives and have left many of these countries more dependent on food imports which they can neither afford to buy nor borrow to purchase.

Food aid at this time is absolutely essential. One of its chief values is that it buys time—time for human behavior to develop and for public policy to change.

WORLD HUNGER, A REGIONAL LOOK

Africa is the region in which famine is most dramatic, the need most urgent. But the quieter crisis, the chronic undernutrition of millions of people, is in Asia. There are probably more hungry, malnourished people in India alone than in all of Africa; indeed the population of India is almost twice that of Africa. And yet India will export grain this year.

Widespread hunger exists despite the fact that the Asian continent has been consistently increasing its food production during the last ten years while dependence on food imports and, in particular, food aid has decreased dramatically. But the increase in production and the decrease in imports do not mean that nutritional need has been eliminated. As in other areas where hungry people struggle daily for survival, one of the greatest problems is access; hunger is concentrated in the poorest countries and mainly in the rural areas. Poor people are always the first potential victims of famines and droughts. Not only their hunger, but their poverty, must be treated. Providing food aid does not help much to correct poverty. An effective response requires increased developmental assistance, more equitable international trade policies, more humane debt policies and more need-oriented investment, domestic and foreign.

In Latin America, by contrast, the growth of great urban concentrations has given hunger in the region a more urban look and has changed both the nature of the problem and the structures through which it can be alleviated. The commercialization and export policies of much of Latin American agriculture has added to the problem by reducing the earning capacity of rural people at the same time that it pushes them toward increasing consumption of less nutritious imported "convenience" foods. Also, in Latin America, continuing civil strife is an additional factor disrupting agriculture and increasing the numbers of hungry people.

HUNGER IN AMERICA

There is hunger in the land of plenty. Poverty and economic dislocation plague the people of the United States in new and ever more visible ways: 35 million people are below the official poverty line; ten million people get food stamps, and many more need them; family farmers are being driven off the land, as rural communities decay; food lines, soup kitchens and shelters for the homeless are found in towns and cities of all sizes. More and more the American worker, the "new poor," has become a victim of his nation's economy. And the "old poor" are increasing in number: senior citizens, minority youth, Native Americans, migrant farm workers and women who head households. How can this "made in America" hunger occur in prosperous and highly developed society? Some American people are hungry because they are, relatively speaking, poor, and they are poor because they have no social, economic or political position—unwittingly the system has marginalized them. Public policy and private practice must become more sensitive and responsive to the poor who hunger. Although the agencies of IHA do not work in America, hunger in America is of great concern.

THE LONG AND THE SHORT OF IT

Chronic malnutrition now affects some 500 million people in the world. Its pervasiveness and persistence pose a formidable challenge to the human family as a whole, and to each of us as responsible members of it. It is a challenge that demands immediate personal action, and long-term commitment. World hunger, global food insecurity, the inability of half-a-billion people to grow or buy the food they need, are issues that must be addressed in two time frames simultaneously.

In the short run starving people have a legitimate right to be fed; this is a requirement of fundamental justice. The major means of feeding is food aid—the kinds of food distribution programs that IHA agencies have been engaged in for at least half a century. The bulk of the food commodities distributed come from government sources. In the United States that source is mainly the Food for Peace program (Public Law 480). Well over $30 billion worth of U.S. food has been made available in the three decades of that program, and millions of people are alive today who would not have survived without it.

At the same time, on a parallel track, it is essential to engage in the much more difficult task of helping these poor and hungry people improve the quality of their lives at least to the point where they are no longer dependent on an international food dole. People are hungry because they are poor; they are poor because they are poor; they are poor because they lack the power to choose otherwise. They are, in a sense, victims of an international economic system that unintentionally impoverishes them and keeps them poor. Those of us who benefit from that system, and above all those of us who make that system work, share a responsibility for making it work not only for our own benefit, but for the benefit of these disadvantaged people.

Food aid is necessary, but it is not enough; indeed, if providing food aid distracts us and the beneficiaries from attending to this longer-range action, it can, after the immediate needs are met, become a deterrent to the development that is needed to prevent future famines. Beyond charity, we have to institute justice. Moreover, we have to look not only at food aid and development assistance, but at all of our international economic transactions, such as private investment, commercial lending, trade in manufacturers and services and the sale of arms to poor nations. By improving and sensitizing the international economic system in which these transactions take place, society will naturally accord higher priority to meeting the basic human needs of the majority of the people of the world who are poor.

"Formidable" is the correct word for this task. Nonetheless, it is not beyond the power of human intelligence to devise a system that will ensure justice in economic actions, and not beyond the ability of the human will to make the sacrifices necessary to bring such a system into being.

Here we enter into the arena of public policy—not only of our own government, but of the governments of hungry people, whose policies, most analysts agree, are central to the alleviation of hunger. If a government sets food prices at a level that does not provide the local farmer with a reasonable return on his investment, food is unlikely to be produced in sufficient quantity to satisfy urban consumer needs. On the other hand, prices that are too high can fuel urban unrest. Assisting nations and private organizations with capital, technical assistance, training and a development-oriented approach to economic aid can help a government make and sustain the policy decisions required to move toward a more just distribution of the benefits of economic growth. It would seem that when you improve an individual's economic position, you enhance his opportunity for attaining food security.

INTERFAITH HUNGER APPEAL

Three experienced American private religious agencies have joined together in a major educational effort to address the challenge of world hunger. Working together since 1978 in a common appeal, our operations and outreach respond to hunger wherever it is found. Our programs try to deal with starvation, relief, refugee movement, reconstruction and development in Africa, Asia, Latin America, Eastern Europe and the Middle East. IHA agencies have counterparts which carry out comparable programs in the United States.

The members of IHA—Church World Service, Catholic Relief Services, and the American Jewish Joint Distribution Committee—work cooperatively with governments, international organizations, and other private agencies in a common effort, often using resources provided by the United States, other governments and the United Nations. A substantial portion of our budgets, however, is provided by individuals, acting on their own and contributing funds and resources through their religious organizations.

IHA agencies also seek to bring an awareness of world hunger to the American people through educational and promotional campaigns that invite their constituents to think and act for the improvement of the human condition. Our appeal to you, therefore, is on more than one level. As always, we need your money to purchase medicines, food, seeds, tools, and shelter and to pay for the delivery and distribution of these items. But even more, we need your concern, your ideas, your energies. We need your help to inform and educate the American people concerning the causes of hunger. Finally, we need your pledge to promote private and governmental policies that will convert the present international food system into a system that provides food and security for everyone on earth.

There is no doubt that hunger is the problem of our time, and equally there is no doubt that it has a solution. If we can walk on the moon, why can we not bring a starving man a piece of bread?—You are the Hope of the Hungry.

TRANSPORTATION TRUST FUNDS BELONG OFF-BUDGET

HON. GLENN M. ANDERSON
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. ANDERSON. Mr. Speaker, the House will soon be considering H.R. 3500, the Omnibus Budget and Reconciliation Act of 1985. Included in this bill is a provision which would take the highway trust fund, including its mass transit account, and the aviation trust fund off-budget.

The revenues in these trust funds are generated by special taxes on transportation users, and may be utilized only for their designated transportation purposes. If a nickel less is authorized for any of these programs, it would not reduce the terrible deficit plaguing our Nation's economy by a nickel, and nor would it allow any increases in defense or other domestic programs, without similarly increasing the deficit.

These transportation trust funds clearly belong off-budget. Yet, amendments may be offered to the reconciliation bill that would retain them under the unified budget, so that the Federal Government can continue to deceive the American people into thinking that the deficit is smaller than it actually is.

The Office of Management and Budget would support those amendments to retain the trust fund programs under the unified budget. I am submitting for the RECORD a copy of a letter from OMB, a misguided letter, stating their views. I am also submitting a point-by-point rebuttal to that letter.

Mr. Speaker, our colleagues may be asked to consider this very important issue next week. By presenting both sides of the issue now, I believe they will have before them the information necessary to vote wisely, and vote against amendments that deceive the Nation's taxpayers, and deprive the Nation of the sound transportation network that our transportation users are paying for.

OFFICE OF MANAGEMENT AND BUDGET,
Washington, DC, October 15, 1985.

House of Representatives, Washington, DC.

DEAR CONGRESSMAN: I would like to take this opportunity to express the Administration's opposition to the proposals included in H.R. 3500, the House Reconciliation Bill, to move the highway and airport and airways trust funds off-budget. I would also like to address what we believe is misinformation about the impact of the on-budget status of these trust funds.

It is unfortunate that the off-budget issue has been brought into the reconciliation process, as it may impede the timely enactment of reconciliation legislation, which most Committees in both Houses have addressed in good faith. If this issue is to be addressed, a more appropriate forum would be the highway reauthorization legislation.

The Administration opposes moving these transportation trust funds off-budget. On-budget status is important to provide a complete statement of total Government spending and to not misrepresent the size of the deficit. On-budget status provides the appropriate fiscal controls and oversight to ensure prudent program management. Once off-budget, programs are exempt from statutory budget controls.

The Administration disagrees with the following arguments made by the House Public Works Committee in defense of off-budget status:

Unified Budget Controls Unnecessary. The Committee claims that on-budget appropriation controls are unnecessary because other controls exist through the authorization process and the Byrd amendment.

However, we note that the Committee's provision includes language that would exempt the trust funds from any "general budget limitation imposed by statute or expenditures." This is tantamount to saying that the budget process, as prescribed by the Congressional Budget Act of 1974 and other laws, is unnecessary. Such language could be interpreted as negating the Byrd amendment. Furthermore, neither the Byrd amendment nor the authorization process controls obligation levels which, in turn, are key to determining outlay levels. Controlling outlays is essential to preventing a deficit situation in the trust funds. Moreover, the Byrd amendment is not a firm control. Congress has revised it in the past to meet particular circumstances and could do so again.

Unsuitability for Unified Budget. The Committee claims that dedicated trust funds supported by user fees have no place in the unified budget. When included in the unified budget, they are used to understate the size of general revenue deficits and to provide a balance of funds for borrowing for other Government programs.

The user fee argument is shallow. User fees *per se* do not justify off-budget status. In fact, if adopted Government-wide, many user fee-funded programs would move off-budget.

Second, the claim that trust funds understate the size of the deficit presumes that trust fund balances are counted as an off-set to the annual deficit. In fact, the annual deficit is the difference between annual receipts and outlays and does not count trust fund balances. Therefore, the annual deficit situation (outlays exceeding receipts) which the Administration projects in both the highway and airport trust funds adds to the deficit. Off-budget status would thus artificially reduce the size of the deficit. This is a particular concern in the Highway Trust Fund given the average annual deficit of $2 billion which the Administration projects through 1990.

Finally, the Committee wrongly characterizes borrowing from the trust funds as a rationale for restraining trust fund spending. Government borrowing is simply a mechanism to credit the trust funds with interest. This investment practice benefits the Highway Trust Fund by over $1 billion in additional resources each year.

Limitations Distort Programs. The Committee claims that obligation limitations have distorted ongoing programs by preventing States from fully obligating their allotted funds.

However, the obligation limitation is only one factor influencing States' abilities to program Federal funds. In the highway area, delays in Congressional approval of the Interstate Cost Estimate in recent years played havoc with the highway program. In addition, the ability of States to match Federal funds and program a sufficient number of projects influences the program. As a result, each year many States turn back unused funds.

In summary, the Administration believes that preserving the on-budget status is essential to the fiscal well-being of the highway and airport trust funds. We do not believe that on-budget status jeopardizes the integrity of the highway and airport programs.

The Administration greatly appreciates your concern with this issue and urges opposition to the House Public Works provision when the reconciliation bill is discussed in the House Rules Committee and on the House Floor.

Sincerely yours,

JAMES C. MILLER III,
Director.

POINT-BY-POINT REBUTTAL TO OMB TRUST FUNDS LETTER

1. Assertion: Reconciliation is an inappropriate vehicle for consideration of this issue. Highway reauthorization legislation would be better.

Response: By way of precedent, the Omnibus Budget Reconciliation Act of 1981 placed the strategic petroleum reserve program (not a trust fund program) off budget.

It is the budget process treatment of trust fund-financed transportation programs this year that lies at the heart of the problems which the Public Works and Transportation Committee seeks to remedy by moving the trust funds, off budget. If the budget process is causing a problem, where more suitable to deal with it than through the budget process itself?

If not here, then where? Certainly not through the appropriations process (in which the House recently moved to cut transit obligations by $90 million below the budget resolution) and certainly not through authorization legislation which the Senate can ignore for months if not years on end.

Practically speaking, this is the only way to make sure that the Senate, whose reconciliation numbers for highways incidentally are significantly below the budget resolution directives, confronts the issue.

2. Assertion: On-budget status is important to provide a complete statement of total Government spending and to not misrepresent the size of the deficit.

Response: Inclusion of *deficit-proof* trust funds in the unified budget with deficit-ridden general revenues is misleading in that (1) it implies that the trust fund revenues can be used for purposes other than those to which the funds are dedicated by law and (2) it uses any surplus to understate the real deficit.

As to a complete statement of total Government spending, there is absolutely nothing in off-budget status which would prevent the Administration or the Congress from publishing comprehensive data concerning on- and off-budget programs. It is without merit to argue, however, that the need for publication of information can be transformed into a rationale for *common control* of fundamentally dissimilar funds.

3. Assertion: On-budget status provides the appropriate fiscal controls and oversight to ensure prudent program management. Once off-budget, programs are exempt from statutory budget controls.

Response: As can be elaborated further below, all of the controls necessary for these programs are in existence (or soon will be in the case of aviation): The authorization process, anti-deficit mechanisms, scrutiny by the Ways and Means Committee in the process of determining revenue levels, and obligation limitations under the jurisdiction

of the authorizing committee. These will remain in place in full force and effect when the programs move off-budget.

The only constraint that will not be there will be unjustified pressure to hold down trust fund program spending to permit higher spending for general-fund programs.

4. Assertion: The Public Works language is tantamount to saying that the budget process is unnecessary.

Response: The Public Works language recognizes that deficit-proof trust funds derived from user-paid revenues and dedicated to particular purposes must be controlled, but not by the same controls applicable to general revenue-programs.

Presumably, the fiscal controls to which the OMB letter refers are obligation limitations imposed in appropriations acts (although section 401(d) of the Budget Act exempts these programs from such *requirements*). The Appropriations Committees can be expected to continue this practice; but the difference would be that such would occur in the absence of artificial pressure to constrain trust fund programs so as to accommodate increased general fund spending within overall budget totals.

The heart of the Public Works language is patterned after language in the Social Security amendments of 1983 which placed certain Social Security trust funds off budget effective in 1992. NOTE: Transportation trust funds are subject to greater controls than Social Security entitlement programs.

5. Assertion: The Public Works language could negate the Byrd Amendment. [This is the anti-deficiency provision contained in the highway revenue status; a similar provision applies to the mass transit account, and title VIII of H.R. 3500 would extend similar protection to the aviation trust fund.]

Response: This is absurd. The Public Works language simply refers to exemption of the trust funds from any "general budget limitation imposed by statute on expenditures . . ." By contrast, the Byrd amendment is not a general budget limitation. It is a requirement that apportionments of transportation funds cannot be made (or must be reduced) if the revenues anticipated to flow into the trust funds are expected to be insufficient to pay the bills when they come due.

6. Assertion: Neither the Byrd amendment nor the "authorization process" controls *obligation* levels, which are key to determining outlays.

Response: The Byrd amendment limits the availability of funds for *obligation*. As carried out by the Public Works Committee, the "authorization process" includes the imposition of obligation limitations in highway legislation.

7. Assertion: Controlling outlays is essential to preventing a deficit situation in trust funds.

Response: Those outlays are successfully controlled by the Byrd amendment through the periodic review of outstanding authorizations and revenues in connection with yearly apportionment of funds authorized for each fiscal year.

8. Assertion: The Byrd amendment is not a firm control because the Congress revised it.

Response: True, this was done once in the early, start-up years of the program to accommodate a temporary cash-flow problem. To portray this as common practice is misleading. Furthermore, revision of the Byrd amendment would require an enactment of law via legislation originating in the Committee on Ways and Means.

9. Assertion: User-fee status does not justify off-budget status.

Response: User-fee status does not justify off-budget status as a general proposition, nor does the Public Works and Transportation Committee so contend. The Committee does contend that revenues in a deficit-proof trust fund, derived from users of the transportation system, should not be (1) used to understate the size of the deficit (as argued above) or (2) to make possible increased spending for non-trust-fund programs.

The Public Works initiative did not originate in a vacuum. It is a practical response to distortions to which the trust funds have been subjected through the budget process.

10. Assertion: The Public Works position assumes that trust funds take in more in revenues than they spend out in outlays.

Response: Incorrect. The relation between income and outgo can vary between trust funds or with respect to a single trust at one time versus another. The Public Works position is that decisions made with respect to the programs financed by those funds—given overwhelming needs—should be made on the basis of the soundness of the funds rather than budgetary manipulation. These particular trust funds belong off budget regardless of whether the change would appear to enlarge or reduce the deficit in the unified budget.

11. Assertion: The Public Works Committee is incorrect in claiming that obligation limitations have distorted ongoing programs by preventing States from fully obligating their allotted funds.

Response: The OMB letter itself recognizes that a number of factors can influence the progress of a given state's highway program, including difficulty in coming up with non-Federal matching funds, delays in Congressional approval of the Interstate Cost Estimate, readiness of projects to proceed. But if obligation limitations each year are held to the level of new authorizations, those backlogs, once developed for whatever reason, will be perpetuated.

For example, the reconciliation package would set a ceiling of $13.25 billion on the highway program for fiscal year 1986. With some $750 million authorized for projects outside the ceiling, this would mean a $14 billion program. If new budget authority for fiscal year 1986 is held to $14.7 billion as we propose, we will be still adding some $700 million to the total backlog of unobligated apportionments which stood at $6.2 billion as of September 30, 1985.

THE DIVERSIFIED FUTURE OF THE ELECTRIC INDUSTRY

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. MARKEY. Mr. Speaker, I am submitting today for inclusion in the CONGRESSIONAL RECORD an article by Richard Munson from last Sunday's Washington Post (Oct. 13, 1985) on the future of electric power generation. The article is a valuable contribution to the national dialog on the shape of electricity demand as we near the 21st century, and on the varied and novel ways in which that uncertain demand might be met. I commend Mr. Munson's thoughtful analysis to my colleagues' attention.

[From the Washington Post, Oct. 13, 1985]

ELECTRIC POWER TO THE PEOPLE—WILL ENTREPRENEURIAL GENERATORS SEND MEGAWATT DINOSAURS THE WAY OF AT&T?

(By Richard Munson)

Bernard Bartos knew by 1980 that his company—Dow Corning—could not afford electricity from the nuclear reactor being built in Midland, Mich. Consumers Power, the state's largest utility, admitted that construction costs for the Midland plant had soared 15 times over the original 1967 budget and that electric rates would climb at least 68 percent between 1984 and 1990. Bartos believed he could generate less expensive power.

In January 1983, the Dow Corning executive proved his contention by inaugurating an 11-story, $35 million facility that generates 22 megawatts of electricty and 275,000 pounds of steam per hour, enough to save the giant, 950-employe silicone factory 25 percent of its $10-million-a-year energy bill.

It is fueled largely with wood wastes from sawmills, pulp mills and lumbering operations within a 75-mile radius of the central Michigan city. But its most extraordinary feature is the Dow Corning—rather than the electric utility monoply—owns and operates the power plant. "We are the pioneers of an unregulated electricity business," declares Bartos.

Bartos in only one of about 2,000 entrepreneurs who have been spurred by rising utility rates (much of it caused by overbudget nuclear reactors) to invest and promote an array of electricity-supplying technologies. Only a few years ago, these independent power producers—who cogenerate steam and electricity, burn wastes and harness the sun, wind, falling water and geothermal steam—were dismissed as backyard tinkerers with limited potential.

Yet today, according to reports from the Federal Energy Regulatory Commission and state public utility commissions, their assets total more than $45 billion, and they will, by the end of this decade, supply a quarter or more of the electric power in several regions of the country.

Such a large-scale entry of independent electricity providers into a field dominated by regulated monopolies could present consumers and legislators with headaches as monumental as that associated with the breakup of AT&T, or the deregulation of the banking and airline industries. But it also could save ratepayers billions and be a boon to the environment by postponing indefinitely the need for behemoth nuclear or coal-fired generators.

In California, the Public Utilities Commission reports that independents increased their capacity over the past three years from only 100 megawatts to 2,000 megawatts, about the equivalent of two nuclear reactors.

Moreover, the commission reports, California entrepreneurs are constructing an additional 12,750 megawatts, enough to boost their output by decade's end to a third of the state's current electrical capacity.

About 43 percent of the independent power production comes from cogenerators—devices that burn anything from natural gas to coal to wood and, instead of producing only one useful product, as normal installations do, produce two—electricity plus steam for heating water or driving industrial machines. Thirty percent comes

from wind-energy developers, 12 percent from wood or other biomass burners, 8 percent from small hydro operators, and the remaining 7 percent is divided between geothermal and solar entrepreneurs, according to the California Public Utilities Commission.

The contrast is stark with Pacific Gas & Electric's controversial Diablo Canyon nuclear reactors, which are built near an earthquake fault and have been the target of the largest antinuclear protests in American history. Since 1983, electric entrepreneurs, installing power plants averaging only 12 megawatts—100 times smaller than a large reactor—created as much new capacity as Diablo Canyon, in less than one-fifth the time, without an eightfold increase in the planned budget and without protests.

Similar growth is occurring in Texas, Maine, Michigan, New York and other pockets across the country where utility rates are high, according to state public utility commissions. In Houston, for example, independents added 1,300 megawatts of electricity—more than a large nuclear reactor—within the past two years. Houston Lighting & Power executives say cogenerators are developing another 6,000 megawatts—more than half the utility's current capacity. Houston Lighting & Power vice president Eugene Simmons, who wants to transmit the excess power to other regions, complains, "We are being overwhelmed by cogeneration." In Maine, electric entrepreneurs will supply one third of the state's electricity by the decade's end.

Since each installation is negligibly small by the standards mammoth utilities are used to, and the movement is only significant when it dawns on statisticans that thousands of such units are coming on line at the same time, the new businesses have been virtually ignored by industry analysts. One exception is James Liles of the Federal Energy Regulatory Commission, who says the growth of independent electricity producers has been "mind-boggling" and represents "a massive redeployment of generating capacity."

Jan Hamrin, director of Independent Energy Producers, a California trade association, claims that "utilities will never again build centralized power plants because entrepreneurs can generate electric power faster, safer and cheaper than can utility monopolies." Yet most utility executives either ignore or vehemently oppose the advance of competition in the electricity market. Idaho Power chairman James Bruce claims that independent producers cannot reliably supply electricity, and he argues that "it's dumb to tinker with the structure of utility monopolies that offer quality service."

The rapid rise of independent electricity producers comes at a time when there are the greatest disagreements in history over how much power America will need through the end of the century.

In Senate Energy Committee hearings in July, unsubtly titled "When Will the Lights Go Out?," it became clear that some utility executives and Reagan administration officials expect electricity use to grow approximately 3 percent annually, even with aggressive conservation programs.

The Edison Electric Institute (EEI), the industry's trade association, maintains this is so because advanced technologies like computers and robots require electricity. For that matter, so do metal workers who now use lasers to harden a metal in 10 minutes as much as they used to using a 24-hour bath in a 1,000-degree-Fahrenheit nitride liquid. Moreover, advanced plastic plants employ electrically heated injection-molding machines, while textile and paper firms use microwave technology for drying.

According to "The Future of Electric Power in America," a 1983 Department of Energy report, meeting this demand and replacing a few oil-fired burners will require 438 new power plants by the year 2000, or approximately two large stations each month. Such expansion would cost $1.8 trillion, approximately the size of the celebrated federal debt, which economists claim will raise interest rates and divert scarce capital from innovative businesses.

Other industry analysts, however, disagree. The Electricity Consumers Resource Council, an association of 19 major industrial users of electricity, including General Motors, Dupont and Bethlehem Steel, concludes that because of more efficient business processes, "there is no capacity limitation on a national basis that will cause severe electricity problems in either the short or long run."

Indeed, high electricity prices have sparked a revolution in the efficient use of electricity. In "intelligent buildings," computers interconnect heating, cooling and lighting controls for maximum energy management. Improved drive trains for electric motors, superinsulation in building construction and fluidized-bed heat treatment of metals are other conservation technologies that have been introduced only within the past few years. For that matter, a recently developed aluminum smelting process consumes 40 percent less electricity per pound than current technologies. Electricity is the most important raw material in the manufacturing of aluminum.

The vast differences among the opinions of these energy experts and the enormous expense of power plants make electricity planning more risky than ever before. For example, if generating capacity is built on the assumption that need will increase by 3 percent per year, and in fact growth is only 2 percent, that 1 percentage-point difference in the annual growth rate of electricity demand equals the equivalent of 100 large nuclear reactors by century's end, costing about $400 billion.

Overbuilding could bankrupt the utility industry, while underestimating could cause energy shortages. Clearly, being far wrong either way is unacceptable. Which is why an increasing number of analysts think that the only rational approach is to create a flexible electricity system that can accurately respond to an uncertain demand for power.

It is under such circumstances that private electric entrepreneurs who can build small facilities quickly—rather than take 10 or 12 years to construct huge power plants that tend to go well over budget—begin to look especially promising.

How did our electricity futures get so dicey? In simpler days, utility managers predicted demand without crowds or controversy. Throughout the 1950s and 1960s, consumption of electricity regularly advanced about 7 percent each year, doubling every decade. Forecasters plotted the rise, confident that they could safely plan and build new generating facilities. But efficiencies of scale declined as power plants became larger and more complex. And as fuel costs soared, the growth of need for electricity dropped to 2.9 percent throughout the decade after the 1973 oil embargo.

Believing the cutbacks were only temporary, the Edison Electric Institute launched a $20-million advertising campaign in 1978 to declare, "The time to build power plants is now." But EEI was wrong. Expanding construction combined with reduced growth of consumption to produce a staggeringly expensive gap between how much electrical-generating capacity existed versus how much was needed. This was one of the reasons utility directors abandoned more than $18 billion worth of investments in 114 proposed nuclear reactors, according to the federal Energy Information Administration. Another 67 coal-fired plants were also cancelled.

Despite the cutbacks, the industry's surplus generating capacity—which engineers attempt to maintain at a 20 percent level to handle emergencies—rose to almost 40 percent recently. Today's excess generating capacity has dearly cost utility stockholders and rate-payers.

Some utility executives think the trend toward slower demand growth was reversed in 1984 when the end of the recession caused a 5.6 percent rise in nationwide electricity consumption. However, for the 52 weeks ending Sept. 28, the most recently reported period, electricity production was up only 1.7 percent over the previous year.

It was in the midst of this uncertainty in the mid-'70s that the electricity industry appeared ripe for competition. New power plants increased rather than lowered rates. Moreover, high electricity prices and innovative technologies offered opportunities for independents to profitably supply power.

Utilities, as might be expected, tried to obstruct their new challengers by refusing to buy excess power or to supply back-up service. Politicians, however, facing the "energy crisis," wanted to substitute alternative energy technologies for imported oil. So lawmakers approved the Public Utility Regulatory Policies Act (PURPA) in 1978 to establish a market for power generated by entrepreneurs and to block utilities from discriminating against these new competitors.

Specifically, PURPA requires that the rates for transactions between independent producers and utilities "shall be just and reasonable and in the public interest, and shall not discriminate against the qualifying cogenerator of qualifying small power producers." The law forces a utility to buy such power at the price of its "avoided costs"—that is, what the electric company would have to spend to increase capacity to produce the same amount of power.

The actual computation is complex but basically, if an entrepreneur installs windmills that provide energy the utility would otherwise have had to build a new power plant to obtain, the utility must pay the independent producer the amount (per-kilowatt-hour) that it would have had to pay to capitalize, finance, fuel and operate that plant. Entrepreneurs generating power for less than that cost can turn a profit.

With PURPA in place and utility rates soaring, entrepreneurs quickly promoted an array of efficient technologies. The cogenerator—as tested machine—was the most popular, especially among petroleum refiners, wood and food processors, steel and chemical producers and other companies that need both heat and electric power.

The machine's advantage is efficiency and cost: A typical cogeneration unit costs $800 to $1,200 per kilowatt of capacity, less than half the price per kilowatt of a large new coal or nuclear plant. And it produces useful steam as icing on the cake. By late 1984, according to the International Cogeneration

Society, cogenerators produced more than 15,000 megawatts of power in the United States, matching the output of 15 nuclear reactors; another 200 projects with a total capacity of 6,000 megawatts were under construction.

Cogeneration users are a diverse lot. The S&W Cannery, for instance, burns peach pits and other wastes to provide the heat and electricity required by its Modesto, Calif., factory, which processes half the nation's canned peaches. Scott Paper Company incinerates waste wood at its Maine paper mills to generate 75 megawatts of electricity. And the Holiday Inn near New York's La Guardia Airport employes a small natural-gas-powered cogenerator that annually saves the hotel $63,000 in heating and electricity costs.

A new breed of wind-energy entrepreneurs is also challenging utility monopolies. Southeast of San Francisco, about 100 new businesses have converted Altamont Pass into a "Silcon Valley" for wind energy development. Five years ago, the barren, rolling hills supported only a few head of cattle. Today, ranchers share their land with more than 2,500 windmills that convert the constant breezes into about 400 megawatts of electric power.

These multibillion-dollar developments, however, do not guarantee energy utopia. Some utilities and consumer groups worry that introducing competition could have a lot of the drawbacks noted in the breakup of AT&T—especially for the small residential user. The type of organization most likely to profit from the installation of a cogeneration unit, after all, is a factory. If entrepreneurs too quickly remove the most lucrative industrial customers from the utility system, it would be residential consumers who would be forced to pick up a bigger share of the power company's fixed costs—such as transmission lines.

Some environmentalists—especially in New England and the Pacific Northwest—also fear that independents will run amok, slapping low-head hydro dams on every wild and free river they can back a cement truck up to.

And industrial policy experts note that in return for their monopoly, regulated utilities are legally liable if they do not produce all the electricity their customers need. It is problematic who could be held responsible for inadequate supply if power companies relied on independent producers.

Thoughtful utility executives, however, are slowly modifying their opposition to buying electricity from entrepreneurs as they find it more economical than building their own central power stations. "It makes more sense," says Sebastian Nola, cogeneration manager at Southern California Edison, "for independents to risk their own capital than for the power company to finance expensive new construction."

Some utility executives even admit their industry's very foundations are being shaken. "The U.S. electric industry," concludes Douglas Bauer, EEI's executive vice president, "is in the midst of its greatest historical transition." With over-budget new facilities threatening to bankrupt their entire operation, and engineers having hit the point of diminishing returns with large units, utility executives can no longer argue that expanding their monopoly will lead to lower costs.

Therefore, efficiency may have to be achieved as in other industries—through competition.

In the brave new world of competitive electrical generators, a regulated or publicly owned monopoly will probably still distribute the electricity, simply because building duplicate lines still does not make economic sense. Even limited competition among generators, however, will force producers to plan for and build only the most efficient plants possible and to keep operating cost low. If they don't, the distribution monopoly or individual consumers would buy power from cheaper suppliers.

Unlike today's system, where the central utility makes all forecasting decisions, many independent generators would participate in a competitive market. While a few generating companies may go bankrupt because of forecasting errors, diversity could provide more overall security than today's centralization, where a single utility's mistake can harm all the customers in a given region.

No one expects today's utility companies to abandon operations or expire, even though the days of hugh power stations seem to be waning. Just as General Electric and other large engineering firms are shifting their efforts from centralized plants to cogenerators, so will utilities try to adjust and prosper in a competitive market. Those that continue to rely on outmoded practices will suffer.

In essence, a new social contract is being created between electricity producers and consumers, one based on competition rather than monopolies and regulation. Some utility executives will certainly exercise their substantial political muscle to oppose independent power suppliers and to demand a return to more centralized control. But market forces have quickly converted efficient and dispersed technologies into multibillion-dollar businesses. Today's utilities are losing their monopolies to a new generation of electric entrepreneurs.

WORLD FOOD DAY

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. MOORHEAD. Mr. Speaker, Yesterday in a Capitol Hill setting, at a ceremony hosted by the Select Committee on Hunger and attended by the Postmaster General of the United States, 10 individuals received citations for their extraordinary efforts to end world hunger. From all parts of the country, all ages and walks of life they came, in honor of the first day of issue of a U.S. Postal Service stamp bearing the legend "Help End Hunger". One of the persons honored, Dorsey Lawson of Pasadena, CA, came from the 22d District of California which I represent.

Dorsey Lawson is not just dedicated to this cause; for her it is a way of life. The name of her support group really says it all, "Results." Dorsey by her steadfast devotion to a cause shows us all what it takes to make a difference in the lives of others. Dorsey represents the meaning of individual effort at its very best. She never forgets, and she never lets you forget, and we are all the better for it.

Today is World Food Day 1985; a day on which we can truly celebrate the good news that since 1961, 51 countries representing over 1.5 billion people have ended hunger as a national issue within their borders. It is also a day during which we can pay homage to Dorsey Lawson and her counterparts all over this Earth for their remarkable efforts to first bring the crisis to our attention, to take action and then most important of all to be able to show results. That is what this day is all about and that is what Dorsey Lawson is all about.

BOYS BROTHERHOOD REPUBLIC

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. GREEN. Mr. Speaker, I rise to commend the work of the Boys Brotherhood Republic, a nonprofit organization located on the Lower East Side of Manhattan in New York City. The BBR, which has, at times, been called the world's smallest democracy, was founded in Chicago in 1914. In 1932, Mayor Fiorello LaGuardia brought this organization to New York City in hopes of offsetting the negative effects of the Depression on the city's youth. Today, the BBR continues to educate its members about the need to be a positive and productive force in society.

The BBR serves over 2,200 young men from the ages of 7 to 19. These youth are the children of disadvantaged families, mainly residing in a community marked by crime, drugs, abandoned buildings, and low-income housing. The BBR has been able to reach out and steer them in playing a more positive role in their community.

The BBR has succeeded in curbing juvenile delinquency. The motto, "Boys are not likely to break the rules, if they are given the opportunity to make the rules," has held true for this organization. Members learn by doing rather than by being lectured to by adults. They begin to understand and respect the rights of fellow citizens. The BBR fosters a close sense of community feeling and responsibility.

The BBR seeks to build good character, citizenship, and a belief in responsible democracy. Its citizens become acquainted with democratic processes by participating in its own form of self-government. They actively elect a mayor, city clerk, treasurer, chief of police, city manager, councilmen, and so forth, to a city government. Every citizen must also participate in a BBR committee. The functions of the committees range from preserving order and overseeing violations of the BBR constitution to tutoring fellow members on homework. BBR members learn to be productive citizens and leaders. They are encouraged to look into their future and recognize their potential for growth.

More recently, the BBR, in cooperation with Touro College in New York City, opened the School of Career and Urban Studies in the Lower East Side. This new school, focused on attracting disadvantaged young adults and senior citizens in the community, encourages them to gain economic and social self-sufficiency. Once again, the BBR has shown its commitment

to the community. With such a commitment, this new venture can only prove to be a success.

KQV RADIO MARKS 10TH YEAR AS PITTSBURGH'S ALL-NEWS RADIO STATION

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. WALGREN. Mr. Speaker, on October 15, 1975, KQV Radio in Pittsburgh became the only station in western Pennsylvania to adopt an all-news format to inform the populace about events in our world which affect their daily lives. This week marks the 10th anniversary of the station's exclusive all-news service to hundreds of thousands of citizens in the Greater Pittsburgh area.

Further, within the next few months, the station will mark its 66th anniversary of regularly scheduled broadcasting, with many historians noting that it may be the oldest in the United States; broadcasting experimentally as early as 1919.

I hope the House of Representatives will note the 10th anniversary of KQV newsradio as an event of singular importance and a laudatory step in keeping our citizens informed. All-news radio stations perform a tremendous public service, and I salute KQV Radio, its owner, manager, and news team for a job well done.

GROUNDBREAKING CEREMONY FOR THE U.S. HOLOCAUST MEMORIAL MUSEUM

HON. LAWRENCE J. SMITH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. SMITH of Florida. Mr. Speaker, I rise today to urge my colleagues to read the speeches inserted in the October 16 and 17, 1985, CONGRESSIONAL RECORD regarding yesterday's long-awaited groundbreaking for the U.S. Holocaust Memorial Museum in Washington, DC.

I specifically would like to direct my colleagues to the moving remarks of Eli Weisel. As a Jew who has personally suffered family losses, I know the pain Professor Weisel speaks of when we remember the Nazi genocide committed against the Jewish people and I feel the loss of each life as if it were my own. Each survivor has their own story and private nightmare. Hitler's reign ended 40 years ago, but for the many who survived the camps, the hiding, and the awful waiting, it happened yesterday. Therefore, we will continue to remember the Nazi barbarism through the erection of this national Holocaust Memorial Museum so we can prevent this atrocity from happening again.

To my colleagues who were unable to attend yesterday's ceremony, let me tell you it was unlike any groundbreaking ceremony that I have ever attended. Dirt and ashes from concentration camps were in urns marked Auschwitz, Bergen-Belsen, Dachau, Theresienstadt, Treblinka and the Warsaw Jewish Cemetery and were emptied and mixed into the soil designated for the Holocaust Memorial Museum. What was not evident to the observer was the dirt and ashes. The urns from the concentration camps symbolize the mothers and fathers, children and grandchildren who were uprooted, imprisoned, tortured, and murdered at the hands of the Nazis.

The Holocaust changed the face of Judaism and history. Families were separated, villages and communities destroyed, and Jewish objects of religious and family life were confiscated. The Jewish heritage suffered a violation; family histories and heirlooms were lost forever. I pledge to the survivors of the Holocaust that we will not forget, and we have not forgotten.

YOUTH AWARENESS WEEK

HON. NANCY L. JOHNSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mrs. JOHNSON. Mr. Speaker, I would like to bring to the attenton of the Congress the extraordinary services of two community organizations in my district—the Torrington Youth Services Bureau and the Winsted Area Youth Services Bureau. Next Sunday will be the kickoff for a jointly sponsored community event and begin a week-long recognition of the contributions and the problems of local young people. The week of October 20 has been designated "Youth Awareness Week" by these creative innovative organizations.

During this week there will be ceremonines to recognize and praise the outstanding achievements and contributions of local youth. There will also be special workshops for adolescents, parents, and teachers, and seminars of interest and importance to the whole community.

This celebration will begin with a parade on Sunday, after which there will be an awards ceremony honoring the contributions and accomplishments of the young men and women of our towns in such areas as community service, art, and written communication. Throughout the balance of this week there will be seminars on parent effectiveness training, substance abuse recognition, adolescent depression, and teenage suicide. In addition, there will be family oriented activities, a community food drive, and a special junior high night.

Mr. Speaker, I bring your attention to "Youth Awareness Week" not only to praise the dedicated people who so sensitively and effectively planned it, but to offer this event as a model for other communities who are searching for new ways to develop a successful partnership between the comn:unity, its families, and its youth. The activities of "Youth Awareness Week," the products of a year's work, reflect the needs, demands and pressures of today's society. Again, I congratulate the people of Torrington and Winsted on their insightful dedication to the leaders of tomorrow.

CHARLES J. RAIMONDO—1985 MAN OF THE YEAR

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. TORRICELLI. Mr. Speaker, Mr. Charles J. Raimondo, an outstanding citizen of Fort Lee, NJ, will be honored as "1985 Man of the Year" at the Boys' Town of Italy 40th anniversary dinner of the Bergen County chapter on October 20, 1985. This deserving invitation was extended to Mr. Raimondo by the Right Reverend Monsignor John Patrick Carroll-Abbing, president of Boys' Town of Italy in Rome, Italy.

Charles "Chick" Raimondo is married to the former Janice Cammarata of Cliffside Park, NJ, and is the father of four children: Jacey, Charles, Jr., Shari, and Nancy. He was educated at Fort Lee High School, Bowling Green University in Ohio, Columbia University in New York, and Fairleigh Dickinson University in New Jersey. Mr. Raimondo served in the U.S. Navy Reserve and Active Reserve. He is now assigned to the Bureau of Yards and Docks, working on projects including the rehabilitation of naval facilities and the Third Naval District Coastal Defense for design and construction.

Mr. Raimondo has been a resident of Fort Lee for 40 years and has spent his career with C. Raimondo & Sons Construction Co., Inc., of Fort Lee. Chick is now president of the firm which his father, Carmelo, founded in 1923. He is presently director of the board of directors of the Fort Lee Savings & Loan Association; a member of the Fort Lee Parking Authority, the Fort Lee Mayor's Council on Economic Development, the Palisades Interstate Park Commission, the Fort Lee High School Athletic Football Committee, the Boy Scouts of America; and is chairman of the Fort Lee March of Dimes, and the Fort Lee and Englewood Cliffs Chamber of Commerce. Chick is a registered member of the National Association of Home Builders, a member of the New Jersey Chiefs Association, the New York Athletic Club, the New Jersey State P.B.A., the Bergen County Private Industry Council, and trustee of the Hudson County District Council of Laborers' Benefit Fund.

Chick's dedication to the principles which have made him a success in business are a reflection of the dedication he exhibits to his family and community. In addition to his many community activities, Chick has the well-deserved reputation as one who can always be counted on to lend a hand to those in need.

From dawn to dusk, the life commitment of our versatile honoree by the Boys' Town of Italy suggests that his mainstay is to "apply the same positive and thorough ap-

proach in one's community, business, and personal activities." This is evident as he commits his almost unlimited energy to comunity services, youth groups, and many different charities. As a concerned citizen, Chick has the all-important keystone—an ability to take the skeleton of an idea and engineer it from the basement to the casement to the rooftop to its final elevation.

Chick is that rare individual; a dedicated citizen to his family, his hometown of Fort Lee, NJ, to the State of New Jersey and his country. On October 20, 1985, I would like to join Chick's family and many friends as they pay tribute to my good friend when the Boys' Town of Italy honors him as their "Man of the Year."

TRIBUTE TO B.W. "BUD" LEE

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues the achievements and retirement of my constituent, B.W. "Bud" Lee of Ventura, CA. Bud is retiring on December 27, 1985, after 40 years of distinguished service to California agriculture, including 32½ years with University of California Cooperative Extension and 7½ years with the California Department of Agriculture.

He is a native Californian, born in Los Angeles and raised in Pomona. He graduated from Pomona High School and Pomona Junior College before transferring to the University of California at Davis and then to the University of California at Berkeley. World War II interrupted his schooling when he entered the U.S. Maritime Academy where he received a commission in both the U.S. merchant marine and Naval Reserve. After 4 years of service he returned to University of California at Berkeley, graduating in 1946.

Bud was employed by the California Department of Agriculture Bureau of Plant Pathology until joining University of California Cooperative Extension in May 1953. He served as citrus farm adviser in Los Angeles County until transferring to Ventura County in May 1957. In February 1966 he was appointed county director and farm adviser and assumed responsibility for administration, avocados and minor subtropical fruit. His activities and assistance in solving a number of major problems include liaison between the University of California Board of Regents and Ventura County Board of Supervisors, Effective Educational and Field Research Program for the citrus industries of Ventura County. He has authored or coauthored 105 articles and publications and many other activities too numerous to enumerate.

Bud is a member of numerous professional societies and industry committees including American Society of Horticultural Science, California Rare Fruit Growers, Florida State Horticultural Society, California Avocado Society, Avocado Nurseryman's Society, Citrus Research Advisory Board, and many others.

In 1973 he received the California Avocado Society Award of Honor and in 1984 he was recognized with the Distinguished Service Award for Outstanding Teaching by the University of California Cooperative Extension Assembly Council.

To summarize, Bud's supportive style as a manager and his expertise as a farm adviser and significant contributions to the avocado and citrus industries, leave a lasting legacy. His national and international recognition as a teacher and researcher is a direct result of his contributions and professionalism.

I wish Bud and his wife Nancy all the best in his well-deserved retirement.

RECEIVES POSTHUMOUS AWARD

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. SHUSTER. Mr. Speaker, I stand here today to pay tribute to Army Sgt. William D. Port of Petersburg, PA. Sergeant Port served in Vietnam, and was declared missing in action on January 12, 1968. Army officials later declared him dead after it was learned he died of wounds in prison on November 27, 1969. Sergeant Port received the Medal of Honor posthumously August 6, 1970.

William Port and his unit were involved in a combat operation against the enemy in the Que Son Valley on January 12, 1968. His unit came under heavy fire and was forced to withdraw. Sergeant Port was wounded during the withdrawal, and without regard for his safety ran through the heavy fire, and through the platoon perimeter to help a wounded comrade back to the safety of our lines. As the enemy forces assaulted his position, an enemy grenade landed in the midst of Sergeant Port and three fellow servicemen. Sergeant Port hurled himself toward the grenade shielding his comrades. He was wounded, taken prisoner and died in a Vietnamese prisoner of war camp. The Vietnamese have held his remains until recently when they turned them over to American officials.

On Friday, October 18, 1985, Sgt. William Port will be honored at Arlington Cemetery where he will finally be able to rest in peace surrounded by men like himself who selflessly gave their lives so that we might enjoy the freedom our great country affords us. I salute you Sgt. William D. Port for your heroism which reflects great credit upon yourself and your country.

HEARING EXAMINES HEALTH HAZARD OF PROLONGED RADON GAS EXPOSURE

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. YATRON. Mr. Speaker, I would like to acknowledge and commend three recent initiatives addressing indoor radon gas contamination. On October 10, 1985, Congressman JAMES SCHEUER, as chairman of the Subcommittee on Natural Resources, Agriculture Research and Environment, held a hearing to examine the health hazards of prolonged radon gas exposure and the current level and appropriateness of Federal and State efforts to identify and mitigate indoor radon. The hearing drew welcome and much-needed attention to this very serious environmental problem. Among the witnesses who testified at the hearing were four of my constituents from Boyertown, PA, in whose homes this deadly gas was first identified. Testimony on the health effects of radon gas inhalation was also provided by scientists.

The initial conclusions I drew from the hearing confirm the opinion I have held since first learning of the existence and seriousness of radon gas in thousands of homes in my district. The health risks are extraordinary—the Environmental Protection Agency estimates that between 5,000 and 30,000 lung cancer deaths each year can be attributed to radon gas exposure—and the Federal Government has an obligation to do much more than it currently is to mitigate the radon in homes on the Reading Prong. This, I believe, is the responsible public health policy to assume, regardless of the fact that this substance is naturally occurring and is most prevasively and perniciously found in homes where Federal environmental laws and regulations have not been applied. I would like to commend Chairman SCHEUER for holding the hearing and I urge all of our colleagues to join in the efforts many of us are making to adequately address this serious national concern.

I would also like to thank Pennsylvania Gov. Richard Thornburgh for establishing the Nation's first low interest loan program for radon mitigation purchases by affected homeowners. Announcing the program last Thursday, Governor Thornburgh said, "Although radon is a national problem certainly not limited to the Reading Prong, we simply can't wait any longer for the development of a national program." The loan program will provide 2 percent interest rates for low-and moderate-income families with annual incomes under $36,000. Loans at 8 to 9 percent will be available for families with incomes over $36,000 annually. This $3 million program is, to date, the most that has been offered to citizens living in contaminated homes. It is a good beginning but the Federal Government, specifically the EPA, ought to be providing further assistance for homes contaminated

at emergency levels. While we continue to press for additonal Federal support, the Commonwealth's financial assistance is a welcome resource for the many citizens affected by this problem.

I would finally like to recognize my colleague from Pennsylvania, Congressman BOB EDGAR, for his successful effort to amend the Superfund bill developed by the Public Works and Transportation Committee. The stronger Public Works Superfund reauthorization now includes a $4 million allotment for a national assessment and a larger demonstration program to be conducted by EPA. I commend Congressman EDGAR and urge my colleagues to support this bill and its amendment on radon.

I commend all these initiatives and encouarge further endeavors in the development of a more appropriate and responsible public policy for addressing this very serious environmental health concern.

FAMILY PLANNING IN PERIL

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mrs. SCHROEDER. Mr. Speaker, I would like to bring to my colleagues' attention an excellent speech delivered recently by our colleague, Representative BOB EDGAR of Pennsylvania. He accurately spells out the crisis which could befall our Nation's family planning programs if we don't act now. I commend this thoughtful piece to my colleagues:

FAMILY PLANNING IN PERIL

(By Bob Edgar)

As you know, Agency for International Development (AID) Administrator Peter McPherson recently announced that natural family planning groups will be allowed to use federal money to go into third world countries and set up family clinics which offer only one option: natural family planning.

The Philadelphia Daily News commented that—"It is bad enough when one-sided thinking becomes domestic policy when there is at least a semblance of open debate. But it borders on criminal to offer this narrow version of reality to people who may have no other source of information and may end up getting nothing from the U.S. but the promise of more babies they can watch go hungry."

This policy is simply a continuation of the conservatives' campaign, begun at the United Nations Population Conference in Mexico City, to prevent women in the third world from exercising freedom of choice. I find it repulsive to think of an African woman, children in tow on her hip and at her skirts, walking into a clinic, proud but afraid, only to be told her only option in limiting the growth of her family is to abstain. Ignorance is certainly not bliss.

Will the same thing happen on the domestic front?

Now imagine if you will the scenario so clearly depicted by the columnist Ellen Goodman:

"A woman goes into a family planning clinic in any American city, looking for a way to limit or space her children. The clinic gives her information about 'natural family planning' an updated version of rhythm." She then asks how effective this method might be. "She will be told that among careful users 24 percent will become pregnant during one year." "Let us now imagine," Goodman continues, "that she gulps and asks what else the clinic has to offer. The answer she gets is nothing."

Goodman painted this scenario in order for us to better see what the American equivalent of the recent AID decision would look like. We need to understand its terrible implications for the third world. I submit to you that there are those of the new right, who given the chance, would see such a scenario in the U.S. as their ultimate goal.

What we have on our hands now is a fight to preserve the Title X program as we know it. In the five county Southeastern Pennsylvania region alone, 90,000 people are served each year; in the whole Commonwealth, a quarter million. As you know, Title X funding represents the single largest source of support for family planning in Pennsylvania. These funds are used for early cancer detection, blood tests for anemia and diabetes, screening and treatment of sexually transmitted diseases, provision of contraceptive supplies, pregnancy testing, and infertility services.

No title X funding is used for abortions. Unfortunately, the "new right" is trying to use the abortion issue to effectively destroy Title X. This past summer, we tried to get the Title X program extended for another three years. Unfortunately, since the bill was being considered under a procedure which prohibits the addition of amendments, and since opponents labeled it a proabortion bill in order to evoke knee-jerk opposition, the bill was defeated. It received a majority of the votes, but because of the no-amendment stipulation, it needed to get two-thirds of the votes to pass.

This defeat does not mean that Title X is dead. All it means is that when we consider it again on the Floor of the House, it will be subject to amendment. I recently learned that one of our more conservative members of Congress is going to offer an amendment which says, "no funds may be awarded to any organization that provides abortion procedures, counseling for abortion procedures, or referral for abortion procedures, unless the life of the women may be endangered by carrying the fetus to term."

The consequences of this on a practical level are that Crozer-Chester, Jefferson and University of Pennsylvania Hospitals are no longer going to be able to get Title X funding unless they eliminate abortion or counseling services, or referral for such services.

If this happens, we will have a choice between drastically limiting the flow of family planning information and services in our community or the first steps to the return to the days of back room abortions.

We can't let this happen again.

Title X has been a triumph of a modern society. We must fight to keep it intact.

I have in my hands here evidence that we can win this fight. I am holding a few hundred cards that I have received from you over the last month demanding that we keep Title X as it is, unamended.

These cards represent the first step in taking this program into your own hands and fighting for what you believe is right.

The most important thing we can do is demand positive leadership. We need advocates of family planning to stave off enactment of the right wing agenda, which essentially means the elimination of family planning. We can't afford to lose this battle.

KIDS FOR KIDS HELP STARVING ETHIOPIANS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. FLORIO. Mr. Speaker, as we commemorate World Food Day, I wanted to direct the attention of my colleagues to an important effort that is taking place in my district this month. On October 1, 1985, the Camden County Kids for Kids launched a month-long fund drive to collect money for the starving in Ethiopia. Those involved have, through this effort, demonstrated a spirit of humanitarianism and dedication that is commendable and I hope that their efforts will set a precedent for communities throughout the Nation.

Mr. Speaker, 33 public, private, and parochial school districts in Camden County are currently involved in their goal of raising $150,000 for African famine relief. We have become increasingly aware of a different world, on the other side of the Atlantic, where the lack of food and water is a fact of life. Millions of men, women, and children are dying in Africa because they do not have food, water, or any of the basics we are fortunate enough to call essentials. Africa is experiencing the worst famine and drought of the century with 30 million people affected.

We are periodically stunned by pictures of living skeletons on the evening news—human beings slowly waiting to die because they can do nothing more. Over 20 million people around the world starve to death each year. More people have died in the past 5 years of hunger than in all the revolutions, wars, and murders of the past 150 years. A continent is disintegrating before our very eyes and it is up to us to ensure that this does not happen. The irony of this entire situation is that there is enough food produced to supply every human on the planet with enough for a proper diet.

I would like to commend the participants of the Camden County Kids for Kids Fund Drive for the energy that they have expended for this cause and to encourage them to perservere in reaching their goal. In particular, the efforts of Collingswood High School teacher Frances Grossman, who is organizing this effort after having been inspired by a similar effort in New York City last spring, have been instrumental in the drive. Fran spent this past summer organizing the logistics of the drive and has been the prime force behind this effort. Special recognition should be accorded to Fran's boss, Collingswood High School principal, Edward Sandal, the principal of Triton Regional High School, Louis Cappelli, Sr., and the principal of Zane North and Garfield Elementaries, Wayne Cochrane. They have devoted their time and energy toward helping a continent survive.

The success of the drive depends on the diligent students that have pledged their dedication to this cause. In particular, Coleen O'Connell of Collingswood High,

Thea Dilger of Triton Regional High School, and Nekea Coleman, an elementary school student from Camden, have worked especially hard in garnering support among their peers and rekindling the humanitarian spirit of the citizens of Camden County. Students are currently collecting money at school and in their neighborhoods, holding walk-a-thons, flea markets, and car washes, donating the price of a school lunch each week, and trying to organize a benefit concert.

As these students go door to door and participate in the many events surrounding this effort, they will not just be raising funds to keep children from starving. They will also be making sure that people here do not forget about those starving on the other side of the ocean. Mr. Speaker, I was touched by the concern and caring that has been expressed throughout this whole effort, and I urge my colleagues to join me in congratulating Camden County Kids for Kids.

HONORING FRED SORSABAL

HON. ROBERT E. BADHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. BADHAM. Mr. Speaker, I rise today to honor one of the Nation's truly outstanding municipal leaders, Mr. Fred Sorsabal, who on October 25, 1985, ended 15 years of superior service as city manager of Costa Mesa, CA.

Mr. Sorsabal, a native of Orange County, CA, leaves his prestigious post to assume a new and challenging role working full-time for the El Bekal Shrine Temple and seeking election as its 1986 potentate.

To say that Fred Sorsabal has been involved in the life of his community would be an understatement. In addition to his 26 years of public service, he has found the time to be a member of the board of directors of the Girl Scout Council of Orange County, a member of the Executive Committee of the Orange County United Way, president of the Harbor Area United Way and an extremely active member of the El Bekal Shrine Temple, with its many good works and community service.

During Mr. Sorsabal's service as city manager, the city of Costa Mesa has grown and emerged as one of the finest municipalities in America. Its citizens have the benefits of excellent schools, businesses, commercial centers and soon, one of the Nation's most remarkable and exciting performing arts and cultural centers. Of course, much of the success Costa Mesa has enjoyed during the last decade and a half is due to the commitment of those citizen leaders who have served as members of the city council. However, their wishes and those of the electorate have been carried out effectively, creatively and proficiently by Mr. Sorsabal and the staff he has assembled and led these past 15 years.

Fred Sorsabal has left an indelible mark of progress and achievement on the city of Costa Mesa and Orange County. His dedication to his responsibilities set a high standard of excellence for those in public service. As he moves forward to devote his energies to the selfless community service work of the Shrine Temple, those who know him are certain this new task will be met with the same vigor and enthusiasm he brought to the city of Costa Mesa.

THE 75TH ANNIVERSARY OF MOUNT CARMEL CHURCH, POUGHKEEPSIE, NY

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. FISH. Mr. Speaker, Sunday marks the 75th anniversary celebration of Mount Carmel Church in the city of Poughkeepsie, NY.

Over the last 75 years, Mount Carmel Church has stood as a symbol of the great strides made by Poughkeepsie's Italian immigrants, who have enriched the Queen City along the majestic Hudson River since the early 1900's.

Those immigrants came to this country to find employment opportunities and liberty. One of the first things they did after arriving in this country was to build a church, which would become Mount Carmel Roman Catholic Church. Using borrowed money, construction started on a yellow brick structure.

At the outset, Mount Carmel became one of Poughkeepsie's national churches, serving one of the city's numerous ethnic groups.

But it was more than just a place of worship. It was the community meeting place—a place where neighbors talked, exchanged ideas, and planned for the future.

In 1932, at the direction of the late Bishop Joseph Pernicone, who was Mount Carmel's young pastor at the time, the church community built a school, which was dedicated in 1935. Since that time, 2,500 students have passed through the school's halls.

Again, it was the community that raised the money in the beginning to operate the school.

The church and school still stand in Poughkeepsie's little Italy. Many of the area's former residents return to their old neighborhood regularly.

Mount Carmel and the community it serves have realized an American dream. Through hard work and perseverance, the children of the first immigrants have become part of this country's culture.

Congratulation to the church and its many loyal parishioners.

WILL SAYS IT WELL—AGAIN

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. SHUSTER. Mr. Speaker, I commend the following article by George Will, which appeared in the October 17, 1985 Washington Post, to my colleagues:

GEORGE F. WILL AND FELLOW-TRAVELERS

Anger is indeed valor's whetstone and the valor of the Americans, from the president to the pilots, is clear. But so is this: the interception of the terrorists underscores the limits of U.S. anti-terrorism policy, and the aftermath of the episode has enhanced the PLO.

The United States finally acted against terrorists because it had a highly unusual and unlikely-to-be-repeated opportunity for nonviolent action. It was an act compatible with the administration's "Miranda Rule" approach—fastidious about procedure—to anti-terrorism.

In the aftermath, three nations—one a member of NATO, another counted an ally, the third considered an example of "civilized communism"—showed that they value good relations with the PLO more than with the United States. Or perhaps the point should be put this way: the three nations' fear of PLO anger is palpable, their fear of U.S. anger is negligible.

A Third World ethicist, identified by The New York Times as a "senior Egyptian official," explained to The Times: A lie here is simply not the same as a lie in your country." He got that right. The president of Egypt lied repeatedly, extravagantly, transparently as he collaborated with the masterminds of the terror, trying to spirit to safety the killers of an American. Four days later this was a Washington Post headline: "U.S. Seeks to Soothe Egypt."

Who seeks to soothe whom? In the Third World, pride often is inversely proportional to the justification of it. The U.S. ambassador in Cairo says Egyptians are proud people. One yearns for the year when their overflowing pride will manifest itself in refusal to pocket billions of dollars from U.S. taxpayers.

Italy's government violated an extradition treaty with the United States and almost certainly facilitated the stealthy flight of a particularly odious terrorist to Eastern Europe. The Reagan administration called this Italian action "inexplicable," a polite description of an act completely comprehensible as appeasement of terrorists.

Then Yugoslavia, from which nothing better could be expected, violated an extradition treaty with the United States and compounded the offense with an offensive explanation, saying the terrorist has diplomatic immunity. The PLO, a terrorist organization has an "embassy" in Zagreb.

There is a similarity between the context of the terrorist interception and the context of the Grenada operation. Grenada came shortly after a stunning military defeat—the truck bomb against the Marines that did so much to drive U.S forces from Lebanon. Considered in the context of the debacle in Lebanon, Grenada suggested that the United States is temperamentally prepared to use military power only in its region and only when the use can be completed quickly, before Sam Donaldson (meaning television) arrives.

The interception of the terrorists came a week after, and in the context of, U.S. acquiescence in the U.N. condemnation of Israel for attacking the PLO's headquarters in Tunisia. Israel's sin was that it practiced what the United States preaches: "No sanctuary for terrorists."

Considered in the context of the U.S. refusal to veto the U.N. condemnation of Israel, the U.S. interception of the terrorists emphasizes the administration's highly restrictive criteria for anti-terrorism. It will censure actions taken even against obvious sources of terrorism, such as PLO headquarters in Tunisia. It will act only against particular terrorists specifically identified with isolated deeds, and only when it can act without jeopardizing bystanders. The administration says "if an opportunity presents itself we will do exactly the same thing again." "Exactly"? Exactly: no more.

The message of the interception was supposed to be "you can run but can't hide." But terrorists routinely do both. They use civilians, first as fodder and then to hide behind. Low-level terrorists with blood on their hands have little to fear, and their leaders have nothing to fear, from a U.S. government that brings to anti-terrorism a self-defeating desire to assign direct, individual culpability for particular acts of violence sponsored by organizations. This is a policy of striking only at the fingers rather than the brain of terrorism. We are bringing to the war against terrorism the same warlosing restraint that, 15 years ago, had U.S. fighter planes chasing individual trucks on the Ho Chi Minh Trail, while North Vietnam's dikes were spared.

Soon the U.S. government will utter the usual lubricating pleasantries, and Egypt's president and other fellow-travelers of terrorism will grudgingly, and for a profit, forgive us for the injuries they have done to us. The United States has won a battle but has lost the aftermath.

EX-PRESIDENTS' BENEFITS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, October 16, 1985, into the CONGRESSIONAL RECORD.

EX-PRESIDENTS' BENEFITS

Several debates on generous federal benefits for ex-Presidents have finally resulted in a consensus in Congress behind reform, and with good reason. Over the past 30 years, the annual cost of benefits for former Presidents has risen from $64,000 to $27 million. They now cost more than running the White House. At a time of major cutbacks in federal spending, benefits for ex-Presidents cannot be exempt from scrutiny.

Federal support for ex-Presidents is relatively new. For most of our history, Presidents had to look out for themselves once they left office. Some lived out their lives comfortably, while others, such as Presidents Jefferson and Jackson, died virtually penniless. Ex-Presidents earned their livelihoods from everything from potato farming or endorsing tooth powder to teaching law or writing their memoirs. Several turned down lucrative business offers because they thought it detracted from the dignity of the Presidency. Not until the growth of the modern Presidency after World War II were federal benefits finally provided to ex-Presidents to help them lead dignified lives free from financial worry. Concern was expressed about the thousands of dollars that President Truman was spending from his own pocket to reply to letters or requests for speeches, and it was pointed out that an ex-President was virtually the only employee of the federal government not covered by some retirement program. In 1955, Congress approved funds to maintain Presidential libraries, and in 1958 authorized an annual allowance of $25,000 for each ex-President, and provided each with staff assistance, an office, and free mailing privileges. Secret Service protection was added in 1962.

Today, benefits for ex-Presidents are substantial. Each is eligible to receive an annual pension of $86,000, staff allowances of $150,000 per year (dropping to $96,000 after 30 months), a free furnished office at a location of his choice, around-the-clock protection by 24 Secret Service agents (8 per shift), free mailing, maintenance of Presidential libraries (constructed with private funds), health care services at military hospitals, and travel allowances. Some pension and Secret Service benefits are also provided to wives and children of ex-Presidents.

Supporters of these benefits claim that we must allow an outgoing President to take care of post-White House demands with some dignity, that former Presidents are a national resource, and that they earned through their public service whatever benefits they receive. They also point out that in 1984 we spent more on Secret Service protection for various announced Presidential candidates than we spent on all types of ex-President benefits combined. Critics, on the other hand, say that our former Presidents are highly visible national symbols who should set examples of budgetary restraint. They also point out that ex-Presidents command enormous fees by virtue of having once been President. President Ford, for example, reportedly earns more than a million dollars a year through consulting fees, sitting on a dozen boards of directors, and talking to business groups at $18,000-$20,000 per speech.

My impression is that some of these benefits are excessive, and should be trimmed. Of the $27 million appropriated this year for ex-Presidents, the largest chunk, almost $16 million, goes to operate the 7 Presidential libraries. Although the libraries are built with private funds, the federal government pays to maintain them, and costs have been much higher than expected. Moreover, these buildings are more like large monuments than libraries, since fewer than 1% of their visitors are researchers. One major step under consideration, which I favor, would restrict the size of future Presidential libraries and require ex-Presidents to raise money not just for the construction of their libraries, but also for an endowment to help underwrite maintenance. The Reagan Administration supports this proposal, provided the planned Reagan Library is exempt. I also think that small entrance fees to Presidential libraries could be charged, and that we should consider setting up one large central depository for Presidential papers. In addition, savings could come from the $10 million it costs each year to provide Secret Service protection for ex-Presidents and their families. Critics say that there have been no direct threats to any of the former Presidents, and that Secret Service agents often double as chauffeurs and caddies. My guess is that Congress may be cautious about cutting back Secret Service protection during the current wave of international terrorism. Pensions plus office and staff expenses cost the remaining $1 million. Efforts are underway to reduce some of these expenses the longer the President has been out of office, to tighten oversight of allowable expenditures, and to bar the use of public funds for political or money-making purposes.

These efforts are important, but they must be supplemented with a different kind of reform in our treatment of ex-Presidents. We must change not only the way we provide benefits, but also the way we use ex-Presidents. The explosion since the 1950s of benefits to ex-Presidents is based partly on a recognition that ex-Presidents are a national resource. We provide funds so that they can live comfortably and with dignity. In practice, however, we still fail to take advantage of the special abilities ex-Presidents offer. Suggestions for using our ex-Presidents better include giving them seats, without voting rights, in the Senate, expanding their roles as special ambassadors, and appointing them to head up special commissions on major public questions, such as the successful Hoover Commission on government reorganization. We have had 31 ex-Presidents in our 200-year history. We should do all we can to encourage the use of the talents and experience of former occupants of the White House in further public service.

Much can be done to end wasteful public expenditures on ex-Presidents. We can also do much to improve our use of former Presidents. (Please help me update my mailing lists by notifying me of any incorrect or duplicate mailings.)

CONGRESSIONAL HIGH-TECHNOLOGY AWARDS PRESENTED

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. DYMALLY. Mr. Speaker, I am elated with the success of the Annual Congressional Science and Technology Awards Ceremony and Banquet. I am pleased to inform the Members that on October 2, 1985, the Congressional Caucus for Science and Technology along with its research arm, the Congressional Institute for Space, Science and Technology, held their annual awards ceremony and banquet to honor a number of people who have made outstanding contributions to the area of science policy and to the application of scientific research and technical development. Three of our most outstanding colleagues in the Congress: Representative MANUEL LUJAN, JR., Senator ERNEST F. HOLLINGS, and Senator JAKE GARN were among the distinguished honorees. I wish to submit to the CONGRESSIONAL RECORD a copy of the press release which gives further details about the awards.

CONGRESSIONAL CAUCUS AWARDS INNOVATORS IN SCIENCE AND TECHNOLOGY

Fifteen individuals and organizations are winners of the 1985 Congressional High Technology Awards for their outstanding contributions to the advancement of science

and technology. The Awards presentation launched various nationwide activities during October, which has been designated National High Technology Month by Congress and was signed into law by President Reagan last month.

Technological innovations permeate every aspect of our daily lives. They affect the way we live, work, communicate and learn. Yet, innovators in science and technology often do not get the public recognition they deserve. National High Technology Month provides unique opportunities to heighten the public awareness, particularly of America's children, about the importance of scientific and technological advances.

National High Technology Month distinguishes the people who are making significant contributions to science and technology. At the same time, National High Technology Month provides a forum to promote educational opportunities on important social and moral issues surrounding science and high technology.

The following private sector individuals and companies are the recipients of this coveted award: Lionel Baldwin, President, National Technological University; Giuseppe Cecchi, Chairman, IDI/Techworld; Adm. Bobby R. Inman, USN (Retired), President and Chief Executive Officer, Microelectronics and Computer Technology Corporation; Jenefir D. Isbister, Head, Environmental Microbiology Section, Atlantic Research Corporation; James Meadlock, President and Chairman, Integraph Corporation; Allen J. Neuharth, Chairman and Chief Executive Officer, Gannett Company, Inc.; John C. Norman, Thoracic and Cardiovascular Surgeon, Newark Beth Israel Medical Center; Eberhardt Rechtin, President, Aerospace Corporation; Joshua A. Smith, President and Chief Executive Officer, MAXIMA Corporation; Lieu Smith, Vice President and Project Manager, Sverdrup and Parcel and Associates; Association of Science-Technology Centers; and *High Technology* Magazine.

This year's public sector awards went to Sen. Ernest F. Hollings (D-SC); Sen. Jake Garn (R-UT); and Rep. Manuel Lujan, Jr. (D-NM). A special surprise award was presented to Rep. Mervyn M. Dymally (D-CA), Co-Chairman of the Congressional Caucus for Science and Technology, for his tireless efforts to promote leadership in science and technology.

Certificates for Honorable Mention were presented to: Business People, Inc., for pioneering career development techniques via satellite; the Engineers of Bell Communications Research for communications technology; Ms. Daisy C. Hicks for promoting public understanding of technology; Dr. C. Walton Lillehei, for bio-medical technology and Mr. Jean Muller for systems engineering.

The States of Georgia, Minnesota and North Carolina received awards for implementing outstanding programs and activities during National High Tech Week of 1984. Special Appreciation awards were presented to Dr. Alvin Nashman, Caby Smith and William Gary.

Those presenting awards this year include Senators Jay Rockefeller and Jeremiah Denton, and Representatives Norman Mineta and Parren Mitchell. Presenting from the private sector were Dr. Alvin Nashman of the Computer Sciences Corporation and Dr. Walter Massey of the University of Chicago.

BANKS, TAXES, AND GREED

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. STARK. Mr. Speaker, the people who gave us billions of dollars in increased deficits by encouraging noncompliance in bank interest and dividend reporting are not well on the way to wrecking tax relief for millions of American taxpayers.

The banking lobby has succeded in punching a big hole in the tax reform efforts in Ways and Means. Their victory is the Nation's loss.

The following editorial from the Washington Post of October 17, says it all:

BANKS, TAXES, AND GREED

The arrogance of the banking lobby has to be seen to be believed. As the House Ways and Means Committee was working on President Reagan's tax reform bill this week, the lobbyists succeeded in turning a majority of the members around and, instead of abolishing one particularly dubious tax break for the banks, they actually voted to widen it. It is not as though the commercial banks are overtaxed. To the contrary, banks already pay very little in the way of taxes precisely because of their skill in wedging loopholes into the law.

This one involves the provision that banks make for defaulted loans. Any business can take a deduction for a bad loan. But present law allows banks to set up special reserves—in amounts not necessarily related to their actual losses—and take their deductions when they put money into the reserves rather than when the losses actually take place. As the White House pointed out last spring, this obscure little rule means that banks enjoy more favorable tax treatment of bad debts than other businesses that lend to their customers—department stores, for example. The banks like it that way.

This fragment of tax law may seem esoteric to the point of invisibility, but it means a very substantial amount of money to the banks—$2.9 billion over the next three years. The president's tax bill would abolish this special preference and put the banks on the same footing as other businesses. The parallel bill put forward by the chairman of Ways and Means, Rep. DAN ROSTENKOWSKI, would do the same thing. But when it came up last Tuesday for a decision, the committee, over Mr. Rostenkowski's vehement protests, voted not only to preserve the present tax break for the bankers but also to expand it by an additional $4.7 billion over the next three years.

It's not only an example of greed on the part of the banks. It's also a bad omen for tax reform. The president's plan is to reduce tax rates without losing revenue by abolishing expensive loopholes such as this one. You don't have to be told that the people who currently enjoy these preferences are going to fight to keep them. This week they seem to be winning.

DISCUSSION NEEDED ON DISASTER INSURANCE

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. GEPHARDT. Mr. Speaker, the devastating and tragic earthquake that hit Mexico City recently has understandably occupied the hearts and minds of all Americans. We simply cannot be anything but deeply saddened by the loss of thousands of lives—parents and children, brothers and sisters. We all pray for these lost loved ones and those who grieve for them.

The tragedy in Mexico City must also serve as a vivid demonstration of the widespread destruction and enormous costs—both human and financial—that such a natural disaster can bring about at any place on this planet. The downtown area of Mexico City has largey been reduced to rubble, with thousands of deaths and injuries, massive property damage, and Mexico's already troubled economy dealt a further blow. Thousands of residences, shops, and offices in the central city were completely destroyed, creating costs the New York Times called "astronomical."

A tragedy of the magnitude of the Mexico City earthquake raises serious questions for us here in the United States. It is a time to remind ourselves that a natural disaster of this magnitude is certain to affect our own country. The question is not whether it will happen, but when and where.

I am particularly concerned because the New Madrid fault, considered by many seismologists to be a very likely site of the next major earthquake in the United States, is located in my home State of Missouri. Seismologists believe that a truly devastating earthquake well could occur in the Midwest along the New Madrid fault, causing billions of dollars of damage in Missouri, Illinois, Indiana, Kentucky, Tennessee, Mississippi, and Arkansas. There is also, of course, the very real and serious risk of a major earth movement catastrophe in the great State of California.

This past September, Tampa suffered heavy damage from hurricane Elena. And more recently, we here in the Washington area breathed a sigh of relief when hurricane Gloria spared us the destruction we feared. Every year we read of houses on the coast of California sliding into the sea, overwhelmed by the ever-recurring mud. Natural disasters wreak their havoc regularly in our country, and no one knows how long we will be spared the catastrophe the seismologists predict.

What have we done to prepare ourselves for such a natural catastrophe? Little, I submit, if anything. If a disaster of the magnitude of the recent earthquake in Mexico City were to strike a major American metropolitan area tomorrow, many individuals and businesses could suffer life-shattering financial losses. At present, little insurance coverage is available to protect against such catastrophes because of the

sheer magnitude of the risk involved. Currently, if such a disaster should strike, literally billions of dollars of uninsured property damage would result, placing a heavy burden on the Federal Government to provide disaster relief at levels that could only be described as crippling.

It is essential for us to begin to explore solutions to this problem now—before a major disaster strikes. I don't know what the solution is; I'm not sure that anyone does, yet. But clearly it is time to start working toward one now. If we delay in preparing for such a disaster, we too will face the predicament that Mexico City currently faces—a city in ruins without the resources to rebuild.

I AM NOT THE PRESIDENT, CONTINUED

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mrs. SCHROEDER. Mr. Speaker, the Wall Street Journal today details yet another intelligence fiasco—the hiring, training, firing, and defection to the Soviet Union of one Edward L. Howard.

The President of the United States, one Ronald Reagan, has been quick to blame past Presidents for the errors, catastrophes, tragedies, fiascos, and bungling of the current administration.

The entire Howard debacle occurred between 1981 and 1985. Which President shall we blame?—Van Buren? Garfield? Pierce? I await word from the White House.

The Journal article, "KGB Defector Confirms U.S. Intelligence Fiasco," follows:

[From the Wall Street Journal, Oct. 17, 1985]

KGB DEFECTOR CONFIRMS U.S. INTELLIGENCE FIASCO

(By William Kucewicz)

The KGB took the unusual step last month of issuing what can only be called a press release. In a statement distributed by the official TASS news agency, the Soviet intelligence agency accused a Soviet citizen of spying for the U.S. and also announced the expulsion of a U.S. Embassy official.

The KGB named the suspected spy as A. G. Tolkachev. He was identified merely as a staff member of a "Moscow research institute." No other details about his background were provided. His arrest apparently took place sometime in early June. The announcement maintained that Mr. Tolkachev had been caught passing information to an American diplomat, Paul M. Stombaugh, of the U.S. Embassy's political section. Mr. Stombaugh was ordered to leave the Soviet Union June 14. The KGB statement gave no explanation for the three-month delay in announcing Mr. Tolkachev's arrest and Mr. Stombaugh's expulsion.

Western news correspondents in Moscow interpreted the belated announcement as one-upmanship by Soviet authorities. A week earlier, Britain had expelled 31 Soviets for spying and the Soviet Union responded in kind by ousting an equal number of Britons in Moscow. This exchange had been triggered by the defection of a Soviet spy in London, who had apparently worked as a double agent for the British for years. The Tolkachev announcement was seen as just another spy maneuver.

VALUABLE HUMAN ASSET

That wasn't the real story, however. According to high-level U.S. intelligence sources, Mr. Tolkachev was one of the Central Intelligence Agency's most valuable assets in the Soviet Union. And his exposure and arrest stand as indictments of gross mismanagement and ineptitude reaching to the highest levels of U.S. counterintelligence operations.

Mr. Tolkachev was an electronics expert at a military aviation institute in Moscow. Over several years, he had passed invaluable information to the U.S. about the Soviet Union's latest research efforts in new aircraft technology—especially avionics, or electronic guidance and countermeasures; advanced radar; and so-called "stealth," or radar-avoidance, techniques. Such research is at the cutting edge of military aircraft breakthroughs, both for the Soviets and the U.S. Mr. Tolkachev, one source hinted, may have also tipped the U.S. off to the large phased-array radar at Krasnoyarsk—a treaty-violating facility in the south-central part of the country aimed at completing a nationwide anti-ballistic-missile defense.

"He was one of our most lucrative agents," said another well-placed source. "He saved us billions of dollars in development costs" by telling the U.S. about the direction of Soviet aviation efforts. In that way, American researchers could more precisely target their own work toward countering future military threats.

U.S. intelligence experts believe that Mr. Tolkachev is fated for execution, if he is not already dead. But how was he discovered? And why did the KGB wait three months before announcing his arrest?

Mr. Tolkachev wasn't merely caught in the act of passing secrets to the U.S. Embassy's Mr. Stombaugh, as the KGB claims. In fact, as U.S. intelligence sources tell it, he was betrayed by a former CIA agent, Edward L. Howard. And the KGB's peculiar September announcement was apparently a ruse to try to put U.S. counter-intelligence officers off the scent of this turncoat.

Mr. Howard, who is now 33, joined the CIA in January 1981. An initial polygraph test indicated that he was an occasional drug user. Agency officials told him to end his drug-taking or face dismissal. He then promised to give up drugs.

Shortly thereafter, he entered an intensive, 2½-year training program to become a "deep cover" case officer in the U.S. Embassy in Moscow. One of his assignments would be to "run" Mr. Tolkachev; in other words, he was to collect Mr. Tolkachev's materials at "dead drop" sites in Moscow and to care for his needs. In the course of his training, this untried and untested trainee was, inexcusably, told about critical U.S. human intelligence operations in Moscow; he was even informed about anti-Soviet operations in the U.S. Mr. Howard was also trained for several months by the Federal Bureau of Investigation in surveillance techniques and evasion.

Before being dispatched to Moscow, Mr. Howard was given another polygraph test which suggested that his drug use had continued and also indicated at least one instance of petty theft outside the government. According to sources who have long been critical of shortcomings in U.S. counterintelligence capability, Deputy Director of Central Intelligence John N. McMahon at this point decided he wanted Mr. Howard out of the agency. Mr. McMahon, a career intelligence officer for more than 30 years, had been the CIA's executive director, responsible for the day-to-day management of the agency, when Mr. Howard was hired. In April 1982, Mr. McMahon was named by President Reagan to replace Adm. Bobby R. Inman as deputy intelligence director.

In spring 1983, Mr. Howard was told to resign or he'd be fired. Mr. McMahon took this step despite Mr. Howard's privileged knowledge of U.S. intelligence operations in Moscow, and what his continued drug use said about his emotional stability. (Later, in February 1984, Mr. Howard was arrested for brandishing a pistol at three men in downtown Santa Fe, N.M.; in a plea bargain, he pleaded guilty to an assault charge and was sentence to probation.) Instead of firing him, intelligence experts suggest, a more sensible course might have been to cancel Mr. Howard's transfer to Moscow but retain him in a nonsensitive area of the agency where his actions could be closely monitored.

(Mr. McMahon didn't return a phone call yesterday requesting comment.)

In September 1984, Mr. Howard told two of his former colleagues at the CIA that he was thinking of passing his information to the Soviets as an act of revenge, according to documents filed in a Justice Department criminal complaint against him. These agents then told the proper CIA authorities about Mr. Howard's threat. But the agency's only response was to get a psychiatrist for Mr. Howard in New Mexico, where the CIA had helped him find a job as an economic analyst with the state government back in June 1983.

Meanwhile, a momentous event was occurring a continent away that would darken further the profile of Edward Howard. On July 28 of this year, in Rome, a visiting Soviet official was taking a stroll with some colleagues. He told them that he would meet them back at the embassy after he toured the Vatican museum. His Soviet compatriots never saw him again, and a month later he was in the U.S. being debriefed by the CIA. The Soviet official is Vitaly Yurchenko of the KGB. By many accounts, he is one of the most important Soviet defectors in recent history.

The State Department officially announced Mr. Yurchenko's defection last week. He was deputy chief of the North American department of the KGB's First Chief Directorate, which is in charge of the Soviet Union's world-wide spy operations. He was "specifically responsible for the direction of KGB intelligence operations in the U.S. and Canada," the State Department's announcement said. In addition, he held a senior position in the KGB's counterintelligence program, which aims to root out any Russian moles working for the U.S. or other foreign governments. Previously, Mr. Yurchenko served as a spy in the Soviet Embassy in Washington from 1975 to 1980. As a result of these positions, Mr. Yurchenko was able to gain a broad understanding of the highly compartmentalized operations of the KGB.

Mr. Yurchenko gave his debriefers a code name for a former CIA agent who had supplied valuable information to the KGB. While he did not have the real name of the agent, Mr. Yurchenko did provide enough information for U.S. authorities to "sift through" the relevant data and finally pinpoint Mr. Howard as the suspected spy, said law-enforcement sources, who asked not to

be identified. According to other sources familiar with the debriefing, Mr. Yurchenko said that this former CIA agent had provided the KGB with details about U.S. human intelligence activities in Moscow, including the identity of A.G. Tolkachev, Mr. Howard's revelations therefore, prompted Mr. Tolkachev's arrest and likely execution.

MAJOR FOUL-UP

FBI agents were instructed to interview Mr. Howard but not to arrest him. Explained a law-enforcement source: "The information provided by the defector, standing alone, was not sufficient to establish probable cause." After he was quizzed, FBI agents kept Mr. Howard under surveillance. In a major foul-up, however, no one ever told the FBI agents that Mr. Howard had been schooled by the bureau itself in surveillance and evasion tactics.

On the moonless night of Sept. 21, Mr. Howard escaped his FBI watchdogs. On Sept. 23, the FBI issued a warrant for his arrest, but it was too late. U.S. intelligence finally succeeded in tracing Mr. Howard's trail to Finland and then to Moscow, where he is now presumably being debriefed on all he knows about U.S. spying operations in the Soviet Union and elsewhere.

"The United States has virtually zero counterintelligence capability," Sen. Malcolm Wallop (R., Wyo.) said recently in criticizing the CIA's and FBI's failures in the Howard case. Some experts are predicting a major shakeup in intelligence management due to the Howard-Tolkachev-Yurchenko affair. What will remain after blame is assessed, of course, is that the U.S. has lost one of its most valuable human assets in the Soviet Union and his alleged betrayer has fled safely to Moscow.

ARNOLD ROPEIK SPEAKS OUT ON THE WALLENBERG CASE

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. COURTER. Mr. Speaker, this morning's news reports include mention of a U.S. district court ruling that the Soviet Union violated international law in 1945 when it seized Swedish diplomat Raoul Wallenberg, credited with saving some 100,000 Hungarian Jews. Andrei Gromyko, the current Soviet President, admitted in 1957 that Mr. Wallenberg was in fact a Soviet prisoner, but stated that he died of natural causes on July 17, 1947. However the U.S. court found "credible and uncontroverted evidence" that Wallenberg was alive long after 1947.

Perhaps the Soviets who speak so regularly of the evils of Nazism and their own wartime efforts to protect mankind from those evils, will never do anything to help us resolve this terrible mystery. But we cannot afford to forget the dangerous sacrifices made by Mr. Wallenberg, or all those now living in this country whose freedom and safe passage he won.

Arnold Ropeik, managing editor of the Times of Trenton, NJ, wrote a fine column on the Wallenberg case a few weeks ago, and its message is worthy of a wide hearing. I ask that it be entered into the RECORD for today.

The article follows:

[From the Times (Trenton, NJ), Sept. 27, 1985]

WALLENBERG: CAN'T HE BE SAVED?

(By Arnold Ropeik)

Most people are now pretty familiar with the Raoul Wallenberg story. His exploits are legendary, and when you talk about genuine heroes, this man is surely one of them.

From time to time, individuals or groups hold programs designed to draw support in the fight to find out what really happened to Wallenberg. But what baffles me is why it remains for small groups, individuals and the media to illuminate the facts when that illumination should come from the most powerful offices in the world.

Research shows that some efforts have been made. By the United States; by Sweden, his native land; by major Jewish and non-Jewish human rights groups. All want to save a man who, by bravery, bluff and brilliance, kept Nazi death squads at bay and saved something like 100,000 people from certain doom.

It is obvious that not enough was done early on. The matter lay hidden, or at best, forgotten, for much too long.

Wallenberg will be honored at a reception, dinner and program beginning at 5:30 p.m. Oct. 5 in Scanticon-Princeton Conference Center.

Why is this man allowed to rot in prison, Russian or wherever?

Why didn't his native Sweden scream long, loud and much earlier to the rest of the world?

Why can't the all-powerful United States extract an answer from the Soviet Union to at least one element of the drama: Is he alive or is he dead?

Why was he imprisoned by the Russians at the end of the war if what he did victimized the hated Nazis, the same demented murderers who raped the Russian land and its people?

When a man saves 100,000 people, he leaves an indelible mark on many communities, and this area is one of them. In the last days of the war, one of Wallenberg's cleverly devised and courageously presented documents saved the lives of Dr. Vera Goodkin and her family. She is a professor at Mercer County Community College who will be at the Oct. 5 tribute to tell the story of her rescue.

Per Anger, a retired Swedish diplomat, will fly in from Sweden to offer firsthand description of those dramatic days in Budapest. Anger was one of those who worked alongside Wallenberg in preparing diplomatic "passes" that fooled the Nazis.

Anger, who worked with Wallenberg in the tense days of 1944-45, may be able to shed some light on Wallenberg's fate. He has remained in touch with the situation especially after Wallenberg was believed sighted a few years ago in a Russian prison.

The Oct. 5 date has added significance. It is the fourth anniversary of the day Congress made Wallenberg an honorary citizen of the U.S.

To me, the knowledge that he is a citizen of this land, honorary or real, should force our government to keep the heat on and cry out loudly in Wallenberg's behalf.

What possible motive can the Russians have for keeping this man behind bars? Did Wallenberg come by information the Soviets cannot afford to have the world know? Was he involved in espionage for Sweden, or others?

When American hostages are taken around the world, the hue and cry reverberates throughout the planet. This man is now one of us. We ought to fight harder to find out what has happened to him.

The small session at Scanticon is but one tiny chapter in this astounding story. Perhaps an answer or two will come from the gathering. Maybe an idea on how to proceed will be born.

The story, and the man himself, must not be allowed to perish.

If Raoul Wallenberg dies alone, we all will carry some of burden of his death.

BUSINESS SUPPORTS DAYLIGHT SAVING TIME

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. MARKEY. Mr. Speaker, the House is scheduled on Tuesday to consider H.R. 2095, the Daylight Saving Extension Act of 1985. This legislation, which adds 3 weeks of daylight saving time at the start, and 1 week at the end, has been supported by every President over the past 15 years, because of its benefits for energy conservation, crime reduction, and traffic safety.

Daylight saving time has also enjoyed tremendous public support. Recent public opinion polls show that Americans would prefer more daylight saving time by more than 2 to 1.

This year, businesses have also recognized the benefits of daylight saving time and have joined forces in the Daylight Saving Time Coalition. The Coalition represents businesses with over $135 billion in annual sales. These companies have estimated that sales could increase by 5 to 10 percent from increased daylight saving time. That $6 to $13 billion increase means more jobs, economic growth, and lower deficits.

The members of the Daylight Saving Time Coalition are:

Amateur Softball Association; American Association of Nursery; Barbeque Industry Association, Chocolate Manufacturers Association; Foodservice and Lodging Institute; Hechinger Co.; International Association of Amusement Parks & Attractions; The Kingsford Co.

National Association of Convenience Stores; National Candy Brokers Association; National Confectioners Association; Parcourse; RP Foundation Fighting Blindness; The Southland Corp.; Sporting Goods Manufacturers Association.

Extending daylight saving time is a way to boost the economy without tax breaks or Government spending. In fact, the increased economic activity will help reduce our deficit.

I urge my colleagues to support this bill.

ROBOTICS AND AUTOMATION AT ROCKWELL INTERNATIONAL CORP.

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. WALGREN. Mr. Speaker, on October 7, the House Subcommittee on Science, Research and Technology, which I chair, held a hearing on the role of automation and robotics in U.S. competitiveness. The hearing took place at the College of Technology of the State University of New York in Utica, where new research and training programs have been initiated in these rapidly moving technical fields.

As my colleagues know, U.S. industrial competitiveness is threatened by obsolescence in parts of our basic and manufacturing industries. Innovations in robotics and automation technology hold the promise for dramatically improving productivity and thereby, regaining our strong position in international trade. Government, industry, and academia must continue their cooperative efforts to bring these technologies on-line and to train the work force that will be required.

I was particularly pleased that one of the participants in the hearing was from Rockwell International Corp., with headquarters in Pittsburgh. Mr. J. David Mitchell, Rockwell's director for productivity and advanced manufacturing programs presented the subcommittee with a description of the impressive progress at Rockwell in robotics and automation. I would like to share Mr. Mitchell's statement with my colleagues. It was an excellent contribution to our hearing.

STATEMENT OF J. DAVID MITCHELL, DIRECTOR-PRODUCTIVITY AND ADVANCED MANUFACTURING PROGRAMS, ROCKWELL INTERNATIONAL CORP., CONCERNING ROBOTICS AND AUTOMATION

Mr. Chairman and members of the subcommittee, I am J. David Mitchell, Director—Productivity and Advanced Manufacturing Programs, on the corporate operations staff of Rockwell International Corporation.

I am pleased to have this opportunity to tell you about the progress we are making at Rockwell in robotics and automation.

First, let me give you some idea of the scope of the company.

We expect our 1985 sales to be in excess of 11 billion dollars.

We have more than 120,000 employees. And a high percentage of them are engineers or hold other advanced technical degrees.

We have 5 major business operations and, under them, more than 40 divisions and other smaller business units.

Our products include NASA's Space Shuttle orbiter, the B-1B aircraft, marine navigation systems, telecommunications, avionics, printing presses, truck axles and brakes, valves—meters and light vehicle components. Earlier this year we acquired Allen-Bradley, a leading manufacturer of industrial automation equipment and systems.

We operate in 285 locations on six continents.

Certainly, the drive for improved productivity and quality are not new for Rockwell, or American industry. We all have been trying for years to get greater productivity and quality.

Over the past several years, we have evolved at Rockwell a structured and disciplined methodology to insure that productivity and quality are integral parts of our business strategies.

Automation and modernization have been one of these key strategies and we appreciate this opportunity to share with you a few of our activities in automation because we believe this is one route by which U.S. industry can enhance its competitive position worldwide.

All of us recognize the strong contribution that capital makes to this improvement process and we have been investing aggressively for major programs, new products, and especially for productivity and quality improvements.

We have spent over 3 billion dollars on new facilities, equipment and systems since 1980—and we estimate that about 66 percent of all these expenditures fall into the categories of cost reduction, automation and modernization.

Here are some areas of investment that deserve special mention.

For instance, we have moved aggressively in the development and implementation of CAD/CAM technology and have spent well over 200 million dollars for capital equipment throughout the company. Our investment in software development that is unique to our individual businesses is significantly higher than that.

CAD/CAM currently is being used by more than 95 percent of our operating divisions throughout the world—with very good results.

In one case, major aircraft frame components were designed on a CAD system as full three-dimensional components. A frame was later selected to be converted to a forging by an outside vendor.

The 3-D database was electronically transmitted from Rockwell to the vendor where they were able to create the forging design, without drawings, directly from the 3-D database—at significant savings in time and cost.

Rockwell is investing almost 500 million dollars every year in computer hardware/software, office automation, local area networks and telecommunications to support engineering, manufacturing and information system technology areas.

We have also added a Cray super computer to our scientific computing resources in the last year. This 10-million-dollar computer will permit more effective payload, structural and thermal analysis on Space Shuttle, Space Station and B-1B, to name a few applications.

These investments have resulted in the ability to improve both our product design as well as our manufacturing processes. We are also involved in a number of modernization projects across many of our government businesses.

We are a firm believer in joint government/industry programs that provide modernization incentives and we are experiencing the advantages to be gained through them.

As an example Rockwell has invested about 100 million dollars in a major facility at Palmdale, California, for final assembly and checkout of the B-1B's.

An important feature of this complex is a computerized checkout facility for the aircraft.

Four completed aircraft can be accommodated at one time, and up to 10 systems can be checked simultaneously.

The result is that B-1B systems can be checked out in about 4 weeks—which compares with about 4 months using traditional methods.

Here are examples of some other programs.

Within our Defense Electronics Business we have recently completed a state-of-the-art Gallium Arsenide (G_AA_s) facility in Newbury Park, California, for pilot production of very large scale integrated circuits under a DARPA contract. Rockwell has invested 14 million dollars in a facility which will manufacture the next generation, low-power, radiation-hardened chips that are capable of operating 5-to-10 times faster than current technology.

Our Rocketdyne Division is currently working with NASA under a 10 million-dollar development program for advanced TIG welding using robotics. Rockwell is investing an additional 5 million-dollars for equipment. The program uses advanced sensors for weld penetration and seam tracking and interactive graphics for off-line robotics programming. This welding modernization program will reduce costs and improve quality on Space Shuttle main engines and components.

At Autonetics Strategic Systems Division we have developed high-precision robots to clean high tolerance gyro components for inertial guidance systems. These five-axis units cut time from 4.5 hours to 14 minutes, an improvement factor of 19. At the same time they also made a significant improvement in quality.

We have experienced strong growth in the application of robotics in all our businesses.

We have gone from less than 10 units in 1979 to more than 150 units estimated for the fiscal year which just started.

Most of our applications are in the more traditional machine loading and unloading and material handling areas with approximately 70 percent of our robots being used for these applications.

A very good example of flexible automation at work is the "factory-in-a-factory" built by our Allen-Bradley subsidiary in Milwaukee, Wisconsin.

This completely automated facility produces a world design motor starter line of products and that in itself is an interesting story of global competition.

Briefly, foreign starter manufacturers were beginning to sell into the U.S. market with a lower priced product. Allen-Bradley's response was a strategic investment of about 15 million dollars to design an automation showcase and enter the market with a world product that could be sold competitively in all markets.

The plant capacity is 600 starters per hour. They come in two sizes and 125 variations and may be produced singly or in batches in any combinations.

Production is driven by orders entered on terminals at Allen-Bradley distributors worldwide and sent directly to a mainframe computer in Milwaukee.

Starting with raw material such as plastic molding compound and metal stock, the plant makes just the number of controllers in the specific mix to meet that day's orders.

Orders received are shipped the following day and the necessary invoices are created as part of the shipping process.

And, although it's fashionable to talk about advanced manufacturing concepts

and automation technology, in some cases we've also realized some pretty impressive productivity improvements with modest investments.

In many of our factories, we've simply rearranged our existing equipment and machinery to take full advantage of cellular manufacturing opportunities.

With cellular manufacturing and improved production control systems, we've seen direct labor reduced by 50 to 60 percent . . .

Production rates increased by 100 percent . . .

Set-up time cut by 30 to 70 percent . . .

Fork lift moves cut by 75 percent . . .

Inventory turns doubled . . .

And we've seen enormous improvements in throughput.

In a typical example one of our manufactured parts used to be in process for 54 days, shuttling around from one department to another.

With celluar manufacturing, the whole process now can be accomplished in as little as 6 days.

We currently have over 175 manufacturing cells in our company.

In many of these manufacturing cells we've added robots for additional flexibility.

We recently brought on line, at one of our mid-western plants, a cell that turns out small iron valves. This cell produces one completely machined valve body every 26 seconds.

When we add a duplicate set of processes to the cell, it will produce a valve body every 15 seconds—the most efficient production in the world for this type of valve.

Automation accomplishes many things: it improves flexibility, provides the opportunity to rapidly respond to changing market demands, increases quality, and provides a lower overall cost base.

At the same time it brings about a shift in the technical skill level requirements for all employees.

At the operator and process level there is a distinct need for broader multi-disciplined skills.

We are providing specialized training for literally thousands of our people and we are now in the process of refining and shaping the focus of our training techniques.

As an example, over 10,000 of our people have been trained in statistical process control techniques and these process control methods are being used by more than 70 of our plants.

We have learned that our automation and modernization efforts can only be successful through people initiatives, and we know that people make the greatest contributions to improved quality and performance when they are involved in the process.

Many companies have been very successful in moving toward more worker participation in decision making at the plant level.

At Rockwell we have several plants where we have planned for the integration of people and technical systems long before the plants were built.

These plants, located in both the U.S. and Great Britain, had their specific operating procedures and employee practices literally designed by employee teams.

This cooperation that lead to the successful new plant design process has continued in day-to-day operation, resulting in factories that are not only productive but are great places to work.

These plants have achieved greater production levels, very high quality, and an extremely low level of absenteeism and employee turnover.

Even though these plants are highly automated they have some additional ingredients—such as an all salaried workforce, fewer levels of management, simplified job classification structure, and group incentive programs.

As we continue to automate our factories, we have not lost sight of the fact that we must do a better job in the professional and white collar areas.

We are focusing considerable resources on this aspect of the business, just as we have done on the shop floor.

In conclusion, broader work skills among all our employees require significantly broader levels of education and training. These new levels of automation mandate a more cohesive relationship between employees, machines and technology. Education and training programs must consider the new integrated socio-technical environment.

OPPOSITION TO "FLAWED" EQUITABLE PAY BILL

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. HUBBARD. Mr. Speaker, recently the House passed H.R. 3008, the Federal Equitable Pay Practices Act, legislation about which I was contacted by many of my constituents and other Kentuckians across the State.

I would like to share with my colleagues the letter I received from my fellow Kentuckian, James E. Davis, vice president and manager of employee relations, of Whayne Supply Co. in Louisville, KY. Jim Davis' comments regarding the flawed H.R. 3008 should be interesting to my colleagues, particularly his views about equal pay for equal work and his concern that the legislation is a step toward supplanting traditional market forces in the private sector.

The letter to me from Jim Davis follows:

WHAYNE SUPPLY CO.,
Louisville, KY, August 30, 1985.

Hon. CARROLL HUBBARD, Jr.,
Rayburn House Office Building, Washington, DC.

DEAR CONGRESSMAN HUBBARD: We urge you to vote "No" on H.R. 3008, "The Federal Equitable Pay Practices Act," when it comes to the floor in September. This is a flawed bill because the concept on which it is based is erroneous. This legislation is much more than a mere study of the federal work force to determine if discrimination exists. It endorses the controversial and ill-conceived idea of comparable worth. Such a move will undoubtedly be the first step toward imposing comparable worth on the private sector.

Certainly men and women performing the same job should be paid the same wages. The Equal Pay Act mandates equal pay for equal work. And Title VII of the Civil Rights Act prohibits discrimination against minorities or women in hiring, promotion, pay and training. Wages should be determined by the market economy thereby reflecting the free will of individuals moving freely between job opportunities.

Comparable worth, however, goes far beyond the current law. It is based on a theory of equality of occupations—a concept rejected by all but one lower court in this country. Supply and demand remains a primary factor for setting wages within the private sector. Comparable worth rejects supply and demand as a valid method of setting salaries, and replaces it with someone's concept of intrinsic worth of occupations.

H.R. 3008 sets up a super-agency, "The Pay Equity Commission," comprised of 11 political appointees to select a job evaluator to review both the blue and white collar jobs in the federal government. Any unexplained differences in pay between jobs which are determined by the consultant to be "equivalent in totality" will be reviewed by the Commission. The Commission, who has no expertise in the civil rights area, will then decide how much of the wage gap is the result of discrimination. This is comparable worth. It is a bad idea, which would be totally unworkable in the private sector. In the public sector, it will result in salary increases and will do nothing to eradicate discrimination. I urge you to vote no on this legislation.

Sincerely,

JAMES E. DAVIS,
Vice President,
Manager, Employee Relations.

MARK CHECCHIO HONORED BY NAVY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. RODINO. Mr. Speaker, I am very honored today to call attention to Lt. Comdr. Mark Checchio, who has been given a commendation by the U.S. Department of the Navy. I have known Mark and his family for many, many years, and it is with great pride that I insert the following letter in the RECORD. It is from his commanding officer, and it details the reasons why Mark Checchio is so deserving of the Navy's "Topcat of the Year" award.

DEPARTMENT OF THE NAVY,
FIGHTER SQUADRON FIFTY-ONE,
San Francisco, August 14, 1985.

From: Commanding Officer, Fighter Squadron Fifty-one.
To: Commander Fighter Airborne Early Warning Wing, U.S. Pacific Fleet.
Subject: Topcat of the Year Award.

1. In accordance with reference (a), Fighter Squadron Fifty-one proudly nominates Lieutenant Commander Mark Checchio for the 1985 "Topcat" award. His superior performance in the fighter community during the past year should rank him "top choice" among those competing for this award.

2. LCDR Checchio is a "superstar" whose individual achievements during the past year, both on the ground and in the cockpit, make him uniquely eligible for this prestigious award. His business is carrier based anti-air warfare, and he is a master at it. Mark is serving on his first tour as an F-14 pilot following pilot transition training. Prior to that, he served as a RIO in F-4's and F-14's and as an instructor RIO at Navy Fighter Weapons School (Topgun).

3. During the squadron's recently completed Western Pacific and Indian Ocean deployment aboard U.S.S. *Carl Vinson*, Mark established himself as the acknowledged AAW expert in both the squadron and the Battle Group. Due to his extensive operational background, he was selected to head

this squadron's revolutionary AAW department. Every success enjoyed during the deployment in the AAW arena resulted directly from Mark's efforts. Specifically, he:

Exhaustively researched and personally authored a detailed secret report on Soviet Anti-Carrier Warfare tactics used in the regimental sized simulated attack made against the multi-carrier battle group on the night of 2 December 1984. Both the report and, more significantly, Mark's superb briefings on the same strike have received widest possible dissemination, including Flag level. VADM McCarthy, COMSEVENTHFLT, personally used this report to brief CINCPACFL, CNO and Navy War College.

Marrying the long-standing "Vector Logic" AAW tactics (which Mark helped develop six years ago) and the newly developed "Chainsaw" Long Range Intercept tactics, Mark authored a major CVW-15 AAW Tacpro, which was so detailed and readable, that even new aircrews not familiar with AAW procedures easily learned the tactics.

Mark organized, planned, briefed and executed the first Pacific Fleet "Chainsaw" exercise which enabled Air Wing Fifteen F-14's to launch from the U.S.S. *Carl Vinson* and successfully intercept simulated Soviet long Range Bombers (USAF B-52's) in excess of 500. NM from the Battle Group.

4. Mark's numerous contributions to the defense posture of Battle Group Charlie reached a pinnacle on 3 December 1984, during flight operations in the Sea of Japan. Soviet reaction to the dual CVBG presence had been moderate to heavy but confined to long range aircraft only and had not included tactical armed threats. LCDR Mark Checchio launched in an F-14 and assumed a combat air patrol position between the carriers and Soviet homeland only 80 miles away. After about forty-five minutes he received a vector to investigate two armed, Soviet Mig-23 Floggers rapidly approaching the outer edge of the Asian Eastern Buffer Zone.

LCDR Checchio immediately turned his aircraft toward the intruders and gained rapid, radar acquisition and visual sight of the approaching aircraft smoke trails but realized he was rapidly approaching the buffer zone. Sensitive to the international implications of violating Russian airspace, yet fully conscious of the dangerous threat that two armed Soviet tactical airplanes presented to him, LCDR Checchio sacrificed the radar advantage and reversed course to draw the two Russian pilots well into international airspace, all the while maintaining visual sight of the threat.

Once the two Soviet airplanes were well into international airspace, LCDR Checchio rapidly reversed course into the threat. Starting from a neutral head-on aspect and taking less than a minute, he skillfully maneuvered his airplane to an advantageous, dead six o'clock position on both aircraft which provided him ample opportunity to record both Mig-23's armed with Apex and Aphid air-to-air missiles on videotape and precluded the Soviet pilots from gaining weapons firing parameters (enclosure 3). The two Soviet airplanes immediately turned and ran towards the safety of their own airspace and LCDR Checchio returned to station.

Fifteen minutes later, an armed Soviet SU-15 Flagon raced outside the buffer towards LCDR Checchio. Again, he skillfully maneuvered his aircraft into an advantageous, six o'clock position and captured the Flagon, armed with both IR and radar guided versions of ANAB missiles, on videotape while denying the Soviet pilot a weapons firing opportunity (enclosure 4).

Displaying superior tactical forethought and expert airmanship, LCDR Checchio not only prevented an international incident but successfully conducted the first modern day intercept of armed Soviet tactical airplanes and gained valuable tactical information for future exploitation by the various intelligence agencies. In view of the information gained and the discipline exercised during the engagement, LCDR Checchio was awarded the Navy Achievement Medal (enclosure 5).

5. Despite his relatively short career to date in the front seat of the F-14, LCDR Checchio has already earned a well-deserved reputation in the squadron and the Air Wing as a premier fighter pilot and tactician. Mark is a warrior who clearly displayed "The Right Stuff" when it counted. His significant contributions to the fighter community during the past year have had fleet-wide impact. Without a doubt, he is most deserving of recognition as the "Topcat" for 1985.

C.F. ZULLINGER.

DEMOCRATS AS DUCKPINS

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 17, 1985

Mr. FORD of Michigan. Mr. Speaker, the seeds of the so-called balanced budget amendment sponsored by Senators GRAMM, RUDMAN, and HOLLINGS in the other body are threatening to grow into a major reordering of this Nation's separation of powers. This budget-balancing black box, while achieving eventual parity between spending and revenues, would relegate the U.S. Congress into a reactive institution with a rubberstamp as its most effective club.

This point, and others, was effectively articulated in a recent op-ed piece by David Broder entitled, "Democrats As Duckpins," published in the October 16, 1985, edition of the Washington Post. I insert this exellent opinion for the benefit of my colleagues, Democrats and Republicans alike:

[From the Washington Post, Oct. 16, 1985]

DEMOCRATS AS DUCKPINS

(By David S. Broder)

When Sen. Gary Hart (D-Colo.) went on the radio last Saturday to denounce as "a tragedy and a travesty" the Republican-sponsored budget-balancing plan that sailed through the Senate last week, it was billed as the Democratic response to President Reagan.

Actually, Hart spoke for himself and 19 other Senate Democrats who opposed the plan. He did not speak for the 27 Senate Democrats who joined the Republicans in passing it.

Three of the six Democratic senators who have sought the party's presidential nomination, including Edward M. Kennedy of Massachusetts, supported the GOP plan. Three others, including Hart claimed it was "a political fraud," and voted against it.

The chairman of the Democratic Senatorial Campaign Committee, George Mitchell of Maine, opposed it, calling it "irresponsible and unacceptable." The chairman of the Democratic Congressional Campaign Committee, Tony Coelho of California, while favoring some changes, in arguing to fellow-Democrats that it would be smart politics to let it go into effect.

In short, what has happened is that the Republicans have rolled a political 10-strike with their deficit-cutting plan, and the Democrats are flying in every direction. With a single move, the GOP has taken the deficit issue, which seemed its greatest burden, and deftly shifted the monkey to the Democrats' back.

The substantive effects of the plan on both government programs and on the balance of power between the executive and legislative branches are important enough to merit separate comment. So many questions were left unanswered in the Senate's rush to judgment that it is well the Senate-House conference on the measure will be protracted.

But politically, it is evident already that the late-session initiative by two junior Republican senators, Phil Gramm of Texas and Warren Rudman of New Hampshire, has thrown the Democrats for a loop.

Beyond the obvious political posturing of such potential 1988 rivals as Kennedy and Hart, there was both intellectual confusion and fundamental strategic disagreement among Senate Democrats. Smart southern progressives such as Dale Bumpers of Arkansas and Lawton Chiles of Florida could not agree. Neither could canny conservatives such as Sam Nunn of Georgia and Bennett Johnston of Louisiana. Nor could liberal freshmen such as Paul Simon of Illinois and Tom Harkin of Iowa.

The disarray among House Democrats is, I suspect, going to be even greater, and show even more clearly the basic cleavages inside the old Democratic coalition.

The members of the black caucus and others representing urban and rural districts where government aid is a necessity, not a luxury, have been increasingly restive as the leaders of their party have accepted the philosophy of budget-cutting and avoiding a tax-increase.

They went along reluctantly with those, like Speaker Thomas P. (Tip) O'Neill (D-Mass.), who said Reagan would murder the Democrats politically if they came out for a tax hike, even as they saw aid to their cities and their constituents whittled away.
